Mr. FASCELL. Mr. Speaker, I rise in support of House Concurrent Resolution 289, expressing the sense of Congress in support of the Lithuanian people in their desire to seek independence.

We, the American people, must remain firm in our support and conviction in seeking to bring about Lithuanian independence. In my view, the United States Government must spare no effort in seeking cooperative efforts to gain Lithuanian independence. House Concurrent Resolution 289, represents one small step in seeking to bring about this end.

I strongly recommend and support our passage of House Concurrent Resolution 289 which congratulates the peoples of Lithuania on their recent multiparty elections and wishes the new Government of Lithuania well in its efforts to restore Lithuanian independence. This resolution is straightforward in urging the Soviet Union to both recognize and respect the aspirations of the Lithuanian people in seeking independence and encourages the Soviet Union to enter into immediate, meaningful, and constructive negotiations with the new Lithuanian Government on an equal basis in order to reach agreement on Lithuanian self-determination.

House Concurrent Resolution 289, also serves to caution the Soviet Union to refrain from political, military, or economic intimidation of Lithuania and warns that the use of force by the Soviet Union against Lithuania would have serious repercussions for the current and evolving state of United States-Soviet relations. Clearly, any such actions by the Soviet Union would be both grave and tragic. In this regard, House Concurrent Resolution 289, expresses the belief of Congress that the Soviet Union has no right to force the Lithuanian people from their peaceful exercise of their democratic rights. Finally, House Concurrent Resolution 289, supports the President in his commitment to the doctrine of negotiation and urges him to reaffirm his personal commitment to an independent and democratic Lithuania in an active way.

As the situation of Lithuania demonstrates, the age of democracy is upon us. It is my hope that passage of House Concurrent Resolution 289, further facilitates the dawning of this new era in world affairs.

Mr. MICHEL. Mr. Speaker, I rise in support of the resolution.

Lithuanian independence is an issue that in recent weeks has come to transcend questions of national sovereignty and diplomacy. It has become an issue that symbolizes not only the fate of Lithuania, but the fate of Mr. Gorachev's glasnost and perestroika.

The best solution—the only solution that meets the standards of international justice—is one in which the voice of Lithuanian people is heeded and ultimately acted on.

Lithuania, in the official view of our Government, as enunciated under no fewer than 10 Presidents of the United States, is "in" but not "of" the Soviet Union. The only question is how Lithuanian independence can become a reality in the full sense of the term.

If intimidation and the show of force succeed, Mr. Gorbachev may think he has won a victory, but it will be short lived. Glasnost and perestroika initiatives will have suffered irreparable, perhaps fatal, damage. His relationship with our country will seriously deteriorate. I cannot believe this is what he wants.

If the spirit of glasnost and perestroika means anything at all, aside from rhetorical flourishes, it means not only listening to calls for justice, but acting upon them.

It is reported in today's New York Times that Lithuanian President Landsbergis says it is not a question of power being "handed over the very next day." In making that statement he has shown admirable diplomatic sensitivity at a critical juncture. Mr. Gorbachev should be encouraged to do the same.

At a time like this, when the wrong word, even the wrong intonation, can have a profound effect on events, the very last thing the United States needs is an emotional, dema-

gogic reaction. We cannot afford the luxury of provocative rhetoric if it is the Lithuanian people who are ultimately going to pay the price.

There are different kinds of courage and one kind is the courage to take care, to be responsible while being responsive.

I believe this resolution has that quality. It reaffirms our commitment to the independence of Lithuania and, at the same time, avoids the easy appeal to emotion that costs us nothing, but that might cost the Lithuanians everything.

The courage to take care, especially when the lives and the independence of others is at stake, may not appeal to everyone, but it is the only moral and, in my view, effective way to go in this case.

Mr. GEPHARDT. Mr. Speaker, in this tense and critical moment—the first real crisis of the post-cold war era—it is important for the people of Lithuania and the Government of the Soviet Union to how that the American people are as one on this issue. When it comes to standing for freedom, we are not divided by party or ideology; we are united in conscience.

President Bush is right to emphasize the need for a peaceful solution and self-determination. But the Congress, too, has a role to play. As the branch of government closest to the American people, we can best articulate what is in the hearts of our countrymen. The American people are saying that they want a peaceful solution to the Lithuanian situation—and they want the outcome to be a free Lithuania.

Mr. Speaker, the American people, and the American Government, support freedom and self-determination for the people of Lithuania, and we believe President Gobachev must only pursue a peaceful resolution of this crisis; one that respects those principles. The best way for the United States to affect the situation in Lithuania is by using our influence with the Soviet Union, to help them understand that the use of force will definitely harm our relations.

This resolution does just that—and we are indebted to Representative DURBIN, Chairman FASCELL, and Chairman HAMILTON for bringing this resolution to the floor. I urge my colleagues to join me in giving support to the legitimate aspirations of the Lithuanian people.

Mr. LAGOMARSINO. Mr. Speaker, as an original cosponsor of House Concurrent Resolution 289, I rise in strong support of this timely measure congratulating the Lithuanian people on their recent successful multiparty elections and their decision to restore Lithuania's rightful independence and urging the Soviet Union to respect this right of Lithuanian self-determination. As a member of the Baltic Freedom Caucus, I also supported incorporating this resoluton as an amendment to our foreign aid bill.

The new Lithuanian Parliament voted 124 to 0 to declare independence from the Soviet Union. This dream of self-determination and independence is finally beginning to be realized after 50 years of illegal Soviet occupation that began with the illegal Hitler-Stalin secret pact. We have never recognized the annexation of this once independent nation into the Soviet empire. Today, I'm encouraged that we are officially expressing congressional—the American people's—support for the Lithuanian people and their efforts to regain their sovereignty.

While I am very encouraged by events in this Baltic State, I am also very concerned about Soviet reactions to the Lithuanian people's choice and about ultimate Soviet intentions. This resolution recognizes the great uncertainty of this time. Unlike the incredible events in Eastern Europe, the Communist Soviet Government does not view Lithuania, or the other Baltic States of Latvia and Estonia, as satellites but as integral parts of the Soviet Union. Lithuania is a very important, very crucial test case and precedent setter for the Soviet Union. How they will continue to react, I don't know. While so far President Gorbachev has shown restraint, he has flexed the Red army's military muscle through seizing various strategic sites in Lithuania and conducting threatening military exercises in this State.

By supporting and encouraging the Lithuanian people, I believe that we are sending a strong message to the Soviet Union. For perestroika to work and Gorbachev to succeed, the Soviets desperately need Western assistance and trade. I believe we should keep the Soviets' handling of this Lithuania situation in the forefront during our consideration of increasing ties with and benefits to the Soviets. We care about events in Lithuania. We care about the freedom of the Lithuanian and other captive peoples. How they are treated will directly impact on the future of United States-Soviet relations.

This resolution also wisely urges the President to gain the support of our allies in both helping Lithuania directly, through credits and technical assistance, and indirectly through standing firm with us against any aggressive Soviet moves. As in Eastern Europe, United efforts will lead to much faster and more encompassing success.

I am encouraged by this morning's news that both the Lithuanian Government and the Soviet Government are trying to find ways to diffuse the increasing tensions. I believe our outspoken support will help resolve this issue in a positive way—one that results in true Lithuanian independence.

I am pleased that this resolution has been expeditiously considered by the Foreign Affairs Committee, upon which I serve, and now by the full House. I urge my colleagues to join me in strongly supporting it. Thank you.

Mr. DURBIN. Mr. Speaker, over 3 weeks ago, the new Government of Lithuania declared its independence from the Soviet Union. This historic act was taken with the expectation that Lithuania's friends in the West would follow their warm words of encouragement with moral and practical steps of support.

It was the United States, after all, that for 50 years refused to recognize the forcible annexation of Lithuania by the Soviet Union. Our unswerving observance of the nonrecognition policy had kept alive hopes during the long, dark period of Soviet rule for a free and independent Lithuania. Who would have questioned that the West, upon hearing of Lithuania's independence, would not welcome her back to the family of nations?

Certainly not President Landsbergis and the people of Lithuania. For 3 weeks, they have waited courageously for the West to recognize their accomplishment and support them in their quest for constructive negotiations with the Soviet Union.

They have done so in an atmosphere of military and psychological intimidation. Tanks have rolled by the Parliament building, Soviet fighter planes have flown low over the capital of Vilnius, Soviet troops have stormed Lithuanian hospitals and beaten and detained deserters from the Soviet Army. Just this past weekend, the Soviets for the first time took over an agency of the Lithuanian Government, the state prosecutor's office, and installed their own henchmen.

Through it all, President Landsbergis and his people have waited to hear from us, first with great hope and now with deepening disappointment. Why is it, they ask, that our friends have not come to our side? Why is it that the West cannot detect in the increasingly hostile Soviet response a hardening of will, one that preys on the moral ambiguity of others?

I hope, Mr. Speaker, that the House of Representatives will not allow these questions to go unanswered, and that we will express our support for the people of Lithuania by passing House Concurrent Resolution 289. I would also ask that an appeal issued by President Landsbergis and his government to the Congress, as well as a recent statement by Lech Walesa, be entered into the RECORD. Two courageous men, each with a lifetime of experience living under Soviet domination, asking for one thing: That all nations of the world, including the Soviet Union and the United States, recognize the aspirations of the Lithuanian people to be free.

VILNIUS, MARCH 29, 1990.

DEAR SENATORS AND CONGRESSMEN: By the will of the people of Lithuania, we, the Supreme Council of Lithuania, were elected on a platform to reestablish the Republic of Lithuania, continuing its statehood, returning it to Europe and to the family of free nations. And we have done it. But now the freedom of Lithuania is in great danger.

For this reason, I would like to state very clearly:

Support for Lithuania is support for freedom and democracy in Eastern Europe. This support will also undoubtedly help Mr. Gorbachev: it would stop him from making a great mistake.

The recognition of the government of the reestablished Republic of Lithuania that we request is a very important step towards strengthening peace in the world. As we wait with strong hearts and with no weapons in our hands, we await your help in this difficult struggle against militarism and aggression, in this struggle for peace and justice.

Yours, with trust and hope,

VYTAUTAS LANDSBERGIS,
President of the Supreme Council of the Republic of Lithuania.

STATEMENT OF LECH WALESA TO PRESIDENT MIKHAIL GORBACHEV WITH RESPECT IN RECENT EVENTS IN LITHUANIA

GDANSK, POLAND,
March 27, 1990.

To: Mr. Mikhail Gorbachev, President of the U.S.S.R., Moscow.

DEAR MR. PRESIDENT: The beginning of the policies of glasnost and perestroika, the renunciation of the political monopoly of the CPSU, and the return of the nations of the republics the rights that had been taken away from them are all genuine achievements that have been made possible by your courageous policies. However, Soviet actions in Lithuania that do not conform to the spirit of the policies you have followed over recent years fill me with great anxiety.

Violation of Lithuania's sovereignty is an action directed against the process of creation of a new democratic European order. The history of the U.S.S.R. and Eastern Europe shows that the use of force and threats in order to solve world problems has been discredited, and condemned many times over by world opinion.

I appeal to you, Mr. President, to cease policies of military pressure and to begin a political dialogue with the Government of Lithuania.

LECH WALESA.

Mr. DOUGLAS. Mr. Speaker, today we will enact a very strong resolution calling for normalization of relations with Lithuania. In this morning's statewide paper in New Hampshire appeared an excellent editorial exposing Western infatuation of Gorbachev. Gorbachev is soon to show himself as Stalin with a smile. I commend Mr. Nackey Loeb for a well-aimed shot.

[From the Manchester (NH) Union Leader]

(By Nackey Loeb)

History Awaits Lithuania's Fate

As a key point in world history, what is about to happen in Lithuania deserves every bit as much attention as the destruction of the Berlin Wall.

Right now, America must mostly watch and wait, for it is Gorbachev who must make the next move.

However, in keeping with our national commitment to stand on the side of those who seek freedom, we should have the guts to recognize the government of Lithuania. It may seem like a meaningless gesture to us. But to the Lithuanian people, such recognition might give them the strength they need to continue the battle.

When Gorbachev plays his cards, as he must, we will finally know the real man with the smiling face and well-tailored suits. If he throws the full forces at his command into subduing the Lithuanian nation, then we will know that we have been conned by a leader in need of Western acceptance. And, if not, communism might be seen to go down in defeat in the near future.

Lithuania is where it must happen. Despite the terrible death and destruction perpetrated by communism through the years, it has failed to dim the light of freedom, which burns yet in the hearts of people.

A year ago, no one thought it possible that the Berlin Wall could come down. Now, as we watch the situation developing in Lithuania, those who considered communism invincible may have to change their minds about that as well.

Mr. YATRON. Mr. Speaker, I strongly condemn the recent steps of the Soviet Government to suppress the Lithuanian independence movement. The brave Lithuanian people have taken a bold step to realize their democratic aspirations. They have done so peacefully and have acted consistent with the Helsinki Final Act, to which the Soviet Union is a signatory.

President Gorbachev has consistently maintained that he will not use force in addressing the Lithuanian question. I call on him to keep this pledge and to resolve the situation peacefully and through negotiations. The Lithuanian leadership has shown tremendous courage, fortitude, and a willingness to discuss their intentions amicably with the Soviet Government.

President Gorbachev should put an end to the blatant harassment, threats, ultimatums, and intimidation. I am deeply concerned that the takeover of certain buildings, the apprehending of the Lithuanian troops, the Soviet troop movements and helicopter overflights might serve as a prelude to more severe action. Soviet use of force in Lithuanian, will produce unpredictable and severe repercussions in United States-Soviet bilateral relations.

I strongly support House Concurrent Resolution 289. It sends a timely and important message not only to the Soviet leadership and the Lithuanian people, but to all those concerned about respect for human rights.

The resolution congratulates the Lithuanian people on their recent elections and efforts to establish democratic institutions and independence; it also calls on the Soviet Union to refrain from the use of force and to engage in peaceful negotiations with Lithuanian representatives. The measure further urges the President to normalize diplomatic relations with the Lithuanian Government and to seek support among our allies for Lithuanian self-determination.

As chairman of the Subcommittee on Human Rights and International Organizations, and as a primary sponsor of House Concurrent Resolution 289, I will continue all my efforts in support of the Lithuanian people as they continue to overcome the years of Soviet domination.

The United States has never recognized the illegal Soviet incorporation of the Baltic States, including Lithuania. I call on the President to reaffirm and to demonstrate our commitment to an independent and democratic Lithuania.

Mr. KOSTMAYER. Mr. Speaker, in 1776, embracing the principles of freedom and self-determination, we declared our independence from King George III. Over 200 years later, another declaration of independence, has occurred: The declaration of Lithuania's independence from the Soviet Union.

In multiparty elections held on February 24, 1990, the people of Lithuania gave a clear mandate to their new legislators for the restoration of national independence. On March 11, 1990, the new parliament of Lithuania demonstrated great courage in exercising this mandate for democracy and self-determination by officially declaring the restoration of an independent Republic of Lithuania.

The Soviet Union, which in 1940 forcefully occupied and annexed Lithuania as a result of secret agreements between Hitler and Stalin, refuses to recognize the will of the Lithuanian people. The Soviet Government, through the use of military intimidation and economic threats, is preventing the Lithuanian leadership from carrying out its governmental functions. This is occurring even though last November the Soviet Congress of People's Deputies declared the Soviet-Nazi Pact to be null and void and the annexations illegal.

It is crucial that the United States make clear its support for Lithuanian sovereignty and the Government of the Republic of Lithuania. I urge the President to extend diplomatic recognition to the duly elected Government of Lithuania. Additionally, the President must call on the Soviet Union to refrain from further acts of coercion or intimidation through military, political, or economic means and to immediately enter into meaningful negotiations with the Lithuanian Government. There must be no doubt that our relationship with the Soviet Union will be strongly affected by Soviet behavior in Lithuania.

The Lithuanian people have made plain their wish for freedom, and it behooves us, as responsible leaders of a nation grounded in that shared principle love of freedom, to support the Lithuanian people in their valiant struggle for independence.

Mr. PORTER. Mr. Speaker, I rise in support of House Concurrent Resolution 289, and commend the authors of the resolution and the committee for moving it to the floor in such an expedited fashion.

I fully support the longstanding United States position that rejects the incorporation of Lithuania and the other Baltic States into the Soviet Union. The pact signed in 1939 between Stalin and Hitler was disgraceful. It represents the worst of an era in European history characterized by the complete abandonment of individual choice and national identity.

All nations of the world who value human rights and personal freedoms should denounce the agreement and support self-determination for the people of Lithuania.

The current tension in Vilnius represents President Gorbachev's toughest test. It was his reform that allowed the people of Lithuania to speak openly about their longfelt desire and right to self-determination. And it was Mr. Gorbachev who first allowed open public discussion of the shameful policies of Joseph Stalin. This discussion has led to the predictable demand of Lithuania and the other Baltic States to right the wrong that was inflicted on them 50 years ago.

President Gorbachev must not answer these cries with tanks and intimidation. The situation calls for negotiations and consensus, compromise and trust, not the heavyhanded and unjust Soviet policy of intimidation now being practiced in the streets of Vilnius.

As cochairman of the Congressional Human Rights Caucus, I urge all Members to support this important resolution and to continue to support the Lithuanian people in their quest for independence and self-determination.

Mr. SMITH of New Jersey. Mr. Speaker, Lithuanian President, Vytautas Landsbergis, has again sought agreement with the Kremlin to sit down and begin a dialog about the Republic of Lithuania's "legal status * * * in relation to the Soviet Constitution and international law." Yesterday, President Landbergis sent a communication to President Gorbachev

further explaining how the Lithuanians sought "by means of agreements and a gradual takeover of certain functions [how they] would consolidate independence."

The discerning leadership in Lithuania recognizes that their movement to full independence requires a gradual, systematic transfer of power to govern the territory. Mr. Speaker, the leadership of Lithuania and Soviet leader Gorbachev stand at the brink of a critical development in the Union of Soviet Socialist Republics. The world is watching—and hoping. Mr. Speaker, I believe we must stand with those who aspire democratic rights and national sovereignty—the newly restored Republic of Lithuania.

Mr. Speaker, at this crucial time the United States must reaffirm its commitment to an independent and democratic Lithuania. The United States has never recognized Lithuania's corporation into the Soviet Union and we must normalize diplomatic relations with the new Government of Lithuania. It is advisable that the United States appoint an ambassador demonstrating our commitment to and support for the new Lithuanian Government's decision, in response to the voters, to restore the independence of Lithuania. They need that international support.

Last week the Foreign Affairs Committee approved a resolution carefully outlining these concerns and calling on the Soviet Union to immediately enter constructive negotiations with the newly elected Government of Lithuania. The resolution, which I cosponsored, outlines United States concerns that political, military, and economic intimidation would impede the progress of negotiations and possibly diminish Lithuania's long-term economic viability. Mr. Gorbachev must refrain from these intimidating responses to the declaration of an independent Republic of Lithuania on March 11.

Mr. Speaker, I encourage my colleagues to support House Concurrent Resolution 289 which was reported out of the Foreign Affairs Committee last week. Time is not on our side on this issue. The United States position must be unambiguous and in support of the Lithuanian people who elected their new legislators in February and handed them a clear mandate for the restoration of independence for the Republic of Lithuania.

Mr. GILMAN. Mr. Speaker, I rise to express my strong support for House Concurrent Resolution 289, in support of the right of the Lithuanian people to independence.

On February 16, 1918, the people of Lithuania established a free and democratic nation-state. For the last 50 years, every administration since President Franklin Roosevelt's has offered unwavering support for the people of Lithuania in their quest for independence.

That quest for independence came to fruition on March 11, 1990, when the new and courageous legislature of Lithuania declared the independence of the Republic of Lithuania. Now, we here in the United States must demonstrate its unequivocal support for the aspirations of the Lithuanian people. This is a difficult period. The new Lithuanian Government will have to gain control over Lithuania's border and economy. In addition, it will need political support from the United States.

Last week the Soviet Union increased its attacks on the Government and people of Lithuania. From low-level aerial harassment to tanks marching through city streets, the Soviet Army has been unrelenting. On Friday March 30, Soviet Interior Ministry troops seized the building housing the Lithuanian Justice Ministry and installed a Soviet Military Procurator.

Mr. Speaker, this important resolution wishes the new Lithuanian Government well in its decision to carry out the will of the Lithuanian people. It also urges the Soviet Union to refrain from using force to stifle the changes taking place in Lithuania.

I commend the gentleman from Washington [Mr. MILLER] and the gentleman from Illinois [Mr. DURBIN] for their outstanding work on this measure, and I urge its unanimous adoption.

Mr. KLECZKA. Mr. Speaker and fellow Members, I rise today in support of House Concurrent Resolution 289, a measure supporting Lithuanian independence.

The urgency of Lithuania's struggle to regain its liberty prompted me to become an original cosponsor of this resolution and a founding member of the Baltic Freedom Caucus.

Now is the time for America to speak up for a small nation trying to reassert its sovereignty and reinstitute democracy.

We cannot, and must not, ignore Lithuania in its hour of greatest need. As Soviet military provocations increase daily, the administration has grown strangely silent.

While caution is an important element of diplomacy, we will not appear cautious if we allow Soviet tanks to crush Lithuania's freedom and to institute a brutal military occupation.

What sort of message would that send to our newly democratic friends in Poland, Hungary, and throughout Eastern Europe?

America values its improved relationship with the Soviet Union and its President, Mikhail Gorbachev—but surely not at the expense of Lithuanian freedom.

One of the most important provisions of House Concurrent Resolution 289 urges President Bush to take steps, at the earliest possible time, to normalize diplomatic relations between the United States and Lithuania.

While not welcome in Moscow, American moves toward recognition of the recently reestablished Republic of Lithuania would demonstrate our commitment to the new state and might ward off a Soviet invasion.

To delay further, only invites the Soviets to continue and to accelerate their gradual destruction of the new government. For 50 years, America has encouraged Baltic freedom—to not support it now would be unforgivable.

Mr. EDWARDS of Oklahoma. Mr. Speaker, tomorrow we will vote on a resolution concerning Lithuanian independence.

As a direct result of an agreement made by Adolf Hitler and Josef Stalin—two of the most tyrannical leaders in history—the Lithuanian people have suffered under Soviet oppression for half a century. But now, the Lithuanian people have taken the bold step of declaring independence from the Soviet Union. The United States must now stand firmly with what is right: support for Lithuanian independence from the Soviet empire. To remain silent at this moment when freedom is at stake in Lithuania is to acquisce in whatever President Gorbachev may do to retain his empire.

The United States Government has never recognized the forcible incorporation of any of the Baltic States into the Soviet Union. It is now time for the United States Congress to express its strong support for the brave people of Lithuania. Mr. Gorbachev has promised not to use force to deny the legitimate Lithuanian aspiration for independence—but at the same time Soviet tanks are rumbling through Vilnius, Red Army troops are occupying government buildings and members of the secret police are beating young men who have refused to serve in the Soviet Army. Gorbachev has ordered all Lithuanians to surrender their personal firearms—an ominous sign of his intent. The fact is that Gorbachev has already used force.

Mr. Speaker, this is a balanced resolution. We are all cognizant of the delicacy of the situation. No one in this body wants to undertake action which could spur the further use of force by the Soviet Union. But we must speak out. This resolution responds to the urgent appeal of the new President of the democratically elected Lithuanian Legislature by urging President Bush to take steps to normalize relations between the United States and Lithuania. It also calls upon the Soviet Union to enter into immediate negotiations with the new Government of Lithuania on an equal basis. And it sends a clear message to Gorbachev: any intimidation—whether it be through military, economic or political means—will place severe strains on United States-Soviet relations.

Mr. Speaker, the people of Lithuania have gone out on a limb for freedom and democracy in their country. The issue for Gorbachev and his policies could not be more clear: If he crushes Lithuanian freedom the way Stalin crushed Hungarian freedom in 1956 and the way Brezhnev crushed Czechoslovak freedom in 1968, Gorbachev can expect the same kind of United States response his predecessors received. The stakes could not be higher.

Mr. ANNUNZIO. Mr. Speaker, as an original cosponsor, I rise to express my strong support for House Concurrent Resolution 289, a bill to affirm the support of the House of Representatives with regard to the declaration of independence by the Republic of Lithuania.

For 50 years, the United States has condemned the forcible incorporation of the Baltic States, including Lithuania, by the Soviets. We have never recognized this illegal action, and every President from President Franklin Roosevelt to President Ronald Reagan has reiterated our longstanding commitment and support for the people of Lithuania in their quest for a free and independent state.

However, like many of my colleagues in the House of Representatives, I am frustrated and appalled that our President has not followed this longstanding policy, and has not taken a strong stand in reaffirming our country's 50-year position of nonrecognition of Soviet domination and incorporation.

After 50 years of our constant condemnation of the Soviets for their illegal occupation, was it too much for the people of Lithuania to expect that the United States and the other

Western powers would not immediately come to the aid of the Lithuanian people, and recognize the reassertion of an independent state—a free state forcibly and illegally taken away from them 50 years ago? After all, the Lithuanian legislature did not break away from the Soviet state; they were never a part of it, and the declaration of independence on March 11, 1990, is a restoration and reaffirmation of Lithuanian independence.

It is my strong belief that the President's silence on this issue is tragically helping to legitimize and recognize this illegal control the Soviets have maintained over the last 50 years.

Mr. Speaker, the United States must act. Democratic movements are sweeping across Eastern European countries, including the countries forcibly incorporated by the Soviets, yet the United States had remained silent.

I urge my colleagues in the House of Representatives to approve this legislation to demonstrate our unwavering support for the people of Lithuania in their quest for freedom, and more importantly, I urge President Bush to take immediate action to recognize the Republic of Lithuania as a free and independent state.

Mr. ROSTENKOWSKI. Mr. Speaker, I rise in support of House Concurrent Resolution 289, which expresses the right of the Lithuanian people to independence. I compliment the gentleman from Illinois [Mr. DURBIN] for his leadership in this matter and I am proud to be a cosponsor.

Ten years ago when Americans first got word of Poland's independent trade union, Solidarity, we reacted with caution and concern. This was especially so here in Washington. Word was passed that Solidarity, while moving toward our shared goals of democracy and freedom, had adopted confrontational tactics and was asking for trouble.

Let's face it, we Americans have grown used to orderly changes within a stable political process. It is sometimes too easy to forget that we have had our share of unrest and confrontation on the way to our cherished independence and freedom.

Thanks to the brave patriots of Lithuania, we are again reminded that freedom can seldom be won without confrontation, and that timing cannot always be neatly controlled. President Landsbergis and his countrymen have acted with courage and resolve. Americans must join them in their fight for democracy and freedom especially when it makes us nervous to do so.

House Concurrent Resolution 289 provides the support and the pressure that the people of Lithuania need. It urges the President of the United States to reaffirm his commitment to an independent and democratic Lithuania and urges him to move toward normalizing diplomatic relations with the new Government of Lithuania at the earliest possible moment. Finally, it urges the Government of the Soviet Union to refrain from acts of political, military, and economic intimidation.

I urge my colleagues to support the resolution.

Mr. YOUNG of Florida. Mr. Speaker, I rise in strong support of House Concurrent Resolution 289, legislation honoring the courageous efforts of the Lithuanian people that have brought them to the brink of freedom and independence for the first time in 50 years.

As the representative of one of the most active Lithuanian communities in the United States, I proudly have stood together on many occasions with them to remind the world of our hopes and prayers for freedom in Lithuania. In fact, a busload of Lithuanian-Americans from Pinellas County is on its way to our Nation's Capitol to be here Wednesday for final consideration of this resolution. For us, it is an exciting time to see what is happening in the world, knowing that Lithuania will be the next nation in the Soviet-bloc to regain its right of self-determination.

The people of Lithuania have shown the world that military power and Government oppression cannot suppress the burning desire for freedom. There is no denying the freedom movement that has swept so much of the world these past 6 months and nowhere does the desire for freedom burn brighter than in Lithuania. Despite 50 years of occupation and oppression by Soviet troops, and a continuing campaign by the Communist government to eliminate their cultural heritage, traditions, language, and religion, Lithuania is at the threshold of freedom and independence.

Lithuanian-Americans in Pinellas County, the United States, and throughout the world can take pride in the role they have played in providing support and encouragement to family and friends there. Our strong and vibrant local Lithuanian community has led a nationwide show of support for the people of this great Baltic State. We cannot, however, lessen our resolve to see a free and independent Lithuania. If the Soviet Union is sincere in expanding the freedoms and liberties of the Soviet people, then let them grant independence now to these peaceful and freedom-loving people.

Mr. Speaker, the United States is the beacon of hope for freedom-loving people throughout the world and it is important at this critical juncture in the history of Lithuania that we reiterate our steadfast support for its people and Government as they reemerge from the bonds of Soviet dominance and communism. This resolution today not only sends a strong message of support from the Congress, but it also puts the Soviet Union on notice that our Nation is closely watching its every action and that any continued dialog with the United States is dependent upon their response to the cry of freedom and independence from the Baltic people.

Ms. OAKAR. Mr. Speaker, I rise in support of House Concurrent Resolution 289. I would like to commend the gentleman from Illinois, Mr. DURBIN, for his work on this resolution. I would also like to thank the distinguished subcommittee chairman, Mr. HAMILTON, for bringing this legislation to the floor in such a timely manner.

When the Red army occupied the Baltic States in 1940, we refused to recognize their incorporation into the Soviet Union. Lithuania, Latvia, and Estonia had been sovereign republics and members of the League of Nations.

For 50 years, the United States has affirmed support for Baltic independence and opposition to aggressive expansion, with the dream that some day their nightmare of foreign occupation and oppression would end; 23 days ago the Republic of Lithuania restored an independent and democratic government. The dream the United States has supported for 50 years became a reality.

I urge President Gorbachev to respect the sovereignty by immediately ceasing political and military harassment and violence and to enter into negotiations on an equal basis with Lithuania on their future relations as neighboring countries. While the Soviet Union and Lithuania differ over whether Lithuania was ever legally incorporated into the Soviet Union, even the Soviet constitution recognizes the right to secession. Differences over the semantics of independence can be worked out. The point is, that the principle of Lithuanian independence be upheld.

It is also imperative that our country play a positive role in the Lithuanian Independence Movement. This is a brave nation that has applied the non-violent tactics and principles of Mahatma Gandhi and Martin Luther King to restore its independence, and they are calling for our support.

I urge President Bush to respond positively to the appeal of the Lithuanian people for recognition. This would keep faith with the position we have consistently taken for the past 50 years and it would strengthen the negotiating hand of President Landsbergis at the time when he and his nation are most vulnerable. Our support and attention can make the critical difference between independence and the loss of liberty and lives. Extending our hand to the new Lithuanian Republic would also negate the bitter fruits of the infamous nonaggression pact, struck by history's greatest mass murderers more than half a century ago.

In the past year we witnessed the continuation of the decolonization process, which was set into motion following World War II with the end of the British and French empires. Moscow will have to accommodate itself to the loss of its empire as well. Our country, itself a product of decolonization, must recognize the positive currents of history and support their flow toward freedom and self-determination. The brave Republic of Lithuania has taken a firm and unequivocal stand for independence; a stand that is firmly based on international law and the organized free will of the people.

For two generations, we supported the aspirations of the Baltic peoples. This generation of Lithuanians now affirms its right and its intention to rejoin the community of sovereign nations. As a nation of free men and women, we cannot forget our own origins and we cannot ignore our abiding commitment to freedom and independence. The United States now has the obligation to tell the Lithuanian people that we understand their struggle, we support their efforts and we recognize their republic.

I urge all Members to support this resolution.

Mr. BLILEY. Mr. Speaker, I stand here today to urge my colleagues to take notice of the secession crisis that is taking place in Lithuanian. It has been 3 weeks since the Lithuanian Parliament declared its independence from the Soviet Union yet already, Soviet troops are moving into the capital, Vilnius. They have

occupied the Lithuanian Communist Party headquarters and seized Lithuanian deserters of the Soviet Army.

Since 1795, the Lithuanian people have been forced to live under the religious, political, and cultural repressions imposed interchangebly by both the Russians and Germans. In 1920, Russian leaders signed a peace treaty with the Lithuanian Government recognizing full right of self-determination, freedom to secede from the state, full sovereignty and independence for both the Lithuanian people and their territory. However, with the outbreak of World War II, Lithuania, acting as a buffer state between the Soviet Union and Hitler's Germany, was one of the first to experience the aggression and fury of the war. As an occupied territory during the war, the Lithuanian people experienced communism and Soviet domination and eventually were completely subsumed into the Soviet Union.

I want to take this opportunity to point out that the Lithuanians have been fighting desperately for their independence, for the very freedoms we Americans have lead the battle to defend over the past several decades. The United States has never recognized the annexation of Lithuania into the Soviet Union so now is not the time for us to turn our backs on the people of Lithuania. They need our support and we have a responsibility to give them that support.

We have already witnessed that communism as a political and economic theory does not work. We have seen Mr. Gorbachev initiate some democratic and economic reforms in his own country as well as permit the release of the occupied Eastern bloc countries from the Warsaw Pact. The countries in the Eastern bloc have won their independence and are now basking in the freedoms that accompany that sovereignty. The United States has been supportive through all paths of assistance, yet we stand unheeding and uncommitted to Lithuania's cry for independence?

The United States has been a stalwart of freedom, protecting the rights that accompany sovereignty and democracy. The Soviet Union has occupied Lithuania for 50 years while we have denied that occupation. It is time for the United States to establish diplomatic relations with this Baltic republic. The United States must continue to preserve democracy for those who so desire to share in its fruits. We cannot sit by and let Soviet aggression place fear in the Lithuanian people. This cannot be another incident like that which took place in China last summer. Our support for freedom and democracy must not wane now as it did when the Communist forces of China ran down students who were peacefully making their voices heard for the freedoms they so desired. Lithuanians have the right to enjoy freedom as much as the Chinese students who frought for it almost a year ago. Communist aggression seems to have reared its ugly head once again, when unprecedented advancements away from the Communist theory had been taking place around the world.

Mr. Speaker, once again, I urge my colleagues to make their voices heard. We cannot allow the Soviets to think that we are reconciliatory when human rights and democracy are in question. We cannot allow the Soviets to feel that our trust for them is so deep that we cannot see the aggression that is taking place in Lithuania. The United States cannot look through the rose-colored glasses of emotion and faith in Soviet words. We cannot stand by and permit a peaceful revolution for democracy and freedom turn into a devastating show of force and violence. It is out responsibility to help protect the Lithuanian right to sovereignty and ensure them of our support for their battle.

Mr. WOLPE. Mr. Speaker, I rise in support of House Concurrent Resolution 289, a resolution in support of Lithuanian independence.

Mr. Speaker, 50 years ago the United States affirmed its commitment to democracy and self-determination by refusing to recognize the Soviet Union's illegal annexation of Lithuania. This decision remained the bedrock of United States policy toward the Baltic States and served as a source of inspiration to the Lithuanians, Estonians, and Latvians, who rightly assumed that they would always enjoy the support of the United States in their quest for freedom.

Now that Lithuania has taken the courageous role to declare its independence, we must be prepared to match our actions to our words. The resolution before the House today is a simple but very important statement which allows us to do just that. The resolution congratulates Lithuania on her efforts to restore independence, calls on the Soviet Union to refrain from using military force in the new republic and encourages the Soviet and Lithuanian Governments to enter into negotiations. Most importantly, however, this resolution urges President Bush to stand by our time-honored commitment to an independent and democratic Lithuania, free from the rule imposed on it by the Stalinist regime.

The past few weeks have been very trying for the newly formed Government of Lithuania. But under the leadership of President Landsbergis the Republic of Lithuania has demonstrated tremendous resolve and has held fast to non-violent means. It is now incumbent on the Congress of the United States to provide the moral and political support required during this crisis.

Mr. Speaker, I urge the support of my colleagues for this resolution.

Mrs. MARTIN of Illinois. Mr. Speaker, earlier this month in declaring the restoration of an independent Republic of Lithuania, the freely elected government of that nation acted boldly and with great courage.

In doing so, they put to its most rigorous test the commitment of General Secretary Gorbachev and the leadership of the Soviet Union to true reform. The Soviets are not reacting well.

While Moscow continues to respond in comforting tones to the concerns being expressed by the international community regarding their reaction to events in Lithuania, ominous steps have been taken. In the last several days Moscow has paraded its tanks through Vilnius, raided a Red Cross center and arrested Lithuanian citizens, occupied government buildings, and, most recently and most ominously, ordered more Soviet troops into Lithuania and all foreign journalists out. New thinking, it seems, doesn't preclude the use of old and tragically familiar methods.

In issuing their courageous declaration the Lithuanian people also put to the test America's long-stated commitment to a free and independent Lithuania. I'd give our side much higher marks than the Soviets, but I believe that our actions—including today's passage of House Concurrent Resolution 289—leaves something to be desired.

It is toward the Congress of the United States that people the world over look for support in the struggle for freedom, self-governance, and national self-determination. And it is from the Congress of the United States that the most unqualified support for that objective should come.

A clear statement from this body and from the Senate in support of immediate diplomatic recognition of the Republic of Lithuania by the Government of the United States would send the clearest possible and the most appropriate message to the leadership in Moscow: we do not regard Lithuanian independence as a matter for negotiation unless those negotiations are about when, and not about if or in what compromised form, independence will be recognized by the Soviet Union.

By our action today, I hope that we do not suggest either to the Soviets or to the Lithuanian people that the Congress of the United States is prepared to accept anything less.

Mr. BRENNAN. Mr. Speaker, I am very pleased at the bold move which the House took today in voting to pass a resolution supporting Lithuanian independence.

I strongly support this resolution, which underscores Congress' support of, and admiration for, the courageous people of Lithuania, and which urges the Soviet Union to recognize and respect the Lithuanian people's desire for independence and freedom.

For 50 years the United States has rightly refused to recognize the forcible annexation of Lithuania by the Soviet Union, and the beginning of the end of this illegal occupation took place 3 weeks ago when the newly elected Lithuanian Government declared its independence.

President Landsbergis, the Lithuanian Parliament, and the Lithuanian people have taken a bold and historic step toward democracy, and I believe the United States must strongly support their efforts. I call upon President Gorbachev to refrain from use of force, and to recognize the will of the Lithuanian people to be free.

Mrs. JOHNSON of Connecticut. Mr. Speaker, I rise in strong support of the resolution and of Lithuanian independence. Every year for the past 15 years, I have celebrated Lithuania's Independence Day of 1918 with Lithuanians in my district. They are proud of their heritage and proud of their friends and relatives in Lithuania who have struggled to keep the culture and heart of Lithuania alive throughout half a century of Soviet domination. Now, 50 years after Soviet tanks first moved in, Lithuania's independence again hangs precariously in the balance, and United States support for its freedom has never been so critical.

The United States has never recognized the forced occupation and illegal annexation of Lithuania by the Soviet Union. We have maintained the diplomatic missions established in

1922 when the United States and Lithuania exchanged ambassadors. I fully support Lithuanian independence. I oppose soldiers being beaten and dragged from Red Cross protection. I oppose the Soviet invasion of the office of the attorney general whose job it is to enforce the laws adopted by the democratically-elected Lithuanian government. I oppose the Soviet arms buildup in Lithuania as an attempt to intimidate Lithuanians who, with legitimate aspirations, have demonstrated a great, well-articulated willingness to negotiate solutions to the problems of Lithuanian and Soviet relations.

This resolution recognizes these issues and more and urges President Bush "at the earliest time possible to take those steps necessary to normalize diplomatic relations between the United States and the new Government of Lithuania." That time is now. We must openly support the courageous people of Lithuania in their search for independence.

Mr. BROOMFIELD. Mr. Speaker, I have no further requests for time and I yield back the balance of my time.

Mr. HAMILTON. Mr. Speaker, I have no further requests for time and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. HARRIS). The question is on the motion offered by the gentleman from Indiana [Mr. HAMILTON] that the House suspend the rules and agree to the concurrent resolution, House Concurrent Resolution 289, as amended.

The question was taken.

Mr. BROOMFIELD. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 5 of rule I and the Chair's prior announcement, further proceedings on this motion will be postponed.

GENERAL LEAVE

Mr. HAMILTON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on House Concurrent Resolution 289.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

OVERLY COMPLEX SMALL BUSINESS REGULATIONS

(Mr. DUNCAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. DUNCAN. Mr. Speaker, several weeks ago on the floor of this House, I said that Federal rules, regulations, and redtape are causing great harm to the small businesses of this Nation.

Now the Atlanta Constitution reports that approximately 400,000 small businesses have done away with their employee pension plans in the last 5 years for which statistics are available.

The reason: excessive and overly complex regulations.

The Atlanta newspaper said:

Small businesses across America are retiring their pension plans on grounds that federal regulations are making the owners prematurely old.

The business owners complain that federal regulations are too complex.

One businessman is quoted as follows:

They keep changing the law. If they'd leave the things alone, maybe we could learn how to deal with them.

A pension lawyer says in the same article:

Congress passes this general law, then you end up with 100 pages of complicated regulations trying to explain the law.

Today we seem to have a government, of, by and for the bureaucrats, instead of a government for the people.

Now, sadly, we find that our own Federal Government is causing millions of employees around the country to lose their pensions.

We all need to work to make our laws simpler and easier to understand so that they can be more effective and helpful to ordinary people.

MANY SMALL BUSINESSES SCRAPPING PENSION PLANS

(By Hank Ezell)

Small businesses across America are retiring their pension plans on grounds that federal regulations are making the owners prematurely old.

The business owners complain that federal regulations are too complex, the cost for attorneys and other outside advisers is too high, and the rewards to their businesses are too small to make employee pensions worthwhile.

"They keep changing [the law]," said Rockey Tripodi, a partner in Consulting Services Inc. of Atlanta. "If they'd leave the things alone, maybe we could learn how to deal with them."

Among small businesses, the number of pension plan terminations skyrocketed during the late 1980s. "We probably did more terminations last year than we did new plans," said Atlanta lawyer Ken Russell, who specializes in pension law. "It's been that way for two or three years now."

In 1987, the most recent year with complete statistics, 73,443 companies with fewer than 100 employees terminated their pension plans, according to the Internal Revenue Service.

That was down from a 1985 peak of 86,139, but significantly up from 27,628 in 1980. Experts believe the relatively high, late-1980s level of terminations will continue.

The overall trend is also down: 46 percent of the full-time work force had employer-financed pensions or retirement plans in 1988, down from 50 percent in 1979, according to the Social Security Administration.

That suggests that in small businesses, as well as large, fewer Americans in the future will have the protection of a company-backed pension as their retirements approach.

Historically, small businesses have been pension-shy. According to a 1988 study by the IRS, only 11 percent of the work force in firms with fewer than 10 employees are covered by pensions, including both defined-benefit and defined-contribution plans.

In defined-benefit plans, workers are promised a specified benefit after retirement, usually paid for by the employer and usually calculated according to earnings and years of service.

They are different from defined-contribution plans, which include most profit-sharing and 401(k) plans. such plans usually include amounts invested by both worker and employer, and the payout from them depends on the value of the investments when they are cashed in.

The small-firm numbers compare with pension coverage of 40 percent in firms of 50 to 99 employees and 67 percent in firms with 250 or more employees.

Business owners have a variety of complaints. Among them:

Complex regulations. "Congress passes this general law, then you end up with 100 pages of complicated regulations trying to explain the law," Mr. Russell said.

The cost of expert advice. "Every year when I would get the bill, I would just get livid," said Roy DeLafosse, president of Custom Plastics Inc. in Decatur. "My biggest problem was that we were paying $1,500 to $2,000 a year to have the funds monitored and have reports filed." The costs took a stinging bite out of the fund's investment income of about $4,000 or $5,000 a year, he said. The fund contained about $60,000 or $70,000 when Mr. DeLafosse terminated it last year.

Paper work goofs, even from the experts. "Every time I had to unsnarl something, I would get livid all over again," Mr. DeLafosse added.

On the other side of the equation, business operators argue, the pension plans offer no significant rewards. Mr. DeLafosse said his nine employees were not interested in retirement benefits. "They were interested in their spending power each week," he said. "We felt we were getting no benefit from an employee standpoint."

From Washington, D.C., the reaction to all those complaints is mixed.

"It isn't so much that the rule books are complicated as that Congress changes the rules so often," said Judith E. Bekelman, a spokeswoman for the Pension Benefit Guaranty Corp. That executive branch agency is studying the costs to business of running pension plans and the particular objections to various proposed changes. "Mostly what this administration is opposing is change for change's sake," she said.

On Capitol Hill, a Senate staff member who specializes in pension legislation said the most common complaint about small businesses is it not that they cancel pensions, but that they never establish any.

But she added that Simplified Employee Pension plans, which can be established without expert help by any company with 25 or fewer employees, have not become popular.

The required federal form is "no more than 10 lines," she added. "I can't think of how much easier you can get. There is an easy option for small business, and they're not taking it."

THE SQUEEZE ON PENSIONS

46 percent of private sector workers had company-financed pension plans in 1988, down from 50 percent in 1979.

At least 73,000 pension plans covering 100 or fewer employees have been terminated

each year from 1983 to 1987, the last year with full data. In 1980, the total was 27,628.

The smaller the firm, the less likely it is to offer a company-paid pension. Only 22 percent of workers in companies employing 10 to 24 workers had pensions in 1988. For firms with 250 or more employees, the figure was 67 percent.

COMMENT ON HURRICANE OFA

(Mr. FALEOMAVAEGA asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. FALEOMAVAEGA. Mr. Speaker, on earlier occasions I shared with my colleagues in the House the destruction of the Samoan Islands caused by Hurricane Ofa with winds in excess of 165 miles per hour. This hurricane ravaged the islands and left many people without food, shelter, or water.

Mr. Speaker, the Federal Government's response to this natural disaster has been tremendous, and I commend our Federal officials from the administration and the officials from the Federal Emergency Management Agency for their quick and decisive action immediately following the hurricane's departure from the territory.

Mr. Speaker, I want to note in particular the activation of our local reserve company, that is Company B, 100th Battalion, 442d Infantry, and I want to say the men and women of this unit performed their duties and responsibilities with distinction. This is reflected in the able leadership of the unit's commanding officer, 1st Lt. Kyle Keomalu. A graduate of Kamehameha Schools and the University of Hawaii ROTC Program, Lieutenant Keomalu did an outstanding job by mobilizing some 66 reservists who were on active duty from February 17, 1990 through March 19, 1990.

Mr. Speaker, I want to commend Mr. Tommie Hamner of FEMA, our Governor Peter Coleman, Senator DAN INOUYE, Orator Fuga Tolani Teleso, and Capt. Mapu Jamias for their support and assistance to convince the Department of the Army to activate our Reserve unit. In honor of those who responded to the call for active duty, I submit their names to be made part of the RECORD.

Mr. Speaker, I am also pleased to share with my colleagues a copy of a resolution recently passed by the legislature of American Samoa commending the representatives of the various Federal agencies who were on-island to assist with the recovery program. I submit the resolution to be made part of the RECORD.

Mr. Speaker, I also want to note a special rescue operation that was conducted by certain members of Company B, 100th Battalion, 442d Infantry—and, as such, these individuals were each presented with the U.S. Army Achievement Medal for their heroic conduct by rescuing a resident who was seriously injured after he had fallen from a steep and dangerous mountainous ridge.

Mr. Speaker, I commend Lepapamatietie Hunkin, Richard Samuelu, Leo Tafua, Jr., Tutuila Manase, Robert Godinet, and Seleu Fiame for the special recognition they received from the Army, as I am certain their peers, relatives, and friends are all proud of this award.

The resolution and a list of participants follows:

SENATE CONCURRENT RESOLUTION 43

(A Senate concurrent resolution commending FEMA, the Red Cross, Seabees, U.S. Army, U.S. Marines, U.S. Navy, U.S. Air Force, U.S. Coast Guard, and SBA and the personnel thereof for their timely and considerate service generously given on behalf of the government and people of American Samoa.)

Whereas, the inhabitants of American Samoa were subject to Hurricane Ofa in the first part of February 1990; and

Whereas, the citizens experienced considerable concern for the personal safety of its people and the considerable property damage caused by Hurricane Ofa; and

Whereas, after the Hurricane the inhabitants of American Samoa were without power, water, or food; and

Whereas, FEMA, the Red Cross, Seabees, U.S. Army, U.S. Marines, U.S. Navy, U.S. Air Force, U.S. Coast Guard, and SBA and the personnel thereof provided immediate and timely service as soon as it was humanly possible; and

Whereas, this service consisted of restoring power lines, providing food supplies, and considerable financial assistance to private citizens, to the government, to non-profit organizations and to businesses; and

Whereas, this work was commenced immediately after the Hurricane left the Islands; and

Whereas, the prompt attention provided by FEMA, the Red Cross, Seabees, U.S. Army, U.S. Marines, U.S. Navy, U.S. Air Force, U.S. Coast Guard, and SBA greatly reduced the anxiety and concerns of the citizens of American Samoa; and

Whereas, Lieutenant Sorrells of the Seabees expressed his gratitude to the people of American Samoa who generously opened up their homes and hearts to the Seabees, providing them with food, entertainment and lodging; and

Whereas, the experience of the Seabees was duplicated among the personnel of FEMA, the Red Cross, U.S. Army, U.S. Marines, U.S. Navy, U.S. Air Force, U.S. Coast Guard, and SBA; amd

Whereas, as a consequence both the citizens of American Samoa and the personnel of the Seabees, FEMA, the Red Cross, U.S. Army, U.S. Marines, U.S. Navy, U.S. Air Force, U.S. Coast Guard, and SBA have gained a renewed appreciation for each other; and

Whereas, it is fitting and proper to honor and thank the Seabees, FEMA, the Red Cross, U.S. Army, U.S. Marines, U.S. Navy, U.S. Air Force, U.S. Coast Guard, and SBA and all of the personnel therein for their prompt and efficient service in our time of greatest need; and

Whereas, the Seabees, FEMA, the Red Cross, U.S. Army, U.S. Marines, U.S. Navy, U.S. Air Force, U.S. Coast Guard, and SBA and all of their personnel will long be remembered and appreciated by the people of American Samoa; and

Whereas, even though words do not adequately express our appreciation it is nevertheless deeply felt.

Now, therefore, be it resolved by the Senate of the Territory of American Samoa, the House of Representatives concurring:

That, the Legislature of American Samoa, does hereby thank the Seabees, FEMA, the Red Cross, U.S. Army, U.S. Marines, U.S. Navy, U.S. Air Force, U.S. Coast Guard, and SBA and all of the personnel working therein for their timely and competent service rendered immediately after the occurrence of Hurricane Ofa; and

Be it futher resolved, that the President of the Senate Letuli Toloa is respectfully requested to present this concurrent resolution at an appropriate ceremony to: the Honorable Dick Cheney, Secretary of Defense; Mr. Abbe Keith, Job Director for the Red Cross; Mr. Tommie Hamner, Federal Coordinating Officer for FEMA; Lieutenant Sorrells, Commanding Officer for the Seabees; Mr. Ken Shuman, Branch Manager for SBA; Mr. Fuga Tolani Teleso; and to all personnel working within these organizations.

VACATION OF SPECIAL ORDER

Mr. COX. Mr. Speaker, I ask unanimous consent that the 5-minute special order granted for today to the gentleman from California [Mr. MCCANDLESS] be vacated.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arizona [Mr. UDALL] is recognized for 5 minutes.

Mr. UDALL. Mr. Speaker, during the debate on the Savage amendment to the dire emergency supplemental appropriations bill, H.R. 4404, I was unavoidably detained by committee business in my office. Had I been present I would have voiced my strong opposition to the amendment and voted against it.

BOB TRAXLER RECEIVES VFW'S HIGHEST HONOR

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Mississippi [Mr. MONTGOMERY] is recognized for 5 minutes.

Mr. MONTGOMERY. Mr. Speaker, several weeks ago, it was my privilege to attend the annual Veterans of Foreign Wars Congressional Banquet here in Washington. A crowd of more than 2,200, including many of our colleagues, gathered to see our friend BOB TRAXLER, the distinguished gentleman from Michigan, receive the VFW Congressional Award, the organization's highest honor. Last week, he received the American Legion's highest award.

An Army veteran himself, Bob has displayed a keen sensitivity to the concerns and needs of the Nation's veterans. He has been especially outspoken in his efforts to get adequate funding for our veterans' hospitals. Last year, he led the effort in getting the Congress to pass a major supplemental for the Department of Veterans Affairs.

In presenting this prestigious award to Chairman TRAXLER, VFW Commander-in-Chief Wally Hogan said:

Through his concern for people, programs and the welfare of his community and the Nation, Congressman Traxler has earned the respect and esteem of not only his constituents, but also his colleagues in the Congress.

How true that statement is Mr. Speaker.

BOB TRAXLER is a good friend of veterans. They and their families are very fortunate to have such an effective champion in their corner. I am pleased—as I'm sure you are—to see him receive such well-deserved recognition for his work in behalf of those who have defended America and others who desire to be free.

THE SAVINGS AND LOAN SCANDAL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York [Mr. OWENS] is recognized for 60 minutes.

Mr. OWENS of New York. Mr. Speaker, the New York Times and a number of other newspapers, magazines, and even some television and radio broadcasters have noted over the past few weeks that the savings and loan scandal is receiving a strange reception in Washington. The Times 2 weeks ago on the front page of its News of the Week section stated that they were baffled by the silence in Washington about this savings and loan association scandal which seems to be galloping on.

Mr. Speaker, I agree that this silence is baffling.

Mr. Speaker, we have had a number of loud discussions about obscenity of the past few months, and that debate is still going on. I would like to talk about obscenity tonight in another key, a new kind of obscenity, the old kind of obscenity, but different from the obscenity which is obsessed with some photographs and obsessed with the fact that out of 80,000 projects that have been sponsored by the National Endowment for the Arts, some 25 projects have been controversial.

□ 2040

That discussion goes on and it is about a different kind of obscenity. The obscenity which I am concerned with is a second definition that appears in Webster's Collegiate Dictionary. Webster says that obscene is anything which is abhorrent to morality or virtue.

I think that the silence about the savings and loan association scandal is abhorrent to morality or virtue. In Washington the silence about the true dimensions of the savings and loan association scandal has now become obscene. The low level of debate, the absence of official discussion, the conscious studied silence is obscene. I am concerned about the savings and loan association not because I am a banker or an accountant or an MBA or claim to have any authority or knowledge that is special in helping to solve the problem. I am concerned about the savings and loan association scandal, the fact that it drains so much revenue, so much of the taxpayers' money away from other things, because I have been here 8 years. I am in my eighth year in Congress, and for 8 years I have been going back to tell my constituents that we cannot do anything about building more houses for the homeless because we have a deficit, because we do not have the money, or because we do not admit we have the money for that purpose.

I have had to tell the people who are concerned about the DRG's the fact that we have sick people, people with grave illnesses are pushed out of hospitals because their time is up in accordance with the DRG, that we cannot do anything about that, or Washington will not do anything about it because they are preoccupied with the deficit. We do not have money to provide decent health care. On and on it goes.

I am concerned about the fact that 9 years ago there was a debate which was seriously discussed considering catsup a vegetable in order to make the school lunch program less expensive. You do not provide a second vegetable, just catsup would serve the purpose in order to make school lunches less expensive.

Some of the same people who offered that kind of solution to save the Government money have become completely silent about the savings and loan association debacle. There are some people who are noted for their fiscal conservatism who have not spoken at all on this subject.

I am happy to state that I am not guilty of silence, the kind of silence that the New York Times referred to and some of the other articles have referred to. I have spoken out consistently against the monstrous savings and loan association bailout program. I have seen it from the very beginning as a threat to any addressing of the problems faced by my constituents ever. We will never be able to address the problems of homelessness and have the Federal Government get back into the business of building homes for low-income people who cannot afford housing any other way.

I have no faith that we will ever have enough money to meet the challenge of education and move toward the goal of becoming first in math and science by the year 2000 or eliminating illiteracy by the year 2000. I have no faith that can happen if all the money available is going to be drained off by the savings and loan association bailout.

We appropriated last year $50 billion, that is billion. Now, part of it was on budget and part was off budget and we made a big deal about that, but I want the people out there, ordinary laymen to understand, that on budget or off budget, there is only one U.S. Treasury. The money is printed in only one place, and if you are spending $50 billion, it is all the same in the final analysis. The U.S. economy is only one economy. It is impacted by interest rates driven up by that kind of maneuver. The money available to take care of the deficit will not be

there if we continue to spend $50 billion for the bailout of an industry which produces nothing.

There are some people who have assumed that the Government is doing what it must do, what it legally is bound to do, and that is by bailing out the savings and loan industry, by interjecting socialism into our banking industry in this country, we are paying off the depositors, those depositors that we had guaranteed their money up to $100,000, and that is our obligation and our duty, and that is what is happening.

There are people out there who assume that is all that is happening, and they are satisfied that our Government is acting responsibly; but the truth of the matter is that we have doubled the cost of the bailout by going far beyond the areas of our legal obligation, our legal obligation to pay off any depositor up to $100,000. We have gone beyond that. It would cost us at the time of the passage of the savings and loan association bailout bill last year, the estimate was $100 billion, which would have been the cost to pay off all the depositors and to get out of the business of running banks and let the private sector take care of their problems. Well, we did not do that. We are attempting to bail out everybody. We are attempting to bail out the Japanese bankers. We are attempting to bail out the Arab sheiks. Everybody who had money in the banks above $100,000, we are attempting to save their money, too, and of course there is this vague statement about our duty to save the integrity of the American banking industry. We cannot let the world see large numbers of banks go under and the Government not guarantee the money of those people who have funds beyond the depositors' amount of $100,000.

So we have taken on an obligation. We have assumed responsibilities that were not legally ours. The taxpayers are being swindled out of large sums of money to be beyond the obligation of the Government. It is important to understand that from the very beginning.

My concern is that no matter how much money is produced by this peace dividend that we are all waiting for and have a right to wait for, we have labored for many years under the assumption that if we ever reach the situation where there is peace in the world we can release the billions of dollars that are being plowed under in the armaments race, so we have a right to expect a peace dividend. I hope that it is really coming, but if we do not do something fast about the savings and loan monster, we are going to find that every dollar, every penny that is produced by the peace dividend will be gobbled up by the savings and loan association bailout. That is the situation we are faced with. Nobody wants to talk about it. But where do you get the billions and billions of dollars to keep the bailout operation going as it is presently constituted?

Rumors are that the President will be coming back to ask the Congress for another $30 billion to $40 billion or $50 billion. In addition to the $50 billion already appropriated last year, we may have another appropriation request of $30 billion to $40 billion or $50 billion, you know, tens of billons of dollars. It does not matter. The rumors are very vague. By the time the request hits the Congress it may be much higher.

Where does it all stop? Let me just go back and say that among those people who have spoken out—and there have been a few who have spoken out—I include myself as early as October 12, 1988. I called for an audit of the savings and loan industry. That was long before the President came to the Congress and admitted that there was a major problem. October 12, 1988, was before the big deal was made with a number of failing savings and loan associations and existing banking enterprises which led to a huge write-off. Billions of dollars were written off before December 1988, in taxes, you know. When you write off taxes, that is the same as spending money, because what they write off and what they allow to serve as write-off means it has to be recovered from the taxpayers.

□ 2050

On October 12, I said we needed some kind of audit. The rumors were that we had a debacle on our hands. Something had to be done and done fast. Of course, that was ignored.

On February 22, 1989, I raised the question, as I read the paper, and I got my information the same place other citizens get information, other Congressmen also get their information, I raised the question about whether the savings and loan associations constitute a network of racketeering enterprises, those that were failing.

The failing savings and loan associations, according to articles that I read, were permeated with crooked deals, inflated land values, all kinds of things were happening, and it seemed like a network of racketeering enterprises. It has been developed, unfortunately, in collusion with our own regulatory government agencies, some of our own regulatory government agencies, and I thought that investigations by the FBI and law enforcement agencies should be quickened. I thought prosecutions by the Justice Department should become more aggressive and more intense.

On February 28 I characterized the S&L bailout legislation, and by then the President had proposed legislation, and I saw that legislation as the introduction of socialism into the banking industry, and I saw it as representing a grave threat to the economy of the country, because it makes the Government responsible for bailing out the private sector and bailing out the private sector in the area where billions and billions of dollars are necessary to be put forward by the taxpayers.

On March 2, 1989, I discussed the S&L bailout as a major drain on Federal funds that might be otherwise used for critically needed domestic concerns such as education.

I serve on the Committee on Education and Labor. I am very concerned about the fact that our country has fallen behind the other nations of the free world, the other industrialized nations. Our students, our very best students, and let us not talk about averages, our very best students in science and math, when they are in competition with the best students of the other nations, industrialized nations, they score very low. Out of 16 different nations that participated in the competition, we scored third from the bottom. We should be concerned about education, not only in places like my district where we have a grave problem of the whole infrastructure in danger of collapse, we need buildings, we need seats, we need decent books in the library. Books sometimes are 20 and 30 years old. We need a number of things to save a situation from a total calamity in certain parts of my district, but the very best schools, at the same time, the very best schools in our country also need Federal assistance in order to remain competitive in the kind of education they produce in a world which more and more will be dependent on our commercial and industrial ability. We will be dependent on that in order to compete.

On May 10 I said that the $157 billion S&L bailout will adversely affect American taxpayers, their children, and their grandchildren for years to come. We do not know yet how badly things will be, but when we see the emergence of all of these problems, the junk bond empire starting to collapse; large numbers of savings and loan associations held junk bonds, billions of dollars going down the drain in that direction, and each time it happens, each time a savings and loan association goes under, our Government now, under the bill that was passed by Congress, our Government now steps in to assume responsibility for all the problems of that savings and loan association.

One fact that has come out, as I looked at the articles and the information that is now available, is we are not only talking about savings and loan associations, ladies and gentlemen. Large numbers of banks, regular banks, are also failing.

On May 23 I said that the S&L bailout, the bill that was passed, and that was the day we passed the bill in the House, I said that it was one of the largest commitments ever made by the U.S. Government for a peacetime expenditure, and I think since then research has borne me out, that it is the largest commitment that the U.S. Government has ever made in peacetime, a $157 billion commitment, and when we put all the pieces together, that is the size of the commitment.

On August 3, I pointed out again that the S&L bailout costs were still increasing. They had increased to an estimated $370 billion above; they were much above what President Bush had indicated when the bill passed in the House; a giant swindle against the American taxpayers, I said, was getting even larger.

Those are some important facts that we keep getting, and while there is silence in Washington, and nobody in Washington, and many people who are quite responsible and ought to talk more about this issue, the debate level ought to be raised, and while we are not doing it, there are books being written; there are articles being written. Some of them go into great detail about the kind of calamity we are facing, but tonight I just wanted to take a few minutes to discuss a few facts that have come out of some of these articles and some of this further investigation.

Let us take a look at the Resolution Trust Corporation. That was a major entity created to oversee the disposal of the assets or the negotiation of arrangements to deal with the failed institutions. Once they go into the Resolution Trust Corporation, all of the bad deals that they have made become the responsibility of the Federal Government. The taxpayers then are responsible for bailing out the situation, selling off the real estate, and I suppose the yachts that have been bought by some of the board members of S&L's will have to be sold, the dining rooms full of special crystal that they bought, all of the kinds of things, limousines that have been bought with this money; they all have to be disposed of by the Resolution Trust Corporation.

How do they hire the staff for the Resolution Trust Corporation? I asked one of my staff to find out how does one get a job with the Resolution Trust Corporation. Have they established some kind of merit system? Does one have to take a civil service test? How are they hiring these people?

There is no procedure which requires them to participate in the merit system. The Resolution Trust Corporation, I suppose maybe in certain places, the Democrats are dividing them in half with the Republicans, or maybe the Republicans are taking all the positions. There are now 2,300 people hired by this new bureaucracy that we created in the bailout bill, 2,300 people. I suppose most of them are in Texas and the other States which had the largest number of failed savings and loan institutions. So we will find most of those jobs have gone to Texas, which does help the economy in terms of the crooks have taken the money from the banks, expended it on deals, many of them have gotten rich, and we do not have an investigative judicial setup which is able to deal with them fast enough, so some of those same rich crooks are buying back their property, and maybe some of them are working for the Resolution Trust Corporation. They can get jobs.

They know the situation, so they can go to work for the Resolution Trust Corporation. There is nothing to prohibit that except one little proviso.

They did think a little bit, according to an employee of the Resolution Trust Corporation. Any former employee of a savings and loan association that has failed can apply for a job and get one provided they did not contribute to at least $50,000 of the thrift's total loss. In other words, people from the failed banks who are responsible for this debacle, the same people who participated in this network of racketeering enterprises can come back now and they can work for the Resolution Trust Corporation provided they did not contribute to at least $50,000 of the thrift's total loss.

Who sits around and figures out how much each employee contributed to the total loss? You know, I do not know. What kind of tests do they have for that? How extensive is that screening process? Or is this just a proviso that was thrown in that nobody seeks to enforce?

Probably as things are moving, nobody is enforcing that. Employees who helped to create the problem are now the beneficiaries of this new bureaucracy. They are employees of Resolution Trust Corporation, which the taxpayers are funding.

This Resolution Trust Corporation expects to eventually employ 6,000 employees. They now have 2,300. They expect to eventually employ 6,000. That is based on assumptions that the number of savings and loan associations failing is limited to the projections that have been made by the administration. But private sector people, the authors of these articles, have made it quite clear that the number of failed institutions will be far greater.

Therefore, the Resolution Trust Corporation will be hiring many more employees. That is just something we ought to think about. It is one of those critical questions we ought to ask as we go forward. Are the same people responsible for this debacle benefiting greatly from it as people who can buy back their own assets, as people who can get jobs in the process of selling off and negotiating these deals out?

□ 2100

Many of these people should be in jail. Many of them, if they had been responsible for the loss of similar amounts of money any other way, would be in jail. But what has happened with the whole bailout process is that we have revealed a great softness, a great softness with respect to white collar crime. We are not moving ahead to prosecute the people responsible for stealing billions of dollars.

One gentleman who heads one large bank parades around self-righteously and reminds us he is against pornography. One of the heads of the largest failed banks parades around and says he is against pornography, and therefore he seems to be asking for some kind of dispensation with respect to a bank that has lost billions of dollars. Many widows and people who had had faith in that investment process, some of it which was not covered by a government guarantee, lost money. But he parades around, indignant about the fact that his empire has been taken over, and reminds us he is against pornography. He is one of the most obscene gentleman on the face of our society at this point.

Billions of dollars are stolen, and we treat these people with great respect. We are afraid to call a criminal a criminal. People who have committed economic crimes are criminals who have an impact on the lives of many people living, many taxpayers. Every taxpayer already will be saddled with about $1,000 in order to pay for the bailout as it is now.

As we move along and find more and more banks that have failed, taxpayers will be saddled with even larger amounts of responsibility in terms of the money that will go into the bailout of these banks. Yet we treat these people with greater respect.

We are soft on white collar crime. We are very excited and emotional about violent crime. I can understand that. When a situation happens like the Willy Horton situation, you can take it, put it on television, and its appeals to something in us which is very basic. The gut reaction is to be very indignant, very upset.

I had a situation where my son has been mugged, and I know what it means, how you feel. He wants to get revenge on the people that do it.

I had a situation with a house that had been robbed, and you have to stand by and see your wife and your stepdaughter crying because the jewelry has been taken. It is an emotional response in terms of hating criminals

who commit immediate specific crimes, and it is proper.

But what we do not have and what we have to do is update taxpayers, citizens. We have to all update our intentions and understand that people who commit economic crimes, people who steal billions of dollars, are tearing away the structure of our society. They are committing crimes. They are making crime pay. They are making crime pay, and it is very painful. Not only do they take money which has to be replaced by taxpayers, but the process of that replacement disrupts our society in many other ways.

We do not have the money to pay for housing. We do not have the money to pay for the building of housing for low income persons. We do not have the money to provide decent medical care.

We take money from the cities and cannot give them back money to help build the infrastructures of the cities. We have eliminated revenue sharing, so many States, and cities are in deep trouble. They do not get any money back from the Federal Government. You pay your income taxes and it does not come back in the form of revenue sharing any more. That was something good, a useful innovation that we had, which was wiped away.

Yet at the same time we have to contemplate bailing out all of these racketeering institutions with billions and billions of dollars. We should stop and think about what the result, what the impact of these economic crimes are, what the impact is on the generation that is here right now, and what it will be in terms of the generation to come. Because part of the process is to roll over the cost for future generations.

I also want to talk about the fact that the process of investigation of the judicial process of prosecution is shrouded in mystery, in secrecy.

It is hard to find out what is happening to the people who are guilty of embezzling, losing our money through incompetence and other tricks. It is hard to find out.

The FBI had 282 failed institutions under investigation in 1987. As of February 1990 they had 530 institutions that had failed under investigation.

Here is an interesting fact: of the 530 institutions that were under investigation by the FBI in February 1990, 276 of these institutions were banks, regular banks; 234 were savings and loan associations; 20 were credit unions.

I think it is important to note that fact that 276 were regular banks, because it means that the scandal is so much broader and will get so much wider than we ever anticipated.

We are dealing with more than savings and loan associations. We are dealing with failing American financial institutions, failing as a result of the last 9 years of deregulation, of greed, of collusion between the regulators and those who were to be regulated.

It is galloping on. The white collar criminals, the number of white collar criminals to be discovered, is multiplying every day. The number of pending bank fraud and embezzlement cases with losses that exceeded $100,000, for example, in 1986, was 2,948. By September 1987 it increased to 3,393. By September 1988 we had 3,446. By September 1989 the total number, the cumulative number under investigation for fraud and embezzlement in cases where the losses exceeded $100,000, was 3,605.

Of that number, 2,278 were regular banks. Regular banks. There were 95 credit unions, 2,278 banks, and 654 savings and loan associations.

In 1987 the FBI conducted investigations that resulted in 740 convictions and pretrial diversions in cases where losses exceeded $100,000. Sometimes they were convicted and sometimes they had pretrial diversions.

In 1988 there were 751. In 1989 there were 791. It is very interesting that the number remains stable. The number of investigations and convictions remains pretty stable, while the number of failing banks is increasing exponentially. It is doubling, tripling.

There is something wrong with the whole investigative process and the whole apparatus.

I merely want to open the discussion tonight. Tomorrow I would like to bring a list of books, I would like to bring a list of articles. I think that those who cannot find facts need help. I would like to do anything possible to raise the level of debate in Washington. I think it is our responsibility as representatives of the people to tell the truth about the savings and loan associations.

This is an obscenity which you should not let your children learn about on the street. This is a massive set of crimes that are cumulating. They will have an impact on our economy. They will have an impact on domestic expenditures. It could well wipe out the peace dividend that so many Members are expecting.

It is important to have discussions in Washington go forward about the budget, projections of the budget over the next 3 years, and have discussions go forward about the economy, discussions go forward about the priorities in terms of education, all these discussions go forward without anybody mentioning the problem of the savings and loan associations and the fact they are going to drain off all of the revenue necessary to make these things happen. It is a scandal in itself.

Our silence in the Congress, our silence here in Washington, is obscene. We should be more responsible. It is morally repugnant to see the silence continue. I hope that we will end the silence here in Washington and talk among ourselves and talk to the people of the United States about the savings and loan association scandal.

Mr. Speaker, I yield back the balance of my time.

IS THIS THE AMERICAN WAY?

The SPEAKER pro tempore (Mr. HARRIS). Under a previous order of the House, the gentlewoman from Marland [Mrs. BENTLEY] is recognized for 60 minutes.

Mrs. BENTLEY. Mr. Speaker, we come to Congress to represent our constitutents and to serve our Nation—to work to improve our communities, States, and Nation in the best light of our knowledge. Sometimes we succeed and sometimes the status quo prevails.

That old saying "the more things change the more they remain the same" seems to be true quite often.

That is the best way I know to describe the struggle we have in our trade relations with Japan and in ourefforts to restore and nourish our industrial base.

That expression certainly applies to the story I read in the newspaper last month. A New York Times story by Steven Weisman, dated March 11, Tokyo explained about a forthcoming meeting of former government leaders from Japan and the United States certainly caught my attention.

Titled "Ex-Leaders of U.S. and Japan To Meet" and subtitled "Worries About Tensions Lead Former Chief Executives To Plan Talks in May." At first balance it looked all right, but as I read the story I kept wondering is this meeting the American way of representative government? What is their official policymaking role?

The article stated:

> Concerned about tensions between United States and Japan a group of former officials of both nations was reported today to be planning a conference on mutual problems that is to be attended by several former American Presidents and Japanese Prime Ministers.

It went on to say that:

> The newspaper attributed information about the meeting to unidentified Government sources. But Robert C. McFarlane, a former national security adviser to President Reagan, confirmed the newspaper report in Tokyo, saying plans were at a tentative stage among various leaders.

According to the article only Mr. Carter has accepted the invitation and a formal response from Presidents Reagan and Nixon had not been received.

It sounded good and then I started to question when I read the next paragraph. It quoted, Mr. McFarlane said:

> This is one of two or three efforts centered on American centers of scholarship designed to improve understanding between

the two countries, looking to the longer term U.S.-Japan relationship.

Before fully examining my reservations I read a bit further. The article stated:

A Japanese official confirmed that Mr. Takeshita was also expected to attend, but plans for Mr. Nakasone and Mr. Uno would not be confirmed.

It also said, "Mr. Takeshita, who resigned from office last year to take responsibility for an influence peddling scandal in his government, is due to meet with Mr. Bush in Washington," next week, and that Mr. Takeshita "is in a strong position to block or approve action sought by the United States."

The leading Japanese paper The Yomiuri said:

The meeting would provide the last negotiating opportunity to resolve a range of trade disputes that have worsened relations between Tokyo and Washington. But Mr. McFarlane and the Japanese official said the conference would not deal with specific trade issues.

They said:

Instead, it would try to deepen understanding about how to create better political economic and security ties between the two countries at a time when most publicity is focused on the nearly $50 billion annual trade deficit that the United States has with Japan.

The article explained that:

American and Japanese officials with longstanding ties to one another have become worried about recent opinion polls showing that Americans have reacted negatively to the rise of Japanese economic power and the surge of Japanese private investment and real estate purchases in the United States.

Now just who would pay for this conference of former Government officials and scholars was not clear. The article explained:

Details about who would sponsor or pay for the session were not available although on the Japanese side officials said the planning was not by the Government, but the leadership of the governing liberal Democratic Party of Prime Minister Toshki Kaifu.

It stated, "several influential party officials are also expected to attend according to Mr. McFarlane and the Japanese newspaper."

By the time I finished this article, warning signals and questions raced through my mind.

Recently, I raised questions about the policy debate being tilted to reflect the Japanese viewpoint. I had included in the RECORD the New Republic article by John Judis called "the Japanese Megaphone."

This article pointed out—as did my speech in 1988, "Who Makes Policy Them Or Us"—the details on how our think tanks, lobbyists and publicists are "tilting the policy debate about our economic future to reflect Japanese views and not those of the American people."

John Judis pointed out—

To influence directly the White House and Congress, Japan has assembled a virtual who's who's of lobbyists and advisers in Washington. The Japanese have hired more than 110 former government officials. Almost every important ex-trade official works for the Japanese in some capacity.

He also said,

Many lawyers and public relations men who enjoy or have enjoyed high White House connections work for the Japanese.

The article explained that—

The money is also creating what the Japanese call "structural corruption"—a kind of systemic bias that does not require conscious acts of corruption by yields much the same results.

The thought occurred to me that owning 40 percent of our debt certainly is a powerful systemic bias or "economic occupation"—whatever you want to call it.

Also included in the article was a revealing statement about the Japanese. It said:

Japan and America's other economic rivals do not condone these sorts of interlocking relationships between their own governments and foreign lobbyists, reasoning that they make it too hard for the government to distinguish between its interests and those of its competitors. In Japan no self-respecting lawyer, let alone former government official, is willing to lobby for an American company.

We know the Japanese viewpoint about interlocking relationships between their government and foreign lobbyist. I started thinking. Who are these people representing the American side. Although some of them have held elective office and others appointive positions—they are not now acountable to, nor do they official represent the American people.

I remembered the reaction when our highly respected former President, Mr. Reagan, went to Japan and received the $2 million which the Japanese offered to him. People were upset and he still receives criticism about his trip. Although highly regarded, he no longer represents the American people in an elective position and that was the explanation he gave for accepting a fee of $1 million per speech for two speeches.

Some of the other people involved in the conference on both sides have helped to craft the policies that created this problem. Not only Judis is raising flags about our scholars and publicists and former Government officials.

My friend Pat Choate, vice president for Policy Analysis, TRW, has a book coming out on how the Japanese have bought influence in Washington through our former Government officials.

We do not know who these people are who are participating in the conference in Hawaii, though at least one of our former Presidents will attend.

That reminded me. We didn't know who was attending the recent U.S. Memories meeting in Texas and look what happened. That meeting was the final organizational effort of American chip makers trying to make DRAM chips.

Attending were people just forming joint ventures with the Japanese or they had a joint venture with them, the Japanese. Also attending were some lobbyists or industry counselors—whatever you want to call them—who had clients like Toshiba and Mitsubishi. Business Week, in an editorial raised the question that some of the companies might have been threatened with the loss of their suppliers if they went through with the effort.

What was reported in the newspapers was American business just was not ready and did not think long term. It sounds like something else occurred instead of American business not being ready.

Sounds more like a hot box to me. We all know what that is. Anyone of us in a volunteer organization or in politics understands the term "hot box." Most of us have been in one at sometime in an organization or a family relationship. A hot box is something you do to pressure someone to your way of thinking.

Well, apparently the stops were pulled out by the Japanese and it certainly looks like American business was pressured in a hot box or at the very least some of the Americans involved had a conflict of interest.

The U.S. Memories story was not the only thing I remembered. As I read I thought about Marvin Wolf's book "The Japanese Conspiracy" which spelled out how the Japanese Government has targeted segments of American business.

I remembered Jack Anderson's stories on how greedy American fastener distributors went to Japan and the Japanese obliged them by making counterfeit fasteners for the American market so guns did not fire, tanks did not run, and the list goes on.

I know first hand about this because Tommy Grant, an independent fastener distributor from Houston, TX, who pushed this issue and first brought it to my office. After my staff did some investigative work, we then presented it to my colleague, the Honorable JOHN DINGELL. He did a fantastic job with this serious problem.

I also thought of the speech I gave last month about Allied Signal and how the Japanese have tried to steal Allied's amorphous metal process. Doesn't sound like too much does it—amorphous metal process—until you realize it is a $2 billion business and will revolutionize metallurgy in the 21st century. It has great applications to aerospace and superconductors in addition to cutting energy costs.

Then I thought about the company Go-Video with a double deck VCR, the next generation of VCR's.

The Japanese are anxious to stop that. No wonder. The VCR is 50 percent of the electronics export of Japan and electronics are one-third of the Japanese total export. We could get a big chunk of their export and certainly help our trade deficit—plus we could get back into the semiconductor business in a big way.

Then I thought about our beef agreement and how the Japanese bought ranches and set up meat processing plants before they signed the beef agreement. Consequently, the Japanese beef market is being opened but by Japanese companies growing beef in the United States. And they still control the price in Japan. The consumer in Japan is still paying $60 to $70 per pound in Japan because they do not have a free market there and the consumers in Japan are also paying dearly for these high-handed methods that the Government applies in controlling the market.

I remember the statement in a Wall Street Journal article in November that "dollars don't belong to the nation of their current owners, but to the nation in which they are invested."

Fine sounding statement—but there are many strings to these investments—and most of all, according to the IRS they are not paying their fair share of taxes.

And the editorial in the Wall Street Journal on March 9 titled "Why The Fire Sale?" came to my mind.

It states, "What does the U.S. Government have against the dollar?" Is it Bush administration policy to make sure the Japanese get a better bargain on their next Rockefeller Center?

The editorial goes on to ask the questions that the so-called Japanese bashers have been asking about how lowered valued dollars help domestic industry. The editorial stated that "when the American Government attacks the dollar, it attacks the net worth of every American."

The Wall Street Journal editorial also stated what we have been pointing out that "we should get our money's worth"—which we have not been doing.

I thought of all these stories and what has happened in our efforts to negotiate with the Japanese and was this a genuine opportunity to correct some of the issues I have mentioned.

Then I realized that this is the way the Japanese have been doing business with us all the time. They call a meeting—discuss and agree to a solution and then continue to pursue their goals in the Japanese manner. This is why the American people are getting angry.

I sensed another story in this and finally, I faced the pressing question that had been bothering this former newspaper reporter.

The Japanese newspaper, the Yomiuri stated the meeting would provide "the last negotiating opportunity" to resolve a range of trade disputes that have worsened between Tokyo and Washington."

That sound ominous to me. What did he mean "the last chance?" If this is the last chance then why do we have people who are not elected to represent us negotiating our last chance? This is not the American way of representative government.

We expect our elected and appointed Government officials to give a public accounting of what they have done. We all know what the Freedom of Information Act means. How do we have a FOYIA request with a meeting of unidentified people who are not representative of the American people—and scholars, who according to John Judis are tilting the policy debate to reflect the Japanese viewpoint and not the American people. Seems to me that somewhere the American people have been lost in this shuffle.

And—who pays for this conference. Is it private funds—do we pay or are the Japanese paying? Who is deciding the agenda? The American people should be very concerned about the particulars this meeting.

As a former reporter I hope and believe that American reporters will be digging into this story. There are too many unanswered major questions which affect our future.

It does in the end come back to "the more things change the more they remain the same." The Japanese way of doing business is to have an ad hoc meeting to plan their goals and agenda. The American way is to be on the record with officials who are accountable to the voters—but this is not what they are doing.

Mr. Speaker, it would appear that the American people deserve to have serious negotiations done by people who are accountable to them—not unidentified scholars and former officials who have conflict of interest and are responsible to the private sector. I am concerned when we begin to do business in this manner. I think the American people are too. After all, we are supposed to be a "government of the people, by the people, and for the people."

□ 2130

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. STUMP, for today and the balance of the week, on account of family medical emergency.

Mr. YATES, for today after 4 p.m., on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. COX) to revise and extend their remarks and include extraneous material:)

Mr. BURTON of Indiana, for 60 minutes each day, on April 3 and 4.

Mr. MACHTLEY, for 5 minutes, on April 4.

Mr. YOUNG of Florida, for 60 minutes, on April 17.

(The following Members (at the request of Mr. OWENS of New York) to revise and extend their remarks and include extraneous material:)

Mr. UDALL, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. MONTGOMERY, for 5 minutes, today.

Mr. POSHARD, for 5 minutes, on April 4.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. YATES, in the Committee of the Whole, on H.R. 4404, today.

Mr. CONTE, in colloquy with Mr. YATES on H.R. 4404, in the Committee of the Whole.

Mr. YOUNG of Florida, and to include extraneous material on H.R. 4404, in Committee of the Whole, today.

Mr. MICHEL, during consideration of Lithuanian resolution.

(The following Members (at the request of Mr. COX) and to include extraneous matter:)

Mr. GEKAS.

Mr. VANDER JAGT.

Mr. SOLOMON in three instances.

Ms. ROS-LEHTINEN in three instances.

Mr. DOUGLAS in two instances.

Mr. LAGOMARSINO.

Mr. THOMAS of California.

Mr. KYL.

Mr. GALLEGLY.

Mr. WYLIE.

Mr. MEYERS of Kansas.

Mr. FIELDS.

Mr. MADIGAN.

Mr. GREEN.

Mr. DORNAN of California.

Mr. GUNDERSON.

Mr. LIGHTFOOT.

Mr. BLILEY.

Mr. DAVIS.

Mr. HANSEN.

Mr. SCHUETTE.

Mr. EDWARDS of Oklahoma.

Mr. MACHTLEY in five instances.

Mrs. ROUKEMA.

Ms. SCHNEIDER.

Mr. MCCANDLESS.

SENATE JOINT RESOLUTION REFERRED

A joint resolution of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S.J. Res. 268. Joint resolution to designate April 6, 1990, as "National Student-Athlete Day"; to the Committee on Post Office and Civil Service.

ADJOURNMENT

Mrs. BENTLEY. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 9 o'clock and 32 minutes p.m.) under its previous order, the House adjourned until tomorrow, Wednesday, April 4, 1990, at 12 noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2891. A letter from the Assistant Secretary of the Army (Installations, Logistics and Environment), Department of Defense, transmitting notification of the Army's intention to initiate lethal chemical disposal operations, pursuant to 50 U.S.C. 1512(4); to the Committee on Armed Services.

2892. A letter from the Chairman, Federal Financial Institutions Examination Council, transmitting the 1989 annual report of the Council; to the Committee on Banking, Finance and Urban Affairs.

2893. A letter from the Secretary, Interstate Commerce Commission, transmitting notice that the Commission in Finance Docket No. 31494, "Intermountain Western Railroad Company—Purchase—Union Pacific Railroad Company, Boise Group Ranch Lines" has extended the time period for issuing a final decision by 70 days, pursuant to 49 U.S.C. 11345(e); to the Committee on Energy and Commerce.

2894. A letter from the Secretary, Interstate Commerce Commission, transmitting notice that the Commission in Finance Docket No. 31530, "Wilmington Terminal Railroad, Inc.—Purchase and Lease—CSX Transportation, Inc, Lines Between Savannah and Rhine, and Vidalia and Macon, GA" has extended the time period for issuing a final decision by 30 days, pursuant to 49 U.S.C. 11345(e); to the Committee on Energy and Commerce.

2895. A letter from the Secretary, Interstate Commerce Commission, transmitting notice that the Commission in Finance Docket No. 31469, "South Carolina Central Railroad Company, Inc.—Purchase—CSX Transportation, Inc, Lines Between East Greenville and Laurens, SC" has extended the time period for issuing a final decision by 120 days, pursuant to 49 U.S.C. 11345(e); to the Committee on Energy and Commerce.

2896. A letter from the Secretary of Commerce, transmitting a draft of proposed legislation to amend the International Travel Act of 1961 to provide for the charging, collection, and enforcement of fees to recover the costs of the U.S. Travel and Tourism Administration's activities, and for other purposes; to the Committee on Energy and Commerce.

2897. A letter from the Acting Director, Defense Security Assistance Agency, transmitting notification of the Department of the Navy's proposed letter(s) of offer and acceptance [LOA] to Thailand for defense articles and services (Transmittal No. 90-31), pursuant to 22 U.S.C. 2776(b); to the Committee on Foreign Affairs.

2898. A letter from the Assistant Secretary for Budget and Programs, Department of Transportation, transmitting the agency's annual report on the Program Fraud Civil Remedies Act for the year ending September 30, 1989, pursuant to 31 U.S.C. 3810; to the Committee on Government Operations.

2899. A letter from the Director, Office of Personnel Management, transmitting a report on its activities under the Freedom of Information Act for calendar year 1989, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

2900. A letter from the Secretary of Veterans Affairs, transmitting a report on its activities under the Freedom of Information Act for calendar year 1989, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

2901. A letter from the Secretary, Department of the Interior, transmitting the 1989 section B report on national historic and natural landmarks that have been damaged or to which damage to their integrity is anticipated, pursant to 16 U.S.C. 1a-5(a); to the Committee on Interior and Insular Affairs.

2902. A letter from the Director, Bureau of Land Management, transmitting the final eligibility and suitability report for the Upper Klamath Wild and Scenic River Study, pursuant to Public Law 100-557, section 104 (102 Stat. 2790); to the Committee on Interior and Insular Affairs.

2903. A letter from the Commissioner, Immigration and Naturalization Service, transmitting a copy of the decision ordering a grant of defector status in the case of a certain alien, pursuant to 8 U.S.C. 1182(a)(28)(1); to the Committee on the Judiciary.

2904. A letter from the President, American Academy and Institute of Arts and Letters, transmitting the annual report of the activities of the Academy-Institute during the year ending December 31, 1989, pursuant to section 4 of its charter (39 Stat. 51); to the Committee on the Judiciary.

2905. A letter from the Acting Assistant Attorney General for Legislative Affairs, Department of Justice, transmitting a draft of proposed legislation to improve the financial management of the Department of Justice and for other purposes; to the Committee on the Judiciary.

2906. A letter from the Under Secretary for Oceans and Atmosphere, Department of Commerce, transmitting the biennial report on coastal zone management for fiscal years 1988 and 1989, Office of Ocean and Coastal Resource Management, National Oceanic and Atmospheric Administration, pursuant to 16 U.S.C. 1462; to the Committee on Merchant Marine and Fisheries.

2907. A letter from the Acting Chairman, Federal Maritime Commission, transmitting the Commission's annual report for the fiscal year ending September 30, 1989, pursuant to 46 U.S.C. app. 1118; to the Committee on Merchant Marine and Fisheries.

2908. A letter from the Acting Administrator, General Services Administration, transmitting a copy of a lease prospectus for the Department of Commerce, Patent and Trademark Office, Crystal City, VA, pursuant to 40 U.S.C. 606(a); to the Committee on Public Works and Transportation.

2909. A letter from the Secretary of Transportation, transmitting the fifth annual report of activities under the Commercial Space Launch Act, as amended, pursuant to 49 U.S.C. app. 2621(a); to the Committee on Science, Space, and Technology.

2910. A letter from the Under Secretary for Acquisition, Department of Defense, transmitting the report on Department of Defense procurement from small and other business firms for the period October 1989 through January 1990 (fiscal year 1990), pursuant to 15 U.S.C. 639(d); to the Committee on Small Business, April 3, 1990.

2911. A letter from the Secretary of Veterans Affairs, transmitting a draft of proposed legislation to amend title 38, United States Code, to revise the copayment formula for those non-service-connected veterans with the means to contribute toward the cost of their care; to the Committee on Veterans' Affairs.

2912. A letter from the Chairman, Gorgas Memorial Institute of Tropical and Preventive Medicine, Inc., transmitting the 61st annual report of the work and operations of the Gorgas Memorial Laboratory for the fiscal year ending September 30, 1989, including a report on the audit of the Institute, pursuant to 22 U.S.C. 278a; jointly, to the Committees on Foreign Affairs and Energy and Commerce.

2913. A letter from the Chairman, Physician Payment Review Commission, transmitting the Commission's annual report, pursuant to 42 U.S.C. 1395w-1(c)(1)(D); jointly, to the Committees on Ways and Means and Energy and Commerce.

2914. A letter from the General Counsel, Department of the Treasury, transmitting a draft of proposed legislation to amend title 31 of the United States Code to provide a permanent, indefinite appropriation for the

reimbursement of Federal Reserve Banks for services performed as fiscal agents of the United States in support of administering the public debt; jointly, to the Committees on Appropriations; Banking, Finance and Urban Affairs; and Ways and Means.

2915. A letter from the Director, Central Intelligence Agency, transmitting a draft of proposed legislation to authorize appropriations for fiscal year 1991 for intelligence and intelligence-related activities of the U.S. Government, the intelligence community staff, and the Central Intelligence Agency retirement and disability system, and for other purposes, pursuant to 31 U.S.C. 1110; jointly, to the Committees on Intelligence (Permanent Select); Armed Services; the Judiciary; Post Office and Civil Service; Ways and Means; and Banking, Finance and Urban Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. HAWKINS: Committee on Education and Labor. H.R. 4073. A bill to amend the Labor Management Relations Act of 1947 to permit parties engaged in collective bargaining to bargain over the establishment and administration of trust funds to provide financial assistance for employee housing (Rept. 101-441). Referred to the Committee of the Whole House on the State of the Union.

Mr. DERRICK: Committee on Rules. House Resolution 372. Resolution providing for the consideration of H.R. 2015, a bill to amend the Public Works and Economic Development Act of 1965 and the Appalachian Regional Development Act of 1965 (Rept. 101-442). Referred to the House Calendar.

Mr. FROST: Committee on Rules. House Resolution 373. Resolution providing for the consideration of H.R. 1236, a bill to establish evidentiary standards for Federal civil antitrust claims based on resale price fixing (Rept. 101-443). Referred to the House Calendar.

Mr. DINGELL: Committee on Energy and Commerce. H.R. 3520. A bill to amend the Hazardous Materials Transportation Act to authorize appropriations for fiscal years 1990 and 1991, to provide for greater consistency in laws and regulations governing the transportation of hazardous materials in intrastate, interstate, and foreign commerce, and for other purposes; with an amendment (Rept. 101-444, Pt. 1). Ordered to be printed.

Mr. ROE: Committee on Science, Space, and Technology. H.R. 4197. A bill amending the Clean Air Act with respect to research and development activities; with an amendment (Rept. 101-445, Pt. 1). Ordered to be printed.

Mr. GONZALEZ: Committee on Banking, Finance and Urban Affairs. H.R. 3848. A bill to require the appropriate Federal depository institution regulatory agency to revoke the charter of any Federal depository institution which is found guilty of a crime involving money laundering of monetary transaction report offenses and to require the Federal Deposit Insurance Corporation and the National Credit Union Administration Board to terminate the deposit insurance of any State depository institution which is found guilty of any such crime; with amendments (Rept. 101-446). Referred to the Committee of the Whole House on the State of the Union.

Mr. DINGELL: Committee on Energy and Commerce. H.R. 3968. A bill to amend the Organ Transplant Amendments Act of 1988 to change an effective date; with amendments (Rept. 101-447). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. CROCKETT (for himself, Mr. HAWKINS, Mr. CONYERS, Mr. CLAY, Mr. STOKES, Mr. DELLUMS, Mr. RANGEL, Mr. FAUNTROY, Mrs. COLLINS, Mr. FORD of Tennessee, Mr. DIXON, Mr. GRAY, Mr. DYMALLY, Mr. SAVAGE, Mr. OWENS of New York, Mr. TOWNS, Mr. WHEAT, Mr. HAYES of Illinois, Mr. ESPY, Mr. FLAKE, Mr. LEWIS of Georgia, Mr. MFUME, Mr. PAYNE of New Jersey, and Mr. WASHINGTON):

DELETION OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H.J. Res. 300: Mr. PACKARD.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

148. By the SPEAKER: Petition of the Council of the District of Columbia, relative to funding of abortions; to the Committee on Appropriations.

149. Also, petition of the Town Council of Ione, WA, relative to revising the Cable Communications Policy Act of 1984 to open the cable industry to more competition; to the Committee on Energy and Commerce.

150. Also, petition of the City Council of Burlington, VT, relative to support for Federal child care legislation; jointly, to the Committees on Education and Labor and Ways and Means.

SENATE—*Tuesday, April 3, 1990*

(Legislative day of Tuesday, January 23, 1990)

The Senate met at 9:15 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. BYRD].

The PRESIDENT pro tempore. The Senate will be led in prayer by the Senate Chaplain, the Reverend Dr. Richard C. Halverson.

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray:

*In the beginning God created the heaven and the earth. * * * And God saw every thing that he had made, and, behold, it was very good.*—Genesis 1:1, 31.

Creator God from whom, through whom, to whom are all things, to Thee be glory forever. As the Senate prepares to vote on the clean air bill after long, complicated, difficult struggle, grant that the product of their efforts will be an expression of gratitude to Thee, for the good Earth and all the blessings afforded its inhabitants. Help us never to forget that the struggle was not against the perfect environment, created for our benefit, over which Thou dost make us stewards. But it is human greed, ambition, selfishness, carelessness, laziness, that cause it. That the product of progress has produced not only great benefit but also tragic pollution. Help us to be grateful, patient God, for the bountiful blessings the Earth and its atmosphere afford and to take more seriously than ever our stewardship.

For the glory of God, and the welfare of the people, in Jesus' name. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized for 7½ minutes under the order.

THE JOURNAL

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

SCHEDULE

Mr. MITCHELL. Mr. President, this morning the time for the two leaders has been reduced to 7½ minutes each. At 9:30 this morning the managers' package of allowance amendments will be available, and there will be 30 minutes of debate on that package.

At 10 o'clock this morning Senator MCCLURE will be recognized to offer his clean coal technology amendment with 1 hour of debate on that amendment controlled in the usual form. A rollcall vote on or in relation to the McClure clean coal technology amendment will occur no later than 11 o'clock this morning.

Upon completion of that vote, the Senate will return to the McClure Canadian electricity amendment No. 1431 with 15 minutes remaining of debate on that amendment with a rollcall vote to occur on or in relation to that amendment following that 15 minutes of debate. Once that vote has been concluded there will be 15 minutes for debate on the Murkowski clean coal amendment No. 1432 with the vote occurring on or in relation to that amendment upon the completion of that 15 minutes of debate.

That means, Mr. President, Senators should be aware that three votes will occur this morning on the three amendments I have just described, two by Senator MCCLURE and one by Senator MURKOWSKI. The Senate will recess from 12:30 until 2 p.m. for the respective party conferences and, upon reconvening at 2:15, will resume consideration of the clean air bill with final passage to occur sometime during the day today.

RESERVATION OF LEADERS' TIME

Mr. MITCHELL. Mr. President, I reserve the remainder of my leader time and all of the time of the distinguished Republican leader.

The PRESIDENT pro tempore. Without objection, the time of the two leaders will be reserved.

Mr. MITCHELL. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. Mr. President, I ask unanimous consent, seeing no other Senator seeks recognition, to proceed for not to exceed 5 minutes as in morning business for the purpose of introducing a joint resolution and making a few comments thereon.

The PRESIDING OFFICER (Mr. LIEBERMAN). Is there objection? Hearing none, it is so ordered. The Chair recognizes the distinguished President pro tempore, Mr. BYRD, of West Virginia.

Mr. BYRD. Mr. President, I thank the Chair. I ask unanimous consent that I may speak during this period for morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The remarks of Mr. BYRD pertaining to the introduction of Senate Joint Resolution 284 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

Mr. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAUCUS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CLEAN AIR ACT AMENDMENTS OF 1989

The PRESIDING OFFICER. The clerk will report the pending business.

The assistant legislative clerk read as follows:

A bill (S. 1630) to amend the Clean Air Act to provide for attainment and maintenance of health protective national ambient air quality standards, and for other purposes.

The Senate resumed consideration of the bill.

Pending:

(1) Mitchell amendment No. 1293, in the nature of a substitute.

(2) Baucus amendment No. 1307 (to amendment No. 1293), to grant Administrator authority to authorize limited production of halons after the year 2000 if necessary for aviation safety purposes.

(3) McClure amendment No. 1431 (to amendment No. 1293), to restrict the importation of electricity generated from foreign fossil fuel utilities.

(4) Murkowski amendment No. 1432 (to amendment No. 1293), to redefine the terms "repowering" and "qualifying phase I technology."

PACKAGE OF ALLOWANCE AMENDMENTS

Mr. BAUCUS. Mr. President, the managers of the bill, the Clean Air Act, have been negotiating with Senators who have allowance amendments. It was our intent in the last several

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

days to put together a package of allowances that the managers would recommend to the Senate and at a later point today, either late morning or sometime in the afternoon, the managers would then offer that package to the Senate for the Senate's consideration.

If Senators had allowance amendments that were not in the package, of course Senators could offer those amendments any time for the Senate's consideration.

The bare, skeletal outlines of the allowance package are as follows. Again, I remind Senators that this is the package that the managers recommend to the Senate and the managers will offer the package later today for the Senate's consideration. But I felt at this point, at about 10 in the morning, it would be appropriate for the Senate to be on notice as to the contents of the package so that Senators could have an opportunity to examine it, to go through it, so that Senators at a later time today will be in the best position to know how they wish to consider various components of the package.

The total package will reallocate 71,000 allowances per year between the year 2000 and the year 2010. That is 71,000 allowances. That is the total number of allowances that will be covered by this package. That 71,000 allowances will be the number of allowances that will be reallocated per year between the year 2000 and the year 2010.

After the year 2010, 60,000 more allowances will be reallocated. That would be 123,000 allowances total per year that would be reallocated under this package. Again, after the year 2010, 123,000 allowances per year.

We, the managers, also attempted to correct a generic problem with the bill. These allowances are generally generic, that is the total number of allowances covers the generic amendments that Senators have offered. The package, however, does include some very small allocations with respect to specific plants.

At this point I will say, Mr. President, that we shaved down the number of allowances that would be allocated to plant-specific amendments. It is our view that to be generally fair to Senators, it makes more sense to shave down some of the plant-specific allowances.

We must remember that all of the reallocations come out of someone else's allocation. So, where Senators offer amendments and receive the benefit of reallocations, because it is a generic amendment or benefit because it is a plant-specific amendment, those reallocations come out of the hide of other plants throughout the country.

The first one is the Johnston-Breaux amendment. That amendment specifically allocates allowances to gas-burning utility plants. The intent of that is to cover curtailments. That amendment, however, does not take effect until the year 2010. This amendment essentially implements a commitment that the bipartisan negotiators made to assist gas-burning plants that faced potential curtailments and other possible interruptions. This amendment will affect about 22 States and it will affect allowances, as I said, only after the year 2010, and the impact will be about 60,000 allowances.

The second is the Wirth-Dole amendment. The Wirth-Dole amendment applies to municipally owned, small, clean plants. It will give an extra allocation in recognition of their limited ability to bank allowances. The total impact of that alone will be 10,000 allowances per year.

The third is the Graham-Mack amendment. This amendment allows extra allocations for utilities in Florida in recognition of that State's unique population growth. Florida is growing at a rate faster than other States, and their energy demand will increase proportionately. That amendment also grants allowances at the request of the administration to a DOE-funded clean coal project in Tallahassee, FL. The total impact would be 43,000 allowances.

Fourth would be the Fowler-Hatfield amendment. That amendment gives incentive allowances for use of renewable energy for purposes of avoiding SO_2 emissions. It gives bonus allowances to utilities.

It counterbalances the provisions in the bill and gives about 3.5 million bonus allowances as incentives to use scrubbing of high-sulfur coal to reduce SO_2 emissions. The impact of that amendment will be 8,000 allowances per year for the year 2000 to the year 2010.

In addition, we have adopted the McConnell amendment. We have modified that provision. Senator McCONNELL earlier asked for 20,000 allowances. It is now modified down to 5,000 allowances. It is a small allocation to a Florida plant subject to mandatory coal conversion under the Fuel Use Act.

In addition, we have adopted the Metzenbaum-Glenn amendment. This has been modified by the managers. The amendment would give extra allowances for plants converting from nuclear to coal. The impact will be 5,000 allowances.

Finally, we have adopted the Kohl-Kasten amendment. The managers have also modified that as a compromise. It allows extra allowances for a plant in a cooperative system that lost a nuclear plant. It has no impact after the year 2000. It will have an effect only for 5 years in phase I. I believe that is approximately 2,000 allowances in phase I.

Again, Mr. President, this is a package. The total effect of the package will be about 71,000 allowances annually for the years 2000 to 2010 and 123,000 allowances after the year 2010. Those allowances will be annual allowances. It is the intent of the managers to offer this package later today.

Again, we are announcing the provisions of the package at this point so that Senators can be on notice so they can debate the package when it is before the Senate later today.

Mr. President, copies of amendments are available to staff and to Members of the Senate in the Democratic and Republican Cloakrooms.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Chair recognizes the Senator from Rhode Island.

Mr. CHAFEE. Mr. President, anytime we deal with this matter of allowances, particularly as it affects other people, and whatever we give here in effect takes away from some others, it becomes very, very difficult.

I point out that from the year 2000 to the year 2010, we are dealing with 71,000 allowances. That is 71,000 out of 8,900,000 allowances. We are talking on a yearly basis. So that comes down to less than 1 percent; 71,000 is less than 1 percent of the 8.9 million.

In the postyear 2010, we are dealing with 113,000 allowances under the proposal we have here. That would amount to 1.5 percent of the 8.9 million.

So, therefore, I think it is safe to say, Mr. President, in order to take care of these particular problems that arose—and they are legitimate problems; we recognize that, otherwise, we would not have maintained them in the proposal that subsequently will be presented—we are not hurting anybody else in any significant fashion.

In other words, yes, we are touching the others to 1.5 percent, but I hardly consider that as a significant amount. Yes, at the same time, by doing that, we are able to handle these difficult problems that confronted Senators, both from other States and indeed their States. That is what we are talking about; the problems that arose within their States or, in a generic fashion, to a type of installation that will be proposed and installed in not just one State but throughout a broad spectrum of States.

The PRESIDING OFFICER. Under the previous order, the pending amendments are laid aside and the Senator from Idaho [Mr. McCLURE] is now recognized to offer an amendment on which there will be 1 hour of debate equally divided.

The Chair recognizes the Senator from Idaho.

AMENDMENT NO. 1348 TO AMENDMENT NO. 1293

(Purpose: Applicability of new source requirements to certain upgrades of existing facilities under titles I and IV)

Mr. McCLURE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Idaho [Mr. McCLURE], for himself and Mr. MURKOWSKI, proposes an amendment numbered 1348 to amendment numbered 1293.

Mr. McCLURE. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(1)(A) on page 390, amend lines 6 through 19, to read as follows:

"(l) The term (1) 'clean coal technology' means any technology included on a list to be published not later than December 31, 1992, and amended from time to time, by the Administrator, with the concurrence of the Secretary of Energy. Such list shall include—

"(A) the following clean coal technologies: atmospheric or pressurized fluidized bed combusion, integrated gasification combined cycle, magnetohydrodynamics, direct and indirect coal-fired turbines, integrated gasification fuel cells, derivatives of one or more of these technologies, and any other technology capable of simultaneously reducing or removing emissions of sulfur oxides and oxides of nitrogen;

"(B) any oil and/or gas-fired utility unit which has been awarded clean coal technology demonstrations funding as of January 1, 1991, by the Secretary of Energy; and

"(C) any additional technologies, including precombustion, combustion or post-combustion technologies, or any feedstocks derived therefrom which technology or feedstock provides improved performance relative to the performance of technology in widespread commercial use as of the date of enactment of the Clean Air Act Amendments of 1989, as determined by the Administrator, with the concurrence of the Secretary of Energy, based upon consideration of the following criteria: efficiency of energy consumption, number of pollutants controlled, effect on the derating of a boiler, reduction of volumes of by-product solid and other wastes, and differences in availability dates.

"(2) 'clean coal unit' means a utility unit that utilizes a clean coal technology.

"(3) 'retrofit' means, for purposes of section 409, to install a clean coal technology at an existing utility unit with equipment or facilities utilizing a clean coal technology. Such term includes replacement of all or part of an existing utility unit with equipment or facilities utilizing clean coal technology at the same site.

"(4) 'replace' or 'replacement' means, for the purposes of section 409, to retire an existing utility unit and replace such unit with a new clean coal unit at the same or a different site, but only if—

"(A) the new clean coal unit is designated under section 409(a) by the owner or operator of the existing utility unit as replacing such unit,

"(B) the existing unit will be retired from service on or before the date on which the designated new unit enters commercial service, [and]

"(C) the new unit is located in the same air quality region as the existing unit, and

"(D) any allowances otherwise available to the existing unit pursuant to section 409(c) shall be transferred to the designated replacement unit.".

(B) On page 444, line 10, after "SEC. 415." delete existing subsection (a) and redesignate subsections (b) through (e) as new subsections (a) through (d), respectively.

(2) on page 435, amend from lines 3 through page 437, line 20, to read as follows:

"RETROFIT AND REPLACEMENT

"SEC. 409. (a) AVAILABILITY.—Not later than December 31, 1997, the owner or operator of an existing unit subject to the requirement of section 405 may demonstrate to the permitting authority that one or more units will be retrofitted as a clean coal unit or replaced with a clean coal unit designated by the owner or operator of the existing unit, for the purposes of complying with the requirements under section 405. The owner or operator shall, as a part of any such demonstration, provide, not later than January 1, 2000, satisfactory documentation of a preliminary design and engineering effort for such retrofit or replacement and an executed contract for the majority of the equipment for such unit and such other information as the Administrator may require by regulation. If the owner or operator of an existing unit proposes to retrofit or replace such unit with a clean coal unit that uses a clean coal technology listed under section 402(l), and such proposed retrofit or replacement is incorporated in a compliance plan under section 408(b) and an approved permit under section 408(d), approval of such permit shall be deemed to satisfy the requirements of the first sentence of this subsection.

"(b) EXTENSION.—(1) An owner or operator satisfying the requirements of subsection (a) shall be granted an extension of the emission limitation requirement compliance date for the unit to be retrofitted or replaced from January 1, 2000, to December 31, 2003. The extension shall be specified in the permit issued to the source under section 408, together with any compliance schedule and other requirements necessary to meet second phase requirements by the extended date. Any unit that is granted an extension under this section shall not be eligible for a waiver under section 111(j) of this Act.

(2) If—

(A) the owner or operator of an existing unit has been granted an extension under paragraph (1) in order to retrofit or replace such unit with a clean coal unit, and

(B) such owner or operator thereafter satisfies the Administrator (i) that the clean coal technology to be utilized by such unit is economically or technologically infeasible, (ii) that by January 1, 2000, the owner or operator has demonstrated to the Administrator a good faith effort to achieve compliance with the requirements of subsection (a), and (iii) that such existing unit will be retrofitted or repowered with equipment or facilities utilizing another clean coal technology or other available control technology.

then such extension shall be available until no later than December 31, 2003.

"(3) Any retrofit or replacement unit or any unit qualifying under paragraph (2), which receives an extension until December 31, 2003, may elect to receive an additional two-year extension until December 31, 2005, provided that the allowances issued to that unit shall be reduced during such period after the unit is placed in service as the Administrator may prescribe (but not less than two years) by the excess of (A) the aggregate number of allowances which the unit received and used during the two-year period that the extension applied, over (B) the aggregate allowances to which the unit would have been entitled (but for the extension) under section 405.

"(c) ALLOWANCES.—(1) For the period of the extension under this section, the Administrator shall issue to the owner or operator of the affected unit, annual allowances for sulfur dioxide equal to the affected unit's baseline multiplied by the lesser of the unit's federally approved State Implementation Plan limitation or its actual emission rate for 1995. Such allowances may not be transferred or used by any other source to meet emission requirements under this title. In the case of any existing unit that is to be retrofitted as a clean coal unit, the source owner or operator shall notify the Administrator sixty days in advance of the date on which the affected unit for which the extension has been granted is to be removed from operation to install the clean coal technology.

"(2) Effective on that date, the source shall be subject to the requirements of section 405. Allowances for the year in which the source is removed from operation to install the clean coal technology shall be calculated by multiplying 1.20 lbs/mmBtu by the existing utility unit, divided by 2,000, and prorated accordingly, and are transferable.

"(3) Allowances for calendar years after the year the retrofit or replacement is complete shall be calculated by multiplying 1.20 lbs/Btu of sulfur dioxide by the existing utility unit's baseline divided by 2,000.

"(4) An owner or operator of an existing unit satisfying the requirements of subsection (a) while using petroleum coke as a fuel shall be eligible for the same regulatory incentives under section 415(b)(1) as a qualifying clean coal technology.

"(5) Allowances issued to a replacement unit described in section 402(1)(4) shall be reduced during such period after the replacement unit is placed in service as the Administrator may prescribe (but not less than four years) by an amount equal to the excess of (A) the aggregate number of allowances issued under paragraph (1) and used by the existing unit during the extension period provided under subsection (b) over (B) the aggregate allowances to which the existing unit would have been entitled (but for this section) under section 405 during the calendar years that paragraph (1) applied.

"(d) CONTROL REQUIREMENTS.—Any source qualifying for an extension under this section that does not increase actual hourly emissions for any pollutant listed as a criteria pollutant under section 108 of the Act shall not be subject to the requirements of parts C and D of this Act for that pollutant.

"(e) EXPEDITED PERMITTING.—State permitting authorities and, where applicable, the Administrator, are encouraged to give expedited consideration to permit applications under parts C and D for any source qualifying for an extension under this section, that will increase its actual emissions as specified in section 409(d)."

"(g) APPLICABILITY OF NEW SOURCE REQUIREMENTS.—No existing utility unit or source subject to this title shall be subject to any standard under section 111(b) or be

required to obtain a permit under sections 165 or 173 as a result of any physical or operational change that occurs at such unit or source after the date of enactment of this title provided that any such change in the unit's or source's physical and operational design does not increase the maximum potential capacity of the unit or source to emit criteria air pollutants under its physical and operational design.".

(3) on page 447, modify lines 12 through 14, to read as follows: "pollutant listed as a criteria pollutant under section 108 of the Act, except that the potential post-repowering emissions from that pollutant do not exceed the potential pre-repowering emissions for that pollutant as a result of the demonstration project.".

Mr. McCLURE. Mr. President, this is the clean coal technology amendment which was reserved under the prior unanimous-consent agreement. There are a number of Senators who are interested in the amendment and who have indicated either a desire to cosponsor and/or a desire to speak with respect to the amendment. So I am going to be very brief in my introductory remarks so I may be able to yield to others when they come to the floor.

Mr. President, this amendment deals with clean coal technologies and WEPCo. In summary, the amendment—

Clarifies the definition of clean coal technology to conform with the bipartisan agreement;

Expands the definition of clean coal technology and repowering to include not only technologies that achieve simultaneous emission reductions of sulfur oxides and nitrogen oxides but other technologies that meet certain energy and environmental criteria;

Designates a safe harbor list of clean coal technologies eligible for the repowering incentives provided under section 409, consistent with the list in the Mitchell substitute;

Provides for an additional 2-year extension of phase II compliance deadline for units using an eligible clean coal technology from December 31, 2003, as in the Mitchell substitute, until December 31, 2005, provided that the source repays any necessary allowances required by the additional 2-year extension, as in the pending Byrd amendment;

Allows replacement units to similarly qualify for the extensions provided to repowered units under section 409. However, the replacement units will be subject to new source review;

Allows the phase II extension to continue for qualifying clean coal units until December 31, 2005 in the event that the innovative technology proves to be economically or technologically infeasible;

Provides a WEPCo fix to all existing electric utility units that undergo physical or operational changes that do not increase the maximum potential capacity of the unit under its physical and operational design.

In this regard, my amendment would conform the Mitchell substitute to the bipartisan agreement in three respects:

First, the amendment would exempt repowered nondemonstration projects from new source performance standard requirements, rather than from new source review permitting requirements.

Second, the amendment would conform the bill to the bipartisan agreement so that the WEPCo fixes would apply for demonstration and nondemonstration repowered projects that do not result in an emission increase of "any criteria pollutant."

Third, clarifies that permanent demonstration repowering projects shall receive a WEPCo fix if their post-repowering potential emissions do not exceed their prerepowering potential emissions, as specified in the bipartisan agreement.

In addition, the amendment contains all amendments, so far adopted by the Senate, to the definition of clean coal technology and section 409. A more detailed explanation of my amendment follows:

NEW SOURCE REVIEW

Mr. President, the Mitchell-Dole substitute does not fully conform to the WEPCo fix described in the summary of the Senate bipartisan agreement by providing the WEPCo fix to nondemonstration projects repowering with a clean coal technology.

My amendment would correct this inconsistency by providing an exemption for these projects from the New Source Review, as specified in the bipartisan agreement.

The Senate bipartisan agreement outlines the incentives to be provided to those utility units that voluntarily use or demonstrate innovative clean coal technologies. In the case of repowered nondemonstration clean coal projects, the agreement provides an exemption from New Source Review if the unit's postrepowering actual emissions do not exceed the unit's prerepowering actual emissions.

New Source Review is a term of art which refers to the permitting requirements that are applicable to new and modified sources under parts C and D of the Clean Air Act. In contrast, new source performances [NSPS] are technology-based performance standards imposed on new or modified sources under section 111 of the act. The NSPS requirements are separate and distinct from the permitting requirements imposed Under New Source Review. This interpretation is beyond dispute and is followed by all, including EPA.

Mr. President, I ask unanimous consent that a letter dated January 30, 1990 from EPA Region 5 to the Indiana Department of Environmental Management regarding Northern Indiana Public Service Co.'s Bailly generating station be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

ENVIRONMENTAL PROTECTION AGENCY,
Chicago, IL, January 30, 1990.

MR. TIMOTHY J. METHOD,
Assistant Commissioner, Office of Air Management, Indiana Department of Environmental Management, Indianapolis, IN.

DEAR MR. METHOD: The purpose of this letter is to comment on the permit proposed by the Indiana Department of Environmental Management (IDEM) for Northern Indiana Public Service Company's (NIPSCO) Bailly generating station. The permit provides for the construction of an air pollution control device and directly related improvements under the Clean Coal Technology (CCT) program. The Environmental Protection Agency (EPA) agrees with the determination by IDEM that the State and EPA rules for prevention of significant deterioration (PSD) and new source performance standards (NSPS) are not intended to apply to the CCT project at Bailly. In other words, the project should not be considered a "major modification" under new source review (NSR) or a "modification" as set forth under NSPS provided certain requirements are met. In a separate but related issue, EPA also agrees with the determination by IDEM that the addition of a diesel generator as a backup power supply to the scrubber to be installed at Bailly is not a major modification if the limits on operating the generator agreed to by NIPSCO are federally enforceable.

INTRODUCTION

For NSPS purposes, a modification is defined as any physical change in, or change in the method of operation of, a stationary source which increases (in terms of hourly emissions capacity) the amount of any air pollutant regulated under the Clean Air Act (Act) which is emitted by such source, or which results in the emission of any air poluant not previously emitted. For NSR purposes, a major modification is a modification which results in a significant net emissions increase (in terms of actual annual emissions).

The EPA has become aware that these definitions can be interpreted in such a manner as to subject to NSR or NSPS, or both, certain environmentally desirable activities at existing stationary sources which neither Congress nor EPA intended to be covered by the Act's new source requirements. Moreover, NSR or NSPS coverage would, in some instances, have the effect of discouraging such activities. The EPA believes that such activities, including CCT demonstration projects, are not physical changes or changes in the method of operation, so long as they meet certain criteria discussed herein and EPA issues an applicability exclusion. Hence, such activities are not "modifications" for NSPS purposes, or "major modifications" for NSR purposes.

Over the past several months, EPA has held numerous internal meetings to discuss the Clean Air Act regulatory issues raised by the CCT program. As a result of these discussions, the EPA has decided to issue an interpretative ruling as soon as possible to provide guidance on the definition of a physical or operational change as it applies to new source requirements. In a letter

dated January 5, 1990, EPA advised NTPSCO of this intention.

Essentially, this ruling would clarify that if a source solely adds or enhances systems or devices whose primary functions are the reduction of air pollution, and that are determined to be not less environmentally beneficial (as determined by the Administrator) than any emission control system or device it replaces, if any, such activities would not constitute a physical or operational change triggering new source requirements. Consequently, NSPS and PSD and nonattainment new source review would not apply to these types of activities. This interpretative ruling would include permanent, as well as temporary projects under the CCT program. However, it would not extend to projects that primarily are intended to extend the life of a plant or increase capacity. In addition, any changes, permanent or temporary, which are expected to significantly increase emissions to the atmosphere, such as changes which increase a source's hourly operating capacity (e.g., eliminating a bottleneck), hourly emissions rate (e.g., one pollutant decreases but another increases), or utilization rate (e.g., an anticipated increase in hours per year of operation resulting from the installation of controls) would still be subject to NSR and NSPS.

Based on our review of the draft permit, we believe that the Bailly project is consistent with the provisions EPA is developing for its interpretative ruling. On this basis, we have reached the conclusion that this project in particular is not subject to NSPS or major NSR requirements, so long as it continues to meet the criteria discussed herein.

The balance of our comments outlines the grounds for EPA's conclusion and contains a discussion of the anticipated terms of EPA's upcoming interpretative rule. The EPA is still deliberating the specific terms and provisions of its interpretative ruling. While today's comments reflect EPA's current expectations of what will be contained in that document, the actual terms of the ruling may differ from those discussed herein.

BACKGROUND

A. The NSR and NSPS Provisions of the Clean Air Act

A. The NSR and NSPS provisions of the Act apply to wholly new facilities, and to modifications at existing facilities, when certain conditions are met. The rules governing the applicability of NSR and NSPS to modifications at existing facilities are described in detail in the EPA regulations (see 40 CFR 51.165 and Appendix S. 52.21, 60.14 and 60.15). In general, the modifications that would trigger these new source requirements are those involving physical or operational charges which increase emissions over baseline levels. (In addition, for NSPS purposes under EPA regulations, a reconstruction occurs and a source is considered "new" if the physical or operational change costs more than 50 percent of the replacement cost of the affected facility, regardless of whether an emissions increase occurs). The term "physical or operational change" is construed broadly and may include the installation, use, or dismantling of pollution control equipment.

1. Background of the NSPS and NSR Modification Provisions:

The 1970 Amendments to the Act required EPA to promulgate technology-based new source performance standards applicable to the construction or modification of stationary sources that cause or contribute significantly to air pollution which may reasonably be anticipated to endanger public health or welfare. 42 U.S.C. 7411(b)(1)(A). Congress decreed that, in addition to wholly new sources, NSPS would apply to the modification of an existing source, defined broadly as: any physical change in, or change in the method of operation of, a stationary source which increases the amount of any air pollutant emitted by such source or which results in the emission of any air pollutant not previously emitted. Clean Air Act section 111(a)(4), 42 U.S.C. 7411(a)(4).

The NSPS provisions were "designed to prevent new [air] pollution problems" by regulating both newly constructed sources of pollution and existing sources that increase their emissions. *National Asphalt Pavement Assoc. v. Train*, 539 F.2d 775, 783 (D.C. Cir. 1976) [*see also* H.R. Rep. 1146, 91st Cong., 2d Sess. 3, *reprinted in* 1970 U.S. Code Cong. & Admin. News 5356, 5358]. The effect of including modified sources as well as newly-constructed sources under the provisions of section 111 was to establish a current level of emissions above which an existing source may not pollute without becoming subject to the NSPS. In August 1977, Congress adopted further extensive changes to the Act (Pub. L. 95-95). These included review-and-permitting programs for new and modified sources combining the technology-based approach of NSPS with specific measures to insure that ambient air quality goals under the Act are met. Congress intended NSR to apply "where industrial changes might increase pollution in an area." *Alabama Power Co. v. Costle*, 636 F.2d 323, 400 (D.C. Cir. 1979). Part D applies to areas which have not met national ambient air quality standards (NAAQS) under section 109. To receive a permit in such areas, major new and modified sources must (among other things) obtain emissions offsets that assure reasonable progress toward attainment of the NAAQS and must comply with the "lowest achievable emission rate," which can be no less than stringent than an applicable NSPS (see sections 171-173). The 1977 amendments also added a new Part C to the Act including, in sections 160-169, an NSR program for the prevention of significant deterioration of air quality (the "PSD" program) in areas which have attained the NAAQS. To receive a PSD permit, a prospective major new or modified source must (among other things) show that it will not exceed the available air quality "increment" (designed to prevent pollutant concentrations from deteriorating beyond certain levels), and will use the "best available control technology", which must be at least as stringent as any applicable NSPS. Both the Part D NSR program applicable to nonattainment areas and the Part C NSR program applicable to attainment areas adopted the NSPS definition of "modification," but not all the exclusions to that definition [see sections 171(4) and 169(2)(C)].

It is evident from the structure of the NSR and NSPS programs that Congress sought to focus air pollution control efforts at an efficient and logical point; the making of substantial capital investments in, or other long-term decisions regarding, pollution-generating facilities. In adopting NSR measures in particular, Congress sought to reconcile the legislative goal of environmental protection with a concurrent desire for continued economic growth [see sections 160(1)-(4)]. Consequently, a key theme of the NSR program is the careful evaluation of, and public participation in, "any decision to permit increased air pollution" [see section 160(5)]. As discussed below, the current regulations implementing NSPS and NSR were designed to apply these programs in a manner consistent with their respective statutory purposes. Today's comments represent our interpretation of these existing regulations under the facts presented by the Bailly project. The EPA expects that its upcoming interpretative ruling will further focus EPA's position on the basic legislative intent of these important programs.

2. The Two-Step Test for Modifications:

The modification provisions of the NSPS and NSR programs grow from a single statutory trunk, the very broad definition of "modification" in section 111(a)(4). Under both respective programs, EPA developed a two-step test for determining whether activities at an existing facility constitute a modification subject to new source requirements. In the first step, which is largely the same for NSPS and NSR, EPA determines whether a physical or operational change has occurred. If so, EPA proceeds in the second step to determine whether the physical or operational change will result in an emissions increase over baseline levels. In this second step, the applicable rules branch apart, reflecting the fundamental distinctions between the technology-based purposes of NSPS and the technology and air quality concerns of NSR. Briefly, the NSPS program is concerned with hourly emissions rates, expressed in kilograms or pounds per hour. [An hourly emissions rate is the product of the instantaneous emissions rate, i.e., the amount of pollution emitted by a source, after control, per unit of fuel combusted or material processed, (such as pounds of sulfur dioxide emitted per ton of coal burned) times the production rate (such as tons of coal burned per hour)]. Emissions increases for NSPS purposes are determined by changes in the hourly emissions rates at maximum capacity. The NSR is concerned with total annual emissions to the atmosphere, expressed in tons per year. (Annual emissions are the product of the hourly emissions rate, which is the sole concern of NSPS, times the utilization rate, expressed as hours of operation per year). Emissions increases under NSR are determined by changes in annual emissions to the atmosphere.

3. Physical or Operational Change:

The very broad definition of physical or operational change in section 111(a)(4) could, standing alone, encompass the most mundane activities at an industrial facility—even the repair or replacement of a single leaky pipe or a change in the way that pipe is utilized. The definition certainly is broad enough to encompass the addition or enhancement of pollution control equipment. However, EPA has always recognized that Congress obviously did not intend to require every activity to be potentially subject to new source requirements, and that it would be administratively impracticable to do so. Accordingly, EPA has substantially narrowed this term in its NSPS and NSR regulatory definitions through the adoption of common-sense exclusions. For example, both sets of regulations contain similar exclusions for routine maintenance, repair, and replacement; for certain increases in the hours of operation or in the production rates; and for certain types of fuel switches [see 40 CFR 60.14(e); see also, e.g., 40 CFR 52.21(b)(2)(iii)]. In addition, with respect to pollution control equipment, the NSPS regulations contain an exclusion for:

"The addition or use of any system or device whose primary function is the reduc-

tion of air pollutants, except when an emission control system is removed or is replaced by a system which the Administrator determines to be less environmentally beneficial [40 CFR 60.14(e)(5)]."

The EPA has held that this exclusion does not apply to a source which, upon original construction, employed wet scrubbers, but later (upon relaxation of a State plan under section 111(d)) desired to remove the control equipment, which would have resulted in much higher levels of pollution than the plant had ever emitted [*National Southwire Aluminum Co.* v. *EPA*, 838 F.2d 835 (6th Cir.), *cert. denied*, 109 S.Ct. 390 (1988), herein after *National Southwire*]. In the past, EPA, has taken various views as to whether the exclusion in section 60.14(e)(5) should apply for NSR purposes. As noted earlier, the NSR statutory definitions of modification simply adopt the NSPS definition in section 111(a)(4). In addition, the legislative history reflects that, as a general matter, Congress intended to conform the meaning of "modification" for PSD purposes to usage under NSPS [see 123 Cong. Rec. H11957 (Nov. 1, 1977)]. For this reason, EPA initially ruled that the NSPS exclusion for addition of control devices applied automatically to PSD (Memorandum from Edward E. Reich, CAQPS and William F. Pedersen, OGC, to EPA Region VI, April 21, 1983). The EPA reversed course in a 1986 applicability determination issued for both PSD and nonattainment NSR purposes, noting that the NSPS exclusion was highly qualitative, and failed to give due account to either the air quality management component or the largely quantitative orientation of the NSR applicability regulations. (Memorandum from Gerald A. Emison, Director, CAQPS to Regional Air Division Directors, July 7, 1986).

COMMENTS ON NSPS APPLICABILITY

An NSPS modification is any "physical or operational change to an existing facility which results in an increase in the emission rate to the atmosphere of any pollutant to which a standard applies" (40 CFR 60.2). Under NSPS, emissions increases, for applicability purposes, are calculated by comparing the hourly emission rate immediately before and after the physical or operational change. All operating parameters which may affect emissions must be the same to the maximum feasible degree for the before and after testing, and tests must be conducted under representative conditions. Absent the exclusions from modifications specified at 40 CFR 60.14 (e), any increase in emissions to the atmosphere over the previous emissions rate will subject the modification to NSPS [see section 60.14 (a) and (b)]. In addition, modifications which would cost 50 percent or more of the cost of a comparable new facility are classified as reconstruction (see 40 CFR 60.15) and are subject to NSPS as a new source even if there is no emissions increase.

Thus, unless the reconstruction provisions come into play, it is clear that under the existing regulations NSPS would not apply to the installation or improvement of emission control equipment which reduces hourly emissions rates. If the reconstruction provisions do apply, then such changes would trigger NSPS.

Based on NIPSCO's permit application and representations made by NIPSCO's September 14, 1989 and December 4, 1989 information submittals to EPA, NSPS would not apply to the Bailly Station if the new scrubber is not removed (i.e., if it is a permanent demonstration) because hourly emission rates will not increase as a result of the addition of these CCT controls. As a permanent CCT demonstration project, it would satisfy the requirements of the exemption contained in 40 CFR 60.14(e)(5) for the addition or use of any control system or device whose primary function is the reduction of air pollution. (The definition of "modification" for NSPS is found at 40 CFR 60.14). In addition, the Bailly project would not qualify as a reconstruction under 40 CFR 60.15.

However, the NSPS provisions could also apply to major facilities with temporary CCT demonstration projects at the end of the demonstration when the control equipment is removed and emissions rise back to the level that existed before the demonstration. Thus, while the placement of CCT controls at Bailly will reduce the hourly sulfur dioxide (SO_2) emissions rate, if NIPSCO later dismantles the CCT controls, this would result in an increase in hourly 802 emissions up to pre-demonstration levels and the source could be considered subject to NSPS.

Today's comments reflect EPA's position that the Bailly plant would not be subject to NSPS at the conclusion of the project, if NIPSCO decides to make it only temporary, as the result of an increase in emissions rates back up to the levels which existed before the changes were made to accommodate the temporary demonstration project. The EPA expects that its forthcoming interpretative rule will take this position with respect to all temporary CCT and similar demonstration projects which reduce emission rates. Unlike the situation presented in *National Southwire*, it is clear that the addition of pollution control in a temporary CCT demonstration was never intended to result in permanent emissions reductions. In addition, removal of temporary controls will not result in a level of emissions higher than that experienced in the past. (Reconstruction provisions, however, could subject both temporary and permanent CCT demonstration projects, and certain other emission control system installations or improvements, to NSPS. Still, as indicated by the Bailly project, the reconstruction provisions of the Act should rarely, if ever, apply to the type of activity which would be considered for exclusion from the definition of a physical change or a change in the method of operation. Thus, the triggering of the reconstruction provisions is an indication that the proposed activities are more extensive than just the addition, or replacement, of an emission control system or device, and so are not appropriate for exclusion.)

COMMENTS ON NSR APPLICABILITY

Modified sources are subject to NSR if the modification is "major." Major modifications must consist of a physical change or change in the method of operation of a major stationary source (40 CFR 52.21(b)(1)] which results in a net emissions increase of any pollutant subject to regulation under the Act that is significant. Significance levels are expressed in tons per year and differ for each pollutant [40 CFR 52.21(b)(23)]. Net emissions increases are determined [40 CFR 52.21(b)(3)] by summing all countemporaneous creditable actual emissions increases and decreases. The definition of "actual emissions" is such that generally the comparison is between actual emissions before the physical or operational change in question and the potential to emit of the facility afterwards [40 CFR 52.21(b)(21)]. If the source has not been operating near full capacity, even the addition of a control device could be considered a significant net emissions increase when comparing historical actual emissions with a new potential to emit, even though there may be a substantial reduction from historic actual emissions.

Specifically, actual emissions before the change at a facility are generally determined by averaging the emissions for the 2 years prior to submittal of the permit application (or some other period if the last 2 years are not representative of normal unit operation) [see, e.g., section 52.21(b)(2)(ii)]. Since the emissions rate after a physical or operational change cannot be predicted in advance, EPA regulations assume that a source's actual emissions will equal its maximum "potential to emit", which is based on constant full load operation for an entire year (unless restricted by federally enforceable limitations) [see, e.g., sections 52.21(b)(21)(iv); 52.21(b)(4)]. Thus, a physical or operational change will trigger NSR if the annual potential to emit of the source is significantly greater after the change than its representative actual annual emissions before the change, unless the company agrees to federally enforceable operational restrictions which limit its potential to emit to levels not significantly greater than its actual emissions before the change. This actual-to-potential methodology applies to physical or operational changes at new or "modified" (i.e., altered or changed) emissions units [see 45 FR 52676, 52677, 52718 (1980)].

As explained below, EPA believes that this methodology generally serves the purposes of NSR because it subjects to review projects that might lead to an increase in actual pollution. However, the NSR provisions in the existing regulations could be interpreted to apply to major facilities simply installing or improving control equipment, including CCT demonstration projects, under circumstances where a permanent increase in pollution is highly unlikely.

Under EPA's prospective interpretative ruling, existing sources which would otherwise become subject to NSR only because they decide to install or improve emission controls, or participate in the CCT program or similar demonstration projects approved by EPA, would instead be excluded from NSR coverage, so long as certain criteria intended to ensure that permanent increases in actual emissions do not occur are met.

With respect to the Bailly project in particular, it appears that the plant has been operated at a rather high level of approximately 60 percent of capacity, reflecting baseload utilization of the plant. There is no indication that NIPSCO intends to increase this level of usage at any time following installation of the CCT controls. In addition, it appears that the Bailly project will meet the criteria EPA expects to set forth in its interpretative ruling for both temporary and permanent projects.

The EPA now believes it is appropriate to devise and apply such criteria both for the Bailly project and for the upcoming interpretative ruling. The EPA has recommended the position taken in its 1966 memorandum, discussed earlier, regarding use of the NSPS exclusion in 40 CFR 60.14(e)(5). While EPA continues to believe that this exclusion does not apply automatically for NSR purposes, the criteria discussed herein provide due consideration of air quality management concerns and the need for quantitative analyses.

CONDITIONS FOR PERMANENT CONTROLS OR DEVICES TO BE CONSIDERED NOT LESS ENVIRONMENTALLY BENEFICIAL

As noted above, EPA is preparing an interpretative ruling which will clarify that if a source solely adds or enhances systems or devices whose primary functions are the reduction of air pollution, and which are determined to be not less environmentally beneficial, such activities would not constitute a physical or operational change triggering new source requirements. At this time, EPA anticipates that its ruling will provide that such pollution controls will be considered not less environmentally beneficial, with respect to permanent controls, if they meet at least the following criteria:

(1) The source will continue to meet all current requirements and standards applicable to existing sources under the Act. This includes meeting applicable NAACS, PSD increments, permit conditions, and State implementation plan (SIP) limitations.

(2) There is no environmental harm resulting from the proposed activities. This includes conditions that the proposed activities would not cause the source to;

(a) increase the maximum hourly actual emissions rate of any pollutant regulated under the Act;

(b) increase the annual emissions of any pollutant regulated under the Act as a result of an increase in capacity utilization rate;

(c) adversely impact an air quality related value (e.g., visibility) in any Class I area; or

(d) allow an increase in emissions of toxic pollutants not regulated by the Act which would cause an adverse health or welfare impact.

Based on the information provided by NIPSCO, it appears at this time that the Bailly project, if it is made permanent, will meet the above criteria. Accordingly, as to the Bailly project in particular, EPA believes that major NSR requirements clearly will not apply if the project is made permanent, so long as these criteria are in fact met.

TEMPORARY CCT CHANGES

In its upcoming interpretative ruling, EPA expects to follow criteria for "temporary" CCT projects which are somewhat different from those for permanent projects. The EPA likely will consider a project to be temporary if it lasts less than 5 years from the date the project commences construction. However, the ruling probably will provide that the Administrator would consider an additional period of time, up to 5 additional years, in certain cases. At the end of a temporary project, the facility would be returned to pre-demonstration conditions and hourly emission rates (or lower). It is not clear if the proposed Bailly station permit is for a permanent or temporary CCT project. It is our understanding that NIPSCO considers the first 3 years of the CCT demonstration project to be "temporary" and will view the changes as "permanent" for the following 17 years if they are continued after the 3 year period.

The EPA expects that its interpretative ruling will provide that for temporary demonstration projects, the conditions relating to actual emissions increases and hours of operation criteria under 2a, b and d above would not apply to minor, temporary variations from nominal operating conditions. Temporary increases may occur due to testing procedures or some failure in unique but unproven equipment, but should not willfully contribute to adverse health or welfare impacts. The EPA believes that the benefits inherent in CCT and other similar technology demonstration projects counterbalance the limited, temporary impacts that may occur during these temporary projects. Under the ruling, temporary demonstration project applications likely would have to meet all of the other criteria applicable to the permanent projects discussed above. This interpretation would provide the flexibility to encourage temporary demonstration projects which are considered to be environmentally beneficial overall, despite unpredictable, temporary increases in emissions of some pollutants or in the hours of operation that may occur during the course of a demonstration.

The EPA expects the ruling to state that temporary changes would become permanent at any time during or at the end of a demonstration period if the owner/operator seeks a revised applicability determination addressing all criteria applicable to permanent air pollution control system improvements. In submitting these comments, EPA is applying the above criteria in its review of the Bailly project. If NIPSCO ultimately decides that the Bailly CCT project is to become a permanent CCT demonstration, the project should meet all the criteria discussed earlier for permanent projects at the time the project is to be converted to permanent status (i.e., after 3 years).

PROCEDURES FOR ENVIRONMENTALLY BENEFICIAL EXCLUSIONS FROM APPLICABILITY

The EPA expects that under its forthcoming interpretative rule, an owner or operator proposing to make an environmentally beneficial change in an air pollution control system will be called upon to request an applicability determination from the appropriate NSR/NSPS permit authority. The request should include a general description of the facility and the proposed activity, information on the current and projected use of the facility, and sufficient information to justify a nonapplicability determination. For any air pollution control system improvement, the request should include a rationale for why the emission control system or device should be considered equal to or more efficient than existing control technology at the source.

The EPA also anticipated that its interpretative ruling will state that in providing information to the reviewing authority, an owner or operator should submit sufficient modeling to demonstrate that any new or increased emissions of unregulated toxic pollutants resulting from the change in control equipment will not cause or contribute to adverse health or welfare impacts. The owner or operator should also demonstrate that the source will not operate at greater hourly emissions rates, or for more hours, than it has been during the most recent 2 years (or some other period, if the last 2 years are not representative of normal operation). In assessing whether actual emission increases of any pollutant are likely to occur, the reviewing agency should consider the economic incentives to increase production rates or hours of operation associated with the change. Any change which could reasonably result in increased emissions due to possible increased utilization of the facility as a result of the changes should not be considered environmentally beneficial. The authority reviewing the proposed change should explicitly determine, based on consideration of these and other relevant criteria, that the net effect will not be one of environmental harm.

OPERATING LIMITS ON NEW DIESEL GENERATOR

The EPA considers the addition of a backup diesel generator at Bailly not to be an integral part of the CCT demonstration, in that the generator could serve multiple functions once installed. In general, EPA views changes to be subject to NSR and NSPS if such changes are not strictly related to the addition of the improved air pollution control system and the changes have any possible additional application. However, EPA agrees with IDEM that the addition of a new diesel generator does not constitute a "major modification" if the State's limits on the generator's hours of operation, preventing concomitant increases in emissions from exceeding significance levels, are federally enforceable.

In closing, EPA agrees with the State that NSPS and NSR do not apply if the conditions outlined in this letter are met. If you have any further questions, please contact Mr. Ron Van Marzbergen at (312) 886-6056 or Mr. Dom Aballa at (312) 886-6543.

Sincerely yours,

DAVID KEE,
Director, Air and Radiation Division.

Mr. McCLURE. Mr. President, contrary to the terms of the bipartisan agreement, section 409(a) of the Mitchell-Dole substitute provides repowered nondemonstration projects with an exemption from the NSPS requirements, rather than from the New Source Review permitting requirements. This amendment would correct this inconsistency by exempting such repowered projects from the requirements of parts C and D, as provided under the bipartisan agreement.

CRITERIA POLLUTANT AMENDMENT

The Mitchell-Dole substitute does not fully track the Senate bipartisan agreement which provides WEPCo fixes for demonstration and nondemonstration repowered that do not result in an emission increase of any criteria pollutant. The amendment would make conforming changes to the bill in accordance with the earlier distributed explanation of the bipartisan agreement.

The Senate bipartisan agreement outlines the incentives to be provided to those utility units that voluntarily use or demonstrate innovative clean coal technologies. In the case of demonstration and nondemonstration units repowering with a clean coal technology, the agreement provides WEPCo fixes if the repowering does not result in an emission increase of any criteria pollutant. Criteria pollutant is a term of art that refers only to those pollutants for which EPA has promulgated national ambient air quality standards under section 108 of the Clean Air Act. To date, EPA has promulgated such air quality standards for six pollutants: sulfur dioxide, oxides of nitrogen, particulate matter, carbon monoxide, ozone, and lead.

The Mitchell-Dole substitute fails to track the bipartisan agreement on this point. With respect to repowered nondemonstration projects, section 409(d) provides a WEPCo fix only to those

repowering units that do not result in an emission increase of "any pollutant regulated under the act". However, other pollutants besides the six criteria pollutants listed above are regulated by EPA under the act, such as mercury, beryllium, fluorides, vinyl chloride, and hydrogen sulfide. Under the Mitchell-Dole substitute, an increase in any of these pollutants could also prevent a repowered project from receiving the WEPCo fix, even though no increase in one of the criteria pollutants would result. A similar problem arises for demonstration repowered projects, except that section 415(d)(3)(A) of the Mitchell-Dole substitue expands even further the scope of the emission increase test to include any pollutant whether or not it is a criteria pollutant or otherwise regulated under the act.

The amendment would make conforming changes to the bill so that the WEPCo fixes would apply if an emission increase would not result for any criteria pollutant.

PERMANENT DEMONSTRATION REPOWERING PROJECTS

This amendment further clarifies that permanent demonstration repowering projects shall receive a WEPCo fix if their post/repowering potential emissions do not exceed their prerepowering potential emissions, as specified in the Senate bipartisan agreement.

An inconsistency exists between the proposed statutory language of the Mitchell-Dole substitute, amendment 1293, and the Senate bipartisan agreement regarding the WEPCo fix to be provided to permanent demonstration repowering projects.

The bipartisan agreement provides that such projects shall be exempt from the new source performance standards imposed under section 111 and part C of the Clean Air Act if the repowering does not result in an emission increase. In determining whether an emission increase has occurred, the agreement specifies the EPA shall compare prerepowering potential emissions against postrepowering potential emissions at the unit in question.

The Mitchell-Dole substitute fails to track this clear language of the bipartisan agreement. Section 415(d)(3)(A) only identifies that postrepowering potential emission will be the standard of measure, but is silent regarding the standard of measure to determine prerepowering emission levels. This lack of specificity could permit EPA to compare prepowering actual emissions against postrepowering potential emissions. Such a comparison represents EPA's original position in the WEPCo case and would make it considerably more difficult, if not impossible, for permanent demonstration repowering projects to receive their NSPS and part C exemptions.

The proposed amendment would correct this problem by adding clarifying language indicating that EPA shall employ a potential-to-potential comparison in determining whether an emission increase has occurred at the repowered project in question.

WEPCO

Mr. President, this amendment addresses recent EPA interpretations regarding application of the new source requirements of the Clean Air Act. The EPA decisions are embodied in a series of interpretations commonly referred to as the WEPCo decisions.

If the EPA is permitted to apply its interpretations in administering the acid deposition title of the bill, the market-based control program intended by title IV will be undermined and a serious electric reliability problem could be created.

BACKGROUND

Beginning in fall 1988, EPA issued the first in a series of unprecedented decisions which represent an extreme extension of new source requirements to existing sources. These decisions require application of stringent new source controls to projects that involve like-kind replacement of deteriorated equipment, where the replacement has no effect on the plant's original design capacity. EPA's new policies have been extended to projects that would improve air quality such as the installation of pollution control equipment, fuel conversions from oil to gas, and clean coal technology projects.

The WEPCo decisions were first initiated by an EPA ruling involving a refurbishment project at a plant owned by Wisconsin Electric Power Co. [WEPCo]. In that decision the EPA determined that stringent new source controls would be applied to units undertaking refurbishment of deteriorated equipment. This refurbishment was undertaken to restore reliable operations of the existing powerplant unit.

In several subsequent decisions the EPA extended application of the WEPCo decision to other projects such as equipment changes that improve efficiency, installation of pollution control equipment, fuel conversions from oil to gas, and programs to demonstrate clean coal technolgoies.

ICF ASSUMPTIONS

In determining the economic impact and emissions projections of the acid deposition title ICF Resources Inc., the organization relied upon by EPA for analysis of title IV, assumed that utility plants could undertake major refurbishment projects, could develop clean coal technologies, and could switch to lower polluting fuels without triggering the WEPCo decision. The ICF evaluations also assumed that each powerplant would undergo refurbishment to improve reliability and increase efficiency when the unit reached age 30. And finally, ICF assumed that these refurbishment would restore lost capacity from these older units and allow them to operate for an additional 25 to 35 years. Each of these activities would trigger new source requirements under the WEPCo decisions, but EPA had ICF assume that they could take place without any new source review.

In a separate ICF study it was concluded that if units undertaking refurbishment were subject to the WEPCo decision thereby requiring units to undergo new source review and possible installation of control equipment, flexibility in the development of acid rain control strategies would be eliminated and control costs could be increased by $1 to $7 billion annually.

CONCLUSIONS

The legislation before the Senate imposes an emissions cap how utilities achieve reductions, consequently should be left to decisions by the utility, hence the market-based control program. If, however, the WEPCo interpretations must be considered in determining compliance strategies, then a whole separate set of considerations are required and least costly methods of control no longer govern reduction decisions.

Furthermore, without refurbishment and other needed repairs and replacements, some older smaller units will have to shut down. Those that do not shut down face delays in making needed repairs while undergoing a lengthy new source review process. Applied economic research [AFR], an expert in electricity supply forecasting, has determined that the WEPCo interpretations could affect the reliability of the supply of electricity to as many as 138 million people through 1995, especially States in the Midwest, South, Mid-Atlantic, and New England.

The WEPCo interpretations simply preclude utilities from selecting the most cost-effective control strategy. They also impede the development of clean coal technologies and they discourage, or preclude, compliance strategies based on conversions to natural gas. Finally, they would inhibit changes that reduce costs and improve efficiency; that is, allow a utility to produce more electricity with the same amount of fuel.

SUMMARY OF WEPCO FIX

A simple amendment to title VI would solve all of the problems that EPA has created with the WEPCo interpretations. The currently pending amendment would provide that a unit can undertake physical or operational changes without triggering new source requirements so long as it does not emit more than it was designed to emit.

I wish to emphasize that the amendment does not modify the emissions

cap; it does not change or disturb allowances. It simply provides utilities the greatest degree of flexibility possible in determining which plants to control or over control, whether to switch fuels, use new clean coal technologies or keep units in operation in order to meet electricity demand.

In an era of concern about this Nation's competitiveness, the Agency now invokes new source review, which can take over a year, when an owner proposes to change a facility to improve efficiency or to restore reliable operations. EPA's current interpretations of WEPCo represent bad environmental, energy and economic policy.

Mr. President, for the reasons I have mentioned, I urge adoption of this amendment.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. BAUCUS. Mr. President, I yield 5 minutes to the Senator from Rhode Island.

Mr. CHAFEE. Mr. President, the current Clean Air Act provides that when a utility makes a major modification that results in increases in air pollution, the EPA is to treat it as if it were a new source. If they make a major modification, then it is treated as if it is a new source, so you are subject to the new source performance standards.

The rationale is that the new dose of pollution has the same effect on the local air shed as that of a brandnew unit. Thus, the modified utility, if the modifications will result in emissions increases, must meet new source performance standards and must also meet the requirements for new sources in nonattainment areas—that is an area that is not in conformity with the law, with the goals—or those for new sources in attainment areas. In other words, if it is already an attainment area, then there must be what they call PSD, prevention of significant deterioration.

What this amendment does is to revise a case that was decided, the so-called WEPCo, Wisconsin Electric Power Co., case, and would weaken current law. The amendment would have the effect of exempting the modification of utility plants from EPA review no matter how much additional pollution resulted from the modification.

The amendment that is currently before us exempts a utility modification from new source performance treatment if the modification does not result in an increase in the modified plant's maximum potential to emit. That is what this amendment talks about. If there is no increase in the maximum potential to emit, then it is exempt as compared to that of the plant before the modification.

This approach sounds like it precludes any increase in emissions, but this is not the case. In other words, you think, well, you are not going to go above its potential, so therefore you are not changing what the situation used to be. The problem with this approach is that it does not reflect the practical effect of the modification. A modification would take—I think it is important to follow this, Mr. President—an old, underutilized plant with relatively low emissions, transform it into a "just like new plant" and enable it to operate much more extensively and produce many more emissions.

According to EPA, average actual—we are not talking potential, we are talking actual—SO_2 or NO_x emissions from existing utilities are only 37 percent of potential emissions and particulates are only 44 percent of potential emissions. This is because the older plants are operating well below their maximum capacity. To allow a refurbished utility to emit at its old potential levels could permit an almost two-fold increase in emissions.

What we are pointing out is that plants have not been operating at their potential. They have been operating at an actual. So you then take an old plant and you fix it up, refurbish it, and suddenly it is not operating at the old, relatively low actual emissions, but you are much higher, you are up far closer to the so-called potential. In other words, you are getting, in some instances, twice as much emissions than you previously had from this plant.

So this amendment could permit a powerplant, even one where its emissions directly affected a national park, for example, to refurbish or add a new boiler, to double its NO_x and particulate emissions, triple its SO_2 emissions and cover these SO_2 emissions by purchasing allowances and never have to demonstrate what impact this would have on visibility or other air quality standards.

Similarly, a powerplant could increase emissions in a nonattainment area. Let us take Houston or Boston, any city. Take my home city of Providence. A powerplant could increase emissions in one of these nonattainment areas and neither have to demonstrate air quality impacts nor be required to offset these increases of emissions as they are required to do under existing law.

The PRESIDING OFFICER. The time allocated to the Senator from Rhode Island has expired.

Mr. CHAFEE. If I might take 2 more minutes, Mr. President.

Mr. BAUCUS. Mr. President, I yield 2 minutes to the Senator from Rhode Island.

The PRESIDING OFFICER. The Senator from Rhode Island is recognized for 2 more minutes.

Mr. CHAFEE. Mr. President, for the reasons I pointed out, this is not a good amendment. There has been some suggestion about the agreement, and apparently people do not like to hear that we entered into an agreement with the administration, trying to come to certain conclusions. We made—"we" being those on the Environment Committee—certain concessions; the administration made certain concessions. We arrived at this agreement. This amendment would certainly break that agreement in a substantial way.

So, Mr. President, for the above reasons, I hope that the amendment will be defeated.

The PRESIDING OFFICER. Who yields time?

Mr. McCLURE. Mr. President, I yield myself such time as I may consume, and I do so only to answer a couple of points the Senator from Rhode Island has made.

First of all, yes, indeed, there was an administration agreement, and, in part, what this amendment seeks to do is to have the committee comply with the agreement to which the Senator referred. The bill as written does not conform to the bipartisan agreement as announced. Part of the purpose of this amendment is to get the bill to actually conform to what the agreement was.

Second, with respect to the fact that there is a difference between actual emissions and potential emissions, the Senator is correct, but that is possible under current law. That does not change current law. As a matter of fact, the only thing that would inhibit a dirty, old powerplant from increasing its emissions by increasing its online power is whatever may be referred to in a State implementation plan, and the SIP is not affected by this amendment. If there is a SIP, it applies; if there is not a SIP, to does not apply. What you are really talking about is, do you want to get old powerplants cleaned up to the extent that they operate today and to the extent they might operate.

Let us take an example, assuming that there is not a SIP which would prohibit this action, an old plant that is operating at 10 percent of its capacity, and as a supplement to the newer, cleaner plants in the same system, they desire to retrofit that plant to make it cleaner. Absent this amendment, all they would have to do is crank the old plant up and operate it for a period of time until they qualify with the baseline requirements and then they can retrofit.

In the meantime, they have greatly increased their pollutants. Would it not be better to grant them the opportunity to retrofit that plant and clean it up instead of requiring them to go through the period of gross emissions

in order to qualify under the current law which they could do under the current law or under this bill?

There is a reason for us to try to clean up the old plants and encourage their retrofit. That is a large part of what we are trying to do in this bill, to get the old systems cleaned up to newer standards. What we are saying in this particular instance is let them clean up that power plant, the old power plant, by retrofitting it with more energy efficiency.

Let us take an example. An old plant that, say, is operating at 33- or 34-percent efficiency and can increase its efficiency to 44 percent. Let us take that as an example. A 10-percentage points increase in its energy efficiency with no increase in emissions, that is good energy policy. It is thought not bad environmental policy because, as a matter of fact, if you do that the emissions per unit of output are lower than they would be under the current operating regime.

I hope everybody is for that. I cannot imagine anybody is really opposed to that. That is what we attempt to do under this amendment.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. BAUCUS. Mr. President, I yield myself 5 minutes.

Mr. President, in the judgment of this manager as a member of the bipartisan agreement, in fact the Senator who was in charge of the negotiations of the bipartisan agreement, this amendment is a deal breaker. This amendment is a deal breaker essentially because it significantly expands the definition of clean coal technology.

The question of clean coal technology was very thoroughly debated during the bipartisan negotiations. That is, how many years should the clean coal technology definition be extended? How many years can a utility avoid complying with the provisions of the act because it was installing clean coal technologies? And, what is the definition of clean coal technology? How expansive should the definition of clean coal technologies be?

This is a very very important point because the more broad the definition of clean coal technology the more utilities will be able to postpone the years in which they are getting reductions in emissions.

The more reductions in emissions are postponed, that is the fewer the number of tons of reductions, and consequently the fewer the number of allowances will be gained particularly under the Byrd-Mitchell-Domenici, and the Byrd-Bond provisions, then the fewer allocations will be available to other States.

This question was very, very thoroughly debated. Again, there is a tension, a tradeoff, between those States that want allowances, particularly the clean States and the growth States. On the other hand those States in the Midwest want allowances so they can sell those allowances to help pay for the cleanup.

Because this was negotiated, because the bipartisan negotiators reached an agreement, we all felt that was an agreement that we must stick with. The amendment offered by the Senator from Idaho changes the definition of clean coal technology to such a degree that it is a deal breaker.

That is the main reason I believe this amendment should be opposed.

But second, the amendment also has the effect of dirtying the air compared to current law because under the amendment a plant would be able to increase emissions very significantly, and not have to conform with either NSPS, under new-source review, or under PSD.

For those two reasons, I think this amendment should be soundly rejected, Mr. President.

If this amendment is agreed to, Senators should be on notice that it will very significantly reduce the allowances that are granted to this State. The estimates are that the effect of this amendment would be 10 to 20 percent fewer cumulative tons of emissions reduced, and therefore, 10 to 20 percent fewer allowances given to utilities.

If there are fewer allowances, Senators should know that their States will be adversely impacted by the effect of this amendment.

I, therefore, very strongly suggest that this amendment not be adopted. I reserve the remainder of my time.

Mr. McCLURE. Mr. President, I yield myself 2 minutes. Mr. President, the assertion that this would increase pollution is flatly false. There may be a genuine misunderstanding of the effects, but as I said before, if there is an old plant out there that is dirty and it cannot continue to operate under existing law, it can continue to operate if there is no SIP in place that prohibits it. It can continue to operate up to its plant capacity, much dirtier than it is today.

The second point I would wish to make is with respect to the entitlements question, the allowances question. It would require every existing plant to take the maximum allowable action under this amendment to have the kind of significance the Senator from Montana has indicated.

I think that is highly speculative. It is not at all likely to happen. As a matter of fact, this is probably not going to affect a great number of plants very significantly. But in the instances when it would, why would we require that plant to operate with no emissions controls? They are the dirtiest, oldest plants that we have. Why would we require them to operate for a period to qualify under the baseline provisions in order to qualify for retrofit? That is ridiculous.

On the face of it, it is bad policy, and all this amendment does is gives them some opportunity to operate in such a manner that they can retrofit without having to go through that preliminary dirty emissions phase. That makes good sense to me. We have, under programs that came from the Energy and Natural Resources Committee and other sources through this Congress, enacted into law clean coal technology expenditures of almost $7 billion. This bill will nullify much of that expenditure.

Does it make sense for us to throw-away $7 billion worth of research when, with a very modest adjustment in the existing bill, it is possible for us to reap the profit from some of that investment the taxpayers of this country have made?

The PRESIDING OFFICER. Who yields time?

Mr. CHAFEE. Mr. President, if I might have 4 minutes.

Mr. BAUCUS. Mr. President, I yield 4 minutes.

Mr. CHAFEE. Mr. President, if I might put this in a simplistic fashion, what the Senator is saying is that old plants are permitted to emit. He is right. They are not subject to the new source performance standards.

The rationale that is behind permitting these old plants to emit is first of all, they are inefficient, and at some point they are so inefficient they are going to be replaced. And there you come in with a new plant and a clean plant.

Those old plants that are still going are what we call backup plants. In other words, the potential of the plant—this is important—is let us say x megawatts. But the plant is essentially a backup plant. It is not used continually. It is only rarely used. Or it is used at most at a half x. Therefore its emissions are not substantial, not anywhere close to what their potential could be.

Here is what the Senator is saying. He is saying that it makes sense not to replace this plant but to upgrade it, to retrofit it—not totally make a new one of it, but retrofit it so that it gets up toward x, its total potential. He is saying that is perfectly all right. As long as you are are retrofitting it and get to the x, the potential, we are not again going to require any emission controls.

Here is the flaw. The flaw is in his argument that we are not seeing the end of these plants. We are not seeing them either go out or be reused in a very reduced fashion.

So, in effect, he is increasing the total amount of emissions that are occurring in our Nation. The whole purpose of the Clean Air Act is to reduce

these emissions, so he wants to get around that. In effect, you could say that he is creating a great big loophole. That is not what we want. The whole purpose of this act is to clean up the air of the Nation, whether it is with NO_x—I might mention that we are talking NO_x emissions, which cause ozone. That is why I mentioned previously the difficulties with the nonattainment areas.

So, Mr. President, it is a bad amendment. It creates a whole new area of emissions that never would exist. He said, they might exist because the potential is there. The fact is they do not exist, because these plants are not there for potential. They are used as backup. I hope that the amendment would be defeated.

The PRESIDING OFFICER. Who yields time?

Mr. McCLURE. I yield myself 2 minutes.

Mr. President, up to a point, I agree with the Senator from Rhode Island, but beyond that point, I cannot agree with his assessment of the effect of the amendment. If, as a matter of fact, an old plant is retrofitted and in effect becomes a new plant totally, it would be subject to a new source performance standard under the bill or under my amendment. That is not changed, except in some very technical ways in which tradeoffs between types of emissions may be involved, where that would solve the problem; that is my description of that particular aspect.

My amendment would solve the problem that might be a problem under the bill. Again, what this does is to make it possible for us to use some of that technology which we have developed after $7 billion of expenditure by the taxpayers, in developing clean coal technologies that could be applied to old plants to make them operate more efficiently and without any increase in pollution.

It does not make any sense to this Senator to have invested $7 billion in the development of new technologies, and even though they would result in no increase in pollution say, I am sorry, you cannot use those to increase the energy efficiency of the plant. Remember—and I stress this—if you increase the energy efficiency and do not increase the gross emissions from the plant, you have increased the pollution efficiency per unit of output. You get more output with no more pollution, and that is good from an environmental standpoint. Why the committee wants to put on blinders and say we do not want that, do not want you to increase energy efficiency, it troubles me. I do not know what kind of a preoccupation we have to blind us to the opportunity to improve our energy efficiency with no detriment to the environment.

The PRESIDING OFFICER. Who yields time?

Mr. CHAFEE. Mr. President, the bill currently provides that if you do not increase the emissions, you are not subject to the new source performance standards. What the Senator is doing is driving a Mack truck through this, polluting, I might say, at the same time, because he is not willing to have those restrictions imposed; and for the reasons I pointed out, that the new result of the Senator's amendment is increased pollution, I do not think it is something that we want.

He keeps referring to $7 billion, which apparently is a reference to the clean coal technology development. I can only assume that. Somehow the suggestion is given that we have not done anything about clean coal technology in here. Well of course, we have. We have given a delay for those plants that install the clean coal technology to meet the emission control standards. We have done a whole series of pluses, you might say, and given advantages to the clean coal technology. We have not just blown away the investment of $7 billion. So that is a red herring that is being submitted, I suggest, in this argument.

The PRESIDING OFFICER. Who yield time?

Mr. BAUCUS. Mr. President, I yield myself such time as I may consume. The essential point of this is that it is a deal-breaker. That is the sum and substance of this amendment.

We discussed this subject, clean coal technology. We discussed the definition, and we discussed the time within which plants would be able to install clean coal technology to otherwise avoid provisions in the bill which require reductions in allowances. This whole question was thoroughly debated among the bipartisan negotiators and with the administration. We reached an agreement as to the definition of clean coal technology, an agreement as to phase 1 allowance allocations, and an agreement as to phase 2 allowance allocations.

Senators should know that if this amendment is adopted, it will have the effect of reducing allowances to their States in very many cases. The EPA estimates there will be an additional 10 to 20 percent in tons of SO_2 emitted cumulatively after the year 2000, a potential cumulative increase in emissions of 10 to 20 percent after the year 2000.

So, Mr. President, in addition to the arguments made by the Senator from Rhode Island as to the pollutant effect and the adverse effect to the environment, I say that the whole separate reason this amendment should be defeated is that it is a deal-breaker. It breaks the deal. For that reason alone, this amendment should be soundly defeated and, again, not because it breaks the deal, but because the effect of breaking the deal is that it is going to have then an adverse effect on very many States. I think Senators should be aware of that.

The PRESIDING OFFICER. Who yields time?

Mr. McCLURE. Mr. President, just to respond very briefly and then I will yield to Senator McCONNELL. In a very brief fashion, I wish to respond to the Senator from Montana. Let me say this. The Senator said there would be an increase in pollution. That is impossible under the amendment. He would have to misunderstand the amendment to say that.

It may delay the achievement of reductions which otherwise might occur. That is a possibility, but let us be clear what we say, that is not an increase in pollution.

Second, with respect to the impact upon allowances in various States, that is likely to be very minimal, but it is also even more likely that the areas in which these plants would be refitted with more energy-efficient combustion processes developed by the clearn coal technology are precisely the States where the allowances will be necessary.

So while it may reduce the pool of overall allowances very, very marginally, it is going to occur precisely where it ought to occur, in the dirty States. That, to me, seems to be a useful addition to this bill.

Mr. BAUCUS. Will the Senator yield for a question?

I do not understand the Senator's point. If allowances are reduced, allowances are reduced nationwide, virtually, not only in those States in the Midwest, for example, that might have older plants that would benefit from the Senator's amendment, but also from States in the West; my State of Montana, for example, would get fewer allowances. The State of Wyoming would get fewer allowances. Other Western States would get fewer.

Mr. McCLURE. Mr. President, the point I was making, and I will make it again, that if indeed you have an old and dirty plant and you can apply new clean coal technology to that plant in its combustion processes to the extent that it has an impact upon the allowances in that State, that is beneficial to that State in terms of the overall energy efficiency, the cost to the consumer, impact upon the industry. I think that is favorable.

I yield 5 minutes to the Senator from Kentucky.

Mr. McCONNELL. Mr. President, the pending amendment is a good amendment, and I want to speak in favor of it. As a Senator from a major coal-producing State, I believe it is important that we develop new technologies to permit the future coal-fired generation of electricity in an environmentally responsible and cost-effective manner.

The President's clean air proposal contained a 3-year extension of time for repowering clean coal technologies, as did the committee bill, S. 1630. The Byrd-Bond proposal provided for a 5-year extension for a broad range of clean coal technologies. The bipartisan agreement now before the Senate contains an extension for repowering technologies from the January 1, 2000, phase II deadline. The pending amendment, in my view, is a modest change in the bipartisan agreement which will produce major benefits for our country. This amendment, among things, increases the deadline another 2 years and includes replacement or new units in the definition of repowering technologies in the bill.

Many of the clean coal technologies that can quality for the extension of time and other incentives under this legislation are those which are most efficient and cost effective. Unfortunately, they will not be fully demonstrated and guaranteed for commercial use until the year 2005.

It is true that many of these technologies are currently being demonstrated on a small scale. It will take considerable time, however, to install and operate these technologies on a large enough scale and for sufficient periods of time before industry gains confidence in them and they are commercially available.

Mr. President, the Energy Committee, of which I am a member, held hearings earlier this year at which we heard testimony from the Department of Energy and from manufacturers and consumers of clean coal technologies regarding when these technologies would be available. That testimony indicated that almost none of the technologies planned or under development will be ready before the year 2000, and in the case of advanced technologies to reduce both sulfur dioxides and nitrogen oxides, before the year 2004 and beyond.

Mr. President, this is why the amendment before us is so important. In my opinion, if we have already decided to provide an extension for some of these technologies, we need to allow enough time and incentives to encourage their widespread commercial use.

Mr. President, this extending the deadlines is not only good for the coal in my State, it also is good for the environment. The clean coal technologies that will receive the extension under this amendment can meet or exceed the emission reduction requirements for sulfur dioxide [SO_2] and nitrogen oxides [NO_x] in this bill.

Several of them can reduce both sulfur dioxide and nitrogen oxides, whereas conventional technology, that is, scrubbers, are only capable of reducing SO_2. These new technologies also are improvements over scrubbers because they do not produce as much waste byproduct which often requires costly disposal.

Finally, many of these technologies are more efficient than scrubbers and can produce an equal amount of electricity using less coal, thereby reducing the emissions of carbon dioxide associate with global warming.

More importantly, Mr. President, these technologies represent a way for us to utilize our coal resources to meet the anticipated growth in demand for electricity. Presently, nearly 50 percent of the electricity generated in this country comes from coal. It is estimated that this number will grow to 60 percent by the year 2010.

At the same time, our need for new power generation will increase by as much as 138,000 megawatts by the year 2000, according to the Energy Information Administration of the U.S. Department of Energy. Coal is going to be with us well into the next century as an energy source and clean coal technologies will permit us to burn coal in an environmentally prudent manner.

This amendment also adds replacement units to those types of clean coal technologies eligible for the extension.

These are new units which replace old, dirty powerplants. If we are to encourage the future use of clean coal technologies, we must also encourage their use at new plants. One way to do this is to make such plants eligible for the extension. The bipartisan agreement limited the extension to repowering units only, that is, to existing plants where a new technology is installed.

Adding clean coal replacement units will not increase in any great amount emissions during the extension period. A number of restrictions are placed on units which operate during the extension period.

For example, the old unit must be shut down before the new unit is placed in operation. Also, allowances for the new unit are to be obtained from the old unit or acquired by the owner or operator. Finally, the new replacement unit must be located in the same air quality control region as the old unit and the new units must comply with all Clean Air Act permitting requirements.

Mr. President, as I understand the amendment, it also provides a payback feature that requires replacement units to put back any extra allowances used during the extension period. These allowances would be paid back over a period to be determined by the EPA Administrator and would be equal to the amount of allowances used by the existing unit during the extension period which are above the allowances the unit would have received if it had operated under the phase II reduction program during the same period.

I believe this payback of allowances is fair and reasonable. It addresses the concern of those who believe the extension period for clean coal technologies will allow excessive emission of pollutants after the year 2000. It also responds to the concerns of Senators, like my colleague from New Mexico [Mr. DOMENICI], who wish to protect the delicate balance of the bipartisan agreement with respect to the allowances on a regional basis.

This payback provision preserves the integrity of the bipartisan agreement by keeping all allowances used within the same air quality control region and with existing owners or operators who would be using allowances anyway to generate electricity at older, existing units.

Mr. President, we need the benefits of new, clean coal technologies in order to meet future energy growth and to meet the tough new clean air requirements of S. 1630 once enacted. An extension of time for these technologies is critical to the development and widespread commercial use of clean coal technologies. This amendment is reasonable and will provide some assurances that clean coal technologies will be used in the future.

I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. CHAFEE. Mr. President, I yield myself 3 minutes.

The PRESIDING OFFICER. The Senator is recognized for 3 minutes.

Mr. CHAFEE. Mr. President, let us sum up what we are doing here and what the amendment proposes to do. What the Senator's amendment proposes is, he wishes to creep up to the maximum potential of every old plan. His answer to that is, well, these plants are spewing out the potential now, and what I am doing is putting in this new technology, and I am just going to have them get up to that potential under my new proposal, but that ignores the facts.

The facts, Mr. President, are these plants are not operating at their maximum potential now. That is just a plain fact. These plants are old and they are only used in this standby capacity. They are not operating at their potential.

What the Senator's amendment seeks to do under the current law if they upgrade these plants, they have to meet new source performance standards which deal with emission control. That is the whole purpose of his amendment. He does not want the expense of these emission controls. That is why he is for the amendment. That is the whole purpose of the amendment—to avoid the expense of the emission controls.

I might further point out that there is a good deal of talk of clean coal technology, but his amendment does

not solely require clean coal technology. It is not built around clean coal technology. That is not required in order to qualify for this new exemption that he seeks. Any new technology will qualify. It is not clean coal technology, Mr. President.

The PRESIDING OFFICER. Who yields time?

The Senator from Idaho.

Mr. McCLURE. Mr. President, I do not need the Senator from Rhode Island to tell me what I have in my amendment. Aside from the fact it is not his place to tell me what I mean by the amendment or have in my mind about the amendment, the Senator is flatly wrong in his assumptions or conclusions about my motivation.

This is an energy efficiency amendment. I do not quite understand the argument that has been made by the Senator from Montana with respect to allowances. If you do not clean up any pollution, you do not get any allowances. So you argue that this is not going to clean up any pollution but it is going to create a lot of allowances. That is logically inconsistent.

As a matter of fact, this is an energy efficiency amendment designed to allow us to use those technologies which have been developed with the expenditure of taxpayers' funds so that we can increase the energy efficiency of our powerplants in this country. This bill does not prohibit it or weigh against it. That is my motivation. That is the purpose, that is the result.

It cannot have the effect the Senator from Montana says with respect to allowances. It does not have the effect that some have suggested of creating a loophole.

The Senator from Rhode Island must assume—perhaps I am wrong in making this assumption on his part—that somebody in a power industry out there is going to go out and make foolish expenditures of money just for the sake of making the expenditures of money. Why would they do that if they gain nothing in energy efficiency, they gain nothing in pollution control? Why would they make an expenditure? Just for the fun of it? I doubt very much that is the result.

They would do it only if indeed it increases the economic efficiency and operation of one of these old plants. Yes, indeed, it might result in the extension of life of an old plant, and to the extent that it did so, it might delay the application of even cleaner technology that might be applied during the same period of time. But we would do that in order to achieve greater energy efficiency and that is good policy for this country. I cannot think of any reason why we would not want to do it.

If there are any reallocations because of replacement allowances, they must be paid back under the provisions of this bill. It is simply as nearly neutral on allowances as an amendment could be, and, as a matter of fact, I see no reason to oppose it on the basis of impact upon allowances.

I do not want to overstate it, but I think it is clear that if there is an extension because of this, the allowances granted by the extension would have to be paid back. That is provided for in the amendment. If, as a matter of fact there is no cleanup in the pollution, there are no allowances granted, and, therefore, I cannot see that it would have very dramatic impact upon allowances under any conceivable circumstances.

I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

The Senator from Montana.

Mr. BAUCUS. Mr. President, I yield myself such time as I may consume.

Mr. President, the effect of the amendment is to allow more plants to delay compliance in the year 2000 and year 2004, that is the effect of the amendment, as the definition of clean coal technology is expanded. Therefore, more plants will be able to delay the date by which they have to conform to the provisions of the bill. That would mean there would be fewer reductions in calendar year 2000, fewer reductions in tons, because more plants will be delaying. That means there will be fewer allowances to allocate out of the bonus pool. That is because the bonus pool is tied to the size of the reductions achieved in the year 2000. That is the simple effect of this amendment.

Now, Senators should be aware of that, the fact the Senator from Idaho did agree that there would be reduction allowances. The debate is, I suppose, how many reductions there would be. The EPA estimates that with a similar provision—it did not specifically analyze the McClure amendment—but a similar provision would have the effect of 10 to 20 percent fewer allowances to be allocated under the bonus in phase II. That is the effect of the amendment.

It is for that reason, as well as the reasons that it will tend to make the air dirtier, again because more plants would be out from under the clean coal definition contained in this bill I again urge the amendment not be adopted.

The bottom line is why should we use Federal funds under the guise of the clean coal technology program on facilities which would be allowed to increase their emissions over current levels?

That is the bottom line.

I reserve the remainder of my time.

Mr. McCLURE. Mr. President, I do not know just exactly how to respond to the continued statements being made in opposition to the amendment which I think are inaccurate because I say they are inaccurate and then they are repeated, and I again say they are inaccurate and again they are repeated.

I would stress to the managers of the bill and to their staffs, please read the amendment; not my lips, the amendment. Because the amendment says that if indeed, on these repowering technologies, the modifications being proposed would cause no net increase in pollution. This is because the amendment would require those qualifying projects who elect to use the additional 2-year extension to December 31, 2005, to pay back any excess emission allowances into the Government's pool once the new facility is completed and operating but in no case later than December 31, 2005. That is provided in the amendment. Emission repayment is also a requirement of the second provision regarding replacement facilities.

So let me reiterate that emissions that occur under this type extension will be repaid and therefore the amendment will not pose any additional costs or burden on any other project or region of the country.

I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time? If no Senator yields time, the time will now be deducted equally from both sides.

Mr. McCLURE. Mr. President, I ask unanimous consent Mr. McCONNELL be added as an original cosponsor to the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CONRAD. Mr. President, I commend the Senator from Alaska for offering this amendment, and I rise to support it. It is a good amendment, and deserves the support of Senators.

The Mitchell-Dole substitute to S. 1630 unnecessarily restricts the category of technologies that qualifies for the bill's clean coal incentives. What difference should it make which technology achieves the reductions under the bill? Why should not utilities have the flexibility to meet the objectives of the legislation in the manner that is most efficient and cost effective? If the bill provides that flexibility, then consumers will benefit as well through lower cost power.

The Murkowski amendment removes the bill's restrictions and gives every technology an equal opportunity to compete. If we adopt the amendment, the result will be cleaner air at a lower cost.

The Murkowski amendment, among other things, modifies the definition of "repowering" to ensure that precombustion technologies can qualify for the phase II incentives. These technologies would still have to meet the criteria contained in the definition of "repowering." In other words, they would have to control multiple emis-

sions, provide improved boiler generation efficiency, and achieve significantly greater solid waste reduction.

There are numerous precombustion clean coal technologies that can meet these criteria. It makes no sense to exclude them.

For example, North Dakota has vast deposits of lignite which is a low sulfur, low Btu, high moisture coal that is used most economically in a powerplant in a mine-mouth operation. The Murkowski amendment would encourage the use of clean coal technologies that produce an efficient boiler fuel by reducing the high moisture content of lignite, by reducing both sulfur dioxides and oxides of nitrogen, and by reducing the solid wastes.

Mr. President, this amendment does not relax the standards of the bill. It does not increase the cost of the legislation, and it does not change the manner in which the bill attempts to achieve clean air. It is a good and reasonable amendment that brings fairness to the clean coal technology provisions of the bill. I urge its adoption.

Mr. McCLURE. I am prepared to yield back the remainder of my time if the managers concur.

Mr. BAUCUS. Mr. President, I yield back the remainder of my time.

Mr. McCLURE. I yield back the remainder of my time.

Mr. CHAFEE. Mr. President, I move to table the amendment.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is this a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the motion of the Senator from Rhode Island.

The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Hawaii [Mr. MATSUNAGA] is necessarily absent.

Mr. SIMPSON. I announce that the Senator from Indiana [Mr. COATS] and the Senator from Indiana [Mr. LUGAR] are necessarily absent.

The PRESIDING OFFICER (Mr. ROBB). Are there any other Senators in the Chamber who desire to vote?

The result was announced, yeas 64, nays 33, as follows:

[Rollcall Vote No. 49 Leg.]

YEAS—64

Adams	Cohen	Gorton
Baucus	Cranston	Graham
Bentsen	D'Amato	Harkin
Biden	Daschle	Hatfield
Bond	DeConcini	Heflin
Boschwitz	Dixon	Hollings
Bradley	Dodd	Humphrey
Breaux	Durenberger	Inouye
Bryan	Exon	Jeffords
Bumpers	Fowler	Kassebaum
Chafee	Gore	Kasten
Kennedy	Mitchell	Rudman
Kerrey	Moynihan	Sanford
Kerry	Nunn	Sarbanes
Kohl	Packwood	Sasser
Lautenberg	Pell	Simon
Leahy	Pressler	Stevens
Levin	Pryor	Warner
Lieberman	Reid	Wilson
Mack	Riegle	Wirth
McCain	Robb	
Mikulski	Roth	

NAYS—33

Armstrong	Ford	McConnell
Bingaman	Garn	Metzenbaum
Boren	Glenn	Murkowski
Burdick	Gramm	Nickles
Burns	Grassley	Rockefeller
Byrd	Hatch	Shelby
Cochran	Heinz	Simpson
Conrad	Helms	Specter
Danforth	Johnston	Symms
Dole	Lott	Thurmond
Domenici	McClure	Wallop

NOT VOTING—3

Coats	Lugar	Matsunaga

So, the motion to lay on the table, the amendment (No. 1438) was agreed to.

Mr. BAUCUS. Mr. President, I move to reconsider the vote by which the motion to table was agreed to.

Mr. CHAFEE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1431 TO AMENDMENT NO. 1293

The PRESIDING OFFICER. Under the previous order, the Senate will resume consideration of amendment 1431 offered by the Senate from Idaho [Mr. McCLURE]. There is 15 minutes of debate on this amendment equally divided and controlled by the Senator from Montana [Mr. BAUCUS].

Mr. McCLURE. Mr. President, parliamentary inquiry. In order to modify the amendment, do I have to have unanimous consent?

The PRESIDING OFFICER. The Senator is correct.

Mr. McCLURE. Mr. President, it would be my desire—and I would call the attention of the managers to this request—to add, at the end of the amendment, a compliance with GATT provison, reading as follows:

The provisions of this action shall not apply if the President submits to the Congress a written statement certifying that the provisions of this section violate the obligations of the United States under the General Agreement on Tariffs and Trade or the United States-Canada Free-Trade Agreement.

Mr. President, I ask unanimous consent to modify my amendment accordingly.

The PRESIDING OFFICER. Is there objection to the modification proposed by the Senator from Idaho?

Mr. MOYNIHAN. Mr. President, reserving the right to object, I will not object.

The PRESIDING OFFICER. The Senator from New York.

Mr. MOYNIHAN. I do observe that the Senator from Idaho has made an amendment which would make only somewhat less unacceptable his previous amendment which, in my view, would violate our free-trade agreement with Canada, and is totally unacceptable. I will not object. I would just like to make that point.

The PRESIDING OFFICER. Is there objection to the modification proposed by the Senator from Idaho?

If not, the amendment is so modified.

The amendment, as modified, is as follows:

On page 449, after line 19, insert the following new section:

"CERTIFICATION OF EQUIVALENT ACID RAIN CONTROLS

SEC. 416. (a) IMPORTS OF ELECTRICITY.—Except for imports of electricity pursuant to contracts entered into prior to the effective date of the Clean Air Act Amendments of 1990, after January 1, 1994, it shall be unlawful for any person to import electricity, unless the Administrator, in consultation with the Secretary and the Secretary of Energy, has published a decision, after notice and opportunity for public comment, certifying, in accordance with to subsection (b) that the nation from which such electricity is imported has established and is implementing a national program of emission requirements and controls on existing and new steam-electric utility units on a schedule and in a manner that is at least as stringent as the compliance schedules for and limitations on emissions under this Act and the Clean Air Act for similar utility units in the United States, except for imports of electricity under subsection (c).

"(b) CERTIFICATION OF NATIONAL PROGRAM.—The Administrator shall not certify any national program or utility unit under subsection (a) unless it is determined that—

"(1) the nation has adopted legislation or regulations which give the emissions reductions and control schedules for each pollutant the force of law and is implementing such progam; and

"(2) the legislation or regulations include performance standards, reporting requirements and enforcement provisions no less stringent than those specified under this Act and the Clean Air Act, and that the information contained in such reports is available to the Administrator and the Secretary upon request.

"(c) CERTIFICATION OF UTILITY FACILITIES.—Unless imports of electricity are from a nation certified under subsection (b), after January 1, 1994, it shall be unlawful for any person to import electricity, unless the Administrator, in consultation with the Secretary and the Secretary of Energy, has published a decision, after notice and opportunity for public comment, certifying that—

"(1) the electricity to be imported is exclusively from an identified utility unit that converts nuclear fuel or renewable energy resources to electricity; or

"(2)(A) the utility unit is subject to emissions limitations at least as stringent as those specified under this Act and the Clean Air Act; and

"(B) the utility unit will meet emissions monitoring, inspection and reporting requirements at least as stringent as those specified under this Act and the Clean Air Act, and that the information contained in such reports is available to the Administrator and the Secretary upon request.

"(d) REVOCATION.—At least biennially, the Admininistrator, in consultation with the

Secretary and the Secretary of Energy, shall review each certification made under this section and shall revoke the certification, after notice and opportunity for public comment, unless it is determined that the conditions of this section remain satisfied and for a national program under subsections (b), that the emissions reductions for each pollutant are occurring substantially on schedule in such nation. Revocation shall take effect one hundred eighty days after notice of the revocation has been published.

"(e) SUPPLEMENTARY REPORT.—The reports required by the Administrator pursuant to section (see amendment 1303, adopted March 6th shall include an analysis by the Administrator, in consultation with the Secretary and the Secretary of Energy, of the differences in emission control levels of sulfur dioxide and nitrogen oxides between Canada and the United States. The report shall include: (1) a detailed analysis of the actual or projected variable costs and fixed costs associated with United States and Canadian acid rain controls among fossil-fired generation units within interconnected and competitive regions and (2) an examination, with relevant supporting cost data, of the effect of differences in such controls on energy trade.

"(f) As used in this section, the term—

"(1) 'Administrator' means the Administrator of the Environmental Protection Agency;

"(2) 'fossil fuel' means a naturally occurring organic fuel, including coal, crude oil, and natural gas or fuel derived therefrom;

"(3) 'import' means to land on, bring into, or introduce into, any place subject to the jurisdiction of the United States, whether or not such landing, bringing, or introduction constitutes an importation within the meaning of the customs or trade laws of the United States;

"(4) 'person' means an individual, corporation (including a government corporation), partnership, firm, joint stock company, trust, association, or any other entity, or any officer, employee, agent, department, or instrumentality of the Federal Government, of any State or political subdivision thereof (including any interstate body), or of any foreign government (including any international instrumentality);

"(5) 'renewable energy resources' means primary sources of energy that are essentially inexhaustible including biomass, geothermal, wind, falling water, and solar radiation; and

"(6) 'Secretary' means the Secretary of State.

"(g) COMPLIANCE WITH GATT.—The provisions of this section shall not apply if the President submits to the Congress a written statement certifying that the provisions of this section violate the obligations of the United States under the General Agreement on Tariffs and Trade or the United States-Canada Free-Trade Agreement.".

Mr. McCLURE. I thank the Chair, and I thank my colleague for permitting that modification to be made. That obviously was done in order to try to answer some of the criticism of the violation of free-trade agreement arguments that have been made.

Mr. President, throughout this debate amendments have been characterized——

Mr. MOYNIHAN. Mr. President, I am sorry to interrupt but the Senator is making an important point and we cannot hear.

The PRESIDING OFFICER. The point made by the Senator from New York is well taken. The Senate is not in order. Any Senator desiring to carry on conversation is asked to retire to the Cloakroom.

The Senator from Idaho may proceed.

Mr. McCLURE. I thank the Chair.

Mr. President, throughout this debate, amendments have been characterized as cap busters. The opposite is true in this amendment. Our failure to pass this amendment is the cap buster. There is a major hole in Canada's cap on their emissions of sulfur oxides. The three western Provinces of Canada do not participate in Canada's acid rain control program. In other words, they, not us, have busted the cap.

My amendment addresses this inequity in acid rain controls between Canada and the United States by, first, seeking to achieve comparable atmospheric emissions controls in Canada to those in the United States under these Clean Air Act amendments which are applicable to imports of electricity.

Second, the amendment establishes procedures for the certification of comparable acid rain controls as a condition of new contracts for the importation of electricity imports.

Third, if certification of an equivalent program or emission limitations is not possible, imports are permitted from nonfossil generation facilities such as hydroelectric or nuclear facilities, or renewable resource conversion facilities.

Fourth, the amendment provides for a study of trade and other inequities created by differences between the acid rain controls in the United States and Canada.

This amendment applies only to future imports. This amendment does not effect current imports of electricity, nor does the amendment apply to future imports of electricity from nonfossil fuel fired generating units such as hydro or nuclear generation and renewable energy sources.

It has been alleged that this amendment is a violation of the Canadian Free-Trade Agreement. If so, so is the CFC provisions in the Mitchell substitute, section 512 of page 541, which also prohibits certain substances and consumer products from importation into the United States unless the country of origin has comparable CFC controls. This CFC provision is structurally the same as my amendment.

If my amendment violates the Canadian Free-Trade Agreement, so does the CFC's provisions.

Mr. President, I urge adoption of my amendment.

I reserve the remainder of my time.

Mr. BAUCUS. Mr. President, I yield 4 minutes to the Senator from Texas.

Mr. BENTSEN. Mr. President, we want to expand imports of electricity from Canada. Canada is the only country that is exporting electricity to us. We just signed a free-trade agreement about 2½ years ago, and that was after more than 2 years of negotiations.

Mr. President, studies have shown that we would have an economic gain to this country of some $1 billion to $3.5 billion by putting a free trade agreement into effect with Canada. The agreement is just beginning to be implemented. One of the things we fought hard for—and the Canadians were very strong for—and finally made some concessions to get, was a dispute settlement mechanism. That is what should be used to address this situation.

I must say there is no question in my mind but what the amendment violates GATT at a time when we are working to settle the Uruguay round by the end of this year, and which we will be voting on early next year. To take this kind of an action in direct violation of GATT I think would be a serious mistake.

The amendment would restrict imports from Canada based on how electricity is made. Just think what it would mean if Canada turned that one around and said it was going to restrict imports from this country based on how products are made in this country. Remember that they have been concerned for a long, long time over acid rain, and because of that have taken much more aggressive, much more complete steps in trying to cut back on air pollution than we have. If they started trying to crank that into the cost of products we made here, we would see this thing coming back to haunt us.

In addition, insofar as the health programs of Canada and what they pay for the employee, if they tried to pass those kinds of costs back to us, once again it would be something that would make free trade a mockery between our two great countries.

We are talking about a country like Canada with lakes and forests, which they zealously want to protect. We have been dragging our feet on clean air legislation to clean up acid rain to protect those resources.

So I strongly believe we ought to use dispute settlement mechanisms that have been set up between Canada and the United States under the free-trade agreement. I urge very strongly that this body reject this violation of the GATT and the free-trade agreement with Canada.

Mr. McCLURE. Mr. President, I yield myself 30 seconds. I ask the Senator from Texas if he has read section 512 of the bill that is before us that deals with CFC's.

Mr. BENTSEN. I have not examined that specific provision but if the Sena-

tor is trying to chose something that he thinks violates GATT or violates the free-trade agreement I do not see that as any excuse to compound the problem by passing this amendment.

Mr. McCLURE. Mr. President, I yield myself an additional 30 seconds.

I thank the Senator for his response. The reason I ask the question, it seems curious to me that the committee produces a bill which has within it section 512 and then objection is raised to an amendment on the floor. I assume if the committee had thought of this amendment themselves it would have been all right. I only suggest that because the CFC provision is an absolute ban on imports on precisely the same basis as my amendment. If my amendment is subject to that criticism, then certainly the leadership substitute is also subject to that criticism.

The PRESIDING OFFICER. Who yields time?

Mr. BAUCUS. Mr. President, I yield myself 1 minute.

Mr. President, I would like to respond to the point made by the Senator from Idaho. First of all, the CFC provisions in the leadership substitute bill are general as they apply to all countries. They do not apply just to Canada. They do not apply to any single country. They apply to all countries. It does not single out one country, Canada, as does the Senator's amendment.

Mr. McCLURE. Will the Senator yield?

Mr. BAUCUS. If I may finish.

No. 2, Canada has signed the Montreal protocol, which significantly calls for the reduction of CFC's. The Senator's amendment on the other hand applies to the country of Canada. It certainly does not apply to very many countries. Maybe Mexico.

Mr. McCLURE. Will the Senator yield on that point because that was the point I wanted to make?

Mr. BAUCUS. I will yield to the Senator on the Senator's time. I want to say that I was very much a part of the negotiations on the Canadian Free-Trade Agreement and I can tell the Senator that if this amendment were adopted, that if this were a subject of those negotiations, we would have a different agreement. We probably will not even have an agreement with Canada.

Mr. McCLURE. Mr. President, yielding myself 30 seconds, I apologize for trying to interrupt the Senator from Montana, but he made the statement my amendment applies to only one country. It does not. It applies to all countries.

Mr. BAUCUS. How are we going to import power from Germany?

Mr. McCLURE. I will yield on the Senator's time, not mine.

As a matter of fact, the amendment on the face of it applies to any country. Certainly, our neighbors are the ones from whom you would expect to get electricity, not from countries further away. But again, this is structurally identical with the CFC provision.

Mr. BAUCUS. Mr. President, how much time is left?

The PRESIDING OFFICER. The Senator has 3 minutes, 17 seconds under his control, and the Senator from Idaho has 2 minuts, 48 seconds.

Mr. BAUCUS. Mr. President, we do not have a lot of time left. I yield 2 minutes to the Senator from New York.

Mr. MOYNIHAN. I thank the Senator.

Mr. BAUCUS. I apologize to the Senator. We only have 7½ minutes total. I yield 2½ minutes to the Senator from New York.

Mr. MOYNIHAN. Mr. President, may I speak in tandem with the chairman of the Finance Committee, the distinguished Senator from Texas, who said this would be a violation of the GATT. May I add as one who has been involved in the Canadian Free-Trade Agreement that this would be a violation of the agreement with Canada, which specifically provides that there will be no restrictions on the import of electricity of power between one country to the other.

May I point out that Ontario Hydro imports electricity from fossil fuel burning plants in Ohio, but in the main, what have in the trade is north-south. We bring in hydroelectricity from the far northern running rivers of Quebec and other provinces. It is the most exceptional opportunity American industry has for clean fuel, clean power, inexhaustable power. It is one of the great virtues of the free-trade agreement, and in report language we confirmed it.

We will not interrupt this movement. To adopt this amendment would be in violation of that understanding. It would be so deeply violative of American interests in clean energy. After all, what is this all about but clean energy?

Incidentally, you could never distinguish exactly where power was generated. It gets all mixed up in the grids. Whatever we do, do not let us deny America this access of the most important possible kind, and further violate one of the great trade achievements of the 1980's

Thank you, Mr. President.

The PRESIDING OFFICER. Who yields time?

Mr. BAUCUS. Mr. President, how much time do I have?

The PRESIDING OFFICER. There are 22 seconds remaining.

Mr. BAUCUS. I yield the entire 22 seconds to the Senator from Rhode Island.

Mr. CHAFEE. Mr. President, I briefly say that we had a discussion, and I said Sweden might retaliate against us. The proponent of the legislation, with considerable scorn, pointed out that Sweden does not sell the electricity. So this is strictly directed against Canada and Mexico, possibly.

The PRESIDING OFFICER. All the time allocated to the Senator from Montana has expired.

The Senator from Idaho controls 2 minutes 48 seconds.

Mr. McCLURE. Mr. President, I must say to my friend from New York that he has apparently not read the amendment or listened to the debate. That is a totally irrelevant and extraneous matter. This amendment does not cover hydroelectric energy. I am puzzled by the argument of the Senator from New York about something that is not even before the body at this time.

This is an issue about whether or not we are going to export industry to Canada so they can dirty up the air. That is what it is all about. We have in this bill a very careful set of regional balances. The biggest argument we had on the floor is how to balance regional interests. What we have done is share costs across the country on this amendment to clean up the air. Every area of this country has to share the costs. It was carefully distributed, but we are carefully exempting Canada. "Go ahead, Canada, dirty up the air. We will get your pollution. That is all right with us." Everybody in this country will pay. Canada alone is exempted. That is ridiculous.

If you want clean air, then we have the opportunity to say in areas of this country that otherwise will be discriminated against, clean up your air in Canada, as we clean up our air in this country, and do not export our industry to Canada so they can have a dirty industry while ours have to clean up. That is exactly what this issue is all about.

I urge the adoption of the amendment.

The question is whether it is violative of the Canadian Free-Trade Agreement, not a violation of GATT. The Canadian Free-Trade Agreement, I hope, has been solved by the addition to the amendment this morning. I thank my colleague for permitting the modification.

The PRESIDING OFFICER. The Senator has no time remaining. If the Senator wishes to make a motion, it would be in order. The yeas and nays have not been requested. The Senator has 24 seconds remaining.

Mr. BAUCUS. Mr. President, I know the Senator from New York would like to clear a point that is a bit ambiguous. I ask unanimous consent to have 2 additional equally divided.

The PRESIDING OFFICER. Without objection, the debate will continue 2 additional minutes.

Mr. MOYNIHAN. Mr. President, I am advised by the distinguished man-

ager on this side of the aisle that the provision in the amendment before us applies to all electricity. It does not distinguish. I read the language.

It shall be unlawful for any person to import electricity—

Import electricity, not one or the other kind, but electricity in general.

I make the further point that electricity gets very much mixed up as it wheels around grids, and finding its source may be a very difficult thing. I am sorry if I have given the impression to the Senator from Idaho that I misunderstood his amendment. I feel that I understood it very well. I am confirmed in this matter by the Senator from Montana, the manager of the bill.

The PRESIDING OFFICER. The time allocated to the Senator from Montana has expired.

Mr. McCLURE. Mr. President, the Senator from Montana is a very careful student of this legislation. If he read the amendment, I am sure he did not give the advice to the Senator from New York. If he did give that advice to the Senator from New York, he is also guilty of not having read the amendment. Read the last section on page 5. It says, "biomass, geothermal, wind, falling water, and solar radiation." It clearly does not apply to hydro. I am sorry if my friends have not taken the trouble to read the amendment.

Mr. BAUCUS. Mr. President, I must ask unanimous consent for an additional 1 minute evenly divided.

The PRESIDING OFFICER. Is there objection?

Without objection, each side will be allocated 30 seconds.

Mr. BAUCUS. I do not mean to get at picky points here. I think that is unbecoming of the Senate, frankly, but it is certainly clear that the effect of this amendment is to ban the importation of power essentially. I will read the first part. "Except for imports of electricity." It does not say whether it is hydroelectric or whatever.

The PRESIDING OFFICER. The additional 30 seconds has expired.

Mr. McCLURE. Mr. President, we do not have time to read the entire amendment. I wish people had read it before this point. Again, in addition to the provision I mentioned earlier, page 3 of the bill on line 4 says, "The electricity to be imported is exclusively from an identified utility unit that converts nuclear fuel or renewable energy resources to electricity," and so on. There is no question that applied only to fossil fuel plants and not to hydro.

The PRESIDING OFFICER. All time as expired.

The question is on agreeing to the amendment of the Senator from Idaho.

Mr. CHAFEE. Mr. President, I move to table the amendment and ask for the yeas and nays.

The PRESIDING OFFICER. Is there is sufficient second?

There is a sufficient second. The yeas and nays are ordered.

The clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that Senator from Hawaii [Mr. MATSUNAGA] is necessarily absent.

Mr. SIMPSON. I announce that the Senator from Indiana [Mr. COATS] and the Senator from Indiana [Mr. LUGAR] are necessarily absent.

The PRESIDING OFFICER (Mr. KERRY). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 57, nays 40, as follows:

[Rollcall Vote No. 50 Leg.]

YEAS—57

Adams	Fowler	Mack
Baucus	Gore	Metzenbaum
Bentsen	Graham	Mikulski
Bingaman	Gramm	Mitchell
Boren	Grassley	Moynihan
Bradley	Harkin	Nickles

NOT VOTING—3

Coats	Lugar	Matsunaga

So the motion to lay on the table the amendment (No. 1431), as modified, was agreed to.

Mr. CHAFEE. Mr. President, I move to reconsider the vote by which the motion was agreed to, and I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1432 TO AMENDMENT NO. 1293

The PRESIDING OFFICER. The Senate will resume consideration of amendment 1432 offered by the Senator from Alaska [Mr. MURKOWSKI]. There will be 15 minutes for debate equally divided and controlled in the usual form.

Who yields time?

If no one yields time, time will be divided equally.

Time will be equally divided.

The Senator from Alaska is recognized.

Mr. MURKOWSKI. Mr. President, the purpose of my amendment, which was proposed yesterday, is to provide utilities with the maximum degree of flexibility to achieve clean air standards. The bill promotes the use of clean coal technology with incentives, but it unnecessarily restricts the technologies that qualify. Mr. President, this bill simply prescribes scrubbers.

My amendment removes the unnecessary restrictions. It does not reduce or change the strict emission reduction requirements that a technology must achieve to qualify. It does not favor one technology over another. It does not favor one type of coal over another.

My amendment simply gives all clean coal technologies an equal opportunity to compete in the marketplace. The result of this competition will be cleaner air at a lower cost.

Mr. President, I would add for the RECORD the cosponsors of this bill, Senator NICKLES, Senator WALLOP, Senator CONRAD, and Senator SIMPSON. Those organizations indicating support are the Clean Coal Technology Coalition and the Electric Power Research Institute.

Mr. President, I reserve the remainder of my time as needed.

Mr. BOSCHWITZ. May I ask, may I be made a cosponsor of the Senator's amendment?

Mr. MURKOWSKI. I am very pleased to add the Senator from Minnesota.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Without objection the Senator from Minnesota is added as a cosponsor.

Who yields time? The Senator from Montana.

Mr. BAUCUS. Mr. President, I yield 2 minutes to the Senator from Rhode Island.

The PRESIDING OFFICER. The Senator from Rhode Island is recognized for 2 minutes.

Mr. CHAFEE. Mr. President, what this does is it extends to low-sulfur coal the benefits that were negotiated by Senators BYRD, BOND, and others, for the use of technology in phase I of the acid control program. In other words, it is extending to low-sulfur coal what was in high-sulfur coal, and that is for them to debate. But the second part of the amendment would allow precombustion technology, combined with the use of low-sulfur coal, to qualify for repowering benefits in phase II of the Acid Control Program.

That is a lot of words. What does it all mean?

It means that this will be a deferral in meeting the reduction requirements. They are meant to currently meet those requirements by the year

2000. This pushes them off to the year 2004. And the term "repowering" is confusing here. Currently, repowering, under the law as we know it, is defined to require innovative, not commercially available technology that gets substantial environmental benefits and requires major investment by the utility. That definition is weakened in this amendment.

So, Mr. President, those various reasons, the deferral that takes place unnecessarily from the law as we have it in the existing measure, and the fact that it extends these benefits to low-sulfur coal that were negotiated for high-sulfur coal, of course make it a deal breaker in the agreement that was originally made with a whole series of Senators.

So, Mr. President, for those reasons we are in opposition to it.

The PRESIDING OFFICER. Who yields time?

Mr. MURKOWSKI. Mr. President, if I may yield myself 1 minute to respond to the Senator from Rhode Island.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. MURKOWSKI. I point out, Mr. President, that the phase II technologies must still meet the criteria in the bill and satisfy the Administrator of EPA. EPA has the discretion to accept or reject a clean coal technology. That is their job. We are just saying that we should not limit the number of people who can come in and make their pitch to EPA. It is just as simple as that.

I reserve the remainder of my time, Mr. President.

The PRESIDING OFFICER. Who yields time?

If no one yields time, time will be equally divided.

The Senator from Minnesota.

Mr. BOSCHWITZ. May I ask the Senator from Alaska a question? Would not his amendment lower CO_2, carbon dioxide emissions, because this bill, while lowering SO_2 emissions increases emission of CO_2 which is, of course, the principal greenhouse gas? That is one of the reasons I am supportive of the Senator's amendment.

Mr. MURKOWSKI. I think that my colleague from Minnesota is correct. It would give utilities greater flexibility to use other fuels and other technologies, which should lead to substantially greater reductions in emissions.

Mr. BOSCHWITZ. I might point out one of my problems with this bill, I say to the Senator from Alaska——

The PRESIDING OFFICER. Does the Senator from Alaska yield any time?

Mr. MURKOWSKI. I yield 30 seconds to my colleague.

Mr. BOSCHWITZ. Is the fact that by effectively mandating scrubbers in this bill, you are lowering the energy output in those energy-producing plants and, thereby, in order to have the same energy outputs in effect, causing new energy plants to be built, thereby increasing CO_2 output.

I think the Environmental Defense Fund estimates 240 million tons of additional CO_2 will be emitted. The EPA uses a figure of 70 million tons, which is one of the disappointments of this bill.

The PRESIDING OFFICER. Who yields time? The Senator from Alaska.

Mr. MURKOWSKI. Mr. President, I would like to address the perception that this amendment is a deal breaker. But Mr. President, we have heard that before in this debate.

The Lautenberg amendment was supposed to be a deal breaker, but it was adopted and the bill is still here. The Daschle amendment was a deal breaker, but it was adopted and the bill is still here.

There is no reason for this amendment to be a deal breaker. It does not change the allocation of allowances. It simply allows a larger class of technologies to compete for those allowances. If promoting competition is contrary to the deal, then, there is something wrong with the deal. We want to promote competition, not limit it.

Mr. President, I disagree with the assertion that this amendment is a violation of the agreement. Precombustion technology was discussed at the staff level. That was acknowledged by the majority leader yesterday. However, it appears that it was not agreed to at the Member level, as the distinguished majority leader and I discussed yesterday. Precombustion technology clearly was not part of the agreement on a Member level.

Mr. President, I reserve the remainder of my time. I ask the Chair how much time is remaining?

The PRESIDING OFFICER. The Senator from Alaska has 56 seconds. The Senator from Montana has 4 minutes and 40 seconds. Who yields time?

Mr. GLENN. Will the Senator from Montana yield?

Mr. BAUCUS. Mr. President, I yield 1 minute to the Senator from Ohio.

The PRESIDING OFFICER. The Senator from Ohio is recognized.

Mr. GLENN. Mr. President, I rise to make, obviously, very brief remarks. I cannot see how this can be interpreted any other way except an effort to try and push in the fuel switching.

That was not the intent, as I understood it. This expands the definition of repowering to allow fuel switching to be credited toward 90 percent of the emissions reduction requirement. From the debate we had here on the Byrd amendment, and so on, we know the impact this has on high-sulfur coal and our efforts to try and hold down the unemployment in those areas. How can this be interpreted in any way except this is supposed to push us into fuel switching as a means of meeting the emissions requirement?

The PRESIDING OFFICER. Who yields time?

Mr. GLENN. Mr. President, I just make one final——

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. GLENN. I urge all the midwest Senators and those from coal-producing States to oppose this amendment.

The PRESIDING OFFICER. Who yields time? The Senator from Montana.

Mr. BAUCUS. Mr. President, I yield myself 1 minute.

Mr. President, I come from a Western State. Western States would like this amendment because it does encourage fuel switching. We, in the West, want fuel switching, and we want as much fuel switching as we can get. Nevertheless, as a manager of this bill and as a manager of the bipartisan negotiations, I must say that this does break the deal. This is a deal-breaker. This is a deal-breaker for the reasons indicated by the Senator from Ohio. The negotiations attempted to strike a balance among all regions of the country, so that it is fair to all regions of the country.

We discussed the definitions of clean coal technology, we discussed 2-to-1 credits, we discussed precombustion and we agreed precombustion would not fit into the definition of clean coal technologies. A balance was struck.

I would like to support the amendment, but I feel duty bound as the manager of the bill to report to the Senate this does break the deal. The Senator from Rhode Island and I have opposed amendments that are deal-breakers and upset the balance. I feel I must, therefore, oppose the amendment. Senators should know that this amendment does upset that balance. This amendment is a deal-breaker.

The PRESIDING OFFICER. Who yields time?

Mr. BAUCUS. I reserve the remainder of my time.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. MURKOWSKI. The Senator from Alaska has 56 seconds?

The PRESIDING OFFICER. That is correct.

Mr. MURKOWSKI. Mr. President, I would respond to my colleague and the floor leader that, precombustion technology was not part of the deal. It was discussed on a staff level at great length, but the staff does not have the responsibility here; it is the Members.

Mr. President, this bill mandates the installation of scrubbers. That will create problems because it takes a powerplant 12 months to install scrubbers. We are going to have a problem finding the power when we shut a plant down for 12 months to put in scrubbers.

The opportunity to shift to low-sulfur coal to achieve attainment of

lower emission levels without a shutdown is available to us in this amendment.

Mr. President, we have heard a lot of debate about the cost of this bill. We are all concerned about cost. Every Senator's objective is that we get the cleanest air for the lowest cost.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. MURKOWSKI. I request support of this amendment. I think it is in the interest of not only clean air, but the consumer.

Mr. HEINZ addressed the Chair.

Mr. BAUCUS. Mr. President, I yield 1 minute to the Senator from Pennsylvania.

The PRESIDING OFFICER. The Senator from Pennsylvania is recognized for 1 minute.

Mr. HEINZ. Mr. President, I want to express my deep concern and reservations about this amendment. Whether it is considered to break the deal that has been talked about here, it will certainly break the back of what is going to be left of the Appalachian and midwestern coal industry.

As the Senator from Alaska points out, there is a clear purpose to this amendment. That is to benefit low-sulfur coal. Clearly, that benefit will only be achieved at the expense of high-sulfur coal. We have tried to avoid pitting region against region, worker against worker. But none of us is oblivious to the fact the bill before us already imposes heavy burdens on the high-sulfur coal miners of my region of the country. As a result, we debated the Byrd amendment on this Senate floor for many days. Unfortunately, we lost the Byrd amendment. I ask unanimous consent to continue for 1 additional minute.

The PRESIDING OFFICER. The Senator does not have 1 additional minute. He has 32 seconds.

Mr. BAUCUS. Mr. President, how much time remains?

The PRESIDING OFFICER. Thirty seconds remains.

Mr. BAUCUS. How much time does the proponent have?

The PRESIDING OFFICER. No time remaining for proponent.

Mr. BAUCUS. Mr. President, in fairness, I ask unanimous consent, if the Senator wants to speak an additional minute, if the Senator from Alaska so desires he also be granted an additional minute.

The PRESIDING OFFICER. Is there objection?

Mr. MURKOWSKI. I agree to that.

Mr. BAUCUS. May I amend that? I notice the Senator from Missouri would also like to speak on the amendment. I ask unanimous consent that there be 4 minutes equally divided.

The PRESIDING OFFICER. Is there objection? Hearing none, it is so ordered. Who yields time?

Mr. HEINZ. Mr. President, I ask for 1 of those minutes.

Mr. BAUCUS. I yield 1 minute to the Senator from Pennsylvania.

The PRESIDING OFFICER. The Senator from Pennsylvania is recognized.

Mr. HEINZ. Mr. President—and I will not take all my minute—we in our region are already going to experience economic difficulties as a result of this bill as it stands.

Were the Murkowski amendment to prevail, it would add to those economic woes, unemployment, and difficulties, and many of us I fear would be compelled to oppose the entire bill. This is something we would rather not do, but it will be a result if the Murkowski amendment happens to prevail. I urge its defeat.

The PRESIDING OFFICER. Who yields time?

Mr. BAUCUS. Mr. President, I yield 1 minute to the Senator from Missouri.

The PRESIDING OFFICER. The Senator from Missouri is recognized for 1 minute.

Mr. BOND. Mr. President, I appreciate the manager allowing me this minute to say very briefly—and it must be brief in this time—that we have negotiated long and hard to come up with an equitable way to share the burden among those States which have a heavier share of the burden in cleaning up acid rain. Because of the way this measure has been constructed, the only way that utilities targeted for cleanup can recoup some of the additional costs which they must pay to achieve the overall goals of reducing sulfur dioxide emissions more in their plants than they contribute in percentage to the total emissions of sulfur dioxide is to be able to trade allowances. This amendment of the distinguished Senator from Alaska provides more incentives even for low-sulfur coal. It is a significant disadvantage to those States which have already given at the office.

I will address the problem of emissions credits and trading later. I urge the defeat of this amendment. I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. MURKOWSKI. Mr. President, how much time is remaining?

The PRESIDING OFFICER. The Senator from Alaska has 10 seconds.

Mr. MURKOWSKI. I believe there was a unanimous-consent agreement for additional time, Mr. President.

The PRESIDING OFFICER. The Chair corrects itself. The Senator from Alaska has 2 minutes remaining.

Mr. MURKOWSKI. I am sorry; I did not hear the Chair.

The PRESIDING OFFICER. The Senator from Alaska has 2 minutes remaining.

Mr. MURKOWSKI. Mr. President, the bill managers have stated that the purpose of the phase I technology section is to encourage the use of high-sulfur coal. But what happens to our goal of using the marketplace to attain greater emissions reductions if utilities must use high-sulfur coal to get the benefits of a time extension and 2-for-1 allowances? We are limiting utilities to a narrow range of options which may well be more expensive than other options. We are going to be responsible to the consumer for that.

We are limiting the ability of the marketplace to work, which is contrary to our open American society. The consumer ratepayer is going to be stuck with paying the price tag. It is going to be high. We should not give the consumers of this country higher electric bills simply because this bill favors certain technologies or certain types of coal.

I conclude my remarks, Mr. President, with this observation. We have heard a lot of debate about the cost of this bill. Every Senator's objective is to get cleaner air at the lowest possible cost. My amendment is consistent with that objective. My amendment removes limitations on our ability to find the most cost-effective way to achieve clean air. It does not reduce or change the emission reduction requirements of the bill. It does not favor one technology over another. It does not favor one type of coal over another. It does not foreclose the use of high-sulfur coal.

My amendment simply gives all clean coal technologies an equal opportunity to compete in the marketplace. The result of this competition will be cleaner air at lower cost. I yield back the remainder of my time.

CLEAN AIR LEGISLATION TO BENEFIT MONTANA

Mr. BAUCUS. Mr. President, for the past 2 months the Senate has been considering clean air legislation. As the floor manager of the bill, I have been working hard to ensure that legislation is fair to Montana.

Here are some of the highlights of the clean air legislation that will benefit Montana.

ACID RAIN

The acid rain provisions will achieve a 10-million-ton reduction in sulfur dioxide [SO_2] emissions by the year 2000. These provisions are the most prowestern provisions since Congress began considering acid rain legislation over a decade ago. The provisions will require SO_2 reductions in two phases using a freedom of choice approach, without mandated scrubbing or cost sharing.

NO MANDATED COST SHARING

Montana ratepayers will not pay for sulfur dioxide reductions at polluting Midwestern utility plants. Montana ratepayers have already had to foot

more than a $500 million bill for pollution control technology.

NO MANDATED SCRUBBING FOR DIRTY PLANTS

The percent reduction provision from the 1977 Clean Air Act is repealed. This provision set an emissions rate for new western plants which forced these plants to scrub low-sulfur coal.

BONUS CREDITS FOR CLEAN PLANTS

An additional 20 percent extra set of pollution allowances which can be sold, applied to dirty plants, or saved for future plant construction. These allowances are included in the bill to recognize past efforts by clean utilities that have already reduced SO_2 emissions. It provides a cushion that allows growth in States with clean plants without violating SO_2 emissions requirements.

NO NO_x REDUCTIONS UNTIL THE YEAR 2000

Utilities in Montana will be required to meet a NO_x emissions rate in the year 2000 using low-NO_x burners and total emissions averaging. This provides a cost-effective way to reduce NO_x emissions. But, if after using a low-NO_x burner they still can't achieve the emissions rate, the utility can use an alternative rate.

PROMOTES THE USE OF LOW-SULFUR COAL

Montana's low-sulfur coal producers will play a major role in reducing SO_2 emissions. Utilities with high SO_2 emissions can select the cheapest and most effective way to reduce their emissions. The can use low-sulfur coal, install clean coal technology, scrub, or find other methods. Because of this flexibility, perhaps 15 million tons of Montana's low-sulfur coal will be used by utilities as a way to reduce SO_2 emissions.

NONATTAINMENT—CARBON MONOXIDE, PARTICULATES

The nonattainment provisions reflect a real bargain. It gives communities that have failed to meet their nonattainment deadlines new realistic deadlines. The emphasis in the bill, however, is not on the final deadline. The emphasis is on achieving steady progress before the deadline by requiring specific incremental progress over defined periods for ozone, carbon monoxide, and particulate matter.

In Montana, every city meets the standards for ozone, so nothing is required. However, eight cities are in nonattainment for PM-10—particulate matter smaller than 10 microns in size. These cities include Libby, Kalispell, Polson, Ronan, Missoula, Butte, and Lame Deer. Most of the exceedances are due to residential wood burning, reentrained road dust, and industrial sources. Montana's cities in nonattainment will have 5 years to reach PM-10 attainment.

Three cities are also in nonattainment for carbon monoxide: Missoula, Billings, and Great Falls. Auto exhaust, residential wood burning, and industrial sources are the cause of carbon monoxide problems. Montana's cities in carbon monoxide nonattainment will have 5 years to reach attainment.

PROMOTES THE USE OF ETHANOL TO REDUCE CARBON MONOXIDE

Ethanol and other oxygenated fuels are required in cities with the worst smog problems. Increasing the use of ethanol will clean up the air and increase the demand and prices for corn and other farm commodities used in making methanol.

REQUIRES REDUCTIONS IN PARTICULATES LIKE WOOD SMOKE

Wood smoke particulates are a major concern in many cities in Montana. This bill helps to reduce these particulates by requiring EPA to publish control techniques guidelines [CTG's] that explain how to reduce these emissions. The bill specifically requires a CTG for the curtailment of residential wood burning.

NO METHANOL MANDATES

For the first time, alternative fuels like ethanol, methanol, compressed natural gas, reformulated gas, and electricity will play their part in reducing vehicle emissions. But it does not mandate methanol, which would require a new distribution network and create serious economic problems for service stations in Montana and across the Nation.

AIR TOXICS

Every year billions of pounds of toxic pollutants are emitted into the air. Many of these chemicals cause cancer and other serious illnesses. In Montana alone, major industry sources emitted over 5 million pounds of air toxics in 1987. These sources emitted chemicals like lead, arsenic, cadimum, toluene, ammonia, benzene, and others. The bill would control emissions from these major sources.

REQUIRES MAXIMUM ACHIEVABLE CONTROL TECHNOLOGY

Major sources in Montana that emit more than 10 tons of any one of the 191 pollutants listed in the bill, or 25 tons of any combination, will be required to control these emissions by applying maximum achievable control technology [MACT]. Once in place MACT will reduce emissions by 90 percent or more.

The PRESIDING OFFICER. All time has expired. The question is on agreeing to the amendment.

Mr. CHAFEE. Mr. President, I move to table the amendment by the Senator from Alaska and ask for the yeas and nays.

The PRESIDING OFFICER. The yeas and nays are requested. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Hawaii [Mr. MATSUNAGA] is necessarily absent.

Mr. SIMPSON. I announce that the Senator from Indiana [Mr. COATS], the Senator from Indiana [Mr. LUGAR], and the Senator from California [Mr. WILSON] are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 65, nays 31, as follows:

[Rollcall Vote No. 51 Leg.]

YEAS—65

Adams	Fowler	McConnell
Baucus	Glenn	Metzenbaum
Bentsen	Gore	Mikulski

NOT VOTING—4

Coats	Matsunaga
Lugar	Wilson

So the motion to lay on the table the amendment (No. 1432) was agreed to.

Mr. CHAFEE. Mr. President, I move to reconsider the vote.

Mr. BAUCUS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BOSCHWITZ. Mr. President, I rise today to express my concerns about the clean air compromise, specifically those provisions regarding acid rain, because those provisions will have negative environmental impacts on our efforts to combat global warming. I have been involved in the issue of global warming for several years now. In 1988 I addressed the United Nations General Assembly about it and this year, I am joining Senator GORE and five other Senators to host an interparliamentary conference on global warming here in Washington. While I understand that we may not be able to comprehensively address

the threat of global warming in this clean air bill, I am concerned that the compromise may actually intensify the problem.

For instance, by advancing the date on the phase I acid rain reductions by 1 year, the compromise may well create 3½ million extra tons of SO_2 reductions. These reductions will be used under the Byrd-Bond plan to give allowances on a 2-to-1 basis to any utility that installs scrubbers and reduces emissions beyond 1.2 pounds per million Btu's. Thus, scrubbers are virtually mandated because you would not otherwise get the 2-for-1 bonus allowances.

But while scrubbers reduce sulfur dioxide emissions, they also reduce the generating efficiency of coal-generating power plants by about 5 percent. So for every 20 scrubbers installed, a new plant must be built, in effect, as SO_2 goes down, CO_2 goes up by 5 percent on this basis alone—and powerplants are the largest single contributor of CO_2, which is, of course, the principal greenhouse gas, additionally, scrubbers increase CO_2 emissions beyond the 5 percent due to the loss of energy efficiency, because the calcium carbonate, or limestone, in the scrubber reacts with the sulfur in the scrubbed emissions to release even more carbon dioxide.

Under the President's proposal and I believe under the Senate committee bill, carbon dioxide emissions would have been reduced along with sulfur dioxide emissions because utilities would have had the freedom to choose among a variety of SO_2 emissions reduction methods, similar to the amendment just offered by Senator MURKOWSKI. According to the environmental defense fund, these reductions would have amounted to 240 million tons of CO_2, annually—that is more than one-third of all utility emissions of carbon dioxide—and utilities, of course, are the principal emitters of carbon dioxide. Even the EPA, whose models do not take into account cofiring or the use of natural gas—both very clean methods of producing power—estimates that under the President's bill CO_2 emissions would have been reduced by 70 million tons annually.

Great strides are being made in the development of environmentally sound methods of energy production. For example, gas cofiring significantly reduces sulfur dioxide and carbon dioxide emissions in direct relation to the amount of gas substituted for coal. Coal cleaning removes about 30 percent of the sulfur when it is cleaned before the coal is burned. And an even newer technology, fluidized bed combustion, reduces sulfur dioxide emissions 90 percent, just like scrubbers, without the accompanying loss in efficiency. If the market were allowed to guide sulfur dioxide reductions, these other technologies would be used by more utilities, and even more efficient emissions reduction technologies would be developed.

Instead, we have the same old story that has been occurring here for the past 15 years. In the 1977 Clean Air Act amendments, all new coal-burning utilities were required to meet new source performance standards, the so-called NSPS requirements. Under this legislation, all new sources were required to remove 90 percent of their sulfur emissions, regardless of the type of coal they burned or the amount of sulfur they emitted. This basically mandated that all new sources install scrubbers because there was no technology other than scrubbers to achieve the required percentage reduction.

While this policy saved the high sulfur coal industry in 1977, it led to unnecessarily expensive investments and greatly increased carbon dioxide emissions. Utilities in clean States outside of the East, like my State of Minnesota and Wyoming, had to install scrubbers, even though they burned low sulfur coal and had much lower sulfur dioxide emissions rates than those utilities in the Midwest that used high sulfur coal. At a cost of $100 to $300 million to install the scrubber, this was no small investment.

In addition to all the problems mentioned above, scrubbers have another major environmental drawback related to their byproduct. The byproducts of the wet scrubbers that would be favored under this compromise pose a huge solid waste problem. Each year, a 1,000-megawatt scrubbed plant produces 1 square mile of waste 1 foot deep. Over a 30-year life of such a plant, this equals 1 square mile of byproducts 30 feet deep. That is the equivalent of a lake of about 640 acres. And that is for just one plant.

The compromise agreement on this bill, while it would save one-third to one-half of the coal-mining jobs in the high-sulfur coal industry that would have been lost under the President's proposal—because the President's proposal did not give bonus allowances defined in such a way as to virtually mandate scrubbers—is simply not a sound environmental policy.

Do we have to dirty our air in order to clean it? I do not think so. But that is what we are doing in this bill. That is why I am so surprised that the acid rain title of this bill, crafted by many here in the Senate deemed to be environmentalists, has this environmentally negative consequence.

I understand that politics is politics and that politics is the art of compromise and the possible and that compromise is very often necessary. I do not understand, however, how those who advocate environmental protection can support policies that contribute to other environmental problems. but, then, a lot about this whole clean air debate has been ironic.

I am disappointed that in forging a compromise to clean up our Nation's air my colleagues were unable to fashion a sounder, more farsighted approach, and I hope they will be able to respond to some of the concerns that I have raised here today.

Mr. President, I yield the floor.

MORNING BUSINESS

Mr. LIEBERMAN. Mr. President, I ask unanimous consent that there be a period for morning business and that the junior Senator from Connecticut be permitted to speak for up to 7 minutes.

The PRESIDING OFFICER (Mr. WIRTH). Is there objection? The Chair hears none. It is so ordered.

Mr. LIEBERMAN. Mr. President, I ask unanimous consent that Senator BOSCHWITZ be permitted to speak for up to 15 minutes and at the conclusion of Senator BOSCHWITZ' remarks the Senate stand in recess until 2:15 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from Connecticut is recognized for 7 minutes.

"VILNIUS, LITHUANIA" OR "VILNIUS, U.S.S.R."?

Mr. LIEBERMAN. Mr. President, there has been an interesting dispute going on among the editors of one of the largest newspapers in my home State of Connecticut about how to list the dateline of their stories from Lithuania. Some of the editors apparently said that the story should be datelined "Vilnius, Lithuania" because the country had declared its independence. Others said the stories should be datelined, "Vilnius, U.S.S.R." because Lithuania was not yet a free land.

Mr. President, the debate which I am afraid paralleled a similar debate raging here in Washington has now been rendered meaningless because all foreign journalists have been thrown out of Lithuania, taken to Moscow, so that now all datelines on stories about Lithuania presumably will read "Moscow." I hope that is not the course that events follow in Lithuania itself.

Mr. President, the news today brings yet another indication of aggressive action by the Soviet Government against the Lithuanian people. The Soviets have closed the border between Poland and Lithuania. This is just the latest in a series of aggressive acts by the Soviet Government against the Lithuanian people which began with the occupation of the local Communist Party headquarters, that is that headquarters that is loyal to the independent Lithuanian Government.

The Soviets, as you know, broke into a hospital and arrested a number of Lithuanian soldiers. They then occupied the printing press on which independent newspapers have been printed, and ejected the national prosecutor, who is loyal to the independent Lithuanian Government.

Mr. President, as these acts have gone on, one after another, I am afraid that the American Government has been painfully silent or at best, ambivalent. I understand that the logic of the administration's policy with regard to Lithuania is that we have a lot at stake in Mr. Gorbachev's survival at a difficult time, and that we want to achieve difficult arms agreements with them, and if we only wait and follow with this respectful policy toward the Soviet Union, eventually the Baltic States will be free. But, instead, I think what we have seen has given us no cause for encouragement that that policy is working.

In fact, in the midst of our silence, our mumbling and neutrality, the Soviets continued to tie a rope around the neck of the Lithuanian people, and they pulled it tighter and tighter with each passing day. Just yesterday, President Landsbergis of Lithuania courageously attempted to moderate his position and said that, yes, the Lithuanian people declared independence, but they understood it would not come immediately. He sent a delegation to Moscow.

The ball is clearly in the Soviets' court, but it is not clear that our new friend and presumed partner, Mr. Gorbachev, is responding to those acts of moderation by the Lithuanian people. That is why I fear that the policy that the American administration is following is having no good effect. As I watch it, I remember that old admonition that the hottest places in hell are preserved for those who in time of moral crisis maintain their neutrality.

This administration has continued to maintain its neutrality, speaking as if we had two friends involved in this dispute, and as if there was a moral equivalency between the Soviet position and the Lithuanian position. There is no moral equivalency. The Lithuanian people are right, and Mr. Gorbachev's Soviet Government is wrong.

The Lithuanian people are a distinct people. They have a separate history, a separate culture, and a separate language. They have a separate religion. They have all indications of nationhood.

We, as you know, have refused to recognize the annexation, the aggressive acquisition of Lithuania and domination of that country by Stalin for now more than 50 years as part of the treaty, the pact that Stalin entered with Hitler during the Second World War.

For us to have spent all these years appealing to the Soviets to free the Baltic peoples and urging the Baltic peoples to demonstrate the courage to seek their independence, and now at this moment when they have had the courage to do just that, that we stand on the sidelines is to me a crime, and one that all of us should renounce.

Mr. President, a couple of weeks ago I was in a minority in this Chamber voting for a resolution that would have extended recognition to the independent Lithuanian states and asked for an exchange of Ambassadors.

The more time that passes, the more that I watch the effect of the neutral position of our Government, the more I see the Soviets acting to extinguish one after another element of Lithuanian independence, the more I feel the original vote was correct and we should send an Ambassador, or attempt to send an Ambassador to Lithuania.

Later this week, Soviet Foreign Minister Shevardnadze is coming to Washington to meet with President Bush and Secretary of State Baker. Personally, I wish that meeting was not occurring. Personally, I wish that meeting between the American Government and Mr. Shevardnadze was postponed. The thought of diplomats meeting in our capital with our Government while their country is in the business of suppressing the yearnings of an independent people for freedom has too many horrible echoes and remembrances of earlier times in history during this century when that has occurred.

But if this meeting goes forward, I hope and pray that at least President Bush and Secretary of State Baker, before they get to the issues on the agenda, will put one issue at the top, and that is to make perfectly clear to Mr. Shevardnadze that the behavior of the Soviet Government in Lithuania is unacceptable, and, more than unacceptable, that if this continues, it will jeopardize all of the hopes that we have in this country and presumably people in the Soviet Government and people around the world have for greater arms control agreements and greater trade agreements.

Mr. President, like everyone else in this Chamber of both parties, I deeply support and hope for a greater arms control and greater and better econmic and diplomatic relations between ourselves and the Soviet Government. But they cannot go forward at any cost. History tells us that if we abandon our principles in pursuit of strategic gain, we and the world are ultimately the losers.

Mr. President, I thank you for this opportunity to speak these words, and I yield the floor.

ADDITIONAL COSPONSOR—SENATE CONCURRENT RESOLUTION 106

Mr. BOSCHWITZ. Mr. President, I ask unanimous consent that Senator WIRTH be added as a cosponsor to a resolution that was offered by myself and Senator MOYNIHAN last week dealing with Jerusalem.

The PRESIDING OFFICER (Mr. LIEBERMAN). Without objection, it is so ordered.

Mr. BOSCHWITZ. Senator WIRTH told me he was not here and able to communicate to us his desire to be a cosponsor of that resolution at that time.

Mr. President, I also ask unanimous consent the remarks that I will now make be printed in the RECORD at the conclusion of the debate but prior to the vote on the last amendment, vote number 51.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The remarks referred to appear at the appropriate place in the RECORD in accordance with the above order.)

RECESS UNTIL 2:15 P.M.

The PRESIDING OFFICER. Under the previous order, the Senate will now stand in recess until 2:15 p.m.

Thereupon, at 1:12 pm., the Senate recessed until 2:17 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer [Mr. SANFORD].

CLEAN AIR ACT AMENDMENTS OF 1989

The Senate continued with the consideration of the bill.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. GRASSLEY. I thank the Chair. I rise to commend Senator DOMENICI and also to give belated support to an amendment that he offered last week on the subject of rural fugitive dust. The amendment of the distinguished Senator mandates that the Environmental Protection Agency undertake a 3-year national study of rural areas that are not meeting the particulate ambient standards due to the suspension of natural soils in the air. The result of this study will be reported to the Congress to help us determine whether those rural areas should be required to meet the 5-percent annual emissions reductions that are included in the clean air bill.

I understand and appreciate the Senator's concerns about this issue, and I take this opportunity to share with my colleagues some past experiences I encountered with the Environmental Protection Agency on this issue during the 1970's.

At that time, I was a Member of the other body. I was representing my

State of Iowa for the third district. My entire State is composed of 34 million acres of farmland. We also have 78,000 miles of rural roads, none of which are hard surfaced, or at least none of those 78,000 miles are hard surfaced. We do have about 20 percent of our roads hard surfaced.

This whole issue for my State brought my concern as to what the EPA was doing when they rejected the Iowa State implementation plan to meet the ambient air quality standards. That was under the 1977 Clean Air Act amendments. That is the last Clean Air Act that this bill we are dealing with now works with.

Back in the 1970's, the plan that was created by Iowa State officials was designed to protect the health and welfare of Iowa citizens while considering the unique rural characteristics of our State. The State officials recognized agricultural States should not be penalized because of wind-blown dust from farm fields or from normal traffic going up and down the rural roads.

Nonetheless, the EPA felt that they were better judges of the public welfare of Iowans from their offices here in the Washington suburbs of Virginia and Maryland. So they decided to require us to clean up dirt on our farms. Maybe in a very technical way it was not a case of cleaning that up, but it was a case of if any dust came from that property, private property, or in the case of the roads, the county property, then that dust so raised would have to be kept within the property boundaries.

Anybody who knows anything about agriculture, anybody who knows anything about driving up and down rural roads, knows that is not the real world. And yet that is what the EPA was trying to do.

I know many of you may laugh at the absurdity of this requirement even though it was made 11 years ago. However, it was not a joke to most people who understand the situation, and it was not a joke at that time to the people of Iowa and other agricultural areas in the United States because these people were going to pay for it in the lack of productivity. Mostly, that means just doing nothing on the farms of the Midwest, if you can imagine that, just not farming at all, because whenever you are involved in that process you are going to raise some dust or, in the case of the counties, the citizenry of these areas would have to pay the taxes to do whatever could be done.

There are some things that can be done on rural roads to keep the dust down to some extent but not totally. But there is nothing I know of, if you are on a farm, except doing nothing, if you want to keep the dust down.

It was not a joke to the farmers who were already losing the battle to maintain farm-to-market roads and bridges in a safe condition, and it was not a joke to the industries interested in moving to and expanding in Iowa. The requirements proposed by the EPA, if implemented, at that time would have inhibited any further industrialization in Iowa due to offsets. The offsets meant that a new industrial facility emitting particulates would be allowed to build only if they were able to achieve reductions in their current level of particulate emissions. However, in a State such as my State of Iowa, which is lightly industrialized, the only means of reduction was to clean up farm and road dust as the offset.

Obviously, though, all of these requirements would have had a very negative impact on Iowa's attractiveness to industry. Why did the EPA insist on having us clean up the dirt on our farms? Well, not because the rural fugitive dust was damaging to the health of Iowans, but the reason that they gave was to protect Iowa's public welfare, whatever that meant.

When I pressed them in the late seventies on a definition, EPA stated that it was primarily referring to visibility, the ability to see better, wherever you were in our State.

Ironically, they were the ones, the bureaucrats involved, who could not see the issue very clearly. The main failure of the EPA during the debate was their unwillingness to recognize the uniqueness of America, to understand the uniqueness of farming, to understand that when you are tilling the soil you have no control over how fast the wind is blowing or whether or not there is enough mositure in the ground. But there are certain times of the year you have to be there working or you are not going to get your crops planted so that you can raise the food needed in America.

I shared with my House colleagues an article written by Mr. William Burger, who was at that time chairman of the Iowa Development Commission, a commission involved with bringing industry to the State of Iowa.

I would like to share a few excerpts from this article for the consideration of my colleagues. These excerpts from his statement underscore the EPA's failure to understand the unique rural characteristics of Iowa and other agricultural States. I quote:

> The Environmental Protection Agency's tenative rejection of two key provisions in Iowa's clean air plan is a classic example of bureaucratic shortsightedness. While clinging to misconceptions about Iowa's rural oriented economy and the requirements for mandatory pollution control equipment, EPA has lost hold of an indispensable tool * * * common sense. Common sense has a large hand in Iowa's fugitive dust problems for several reasons—

And also in the development of that policy.

> The most prominent being that Iowa's industry is already meeting the standards and cleaning up its share of pollutants. The heart of the issue needs to be addressed. Iowa is an agricultural State with 94 percent of its land devoted to agricultural use. Natural background pollutants account for roughly one third of Iowa's air quality while cities and industries add approximately another third. The rest is rural fugitive dust which the winds carry into urban areas. Dust in Iowa is a fact of life. It is uncontrollable—a lid can't be put on it, filters can't catch it, and pavement can't be poured over all of it.

Then he concludes by saying:

> Farmers, as resourceful as they are, can't grow corn from concrete.

I believe this uniqueness of rural America is the heart of the problem in the Clean Air Act addressed by the Domenici amendment. I commend him for attempting to resolve this problem by requiring the EPA to deal with this issue from a commonsense perspective.

I only hope that the present EPA administration will exercise more understanding than previous ones. That is what is so important about Senator DOMENICI's study. At least we are going to have somebody looking at it. There is a mandate from Congress to take all of these factors into consideration.

Just in case, 3 years from now, somebody at EPA comes up with the idea that there must be a control on fugitive dust that is emitted as a result of normal farming practices, I hope they also come up with a conclusion of how are we going to feed America, how are we going to feed the world, because I think that is very basic.

During the debate on Senator DOMENICI's amendment, Senator CHAFEE of Rhode Island said this:

> I applaud the study this amendment requires. It is important to make sure farmers are not going to be hampered at planting time or harvest time with burdensome dust regulations.

I compliment Senator CHAFEE for his statement on that amendment. I think I should like to amend that statement to say it is pretty important that farmers are not going to be hampered at planting time or harvest time with any regulations on fugitive dust, because if there is any assumption around here that you can have some sort of regulations on fugitive dust emitted from the normal farming operations, then the people in this body are not living in the real world. I invite them to the Midwest to see how things must be done if the farmers of America are going to continue to put food on the tables of the consumers of America, with the consumers of America spending the least percentage of disposable income, at about 16 percent, of any consumer anywhere in the world.

I yield the floor.

Mr. SYMMS. Mr. President, parliamentary inquiry. What is the parliamentary situation?

The PRESIDING OFFICER. Amendment No. 1307 is the pending business.

AMENDMENT NO. 1439 TO AMENDMENT NO. 1329

(Purpose: To allow communities to decide whether or not plants exceeding the emission limitations imposed by subsection 112(f) of the the Clean Air Act do, in fact, impose upon the community an "unacceptable" risk)

Mr. SYMMS. Mr. President, I ask unanimous consent that the pending amendment be set aside. I send an amendment to the desk that is part of the unanimous-consent agreement.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Idaho [Mr. SYMMS], proposes an amendment numbered 1439 to amendment No. 1293.

Mr. SYMMS. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in amendment No. —, insert the following:

Community Involvement in Closing Decisions

Section 112 of the Clean Air Act, as amended by this Act, is further amended by adding at the end thereof the following new section:

"SEC. . COMMUNITY INVOLVEMENT IN CLOSING DECISIONS.—No plant, facility, or source shall be required to cease operations, nor shall be put in jeopardy of ceasing operations because of action taken with respect to its permits, fees, or fines, as a result of exceeding the standards issued pursuant to subsection (f) of this section, unless and until such time as a question shall have been placed in referendum before the community exposed to the risks which exceed the standard, and at least 50 percent respond in the negative. Prior to the issuance of any standard prusuant to subsection (f), the Administrator shall, by rulemaking, determine the appropriate methodology for conducting such referenda. The question placed before the exposed population shall be worked as follows:

Question: Shall (name of plant, facility, or source) remain in operation notwithstanding the fact that the U.S. Environmental Protection Agency has projected the possibility that an individual born and standing on the fenceline of this (plant, facility, or source) for 70 years may be subjected to a lifetime cancer risk of greater than (1 in 10,000 or 1 in 1,000,000).

Even should less than 50% respond in the negative, no plant, facility or source may increase its emission of the substance or substances whose risk was the subject of referendum beyond the level emitted at the time the question was placed in referendum. Should a standard issued under subsection (f) be based on an exposure other than 70 years at the fenceline, the question posed may be modified to reflect the actual exposure assumption used:

Mr. SYMMS. Mr. President, just so I might know, is my understanding correct there is 1 hour of time equally divided?

The PRESIDING OFFICER. That is correct.

Mr. SYMMS. Mr. President, I yield myself 10 minutes.

Mr. President, the background of this amendment is that it has been before the Senate over the course of the last few weeks and it has been withdrawn from consideration. One of the most controversial provisions of the Senate clean air bill is the issue of at what point is the operation of a plant so dangerous that the Federal Government should go in and shut the plant down. That is in the air toxic provisions of the bill.

Mr. President, the President's bill contains no shutdown standard, but states that the EPA can regulate any risk it deems reasonable. Mr. President, I know the closed-door compromise has worked on this issue, and Senator DOMENICI and others have made a real contribution to the effort here. But in my opinion we still run the risk by definition that the plant can be shut down.

As I say, the President's bill contains no shutdown standard. It requires the plant to install the maximum achievable control technology. Almost by definition this MACT is everything a plant can do to curtail emissions short of shutting down. The President's bill also goes further to state that EPA has the authority to regulate any risk it deems as unreasonable that exist beyond MACT.

The committee bill specifically declared that 1 in 10,000 lifetime risk to the maximum theoretical exposed individual is an unreasonable risk level, and yet if a plant cannot meet that standard it must shut down.

This leaves the bill before us in place unless Congress amends it at a future date but allows some large industries to conduct multimillion-dollar population risk studies that identify the most exposed actual person instead of the theoretical.

Remember, when I talk about the most exposed person, Mr. President, these are 1-in-10,000 and 1-in-1-million risk standards that are standards that apply after a plant has installed, after, the maximum achievable control technology. Almost by definition therefore these are standards that are purposefully intended to call into question the contained operation of the plant because it imposes what the bill deems to be unacceptable risk to the local population.

Rather than have Congress or the EPA impose its views on what is acceptable risk, some professional toxicologists and public health experts are suggesting that the community exposed to the risk should decide for themselves whether it is acceptable or not acceptable. I call this shedding a bright light on the risk and then allowing the individuals to choose for themselves in fact whether the risk is acceptable or unacceptable. It allows for the local community to decide which they value the highest, the jobs supplied by the plant or the theoretical risk provided by shutting it down.

My bright light amendment would require a local referendum be conducted prior to the EPA shutting down any plant under the 1 in 10,000 or 1 in 1 million standards of S. 1630. This is just simply protection so that the local communities affected by the EPA, the affected population, will have to say so as to whether they close the plant. They may say just because this most affected person that stands stark naked for 70 years, breathes this air for 24 hours a day, never leaves the place, never takes a bath, and they should have some rat full of jillions of grams of some toxic material to get a cancer they could develop, they might get a chance of 1 cancer in 10,000 more than otherwise, the community can weigh what that risk is and vote on the issue.

The arguments for the amendment if viewed on an individual-by-individual basis, 1-in-10,000 risk in cancer, translates into a theoretical chance of 1 additonal cancer case every 700,000 years. When dealing with such small risk numbers it is entirely possible that some Americans may resent the EPA or the Congress telling them that they must lose their livelihood because they are exposed to risks greater than this.

Mr. President, perceptions of what is acceptable risk differ from person to person. Coal miners subject themselves to yearly risks of 1 in 799. A law enforcement officer's annual risk is closer to 1 in 4,500 in 45. At the same time a rock climber faces a risk of 1 in 3,125 every time he or she goes climbing. These individuals face these risks voluntarily because they feel the benefit or the enjoyment makes the risk acceptable.

It is possible that some Americans may doubt the validity of the rat study on which the plants emissions were deemed as hazardous, or maybe some Americans may question the procedure used by EPA to extrapolate the risk to humans from that rat study.

It is entirely possible that some Americans may challenge whether they were exposed to the same risks upon which EPA bases its shutdown decisions, and perhaps most importantly maybe there are Americans who know a little more about their communities than those of us on the banks of the Potomac here inside the beltway know. They look at the cost to their communities in lost jobs, in lower incomes, the worse diets, poorer quality health care, declining infrastructure, less safe roads and bridges as a result of closing plants.

I want to repeat what it costs, what happens to communities that close plants. They lose their jobs, or they get lower incomes, they get worse diets, poorer quality health care, they have a declining infrastructure, and more hazard on the roads and bridges. We add those things together. They may decide that 1 in 10,000 is an acceptable risk in order to keep all the other good things in the community.

Let me give you an example. The distinguished Presiding Officer comes from North Carolina, a State that is famous for furniture production. A small town in North Carolina very easily could have its main income source be a furniture manufacturer. Because the furniture manufacturer uses several highly volatile lacquers and finishes, they may need a skilled fire crew available in case of an emergency. Since the local community cannot afford the level of fire suppression equipment needed the company subsidizes the local fire station so that it is capable to meet their needs.

Mr. President, I know this happens all over America. Only recently in my State, the hospital in Cascade, ID, would have closed had it for not been for a grant given by Boise Cascade Corp. to the local hospital so that those people would not have to travel many, many miles through very mountainous roads in very inclement weather in certain times of the year to reach a hospital in McCall, or a hospital in Weiser, ID.

Mr. President, the same thing could be true in any place in the country. So the furniture manufacturers emit some chemicals on the list of title III of the bill. It is possible they could be subjected to shutdown standards in the bill. But of course, if they were ordered to be shut down by EPA, then the firehouse would shut down and people's risks of having a fire that would burn up their house and risk the lives of their families would be worse, and they could be as high as 1 in 1,200 instead of 1 in 10,000.

It makes no sense to shut the factory down to eliminate a hypothetical risk of 1 in 10,000 to the most exposed individual only to subject the entire population to a very real risk that could be 10 times greater. Fire is a real risk to families who live in wood frame houses.

I know that is hypothetical situation but I think every Senator could think about instances in their State where some community and affected population could be closed down and lose their positions.

So I am just saying that this amendment puts a little integrity into this process. It would accomplish what Americans are truly asking. It allows them to decide for themselves what would best improve their environment, their lives, and their long happiness.

That is why I would ask my colleagues to support the bright light amendment that I am offering which would place the decision of the affected population at the end result. I will just read to my colleagues the way this amendment is stated.

The actual amendment says the community involvement closing—I have read this before on the floor, but the question would be on the ballot.

Mr. President, how much time have I used?

The PRESIDING OFFICER. 10 minutes.

Mr. SYMMS. I yield myself 1 more minute.

Mr. President, the question would say on the ballot that the name of the plant, say the ABC Furniture Co. in such-and-such North Carolina, for example, shall remain in operation notwithstanding the fact that the U.S. Environmental Protection Agency has projected the possibility that an individual born and standing on the fence line of this plant for 7 years may be subjected to a lifetime cancer risk of greater than 1 in 10,000, or 1 in a million.

Following that, Mr. President, say they have a vote, and 75 percent of the people vote in the negative, not to close the plant, keep it open. If they voted to keep the plant open, then no plant facility or source may increase its emission of the substance or substances whose risk is subject to the referendum.

This is not a blanket invitation to have a referendum and get worse. This is simply a way for Americans, who are the affected population, by EPA's own statements and own process, would have a vote before their plant closes. Up until the time the plant closes, they would still have to pursue the technology chase for 1 in 1 million, still have to pursue and comply with the 1 in 10,000, use the maximum available technology, the best they can use.

I think it is a very reasonable amendment. I think it supports and adds to what was worked out in the majority leader's office, where there will be a study, and this would not impact that at all. It would say at the end of the line, maybe 10 years from now, before this starts happening, that when those plants start being ordered to be closed by EPA, that the local community, the affected population, shall have a vote on whether they want to take the risk on the air toxics part of the bill or close the plant.

I reserve the remainder of my time.

Mr. BAUCUS. Mr. President, I yield 5 minutes to the Senator from Rhode Island.

Mr. CHAFEE. Mr. President, we discussed this amendment in the past. I am not sure whether the Senator brought it up just for discussion or whether he brought it up and withdrew it. In any event, this is a very odd amendment, I might say. He talks about the community voting on whether the plant should be closed or not, or to quote the language, "nor shall it be put in jeopardy of ceasing operations."

I do not know what "in jeopardy of ceasing operations" means. Because of actions taken with regard to permits or fees as a result of exceeding the standards.

Then there is going to be this referendum before the community, and those who can vote are in this community.

What is the community? Who knows? Is it to be within 500 yards of the plant, or is it to be the town, or is it to be the city, or is it to be just some newly drawn lines?

Mr. SYMMS. If the Senator will yield, I can answer that. The way the law is crafted, the law states that the population of an area are affected; therefore, the plant must either close down, or you impose so many costs on it that they cannot go ahead and meet that standard. That is how it affects the air toxics part of the bill.

Mr. CHAFEE. I am trying to ascertain who votes. I will quote the language: "The Administrator shall by rulemaking determine the appropriate methodology for conducting such a referendum."

This puts the EPA Administrator in an extraordinary position. Somehow he has to determine who is eligible to vote. What about aliens? What about nonresidents? What about those who just rent in the area but do not own? What about those who have just shown you for a relatively brief time they might be staying with an in-law for a maximum of a month, and then this referendum is going to occur?

It seems to me that suddenly we have made an election official out of the Administrator of the EPA. As I say, it is not in any existing political unit. It is hard enough to conduct special elections in an existing political unit where you can go down the voting list, see who is eligible and who is not. This would set up a whole new standard, a new area, which is defined as the community, exposed to the risks.

Mr. President, on that very basis alone, I believe the amendment should be rejected.

But let us go on to the next point. What we are dealing with here, Mr. President, are health standards. Do we really want to get into a situation where, by a slim majority, by 51 percent of what this community is, they say, we do not care what the health standards are? You can put us in jeopardy, this plant is so important for us. What about the other 49 percent who vigorously opposed this? Are they there to be exposed to these toxic

emissions that are deemed unsafe? I do not think we want to put the American public, the public surrounding a plant, into this kind of position, whereby a vote of 51 to 49 percent, they can say, forget this other group over here. You do not count. You may just be children or you may just be pregnant women. But that is all right. We have decided that you are going to continue to be exposed to these toxic air emissions that EPA deems are unsafe for your health.

So, Mr. President, for these reasons, I hope that the amendment would be rejected.

Mr. SYMMS addressed the Chair.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. SYMMS. I yield myself 3 minutes.

Mr. President, first off, to the good Senator from Rhode Island, he says that we are going to make an election official out of the EPA Administrator. That is not correct at all. This bill makes the assumption that the EPA goes in and says who the exposed population is. That is the basis on which they order the plant closed. That is the basis on which they order new equipment. Maybe that is so costly that the plant closes as a result of it because of the affected population.

My amendment says that the EPA Administrator would then have to conduct rulemaking on that, and the tradition in America is that the local election officials handle elections. We do not in Washington, DC. We try to set every other standard, but we have allowed people the privilege of running their own elections in the different communities in America.

So what EPA would do, if they have this great wisdom to say this plant is affecting a population, these people that are affected would be the ones who would vote. Who gets to vote would be deemed by the community, I would assume, on who the eligible voters are in the community. Or the EPA could, as the amendment says, have rulemaking that sets standards that the local community would have to have these elections. We do not have to have every "t" crossed here.

No. 2, Senator CHAFEE makes the point—and I respect his concern about the health standards—that maybe we are taking a risk here if we allow the local community to vote on the health standard. But I suggest to my colleagues that that is exactly what the U.S. Senate is doing and what the U.S. House will be doing on voting. If this is in fact a health standards bill, we are setting these standards in this bill that say that if the risk is 1 in 10,000—meaning 1 more cancer in 700,000 years, and that is only a maximum-exposed person who stands out there stark naked, never takes a breath, breathes the air 24 hours a day for 70 years, hardly your typical person, and the Congress will vote on that.

But it is OK, I guess, to drink the water out of the Potomac River, to vote on that, but down on the banks of the river in North Carolina, maybe they do not think they are smart enough to vote in their own town, as to whether they should do it. That is my whole point.

We are doing that by passing this law, voting politically, to set so-called standards that somebody thinks are important because you shoot a rat full of poison, and he gets cancer, then they come back with the toxicology studies and say here is the risk for this most exposed individual, and not only is it 1 in 10,000, but if you achieve 1 in 10,000, you have to be constantly spending money, striving toward 1 in 1 million.

I yield myself 2 more minutes.

I say to my colleages that if the closing of the furniture plant, say, in North Carolina or some other plant in Idaho, causes the fire station and the hospital to close because that the company was paying for those kinds of facilities, then we know the people's risk is going to be much greater to die a death of fire than it would have been maybe with some air toxics emitted from the plant.

All I am saying is that I believe that those people and those locally affected communities are highly qualified to make that decision, more so than we are in this city.

I would say one other thing. While I was home on the last break, in dealing with the elemental phosphate industry in my State, some of the major American corporations in that business there all inform me there is no question that they will not invest any more money in those kinds of businesses in the United States. The threat of this bill is absolutely terrifying to them as to whether they will be able to maintain what it is they are doing now and be cost competitive.

So there is a high cost going with this bill. There is a very high cost, and the American people are being asked to bear that cost, the working men and women, and they are going to pay for it with lower wages; they are going to pay for it with no jobs. There are fire departments, hospitals, churches, schools, roads, highways, you name it; there will be many others that will be closed.

Mr. President, I ask unanimous consent that the distinguished senior Senator, Senator HELMS from North Carolina, be added as a sponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SYMMS. I reserve the remainder of my time.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Mr. President, I reserve myself such time as I may consume.

Mr. President, this amendment should be rejected. It is a very beguiling amendment. It is a very deceptive amendment. It is also inaccurately drawn.

This amendment on the surface has some appeal. Why should not the local community have a referendum on whether or not the plant in that community should continue in operation?

I will tell you why it should not, or why it certainly should not under this amendment. Under this amendment if any plant, any source, is subject to a permit under this act, is subject to a fee under this act, is subject to a standard under this act, it would be in a position to claim that it, the source, may be adversely affected, may suffer some adverse economic effects if that fee, if that permit, if that standard were to go into effect.

That essentially would place the permitting process, the fee process, and the standard process entirely in the hands of the source or the facility, and the public would have virtually no protection; certainly they would not under the EPA because that would allow that industry, that source, to be in virtual control of the regulatory process.

Any plant faced with a potential permit, potential fee, or potential standard would simply claim adverse economic effect and force the permit writer, force the agency setting the fee, force the agency setting the standard to choose between a very expensive referendum or writing a much less stringent requirement.

That, I submit, is not in the public interest. That is why it is a very beguiling amendment, and it is really an amendment disguised to give some sanity to the process, but in effect virtually eliminates any public health control, and certainly would eliminate, seriously dilute the efforts of the EPA, or more precisely, Mr. President, the efforts of the local permitting agency. In almost every case that would be the State or perhaps in some cases a local community.

Second, the amendment makes no sense because it really does not apply to this bill. I do not know what bill the drafter of the amendment has in mind.

The amendment contemplates the residual risk provisions to be, in this amendment anyway, maximum exposed individual for 70 years who may be subjected to a lifetime cancer risk of 1 in 10,000 or 1 in 1 million. That is the exact language of the amendment.

Mr. President, I do not know what bill the Senator is referring to. It is not this bill. The standard in this bill is not this theoretical maximum exposed individual. It is not the theoreti-

cal residual risk that the writer of this amendment contemplates in his amendment. The standard in the bill is actual man, and it is site-specific. It is not at all what the Senator from Idaho seems to think.

So, Mr. President, for all those reasons, not only does this amendment not allow any protection of public health, as I see it, at least very little, but in addition the amendment seems to be applying to another bill, not this bill.

I think the amendment should therefore not be adopted.

I reserve the remainder of our time.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. SYMMS. Mr. President, I just call to the attention of the distinguished floor manager from Montana that it says right here at page 2 of the amendment:

Prior to the issuance of any standard pursuant to subsection (f)—

It is not just any person or any bill; it is subsection (f) of this bill:

the Administrator shall, by rulemaking, determine—

And so on.

If you look up above it, earlier in the page:

No plant, facility, or source shall be required to cease operations, nor should be put in jeopardy of ceasing operations because of action taken with respect to its permits, fees, or fines, as a result of exceeding the standards issued pursuant to subsection (f) * * *.

It is not just anywhere in this bill. It is referenced down at the bottom on line 25:

Should a standard issued under subsection (f) * * *.

It is only subsection (f), the air toxics, that portion we are referring to.

Mr. BAUCUS. May I respond to the Senator's inquiry? As I read the amendment though, it seems——

Mr. SYMMS. I yield on our time.

Mr. BAUCUS. On line 12, page 2:

Shall * * *.

Et cetera—

for 70 years may be subjected to a lifetime cancer risk of greater than 1 in 10,000 or 1 in 1 million.

That is not the provision of this bill. The question that the Senator wishes to put is inaccurate.

Mr. SYMMS. It is. Subsection (f) is default; (a) through (g) are the first part of the bill, and (f) is the default part, and then——

Mr. BAUCUS. Since we are on my time, may I say to the Senator, the standard, the operable standard with respect to whether a plant is facing a shutdown is not the standard set forth in the Senator's amendment.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Mr. President, we are prepared to vote on this amendment and yield back the remainder of our time, if the Senator from Idaho is also willing to yield back the remainder of his time. We are prepared to vote on this amendment.

Mr. SYMMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. SYMMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SYMMS. Mr. President, just for clarification for my colleagues, subsection (f) of the bill, which this addressed—and I yield myself such time, and it will take a couple minutes to clarify this.

The Administrator is authorized to promulgate emissions standards under this subsection applicable to categories or subcategories of sources of any hazardous air pollutant which is a known, probable, or possible human carcinogen. For each such pollutant (or stream of pollutants containing carcinogens) the Administrator shall establish two simultaneous applicable standards including—

(A) a standard which eliminates all lifetime risk of carcinogenic effects greater than 1 in 10,000 to the individual in the population who is most exposed to emissions of a pollutant (or stream of pollutants) from a source in the category or subcategory; and.

(B) a standard which eliminates all lifetime risks of carcinogenic effects greater than 1 in 1 million to the individual in the population who is most exposed to emissions of a pollutant (or stream of pollutants) from a source in the category or subcategory.

No consideration of cost, cost effectiveness, economic energy, or other factors or technological feasibility shall be included in the determination of the appropriate level of any emissions standard under this subsection.

(2) Any standards promulgated under this subsection shall be effective upon the date of promulgation.

Now that is the end of that. That is the entire section (f) which my amendment speaks to. Then you go on to (g), and then you start on the part that Senator DOMENICI worked out, which I am hopeful will ultimately have an impact on this.

But my amendment is only a failsafe and it is on section (f), I say to my colleagues. It has no impact in any other part of the bill. But this is one thing that I think all Americans need to understand. When we talk about people voting on health standards, we are voting on this kind of a standard here in the U.S. Senate to impose on the working men and women of America at a great expense and a great risk of all other factors that may impact them.

For example, if people have to give up working in what might be a relatively safe furniture factory and go take a job being a logger, their risks would be much higher than the 1 in 10,000 working as a log skidder on a logging job somewhere. I just think that that is the point that needs to be made very clear. I hope my colleagues will support the amendment. It will not interfere in any way with the Domenici portion of the bill, which goes on section (g) standards to protect health and the environment and work practice standards and other requirements.

I guess, if the chairman is ready to vote on this amendment, unless he has further comments, I am prepared to go ahead and go to a vote.

The PRESIDING OFFICER (Mr. DIXON). The Senator from Montana.

Mr. BAUCUS. I think we are essentially prepared to yield back the remainder of our time.

There is one point I failed to mention and that is, for Senators who are interested, that this is a deal breaker. We did discuss the standards under which a plant may or may not have to shut down in the air toxics title of the bill. The provisions in this amendment go much beyond the provisions that we negotiated and discussed quite extensively during the bipartisan negotiations.

This amendment very definitely breaks that deal. There was a very delicate balance agreed to by the negotiators. This amendment upsets that balance. For that reason, in addition, this amendment should be defeated.

The PRESIDING OFFICER. Who yields time?

Mr. SYMMS. Mr. President, I yield myself 1 more minute.

The PRESIDING OFFICER. The Senator from Idaho has 6 minutes remaining.

Mr. SYMMS. Mr. President, this will only take me 1 minute to say. I say with all due respect to my colleagues who were in on this so-called good political deal, and I agree it may have been a great political deal, but to the working men and women that are affected, it is a lousy deal. It is a lousy deal if they end up not having a say-so in meeting this standard. This is right in the text of the legislation that we are about to pass. It says, eliminate all of this standard of 1 in 10,000 or 1 in 1 million; they have to be in this technology chase.

Mr. President, the chances of the Presiding Officer, who loves to get out on the golf course—and he gets to do very little of it with his hard work here in this Chamber—but his chances are 50 in 1 million to get struck by lightning. We are legislating 1 in 1 million that would.

What kind of situation are we in here, where we are saying that we have all the wisdom here in the Congress here inside the beltway; we know what we are going to do; we are not going to give those people a chance to

even vote on this outrageous risk of 1 in 1 million.

The EPA may walk in, the ecotopians will walk in some day and say this plant is closed. These folks may say, "Here, we are the affected population. We want to keep it open. We are not hurting anybody else." It has nothing to do with acid rain, nothing to do with any other factors of global warming or ozone depletion, strictly air toxics based on this standard of 1 in 10,000, 1 in 1 million.

I would love to see somebody running for office running against Senators that voted for this kind of a ridiculous standard and let them explain it to the people that are losing their jobs. Now, I agree with my colleagues, this will not happen in the near future. You could probably run for office maybe one more time for the next 6 years, maybe two more times before they start closing the plants.

But it is in the legislation, and the ecotopians will be much stronger if things continue to go the way they are. They will be out there, like policemen on every corner, checking all these little flumes coming out of the plants. They will start closing plants, and they will be closing them in your States then, and it is going to affect people that you represent.

I urge my colleagues to vote for this amendment.

I reserve the remainder of my time, but I will yield it back if we are ready to end the debate.

Mr. BAUCUS. Mr. President, I will make one very short comment.

This is a very interesting discussion here. This is a theoretical amendment dealing with a theoretical subject. The Senator from Idaho says that the standard is 1 in 1 million. That is theoretical. The bill does not have that provision in it. That is why the amendment is theoretical. The irony, Mr. President, is that we have a very strong letter from the steelworkers who apparently would like to have the theoretical standard that the Senator from Idaho mentioned, but the provision in the bill frankly has a shutdown standard that is quite a bit lower than that; which is to say, the steelworkers in this country, the workers that the Senator from Idaho is concerned about, actually want standards that are as tough as standards that the Senator from Idaho is worried about, which are not in this bill. There is a double irony in all this argument. So I again urge the amendment be rejected.

The PRESIDING OFFICER. Who yields time?

Mr. SYMMS. Mr. President, I yield myself 1 more minute. I must comment on that. I want to get on to a vote on this amendment, but this amendment has no impact on whatever standards affect the steel production in this country.

This amendment simply states that under section (f) of this bill, if this standard is imposed to close a plant, that the affected population that EPA says are affected get to vote on it. That is all it says. I cannot get it any more simple than that for my colleagues.

I would simply state that the original concept of the Clean Air Act was that the decisions would be made in States and communities to impact clean air plants. This just takes the air toxics portion and allows the affected population to have a say so whether they close their plant or not. That is all it says. There is nothing else that should be read in the amendment. I can see nothing wrong with that consent in the United States of America.

I reserve the remainder of my time.

Mr. BAUCUS. Mr. President I yield back the remainder of my time.

The PRESIDING OFFICER. The Senator from Montana yields back the 18 minutes and 18 seconds.

Mr. SYMMS. Mr. President, I yield back all of my time.

The PRESIDING OFFICER. All time has expired.

Mr. CHAFEE. Mr. President, I move to table the amendment, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Rhode Island [Mr. CHAFEE] to table the amendment of the Senator from Idaho [Mr. SYMMS]. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Hawaii [Mr. MATSUNAGA] is necessarily absent.

Mr. SIMPSON. I announce that the Senator from Indiana [Mr. COATS] and the Senator from Indiana [Mr. LUGAR] are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 82, nays 15, as follows:

[Rollcall Vote No. 52 Leg.]

YEAS—82

Adams	Conrad	Harkin
Baucus	Cranston	Hatfield
Bentsen	D'Amato	Heflin
Biden	Danforth	Heinz

NOT VOTING—3

Coats	Lugar	Matsunaga

So, the motion to lay on the table the amendment (No. 1439) was agreed to.

Mr. DURENBERGER. Mr. President, I move to reconsider the vote by which the motion to table was agreed to.

Mr. CHAFEE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAUCUS addressed the Chair.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Mr. President, I ask unanimous consent to proceed to morning business for 2 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from Montana is recognized for 2 minutes under morning business.

Mr. BAUCUS. I thank the Chair.

(The remarks of Mr. BAUCUS pertaining to the introduction of S. 2403 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

CLEAN AIR ACT AMENDMENT OF 1989

The Senate continued with the consideration of the bill.

AMENDMENT NO. 1440 TO AMENDMENT NO. 1293

(Purpose: To clarify the roles of the various Federal agencies involved in the prevention of accidental chemical releases)

Mr. JEFFORDS. Mr. President, I have an amendment at the desk, and I ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, the pending amendments will be set aside. The clerk will report.

The legislative clerk read as follows:

The Senator from Vermont [Mr. JEFFORDS] proposes an amendment numbered 1440 to amendment No. 1293.

Mr. JEFFORDS. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 319, after line 10, insert the following new section:

"CHEMICAL PROCESS SAFETY MANAGEMENT

"SEC. 303. (a) The Secretary of Labor shall act under the Occupational Safety and Health Act of 1970 (29 U.S.C. 653) to prevent accidental releases of chemicals which could pose a threat to employees. Not later than twelve months after the date of enactment of this section, the Secretary of Labor, in coordination with the Administrator, shall promulgate, pursuant to the Occupational Safety and Health Act, a chemical process safety standard designed to protect employees from hazards associated with accidental releases of highway hazardous chemicals in the workplace.

"(b) The Secretary shall include as part of such standard a list of highly hazardous chemicals, which include toxic, flammable, highly reactive and explosive substances. The list of such chemicals may include those chemicals listed by the Administrator under section 302 of the Emergency Planning and Community Right to Know Act of 1986, Title III of the Superfund Amendments and Reauthorization Act [SARA]. The Secretary may make additions to such list when a substance is found to pose a threat of serious injury or fatality in the event of an accidental release in the workplace.

"(c) Such standard shall, at minimum, require employers to:

"(1) develop and maintain written safety information identifying, workplace chemical and process hazards, equipment used in the processes, and, technology used in the processes;

"(2) perform a workplace hazard assessment, including, as appropriate, identification of potential sources of accidental releases, an identification of any previous release within the facility which had a likely potential for catastrophic consequences in the workplace, estimation of the workplace effects of a range of releases, estimation of the health and safety effects of such a range on employees;

"(3) consult with workers and their representatives on the development and conduct of hazard assessments and the development of chemical accident prevention plans and provide access to these and other records required under the standard;

"(4) establish a system to respond to the workplace hazard assessment findings, which shall address prevention, mitigation and emergency responses;

"(5) periodically review the workplace hazard assessment and response system;

"(6) develop and implement written operating procedures for the chemical process including procedures for each operating phase, operating limitations, and safety and health considerations;

"(7) provide written safety and operating information to employees and train employees in operating procedures, emphasizing hazards and safe practices;

"(8) ensure contractors and contract employees are provided appropriate information and training;

"(9) train and educate employees and contractors in emergency response in a manner as comprehensive and effective as that required by the regulation promulgated pursuant to section 126(b) of SARA;

"(10) establish a quality assurance program to ensure that initial process related equipment, maintenance materials, and spare parts are fabricated and installed consistent with design specifications;

"(11) establish maintenance systems for critical process related equipment including written procedures, employee training, appropriate inspections, and testing of such equipment to ensure ongoing mechanical integrity;

"(12) conduct pre-start-up safety reviews of all newly installed or modified equipment;

"(13) establish and implement written procedures to manage change to process chemicals, technology, equipment and facilities; and,

"(14) investigate every incident which results in or could have resulted in a major accident in the workplace, with any findings to be reviewed by operating personnel and modifications made if appropriate.

"(d) Nothing in this section may be construed to diminish the authority of the States and political subdivisions thereof as described in section 304(k).".

On page 325, line 17, after "section" insert the following: ", including a review of the standard required under section 303 of the Clean Air Act Amendments of 1989,".

On page 334, after line 17, insert the following new sentence: "Whenever the Administrator or the Board conducts an inspection of a facility pursuant to this section, workers and their representatives shall have the same rights to participate in such inspections as provided for in the Occupational Safety and Health Act.".

On page 330, beginning at line 17, strike paragraph (6) and insert the following in lieu thereof:

"(6) The Board shall coordinate its activities under paragraph (5) with investigations and studies conducted by other agencies of the United States having a responsibility to protect public health and safety. The Board shall enter into a memorandum of understanding with the National Transportation Safety Board to assure coordination of functions and to limit duplication of activities which shall designate the National Transportation Safety Board as the lead agency for the investigation of releases which are transportation related. The Board shall enter into a memorandum of understanding with the Occupational Safety and Health Administration so as to limit duplication of activities. In no event shall the Board forego an investigation where a sudden, accidental release involving the production, processing, handling, or storage of a chemical substance causes a fatality or serious injury among the general public, or had the potential to cause substantial property damage or a number of deaths or injuries among the general public.".

On page 333, after line 16 insert the following new paragraph and redesignate the succeeding paragraphs accordingly:

"(11) The Board may make recommendations with respect to the safety of chemical production, processing, handling, and storage to the Secretary of Labor. Whenever the Board submits such recommendation, the Secretary shall respond to such recommendation formally and in writing not later than one hundred and eighty days after receipt thereof. The response to the Board's recommendation shall indicate whether the Secretary will—

"(A) initiate rulemaking or issue such orders as are necessary to implement the recommendation in full or in part, pursuant to any timetable contained in the recommendation;

"(B) decline to initiate a rulemaking or issue orders as recommended.

Any determination by the Secretary not to implement a recommendation, or to implement a recommendation only in part, including any variation from the schedule contained in the recommendation, shall be accompanied by a statement from the Secretary setting forth the reasons for such determination.".

Mr. JEFFORDS. Mr. President, the amendment I am offering is a fairly simple one. It has a handful of provisions designed to increase the coordination of the various Federal agencies with regard to chemical releases, as well as articulating OSHA's role in this regard.

First, it would require the Occupational Safety and Health Administration to promulgate a chemical process safety standard to require employers to take several steps to prevent accidental releases of toxic chemicals, and to set up procedures to mitigate and respond to releases should they occur.

Among the items it calls for is training of workers and contractors in emergency response. This training is intended to be equivalent to that provided for under Superfund. This does not mean that there will be one across-the-board hourly requirement, rather, that the training should be commensurate with an employee's responsibilities in an emergency.

Second, the amendment would protect the right of States and localities to enact more stringent environmental laws as currently provided for in the amendments, while keeping intact the current Federal-State partnership structure for worker safety.

Third, the amendment would require a review of the OSHA standard by EPA as part of its coordination functions.

Fourth, it would grant workers so-called walkaround rights when EPA or the Chemical Safety Board conducts an investigation.

Fifth, it requires the Board and OSHA, which have overlapping authorities to enter into a memorandum of understanding to avoid duplication. This agreement is designed to result in some allocation of responsibilities so that we do not waste Federal resources with the conduct of parallel investigations.

Given the Board's mission, in some cases duplication will be unavoidable. The amendment makes clear that the Board should always investigate accidents with a public impact or with the potential for public impact. For example, if a release failed to produce public harm simply due to the fortuitous direction of the wind, then the Board should certainly investigate.

Finally, the Board would be authorized to report to OSHA as well as EPA on proposals for future regulations. Like EPA, OSHA would be obliged to either proceed or formally respond to such a suggestion from the Board.

Mr. President, this amendment should result in a somewhat better use of our resources. It will also result in a safety standard being promulgated to

protect workers in very short order. I urge its adoption.

In summary, this is an amendment that is significant but rather simple and which has been agreed to by many parties who we have discussed it with over a number of weeks. Basically, what it does is coordinate the efforts of the Chemical Safety Board with other Federal agencies to ensure we do not have unnecessary duplication of effort if we have an accident in the release of dangerous chemicals into the air or other matters under the jurisdiction of the chemical board. It allows and provides for coordination, for instance, with OSHA, to ensure agencies which have dual responsibility to protect workers not stumble over each other with respect to investigations. It ensures that the efforts of the Secretary are involved in taking whatever action is necessary to prevent similar occurrences in the future. It also provides for other additional coordination with respect to solutions.

At this point, after working with all the various people who will be involved, we believe, at least I am told I have everbody in line. They are happy with the amendment. Therefore, at this point, I yield the floor.

The PRESIDING OFFICER. Is there further discussion on the Senator's amendment? The Senator from Montana.

Mr. BAUCUS. Mr. President, the amendment offered by the Senator from Vermont helps clear up some potential difficulties in this bill. There were potential questions and ambiguities concerning the rolls of OSHA and EPA concerning fence lines around plants.

I want to thank the Senator for offering this amendment. I think this does help clarify and clear up some ambiguities. The managers on this side are prepared to accept the amendment.

Mr. DURENBERGER. Mr. President, the managers on this side are also willing to accept the amendment. Before we do, though, I want to express my appreciation to my colleague from Vermont for his patience with those of us who originally authored this particular provision. Over a period of time, they have been wrestling with how you coordinate with the most appropriate Federal agencies. The Senator from Vermont, both in his past life in the House and now, has been very actively involved with the Occupational Safety and Health Act and has demonstrated a very serious concern for getting the most out of chemical safety, both on the Chemical Safety Board side and on the side of the Department of Labor and the Occupational Safety and Health Administration.

While we spent many hours, maybe too many hours, negotiating the specific terms of this agreement, I think the final language of the amendment, with its coordination language between the new agency, the important agency on chemical safety, and the existing requirements of the Occupational Safety and Health Administration has made it a stronger provision. I want to congratulate the Senator from Vermont for his efforts to do that and indicate we, too, support the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 1440) was agreed to.

Mr. DURENBERGER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. BAUCUS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAUCUS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAUCUS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 1441 TO AMENDMENT NO. 1293

(Purpose: To clarify application of antitrust laws)

Mr. BAUCUS. Mr. President, on behalf of the Senator from Ohio [Mr. METZENBAUM], I offer an amendment. I ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, the previous amendment will be set aside.

The clerk will report.

The legislative clerk read as follows:

The Senator from Montana [Mr. BAUCUS], for Senator METZENBAUM, proposes an amendment numbered 1441 to amendment No. 1293.

Mr. BAUCUS. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Insert new section 403(1) as follows:

"SEC. 403(1). APPLICABILITY OF THE ANTITRUST LAWS.—

"(1) Nothing in this section affects—

"(a) the applicability of the antitrust laws to the transfer, use or sale of allowances, or

"(b) the authority of the Federal Energy Regulatory Commission under any provision of law respecting unfair methods of competition or anticompetitive acts or practices.

"(2) As used in this section, "antitrust laws" means those Acts set forth in section 1 of the Clayton Act (15 U.S.C. 12), as amended.".

Mr. BAUCUS. Mr. President, this amendment that I offer on behalf of the Senator from Ohio would clarify that the antitrust laws in existing Federal Energy Regulatory Commission authority over unfair methods of competition would apply to the transfer, use, or sale of emission allowances created under section 403 of the Clean Air Act. Application of these laws would prevent a situation in which a new company or an existing company wishing to expand capacity could not obtain enough allowances to increase production because existing companies were hoarding their emission allowances with the intent of preventing any new competition.

I urge adoption of the amendment on behalf of the Senator from Ohio.

Mr. DURENBERGER. Mr. President, there is no objection on this side. I recommend adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 1441) was agreed to.

Mr. DURENBERGER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. BAUCUS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1442 TO AMENDMENT NO. 1293

Mr. DOLE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Without objection the pending amendment will be set aside.

The clerk will report the amendment by the Senator from Kansas.

The bill clerk read as follows:

The Senator from Kansas [Mr. DOLE], for himself, Mr. HELMS, Mr. SHELBY, Mr. COCHRAN, Mr. THURMOND, Mr. BOSCHWITZ, Mr. INOUYE, Mr. NICKLES, Mr. HEFLIN, Mr. BURNS, Mr. BOREN, Mr. BOND, Mr. MCCONNELL, Mr. SYMMS and Mr. PRYOR, proposes an amendment numbered 1442.

Mr. DOLE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 318, after line 24, add the following new subsection:

"(x) HEALTH AND ENVIRONMENTAL EFFECTS OF PESTICIDE USE.—

"(1) The authorities of this section shall not be available for the purpose of protecting public health or the environment from adverse effects which may result from the use of a pesticide in a commercial agricultural operation where such use is regulated pursuant to the authority of the Federal Insecticide, Fungicide and Rodenticide Act.

"(2) For purposes of this subsection, the term commercial agricultural operation means any activity conducted for the production of one or more agricultural products or commodities and customarily producing such products or commodities in sufficient quantity to be capable of contributing materially to the operator's support.".

Mr. DOLE. Mr. President, America's farmers are getting ready for the coming planting season and are prob-

ably not paying much attention to the clean air debate. By their very nature, farmers are the original environmentalists. They operate in a clean environment and are largely unaffected by many of the problems that we face in urban areas that the Clean Air Act is designed to address.

However, there is a great risk that this bill could be extended in an unreasonable way to farmers and farm operations in the regulatory, implementation and enforcement process simply as a matter of interpretation.

Just as we have attempted to address real concerns of small business, small communities, small oil and gas producers and other entities that individually are not responsible for the urban dirty air problems this Nation faces, farmers and farm operations are potential candidates for unreasonable regulation under the broad authority of this bill.

One confusing aspect of the clean air bill we are debating today is the treatment of the use of agricultural pesticides by farmers under the bill. Currently, if farmers use pesticides, they must comply with the Federal Insecticide, Fungicide and Rodenticide Act [FIFRA].

FIFRA is a very technical and precise law covering specific directions such as dosage rates, methods of application, instructions for dilution and types of application apparatus, including frequency and timing of applications, and other limitations and restrictions on pesticide use. In fact, it is a criminal act under FIFRA to apply a pesticide in a manner inconsistent with labeling instructions. Severe penalties could be imposed.

Requirements under the Clean Air Act could force farmers to use a different dosage required for a particular crop or take acreage out of cultivation just to comply. This amendment is designed to ensure that pesticide application requirements under FIFRA are not adversely affected by inconsistent requirements and controls under the Clean Air Act.

I am pleased to be joined by Senators HELMS, SHELBY, COCHRAN, THURMOND, BOSCHWITZ, INOUYE, NICKLES, HEFLIN, BURNS, BOREN, BOND, MCCONNELL, SYMMS, and PRYOR as cosponsors of this amendment.

Farmers are already faced with a tremendous challenge to provide the American consumer with an adequate food supply. We can only expect food prices to go up and farmers to quit farming when we load them up with unnecessary Federal regulations.

I believe the American farmer believes in clean air and an environmentally safe world. The Senate should respect that by adopting this environmentally sound amendment.

The amendment has been discussed and negotiated and cleared I understand by the managers on each side.

Mr. BAUCUS. Mr. President, the distinguished minority leader is correct. We have looked at the amendment and think it helps clarify a potential conflict.

Mr. DURENBERGER. Mr. President, I recommend adoption of the amendment of the Senator from Kansas.

Mr. BOSCHWITZ. Mr. President, I am concerned that many farmers will be asked to comply with yet another very complex set of regulations due to this bill. As things stand now, farmers are subject to rules and regulations for the farm programs through not less than five Federal agencies: The Agricultural Stabilization and Conservation Service, the Soil Conservation Service, the Army Corps of Engineers, the Fish and Wildlife Service, and the Environmental Protection Agency. In addition to all this, they have to deal with many State and local agencies as well.

The last thing farmers need is another set of regulations under the Clean Air Act. The Federal Insecticide, Fungicide, and Rodenticide Agency already regulates the registration and use of agricultural chemicals, and FIFRA is currently working on regulations for the disposal and storage of these chemicals. The Department of Transportation already regulates the shipment of them as well.

Senator DOLE's amendment does not allow farmers to ignore any of their environmental responsibilities. It would simply ensure that the American farmer does not have to deal with yet one more set of Federal rules by eliminating the unnecessary duplication of already existing regulatory authority. I support this amendment and encourage my colleagues to do the same.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 1442) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DURENBERGER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. I thank the managers.

Mr. BAUCUS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Parliamentary inquiry.

The PRESIDING OFFICER. What is the inquiry by the distinguished senior Senator from New Mexico?

Mr. DOMENICI. What is the pending business?

The PRESIDING OFFICER. The pending business is the Baucus amendment to No. 1307.

Mr. DOMENICI. Is it appropriate for the Senator from New Mexico to speak for 5 minutes on the bill at this point?

The PRESIDING OFFICER. The Senator has that right.

Mr. DOMENICI. I thank the Chair. Mr. President, I will try to not take longer than 5 minutes, and if this holds up any business they want to conduct, the managers should inform me.

The PRESIDING OFFICER. The Senator is advised there is no time limit to debate on the bill itself.

Mr. DOMENICI. I thank the Chair. Nonetheless, I make that commitment to the managers. I really do not want to hold up business if they have amendments.

Mr. President, I rise because I know this evening we are going to pass a historic clean air bill., I had the privilege as a Senator to work on the first two significant clean air bills passed in Congress. It has been almost 13 years since we had a major environmental cleanup bill passed by both Houses of Congress. I hope this one leaves the Senate, does not spend a long time in the House, and that in the not too distant future the President will sign it into law. Obviously, there has been a lot of debate and discussion, a lot of negotiation, and a lot of thought given to this bill.

I wish to thank a few people because I think you do not get to this stage in the development of a major new environmental cleanup bill without a lot of people having done a lot of work and putting a lot of time and energy into trying to get us down the path of cleaning up the environment.

So I want to start by congratulating and thanking the President for his effort. Clearly we would not be here if he had not sent us a very good bill with some very innovative and exciting ideas. Principally, it addresses the longstanding acid rain problem.

Obviously the committee, Senator BAUCUS, Senator CHAFEE, and clearly the majority leader, Senator MITCHELL, and our minority leader, Senator DOLE, and many others contributed to getting us to this point.

Obviously, this is not just an ordinary situation. Much in it is needed. Much in it should be a signal to the world, especially the industrial world, that they too have a responsibility to clean up the environment as America and they engage in this new decade of world prosperity.

Clearly our competitors in the industrial world have to follow suit in a number of areas and clean up their environment.

Having said that, I want to just indicate that the acid rain provisions are not only historic because we are going to substantially reduce acid rain at the turn of the century, but because of the way we did it.

Clearly, there are some real gambles in this acid rain cleanup. But I think we came down on the right side. What we have done is put an actual cap on America's production of sulfur dioxide. That is rather historic when you think that with changing times, with world needs, we put a cap on. That cap is not to be exceeded.

We hope that we can live well, prosper, and still stay within that cap. But the other innovative process was, as we reduce that sulfur dioxide, to give to those plants and those energy producers that are reducing this sulfur dioxide some allowances so they can use those allowances within their system, so they will be sold in the future for growth that may be needed.

So if we have roughly 19 million tons of SO_2, we are going to put a new cap on of 10. That gives roughly 8.9 million that are available when we get down to that point that we can continue to exchange by way of allowances and still remain within the cap.

This is using the marketplace in a new and different way to control the environment, and to reward those who are cleaning up. And although that is not always exactly fair—it cannot be—I think we have done our very best to allocate those allowances in a way that will help those States with the highest costs, not penalize those who are already clean, and yet will have to have allowances for growth.

I think that is rather historic. Clearly some States will have some big economic burdens. But I think we are learning in this legislation, in some of the debate that occurred on some of the major amendments, that when you ask American industry, large or small, be it a petrochemical plant or a utility company, to spend money on cleaning up the environment that they are part of, somebody pays the bill.

So we will have added costs to the American environment. I do not think anybody denies that. Those who call themselves proenvironment do not deny that. Those who are environmentalists might deny that.

We know if you are going to spend 8 years out from this point in time $19 billion a year cleaning up this economy, that $19 billion reflects in the costs of something that the American people are going to be buying, selling, or using.

Yet we are prepared to say we want to do that much because the environment is very, very important to our people and to the world, and clearly to our children and future generations.

So that is a rather historic one. Then we have been beset for years with a section of the Clean Air Act called air toxics. We have never been really able to enforce it very well. Part of that is because we do not know enough about certain things. Part of it is because it is very, very difficult to establish a standard that can be implemented fairly and that we know enough about to carry out.

So we have received almost no control in that area. We have done two very significant things in this bill. We have said to all the major emitters of those kinds of air toxics, "You are going to begin to ratchet that down under maximum available control technology," very expensive items, yet it is going to be applied to the next 5, 7, 8 years across the board to those who are significant producers of air toxics of the type we have not been heretofore controlling, benzene and the like, that we think produce cancer because we know cancer is produced from some of them—in animals, and in research.

So we are asking America to begin to ratchet down. That will get rid of anywhere from 85 to 90 percent of that group of pollutants in the United States' ambient air environment. That is a historic step because we do not need any standards and we do not need to go to court and argue about it. We are just going to do that based on a standard called maximum available control technology.

The part that follows that is very contentious. Some people think we did not do enough, but this Senator thinks we did exactly right. That is called the residual risk. When we are finished with that first round, what do we do next? Some would think we should now and here today in this bill set a standard for that particular residual risk. We felt, those of us who worked on this bill, that indeed we want to take that second step.

But we did something rather historic in this bill because for the second go-around, the residual risk, once we made that first round of air toxic cleanup—very expensive, very historic, and many American businesses are going to pay for that. We put in this bill the first, I believe, formal risk assessment effort.

You will find in this bill for the residual risk part a mandated National Academy of Sciences study on how we should evaluate in a science risk environment, how we should look at those toxics and come up with some way to adequately model and really assess the risks. That will be a first.

I am sure the National Academy of Sciences and some of their experts are very excited about this opportunity to apply science and real knowledge to this base to give American lawmakers and policymakers some real objective way to evaluate these kinds of risks in our society.

And we follow that up with a blue ribbon commission that will implement it, and then we say, if we do not follow their implementation suggestions here in the Congress under some expedited processes, then obviously we set a standard that will be a fallback standard that is very, very strong and stern. It seems to me that that is a very good approach.

For those who think we should do more right now, some of us would say, why should we not let the first phase work its way through while we do this with the scientists of our country; we do not lose anything. If it turns out that in fact they can help us do this in an orderly manner and really know what we are doing and what the risks are and what we are asking America to pay for, what do we lose? We would not be ready for the residual risk implementation anyway. And if this process fails because we do not get some good recommendations or we will not adopt them in the U.S. Congress or the President vetoes them, then we did put in a very strong standard that would take effect in the second round of air toxic cleanups. I think this is good law, and with the science base that we have in America, I think it is time we do things like this.

Obviously, one might ask or suggest that the Senator from New Mexico seems rather interested and enthused about this. I do, and I am, because I had something to do with it. I have been thinking for a long time that we ought to have some risk assessment potential in this country. We ought to have scientists tell us some of these risks in an objective way, because we have risks all around us all the time, Mr. President. When we wake up every day, we accept a certain amount of risks. Some of them we never bother to evaluate. We just say, "that is living." Others, we say we do not want to take the risk. Sometimes we do not know what the risk is, and we regulate it.

Clearly, this approach, where we ask the scientists to look at it from the health risks and give us some real information, has been a long time coming, but I frankly believe it is high time, and it will serve us well. Obviously, there are three or four other provisions in this bill that are truly exciting. We are attempting to get nonattainment areas down where they are in attainment. It is not easy to get Los Angeles down into attainment, and we can sit here all day and order them to do it. But I can remember Ruckelshaus, EPA Director 16 years ago, ordered them to do something, and it turned out they could not do it, because they would have had to take all

the cars off the road 2 or 3 days a week.

I compliment those who put this together. It is not perfect. No clean air bill is perfect. Risks are taken that we do not quite understand. Economic costs are born that sometimes we are mistaken about, but I truly believe this would be, if it stands the test of going to the other side of the Capitol and if it finally stands the test of going up Pennsylvania Avenue and getting a signature, and it is something like this, like we have here today, it will have been a credit to the U.S. Senate, and the weeks that we have spent on the floor, in committee, and in prefloor conferences, because it will be good for us, and it will be something that the American people will thank us for and of which we can be proud. I yield the floor.

The PRESIDING OFFICER (Ms. MIKULSKI). The senior Senator from New Mexico yields the floor.

Mr. BAUCUS. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HEINZ. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HEINZ. Madam President, I ask unanimous consent that I might proceed as in morning business for not to exceed 3 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HEINZ. Madam President, I rise today to invite all of my colleagues to visit the Earthtech 90 Technology Fair and Exhibition on the National Mall. Beginning tomorrow and continuing through Sunday, Earthtech 90, which is sponsored by the Environmental and Energy Study Institute [EESI] and cochaired by Senator GORE and myself, will have on exhibition some of our Nation's promising new technologies that will help us achieve environmentally sustainable development as we enter the next century.

The purpose of Earthtech 90 is to elevate the issue of environmentally sustainable development on the national agenda. We hope to accomplish this in two ways. First the technology fair will give Members of Congress, other policymakers, and the public the opportunity to examine firsthand examples of technologies, products, and strategies that conserve resources or prevent damage to the environment. Second, on Thursday, and Friday, here in the Senate, we are holding four international forums—linking Capitol Hill via satellite with Europe and Japan—to bring together high-level representatives of business, public interest groups, academia, and governments. Our forums will explore how the public and private sectors can work together to stimulate innovation and encourage the widespread use of environmentally sustainable strategies.

Situated next to the Smithsonian's Air and Space Museum, visitors to the Earthtech 90 Technology and Exhibition Fair will have the opportunity to view over 90 exhibitions ranging from an electric car to a 60-foot-tall wind turbine that produces energy from wind generation.

Therefore, Mr. President, I invite all of my colleagues to take a few minutes from their busy schedules and hop on one of our ethanol-fueled shuttle buses that will be shuttling passengers to and from the Capitol every hour over the next 2 days and visit the future at the Earthtech 90 Technology Fair and Exhibition on the Mall.

I yield the floor.

The PRESIDING OFFICER. The Senator from Pennsylvania yields the floor.

Mr. MITCHELL addressed the Chair.

The PRESIDING OFFICER. The majority leader.

CLEAN AIR ACT AMENDMENTS OF 1989

The Senate continued with the consideration of the bill.

Mr. MITCHELL. Madam President and Members of the Senate, the Clean Air Act has not been amended for 13 years. Often during that time I have warned the Senate that our failure to act was permitting increases in health and environmental damage due to air pollution. Now we are on the brink of action. The pending legislation is a strong step forward from current law. I urge its adoption.

The Senate faces a simple choice: This clean air bill or no clean air bill. We have a choice between making statements or making laws. For me, the choice is clear. We have had 13 years of statements, and the air in some places has gotten dirtier. Now we need a law to make the air cleaner everywhere.

This bill will do that. It is sound and comprehensive legisation. It dramatically expands and strengthens the clean air law and does it in the most-cost-efficient manner possible.

This bill controls acid rain; current law does not. This bill phases out CFC's; current law does not. This bill effectively controls toxic air pollutants; current law does not. Current law has no direct acid rain reduction program.

Sulfur dioxide emissions and emissions of nitrogen oxides are not controlled now due to concerns about acid rain. This is a serious flaw in the existing act, and it must be corrected. The pending bill will do so.

In 1981, I introduced the first legislation to control emissions of pollution that cause acid rain. That legislation would have required an 8-million-ton reduction in sulfur dioxide emissions. By contrast, the pending bill requires as a 10-million-ton reduction in sulfur dioxide emissions below 1980 levels. It is, therefore, more demanding than the first acid rain control bill introduced 9 years ago. By any standard, this bill requires a significant reduction—almost 50 percent of total U.S. sulfur dioxide emissions and over one-half of utility emissions.

By targeting specific plants and prohibiting the EPA from issuing more than 8.9 million allowances at the end of the reduction period, the bill assures that the full 10-million-ton reduction will be achieved and maintained. The bill imposes a national cap on sulfur dioxide emissions. That is an essential provision. Without it, we would have to revisit his issue in the near future as growth in emissions overtook our efforts.

In eloquent testimony before the Environment and Public Works Committee, public health experts testified that acid rain should be controlled "solely on the basis of health considerations."

The acid rain control provisions of this bill should reduce the number of children, asthmatics, and elderly suffering respiratory ailments from acid aerosols. Lakes, forests, and streams should be subject to less acidification and leaching of heavy metals.

Emissions of nitrogen oxides, critical to both acid rain and urban smog formation, are also controlled. Under the acid rain title, NO_x emissions will be reduced by 2 million tons through imposition of technology requirements on utility boilers. Current law has no comparable reduction requirement.

Air toxics is another example of how current law has failed to adequately address an important health and environmental issue. Section 112 of the act, which addresses the air toxics issue, has been a failure for 20 years. During that time, the Environmental Protection Agency has managed to regulate emissions of only seven toxic air pollutants. Meanwhile, States have stepped into the breach and regulated over 700.

The air toxics provisions of this bill will require controls on almost 200 hazardous pollutants within the next 2 to 10 years. Over 1 million tons of toxic air pollutants are expected to be reduced every year as a result of the installation of maximum achievable control technology, or MACT. Hundreds of industrial source categories will be required to install control technology. Phase I control standards will reduce cancer-causing emissions from each regulated source by 90 to 95 percent.

The toxics provisions of the bill also address specific environmental concerns. They provide for a Great Lakes and a coastal waters pollution prevention program. They also provide a program to control accidental releases of toxic emissions and create a Chemical Hazard Accident Investigations Board, similar to the National Transportation Safety Board, to investigate chemical accidents.

Current law provides for no such authority nor does it adequately regulate the thousands of harmful chemicals that are being used today.

One of our Nation's most pressing pollution problems is ozone, better known as smog. Smog is formed primarily in urban areas, during the warm summer months when emissions of volatile organic compounds, or VOC's, mix with nitrogen oxide emissions in the presence of light and heat.

Over 100 million Americans live in areas that fail to meet the health-based air quality standard for ozone. This is unacceptable. The history of the Clean Air Act shows that optimistic assumptions and lack of clarity will inevitably result in increases in pollution. The phenomenal growth in some areas has resulted in increased emissions which have overtaken existing pollution control efforts.

It is ironic that the area with the most stringent pollution control program in the country, southern California, is also the area with the most severe smog problem. Of course, its geography and climate are unique. But this experience demonstrates that without meaningful action, other American cities could become as polluted as Los Angeles.

The bill gives the States and the EPA new tools to combat this problem. In the past, the act was clear only as to the required date of attainment. Few interim requirements were specified. The legislation before us goes much further. For the first time, there is a requirement that there be specific regular reductions of 3 percent each year in emissions of the volatile organic compounds which cause smog.

In addition, precise control measures are required. For example, in all but the least dirty areas, enhanced vehicle inspection and maintenance is required. Stage II vapor recovery is also required. Reasonably available control technology is mandated for smaller sources in more severely polluted areas. States retain the authority to go beyond the Federal minimum.

If a State fails to submit a plan that EPA can approve, or if a State fails to implement such a plan, then the Federal Government will impose sanctions and ultimately require Federal pollution control measures, including the 3-percent annual reduction in emissions of volatile organic compounds.

This provision has been the subject of much discussion. Current law requires the EPA to prepare and implement a Federal implementation plan whenever a State fails to submit an acceptable State implementation plan, or fails to implement a plan which has been approved by the EPA. The bill eliminates the requirement that the Federal plan be comprehensive and requires instead that emissions would have to be reduced by 3 percent a year.

This change actually strengthens current law, because the existing provision has never been voluntarily used by the EPA and, as a result, in 20 years has not resulted in any reduction in emissions. In place of a general, unutilized authority that has produced no results, we are imposing a specific requirement of an annual 3-percent reduction in emissions.

States play a special role in air pollution control policy. The Clean Air Act envisions a partnership between the States and the Federal Government to clean up the air. Experience has shown that without strong Federal guidance, local pressures can overwhelm pollution control efforts. In this legislation, the Federal program is strengthened.

But the bill does not try to provide all the answers for the States. Some State officials have clamored for ever more specific Federal pollution control requirements, so that they will have little discretion to exercise when they do their jobs. While I am willing to support a strong Federal program. I do not believe it should be up to the Federal Government to do the job of both the Federal and State pollution control agencies. Accordingly, the bill leaves some of the decisions to the States, as is appropriate.

To control urban smog, mobile sources must be controlled. Mobile sources create about half of our urban smog problem and about 90 percent of our Nation's carbon monoxide pollution problem. New controls on pollution from cars and trucks are badly needed. The last standards to be imposed by the Environmental Protection Agency were promulgated under court order, after the EPA failed to exercise its duty to set standards for heavy-duty engines.

The bill before us requires that a new round of tighter tailpipe standards be imposed beginning in model year 1993. If a sufficient number of cities are still failing to meet health-based air quality standards by the year 2000, a second round of even tighter tailpipe standards is mandated. It should be noted that the second round of tighter tailpipe standards, so hotly contested this year, were not even included in the Environment Committee's bill in the last Congress, S. 1894.

The Senate Environment Committee bill, S. 1630, required two separate rounds of reduction in motor vehicle emissions. The first would have mandated substantial reductions in emissions by the model year 1993; the second would have mandated further reduction by the model year 2003. The compromise requires a first round, then establishes an objective air quality test to determine whether the second round will be needed. That test is as follows: There are 31 areas of the country now classified as seriously not in attainment with the law's air quality standards. Four of them are in California. All are required under the bill to come into compliance by the year 2000. If by then 12 or more of the 27 serious areas outside of California are still not in compliance, then the second round of reductions in tailpipe emissions will be required. If, however, 11 or less of such areas are not in compliance, then the second round will not be required.

The compromise on this issue was made necessary by the President's adamant opposition to the second round. During the negotiations which led to the compromise, this was the provision on which the administration's representatives were most insistent. While I personally prefer the unconditional mandate of a second round, I believe the compromise is fair and reasonable under the circumstances. In any event, given the history of the Clean Air Act, and the difficulty of achieving the reductions in emissions of air pollutants even when required by law, there is little doubt that the second round will occur.

The bill also requires vehicles to meet the applicable Federal standard for 10 years, or 100,000 miles, whichever occurs first. Current law requires vehicles to meet the standards for 5 years or 50,000 miles. Since most vehicles deteriorate over time, this is a significant improvement in pollution control.

The bill requires, for the first time, direct controls on both the vehicle and the fuel it uses, as means of reducing pollution. The alternative fuels requirements will require use of reformulated—cleaner—gasoline in those urban areas with the dirtiest air. Other areas can also opt in and require similarly clean fuel.

These provisions should reduce smog-forming emissions by about 80 percent, and air toxics emissions from mobile sources should be reduced by about 75 percent.

The bill also requires, for the first time, controls on the volatility of gasoline. This will significantly reduce emissions of ozone-forming organic chemicals. New urban buses and rebuilt buses will have to be cleaner and they will have to use cleaner burning fuels.

Areas with high levels of carbon monoxide pollution will have to use fuel with a higher oxygen content to help control such emissions. This is

important because carbon monoxide can be harmful to fetuses and those with pulmonary problems.

The global environment is threatened and must be protected. The depletion of the protective ozone layer (not the ozone found in our urban areas) is a serious problem. It is caused by manmade emissions of chlorine compounds known as chlorofluorocarbons, or CFC's. The bill requires a complete phaseout of CFC's by the year 2000. Methyl chloroform, another ozone-depleting chemical, is also required to be phased out. Phaseout of CFC substitutes, known as HCFC's, is also required by the year 2030. There are no comparable provisions in current law.

In the 13 years since the Clean Air Act was last amended, old problems have persisted and new ones have arisen. There are no simple, inexpensive answers to these problems. But the cost of inaction will be higher than the cost of this bill. The past president of the American Public Health Association has estimated that there are 50,000 premature deaths every year due to exposure to air pollution and that this number may double or triple if we fail to act.

A Harvard researcher testified that 2 to 5 percent of all illness and death in this country is associated with exposure to air pollution.

Some argue that we need more study before embarking on such an extensive control program. But the studies repeatedly confirm the need for action. We can no longer delay. The American people want action. They demand action. And they are right.

Study after study relates air pollution to hospitalization for children, to decreased lung function, to potentially permanent damage. Even as we debate these issues, the human and environmental toll rises.

The studies tell us what we already know. We have already waited too long. The estimates of the health costs keep increasing. This year the American Lung Association estimates we may spend $100 billion per year on health care costs associated with air pollution. The time to act is now. I urge my colleagues to join me in voting for this much-needed comprehensive clean air legislation.

We began to learn in this century that our planet and its surrounding atmosphere exist in a fragile balance.

It is time to use our knowledge and act to halt the destruction, to reverse the damage where possible, and to recognize that the future of all nations rests as much the survival of a livable Earth as it does on armaments and diplomacy.

In 1945, when the scientists of the Manhattan project gathered in the New Mexico desert to see the practical results of their work, some of them seriously feared that the explosion of an atomic bomb would cause combustion of the oxygen in the atmosphere. They wondered if the air itself would catch fire.

The air did not catch fire. But what those scientists could not predict and did not imagine about their invention has proven just as deadly over the years as what they actually feared.

Today, we must acknowledge that we have been conducting an enormous experiment with our world. And we still cannot predict how it will come out.

We cannot take this experiment into a desert to test it. But if we do not halt it, we run the risk that the world itself will become a lifeless desert, a silent proof that the last environment prediction came true.

It is our obligation to see that this does not happen. Each of us is on this Earth for a short time. We do not own forever the land we inherit from our fathers. Rather, we are stewards, holding the Earth's natural resources in trust for future generations. We can, and we must, convey to them the very basics of healthy human life—pure water, unpoisoned land and, today, clean air.

A LONGTIME COMING

Mr. BAUCUS. Madam President, the last time we passed a Clean Air Act was December 1977.

That was a long time ago. The budget deficit was less than $50 billion. The bilateral trade deficit with Japan was less than $8 billion.

Muhammed Ali was heavyweight champion of the world. Eddie Murray was the American League's Rookie of the Year. "Annie Hall" was the Academy Award winning movie.

Only 37 of us were in the Senate. ROBERT BYRD, the chairman of the Appropriations Committee and President pro tempore, and QUENTIN BURDICK were the junior Senators from their States. Our majority leader, Senator MITCHELL, had just begun working as the U.S. attorney in Portland, ME.

Since then, we have passed RCRA, Superfund, and seven reconciliation bills. We have overhauled the Social Security system and the Criminal Code. We have passed two comprehensive trade bills. We have reformed the Tax Code.

In fact, since we passed that last Clean Air Act, we have enacted a total of 3,882 public laws.

But one law has not been enacted: a new Clean Air Act.

We sure did try. The Environment and Public Works Committee held scores of hearings and markups, and reported clean air bills four different times.

But each was blocked. As a result, smog, toxic pollutants, and acid rain continue to corrode our lungs, overtax our hearts, destroy lakes and streams, and cause thousands of illnesses and deaths.

LEADERSHIP

We have, today, the opportunity to end 13 years of stalemate by finally passing a new Clean Air Act. We owe this opportunity to the leadership of two men.

The first is President Bush. There have been times, these past few months, when I have wondered whether others in the administration, and the Republican Party, share the President's commitment to environmental leadership.

But let us give credit where credit is due. President Bush broke the logjam and made this bill possible.

The second is our majority leader, GEORGE MITCHELL. And he has provided strong leadership through a difficult and exhausting process.

I remember one late-night negotiating session in room S-224, just outside the majority leader's office. It was after midnight. We were tired. We were not making much progress. Senator MITCHELL turned to me and said, if I may paraphrase, "MAX, this is the craziest process I've ever been involved in. Not as majority leader. Not as a Senator. In my life!"

But he stuck with it, responding to every new problem with a new solution. Finding a new compromise, finding a creative way to reach an agreement. Emerson was correct: "When nature has work to be done, she creates a genius to do it."

Others also have played critical roles. Senator CHAFEE, who has spent hundreds of hours with me, managing this bill. Chairman BURDICK; Senator DOLE; Senators DURENBERGER, BREAUX, and JEFFORDS—members of the core group of Senators; Senator SIMPSON, who was there when the chips were down. And let me add that former Senator Stafford, a former committee chairman tried tirelessly during his tenure in the Senate, to enact clean air legislation. His efforts should not go unnoticed.

THE LONG DEBATE

It has been one long, exhaustive process. There is an old joke about spending a year in Philadelphia one afternoon. I felt like I spent a lifetime on the Senate floor this March.

The 1970 bill took 2 days of floor debate. The 1977 bill took 3. This bill has taken 21 days and 150 hours.

Not only has the debate been long, it has been extraordinarily complex. Esoteric terms have been flung around: RACT, MACT, and BACT; FIP's and SIP's; NO_x and SO_x; and VOC's and CTG's.

At times, it has been like debating in a foreign language.

Such complexity is inevitable, of course, when dealing with this subject. The Federal-State relationship is complex; the regulatory process is complex; the technology is complex; the

chemistry is complex; and, of course, the politics are very complex.

So I thank all Senators for their patience. I have seen the glazed eyes. I have sensed their frustration.

But I can say that for all its complexity, for all its difficulty, this bill is very much worth it.

Let me tell you why.

PROVISIONS OF THE BILL

As we speak, 150 million Americans are breathing dirty air.

This year, betwen 5 and 10 million will get sick, or die prematurely, because of dirty air.

And then there are the economic costs—rising health care expenses, lost workdays, crop damage and structural erosion.

By passing this bill, we will take several important steps to reduce the deadly toll taken by dirty air.

For starters, we set new requirements for cities that do not meet current clean air standards. We require them to make steady, measured progress toward truly clean air.

If they do not make progress, then it is no more, well, that is OK. We are Mr. nice guy. Instead, the ax will fall. They will be subject to tough sanctions, like a ban on the construction of new pollution sources.

That means that there will be a dramatic reduction in smog. And the American people will benefit.

We establish tighter controls on automobiles and fuels, including a second round of tailpipe emission controls if we have not achieved sufficient progress by 2004.

Again, that means a reduction in smog. And the American people will benefit.

We require strict controls on emissions of 191 toxic pollutants.

That means reduced exposure to carcinogens. And the American people will benefit.

We impose new controls that will reduce SO_2 emissions by 10 million tons a year.

That means reduced damage from acid rain. And the American people will benefit.

Finally, we establish a tough new program to eliminate CFC's and other ozone-depleting chemicals.

That means reduced exposure to deadly ultraviolet rays. And the American people will benefit.

Another point. From the perspective of a Western Senator, the bill corrects a longstanding injustice. At long last, it creates a level playing field for low-sulfur coal. That means expanded markets for Montana and other Western coal companies.

PERFECTION AND COMPROMISE

Now, some critics say that these provisions do not go far enough.

They say that we diluted the original committee bill during our negotiations with the administration.

In the abstract, they are absolutely right.

But we are legislators, not philosphers. Our job is not to produce the best bill imaginable. It is to produce the best bill that can pass.

Let us face it. The original committee bill did not have the votes to survive a filibuster. The compromise that we negotiated with the administration makes some concessions. but it retains the core provisions of the original bill. More important, it improves dramatically on current law.

Edmund Burke wrote that:

All government—indeed every human benefit and enjoyment, every virtue and every prudent act—is founded on compromise.

This bill, 13 years in coming, is in fact a compromise. But it is a compromise that will provide lasting benefits to the American people.

CONCLUSION

Madam President, this is not just another piece of legislation. Most of us were not here when the last clean air bill passed. We may not be here when the next one passes. So let me close with the words of Senator Muskie, who wrote the clean air laws of 1970 and 1977.

Clean air legislation, he said,

Requires a new perspective. We all must recognize that the quality of our air is * * * essential, to the quality of our environment and the quality of our lives upon this planet.

We should keep this perspective in mind as we cast our votes. Passage of S. 1630 will improve the quality of our environment and the quality of our lives upon the planet. By doing so, it will leave our children, and our grandchildren, a powerful legacy—of stronger hearts, stronger lungs, and good health.

I urge all Senators to support the bill.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. BYRD. Madam President, I ask unanimous consent that certain items to which I will allude in my remarks be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. BYRD. Madam President, for several years, as Senate majority leader and Senate minority leader I was opposed to letting acid rain legislation be called up for floor debate for a number of reasons: First, its cost in terms of coal miners' jobs; second, the increased cost in utility rates to residential users of electricity; third, the adverse impact on the ability of our industries to compete in foreign markets as a result of the increased energy costs; fourth, the increased costs to consumers resulting from higher electric rates borne by commercial users; fifth, insufficiency of scientific evidence regarding causal relationships between sulfur dioxide and nitrogen oxide emissions and alleged damage to forests, lakes, crops; and sixth, the need for sufficient leadtime to develop and deploy advanced clean coal technologies that will allow us to achieve simultaneously the goals of environmental improvement and a more secure energy future.

Faced with the election of either George Bush or Michael Dukakis as President, I warned the coal industry—both the workers and operators—the utilities, and the residential commercial, and industrial users of electricity that they could expect strong White House pressure for acid rain legislation in the 101st Congress. Senate action on such legislation will occur later today, and I congratulate the joint leadership and the two managers of the bill on their efforts and on their hard work.

From the outset, I have made it clear that I support the goals of this legislation. Protecting our environment and improving the quality of our air are important national goals. We owe it to ourselves, to our children, and our children's children to preserve and protect the quality of our environment.

Yet, I believe we also have a responsibility to pass legislation that is balanced. Legislation that pits one region of our country against another is unwise. Legislation that needlessly creates conflict between our environmental policies and our economic and energy policies is unwise. I have stressed the need for balance.

When this bill was first brought before the full Senate in January, it did not, in my opinion, reflect the appropriate level of balance. The mobile source provisions were overly burdensome and threatened to impose tremendous new costs on both the producers and purchasers of automobiles. The air toxic provisions threatened to shut down critical domestic industries. The acid rain provisions threatened to raise electric rates for millions of residential, commercial, and industrial consumers in a number of States and throw thousands of coal miners and other workers out of their jobs, thereby imposing tremendous hardships on them, their families, and their communities.

It was my belief that, absent significant changes, the legislation reported by the Senate Committee on Environment and Public Works was unworkable and unfair. Significant changes have been made in the past several weeks.

The air toxics provisions have been substantially modified. The residual risk standards have been made more reasonable. For some industries, such as our domestic coke industry, the residual risk requirements will be delayed 30 years. The unreasonable

shutdown standards contained in the original committee bill have been relaxed. The tens of thousands, if not hundreds of thousands, of jobs that would have been put at risk by the original committee bill are no longer threatened, we are told.

Likewise, the mobile source provisions have been made more reasonable, thereby eliminating, we are informed, the threatened loss of thousands of jobs in our domestic auto industry. Even with respect to acid rain, some progress was made when parts of the Byrd-Bond proposal were incorporated in the substitute now before us. I believe these incentives will help to lessen the job losses that are certain to occur in the high-sulfur coal regions of our country.

However, as grateful as I am to the joint leadership for working with Senator BOND and myself and our colleagues from other Appalachian and Midwestern coal States to mitigate the impact of this bill on our electric ratepayers and our coal mineworkers, I am fearful that these ratepayers and workers will still be forced to bear a disproportionate share of the cost of this legislation. Yes, the number of mineworkers and nonmineworkers who will lose their jobs has been reduced. Yes, the impact on electric ratepayers pay have been reduced. But the price these ratepayers and workers will have to pay remains high.

Althoughy the Byrd-Bond incentives that have been incorporated into the leadership substitute will reduce the costs our regions will have to bear, I believe the impact of these incentives has been compromised. For example, in winning acceptance of our phrase I technology incentives, we were forced to accept a cap on those incentives which will limit their effectiveness. In addition, 5 million new emissions allowances were created in phase II and distributed, free of charge, across the country. These additional allowances will only diminish the ability of utilities forced to make substantial emissions reductions in phase I to recover the costs of making such reductions through the sale of allowances.

According to the Environmental Protection Agency, 3,000 to 5,000 high-sulfur coal mineworkers will lose their jobs between now and 1995, if this legislation becomes law; 10 to 11 thousand more will lose their jobs between 1995 and the year 2000. In all, according to EPA, 35 percent of high-sulfur coal jobs will be eliminated as a direct result of this legislation over the course of the next 10 years. That is why other Senators and I decided to offer some cushion for those men and women whose jobs we know will be lost.

Job losses in the other titles of the bill have been largely addressed. Most of the job losses, if any, in other industries will occur after the year 2000. It is only in the high-sulfur coalfields that 3,000 to 5,000 mining jobs will most certainly be lost by the end of 1995. So we Senators felt a responsibility to try to do something about that.

The Senate is about to vote on a bill which will take away the livelihoods of 3,000 to 5,000 men and women who work in the mines. These are real people, with real families, who live in States with already high unemployment and whose existing skills are difficult to transfer to other employment. At first, I did not expect that our attempt to address the hardship that this legislation is going to cause and, thus, create a safety net would meet with the opposition of both the White House and the joint Senate leadership. I never believed that President Bush would veto this bill over such a provision, even though his representatives told me they were philosophically opposed to such an approach. And I do not believe it yet.

I was not surprised to learn of the opposition of the White House. Their philosophical opposition extends to many programs which would help working people cope with the difficulties of putting food on the table and raising their children. But, this was a different case. This was not just another dying industry. This was not just the free market working its will. This was Government action taking jobs away, just as surely as if it were mailing out pink slips.

I felt that there was a responsibility to address that injustice, and so we Senators offered our solution.

I was offered a compromise by the White House and the leadership that was little more than a nod toward the problem. The formula for qualifying for the compromise program was so rigged that only three States and Puerto Rico might currently qualify. Only one State in that group produces high-sulfur coal, and that State is West Virginia.

The paper which was handed to me containing that proposal was labeled "Proposed Alternative to Byrd Amendment," with the second page titled "What This Means to West Virginia."

From that misguided offer, I could see that I would do better negotiating with myself. From that offer, I could see that there was little understanding—little understanding—and no sympathy for the plight of the American coal miner. From that offer, it was apparent that the powers that be wanted this bill in spite of what it would do to 5,000 coal miners and their families and their communities.

I was charged with being unfair to others in the labor force, although I had the support of most labor unions for my proposal. I was charged with trying to kill the bill, although I had the support of the clean air coalition. I even offered to modify my amendment to extend the 70-60-50 provisions to all other workers who might also lose their jobs, and to cap the funds to be expended so they would not exceed the cost of the proposal offered to me by the White House and the joint leadership and my offer was rejected. That proposed amendment will be printed in the RECORD, as has already been granted, following my remarks.

The rest is history. The amendment lost. Now we are going to pass this bill knowing full well what it will do to the jobs of 5,000 men and women in phase I. Clean air is being extracted from the hides of those men and women, and this Senate is so hungry for this legislation that we have turned our backs on them.

We are so hungry that we cowed in the face of a veto threat that was clearly a bluff. We have made a judgment here to let those 5,000 men and women and their families and communities suffer, just as surely as if we had taken a vote on the suffering. And, in fact we did.

The next day—last Friday morning—I picked up the Washington Post to read the front page coverage on the defeat of the amendment that I had offered on behalf of myself and other Senators. It was on the left side of the top of the front page. It was titled, "Aid Rejected for Miners Hurt by Acid Rain Curb."

Immediately to the right, there was an account of House passage of the child care bill over a Presidential veto threat. And that story was titled "$30 Billion Child-Care Bill Passes House; Veto Threatened." I thought that that particular juxtaposition said a lot.

Madam President, I want to vote for new clean air legislation. I am disappointed that I am unable to vote for this bill. But, I cannot vote for legislation that will destroy the livelihood of thousands of hard-working men and women. I cannot vote for legislation that could bring economic ruin to communities throughout the Appalachian and Midwestern States.

Clean air need not be bought at the expense of economic growth, lost jobs, and human suffering. I am sure that this bill will be passed by the Senate. I will not be one who will vote for it. I can only vote no and hope that, as this legislation works its way through the House and through conference, it will be improved. I can only hope that when this bill comes back to the Senate from conference, it will be a bill that I can support.

Out on the roads they have gathered, a hundred-thousand men,
To ask for a hold on life as sure as the wolf's hold in his den.
Their need lies close to the quick of life as rain to the furrow sown:
It is as meat to the slender rib, as marrow to the bone.
They ask but the leave to labor, for a taste of life's delight,

For a little salt to savor their bread, for houses water-tight.
They ask but the right to labor, and to live by the strength of their hands—
They who have bodies like knotted oaks, and patience like sea-sands.
And the right of a man to labor and his right to labor in joy—
Not all your laws can strangle that right, nor the gates of Hell destroy.
For it came with the making of man and was kneaded into his bones,
And it will stand at the last of things on the dust of crumbled thrones.

EXHIBIT 1

PROPOSED ALTERNATIVE TO BYRD AMENDMENT

* Trade Adjustment Assistance benefits to workers:

In a firm if a significant number or portion of its workers have been totally or partially separated or are threatened to become so, and

Sales or production of the firm have decreased, and

Clean Air Act Amendments of 1989 was the direct and primary cause of the job loss

* Additional benefits (as defined below) to workers:

In States that have average unemployment rate at least 140 percent of national average for the prior 24 month period;

In industry that has lost at least 18 percent of its workforce in the State within the prior 24 month period.

* Additional benefits:

26 weeks of additional TAA benefits.

TAA benefit tied to average wage of workers in the affected industry within the State (rather than average wage of all workers in the State), not to exceed 150 percent of maximum UI benefit in State.

* No application for benefits after December 31, 1995.

* Authorization for appropriations not to exceed $125 million annually.

WHAT THIS MEANS TO WEST VIRGINIA *

West Virginia, Mississippi and Puerto Rico are the only jurisdictions which currently meet the unemployment test.

According to Department of Labor the average wage of West Virginia coal miners is approximately $37,800. Assuming total compensation is approximately 125 percent of wages, coal miners would receive an average benefit of $636 in year 1, $545 in year 2, and $454 in year 3 under the Byrd amendment.

Depending on the year, these benefit amounts could be either 29 percent, 33 percent or 40 percent higher for at least a 12 month period when the displaced worker is in an approved training program. No other training, job search, or relocation assistance is provided.

Under this alternative, West Virginia coal miners would be eligible to receive $375 in weekly TAA benefits (150 percent of $250, which is the maximum unemployment insurance benefit in West Virginia). In addition, the coal miner would receive benefits to cover the cost of training which average $4,000 per worker nationally, or $77 per week. The displaced coal miner would also receive relocation assistance which the Department of Labor estimates at $1,000 per worker.

* Figures should be checked with Department of Labor.

[From USA Today, Mar. 27, 1990]

WHITE HOUSE BACKS OFF ON CLEAN AIR BILL

(By Paul Clancy and Jessica Lee)

The White House stepped back Monday from its threat to scuttle the clean air bill if it includes a costly provision to protect coal miners who could lose their jobs.

White House opposition to the plan—sponsored by Sen. Robert Byrd, D-W.Va.—to spend $500 million to replace lost income by miners remains strong, said Roger Porter, Domestic policy adviser.

But the Bush administration wants a clean air bill too much to see it go down the drain because of what some have termed a killer amendment.

"If we get a sound piece of environmental legislation, such as the clean air bill, with the Mitchell-Dole compromise to the Byrd amendment tacked on, that would not kill the bill," Porter said.

Sens. George Mitchell and Bob Dole—Democratic and Republican leaders—are offering a compromise on a Byrd proposal to soften the job loss for Appalachian miners if power plants are required to burn less high-sulfur coal.

Monday, Mitchell said the proposal essentially is for expanded job training and partial compensation for jobs lost as a direct result of the bill.

But it doesn't come close to Byrd's latest plea for up to $500 million to replace lost income for three years, plus retraining and relocation assistance.

Byrd, the former majority leader, and Mitchell, his successor, both are within a vote or two of winning a showdown.

The Byrd amendment is the last major stumbling block to Senate passage.

Byrd has not responded to the Mitchell-Dole offer.

It's frustrating for the bill's sponsors. "My own view is, let's vote," says Sen. John Chafee of Rhode Island, the bill's Republican floor leader. "There's a fair chance we'd defeat it."

AMENDMENT INTENDED TO BE PROPOSED BY MR. BYRD TO THE AMENDMENT (NO. 1293) PROPOSED BY MR. MITCHELL

On page 567 of the amendment No. 1293, on line 20, strike out "dioxide.'." and insert in lieu thereof the following:

"dioxide.".

TITLE VIII—RELIEF FOR TERMINATED WORKERS

BENEFITS

SEC. 801. The Clean Air Act is amended by adding at the end thereof the following new title:

"TITLE VI—RELIEF FOR TERMINATED WORKERS

"SHORT TITLE

"SEC. 601. This title may be cited as the 'Relief for Terminated Workers Act'.

"PURPOSE

"SEC. 602. The purpose of this title is to help minimize the effects on workers who are terminated from their employment as a result of the enactment into law of the provisions of this Act, as added by the Clean Air Act Amendments of 1990.

"DEFINITIONS

"SEC. 603. As used in this title, the term—

"(1) 'terminated coal mine worker' means any individual employed as a coal mine worker on the date of the enactment of this title, and who, after having been employed, prior to or after such date of enactment, as a coal mine worker for a period in excess of 6 months, is terminated at anytime thereafter from such employment as a direct result of the enactment into law of the provisions of this Act, as added by the Clean Air Act Amendments of 1990;

"(2) 'eligible terminated employee' means any individual, other than a terminated coal mine worker, employed on the date of the enactment of this title, and who, after having been so employed, prior to or after such date of enactment, for a period in excess of 6 months, is terminated at any time thereafter from such employment as a direct result of the enactment into law of the provisions of this Act, as added by the Clean Air Act Amendments of 1990; and

"(3) 'Secretary' means the Secretary of Labor.

"PROGRAM OF BENEFITS

"SEC. 604. (a) Prior to the expiration of the 180-day period following the date of the enactment of this title, the Secretary of Labor, by regulation, shall establish and carry out—

"(1) a program to provide benefits for terminated coal mine workers, and

"(2) a program for eligible terminated employees in accordance with this title.

"(b) Prior to the issuance of such regulations, and from time to time thereafter, the Secretary shall consult with the appropriate Committees of Congress with respect to such regulations and the implementation of this title.

"TERMINATION ALLOWANCES

"SEC. 605. (a) In promulgating regulations pursuant to section 604, the Secretary shall include provisions which assure that, under such program, a terminated coal mine worker and an eligible terminated employee shall be entitled to a monthly termination benefit computed as follows:

"(1) The monthly termination benefit for the first 12-month period following the date on which a terminated coal mine worker or an eligible terminated worker is first determined to be a terminated coal mine worker or an eligible terminated worker shall be an amount equal to 70 percent of such worker's average monthly compensation determined by computing the total compensation received by the worker, including benefits, during the last 12 months immediately prior to his employment being terminated, and by dividing the total compensation by the number of months actually worked by such worker during such 12-month period, thereby producing the average monthly compensation.

"(2) The monthly termination benefit for the second 12-month period following the date on which a terminated coal mine worker or eligible terminated employee is first determined to be a terminated coal mine worker or an eligible terminated employee shall be an amount equal to 60 percent of the amount of the average monthly compensation of such worker computed in accordance with paragraph (1) of this subsection.

"(3) The monthly termination benefit for the third 12-month period following the date on which a terminated coal mine worker or an eligible terminated employee is first determined to be a terminated coal mine worker or an eligible terminated employee shall be an amount equal to 50 percent of the amount of the average monthly compensation of such worker computed in accordance with paragraph (1) of this subsection.

"(b) Each monthly termination benefit to which a terminated coal mine worker or an

eligible terminated employee is otherwise eligible under this section shall be reduced by an amount equal to the amount of any earnings of such worker from employment during the period for which such benefit is payable, and shall be further reduced by any benefits to which such worker is otherwise entitled as a result of having been employed as such a worker.

"(c) Any such worker and his representative shall be furnished by the employer of such worker with such worker's average monthly compensation and average monthly time paid for, computed in accordance with the provisions of this title, together with the data upon which such computations are based, within 30 days after the worker notifies the Secretary in writing that he has been terminated from employment. Such worker shall make such information available to the Secretary.

"RETRAINING AND EDUCATION PROGRAMS

"SEC. 606. At any time during the 3-year period described in section 605(a), any terminated coal mine worker or eligible terminated employee while engaged in a full-time retraining or educational program certified by the Secretary, after consultation with the appropriate Committees of Congress, as appropriate for purposes of this title, shall, while satisfactorily participating, receive, in addition to the benefit under section 605, an amount, not to exceed in the aggregate, $4,000 for a period not to exceed 12 months.

"OTHER FINANCIAL ASSISTANCE

"SEC. 607. For the purpose of any law, other than this Act, providing Federal benefits or assistance to an individual based on need as determined by the earnings of that individual, benefits under this title shall be deemed earnings for the purpose of determining whether such individual qualifies for benefits or assistance under such law.

"TERMINATION OF BENEFITS

"SEC. 608. Benefits payable under this title shall cease on the date of the death of the individual entitled to such benefits.

"LENGTH OF BENEFITS

"SEC. 609. Any terminated coal mine worker or eligible terminated employee shall be entitled to benefits, in accordance with this title, for the 36-month period following the date on which such worker first becomes so terminated, or for a period of months following such date equal to the number of months that such worker was employed in the job from which he was so terminated, whichever is less.

"PAYMENT OF BENEFITS

"SEC. 610. (a) The Secretary shall be responsible for the payment of all benefits provided workers pursuant to this title.

"(b)(1) There are authorized to be appropriated to the Department of Labor such sums as may be necessary, not to exceed $470,000,000, and such sums shall remain available until expended, to meet the obligations payable pursuant to section 604(a)(1) of this title. In any fiscal year, the Secretary shall limit the total benefits payable under section 604(a)(1) to an amount not in excess of the appropriation provided in advance for such fiscal year. If the requirements of this title for the payment of such benefits exceed the limitation set herein, benefits so payable shall be reduced to the extent necessary to comply with such limitation.

"(2) There are authorized to be appropriated to the Department of Labor such sums as may be necessary, not to exceed $342,500,000, and such sums shall remain available until expended, to meet the obligations payable pursuant to section 604(a)(2) of this title. In any fiscal year, the Secretary shall limit the total benefits payable under section 604(a)(1) to an amount not in excess of the appropriation provided in advance for such fiscal year. If the requirements of this title for the payment of such benefits exceed the limitation set herein, benefits so payable shall be reduced to the extent necessary to comply with such limitation.

"(3) There are authorized to be appropriated to the Department of Labor, annually, such sums as may be necessary to provide for additional administrative expenses to be incurred by the Secretary in carrying out his functions under this title.

"REPORTS

"SEC. 611. (a) The Secretary shall report annually to the Congress with respect to the carrying out of the provisions of this title, together with the recommendations, if any, of the Secretary.

"(b) Within 12 months of enactment and annually thereafter until utility unit emissions reductions and controls are fully implemented, the Secretary shall determine the potential adverse employment effects (including the number of jobs at risk of termination and the schedule for job termination) of title IV of this Act on the coal mine workers of the Gascoyne Mine, Knife River Coal Mining Company, Bowman County, North Dakota, and report such determination along with supporting information to Congress together with any recommendations.

"RETROACTIVE CLAIMS

"SEC. 612. Claims pursuant to this title based upon terminated employment must be filed not later than 180 days following the date on which such termination occurred. Claims for termination which took place during the period beginning on the date of the enactment of this title and the date on which the program established by the Secretary pursuant to section 604 becomes operative may be made within the 180-day period following the date on which such program becomes operative.

"TERMINATION

"SEC. 613. No application for benefits under this title may be filed after December 31, 1995.".

Mr. BYRD. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. JOHNSTON. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 1443 TO AMENDMENT NO. 1293

Mr. JOHNSTON. Madam President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection to laying aside the pending amendment? Without objection, it is so ordered. The clerk will report the amendment of the senior Senator from Louisiana.

The assistant legislative clerk read as follows:

The Senator from Louisiana [Mr. JOHNSTON] proposes an amendment numbered 1443.

Mr. JOHNSTON. Madam President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 446, beginning on line 3, strike the entirety of subsection (d) through line 2 on page 449.

On page 449, line 3, redesignate subsection (e) as new subsection (d).

On page 449, following line 19, insert the following new section 416:

"APPLICABILITY OF NEW SOURCE REQUIREMENTS

"SEC. 416. No existing utility unit subject to this title shall be subject to any standard under section 111(b) or be required to obtain a permit under section 165 or section 173 as a result of any physical or operational change that occurs at such unit after the date of enactment of this title provided that any such change does not: (a) increase the maximum hourly emissions of any criteria air pollutant, based on the most recent 10 years of operation; (b) cause or exacerbate the exceedence of any national ambient air quality standard promulgated pursuant to section 109; or (c) cause the exceedence of any PSD increment or visibility protection limitation promulgated pursuant to part C."

Mr. JOHNSTON. Madam President, this is a fix for the so-called WEPCo problem. The problem is that the Environmental Protection Agency's WEPCo decision provides a disincentive for utilities to modify their units to generate electricity more cleanly. The reason that the decision creates a disincentive is that the units become subject to the new source review procedure, that is, the new source performance standards and/or new source review under prevention of significant deterioration standards. Under the WEPCo decision, if you have a dirty unit and you want to improve the performance of that unit in order to make it work better, more efficiently, more cleanly, more reliably, then you would be subject to the new source performance standards and/or new source review.

This can be the case even where the modifications, such as converting from oil or coal to natural gas, will in practice lower emissions. In other words, an electric utility can be trying to improve the efficiency of its unit, actually lower emissions under normal operating conditions and yet may be subject to the new source performance standards and/or new source review as a consequence of the formula with which EPA in its WEPCO decision has chosen to compare pre-modification and post-modification emissions in order to determine whether the modification will result in an emissions increase.

As a result of the WEPCo disincentive, utilities do not make the modifications, and we will have dirtier air. The WEPCo decision also deters utili-

ties from programs to maintain or restore efficient operation at existing powerplants. As a result, electric service will deteriorate at utilities as reserve margins decrease due to maintenance and modifications.

This amendment, Madam President, provides threshold that so long as the post-modification emissions do not exceed the maximum hourly emissions of any criteria air pollutant based on the most recent 10 years of operation, new source performance standards and/or new source review will not be triggered.

You pick a period within the 10 years, and if post-modification emissions do not exceed the maximum hourly emissions during the previous 10-year operating history, then that is the new threshold for it. This permits the threshold to reflect how the plant was actually intended to be operated by the utility rather than how it was operated during the period immediately prior to the modification when the plant may have been significantly derated.

In other words, if you have a very inefficient plant which needs modification, but in the period immediately prior to D-day the plant was operating at a lower efficiency and output, then it would act as a limitation. This does away with that, making it the hourly emissions in the most recent 10-year period the standard. At the same time this condition guards against utilizing the plant's all-time maximum potential to emit as the threshold.

The amendment also includes conditions that will guard against these modifications creating local air quality problems. In other words, it does not allow this amendment to be used to pierce the threshold of nonattainment areas.

Madam President, the Bumpers-Breaux-Bingaman amendment sought to deal with the WEPCo issue in a limited context, and was a good amendment. However, it did not go far enough to be a comprehensive solution to the problem. Therefore, we have proposed this amendment.

Madam President, I believe that EPA's WEPCo interpretation has created serious problems both from a perspective of achieving cost-effective emissions reductions and from the perspective of maintaining reliable electric generation. I believe that a legislative clarification is necessary in order to remedy the uncertainty and confusion that has resulted from EPA's WEPCo interpretation.

I believe my amendment represents a good approach to addressing the WEPCo issue. I regret that time does not allow us to work out a mutually acceptable legislative language package prior to final passage of the clean air amendments in the Senate.

Madam President, in view of time constraints, and after conversations with my friend from Montana, the distinguished floor manager, I have agreed to withdraw my amendment. However, I remain interested in pursuing a resolution of this issue that represents both good energy policy and good environmental policy. I trust that the conferees will devote their energies to such a solution.

So I address my concerns to the distinguished Senator from Montana, and ask if he is willing to address this matter in conference in a sympathetic manner.

Mr. BAUCUS. Madam President, the Senator from Louisiana raises a somewhat vexing problem; that is, the so-called WEPCo fix. This generally concerns an EPA determination which was upheld by a circuit court of appeals, namely that the EPA ruling, a fairly tight ruling that significant modifications would require new source review, tends to be an additional burden utilities face.

The Senator from Louisiana wishes to expand the instances and circumstances under which a utility can repower and modify, and yet not be subject to new source review, and therefore not be subject to NSPS or perhaps even specific deterioration with respect to the various air quality air sheds.

I appreciate the Senator offering this amendment. I also appreciate that we did not have sufficient time before final passage of this bill to work out a resolution in a manner that meets the objectives of both the Senator from Louisiana as well as the managers of the bill. But I give the Senator every assurance that in conference we will try to find a way to accomplish the objectives that the Senator from Louisiana is seeking, so long as they are consistent with the overall thrust of the bill, so long as we still have the overall tonnage cap, and so long as we do not unnecessarily upset the allocation of allowances that at this point are in a delicate balance.

I very much appreciate the Senator's concern. As one of the conferees to this bill, in conference I will try to find a solution that will accomplish the objective sought by the Senator from Louisiana so long as we can reach an accommodation that does not upset this allocation of balance that we have tentatively reached.

I am sure that the distinguished Senator from Louisiana understands that this is an amendment that the managers would have to oppose. Our views on the WEPCo case were expressed last week during our discussion of the Bumpers-Breaux amendment.

This Senator would have to oppose the Senator from Louisiana's amendment as currently drafted. In particular, while the Senator's amendment includes conditions intended to guard against the creation of local air quality problems, I am concerned whether in operation this amendment as drafted would protect local air quality to the extent desired and intended by the current Clean Air Act. Unfortunately, time does not allow us an opportunity to work out the best way to accomplish both this goal and that of the proposed amendment.

In conclusion, Mr. President, while I cannot support the Senator's amendment as currently drafted, the Senator from Louisiana in offering his amendment has raised a number of very important conclusions. Again, I give the Senator every assurance that in conference we will try to find a way to accomplish the objectives that the Senator from Louisiana is seeking consistent with the overall thrust of both the bill and the underlying Act as reflected in the concerns that I have expressed.

Mr. JOHNSTON. Madam President, I thank the Senator for his assurances. I know he does have a delicate problem of balancing not only allocations but the competing requirements of efficient electric generation along with clean air. Those are formidable balancing elements that he has dealt so well with.

I might say not only on this amendment, but on other amendments, I think the Senator from Montana has done a marvelous job on this bill. He has been told that over and over again, and he deserves the praise he has received. And he has received it from me. He has had a big job, he and his staff. Because he has been so fair on these other amendments it reassures us that he is going to be fair as well as diligent in trying to work this out in conference.

So with thanks, I withdraw the amendment.

The PRESIDING OFFICER. Is there objection to the withdrawal? Without objection, the amendment is withdrawn.

The amendment (No. 1443) was withdrawn.

Mr. BOND. Madam President, we have heard today——

The PRESIDING OFFICER. Will the Senator withhold? The Presiding Officer now notices about seven people standing. It is hard for the Presiding Officer to know who will be seeking recognition.

Mr. BOND. I thank the Chair.

Madam President, we have heard a great deal of dicussion today as we prepare for what we expect will be the passage of this historic clean air bill. For some 13 years, I believe, this body has talked about and thought about the problem of clean air. This year we had a change in circumstance. President George Bush came forward with a clean air package and he said this was a top environmental priority of the Bush administration. He put the

effort of the administration, the EPA and other Federal agencies behind it.

We have also had the outstanding leadership of the managers of the bill, Senator BAUCUS, Senator CHAFEE on this side, obviously the direct involvement in and the strong leadership of Senator MITCHELL, and the support of Senator DOLE. I might also mention on this side of the aisle that Senator DOMENICI has played an absolutely critical role in assuring that the bill reaches the point where we can go to final passage.

One critical decision in the bill was how to alleviate some of the burdens that the acid rain section placed upon midwestern utilities in the cleanup of sulfur dioxide emissions. Under the proposals that have been discussed for some time, the midwestern utilities burning high-sulfur coal were targeted for a much larger share of the cleanup than the share of sulfur dioxide they contribute to the environment.

To achieve a reasonable compromise, the midwestern Senators met together as a group under the leadership of the distinguished President pro tempore, Senator BYRD of West Virginia. Through his energy, guidance, and leadership, we were able to develop a compromise which has become known as the Byrd-Bond compromise. Under that proposal, utilities in the Midwest would get credits for early reductions of sulfur dioxide emissions. There would be double credits for those utilities which met the more stringent phase 2 requirements in phase 1, the 1.2 pounds per million Btu's instead of 2.5 pounds per million Btu's and there would be a 2-year delay for utilities which installed scrubbers. These were the essential elements of the compromise.

A utility which cleans up its sulfur dioxide emissions below 2.5 pounds per million Btu's in the first phase will earn allowance credits. The number of tons it reduces will be credits that it could use at a later time, if it wished to grow and thus increase its use of its emissions, or it could sell those credits to other utilities which needed the additional allowances to cover their growth and resulting emissions increases.

The system of allowance trading and the 10-million-ton cap on annual SO_2 emissions were the acceptable methods for assuring that midwestern utilities could recover some of their costs for making reductions far beyond their contributions to the problem.

During our negotiations on allowance trading, questions of equity were raised by other parts of the country, as well. For example, in the so-called clean States, which have already spent a great deal of money to clean up utility emissions, there was concern that they might not be able to respond to demand for growth and expand their generating capacity. Certain high growth areas of the country said, "We will generate more emissions, because we are getting more jobs." And thus, they argued, they must have allowances to cover the increase in emissions from fossil fuel generated electricity.

The problem is that when we give these credits to other areas, they must be taken away from the Midwest utilities which generated them in the first place through their SO_2 reductions. The Midwest utilities, I can say from experience, have themselves expended considerable amounts of money in cleaning up their emissions of sulfur dioxide. The ratepayers in those States are paying the costs of those cleanups. They will pay even more in the future. When those credits are taken away, therefore, there is less opportunity for the utilities to recoup their costs by selling those allowances. Thus, this was the reason that the negotiations over the allocation of allowances were very, very difficult. Our discussions became a very difficult regional battle, pitting various utility systems and States against each other.

I believe as a result of the unfailing patience and good will of the committee chairman, and the ranking member, Senator MITCHELL and Senator DOMENICI, we came to a good resolution of that problem. Many people may have heard of the Mitchell compromise, as amended by the Domenici and the Simpson proposals. Essentially, this compromise took some of the allowance credits that will be generated by the midwestern utilities targeted for reductions and allocates them to other areas where they have either already cleaned up or where there will be high growth in the future.

Today, I assume, we will accept another amendment which allocates another pool of allowances to deal with situations where equity requires some readjustment. Included in the list are States where powerplants are in the process of construction or where there are very small utilities, which would not find it feasible to install the expensive technology needed to clean up sulfur dioxide emissions without imposing undue burdens on the ratepayers.

With those changes, with those reallocations, has come some lessening of the value of the allowance credits to the utilities in the Midwest which must install expensive scrubbers. A devaluing of the allowances could mean higher utility rates. This, in turn, could be devastating to a family, to a household paying electric utility bills. But far more dangerous is the impact it could have on the economy itself, because electric utility rates are in fact included in the decisions that businesses make about where they are going to locate, particularly manufacturing facilities that require a good bit of electricity to operate.

To the extent that the growth States have said that they need more allowances to grow, this is what this system envisioned; with their increasing growth, and increasing economic activity, it was thought they would be in a position to buy those allowances from the utilities which had installed the expensive technology to generate the credits.

To the extent that they are being granted additional allowances, they can grow, without having to purchase those allowances from midwestern utilities. To carry this to an extreme, the designation of growth States would become self-fulfilling.

I can already cite anecdotes where businesses and manufacturing operations have moved from the Midwestern States to those so-called high-growth States. If utility rates go up another 40 to 50 percent, obviously, many of our midwestern manufacturing operations would move to other areas.

Nevertheless, I think that we have struck a reasonable compromise. It is one of those compromises in which most parties are sullen but not rebellious, often described as the mark of a good compromise.

I say, however, that we have given as much as we can give. We will not be able to recoup, in our midwestern region, as much of the additional costs which we are required to bear, as we would like. We are making additional investments and incurring additional costs so that other facilities emitting sulfur dioxide will not have to clean up.

Madam President, I believe that we have struck a reasonable balance in a very, very difficult situation which will assure that there is some relief for the Midwest and for those utilities, ratepayers, families, and employers who must pay higher costs. I believe that all in all, we have come up with a tough but fair bill. It is a bill which strikes a balance between the clear, and I think widely accepted, need to clean up our air, versus the economic costs.

I think that everyone will have the opportunity to pay a bit more because of the clean air bill, whether it is purchasing electricity from a utility, whether it is purchasing a car, or purchasing some other product, there will be additional costs. But for all of us, there will be the benefit of cleaner air. That cleaner air will be a heritage that we will pass on to future generations.

I again wish to add my words of congratulation to the President for his leadership; to the majority leader, to the minority leader for their willingness to work with us as we resolve these extremely difficult and very contentious problems; to the chairman, Senator BAUCUS; to the ranking member, Senator CHAFEE; for their un-

failing goodwill and good humor as we pounded on them, as we baseeched them, sometimes not in the friendliest of manners, as we sought to deal with problems that we saw to be very real and very compelling for the people of our States and for the economies of our States.

I thank them for their courteousness and for their understanding.

I urge my colleagues to support this measure.

I yield the floor.

The PRESIDING OFFICER (Mr. BUMPERS). The Senator from Kansas.

AMENDMENT NO. 1445 TO AMENDMENT NO. 1293

(Purpose: To establish emissions standards and ash disposal requirements for solid waste incineration units)

Mr. DOLE. Mr. President, I send an amendment to the desk for myself, the Senator from Minnesota, Mr. DURENBERGER; Mr. SHELBY; Mr. COCHRAN; Mr. CHAFEE; Mr. GRAHAM; and Mr. MACK, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Kansas [Mr. DOLE], for himself, Mr. DURENBERGER, Mr. SHELBY, Mr. COCHRAN, Mr. CHAFEE, Mr. GRAHAM, and Mr. MACK, proposes an amendment numbered 1445 to amendment No. 1293.

Mr. DOLE. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The text of the amendment is printed in today's RECORD under "Amendments Submitted.")

Mr. DOLE. I also ask unanimous consent to add the distinguished senior Senator from North Dakota [Mr. BURDICK] as cosponsor, and the distinguished manager of the bill, Senator BAUCUS from Montana.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, the amendment that has just been sent to the desk is intended to mitigate the Nation's solid waste problem. Incineration of municipal and other solid waste makes a lot of sense, and we want to give a green light to this technology which will provide a good—if partial—solution to this growing problem.

If we can provide our citizens with the reassurance that municipal and other solid waste will be burned in a safe and environmentally sound manner, it will be easier to site these incinerators.

Everyone hears about the Nimby syndrome—the not-in-my-backyard situation—where local citizens protest the siting of a nearby facility. That syndrome usually applies to these incinerators. We want to try and allay some of our citizens' fears—in a responsible manner.

The Environment Committee, in trying to address these same concerns, made a laudable attempt to set minimum standards for municipal incinerators. In doing so, however, the committee amendments went too far by using large municipal incinerators as the model for all combustors. We have made some changes to the original committee legislation so that real and important differences in size, class, and type of technology used by incinerators in other settings are recognized.

This change will ensure that hospitals, for example, are not precluded from incineration. Several years ago this body responded to needles washing up on the beaches of New Jersey, New York, Rhode Island, and Connecticut. It passed the Medical Waste Tracking Act, which encouraged onsite incineration for medical facilities. Those hospitals which incinerated onsite were exempted from tracking requirements because they wouldn't have to transport their waste. It would have been ironic if we negated the positive effects of the Medical Waste Tracking Act by making it virtually impossible for hospitals to incinerate their waste.

I became aware of the problem in the original legislation when I was informed by the Hadley Regional Medical Center in Hays, KS, that it was about to install a new and modern combustion unit to serve as a regional medical waste incineration unit. Prior to that, the hospital had used a sanitary landfill. The legislation would have precluded the use of this modern, new incinerator. That got my attention. I then found that similar problems existed for smaller modular incineration systems widely used throughout the Nation for dealing with municipal waste for rural areas and small communities. Industrial incinerators—those burning only industrial wastes for their own facilities—also would have been unable to meet the requirements of the bill.

What we have worked out with the committee—and I thank the distinguished Members from Minnesota, Montana, and Rhode Island for their assistance—is language that takes various size incinerators into account. It allows some flexibility so that incineration can be used in an appropriate manner depending on the waste stream. That flexibility is important also because it means we will not have to worry about trucks hauling waste all over the countryside to get it to a large regional incinerator. Hauling waste may make sense in some cases, but I don't want to mandate that kind of inflexibility to small rural communities out in Kansas, Minnesota, Montana, or anywhere.

Also, we have included ash management and recycling provisions in this bill. I expect that the major solid waste issues will be dealt with thoroughly when RCRA is taken up next year. However, since ash management is so closely associated with incineration—especially in siting decisions—we agreed to address it in this bill.

Finally, regarding recycling. We have included language that provides for recycling if and only if there is a market for the separated materials and if sufficient capacity exists to actually recycle. Recycling makes sense if the materials are actually recycled. What we want to avoid is the kind of situation we see in the District of Columbia, where mountains of newspapers—which are supposed to be recycled—are piling up because nobody in the government knows what to do with them. The market doesn't seem to be there, and the storage capacity is fading fast. We are asking for a plan to be drawn up by the municipalities to ensure that they have the markets and the capacity to make a recycling program work.

This amendment makes sense. It encourages incineration that will give the public confidence that public health and the environment are protected. It has been approved by the managers of the bill, and I again thank them for their help and for cosponsoring the amendment.

I also ask unanimous consent the distinguished Senator from Virginia [Mr. WARNER] be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DURENBERGER. Mr. President, I am pleased to join today with my colleague from Kansas. Senator DOLE and other distinguished colleagues including the chairman of the Committee on Environment and Public Works, Mr. BURDICK, to propose an amendment to this bill. The amendment is to the municipal waste combustion provisions of the pending amendment. These issues were not covered by the bipartisan agreement. This amendment, however, reflects a great deal of work by our chairman and by other members, including the distinguished Republican leader.

The environmental problems associated with municipal waste combustion first came to the attention of the Senate in the fall of 1987 when Senator BURDICK introduced an amendment to the comprehensive clean air reauthorization bill which the committee was then considering. Since that time there have been dozens of meetings and countless hours spent in the effort to perfect this legislation.

I would share with our colleagues in the Senate some observations which serve as a foundation for this bill.

First, the Nation is experiencing a solid waste disposal crisis. If not in every community, a substantial number of our towns, cities and counties are struggling with the problems

of waste disposal and facing hurdles never before seen. The crisis is principally a landfill capacity crisis. It is reflected in the cost of new landfill capacity and the distance that solid waste is now hauled to reach an operating dump. It is driven by an increasing concern for the environmental risks associated with landfills and the local opposition to siting new, even if more safety designed, landfill units.

The crisis is causing a revolution in the way we handle our solid waste. One part of that revolution is the commitment to garbage incineration and resource recovery. The other part is a new effort to make recycling, composting and waste reduction work for whole communities.

A second proposition is a theme the committee heard again and again in our hearings on the solid waste disposal crisis which were chaired by Senator BAUCUS during the 100th Congress. There is a four-part hierarchy for managing solid waste. It begins with waste reduction. Waste that is not generated at all is the best kind of waste. It goes on to recycling and treatment, which includes incineration and resource recovery, as the second and third part. And the hierarchy concludes with disposal of residual materials in a secure landfill. This legislation recognizes that heirarchy and recognizes that municipal waste combustion is not just a free-standing source of air pollution, but part of the solution to another pressing environmental problem—our land disposal crisis.

The third proposition recognizes the commitment that has already been made by cities and counties across the country to respond to the crisis. A report by the Environmental Protection Agency issued in 1987 indicates that 110 municipal waste combustion units were already operating; 210 more were in the planning, permitting or construction phases. Those facilities involve a commitment of nearly $17 billion by local government to the incinerator option.

In my home State of Minnesota, nearly one-half of the municipal solid waste stream is signed up for a garbage burner. If all of the planning facilities are completed we will have 14 units in Minnesota including one which is the largest capital project ever undertaken by the our largest county. So it's a substantial commitment and one the Congress must respect and understand as it prepares to legislate in this area. Local government already has a substantial financial commitment at risk.

The fourth proposition is that Federal air emissions and ash disposal standards for municipal waste combustion units are necessary. Generally, the massburn and RDF units that are being built are major sources of air polution subject to permits by State or local air pollution control agencies. But the permitting requirement only applies to the so-called criteria pollutants like carbon monoxide, particulates, nitrogen oxides and sulfur dioxide. There are currently no Federal guidelines for the toxic pollutants—that is, heavy metals and unburned organics—which are certainly the more important air pollution problem associated with waste combustion.

And Federal law is confused on the subject of ash. Is it a hazardous waste or not? Under the current policy—a policy which is not enforced because of the uncertain character of the existing ash testing protocol—ash from an incinerator may be hazardous on one day and safe on the next. That uncertainty needs to be fixed legislatively.

EPA has made progress in addressing the air emissions issue. In 1987 it announced that two control technologies—acid gas scrubbers and particulate controls—would be a minimum requirement in State permits for new facilities which are major sources of criteria pollutants. And in November of last year the Agency proposed a new source performance standard for municipal incinerators which includes standards defining good combustion practices along with the scrubber and particulate control requirement.

As a fifth proposition, we believe it is essential that the Congress state as clearly and quickly as possible the standards which we expect these units to meet. Finding a national consensus on these questions in legislation this year will avoid unnecessary expense and further confusion.

The sixth and final proposition reflected in this legislation is a determination that technology-based standards may be the best foundation for air emissions regulations. Technology-based standards are an alternative to the health-based regulations which are more typical under other sections of the Clean Air Act. For instance, section 112 of the law requires EPA to regulate toxic air pollutants to "provide an ample margin of safety to protect public health." In the 18-year history of the Clean Air Act, EPA has listed only eight pollutants for regulation under section 112. By way of comparison, in that same period a handful of States with active air toxics programs have set standards for 708 toxic air pollutants.

There are a large number of air toxics emitted by municipal waste combustion units. They include metals, like lead and cadmium; acid gases, like hydrochloric acid and sulfuric acid; and organics with special concern for dioxins and furans, but including perhaps hundreds of other substances. Setting a health-based standard for each of these pollutants taken one at a time would doubtless take EPA years and years. We can't afford to wait.

Fortunately, it appears that a strategy combining three basic technologies, acid gas scrubbers, good combustion—that is, adequate temperature, time, and turbulence—and particulate emissions control can do an effective job in removing the whole range of pollutants of concern. This technology is available; it's affordable; and it's effective in reducing risks to human health and the environment. The fundamental purpose of the air emissions provisions in the legislation we introduce today is to assure that these control technologies will be applied at all facilities—new and existing—and will be operated near their maximum control efficiency.

This amendment includes five major provisions. First, it requires EPA to issue new source performance standards for municipal incinerators, for medical waste incinerators and for incinerators burning commercial and industrial waste. These standards would be based on the three available technologies—good combustion, acid gas scrubbers, and particulate control—which I described a moment ago.

Second, the amendment requires the promulgation of numerical emissions limitations for several pollutants including carbon monoxide, particulates, sulfur dioxide, hydrogen chloride, lead, cadmium, mercury, and dioxins. These numerical standards are intended to press the management and operation of each facility to assure that the pollution control measures installed are operated to achieve the maximum benefit economically affordable.

Third, this amendment includes a requirement that areas served by waste combustion units develop programs which achieve a 25-percent recycling rate in the areas which are served by an incinerator.

Fourth, the amendment includes other management provisions for monitoring emissions, training incinerator operators, and issuing operating permits.

Finally, the ash disposal provisions in the amendment allow four options for the facility operator. First, ash may be disposed in a facility with two liners, leachate collection, and ground water monitoring. This is similar to the disposal regime for hazardous waste under subtitle C of the Solid Waste Disposal Act. Second, ash may be monofilled in a facility with a single liner, leachate collection, and ground water monitoring. As a third option, ash which is both treated and which passes a test to detect toxic leachate may be disposed of in a sanitary landfill meeting all other criteria under the Solid Waste Disposal Act. And finally, ash may be reused or recycled provided that it meets standards for each specific type of reuse established by EPA.

There are many other important provisions in this legislation which I would encourage my colleagues to review and consider. Municipal waste combustion is a rapidly growing industry and element in the budgets of city and county governments across the Nation. These facilities have great promise as one part of the response to the solid waste disposal crisis. But they also present substantial environmental challenges.

In conclusion, Mr. President, I would again commend the distinguished chairman of the Environment and Public Works Committee and for other members, especially the distinguished Republican leader Senator DOLE, for the many hours that they have spent studying these issues and developing this legislation.

Mr. President, I would urge adoption of the amendment.

Mr. BAUCUS. Mr. President, I am in favor of this amendment.

Mr. DOLE. Mr. President, I am happy to yield 10 minutes to the Senator.

Mr. BAUCUS. I do not know of anybody who opposes this amendment.

Mr. President, the amendment offered by the distinguished minority leader, in conjunction with the Senator from Minnesota and the Senator from Florida, establishes a comprehensive and environmentally protective program for municipal solid waste incinerators. The amendment requires the regulation of air emissions from municipal waste incinerators and the ash from these facilities. I believe the amendment addresses many of the concerns with the original provisions that have been raised by several of my colleagues and by others.

Mr. President, this amendment is included in S. 1630 because it is needed to fill three holes in existing law.

First, today, many existing incinerators are operating without adequate air pollution controls. As a consequence, particulates, acid gases, metals, dioxins, furans, and other organic chemicals are released to the air. When people are exposed to these pollutants—especially those living near the incinerator—they can cause cancer and other serious health effects.

Beyond the universe of existing incinerators, 200 or more new incinerators are being planned. Seventy-two of these are in the advanced stages of construction.

These new incinerators must be designed and operated properly to minimize the release of these pollutants if we are to protect the public.

This amendment plugs this hole by requiring stringent controls on incinerators. The amendment is flexible leaving considerable discretion to the EPA. The amendment does not specify the level or type of controls.

Rather it directs EPA to set limits for carbon monoxide, particulates, sulfur dioxide, hydrogen chloride, and combustion temperature.

Moreover, because not all incinerators are alike—they handle different types of waste with different Btu values—the amendment also directs EPA to establish one set of standards for municipal incinerators, another set for hospital incinerators and small units, and another set for industrial incinerators. That distinction is very important because those categories are much different.

Specifically, the amendment directs EPA to develop special requirements for smaller incinerators—like those used by hospitals—to address their special needs. This will allow hospital incinerators and other small units to safely burn their waste without all the controls that are needed at large incinerators.

Mr. President, the amendment also recognizes that some incinerators should not be regulated at all by these requirements. As such, the amendment exempts secondary materials recovery facilities from these requirements because their specific purpose is to recover valuable materials—like palladium from used catalysts. These operations are exempt to encourage greater reuse and recovery of materials rather than discarding them in landfills.

The amendment also exempts facilities regulated under the Public Utilities Regulatory Policy Act [PURPA]. These facilities are important because they are actually cogenerators of electricity. They turn waste into energy.

The second hole in the law is what to do with the ash that is generated by the incinerator.

Municipal ash comes in the form of fly ash and bottom ash. It often contains high amounts of metals. Frequently the metal concentrations are high enough to be considered hazardous.

The problem is that the proper methods for managing this ash is currently uncertain. Although the ash sometimes could be considered hazardous because of its metals content, it is unclear if it must be managed in a hazardous waste facility. This is because municipal ash is derived from burning municipal waste. That is solid waste, not hazardous waste. As a result, neither the cities nor the waste industry are sure how to manage it and this is creating problems in siting new incinerators.

Because of this ambiguity in the law, this amendment clarifies the status of ash disposal. It states that municipal ash is to be regulated as a solid waste under subtitle D of RCRA, and not as a hazardous waste under subtitle C of RCRA. Specifically, this amendment requires that ash is to be controlled under special standards. Standards that require treatment, monitoring, and disposal in a lined municipal landfill or in a dedicated ash monofill.

Now Mr. President, some have said that we do not need to include ash management standards in the clean air bill.

Let me remind everyone that ash is only generated because waste is burned. Without incinerators, there would be no incinerator ash.

Let me also mention that incinerator ash is not benign. It is laced with arsenic, cadmium, lead, and other metals. And when improperly managed these metals can leach into the ground water and contaminate drinking water supplies.

If we were only to control the air emissions from incinerators we will have addressed only half of the problem. But if we want to ensure that incinerators are safe, and their ash residue is managed properly we must also include ash management standards.

The final hole that this amendment plugs is to stress the importance of source separation and recycling prior to incineration. The amendment helps to clarify how incinerators fit into the larger waste management system.

The hard, cold reality is that incinerators in many communities are being blocked out of fear that it will mean the end to recycling. That is, once an incinerator is in place, recycling will not occur.

Now Mr. President, some have been very critical of mandating a recycling requirement in this bill. Some have said that recycling belongs in RCRA. As chairman of the subcommittee with jurisdiction over RCRA I agree that recycling will be a major issue in the RCRA reauthorization.

But source separation and recycling are very important and closely linked to more efficient incineration.

Let me explain.

By separating waste prior to incineration and then recycling it will reduce both the air emissions and the contaminants in the ash. Metals in air emissions and ash like lead, cadmium, arsenic, and others come from inks, plastics, batteries, appliances, and other sources are not destroyed by combustion. They end up in air emissions or in the ash.

But separating these materials prior to incineration means lower emissions in the air and ash. And this can reduce a community's long-term liability because there will be less of a chance of an environmental disaster.

What is more, once separated, these materials can be reused and recycled. Currently, we only recycle about 10 percent of the waste. We will boost this to 25 percent with this amendment and ensure that materials like glass, paper, and aluminum will be recycled and not incinerated or put in a landfill.

Recycling also has other benefits. It saves energy and resources. Aluminum can recycling is a great example. Producing an aluminum can with recycled aluminum takes 95 percent less energy than from virgin aluminum.

Recycling also creates jobs. Many local communities will need people for curbside collection of materials, or to run a central recovery facility, to sort it, bail it, and ship it to a market.

Mr. President, source separation and recycling makes good sense. That is why, for the first time in law, that materials that should not be incinerated, are separated from the waste stream and not incinerated.

And that is why this amendment includes a recycling requirement. It sets a 25-percent recycling requirement as a condition for operating an incinerator. But if 25 percent cannot be met—perhaps because a recycling market is not available—it allows the State to set an alternative recycling level.

By including these requirements, this amendment ensures that source separation and recycling will play a major role prior to incineration.

Finally, Mr. President, some of my critics have said that we really do not need this amendment because a couple of recent events have altered the need for this amendment.

What my critics are referring to are two recent court decisions, and the EPA rulemaking on municipal incineration. Let me be very clear. These events do not in any way lessen the need for this amendment.

It is true that last November, EPA proposed standards to control the air emissions from municipal incinerators. This helps to plug part of the hole and I commend the EPA for their action.

EPA's proposal includes many of the requirements that are needed to protect the public from air emissions from improperly designed and operated incinerators.

It sets emissions limits for toxic metals, toxic organics, and acid gases.

It sets operating standards to ensure optimum combustion in order to help reduce pollutants.

And it includes a requirement that 25 percent of the reusable components of municipal trash be separated as a condition of getting a permit.

Unfortunately EPA's proposal is not adequate in a couple of areas.

First, it is limited to larger municipal incinerators. It ignores hospital incinerators, small incinerators, and other industrial incinerators. Most of these units operate without controls and belch pollutants such as dioxins, furans, and arsenic into the air.

A second area where EPA's rulemaking is deficient, is that it does not include standards for ash management. Ash, as I said earlier, is generated when waste is incinerated. Ash contains metals often at levels that are high enough to be considered hazardous. Proper management of ash is critical to ensure the public's safety.

Now it is also true that in two recent court decisions—one in New York, and one in Chicago, the courts ruled that municipal ash should be managed as a solid waste. But this does not provide us with enough certainty. These decisions are likely to be appealed, so the question of how to manage the ash may still be uncertain. This question needs to be clarified by statute and regulation once and for all.

Finally, EPA's rulemaking includes a requirement for source separation of the waste prior to incineration. This makes some sense because noncombustable materials should not be incinerated.

Unfortunately, EPA's rulemaking does not tell us what to do with the separated wastes. Is it to be recycled, or is it to go to a landfill? A recycling requirement like the one we have in this amendment is needed to ensure that the materials that are separated in accordance with EPA's rulemaking are recycled and do not end up in landfills.

Mr. President, I believe that the time to plug these holes is now. Municipal incinerators are playing a larger role when they have played in the past.

Many cities—that are running out of landfills—are scrambling to find new places to dispose of their waste. As many as 200—are looking at incinerators as a way to reduce the need for more landfills. And as an added benefit they see incinerators as a partial answer to their land disposal problems.

City officials see incinerators as a way to reduce the volume of waste by 70 to 90 percent. They see incinerators as a way to reduce the need for more landfills. And as an added benefit they see incinerators as a way to produce energy from the waste itself.

If we are to ensure that these incinerators are designed and operated safely—if we are to ensure that the ash is safely managed we should adopt this amendment.

And if we are to ensure that incineration is part of a larger waste management scheme—that includes source reduction, recycling, and landfilling we should adopt this amendment.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, I thank both managers of the bill. I indicated this was a long negotiation. I certainly want to thank the staff all around.

There are some areas we felt we could have made further changes. I am particularly concerned about the provision to which the American Hospital Association was just seeking to add two words, "as appropriate" on page 5, to give some more flexibility. The wording is:

(5) The performance standards promulgated under section 111 and this section and applicable to solid waste incineration units shall specify, as appropriate, numerical emission. * * *.

We were not able to negotiate those two words, "as appropriate." It seems to me that they would have been given more flexibility but at least I wanted the RECORD to reflect that, and, hopefully in the conference, this can be visited again because there are improvements to be made.

We thank all those who were helpful and those on the staffs of Senator DURENBERGER, Senator BAUCUS, Senator CHAFEE, and others who worked with our staff and other Member's staffs and others on this particular change.

Mr. President, maybe other people want to speak on the amendment. The Senator from North Carolina was kind enough to yield to me. I said I would just take about 30 seconds. It has taken longer. I wonder if I might ask that we may proceed for 5 minutes.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The Senator from North Carolina.

Mr. HELMS. Mr. President, I had hoped that the Senate would produce a clean air bill that I could support without serious reservation and in good conscience, but this bill fails the test. I recognize that the news media and politicians back home will proclaim that those of us who cannot support this bill are somehow "against" clean air and a clean environment.

In short, the outcry will come largely from those who have never seen this 567-page bill, let alone studied it or the impact it will have on the working men and women of America. Nevertheless, I can see the newspaper headlines, the pious editorials and cartoons now with the usual sneering references to "the dirty dozen," or something like that.

Such characterizations are absurd, because the Senate is about to pass a bill that will cost the taxpayers billions of dollars, while putting at risk the jobs of countless hundreds of thousands of working people in North Carolina and the Nation. The estimates of jobs that will be put at risk run into the millions.

Mr. President, considering all aspects of the legislation that is now about to pass the Senate, I simply cannot do that to men and women who deserve some consideration from us, and who must have their jobs to provide for their families.

How many jobs will be lost? Nobody knows the answer to that—not the President, not Mr. Reilly of the EPA, nor any Member of the Senate. But privately, in that cloakroom and elsewhere, and sometimes publicly, most if not all of the above acknowledge that

the toll on the American people will be enormous and probably devastating.

That is why I fully understood the deep feelings of the distinguished Senator from West Virginia, Mr. ROBERT C. BYRD, former majority leader, presently the chairman of the Appropriations Committee and President pro tempore of the Senate, last week when he pleaded with Senators to support his amendment to help the coal miners of his State who will lose their jobs. That was really the first acknowledgment in this body that many, many jobs—not only of coal miners but across the spectrum—will be lost.

I could not and did not support Senator BYRD's amendment, and I told him why. But I nonetheless understood and admired his concern for the people of his State, because I have precisely the same concerns about the people of North Carolina.

Jobs will be lost, perhaps by the thousands, perhaps by the countless thousands, in North Carolina's industries—textiles, furniture manufacturing, and many others.

Is there no concern for what happens to the workers in my State, or in Senator BYRD's State, or in any of the other States? Senators will say, yes they are concerned—but. But what? Every one of us in this Senate knows that many jobs will be lost once this bill is signed into law—if it is signed into law.

The legislation about to be approved by the Senate has been referred to a thousand times as a compromise. Yes, it is indeed a compromise because it was well-known that the original clean air bill would never have passed the Senate. According to White House estimates, that bill would have cost the taxpayers $42 billion per year. But the Business Roundtable put the cost of the original bill at $54 billion. On the other hand, the administration estimates that even this compromise will cost $22 billion per year, whereas the Business Roundtable predicts the compromise will cost $46 billion per year. But who can vouch for these estimates? I repeat: Nobody, nobody knows what the actual cost will be. We just know it is going to be enormous.

This is a very complex bill, comprised of 7 titles and 567 pages. Senators confess privately that they do not fully understand it or even its implications. There are provisions in the bill that I could support. I could support, for example, the acid rain title, and the alternative fuels sections of the ozone nonattainment title. I could perhaps support this bill if acid rain and alternative fuels were the only provisions in the bill.

But there are so many other provisions, such as the section designed to control toxic chemicals, that I cannot support. These provisions are sure to put people out of work and saddle small businesses with incredible costs.

I simply cannot close my eyes to the devastating consequences of these provisions. I hope the harshness of this section will be lessened by the House of Representatives, or in conference by both the House and Senate.

ACID RAIN

Mr. President, all of us have been concerned about the acid rain problem for a long time. In North Carolina, we have beautiful forests along the Blue Ridge Parkway. I know what is happening to Mount Mitchell where many trees are dying. Acid rain appears clearly to be a contributing cause. So I support the general policy of reducing the emissions of sulfur dioxide which cause acid rain.

There has been much debate as to the extent of the acid rain problem. Some contend that there is no problem at all; while others claim that disaster is near.

The debate was finally put to rest by the exhaustive 10-year study by the National Acid Precipitation Assessment Program [NAPAP]. The NAPAP program reviewed more than 5,000 studies and documents on acid rain. About 400 scholars and reviewers were involved in preparing these reports.

The director of the NAPAP study concluded that "the sky is not falling, but there is a problem that needs addressing." He emphasized that "acid rain does cause damage, but the amount is less than we once thought * * *."

The NAPAP report included several important findings. For example: Acid rain has not been shown to be a significant factor contributing to current forest health problems in North America; and that acid rain is not responsible for regional crop yield reduction. Furthermore, the report states, the number of acidic lakes are a relatively small percentage of all lakes nationwide.

Thus, the consensus of the scientific community appears to be that acid rain is indeed a problem, but not as grave as had originally been proclaimed.

So the question is not whether we should try to reduce emissions of sulfur dioxide. No, the real question is, What level of reductions should we seek? This clean air bill requires a reduction of 10 million tons. Some people wonder: Is there anything magic about the 10-million-ton figure?

The obvious answer is no. The 10-million-ton figure was picked arbitrarily. The same environmental benefits can be achieved with an 8-million-ton reduction—and for half the cost. The director of the NAPAP study confirmed this in a letter to Congress in which he stated, "if emissions or deposition were to change by 7 to 13 percent, the regional patterns of the effects * * * would likely change, but such changes would not likely be measurable."

So why was it necessary to increase the cost by 50 percent by requiring a 10-million-ton reduction instead of 8 million tons—when the environmental benefits are the same? I do hope that the House, and the House-Senate conferees, will consider this issue because in the end, it is the consumers and the taxpayers who will foot the bill.

When this clean air bill was originally introduced, I felt that the acid rain provision treated North Carolina inequitably. It was a double whammy on the people of my State. North Carolina electric power ratepayers have already paid for cleaner air because our power companies use low sulfur coal.

But we were about to get hit again in the original bill, which used a formula that gave utilities allowances, or credits, based on the capacity or use of each unit during 1985–87. Thus, a utility could emit SO_2 only in accordance with the number of allowances they possessed. This had the effect of locking in North Carolina utilities at very low capacities because they had used only about 40 percent of their coal-burning capacity during 1985–87.

The result was that States like North Carolina were penalized for having had good performance and low use of coal during 1985–87. So under the original bill, North Carolina utilities would have been forced to buy additional allowances or credits from other utilities in order to use the other 60 percent of their units.

Obviously, North Carolina ratepayers would ultimately pay these additional costs. It was estimated that the original bill would have forced Duke Power to raise its rates by 10 to 12 percent; CP&L by 11 to 15 percent.

So we sought relief for North Carolina. We worked with Senator BYRD, and with midwestern Senators, to fashion a compromise more equitable to North Carolina and other low capacity States. We also expressed our concerns to Senator MITCHELL and the Environment Committee. As a result, Senator MITCHELL agreed to modify the acid rain title to give low-capacity States, like North Carolina, additional allowances. This will help us to meet our expected future growth without having to incur unnecessary and inequitable costs. It will also reduce the rate increase for Duke Power from 10 to 12 percent down to around 5 to 7 percent.

Needless to say, this will save the ratepayers of North Carolina substantial amounts of money over the years.

OZONE NONATTAINMENT

The bill also sets some tough standards for areas that are not inattainment. There are 101 cities that have ozone or smog levels above the current standards and 44 cities that have carbon monoxide problems.

Ozone is formed from volatile organic compounds [VOC's] or nitrogen

oxides [NO_x], which are emitted from cars and many businesses. Cars account for about 50 percent of the ozone—or urban smog—problem; and businesses such as dry cleaners and beauty shops account for the other 50 percent of that problem.

So there are two ways to address the smog problem: control industrial emissions and control car emissions. Title I applies to industrial emissions, also called stationary sources. The title requires businesses in serious nonattainment areas to put on reasonable available control technology [RACT], if they are a major source defined as a source emitting more than 100 tons of NO_x or VOC. The bill also requires those areas to implement vehicle inspection and maintenance programs and to install stage II vapor recovery systems at large gas stations. This is the large nozzle on the gas pump that recovers gas vapors when you pump your gas.

The nonattainment section in the compromise bill, I acknowledge, is substantially better than the original bill. The compromise bill does not require controls on small businesses that emit less than 100 tons of pollutants. The compromise also deleted a prohibition on the "netting" of various pollution sources within a plant, which will give businesses more flexibility.

Second, title II applies to mobile sources, including cars and light-duty trucks. The bill sets two phases of tailpipe standards that must be met by all cars. The first phase goes into effect for 1993 autos and is similar to the standards already adopted in California. Auto emissions of VOX's and NO_x must be reduced by 22 and 60 percent respectively, and will add about $100 to the price of each car. The second phase will take effect in 2003 only if more than 12 of 27 cities in the serious category are still in nonattainment in year 2001.

There is also a section in the bill that deals with alternative fuels. The compromise bill required the EPA to issue standards for alternative fuels to achieve a 12-percent reduction in air toxic emissions in phase I. These alternative fuels would be marketed in the nine "dirtiest" cities. New cars will have to meet the EPA standards by 1995.

Mr. President, during the debate on this bill, several alternative fuels amendments were offered. These amendments were considered strengthening amendments or environmental amendments. I regard them as commonsense amendments.

It makes sense to use more alternative fuels because doing so will help reduce air pollution and our dependence on foreign oil. The United States now is importing 53 percent of the oil used in this country. This is an all-time high, and it is a threat to our national security. I am absolutely convinced that we must seek ways to decrease our addition to foreign oil. Alternative fuels will help accomplish that objective while, at the same time, reducing air pollution. It is a win-win solution to two serious problems.

I supported three common sense, or environmental, amendments dealing with alternative fuels: Wirth-Wilson, Daschle, and McCain. I opposed the Lautenberg amendment that would have weakened the alternative fuel provision.

The Wirth-Wilson amendment, had it not been defeated, would have required reformulated gasoline, or alternative fuels, in all 40 seriously polluted cities. It would also have required a second phase of tailpipe standards on cars in the year 2003 if the EPA concluded it was an effective way to reduce air pollution.

Mr. President, some expressed surprise that I supported this amendment. But if they had looked at the merits of the amendment, they would not have been surprised. It would have been a triple win because it would have reduced air pollution, reduced our dependence on foreign oil, and reduced the burden on small businesses.

Since I have already discussed the first two points, I will focus on the third one.

Actually, the logic is simple. Reductions in air pollution can be achieved by regulating emissions from cars and businesses. The bill sets a level of reductions that must be achieved by the States. The more reduction from cars, the less reduction States have to impose upon small businesses. The cost of imposing a second phase of tailpipe standards is about the same as the cost of power windows on an automobile.

So instead of forcing small businesses to put on expensive controls, this amendment would have spread the cost among a larger group. That is why the National Federation of Independent Businesses supported the Wirth-Wilson amendment, and that is why I supported it.

I likewise supported the Daschle amendment requiring reformulated gasoline. The amendment, approved 60 to 39, requires cleaner gasoline through the use of alternative fuel additives such as ethanol, methanol, and other oxygenate compounds. It makes sense to use our abundant homegrown corn to make ethanol instead of using so much foreign oil.

Lastly, I supported the McCain amendment to provide incentives for solar and renewable energy development. The financial incentives would have encouraged investors to tap this underutilized source of energy.

TOXICS TITLE

Mr. President, the toxics section of this bill causes me the greatest concern. This title identifies 200 chemicals that are deemed harmful; it requires the EPA to control their emissions. In phase I, every factory or small business that emits as little as 10 tons of a listed chemical will be forced to install exceedingly expensive control technology. These controls are supposed to reduce emissions by 90 percent.

The bill also requires a second phase of controls if there is still a significant risk posed by the chemical. If there is a residual risk, businesses must put on even more controls or shut down. So businesses will be forced to put on additional controls despite the fact the emissions were reduced by 90 percent.

Want a few examples of the magnitude of the cost of this? A printing company could be forced to install $100,000 to $250,000 worth of control technology. A dry cleaner could face $75,000 in additional costs, auto body shops face $30,000 to $60,000 in costs, and even bakeries could be required to install emissions control equipment.

The implications for North Carolina are obvious: The furniture and textile industries will be particularly hard hit. Furniture companies employ 93,000 people in North Carolina. They may be forced to install incinerators. I asked our furniture manufacturers what this would cost them and what effect those additional costs would have on their business. One company told me that incinerators would cost them between $6 and $9 million, which will put the company out of business.

The textile industry likewise cannot afford such huge additional costs, particularly at a time when they are facing an ever-increasing level of textile imports. Many jobs are already being lost as a result of this deluge of textile imports. Cone Mills and Milliken have just announced that they were closing two plants.

So, contrary to the opinion of some in Congress, the textile industry cannot absorb huge additional capital expenditures—which is precisely what this bill will demand. It is estimated that control technology for one textile plant could cost $5 million or more.

Mr. President, all of this will translate into higher prices and lost jobs. That is the bottom line—jobs will be lost. And we do not even know if it is necessary.

CFC TITLE

I have great concern about this bill's CFC title that forces the United States to act unilaterally to phase out CFC's and HCFC's instead of working within the framework of international negotiations. The problem of substances depleting the Earth's stratospheric ozone layer requires a worldwide solution.

Would it not be more sensible to act in concert with the international community? It will do little good for the United States to eliminate these chemicals if other countries refuse to

do the same. Surely, this ill-advised provision will be revised in conference.

A final note: The Senate did agree to my amendment to delete the $75 million of the U.S. taxpayers money that otherwise would have been handed out to foreign countries. This little giveaway was slipped into the bill. Steve Phillips, my alert staffer, spotted it and recognized that it amounted to a bribe. So my amendment at least saved U.S. taxpayers the $75 million.

So, Mr. President, I will conclude as I began. I cannot in good conscience support this bill, recognizing that it is not fair to the working people of America who will unquestionably lose their jobs as a result of this legislation. It is not fair to the taxpayers because a bill costing far less than this one could achieve just about the same benefits for the environment. And it is not fair to the small business men and women of our country who will be driven into bankruptcy by the enormously expensive and unnecessary costs of compliance with this bill if it should become law.

I reiterate my hope that better and less costly legislation will emerge from the House of Representatives, and/or the House-Senate conferees.

Mr. President, my friend, Pat Buchanan, produced a column published yesterday that eloquently details the problems with this legislation. I ask unanimous consent that the relevant portion of his column be printed in the RECORD at the conclusion of my remarks.

I also ask unanimous consent that an article by Warren Brooks and a summary of the jobs at risk be printed in the RECORD at the conclusion of my remarks.

Mr. President, I yield the floor.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CLEAN AIR ACT: NO NATIONAL DEMAND NOR A PROVEN NEED

(By Patrick Buchanan)

This country is going to wind up paying a hellish price for President Bush's campaign pledge to be the environmental president; and Mr. Bush may end up paying a political price as well.

According to The Wall Street Journal, the acid rain provisions of the Clean Air Act alone will cost industry $4.1 billion—even though a federal study found that acid rain damages only 1 percent of the trees in the Northeast, and perhaps 750 lakes. For a few million bucks, every one of the lakes could be lined, with better results. Why, then, are we killing West Virginia's soft-coal industry?

Cost of the bill to industry, yearly, is estimated at $22 billion to $45 billion. American automakers would have to add $600 to the price of each car to cut an extra 1 percent from emissions blamed for smog.

How many jobs are at risk?

Sen. Robert Dole, Kansas Republican, put in the record a state-by-state analysis, Indiana could lose 200,000 jobs, Michigan, 220,000, Ohio, 326,000, Texas, 184,000, California, 330,000, Grand total: 3.8 million. If those numbers hold, we may be in for a nice recession.

Two decades ago, this country committed itself to clean air and water. We did the right thing; but the cost was great. In countless industries, our competitive edge was lost; millions of jobs moved offshore; productivity fell. Challenged today by West Germany and Japan, can we afford risking 4 million more jobs for marginal gains in air quality and fighting bugaboos like global warming and acid rain? Is anybody doing a cost-benefit analysis for the United States?

If this bill passes, writes columnist Warren Brookes, "it is Armageddon for the Bush administration. We can just kiss the U.S. goodbye. All the Reagan years down the drain. It's that serious."

How did we reach a point where the White House is terrified of the impact of a bill Mr. Bush proposed? The problem lies in politics.

Lacking in governing philosophy, the "vision thing" as he calls it, Mr. Bush is a textbook pragmatist, with a simple and honorable ambition: be a good president. But, when, in an age of ideology, a pragmatist is confronted by a millitant movement such as modern environmentalism, which identifies itself with the public interest and is backed up by the press, the natural disposition is to compromise .

There simply never was a national demand nor a proven national need for the Clean Air Act of 1990.

[From the Washington Times, Apr. 2, 1990]

COSTLY SMOG ON THE HILL

(By Warren Brookes)

Last week environmentalists groaned when the proposal by Sens. Pete Wilson, California Republican, and Timothy Wirth, Colorado Democrat, to impose California alternative fuels and tailpipe standards on the rest of the country by 1994 went down to crushing defeat.

Even, so, White House officials admit to this column the actual costs of the Senate/White House compromise will be from $12 billion to as much as $24 billion above its "veto-line" target of $22 billion. As one said, "we have a lot of work to do in the House and in conference to get back to that level."

In spite of this huge cost escalation, the administration is being savaged, as The Washington Post's columnist Mary McGrory wrote, for "selling out to the smog lobby." She said even Senate Majority Leader George Mitchell, Maine Democrat, "who has as good an environmental record as anyone in the Congress, has shown more solicitude about protecting the deal than protecting the environment."

She contrasted this pusillanimous approach with California's tough approach to ozone: "California isn't afraid of Detroit. The Senate trembles at the mention of Lee Iacocca's name," and "doesn't want to upset the boardrooms of the auto companies or the oil barons."

For a Washington scribe riding the $6 billion Metro system (at $80 dollars in federal taxpayer subsidy per ride), paying 20 cents more per gallon and $8 billion a year for less than 2 percent added emissions reduction looks cheap at half the price.

But for the rest of the nation, the Wilson/Wirth bill was $100 billions of maniacal madness. In the first place, all U.S. cities, except those in California, are in compliance with the Environmental Protection Agency's toughest-in-the-world ozone standards 99.4 percent of the time, while even California complies 94 percent of the time.

In the second place, in 1989 (data which the EPA refuses to release because it would destroy their bill) there were only 97 total exceedances nationwide in the 104 non-California cities. That's less than one per city. By contrast, there were 233 exceedances in the 10 California cities. (See Table.) The notion that the rest of the nation should spend $8 billion to keep Californians company is absurd.

Even without Wirth/Wilson, industry's Clean Air Working Group (CAWG) estimates the Senate "compromise" bill on surface ozone alone "would cost $14.3 billion more per year than the administration plan to achieve comparable ozone attainment levels."

In the third place, even those attainment levels represent extreme modeling bias. What does it mean to be in "non-attainment"? It means one measuring device located in the maximum possible exposure area of a city has to go over the EPA ozone standard for only one hour on each of two days in a year.

As a top Bush official said off the record, "Now isn't that silly? Here we are, restructuring whole industries with multibillion-dollar competitive effects on the strength of that kind of extreme, nonsensical measurement." Especially when U.S. pollution-control spending ($85 billion) is double that of the entire 12-nation European Community ($42 billion) and four times the equivalent per capita level of Great Britain.

The travesty of this is that while even the EPA admits the mathematical cancer risk of surface ozone is less than 1,100 a year, its own models use untested assumptions that overstate that risk at least 100 times. In test after test in which individuals have been made to jog in confined rooms filled with 10 times the compliance level of ozone, the worst documented health problems turn out to be 10 minutes of coughing, entirely reversible.

"We're talking about spending more money on reducing this infinitesimal risk by 2 percent, than we spend on the entire National Health Institutes budget. Does that make any sense?"

Yet that extreme approach to regulation is characteristic of the bill the Senate is now debating. In every area, the costs infinitely outweigh either health or environmental benefits. A number of even moderate senators are beginning to realize this.

That's why last Thursday Mr. Mitchell tried and failed to get unanimous consent to set tomorrow as the deadline for a final vote on the entire Clean Air bill and retaliated by ordering around-the-clock debate.

Complicating his task is solid evidence the compromise violates President Bush's veto line of $22 billion. Last Tuesday, CAWG's analysis by Dale Denny, former chairman of EPA's Air Pollution Research Committee, showed White House negotiators had only managed $8 billion from the original "Green Monster" (S. 1630) instead of the $20 billion they claimed.

Where industry had estimated the costs of the original bill at $54.6 billion, it now cost it at about $46.6 billion. Where the EPA had originally cost S. 1630 at $42 billion, its current cost even by its logic should still be about $35 billion.

That may explain why, as of Monday White House Chief Economic Adviser Michael Boskin had not responded to a March 2 letter from five Senate Republicans asking for an updated cost estimate on industry compliance costs, said to range up to $25 billion.

Another reason: Even if (as is reported) Mr. Boskin had caved in to the deliberately low-balled EPA cost estimates, he could not ignore last week's passage of the Wirth Cold Start Amendment on carbon monoxide which adds $2.5 billion to the compromise. That would automatically qualify the bill for Mr. Bush's veto.

Mr. Boskin's spokesman admitted "the letter and the estimates have been going through a number of revisions, even as we speak." Those revisions are said to show that even considering a low probability on the various "triggering" clauses in the compromise, the cost is 50 percent higher than the veto line, and "allowing reasonable probability, the cost could be double," one estimator admitted. Small wonder a top White House aide told us last week "the compromise was a disaster."

OZONE EXCEEDANCES

	1989	1985–89 average
Percentage of time out of attainment:		
104 non-California cities	0.3	0.7
10 California cities	6.3	7.2
Exceedances/year:		
104 non-California cities	97.0	267.0
Per city	.9	2.6
10 California cities:	233.0	268.0
Per city	23.3	26.8
Los Angeles	118.0	135.5

JOBS AT RISK IN NORTH CAROLINA BY THE PROPOSED CLEAN AIR ACT AMENDMENTS [1]

[1] Business Roundtable Study, February 1990, "An Analysis of Jobs-at-Risk and Job Losses Resulting from the Proposed Clean Air Act Amendments," Drs. Robert W. Hahn and A. Steger.

The PRESIDING OFFICER. The Senator from Illinois is recognized.

Mr. DIXON. Mr. President, I want to briefly address the bill. I understand my distinguished friend from Colorado has an amendment that the manager is ready to take. I would like to accommodate him, but then I would like to be heard briefly on the bill.

The PRESIDING OFFICER. The time on this amendment is controlled by the Senator from Kansas.

Mr. DIXON. Well, on the amendment it is.

Mr. DOLE. If there are no other speakers on the amendment, I would yield back any time.

The PRESIDING OFFICER. Is all time yield back on the amendment?

Mr. DIXON. Excuse me, the Senator from Kansas has not concluded his amendment? I apologize.

Mr. DOLE. This is one the Senator from Illinois is cosponsoring.

Mr. DIXON. I cosponsored that, and I support it enthusiastically. I yield the floor.

Mr. DOLE. I yield back the remainder of my time.

Mr. BAUCUS. I yield back the remainder of my time.

The PRESIDING OFFICER. If there be no further debate, the question is on agreeing to the amendment of the Senator from Kansas.

The amendment (No. 1445) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DIXON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DIXON. Mr. President, my friend from Colorado has now been kind enough to indicate that I can proceed, and I will proceed very briefly.

Mr. President, I rise today to let the record show the reasons influencing my vote on the Clean Air Act Amendments of 1990, S. 1630.

I have come to the floor more than half a dozen times to express my views on this bill as it went through its many changes. As the bill evolved, I called for balance and fairness, pointing out inequities in the acid rain title, and economic inefficiencies in the air toxics section. Among the amendments that I offered, along with Senator GORTON from Washington, was an amendment to preserve the competitiveness of U.S. businesses that will be injured as a result of the unilateral actions the United States will take to clean the air. That amendment failed, but the closeness of the vote revealed that many other Members are also concerned about the grave implications this bill will have for the U.S. economy. Perhaps it will take some time before the economic effect of this bill will be realized, but I assure you, this issue is not going away.

It is true that this bill has gone through many transformations which have helped make things less devastating for the industrial heartland. I want to make sure that my friends, the majority leaders, the floor managers, and others who labored to fix this bill, for about 1 month in a room just off this floor, know that I am profoundly grateful to them. But the truth is, the bill which was pulled off the floor shortly after being called up on January 23, was in need of major surgery. Unfortunately, in the acid rain section, what has been performed was only minor surgery.

Before I go on to describe the serious problems that remain in the acid rain title, I feel compelled to mention the areas where the compromise greatly improved the bill. First, I am pleased that the current law's definition of a major source in the ozone nonattainment section will be retained. This will permit small businesses to remain in operation while still attacking the real causes of urban smog.

Second, I think it was a wise decision to allow nonattainment sources to net

out increases and decreases in emissions following plant modernizations. This will actually encourage pollution-saving plant upgrades because businesses will not be penalized for making modifications.

Third, as a representative of a car manufacturing State, I am very pleased that a compromise was reached on second round tailpipe controls. Tying the second round of controls to whether there is a need for further controls for cities to reach attainment is an example of a balanced approach that I wish was the rule, rather than the exception, in this bill.

A fourth important change to the bill involves an assessment of residual risk under the air toxics title. I very much support the provisions requiring the National Academy of Sciences to review our risk assessment methodologies, and the subsequent revision of those methods based upon the findings of the academy's study. Because of the enoromous costs of controlling emissions, it is important that risk assessment attempt to approximate actual risk to real people, rather than theoretical risk to hypothetical persons.

Finally, a fifth, and very prudent, change to the bill in the air toxics section deals with the treatment of coke oven emissions. I support the compromise which allows coke ovens to achieve a lowest achievable emission rate in lieu of shutting down for failure to meet a theoretical residual risk standard. I support this not only because we manufacture a great deal of steel in Illinois, but because I feared for the entire national economy if we were to lose the ability to make steel in this country.

Mr. President, as I see it, these are the most significant changes to the first three titles of the bill; and I am very pleased that they have been made. Unfortunately, title IV, the acid rain title, was not sufficiently amended. The acid rain section is without doubt the most divisive issue in the bill, and I sincerely appreciate the leader's and the floor managers' willingness to listen to the problems this section creates for the Midwest. However, following months of regular meetings and an untold number of staff-hours devoted to finding an equitable solution for the Midwest, a fair compromise for the Midwest was not reached.

The Midwest received too little through the negotiating process, and perhaps that was all that we could achieve, considering the structure of the acid rain bill at the start of the negotiating process. The acid rain bill which was reported out of committee—a committee, I might add, that has not one member from the industrial Midwest, and not one member from a high-sulfur coal State—was so fatally flawed that we never had a chance of amending it into an equitable bill. The parameters given to us by the committee in terms of what changes would be acceptable were so restrictive that there was no possibility to make the significant changes.

I would like to elaborate on how both the administration's and the Senate committee's acid rain titles were designed to be against the Midwest from the start. As my colleagues know well by now, I am not pleased by the way the bill before us has allocated the costs among States for cleaning up our national acid rain problem. The bill seeks to get 90 percent of acid rain reductions in the first phase from just nine States. I suppose that would be fair if these nine States were responsible for all of the pollution, but that is not the case. In fact, these States contribute only 51 percent of the total sulphur-dioxide emissions.

It makes sense to seek the lowest cost emission reductions first, and I recognize that there is potential to make relatively more cost-efficient reductions in the nine States targeted by the bill. It does not make sense to me, however, that a great number of States will actually be allowed to increase their sulfur-dioxide utility emissions as a result of this bill. Mr. President, the following 18 States will be permitted to increase their utility emissions from 1980 levels, while my State is being asked to cleanup more than its proportionate share: Vermont, Connecticut, Delaware, Arizona, Louisiana, North Dakota, Kansas, Nebraska, Oklahoma, Montana, Wyoming, Colorado, New Mexico, Utah, Arkansas, Nevada, Oregon, and Texas. I note that 8 of these 18 States are represented on the committee that reported the bill, and that the 9 States required to make excess reductions are not represented on the committee.

Mr. President, the increases these States will be given amount to 910,000 tons—nearly 1 million tons worth of increases in annual emissions are being handed out to certain States, while nine States make extra reductions to pay for them. Not only is that infuriating to a Senator from one of those nine States, but it is also confounding that we would take these drastic measures to protect the environment with one hand, while the other hand partially wipes away our gains.

Fairness has not been achieved. Nine States will make a disproportionate share of this country's investment in acid rain control, and the other beneficiaries of this investment will not share in the cost. Illinois is being targeted for big reductions under the principle that polluters should pay. The problem with that is that only some polluters have been identified and asked to contribute to the solution. This bill violates the very polluter pay principle that its sponsors tout, and instead, a very conscious decision was made to place nearly all of the burden on nine targeted States in the Midwest.

Mr. President, someone unfamiliar with the facts would assume that the Midwest plants were our only—or even our biggest—source of sulfur and nitrogen oxides—but that is not the case. I would like to set the record straight with regard to this misperception. I have already mentioned the 18 States that will increase their utility sulfur emissions by nearly 1 million tons. It might be assumed that these States are being rewarded for being extraordinarily clean, but in fact, some of these States are among the biggest SO_2 polluters in the country. New Mexico, Louisiana, Arizona, and Texas rank sixth, fifth, second, and first in terms of industrial emissions of sulfur dioxide. Texas is the No. 1 industrial SO_2 polluter, and No. 3 overall sulfur polluter, and yet its utilities will be allowed to pump 333,000 more tons of sulfur into the air than they did in 1980. Texas' increased emissions will offset over one-half of the reductions required of my State. Not to single out the State of Texas, let me point to Arizona. In 1985 Arizona put 718,000 tons of sulfur in the air. As a result of this bill, Arizona will now put 786,000 tons into the air. Louisiana, the Nation's fifth biggest industrial SO_2 polluter, will increase its utility emissions by 86,000 tons annually. Mr. President, this bill is skewed.

Mr. President, I ask unanimous consent to have printed in the RECORD at the conclusion of my remarks a list of States that will increase their utility SO_2 emissions as a result of S. 1630.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. DIXON. My point is not to pick on any particular State. It is simply to show the absurdity of exempting a State like Texas, which has the largest overall emissions of nitrogen oxides—another constituent of acid rain—and which emits more sulfur dioxide than my own State of Illinois. It is not fair that certain polluting States should get a free ride on my State's investment to control a national problem. If we are going to target just a few of the emitters of acid rain precursors, then we must spread the burden nationally. This is no different than the savings and loan bailout. Very few States were actually responsible for the S&L crisis, yet the entire country paid to bail out the industry. We did this because the vitality of the thrift industry is important to the whole country—not just California or Texas. The whole country wants clean air, and we cannot expect my folks in Illinois and a few other States to pay the whole cost while other States get to increase their emissions.

This issue is also very much like a natural disaster that requires the country to rally to the aid of the injured for the sake of the whole. Environmentalism is like a wind that is sweeping through the country, and in most places it will be like a welcome breeze of fresh air. But in southern Illinois, this clean air bill is roaring in like Hurricane Hugo, leaving nothing but unemployment in its path. The economic devastation in towns like West Frankfort, Pinckneyville, Christopher, Zeigler, and Centralia will be so severe that we ought to be able to apply for Federal disaster assistance. The Nation's heart, and its pocketbook, went out to the unfortunate people who suffered the ravages of Hurricane Hugo and the San Francisco earthquake. I think that the American people, as a whole, feel that the Government is also obliged to assist people when it is itself responsible for causing local economic disaster. We, the Government, are about to cause economic devastation to a part of my State that will be just as severe, and more long term, than what Hugo did to the Southeastern States.

As a consequence of the inequity of the acid rain title, the State of Illinois predicts nearly 20,000 of my constituents might lose their coal mining and related jobs. Hundreds of thousands of my constituents could experience utility rate increases of 20 to 25 percent, which amounts to several hundred dollars per year. My constituents will do this to control a problem where the benefit will be realized in Canada and New England, while they continue to pay to subsidize cheap electric rates for customers of Northwestern hydroprojects, and cheap water rates for Western farm irrigation. I ask my colleagues, where is the justice here?

We offered proposals to share the cost of the cleanup through generation fees, excess emission fees, industrial emission fees, and through tax credits for those that were required to make disproportionate reductions. Any of these proposals would have restored a little bit of equity to the acid rain reduction plan the bill lays out, but we were defeated at every turn. I know the opponents of these amendments said that we should not be paying dirty States to clean up their problem. Well, what about all of the dirty States that are let off the hook entirely, some of which actually will increase their emissions? Should they not help share the burden? Mr. President, I am just trying to point out that if we are going to call some States dirty because their sulfur emissions happen to come from utilities, and call other States clean because their emissions come from industrial sources, we are going to have a fairness problem. There are many ways we could have helped to remedy this problem.

I have spoken of the attempts the Members representing the Midwest and Appalachia, with the able leadership of the President pro tempore, have made to do anything and everything we could possibly think of to try to prevent high-sulfur coal from going down the tubes. We tried cost sharing using an electrical generation fee, we tried cost sharing using an excess emissions fee, we tried fees on industrial emissions, and we have tried countless different permutations of the above—but we have been defeated at every turn. On the floor we tried to get some modest tax help—the same help the West got when it put on its scrubbers, but we were not permitted that help. We have tried everything possible to prevent legislating people out of a job, and we have been told by the majority of Members that we cannot do that. We have been told that all of the ways we could possibly keep high-sulfur coal miners in business will not be allowed. Then we came before the body, and we pleaded one more time for fairness. We said if we are going to make this conscious decision to put high-sulfur coal miners out of a job, then let us have the decency and humaneness to help these people back into a productive life by giving them some unemployment compensation. But, again, our efforts were defeated.

I have also mentioned the amendment Senator GORTON and I offered to level the playing field between U.S. businesses that must meet the tough new clean air laws, and their foreign competitors who are exempt. I have not yet mentioned the amendment I attempted to get accepted that would have required all diesel fuel to be desulfurized. It is terribly inefficient for us to create differentiation in the distillate fuel pool, and my amendment would have prevented that. Without my amendment, farmers, farm cooperatives, diesel distributors, and others will not have to keep separate storage tanks for on-road and off-road diesel. In addition, we will lost the environmental benefit of desulfurizing 60 percent of the distillate fuel market. The reason I was told the amendment could not be accepted was that home heating fuel, used primarily in the Northeast, might be increased by a few cents per gallon. I wish my constituents could pay only a few cents extra in their energy bills to clean up sulfur dioxide.

Perhaps, the crowning blow to all those who fought for a fair and commonsense bill came when the Senate defeated the amendment on Canadian utility plants. This amendment, which failed 57 to 40, would have required Canadian utilities to have acid rain controls as stringent as United States utilities before they could sell us electricity. How can I tell our coal miners that they no longer have a job because acid rain is hurting Canadian and Northeastern lakes, when Canada will not even clean up its own utilities?

So how I must cast my vote one way or another for this bill, knowing full well of the injustice it does to my State, but also being fully aware of the public's support for cleaner air. I do not think that I could, in good conscience, allow this bill, which is so unfair to my own State, to be enacted into law with my support. I thank God that more populous States, such as Illinois, have greater proportional representation in the House of Representatives, and that the House will get a crack at this bill before it is sent to the President. After a great deal of thoughtful deliberation, I have decided to vote against this bill. However, I believe that there is an opportunity for this bill to be corrected in the House, where the State of Illinois has 22 Representatives. Two of the Illinois Members, Congressmen Ed MADIGAN and TERRY BRUCE, sit on the committee with jurisdiction over the clean air bill. I think it is possible that these two very able men, and other Midwestern Representatives, will be successful in fashioning a bill that is more fair. I know that this bill will pass regardless of which way I vote. The way I cast my vote, therefore, is largely symbolic with respect to this particular legislation. What I hope to symbolize by voting against this bill is that ALAN DIXON wants and supports clean air, but he wants a fair, national, equitable bill.

I sincerely hope and pray that the House will adequately address the acid rain provisions of this bill—title IV—So that I can support the final conference report on this bill, and vote for a fair, decent, clean air bill.

EXHIBIT 1

STATES THAT WILL INCREASE THEIR UTILITY SO_2 EMISSIONS AS A RESULT OF S. 1630

[In tons]

	1980 emissions	2005 emissions	Increase in emissions
1. Texas	295,000	628,000	333,000
2. Arkansas	27,000	95,000	68,000
3. Louisiana	21,000	107,000	86,000
4. New Mexico	79,000	99,000	20,000
5. Vermont	0	1,000	1,000
6. Connecticut	29,000	76,000	47,000
7. Delaware	51,000	56,000	5,000
8. North Dakota	79,000	132,000	53,000
9. Kansas	102,000	118,000	16,000
10. New England	48,000	71,000	23,000
11. Oklahoma	45,000	104,000	59,000
12. Montana	23,000	32,000	9,000
13. Wyoming	128,000	153,000	25,000
14. Colorado	71,000	92,000	21,000
15. Utah	25,000	43,000	18,000
16. Arizona	84,000	148,000	64,000
17. Nevada	38,000	93,000	55,000
18. Oregon	4,000	11,000	7,000
Total			910,000

Mr. WIRTH addressed the Chair.

The PRESIDING OFFICER. The Senator from Colorado.

Mr. WIRTH. Mr. President, on March 7 of this year the Senate voted

in support of an amendment by my friend and distinguished colleague from Ohio, Senator GLENN. In doing so, the Senate preserved the existing Clean Air Act statute regarding regulation of radioactive emissions from facilities licensed by the Nuclear Regulatory Commission by the EPA and by State and local governments.

However, during the debate over this issue a troubling concern arose. I speak of the potential for States to abuse their Clean Air Act authority by barring the siting or the operation of commercial or government nuclear facilities for reasons that are not based on legitimate public health concerns.

Specifically, section 122(c) of the Clean Air Act allows States or local governments to set stricter radiation emission standards than set by the Environmental Protection Agency. Under this Clean Air Act authority, a State or political subdivision of that State is able to put into force laws or regulations which would discriminate against a particular facility, without affecting other types of radiation sources in that jurisdiction. In effect, this could result in a prohibition of the siting of a nuclear facility—or even the shutdown of an existing facility—even though the jurisdiction might at the same time accept far greater hazards from other radiation sources. I believe that this raises a troubling set of concerns about the national issue of nuclear facility siting that we must address.

I defer to the distinguished chairman, Senator GLENN, for his comments on this important issue.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. GLENN. Mr. President, my distinguished colleague from Colorado has, indeed, raised a very important matter. It is an unresolved matter which I, too, believe requires further clarification. As I stated in our earlier discussion on this issue, I have very consistently maintained, and I want to emphasize this, that States should not have veto power over nuclear facility siting.

However, as I also stated in my remarks regarding my amendment to preserve the existing Clean Air Act radionuclide authorities that have been in effect and have worked for 13 years, the Clean Air Act legislation is not the appropriate place to address this important structural issue of States rights. Moreover, the correspondence over this issue to the Senate by over 20 State attorneys general clearly shows the need to resolve this very complicated matter in dialog with the States. Unfortunately, such a dialog has not been adequately developed.

I repeat the fact that all we are doing is leaving in place existing law that has worked for 13 years. Do we have to protect against its misuse? Yes, but not on a crisis basis on this bill.

Thus, I would like to propose this specific issue be addressed in title V of S. 2006, the Department of Environment Act, which I and my colleagues have introduced and which President Bush fully supports.

This title of that particular bill creates a commission on improving environmental protection, chosen by the President and the congressional leadership, to examine and make recommendations on environmental management as well as the integration of Federal environmental laws and other authorities to improve the ability of the United States to protect the environment. This commission will look into overlap between many agencies, and this is a very clear-cut example of some of those overlapping authorities. It is clear that the issue of whether there is legitimate concern over the potential for abuse of States rights under the Clean Air Act for regulating radionuclides is a very important issue that this Commission should address.

I propose to draft very specific language for S. 2006 to require the Commission on Improving Environmental Protection to address the issue of State regulation of radionuclides, and I support the concern of my distinguished colleague from Colorado that States base their Clean Air Act radionuclide standards on credible scientific evidence and that those standards be demonstrated to substantially reduce the risk to public health and safety from radiation exposure.

The question of how we might effectively guarantee that States do not unjustly abuse the powers they have under the Clean Air Act is a difficult one. We do not want to end up with a proposal to deal with this theoretical issue that unnecessarily impedes what has been, overall, responsible and effective use of these powers by State and local Governments for 13 years. I believe that this issue requires more study, full hearings, and consultation with the States and other affected parties. I believe the Commission is better able to deal with the complexities inherent in this issue.

Mr. WIRTH. Mr. President, I thank my distinguished colleague for his consideration of this issue. So far, State and local governments have used their authorities under the Clean Air Act in a most responsible way. It is our expectation that they will, of course, continue to do so. If any State or local Government did abuse this authority, however, it is my hope that the Senate would give a high priority to examining that situation and that the Senator from Ohio will join me in seeing that this is done.

I thank the Senator and look forward to working with him to assure that the Commission embodied in title V of S. 2006 takes a serious look at this important issue.

I thank my distinguished colleague from Ohio.

Mr. GLENN. Mr. President, I congratulate my colleague for bringing this up. It is an area that does need to be straightened out. I think this particular bill at this particular time is not the place for it. I would agree with him completely, if there is any State or local Government that abuses this authority, we will give high priority to examining that situation, and I look forward to working together on it.

AMENDMENT NO. 1446 TO AMENDMENT NO. 1293

Mr. WIRTH. Mr. President, I have an amendment to the bill. I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment. Without objection, the pending amendment is laid aside.

The bill clerk read as follows:

The Senator from Colorado [Mr. WIRTH] proposes an amendment numbered 1446 to Amendment No. 1293.

Mr. WIRTH. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 183, after line 10, insert "(A)" and "(6)".

On page 184, after line 23, insert the following:

(B) The Governor of a State containing an area classified as a serious carbon monoxide nonattainment area under section 187(a) with a population of 250,000 or more, who requests that the standards specified in subparagraph (1)(A) apply in such area, may request that in addition to such standards a certification standard for carbon monoxide emissions apply to vehicles made available for purchase or placement into use in such area pursuant to subparagraphs (1)(B) and (1)(C). The certification standard requested pursuant to this paragraph shall not be less than 1.0 grams per mile for emissions of carbon monoxide from light duty vehicles and an equivalent level for emissions from light duty trucks. The Administrator shall approve a request for a certification standard under this paragraph if the Administrator determines that no fewer than two motor vehicle manufacturers are already producing vehicle models (not including conversions pursuant to subparagraph (1)(F)) for purchase or placement into use under paragraph (1) that meet the requested certification standard and that all other requirements of this paragraph are met. The credit provisions in subparagraph (1)(C) and the exemption provisions in subparagraph (1)(K) shall apply with respect to certification standards approved pursuant to this provision. The requirements of paragraph (4) shall not apply with respect to such certification standards. When a vehicle that operates on two kinds of fuels is certified for the purposes of this provision, it shall be certified on one fuel only after all traces of the other fuel that can practically be removed from the vehicle's fuel system have been removed.

Mr. WIRTH. Mr. President, my colleagues have heard me speak, probably to the point of being anesthetized, about the carbon monoxide problem that exists in high-altitude counties. We have had trouble working out how this problem, which is very different from the ozone problem in most cities, can be handled.

The amendment before us has been worked on, and I want to thank particularly my distinguished colleague from Michigan, Senator LEVIN, who probably knows as much or more about this bill as anybody on the floor, and my distinguished colleague from Louisiana [Mr. BREAUX], who has been sort of the father of the fleet program, for their support for this amendent.

The purpose of this amendment, very simply, is to allow the Governors of States with these concentrations of carbon monoxide, cities like Denver, Albuquerque, Phoenix, Las Vegas, Seattle, and Spokane, to opt into a fleet program if that fleet program will make a significant contribution to cleaning up carbon monoxide. The Administrator has to grant a request from the Governors, and that request will be approved by the Administrator, if vehicles are being built which meet the standard, if this can be done with natural gas, propane or electric vehicles and if test results have shown that methanol vehicles can meet the standards as well. If all of these additional cities opted into the program, it would represent less than a 10-percent increase in the size of the compromise program which already includes the largest American cities.

Again, I thank Senator LEVIN and Senator BREAUX for their help in this matter and thank the managers of the bill for their patience as I have been hammering on the door on carbon monoxide, and I think this will greatly help to resolve the problems that we have a high altitude.

I again thank Senator LEVIN and Senator BREAUX and the managers of the bill. I yield the floor.

ALTERNATIVE FUELS AMENDMENT

Mr. LEVIN. Mr. President, the Senator from Colorado has offered an amendment that would permit certain States with a serious carbon monoxide problem to request a carbon monoxide emissions standard for alternative fuel fleet vehicles sold in that area.

Some concern has been expressed that a carbon monoxide standard of 1.0-grams-per-mile may not be possible to meet even with the experimental fleet vehicles covered by this provision. I will not oppose the amendment as drafted because it does not mandate such a standard.

The Wirth amendment would not authorize the establishment of any carbon monoxide standard unless fleet vehicles already in production by at least two original equipment manufacturers meet that standard.

In other words, if some fleet vehicles already in production have a lower level of carbon monoxide emissions that other such vehicles, the amendment authorizes a State with a serious carbon monoxide problem to specify that they want the low carbon monoxide vehicles.

This amendment is narrowly drawn to apply only to States that opt in to the fleets program under paragraph (a)(6) of the alternative fuels provision—and only if all other requirements for opting in having been met.

Further, the carbon monoxide standard specified is a certification standard and would not apply to vehicles in customer use, as do other standards in this bill. In my view, these limitations provide adequate assurance that no carbon monoxide standard will be specified unless fleet vehicles are actually available that meet the standard.

Finally, this amendment is appropriate because it provides the only way that a State can adopt a carbon monoxide standard for the fleets program. As currently drafted, the opt in section of the Alternative Fuels Program authorizes States only to request the applicability of the emissions standards proscribed under paragraphs (1) and (2)—that is, hydrocarbons and toxics standards. This amendment would permit States with severe carbon monoxide problems to request carbon monoxide standards for fleet vehicles in appropriate circumstances.

On the basis of these understandings, Mr. President, I do not oppose the amendment proposed by Senator WIRTH.

Mr. CHAFEE. Mr. President, this amendment is agreeable to both managers of the bill. I am authorized to speak in behalf of the majority in connection with this amendment and also on behalf of the minority. This amendment is acceptable to both sides.

The PRESIDING OFFICER. Is there further debate?

Mr. BREAUX. Mr. President, it is not agreeable to me. It is not something that I think is essential or needed because I think the compromise that was reached after 20-some-odd days of discussion of this area and other areas of the bill with regard to provisions for ultraclean vehicles was an acceptable compromise the way it was put together in the bill.

I really think that the provisions of the bill before the Senate cover the concerns of the Senator from Colorado. I have always felt that when we dealt with this in the committee bill, on page 183, when we talked about the right of States to opt into these programs that were not mandated by the legislation, we covered situations such as that in Colorado, which are concerned about carbon monoxide.

The real working language of the legislation at that point states that the Governor of the State may request that any other area be brought in under these requirements for the fleet vehicles, both for Federal fleets and for private fleets and for other vehicles. The language in the substitute amendment says the administrator shall approve any such request where the Governor of the State has made a determination that inclusion of the area in the clean fuel vehicle program is appropriate and would result in progress toward attainment of any national ambient air quality standards.

The national ambient air quality standards include standards for CO. Therefore, if a Governor felt that his area was affected by carbon monoxide, that Governor under the existing bill, in my opinion, would be able to make a request and the administrator would, in fact, have to approve the request of that State, based on their concerns about carbon monoxide not being up to the national ambient air quality standards. It is my understanding that the Senator from Colorado is concerned that he wants his area to have the option to be included. It is included already because it is very clear that the national ambient air quality standards include standards for carbon monoxide as well as standards for the other pollutants we are trying to address.

The amendment apparently tries to limit the expanded activities to six cities in the United States, and those cities are above the population of 250,000.

I felt that it was not needed, it was not necessary. There is an awful lot of concern about trying to go too far, too fast at too great a cost, but I am not going to raise any objections. I think it is outside the scope. I have discussed it with the Senator from Colorado in great depth as well as with the Senator from Michigan. I think my points are accurate. I think my concerns are legitimate.

However, having said that, in the interest of trying to work toward a good clean air bill, I will not object or call for a vote.

Mr. SIMON. Mr. President, I ask unanimous consent that I could address the general nature of this bill for 5 minutes immediately after the adoption of this amendment.

Mr. CHAFEE addressed the Chair.

The PRESIDING OFFICER. Is there objection?

Mr. SYMMS. Reserving the right to object.

Mr. CHAFEE. I do not want to object but we do have some amendments we are trying to get through. We will be putting out a call for people to come forward with amendments. There will be a slot in there, I am sure, if the Senator could just hold back a while so that we can take care of this amendment and maybe some

others. Then there certainly will be time, I am sure.

Mr. SIMON. I would appreciate it, if there is objection to that, then I would ask my colleague from Colorado, who controls the time, if he would yield 5 minutes to me.

Mr. WIRTH. Excuse me?

Mr. SIMON. I ask my colleague from Colorado, who controls the time on this amendment, whether he would yield 5 minutes to me.

Mr. WIRTH. I do not control the time on this at all. The amendment is up for consideration to be voted on.

I have 1 hour on this. I am sorry. I forgot the previous unanimous consent. If we might, I think we ought to follow regular order.

The PRESIDING OFFICER (Mr. ROCKEFELLER). If the Chair could interrupt at this point, the Senator from Colorado does control the time and the Chair would appreciate it if Senators speaking could talk to each other through the Chair.

Mr. WIRTH. Mr. President, I appreciate the concerns of the Senator from Illinois but a lot of other people I know have been waiting as well. Perhaps we ought to follow the suggestion of the managers, follow the regular order on this, complete this amendment and then move, if we might, to further discussions. We have been waiting in line for this amendment for a good deal of time. Senator BREAUX and Senator LEVIN came over. Maybe we can move to the completion of the amendment, Mr. President.

Mr. SIMON. Mr. President, I do not want to prolong this thing. I am asking for a gesture that I conceded to a lot of other Members over the years. If I could again ask for 5 minutes immediately after the adoption of this amendment, I would appreciate it.

The PRESIDING OFFICER. Is there objection?

Mr. SYMMS. Reserving the right to object, Mr. President. I do not want to object, but I am willing to submit my amendment. It has been approved, and I will submit my remarks if I could just do it.

The PRESIDING OFFICER. Is there objection?

Hearing no objection, the Senator may proceed afterward.

Is all time yielded back?

Mr. WIRTH. I yield back the remaining time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 1446) was agreed to.

Mr. WIRTH. I move to reconsider the vote by which the amendment was agreed to.

Mr. CHAFEE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. SIMON. Mr. President, I have to say this is an issue that I have agonized on. It is not an easy issue. There are some real pluses to this bill.

First of all, the farmers in Illinois benefit, including benefiting by two amendments, one of which I was a principal sponsor of. The second thing is, obviously, the people in Illinois to get cleaner air. I have a long history of being active in that area. Back when I was a State legislator, I was the chief sponsor of the bill that put the teeth in the Illinois Air Pollution Control Act so that it could be enforced.

But I am concerned with what is happening to the Midwest, to the State that the Presiding Officer represents, and to the State of Illinois specifically. I guess what tipped the balance for me, frankly, was the rejection of the amendment offered today by Senator MCCLURE which said that if Canada is going to send down electricity here, Canada should comply with similar clean air regulations.

The rejection of that meant we were giving advantage to Canada coal miners over United States coal miners in the production of energy.

What concerns me about the bill, on the negative side—this is what is tipping me in the direction of voting against it, though I recognize it is going to pass, and I see my good friend from Texas here on the floor—is that the No. 1 polluter in terms of sulfur dioxide in this Nation today is the State of Texas, and under this bill 330,000 additional tons can be emitted into the air while the State of Ilinois, the State of West Virginia, and other States where we emit 51 percent totally of the sulfur dioxide, are asked to get rid of 90 percent of what is required. The injustice of that, and the injustice of that to coal miners in my State, to coal miners in other Midwest States, is just so gross that I cannot as this bill not stands vote for it.

Second, it means increases in utilities, and in the State of Illinois we already pay the second highest utility rates of any State in the Nation. To ask us to pay even higher utility rates as this bill does is not fair.

So my hope is the House will consider the amendments that we rejected here that would have been more fair to the Midwest.

I hope that, finally, we have a conference report that I can support. I would like nothing better. I am a strong advocate of clean air. But I am also a strong advocate of justice. This is really a bill that is not fair to Illinois, nor to the other States of the Midwest.

So reluctantly, I am going to cast a negative vote.

Mr. SYMMS addressed the Chair.

The PRESIDING OFFICER. The Senator from Idaho.

AMENDMENT NO. 1447 TO AMENDMENT NO. 1293

(Purpose: To clarify that area sources for which specific standards are applied shall be regulated under those standards and not under other tangential authorities)

Mr. SYMMS. Mr. President, I send an amendment to the desk on behalf of myself and Senator MCCLURE and ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, the pending amendment is set aside.

The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Idaho [Mr. SYMMS], for himself, and Mr. MCCLURE, purposes an amendment numbered 1447.

Mr. SYMMS. I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 253, after line 22, insert the following new subparagraph:

"(E) The Administrator shall not be required to conduct any review under this paragraph or promulgate emissions limitations under subsections (f) or (g) for any category or subcategory of area sources which is listed pursuant to subsection (c)(2) and for which an emissions standard is promulgated pursuant to subsection (d)(5).

On page 253, line 23, strike "(E)" and insert in lieu thereof "(F)".

Mr. SYMMS. Mr. President, my colleague from Idaho and I have sent to the desk an amendment. The amendment clarifies that small area sources listed in title III, which are given their own standards under the area source provisions found in subsection 112(d), are not then subject to the other residual risk requirements in subsections (f) and (g).

These area sources may include many very small businesses, including paint shops, printers, or drycleaners. The task of conducting an alternative demographic risk analysis, or absent that, complying with the 1-in-10,000 or 1-in-1,000,000 risk standards in subsection (f) would be impossible for such small businesses.

It is precisely for that reason that the bill before us contains authority for the Administrator to regulate such area sources with a unique standard of their own, that authority being continued in subsection (d)(5). A question remains, however, as to whether the bill is sufficiently clear that area sources regulated under (d)(5) are not then to be regulated under (f) and (g).

My amendment merely states this fact expressly: if an area source standard is issued by the Administrator under (d)(5), those sources are not then subject to (f) and (g).

I understand that the managers of the bill are willing to accept this clarification.

Mr. MCCLURE. I rise in support of the amendment of my colleague from

Idaho. A number of small businesses in our State, many of them representing small town drycleaners, have contacted me regarding this amendment. To them, this clarification is absolutely vital. As extremely small air toxics sources, they do not feel that the risks they pose to their community are large. And, when taken individually, they are not. Even according to the committee report on S. 1630, it is only when their emissions as an entire source category are combined that they even account for between 0.1 and 0.2 percent of all toxics emissions.

Consequently, to impose on each individual area source the same degree of regulation that you would impose on a major air toxic source is unmerited. The authority existing under subsection (d)(5) exists to give the Administrator another option for regulation of these sources. The amendment of my colleague from Idaho clarifies that this option is an "alternative to" and not "additive on top of" the emissions controls required under subsections (f) and (g).

Mr. SYMMS. I thank the leadership for accepting the amendment. It is my understanding they will.

Several Senators addressed the Chair.

The PRESIDING OFFICER. Is there further debate on the amendment?

Mr. MOYNIHAN. Mr. President, I would take a moment if I could to express my support for one particular amendment to title III of the bill that will be offered on behalf of, among others, the Senator from Idaho [Mr. SYMMS]. This amendment clarifies the application of the residual risk test for air toxics to area sources.

Area sources pose an especially difficult air toxics problem. EPA estimates that up to 80 percent of the risk from air toxics in urban air is from area sources. The sources are often numerous, small, and widely distributed throughout populated areas.

Historically, EPA has found it difficult to deal with these area sources. The traditional approach of promulgating emission standards or alternative designs and work practice standards were often inappropriate and cumbersome for regulating many of the area sources.

In preparing the clean air bill, the Environment and Public Works Committee tried to provide EPA with the tools needed to deal effectively with area source emissions of air toxics. Specifically, section 112(k) was added. This section also establishes the goal of reducing the risk from exposure to air toxics by 75-90 percent and mandates that the reductions must be achieved within 9 years from the date of enactment.

Area sources may also be controlled under section 112(c) using the more traditional approaches. However, area sources are required to use cost-effective and generally available control technology. This requirement was included to encourage the Administrator to adopt technology-based standards for area sources, whenever possible. Clearly, this requirement is less demanding than the maximum achievable control technology required for major point sources.

Neighborhood drycleaners are one example of an area source. Many of these small businesses use a toxic air pollutant, perchloroethylene or PERC, as their drycleaning solvent. In 1985, EPA published a Federal Register notice stating their intention to list PERC as a hazardous air pollutant and to develop emission standards under current law. The proposed emission standard for drycleaners includes controls on vent emissions and specifications of workplace practices to minimize evaporative losses.

The drycleaning industry has stated that they support EPA's latest draft proposal for a standard. This standard would probably control 50 percent of the emissions from older drycleaners, and up to 95 percent of the emissions from newer establishments. The standard for drycleaners should be implemented in a timely fashion: it should not be delayed for another 9 years.

So, it is appropriate to require technology-based standards for drycleaners as described under section 112(c). The problem which arises, however, is the residual risk test. EPA expects the residual risk for most drycleaners to be around 5 in 100,000. EPA would have to prepare a standard which would reduce the residual risk to less than 1 in 1,000,000 as a goal. Such a standard may not be possible—especially not with cost-effective and generally available control technology.

It was the committee's intent to provide the EPA Administrator with the tools to reduce ambient urban air toxics risk by at least 75-90 percent. It was the committee's intent to encourage the use of technology-based controls, even for sources like drycleaners. It was not the committee's intent to reshape the drycleaning industry. This technical amendment will make the wording of the bill conform with the committee's intent.

Mr. BAUCUS. Mr. President, we have examined the amendment offered by the Senator from Idaho and accept the amendment.

Mr. CHAFEE. Likewise, Mr. President, on this side, we have examined the amendment and approve of it.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Idaho.

The amendment (No. 1447) was agreed to.

Mr. SYMMS. I move to reconsider the vote by which the amendment was agreed to.

Mr. CHAFEE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Iowa.

AMENDMENT NO. 1448 TO AMENDMENT NO. 1293

Mr. HARKIN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, the pending amendment is set aside.

The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Iowa [Mr. HARKIN], for himself, and Mr. HATCH, proposes an amendment numbered 1448.

Mr. HARKIN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 230, line 2, after "sources" insert: "Notwithstanding the provisions of this paragraph, the Administrator shall not be required to aggregate the emissions of a research or laboratory facility with emissions of other units within a contiguous area and under common control, to determine whether such a research or laboratory facility is a major source, but such emissions shall be aggregated with such other units for purposes of determining whether such units are subject to regulation under subsections (f) and (g). For purposes of this section, research or laboratory facility means any stationary source whose primary purpose is to conduct research and development into new processes and products, provided that such source is operated under the close supervision of technically trained personnel, and does not produce a substantial quantity of products for commerical sale in commerce."

Mr. HARKIN. Mr. President, I offer this amendment on behalf of myself and Senator HATCH.

This amendment is very important to the competitiveness of American industry because it will assure that industry R&D efforts will not be unduly impeded by this bill. The ability of industry to innovate—to develop new and improved products or more efficient manufacturing processes—depends on research and development.

Under title III of S. 1630 as reported, research and development facilities located on the same plant site as major manufacturing facilities will be subject to the same control and permitting requirements as the manufacturing operations even though the actual emissions from the research facilities are insignificant and would not on their own require any regulation. This anomaly occurs because S. 1630 requires regulation of all sources at a major emitting facility.

39-059 O-91-11 (Pt. 5)

My amendment provides that R&D facilities will not be grouped with the manufacturing operations when EPA sets the technology standard, if the EPA Administrator so determines. Let me stress that this is not a mandatory exemption for R&D facilities. It leaves it up to the administrator's discretion. It merely assures that low emission research and development facilities that are located on the same site as a manufacturing facility will not be grouped with and regulated as part of the manufacturing facility. R&D facilities that qualify as major sources will be regulated as a separate category. Furthermore, the R&D emissions will be included in the aggregation of the plant sites' emissions to determine if the plant site requires further regulation under the residual risk provisions.

R&D facilities typically have a large number of process vents, and low and very changeable emissions. It would not be unusual for such a facility to have over 300 vents, all of which would have to be controlled and permitted, as the bill is now written. This may be a virtually impossible task since it would require that the operator anticipate what chemicals may be emitted over the course of the permit period and in what amounts.

Implementing the controls may be equally difficult. For example, a chemist may use a gallon of hydrochloric acid 1 day to cause a reaction in a process and the next day use a half gallon of a volatile organic chemical to purify the product of the reaction. The mandated control technology for the hydrochloric acid could be a scrubber while the control for the VOC might be a condenser or a carbon ventsorb. It is simply not feasible to change the controls as the research progresses. These unique characteristics must be taken into account if the EPA sets any standards for R&D facilities.

Mr. President, the solution to many of the problems this bill addresses ultimately depends upon the fruits of R&D.

A cure for cancer depends on R&D.

The development of less-polluting processes for making products depends on R&D.

More energy-efficient processes to lessen the emissions of pollutants that destroy the ozone depends on R&D.

Thus, it simply makes no sense to unnecessarily hamstring R&D by this bill. My amendment protects against delays in R&D while also assuring protection of public health concerns.

Mr. President, I am hopeful that, and I understand, the EPA has no objections to the amendment. I hope the managers will accept the amendment.

Mr. BAUCUS. Mr. President, I thank the Senator from Iowa.

This is a good amendment. We are prepared to accept it on this side.

Essentially, it takes into consideration the special circumstances where certain research and laboratory facilities, in order to fully conduct the research that is appropriate for them and the different emissions and consequences to be unnecessarily hamstrung by the bill, and this amendment recognizes that problem. It is a good-faith effort to clarify it, and we accept the amendment.

Mr. DURENBERGER. Mr. President, I think the Senator from Iowa has recognized some important sections of this particular part of the bill that need to be amended, and particularly the R&D section.

We support the amendment as well.

The PRESIDING OFFICER. Is there further debate on the amendment? If there be no further debate, the question is on agreeing to the amendment of the Senator from Iowa.

The amendment (No. 1448) was agreed to.

Mr. DURENBERGER. I move to reconsider the vote.

Mr. BAUCUS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1449 TO AMENDMENT NO. 1293

(Purpose: To provide for clean alternative fuels)

Mr. GRAMM. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The pending amendment is set aside. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Texas [Mr. GRAMM] proposes an amendment No. 1449 to amendment No. 1293.

Mr. GRAMM. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 154, strike lines 1 through 13, page 154 and insert in lieu thereof the following:

"(9) the term 'covered fleet operator' means any person who, on or after January 1, 1990, controls the operation of 20 or more fleet vehicles registered in, or primarily operating in, any area which has a 1988 ozone design value of 0.18 parts per million or greater or area for which a Governor requests coverage pursuant to section 212(a)(7); and who, on or after such date, provides a facility or facilities for the central refueling and maintenance of such vehicles in the normal course of business. For purposes of this paragraph—

"(i) the term person means and individual, corporation, partnership, association, State, municipality, and political subdivision of a State; and

"(ii) each motor vehicle operated by person controlling, controlled by or under common control with any person shall be treated, under regulations of the Administrator, as operated by a single person."; and

(b) on page 156, strike line 3 and all that follows through line 2, page 161 and insert in lieu thereof the following:

"(B) FEDERAL GOVERNMENT PROGRAM.—

"(i) For model years 1995 and 1996, 30 per centum, for model years 1997 and 1998, 60 per centum, and for model years after model year 1998, 90 per centum, of all light-duty vehicles and light-duty trucks purchased or leased for more than 120 days by any agency, department, instrumentality, or any quasi-or independent instrumentality of the United States and primarily operating in areas classified as serious, severe or extreme ozone nonattaintment areas under section 181(a), shall comply with the emissions standards prescribed under subparagraph (A).

"(ii) With respect to vehicle model years 1995 and 1996 only, the Administrator may include a lesser percentage of such vehicles under this subparagrpah if the Administrator determiens that the required percentage cannot be feasibly acheived or would impose unreasonable costs. For model years after 1998 the Administrator may require a percentage less than 90 per centum, but in no event less than 60 per centum, if the Administrator determines that a higher percentage would impose unreasonable costs, including costs associated with vehicle acquisition, fueling facilities, operation, maintenance, safety, reliability and resale value.

"(iii) REQUIRED OPERATION.—The Administrator of General Servcies, the Post Master General, and the Secretary of Defense with the concurrence of the Administrator, after consultation with the Secretary of Energy, shall, before October 1, 1993, issue regulations to ensure that a vehicle acquired pursuant to this subparagraph—

"(I) shall be supplied with appropriate clean alternative fuel in its primary area of operation, using commercially available fueling facilities to the maximum extent practicable; and

"(II) shall be operated exclusively on such fuel except when operated so as make it impracticable to obtain such fuel.

"(iv) CONSIDERATION.—

"(I) Funds appropriated for carrying out this subparagraph shall be applied on a priority basis, for expenditure first in areas of the United States which the Administrator determines have the most severe air pollution problems.

"(II) A Federal officer or agency responsible for deciding which types of clean alternative fuel vehicles to acquire in order to comply with this subparagraph shall consider as a factor in such decision which types of vehicles yield the greatest reduction in pollutants emitted per dollar spent.

"(v) COST OF VEHICLES TO FEDERAL AGENCY.—Notwithstanding the provisions of Section 211 of the Federal Property and Administrative Services Act of 1949, as amended, the Administrator of General Services shall not include the incremental costs of clean alternative fuel vehicles in the amount to be reimbursed by Federal agencies if the Administrator of General Services determines that appropriations provided pursuant to this subparagraph are sufficient to provide for the incremental cost of such vehicles over the cost of comparable conventional fueled vehicles.

"(vi) LIMITATIONS ON APPROPRIATIONS.—Funds appropriated pursuant to the authorization under this subparagraph shall be applicable only—

"(I) to the portion of the cost of acquisition, maintenance and operation of vehicles acquired under this subparagraph which ex-

ceeds the cost of acquisition, maintenance and operation of comparable conventional fueled vehicles;

"(II) to the portion of the costs of fuel storage and dispensing equipment atttributable to such vehicles which exceeds the costs for such purposes required for conventional fuel vehicles; and

"(III) to the portion of the costs of acquisition of clean alternative fuel vehicles which represents a reduction in revenue from the disposal of such vehicles as compared to revenue resulting from the disposal of comparable conventional fueled vehicles.

"(vii) VEHICLE COSTS.—The incremental cost of vehicles acquired under this subparagraph over the cost of comparable conventional fueled vehicles shall not be applied to any calculation with respect to a limitation under law on the maximum cost of individual vehicles which may be acquired by the United States.

"(viii) EXEMPTIONS.—The requirements of this subparagraph shall not apply to vehicles—

"(I) with respect to which the Secretary of Defense has certified to the Administrator that an exemption is needed based on national security consideration; or

"(II) used for law enforcement or emergency purposes.

"(ix) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as may be required to carry out the provisions of this subparagraph: *Provided, That* such sums as are appropriated for the Administrator of General Services pursuant to the authorization under this subparagraph shall be added to the General Supply Fund established in section 109 of the Federal Property and Administrative Services Act of 1949, as amended.

"(x) Nothing in this subparagraph shall be construed to require conversion of new or existing vehicles capable of operating on gasoline or diesel fuel only to a clean alternative fuel in order to achieve compliance with this subparagraph.".

Mr. GRAMM. Mr. President, as our colleagues are aware, GSA has a responsibility of operating the Federal fleet, and, under this bill, that Federal fleet will use methanol and natural gas. GSA is concerned that because of technical problems in the bill that they were not going to have the wherewithal to get the program off to a start.

I thank Rebecca A. Johnson, acting Deputy Administrator, for calling this to my attention. She has tried to alert the executive branch of government to the problem and she knew that my State produces clean-burning natural gas that will be used in the Federal fleet, and that I would be receptive.

I am happy to have an opportunity to offer this amendment, to be sure that GSA has the clear legislative mandate to get the Federal fleet up and running, using the alternative fuel that will help improve the environment.

I thank my colleagues for accepting the amendment.

Mr. BAUCUS. Mr. President, we do accept the amendment and urge its adoption.

Mr. DURENBERGER. Mr. President, on the Republican side, we also accept the amendment.

The PRESIDING OFFICER. Is there further debate?

Mr. BREAUX. Mr. President, I want to make a couple of comments on this amendment. It clarifies some very important questions that were raised with regard to how much the fleet provisions cover.

I think the Gramm amendment clearly points out that the Government should only have to acquire new vehicles, not to convert existing vehicles; it clarifies that the Federal Government is not covered by both the Federal fleet requirements and the private fleet programs; and it also clarifies that appropriated funds can be used by GSA to offset any loss of revenues that they may incur by selling used ultraclean vehicles. They may sell them at a loss, and they can used appropriated funds to offset any of those losses.

I congratulate the Senator for the amendment.

The PRESIDING OFFICER. Is there further debate on the amendment?

If there is no further debate, the question is on agreeing to the amendment of the Senator from Texas.

The amendment (No. 1449) was agreed to.

Mr. GRAMM. Mr. President, I move to reconsider the vote.

Mr. BAUCUS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. SPECTER addressed the Chair.

The PRESIDING OFFICER. The Senator from Pennsylvania.

AMENDMENT NO. 1450 TO AMENDMENT NO. 1293

Mr. SPECTER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The pending amendment is set aside. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Pennsylvania [Mr. SPECTER] proposes an amendment numbered 1450.

Mr. SPECTER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 343, line 6, strike "(3)" and insert in lieu thereof "(9)".

On page 283, line 12, after the period insert the following: "(iii) Notwithstanding the provisions of this section, reconstruction of any source of coke emissions qualifying for an extension shall not subject such source to emissions limitation under subsections (f) or (c) more stringent than those established in subparagraph (A)(ii) or subparagraph (B)(iii).".

On page 236, line 11, after "substance" insert "or, in case of listed pollutants without CAS numbers (other than coke oven emissions, mineral fibers, or polycylic organic matter) removing certain unique chemical substances."

On page 237, after line 20, insert the following:

"(D) The Administrator shall remove one or more unique chemical substances that contain a listed hazardous air pollutant not having a CAS number (other than coke oven emissions, mineral fibers, or polycyclic organic matter) upon a showing by the petitioner or on the Administrator's own determination that such unique chemical substances that contain the named chemical of such listed hazardous air pollutant meets the removal requirements of subparagraph (C). The Administrator must grant or deny a removal petition prior to promulgating any emission standards pursuant to subsection (d) applicable to any source category or subcategory of a listed hazardous air pollutant without a CAS number listed under subsection (b) for which a removal petition has been filed within ninety days of the enactment of this subparagraph.".

In page 241, after line 9, insert the following:

(8) Where the sole reason for the inclusion of a source category on the list required under this subsection is the emission of a unique chemical substance, the Administrator shall withdraw the source category from the list if it is appropriate because of action taken under either subparagraphs (C) or (D) of section (b)(3).

On page 253, after line 22, add the following:

"(E) In establishing standards for the control of unique chemical substances of listed pollutants without CAS numbers under subsections (f) or (c) the Administrator shall establish such standards with respect to the health and environmental effects of the substances actually emitted by sources and direct transformation byproducts of such emissions in the categories or subcategories.

On page 253, redesignate subparagraph (E) as (F).

Mr. SPECTER. Mr. President, this amendment deals with a number of categories relating to this bill which designates, on the list regulating toxic air pollutants, 17 broad categories of pollutant compounds referred to as pollutants without a CAS number.

The listing of these categories does not distinguish among many unique chemical substances included in them. Therefore, the bill will result in many substances being regulated by emission standards based on the risk posed by very different toxic pollutants within the same broad pollutant or compound category.

The amendment which I have submitted, which has been cleared on both sides, would remedy this defect by allowing a party to petition EPA to substitute one or more unique chemical substances that are the specific toxic pollutants of concern in place of broad categories.

Before EPA could promulgate emission standards for a specific substance within a broad category, EPA would have to grant or deny a substitution petition filed within 90 days of the bill's enactment.

The burden of proof would appropriately be on the petitioner. The proposed amendment would also require separate emission standards for unique chemical substances that pose risks that are significantly different from risks posed by other substances within the same pollutant or compound category.

This provision would ensure that unique chemical substances which are noncarcinogenic are regulated on the basis of the specific risks posed by the unique chemical substance and not on the basis of known carcinogen, or a severely toxic pollutant in the same pollutant or compound category.

Mr. President, I have taken the trouble to read this statement verbatim because it is so complicated. Ordinarily paraphrasing makes more sense. I would like at this point to compliment Edmund Morrison Ruffin, of my staff, who has done yeoman work, as have so many staffers in this Chamber during the course of January, February, March, and now into April.

The work that has been done on this bill is really profound as we have wrestled with an enormous number of very complicated subjects. I think this bill will successfully provide an enormous improvement of clean air quality and at the same time, being as specific as possible as this amendment does, provide that toxic concentrates that are so broad that they restrict commercial activity are only listed for compounds that threaten public health. That is the essential purpose of this amendment.

The PRESIDING OFFICER. The Senator from Minnesota.

Mr. DURENBERGER. Mr. President, I have had a variety of discussions over a fairly long period of time with the Senator from Pennsylvania with regard to the compounds issue and one other issue that has been a particular problem for him. This involves a process of what we call delisting, in other words, a process by which particular industries can petition EPA to get off of the list of toxic compounds.

Having spent a fair amount of time, as the Senator from Pennsylvania indicated, trying to do this right, I think he has found an appropriate way to produce a good regulatory process. So I would endorse and recommend the adoption of this amendment.

The PRESIDING OFFICER. Is there further debate?

Mr. SPECTER. Mr. President, I thank my distinguished colleague from Minnesota. This amendment has been the subject of considerable discussion, to put it mildly, and I think we have reached an accommodation that ensures public health is protected.

I urge adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 1450) was agreed to.

Mr. SPECTER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DURENBERGER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1451 TO AMENDMENT TO 1293

(Purpose: To clarify definition of reconstruction)

Mr. SPECTER. Mr. President, I send another amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, the pending amendment will be set aside and the clerk will state the pending amendment.

The bill clerk read as follows:

The Senator from Pennsylvania [Mr. SPECTER] proposes an amendment numbered 1451 to amendment No. 129.

Mr. SPECTER. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 283, line 12, after the period insert the following:

"(iii) Notwithstanding the provisions of this section, including paragraph (6)(D), reconstruction of any source of coke oven emissions qualifying for an extension shall not subject to such source to emissions limitations under subsections (f) or (g) more stringent than those established in subparagraph (A)(ii) or subparagraph (B)(iii).

Mr. SPECTER. Mr. President, the purpose of this amendment is to clarify provisions of the bill as they would relate to reconstruction of coke ovens. Coke ovens, given the nature of the technology, are often rebuilt as a matter of routine maintenance. It is possible that coke oven facilities which qualify for an extension under title III may have to be rebuilt after residual risk standards have been promulgated in 1997. This amendment clarifies that these coke ovens will not be subject to residual risk standards if they have to be rebuilt during the period of their extension in order to continue compliance with emissions limitations set forth as conditions for the extension. In addition, this amendment would eliminate an inconsistency in title III which would in effect dissuade the rebuilding of coke ovens for fear it would subject them to more stringent standards as they would relate to new sources, which they, in fact, are not.

Existing coke ovens on their current plant sites should be encouraged to be replaced so that the older, less clean ones will be eliminated. This amendment will allow compliance with the LAER standards in the bill without being exposed to the uncertainty of whether the rebuilt facilities would be in compliance with the law.

Mr. President, it is obvious that steel is a very, very vital factor in our economy, and has been for a long time. Doubtless, it will be for a long time in the future. And the coke ovens are a component of the steelmaking process which are necessary and, while some may hope that coke ovens will be eliminated—and perhaps the technology will advance to that state based on the facts at hand—we have to be very careful to maintain this important technology while guaranteeing clean air and providing for appropriate health standards. So long as these coke ovens do remain necessary for the production of steel, we have to anticipate these kinds of considerations.

This amendment, too, has been subject to very extensive analysis by the managers of the bill and I think accommodates the health concerns while allowing for the replacement of coke ovens. Replacement will make these facilities cleaner than keeping the older ones in operation. As long as the technology requires the use of such ovens, this is an appropriate course.

The PRESIDING OFFICER. The Senator from Minnesota.

Mr. DURENBERGER. Mr. President, this amendment, too, deals with the air toxics, title I of the this legislation, and a particular problem faced by the steel industry in this country. Most American steel comes from my home State, but I have rarely seen a coke oven like they have in Pennsylvania. That is the other end of the process. We generate the ore, and then it eventually gets combined with coke.

There is a real problem with the steel industry in this country that relates to the air toxics amendment. We are trying in a variety of ways to deal with it. One of the ways with the bipartisan agreement is to extend the time involved to meet the reduced sulfur standard on out to the year 2020. The Senator from Pennsylvania indicated the problem with the steel industry. They have to continually reconstruct these coke ovens. They are brick ovens of one kind or another subject to a lot of heat or pressure, and they are constantly in the process of rebuilding. The industry refers to that as maintenance rather than reconstruction, the problem being that if it were considered reconstruction, if it were considered that they had to meet source performance standards, then a lot of technological demands would fall on the industry before you ever got to the year 2020, which was our real concern as far as the industry is concerned.

But this particular amendment, again, very carefully and very appropriately crafted, provides that the extension would not be affected by the rebuilding of the coke oven so long as

the coke oven continues to meet the 3-percent test or whatever other tests are built in. So I compliment the Senator for his efforts, not just on behalf of the industry, but to make sure that this is a workable title I to the clean air bill. I recommend adoption of the amendment.

Mr. SPECTER. Mr. President, I thank my distinguished colleague from Minnesota for those comments. Again, I thank my own staff, Morrie Ruffin, and many other staffers, who worked so long because there has been much careful analysis to what has happened on these amendments being adopted.

The PRESIDING OFFICER. Is there further debate on the amendment?

Mr. DURENBERGER. I indicate that the majority side also approves the agreement on this amendment.

The PRESIDING OFFICER. If there is no further debate, the question is on agreeing to the amendment.

The amendment (No. 1451) was agreed to.

Mr. SPECTER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DURENBERGER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. SPECTER. Mr. President, I ask unanimous consent that Senator JOHNSTON be added as a cosponsor on the previous amendment, the one immediately prior to the amendment that has been just been adopted.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SPECTER. I thank the Chair.

Mr. BOSCHWITZ. Mr. President, I rise today to offer an amendment to the Clean Air Act. My amendment would authorize the U.S. Geological Survey to undertake a special study of the water quality of the Mississippi River from Lake Itasca to the Gulf of Mexico.

Many cities in the 10 States that border the river derive their water from it, and each year millions of people use the river for recreation, swimming, boating, fishing, and hunting. Yet, little is known about the quality of water which flows through this great river system, especially in the portion north of St. Louis.

Mr. President, I believe that the U.S. Geological Survey is well suited to do such an assessment of the quality of the Mississippi River. For the last 110 years it has provided the Nation with valuable and highly reliable information on natural resources.

My amendment would require the USGS to consult with the Environmental Protection Agency, the U.S. Fish and Wildlife Service, the U.S. Army Corps of Engineers, and the appropriate States, and report its findings and recommendations to Congress by December 1, 1992. It would also require the USGS, in consultation with the other agencies, to establish a framework for the study, which could be used as a model for future projects to enhance the water quality of the river. The amendment authorizes $2 million to complete the study.

Mr. President, this study will give us a better understanding of where potential and existing sources of pollution exist along the Mississippi River. I urge my colleagues to support my amendment, which will help us to determine what remedial steps are needed to protect the quality of the river's water.

Mr. BAUCUS. Mr. President, I agree with my good friend from Minnesota that such a comprehensive study of the contaminants in the Mississippi River is definitely needed. While the quality of our air certainly affects the river's water quality, and it makes sense to include this amendment in clean air legislation now before us, I believe it would be even more appropriate to include these provisions in the legislation authorizing projects for the U.S. Army Corps of Engineers. The Environment and Public Works Committee will soon be marking up the bill. I would note that the Committee on Energy and Natural Resources has jurisdiction over the U.S. Geological Survey and they may have concerns regarding this proposal.

Mr. BOSCHWITZ. I am well aware of that but I must tell my good friend from Montana that because surface waters are greatly impacted by the quality of the air, I believe that the clean air bill is an appropriate vehicle to attach my amendment. Also, as some of my colleagues have stated, this is a bill that is going to pass.

Mr. CHAFEE. I would like to join with my distinguished colleague from Montana in support of the amendment. But because of committee jurisdiction I would be concerned that the House might not agree to this amendment in the clean air conference.

Mr. BOSCHWITZ. I appreciate the support of the bill managers for my amendment. I am confident that the Senator would show the same persistence in conference that you have shown here on the Senate floor and that my amendment will survive. However, in an effort to make your job in conference a bit easier, I may be willing withdraw my amendment. But before I do, I want to be assured that my proposal will be offered to the legislation reauthorizing the U.S. Army Corps of Engineers.

Mr. CHAFEE. I will be happy to offer your Mississippi River water quality study as an amendment during the committee's markup.

Mr. BOSCHWITZ. Could one of you give me an estimate of when you plan to go to markup?

Mr. BAUCUS. I expect we will be marking up the bill later this spring and would expect that the bill will be passed and signed into law before the end of the 101st Congress.

Mr. BOSCHWITZ. Mr. President, with such assurances of action on my amendment, I will withdraw it from the Clean Air Act and look forward to working with my colleagues to see that it is added to the legislation reauthorizing the U.S. Army Corps of Engineers. I thank my colleagues for their cooperation.

Mr. JEFFORDS. Mr. President, in developing the alternative fuels program for this bill, we sent performance standards to ensure that many types of clean fuel would be able to compete. While other proposals may have prejudiced one fuel over another, this bill's program, as it relates to the passenger vehicle fleet, is designed to allow for vehicles powered by natural gas, propane, electricity, methanol, ethanol, reformulated gasoline, and any other fuel that can meet the performance standard.

We have set a performance standard that is designed to achieve, beginning with model year 1999, a 30-percent reduction in ozone-forming volatile organic compounds compared to the baseline vehicle, which is the tier I car proposed by the President in his original bill. According to EPA, this car, meeting a tailpipe exhaust standard of 0.25-gram-per-mile nonmethane hydrocarbons, having new evaporative controls and operating on 1989 certification gasoline is presently calculated to produce total in-use emissions of ozone-forming VOC's of 0.95 gram per vehicle mile.

So, in setting the performance standards for passenger vehicle fleets, we looked at the overall emissions from the vehicle and sought to reduce these by 30 percent from the President's tier I automobile, as defined by the administration bill. A conscious effort was made to allow reformulated gasoline to compete in the alternative fuels program. The 30-percent reduction target represents the best estimate of the maximum extent to which gasoline can be reformulated and used in vehicles with improved control technology to reduce smog-producing emissions, and achieves similar reductions as compared to the much discussed M85 vehicle.

There are no guarantees that a reformulated gasoline can be produced at a price that is competitive with the other fuels that are competing for this market, but in keeping with the fuel neutral nature of the plan, sponsors of the bill sought to prescribe a performance standard that is not biased toward or against any industry.

Now, although the program is designed to achieve a 30-percent reduction from the President's tier I auto-

mobile, the statutory standard expressed in the legislation calls for a limit on total in-use emissions of ozone-forming hydrocarbons of 0.66 gram per mile. Further, the Administrator may adjust this standard under certain conditions.

Mr. President, I wonder if I could address a couple of questions to Senator CHAFEE to clarify the intent of this provision. My understanding is that the 0.66 figure can be adjusted if EPA finds that the 0.95 figure misrepresents projected emissions from the baseline vehicle. Could the Senator comment on this point?

Mr. CHAFEE. The Senator is correct in pointing out that the emission standard can be adjusted. The 0.95 figure is a projection of emission levels from a car that has not been built, and incorporates refueling, evaporative running loss, and exhaust emissions. Because some have expressed concern that one or more of these estimates might be a little on the high side, and because we wanted to achieve the reduction targets of 30 percent, we have authorized the EPA Administrator to adjust the 0.66 figure if, upon review, the original 0.95 number is found to overstate the emission estimate of the baseline vehicle.

Mr. JEFFORDS. It is my understanding the EPA is confident of the 0.95 estimate and that adjustments should not result in a major changes in the phase II alternative fuels standard. Does the Senator from Rhode Island see this recalculation provision to be an attempt at an indirect mandate of one fuel or another.

Mr. CHAFEE. No; that is not the intent. The goal of the alternative fuels program is to get a 30-percent improvement over the President's tier I car. Combined with such minor technical modifications to the automobile as are necessary to maximize the emission reduction performance, reformulated gasoline should be able to compete. The 30-percent improvement should result in a significant air quality improvement, but is not designed to mandate any certain fuel.

Mr. JEFFORDS. Just one final clarifying point. Could the Senator describe what automobile will be used to certify that the alternative fuel VOC emission standards are met?

Mr. CHAFEE. It is my understanding that EPA will use vehicles of the same model year as apply to the alternative fuels program. These vehicles must meet all applicable exhaust, evaporative, refueling and running loss standards as specified in section 202.

Mr. JEFFORDS. I thank the Senator and yield the floor.

AMENDMENT NO. 1452 TO AMENDMENT 1293

(Purpose: To provide for a study by the Administrator of the Environmental Protection Agency on acid deposition in the western United States)

Mr. CHAFEE. Mr. President, on behalf of Senators MCCAIN and BOSCHWITZ, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Without objection the pending amendment will be sent aside. The clerk will report.

The bill clerk read as follows:

The Senator from Rhode Island [Mr. CHAFEE], for Mr. BOSCHWITZ (for himself, and Mr. MCCAIN), and Mr. WILSON, proposes an amendment numbered 1452 to amendment No. 1293.

Mr. CHAFEE. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 455 of the amendment (No. 1293), line 9, redesignate subsection (f) as subsection (e).

On page 455 of the amendment (No. 1293), between lines 8 and 9, insert the following new subsection:

(f)(1) The Administrator of the Environmental Protection Agency shall sponsor monitoring and research and submit to Congress annual and periodic assessment reports on—

(A) the occurrence and effects of acid deposition on surface waters located in that part of the United States west of the Mississippi River;

(B) the occurrence and effects of acid deposition on high elevation ecosystems (including forests, and surface waters); and

(C) the occurrence and effects of episodic acidification, particularly with respect to high elevation watersheds.

(2) The Administrator of the Environmental Protection Agency shall analyze data generated from the studies conducted under paragraph (1), data from the Western Lakes Survey and other appropriate research and utilize predictive modeling techniques that take into account the unique geographic, climatological, and atmospheric conditions which exist in the western United States to determine the potential occurrence and effects of acid deposition due to any projected increases in the emission of sulfur dioxide and nitrogen oxides in that part of the United States located west of the Mississippi River. The Task Force shall include the results of the project conducted under this paragraph in the reports issued to Congress under paragraph (1).

Mr. CHAFEE. Mr. President, this amendment would insure that the Western United States is included in the ongoing national program to monitor and study the potential occurrence and effect of acid deposition.

Mr. MCCAIN. Mr. President, my amendment will ensure that the Western United States is included in the ongoing national program to monitor and study the potential occurence and effect of acid deposition. I believe it has been accepted by the managers of the bill.

I want to compliment the leadership, the administration and the Senate for what I regard as a monumental accomplishment on the acid rain title of the Clean Air Act amendments. For many years we have been trying to formulate a comprehensive and fair national strategy to deal with this serious environmental threat. At long last, it appears we are about to accomplish that lofty, and some thought impossible, task.

The 10-million-ton reduction in acid rain pollutants provided for in this bill should finally arrest this insidious and complex problem so it can no longer take its toll on our forests, lakes, and streams. Nevertheless, this legislation wisely leaves in place a system to continue monitoring and studying acid deposition to ensure that the goals of the bill are met.

My amendment will see to it that this valuable program is not concentrated exclusively on the Northeastern portion of the country where in the past, the effects of acid deposition have been most acute. My legislation directs the Administrator to monitor and study the potential occurence and effects of acid deposition west of the Mississippi as well.

We have the expertise, as well as predictive computer models in place and at our disposal. We should not fail to apply these resources to assist the West. Under the acid rain agreement, the West has been given emission credits to accommodate increasing population growth and power demands in the region. We do not anticipate that environmental problems will result. But, my amendment will ensure that we keep a close eye on the situation. It will make sure that we have the most advanced and current data to help us determine if at any time there is a need to update State or National air quality policy to protect western resources.

Again, I thank the leadership for their support, and look forward to the rapid approval of this amendment and this landmark legislation.

The PRESIDING OFFICER. Is there further debate on the amendment?

Mr. CHAFEE. Mr. President, I am authorized to say, on behalf of the majority floor manager of the legislation, that he is supportive of this amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 1452) was agreed to.

Mr. CHAFEE. Mr. President, I move to reconsider the vote.

The PRESIDING OFFICER. Without objection, the motion to consider the vote and the motion to lay on the table is agreed to.

Mr. CHAFEE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAUCUS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GORE. Mr. President, I want to clarify a very narrow issue of concern to my State. It regards what happens under this amendment to a company that is currently building a new or modified production facility, pursuant to a valid construction permit, when it incurred no obligation under current law to obtain offsets as a condition of obtaining its construction permit.

Is it correct that the company would not be required under the provisions of the amendment to obtain offsets as a condition of being issued its operating permit?

Mr. BAUCUS. The Senator is correct. The company would not have to obtain offsets in order to be issued an operating permit under the amendment. The amendment makes no change in current law in this area.

Mr. GORE. Then it is also correct that if the company builds its facility consistent with the requirements of the construction permit which was issued prior to enactment of the amendment, the company may subsequently obtain an operating permit without meeting any additional obligations relating to obtaining offsets, even if the area in which the company is building its facility moves from a classification which did not require offsets to one which does?

Mr. BAUCUS. That is correct. In effect, the company is grandfathered under the amendment just as it would be under current law. So the company would not be required to obtain offsets as a condition of obtaining its operating permits even if the operating permit is applied for by the company after enactment of the amendment. Of course, the company may be subject to future requirements, as determined by the State, for reductions which may be needed to help the area meet its nonattainment percentage requirements.

Mr. GORE. I thank the Senator.

Mr. KOHL. Mr. President, very shortly the Senate will vote on final passage of S. 1630, a bill to update and improve the Nation's current clean air law. I am pleased to lend my support to this historic legislation. The bill will improve the Nation's air quality in three important ways: It will reduce the unhealthy urban smog which smothers our cities; it will reduce the amount of cancer-causing toxics which are released into the air each year; and it will reduce acid rain emissions which harm the public health and hurt our lakes and forests.

This is by no means a perfect bill. But it represents a compromise between several competing goals shared by the vast majority of people in this country. On one hand, the legislation makes significant strides toward improved public health and safety. It also goes a long way toward greater environmental protection. On the other hand, the bill recognizes the legitimate concerns of business and industry, which provide the jobs, products, and services that are vitally important to this country.

This legislation demonstrates that a healthy environment and a healthy economy are not incompatible. Quite the contrary, each affects the other, and each benefits the other. It makes no sense to have a strong economy and job growth, if the health and productivity of the American work force is seriously impaired by dirty, unhealthy air. What good is a healthy economy if we have unhealthy children? Equally true, it makes no sense to have clean air and a healthy environment, if millions of able-bodied Americans can't find jobs. There is a necessary and beneficial tradeoff between jobs and the public health, and I think this bill reflects that tradeoff.

There should be no question in anyone's mind that this bill imposes new costs on the U.S. economy. There will be a price to pay for cleaner air. But I believe those costs will be distributed as fairly and evenly as possible in most cases. I realize that the American consumers will end up paying the lion's share of the costs, but I think most people are willing to pay for a healthier environment. They realize that the costs of inaction will be higher for ourselves and for future generations. In other words, the dollars that we spend now to clean up the air will be a wise investment in the future economy of this Nation—dollars well spent, in my opinion.

I am especially pleased that several amendments which I offered are now part of this bill. My amendments were aimed at giving Wisconsin's businesses and utilities credit for their early and substantial investments in air pollution control. The State of Wisconsin has led the Nation in environmental protection measures, and our companies have already paid the costs of curbing dirty emissions. They should not be asked to pay twice, and my amendments will help to prevent that.

For example, one amendment will allow companies in Wisconsin to participate in a program designed to encourage and reward early reductions of toxic emissions. Provisions in the air toxics section of the bill would exempt toxic emitters from specific control technology requirements if they voluntarily reduce their overall toxic emissions by 90 percent between 1985 and 1993. Companies in Wisconsin, however, would have been unfairly excluded from this program because of new State regulations on toxic emissions. To correct that inequity, my amendment redefined the term "voluntary" so as to include State-mandated reductions of toxic emissions. The amendment has the effect of rewarding rather than punishing, States which move ahead of the Federal Government to protect the environment. That makes good environmental sense, plain and simple. Furthermore, the amendment makes the bill vastly more fair to business and industry in Wisconsin.

Another amendment which I offered, and which is now part of the bill, is designed to give utilities credit for early reductions in sulfur-dioxide emissions. Because of Wisconsin's landmark 1985 acid rain law, requiring statewide acid rain emissions to be reduced by 50 percent between 1980 and 1993, Wisconsin's utilities have already made significant reductions in their SO_2 emissions, and will continue to make improvements. In phase I of the acid rain control program, Wisconsin's utilities will be emitting SO_2 at a rate far below the standard required by this bill. My amendment allows utilities to get credit for being cleaner than necessary in phase I, which can be banked for later use in meeting the post-2000 emissions standards in phase II. The amendment simply insures that Wisconsin's industrial, commercial, and residential ratepayers will not be unfairly penalized because of the State's progressive acid rain law. In addition, by giving utilities nationwide an incentive to make early reductions, my amendment will help clear the air more quickly. That's good for the ratepayers, good for the public health, and good for the Nation's lakes and forests.

Another amendment which I offered to the acid rain section of the bill will insure that two of Wisconsin's newest and cleanest utility plants, Edgewater 5 in Sheboygan and Pleasant Prairie 2 in Kenosha, can be operated at maximum efficiency levels, thereby providing cheap, clean power to meet Wisconsin's electricity demands well into the next century. By helping to keep power rates lower, the amendent also encourages economic growth and job creation in the State.

A third amendment which I offered to the acid rain section of the bill, which was adopted earlier today, will help to keep utility rates lower for thousands fo people in rural Wisconsin who are served by Dairyland Power. My amendment will allow the utility to operate one of its plants, La Crosse/Genoa, at a higher capacity than the original bill would have allowed, to compensate for capacity lost when a nuclear plant was decommissioned.

In addition, I am pleased that this legislation protects Wisconsin's favorable 1989 court settlement, which requires the EPA to finally step in and force the State of Illinois to clean up the dirty emissions from Chicago. These unhealthy ozone-producing emissions have long plagued southeastern Wisconsin. I fought attempts by the administration to insert a provision in the bill which would have overturned Wisconsin's court victory, and let Chicago off the hook for at least another decade. Fortunately, those provisions were kept off this bill, keeping Chicago on track toward cleaner air in the near future. That's good for the health of Wisconsin residents. That's also good for businesses in Wisconsin, which have already shouldered an unfair cleanup burden in the Lake Michigan basin relative to their competitors in Illinois.

And most importantly, I am pleased that this legislation incorporates provisions which I authored to protect the Great Lakes from toxic contamination. These provisions authorize an expanded monitoring system to measure the amount of airborne toxics entering the Great Lakes. Other provisions in the bill which I have supported will require stricter controls over emissions of the seven most critical toxic pollutants which are poisoning the fish and birds in the Great Lakes. I feel very strongly about the need to protect the Great Lakes, and I'm satisfied that this legislation will make a real contribution to that effort.

In closing, I commend the Environment Committee members, and their staffs, as well as the Senate leadership, for steering this very complicated and controversial bill to final passage today in the Senate. Again, while it may not be perfect, this legislation is a great start in the right direction. Although I supported several unsuccessful attempts to strengthen the bill in key areas, I am satisfied that the final product represents a fair compromise and a vast improvement over current law. The time has come to end the debate, and get to work cleaning up the air. We owe it to ourselves, and we owe it to our children. I support this legislation, the Clean Air Act Amendments of 1989, and I urge all my colleagues in the Senate to vote in favor of final passage.

Mr. BAUCUS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LAUTENBERG. Mr. President, today, within, hopefully, an hour and a quarter, Senators are going to be voting on S. 1630, the Clean Air Act amendments of 1990. How we cast this vote will have as much impact on the public health of our citizens as any action the Senate takes this year.

Mr. President, it is no secret in this body that pressure from the administration—indeed, filibuster and veto threats—led to a process of compromise, and weakening of this legislation that I found very disappointing. When the so-called compromise came before the Senate, I committed myself to seeing if we could do better, to seeing if we could strengthen the bill, and bring it back closer to the bill that was approved by the Environment Committee. I felt, and I feel, that the bill before us could have, and should have, been stronger to get the job done.

However, Mr. President, the issue before us now is whether Americans are better off or worse off if we pass this legislation. The answer to that question is clear. If we defeat this bill, we reject significant revisions of existing law which overall are undoubtedly an improvement. If we defeat this bill, we end the process for strengthening the Clean Air Act. If we defeat this bill, the health and welfare of Americans will be adversely affected. So, although we could have done better, I will vote to approve this legislation. And I will endeavor in the period ahead to improve the bill further.

The bill that the Senate will pass this evening makes significant progress toward cleaning up our air. It has been 13 years since the Congress last addressed the Clean Air Act. Thirteen years of attempts to do better, to remove the poisons from our air, have been stalemated and blocked. People have suffered from polluted air and will continue to suffer unless we act. We should approve this legislation which will reduce some of these health threatening conditions. And then we must continue fighting to make a significant achievement even better if we can.

It was important to fight to give Americans the strongest possible bill, Mr. President. Our people want clear air, they want a safe environment, they want to pass on to future generations a habitable Earth with air fit to breathe. We owe it to them to take the steps necessary to accomplish that.

First, to approve this bill and then to fight on to see if we can improve it further. And, in my comments, Mr. President, I would like to call attention to the work of some very close friends and esteemed colleagues. Senator MAX BAUCUS, who has worked tirelessly, and who has worked to improve the bill to a condition that was fit, and yet passable, and I compliment him on his outstanding achievement.

I also, Mr. President, want to make note of the majority leader's efforts in this behalf. GEORGE MITCHELL served as executive assistant to Senator Ed Muskie, from 1962 to 1965. Senator Muskie is one known throughout our history as the one perhaps most interested in protecting our environment and cleaning up our air and cleaning our oceans. The first clean air bill, that was in 1970, had Senator Muskie as the father of that legislation.

So while we may have disagreed tactically, we may have disagreed strategically, but in the end, each of us wanted to protect the health and wellbeing of the American public and to give them as good a bill as we could get. So, Mr. President, I join in with my colleagues to encourage passage of this legislation.

Mr. President, this bill helps the state of our Nation's air in important ways. It includes provisions to address ozone and carbon monoxide nonattainment, airborne air toxics, acid rain, and depletion of our ozone layer. For the record, I would like to review some of these.

The clean air amendments contain requirements to help reduce levels of smog and carbon monoxide. Areas which have not yet attained health standards for ozone and carbon monoxide must achieve measurable progress until the standards for these pollutants are achieved. Service stations in ozone nonattainment areas will be required to install equipment on gasoline pumps to reduce emissions of ozone forming hydrocarbons. These areas in violation of ozone and carbon monoxide standards must also put into place vehicle inspection and maintenance programs to identify cars with faulty equipment that fails to do the job. And EPA will have to take action to control pollution that currently goes unchecked.

Of particular importance to New Jersey, is a provision I sponsored with others in the Northeast region to stop other States from sending their pollution into our States, harming the health of our residents and putting an impossible burden on our industries. This program would regulate pollutants transported from upwind States which make it impossible to achieve health standards. In New Jersey, the Department of Environmental Protection says that on some days even if we shut down the entire State, we would be in violation of some health standards because of pollution coming over from other States. These provisions would insist that even areas which are achieving health standards within the Northeast transport region would be required to adopt reasonably available and cost-effective controls.

The Clean Air Act amendments establish programs to reduce emissions of pollutants from cars and to slow down the rapid increase in vehicle miles traveled. They require the production of cleaner cars and cleaner

fuels although cars will not be as clean as they should or could be. Vehicle manufacturers must install systems to alert drivers when an emissions control system is malfunctioning. New transit buses, and centrally fueled and maintained fleet vehicles in urban areas, will have to use cleaner fuels such as natural gas to reduce emissions. And vehicles using diesel fuel will have to significantly reduce their emissions of toxic particulate emissions.

Mr. President, on an issue on which I have worked long and hard, and which is of particular importance to New Jersey, with its concentration of industrial sources, the amendments also retain large parts of the air toxics bill I sponsored, along with Senator DURENBERGER, and significantly improve current law. This legislation includes many of the important elements of the Environment and Public Works Committee bill to control the everyday release of toxic poisons into our air.

In this area, Mr. President, we are starting from ground zero. EPA regulates virtually no airborne toxic pollutants. The amendments retain the provisions of the Durenberger-Lautenberg legislation and will require significant reductions in these toxic airborne pollutants. They set up an ambitious schedule to require industrial facilities to install the maximum achievable control technology for stopping these toxics from entering the air we breathe. In the Senate version of the bill, EPA will have to control 191 of these toxic pollutants compared to the handful now regulated. To date, EPA has failed to use existing law to require controls on most of these facilities. And they require EPA to establish a program to monitor atmospheric deposition of toxics into the Great Lakes and, of special concern to New Jersey, into coastal waters.

In another important step, the amendments build on the Emergency Planning and Community Right-To-Know Program enacted in 1986 by establishing a program to reduce the threat of chemical accidents. This was also part of the legislation I originally introduced with Senator DURENBERGER in 1987 to address toxic and chemical accidents and was thoroughly debated during committee consideration of the bill. The bill creates an independent chemical safety board, like the National Transportation Safety Board, to ensure that chemical accidents will be subject to thorough investigations. In time, I am hopeful that this innovation will play as significant a role in preventing chemical catastrophes as the NTSB does in preventing airplane crashes or train wrecks.

Further, under this section of the bill, companies using threshold amounts of acutely hazardous substances would have to prepare hazard assessments. And EPA is charged with issuing regulations to actively prevent accidents.

Mr. President, in a real tribute to the Senate majority leader, who has been working to control acid rain since he entered the Senate, the amendments require controls on utilities and other sources to reduce acid rain significantly and protect the environment. And it includes the Environment and Public Works Committee provisions to phase out the use and production of chlorofluorocarbons and halons which destroy the ozone layer and contribute to global warming.

If I had my way, we would be approving a tougher bill. In some respects, which have been noted during the debate, this bill weakens existing law. In my judgment, in some respects it fails to take adequate enough steps to clean up our air over the next decades. Mr. President, this is not the kind of program where we can come back in a year or two and tinker with the provisions and requirements. This is an air program that will take us into the next century. For that reason, I felt it was imperative that we have the strongest, most forward looking bill we could write. To this end, I offered and supported a number of amendments which I felt more adequately addressed the environmental challenges we face as we enter the 21st century.

In a few cases, we prevailed. The Senate adopted the Gore-Lautenberg amendment to strengthen controls over airborne toxics. In other cases we fought to further reduce emissions from cars or to strike provisions which will make it harder to achieve health standards. We did not prevail, but these amendments received considerable support. I think they would have been successful if they could have been considered on their merits, without having to also take into account filibuster and veto threats issued by opponents of the bill and the administration.

Mr. President, we would have been stopped dead in our tracks months ago if it were not for the commitment, patience, and perseverance of the Senate majority leader, Senator MITCHELL, and the efforts of other committtee members, particularly Senators BAUCUS, CHAFEE, DURENBERGER, and LIEBERMAN. All of us have worked on various parts of this bill for years. Not until today have we been able to secure Senate approval for any strengthening of this landmark statute. I want to work with my colleagues in the months ahead to send to the President the strongest possible clean air bill.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. FOWLER. Mr. President, my amendment to establish a renewable energy technology reserve within the allowance system has been included in the block of allowance amendments proposed by the leadership and the bill managers earlier today. I believe this amendment will strengthen the Clean Air Act, speed reductions in air pollution, and set our country more firmly on a course toward greater compatibility between energy production and environmental protection, between our economic and ecological well-being.

This renewable allowances amendment, which I propose along with my colleagues Senators HATFIELD and MCCLURE, promotes clean air technology. It offers the only direct incentive supporting the stated purposes of this title: "To encourage the use of renewables and clean alternative technologies."

Senators MATSUNAGA, NUNN, REID, and BRYAN are also sponsors of this amendment, which has been endorsed by a coalition of environmental, public interest, and renewable energy groups. I ask unanimous consent that the letter of endorsement from these groups be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. EXPORT COUNCIL
FOR RENEWABLE ENERGY,
Arlington, VA, April 2, 1990.

Hon. WYCHE FOWLER, Jr.,
U.S. Senate, Washington, DC.

Subject: Fowler-Hatfield Renewable Energy Amendment to Title IV of Clean Air Act Amendments.

DEAR SENATOR FOWLER: The undersigned seven environmental, energy efficiency, renewable energy, and public interest associations would like to express their strongest support for the Fowler-Hatfield Renewable Energy Amendment to Title IV of the Clean Air Act Amendments.

The proposed amendment very wisely would grant allowances to operators/owners of affected electricity generating sources who, after January 1, 1991, generate electricity by means of solar, geothermal, biomass, or wind resources or who purchase electricity from a power source that uses these renewable forms of energy.

Very importantly, the Hatfield-Fowler proposal is very reasonable; it would not violate emissions "caps," and it will be restricted in its applications, since emissions credits will be based upon the lowest emitting coal- or oil-fired unit of the operating company that applies for the allowances.

This amendment would give utilities greater flexibility in complying with the requirements of S. 1630, the Clean Air Act Amendments, and it would provide an incentive for improving the environment at an earlier date than provided for in the bill.

The Fowler-Hatfield Amendment is a very reasonable proposal that will help reduce the precursors of acid rain and CO_2 emissions; therefore, we strongly endorse this amendment and would like to express our sincere appreciation to you and the Honorable Mark Hatfield for showing the foresight to introduce such a proposal.

Respectfuly yours,

American Wind Energy Association, Arlington, VA; Environmental and Energy Study Institute, Washington,

DC; Citizens Action, Washington, DC; National Wood Energy Association, Arlington, VA; Public Citizens, Washington, DC; Solar Energy Industries Association, Arlington, VA; Union of Concerned Scientists, Washington, DC.

Mr. FOWLER. It has taken years of hard work by the distinguished majority leader, members of the Committee on the Environment and Public Works and many other of our colleagues in the Senate to get to this point—and I commend the majority and minority leaders and the distinguished managers of this bill on their tireless efforts to bring this compromise to the floor.

The Clean Air Act of 1970 was a major step forward in dealing with a problem which was truly out of control at the time. That legislation raised awareness of the issue, raised the hopes of people who in many parts of the country had become accustomed to filthy air, raised their hopes that foul air was not a fact of life they had to put up with. Since that legislation was passed we have seen great improvements in some places, while great problem areas have remained. In spite of our legislative efforts through the act of 1970 and the amendments of 1977, nonattainment is increasing, not decreasing. The 101 cities affected represent the majority of the population of the United States.

We have always known that it is not easy or inexpensive to balance a growing and productive economy with clean air and a healthy climate for our citizens. That is nothing new, and that is why it has been such a struggle even to get to this point. However, a broad and growing consensus among our people for cleaner air and a cleaner environment does exist. It is time for us to decide if we are going to settle for air quality standards that expose our people and their children to a lifetime of danger. It is time to decide how long our sympathy for industries, individual businesses and cities that fail to meet existing air quality standards is going to extend.

I am pleased that the leadership compromise we have before us looks at this problem of clean air in its totality. That has not been easy to accomplish. Different States have different concerns. Different industries have different interests. We must avoid a narrow focus in order to maintain an overall balance.

I believe there is another important factor we must add to this already complicated equation. As we deliberate on how to get the cleanest air in the most cost-effective manner, we must not overlook the potential of conservation and renewable energy technologies that are inherently clean. We will not ever have to debate how to clean up their air pollution, or how we can pay to do that, because renewables simply do not have the adverse impacts of current energy sources. We are, of necessity, preoccupied with the immediate task of cleaning up existing air pollution caused by present power generation technologies. We can clean up what we've got, but we also need to look to the future, to the alternatives that emerging technologies will provide.

Renewable energy sources such as solar, wind, and geothermal are emissions free. This amendment will bring these and other renewable sources on line to lay a foundation for better air quality. That makes it the only allowances amendment predicated on air pollution prevention. That is because it is the only one that addresses the fundamental need to shift to cleaner technologies. Every other allowance proposal we are discussing assumes that utilities will continue to rely almost exclusively on fossil fuels.

Last year Congress passed and the President signed into law a bill I introduced, S. 488, authorizing legislation to restore research funds and encourage the development of renewable energy and energy efficiency technologies and bring them to market. We know how to harness energy from clean and virtually inexhaustible renewables; solar, photovoltaics, geothermal, wind, biomass.

Lets look at what else we have done legislatively to foster the promise of renewables. The Public Utility Regulatory Policies Act [PURPA] clarifies that private owner producers using renewable energy and natural gas have the right to connect to the utility grid and to be paid fair market prices for power. But that is about all it does. By no means could this be considered a subsidy for renewables.

The McCain amendment created a more stable regulatory environment for solar and renewable technologies in the long term. The Fowler-Hatfield amendment would complement the McCain amendment by providing utilities with an immediate, limited incentive to consider adopting renewable technologies.

I am offering this amendment to make renewables an integral part of our clean air policy, as well as our energy policy. Renewables can play a strong role in bringing our economic, energy and environmental interests together into a more beneficial correlation.

We are coming to grips, in the clean air legislation, with the costs of powering our economy and purifying the atmosphere. With a little foresight we can also see that renewable systems can easily and cost-effectively be integrated into the existing utility sector, increasing power supplies without increasing pollution.

Mr. President, my amendment encourages utilities to begin adopting renewable energy technologies right now. It would do that by offering incentive allowances, to utilities that buy or generate power from new renewable plants—including solar, wind, geothermal, and biomass—beginning in 1991. I specify that only sulfur dioxide reductions from new renewables plants are eligible—to prevent utilities from using this provision as a loophole, and gaining allowances by merely tapping existing renewables facilities on a temporary basis. Under this amendment, the utility can benefit only by promoting new and long-term investment in the renewables industry.

This very small reserve of allowances will help build more renewable sources into our energy infrastructure. And, what is more directly relevant to the legislation now on the floor, the creation of renewables allowances—that can be earned as early as 1991—will get the process of cleaning up our air started sooner.

Development of renewables is important to meet our energy needs. At the same time, these technologies, along with increased energy efficiency, can greatly reduce emissions of acid rain precursors and global warming gases. That makes them a potent weapon against catastrophic climate change, widespread respiratory disease, crop and forest damage, and the poisoning of our lakes and streams.

I hope that as we work on this clean air bill, and craft solutions to existing emissions problems, we will also have the foresight to recognize the potential of renewables for the energy and environmental needs of the future. I urge my colleagues to adopt this amendment, and give renewables the place they deserve in the fight for clean air.

AMENDMENT NO. 1453 TO AMENDMENT NO. 1293

Mr. BAUCUS. On behalf of Senator MITCHELL, I send to the desk the allowance allocation amendments which I described this morning and ask they be considered en bloc. I also ask unanimous consent Senator CHAFEE be added as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered. Without objection, the pending amendment is set aside and the clerk will report.

The assistant legislative clerk read as follows:

The Senator from Montana [Mr. BAUCUS], for Mr. MITCHELL, for himself, Mr. JOHNSTON, Mr. BREAUX, Mr. BINGAMAN, Mr. WIRTH, Mr. BRYAN, Mr. BOREN, Mr. BUMPERS, Mr. COCHRAN, Mr. PRYOR, Mr. BENTSEN, Mr. NICKLES, Mr. GRAMM, Mr. DOLE, Mrs. KASSEBAUM, Mr. MACK, Mr. GRAHAM, Mr. LEVIN, Mr. FOWLER, Mr. HATFIELD, Mr. MCCLURE, Mr. MATSUNAGA, and Mr. CHAFEE, proposes amendment numbered 1453 to amendment No. 1293.

Mr. BAUCUS. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 425, line 13, add the following:

"(3) Beginning January 1, 2010, the Administrator shall allocate and issue annually for each unit subject to the emissions limitation requirements of paragraph (1) allowances in an amount equal to the unit's baseline multiplied by 0.050 lbs/mmBtu, divided by 2000.".

At the end of section 405, insert the following new subsection:

"(j) CERTAIN MUNICIPALLY OWNED POWERPLANTS.—

"(1) After January 1, 2000, the Administrator shall allocate and issue annually for each existing municipally owned oil and gas-fired utility unit with nameplate capacity equal to, or less than, 40 MWe, the lesser of whose actual or allowable 1985 sulfur dioxide emission rate is less than 1.2 lbs/mmBtu, allowances in an amount equal to the product of the unit's annual fuel consumption on a Btu basis at a 60 per centum capacity factor multiplied by the lesser of its allowable 1985 emission rate or its actual 1985 emission rate, divided by 2000.

"(2) After January 1, 2000, the Administrator shall allocate and issue annually for each existing municipally owned coal-fired utility unit with nameplate capacity less than 25 MWe, the lesser of whose actual or allowable 1985 sulfur dioxide emission rate is less than 1.2 lbs/mmBtu, allowances in an amount equal to the product of the unit's annual fuel consumption on a Btu basis at a 60 per centum capacity factor multiplied by the lesser of its allowable 1985 emission rate or its actual 1985 emission rate, divided by 2000.".

On page 424, line 11, strike "." and insert in the following in lieu thereof: ": *Provided* That, after January 1, 2000, the Administrator shall allocate and issue for each unit with a nameplate capacity equal to, or greater than, 1000 MWe that commences, or has commenced commercial operation, on or after October 1, 1990, but not later than June 30, 1991, allowances in an amount equal to the product of the unit's annual fuel consumption, on a Btu basis, at a 65 per centum capacity factor multiplied by the lesser of 0.50 lbs/mmBtu or the unit's allowable sulfur dioxide emission rate (converted, if necessary, to pounds per mmBtu), divided by 2000.".

On page 413, in the item relating to "La Crosse/Genoa" in table A, strike "19,090" and insert in lieu thereof: "22,700".

On page 416, line 16, beginning with the word "In" strike all through line 24; on line 25, strike "paragraph (1), after" and insert in lieu thereof: "(2) After".

On page 425, after line 12, insert the following:

(i)(1) In addition to allowances allocated pursuant to this section, the Administrator shall allocate and issue annually allowances for each unit, subject to an emissions limitation requirement under this section, and located in a state that

(A) has experienced a growth in population in excess of 25 per centum between 1980 and 1988 according to State Population and Household Estimates, With Age, Sex, and Components of Change: 1981-1988 issued by the U.S. Department of Commerce, and

(B) had an installed capacity of more than 30,000,000 kw in 1988,

in an amount equal to the difference between (i) the number of allowances that would be allocated for the unit pursuant to the emissions limitation requirements of this section applicable to the unit adjusted to reflect the unit's annual average fuel consumption on a Btu basis of any three consecutive calendar years between 1980 and 1989 (inclusive) as elected by the owner or operator and (ii) the number of allowances allocated for the unit pursuant to the emissions limitation requirements of this section, provided that the number of allowances allocated and issued pursuant to this subsection shall not exceed an annual total of 40,000. If necessary to meeting the 40,000 allowance restriction imposed under this subsection the Administrator shall reduce, pro rata, the additional annual allowances allocated and issued to each unit under this subsection.

(2) After January 1, 2000, the Administrator shall allocate and issue annually for each unit subject to the emissions limitation requirements of subsection (b)(1), (A) the lesser of whose actual or allowable 1980 emissions rate has declined by 50 per centum or more as of the date of enactment of the Clean Air Act Amendments of 1989, (B) whose actual emissions rate is less than 1.2 lbs/mmBtu as of January 1, 2000, (C) which commenced operation after January 1, 1970 and (D) which is owned by a utility company whose combined kilowatt-hour sales have increased by more than 20 per centum between calendar year 1980 and the date of enactment of the Clean Air Act Amendments of 1989, allowances in an amount equal to the difference between (i) the number of allowances that would be allocated for the unit pursuant to the emissions limitation requirements of subsection (b)(1) adjusted to reflect the unit's annual average fuel consumption on a Btu basis for any three consecutive years between 1980 and 1989 (inclusive) as elected by the owner or operator and (ii) the number of allowances allocated for the unit pursuant to the emissions limitation requirements of subsection (b)(1), provided that the number of allowances allocated and issued pursuant to this paragraph shall not exceed an annual total of 5,000. If necessary to meeting the 5,000-allowance restriction imposed in the last clause of the preceding sentence the Administrator shall reduce, pro rata, the additional allowances allocated and issued to each unit pursuant to this paragraph.

At the end of section 402(1), following the word "Energy.", insert the following:

"For the purpose of this title, the term repowering shall also include any oil and/or gas-fired unit which has been awarded clean coal technology demonstration funding as of January 1, 1991, by the Department of Energy.".

On page 417, after line 10, insert the following:

"(4) After January 1, 2000 the Administrator shall allocate and issue annually for each unit subject to the emissons limitation requirements of paragraph (1) for which was issued a prohibition order or a proposed prohibition order (from burning oil), which unit subsequently converted to coal between January 1, 1980 and December 31, 1985, allowances equal to the difference between (A) the product of the unit's annual fuel consumption, on a Btu basis, at a 65 per centum capacity factor mutiplied by the lesser of its actual or allowable emissions rate during the first full calendar year after conversion, divided by 2,000, and (B) the number of allowances allocated for the unit pursuant to paragraph (1): *Provided,* That the number of allowances allocated and issued pursuant to this paragraph shall not exceed an annual total of 5,000. If necessary to meeting the restriction imposed in the preceding sentence the Administrator shall reduce, pro rata, the annual allowances allocated and issued for each unit under this paragraph."

On page 413 of the amendment, between Table A and line 1, insert the following new subsections:

"(e) RENEWABLE ENERGY TECHNOLOGY RESERVE.—(1) Notwithstanding any other provision of law, beginning on January 1, 1995, the Administrator may allocate from a Renewable Energy Technology Reserve a tonnage amount equal to a total of 80,000 tons of allowances for emissions of sulfur dioxide pursuant to section 403, in an annual amount to be determined by the Administrator subject to paragraph (2) to owners or operators of affected units at affected sources. Such allowances shall be allocated to an owner or operator described in this subparagraph in an amount calculated pursuant to paragraph (2) if, beginning on January 1, 1991, such owner or operator—

"(A) generates electricity at a new renewable energy power plant (as defined in paragraph (4)); or

"(B) purchases electric energy generated at a new renewable energy power plant owned or operated by any person other than the owner or operator of an affected source.

"(2) The Administrator shall allocate annual allowances from the Renewable Energy Technology Reserve pursuant to paragraph (1) as follows:

"(A) Any annual allowance allocated under this subparagraph shall be allocated in a tonnage amount equal to the number of kilowatt hours generated or purchased by the owner or operator (as described in paragraph (1)), multiplied by the emissions rate of the lowest emitting coal- or oil-fired unit of the operating company applying for the allowance (as defined by the Administrator in concurrence with the Secretary of Energy, and excluding any oil- and gas-fired unit with an average annual fuel consumption for calendar year 1985 that, on a Btu basis, exceeded 90 per cent consumption in the form of natural gas), divided by 2000. (The product of such calculation shall be divided by 100 to reflect the conversion rate between Btus and kilowatt hours, assuming a heat transfer of 10,000 Btus per kilowatt hour).

"(B) Allowances allocated under this paragraph shall be allocated in accordance with the order of receipt of applications for such allowances

"(3) Beginning on January 1, 2000, the Administrator shall deduct a tonnage amount equal to 8,000 tons per year for a period of 10 years from the annual allocation of allowances for units subject to the requirements of section 405 on a pro rata basis. Such allowances shall be deposited in the Renewable Energy Technology Reserve. The pro rata share for each such unit shall be calculated on the basis of the allowances that would be allocated pursuant to subsections (b)(1), (3) (4) and (5) (c)(1), (2) and (3); (d)(4); (e); (f); (g)(1), (2) and (4); (h)(1) and (3); (i); (j) and the equivalent of the emissions limitations requirements of paragraphs (5) and (6), of subsection (d); of section 405.

"(4) As used in this subsection, the term 'new renewable energy power plant' means a power plant for which construction is initiated on or after January 1, 1991, or which realizes a significant increase in energy output (as defined and determined by the Administrator, in concurrence with the Secretary of Energy) attributable to the replacement of renewable energy equipment

(as defined and determined by the Administrator, in concurrence with the Secretary of Energy) installed prior to January 1, 1991, by more efficient or productive renewable energy equipment (as determined by the Administrator in concurrence with the Secretary of Energy), and that operates primarily on energy derived from—

"(A) solar sources;

"(B) geothermal sources;

"(C) biomass sources; or

"(D) wind sources.

"(f) APPLICATION FOR ALLOWANCES FROM THE RENEWABLE ENERGY TECHNOLOGY RESERVE.—The owner or operator of an affected unit under subsection (a) may submit an application to the Administrator at any time after January 1, 1991, for allowances from the Renewable Energy Technology Reserve to be calculated using the formula described in subparagraph (A) of subsection (e)(2). Such application shall include—

"(1) the number of kilowatt hours the affected units generated or purchased from a new renewable energy power plant as defined in subsection (e)(4); and

"(2) documentation of kilowatt hours generated or purchased as recorded in a certified meter reading from the point of entry into the utility grid, or in an executed sales contract.

"(g) ACTION BY ADMINISTRATOR.—(1) The Administrator, in consultation with the Secretary of Energy, shall approve or disapprove an application submitted pursuant to subsection (f) not later that 6 months after receipt of the application. If an application proposal does not meet the requirements of subsection (f), the Administrator shall disapprove the application.

"(2) If the Administrator approves an application submitted pursuant to subsection (f), the Administrator shall notify the applicant in writing of the number of allowances to be received pursuant to this paragraph. On or after January 1, 1995, the Administrator shall allocate allowances for the affected units in accordance with the amount specified in the written notification described in this subparagraph upon written request by the owner or operator of the affected units at the affected source.

Mr. BAUCUS. Mr. President, this is the allowance package I described earlier this morning. It is intended to smooth out small inequities and inefficiencies in the generic allocation system and relieve hardships for certain specific plants. The package will reallocate approximately 71,000 allowances per year between the year 2000 and 2010. After the year 2010, this amendment package will reallocate approximately 123,000 allowances per year.

The more precise amendments offered by individual Senators are as follows:

The Johnston-Breaux amendment, cosponsored by 10 additional Senators, will allocate allowances to gas-burning plants beginning in the year 2010. This is intended to implement the commitment made during the original bipartisan negotiations to provide gas-burning units facing curtailments to operate during curtailment or interruptions in supply.

As I said, the allocation would end in the year 2010. Under the compromise, the allocation would end in 2010. Under the amendment that is included in this package, the allocation will continue past the year 2010. These allocations will be made to gas plants in about 22 States. Therein, the generic nature of this amendment. it would have no impact on allowance allocations between 2000 and 2010, but it would reallocate 60,000 allowances beginning after the year 2010.

Another amendment included in the package is the Wirth-Dole amendment. This amendment would make small additional allocations to small units; that is, those that generate under 40 megawatts for oil and gas or under 25 megawatts for coal. These units would also have to be municipally owned and they would have to be clean emitters. This amendment would allocate approximately 10,000 allowances beginning in the year 2000.

The purpose of this amendment is to assist financially limited utility systems that would not have the opportunity to bank allowances that other systems have under the compromise allocation.

Another portion of this package amendment is the amendment offered by Senators FOWLER and HATFIELD. This would create a special incentive allocation of allowances to utilities that use renewable energy. The purpose is to use allowances to induce utilities to turn to various renewable options in order to encourage our country to move in that direction.

The substitute amendment before the Senate provides a total of 3.5 million allowances as bonuses or incentives for using scrubbing as a method for reducing SO_2. Therefore, this Fowler amendment, as part of the package, would be in a sense an offset, using a modest total of 8,000 allowances per year to create incentives to use renewables.

In addition, the package includes the Graham-Mack amendment. This provision would make a special allocation of allowances to the State of Florida because of the unique growth pressures, population pressures, and energy pressures in that State. We feel that Florida should have additional allowances to accommodate that growth. The amendment would provide 43,000 annual allowances and reallocated beginning the year 2000.

There is a unique part of this package I might touch on now, Mr. President. That is the inclusion of roughly 5,000 allowances that were proposed by Senator LEVIN. He is offering an amendment to include 5,000 allowances intended to deal with this particular problem that utilities face with unusually high growth and demand.

This is an amendment that the Senator from Michigan earlier sought to be included. It was on an earlier list. It was his understanding that there would be no plant-specific reallocation allowance amendments either. He dropped his amendment and did not push it.

Now the Senate in this package is considering plant-specific amendments. The managers thought it only fair and equitable that Senator LEVIN be allowed to pursue his 5,000 reallocation allowance as well. We have included it, consequently, in the package.

The package also includes the amendment offered by Senator KOHL from Wisconsin which makes a small additional allocation of allowances between the year 1995 and 2000 only, just for that 5-year period, to a unit owned by a co-op system that has suffered the decommissioning of a nuclear plant and had to shift to coal. This provision would have no impact on allowances after the year 2000.

Finally, the package includes a special allocation sought by Senators METZENBAUM and GLENN for plants involved in nuclear to coal conversion in the State of Ohio. The package would, therefore, reallocate 7,500 allowances for that particular plant beginning the year 2000.

This is somewhat complicated, Mr. President. All of these provisions have been intensely negotiated over the last several days; indeed, the last several weeks.

I believe the package which the managers are now offering is a good compromise; it is a good consensus. At the appropriate point, I urge the Senate to adopt this reallocation. It will help eliminate and alleviate some inequities that otherwise would occur.

The PRESIDING OFFICER. Is there further debate on the package amendment? The Senator from Rhode Island.

Mr. CHAFEE. Mr. President, the contents of the amendment have been outlined very skillfully and accurately by the distinguished majority floor manager of this legislation.

I would like to pay tribute to the senior Senator from New Mexico, Senator DOMENICI, who has worked so hard to this whole matter of allowances. I might say I do not think there is a Senator in this body who knows more about the allowance situation than the senior Senator from New Mexico. He has taken a special interest in it, not because it deals necessarily with his State, although he recognized right from the beginning that any time we give out these allowances, it affects others in one manner or another. It has to come from somewhere because, obviously, we have a cap and we continue the cap. So the more these allowances, the less there is for the others.

I point out that the total allowances in a year are 8.9 million. So this amendment has barely affected those in the post-2010 era. There will be about 130,000 allowances affected here, which is about 1.5 percent of the

total acid rain allowances that we have available.

So, Mr. President, I think it is a good amendment. We have tried to be fair in taking care of those who, through a variety of circumstances, have special requirements, and I believe this is a just result. Mr. President, I join in urging the acceptance of this amendment.

The PRESIDING OFFICER. Is there further debate on the amendment? The Senator from Florida.

Mr. GRAHAM. Mr. President, I do not wish to prolong the vote on this matter, but I wish to extend my personal thanks to Senator BAUCUS, to Senator CHAFEE, Senator DOMENICI, Senator GRAMM, and others who have worked on this. The issue, as it relates to my State, which Senator BAUCUS briefly outlined, is the one that is occasioned by the rapid growth and the increased demand for utility service which that growth will cause.

I very much appreciate the understanding of that issue and the very appropriate response which is contained in this amendment. I thank my colleagues for their understanding, and I welcome them either on a temporary or permanent basis to our State with confidence that they will be provided all of the pleasures that come with adequate electrical generation.

The PRESIDING OFFICER. Is there further debate on the amendment?

Mr. BAUCUS. Mr. President, I, at this point want to pay particularly strong regards and thanks to all Senators who were involved in these negotiations. Senators WIRTH, DOLE, FOWLER, GRAHAM, MACK, KOHL, METZENBAUM, GLENN, LEVIN, and others very vigorously pressed their amendments from their particular points of view, in some cases in behalf of certain plants that were unfairly disadvantaged on behalf of generic changes.

At the same time, they were not all successful in getting all of the allowance reallocations requested very simply because we are dealing with a zero sum game. That is, we have a cap on total allowances, and so far every amendment that reallocates allowances, there are allowances that are taken away somewhere else.

We are dealing now with a total of approximately 130,000 allowances, which is not a major amount. It amounts to slightly over 1 percent of the allowances involved. But for every amendment that passes that reallocates allowances in behalf of a particular State or system or plant, those allowances are taken away from somewhere else. Therein lies the rub.

Consequently, all Senators involved, including the Senators I mentioned, as well as those, including myself and others, who represent other parts of the country that would have allowances taken away from them, worked very diligently, very much in good faith, and I want to very strongly thank those Senators for those good-faith efforts. There was no acrimony, no bitterness. Everyone worked diligently.

I see the Senator from Florida. He worked very diligently. The people of the State of Florida have a very strong advocate in the Senator from Florida. I must say, Senator GRAHAM, as well as Senator MACK, worked very hard. They represented their States very well, as do other Senators who were involved in these negotiations.

Mr. CHAFEE. Mr. President, I would like to join in commending those Senators who showed forbearance. They were vigorous in behalf of their States, but nonetheless recognized we had to reach an agreement.

Previously, I mentioned the distinguished senior Senator from New Mexico, who worked very, very hard on this and was a key factor in arriving at this conclusion. I would also like to mention Senator GRAMM from Texas, who was also deeply involved, because he is knowledgeable of this particular area, the allowances, and he put a good deal of time in on it. His contributions were extremely constructive. Also, Senator BOND from Missouri was very, very active and helpful in this area.

The PRESIDING OFFICER. Who yields time?

Mr. WIRTH. Mr. President, will the distinguished manager of the legislation yield me 2 minutes?

The PRESIDING OFFICER (Mr. BRYAN). The question propounded by the Senator is how much time is yielded to him.

Mr. BAUCUS. Mr. President, I yield 2 minutes to the Senator from Colorado.

Mr. WIRTH. Mr. President, the Wirth-Dole amendment is also cosponsored by Senators ARMSTRONG and KASSEBAUM. It is intended to correct an oversight in the bill.

The bill as it stands provides acid rain allowances to powerplants based on their 1985 emissions rate and the amount of power they generated in the years 1985-87.

Unfortunately, there are a number of small, clean powerplants operated by municipal utilities in a number of States across the country which aren't easily put into this formula.

These plants provide backup power for municipal utilities whose primary source of power is the wholesale power market, but who need their own generation capacity to meet peak loads or to provide backup for times when power is not available on the wholesale market.

Many of these plants did not run at all in 1985. They are not required to have the same sort of analysis of their emissions rates that larger plants are. Many of these plants run very intermittently, in ways that make calculating a baseline for them virtually impossible.

Yet without allowances, these plants would not be able to be used at all beyond the year 2000. It would, I believe, be counter to the purposes and fairness of the bill not to see that these small, clean powerplants get allowances which will enable them to continue to operate.

The amendment proposes to direct the Administrator to provide allowances to units owned by municipalities which are smaller than 40 megawatts—for oil-and gas-fired units—or smaller than 25 megawatts—for coal-fired units. This only applies to units emitting less than 1.2 lbs/mm Btu of sulfur dioxide.

These are all very small units. New baseload powerplants are commonly 1,000 megawatt plants.

Each of the qualifying units under this amendment would receive allowances equal to the lesser of first, its actual 1985 emissions rate times the fuel consumption of the unit at a 60-percent capacity factor, or second, its allowable—SIP imposed—emissions rate times its fuel consumption at a 60-percent capacity factor.

The EPA estimates that this will result in allocation of about 10,000 tons of allowances to these utilities. That is about one-tenth of 1 percent of the allowances.

Without these allowances, small municipal utilities like the Arkansas River Power Authority, which supplies power to towns in southeast Colorado, will not be able to continue to do their job—to provide reasonably priced electricity to the communities they serve.

This utility, and others like it, should not be punished by this bill. They are operating clean plants. They are operating those plants in a way that most efficiently serves their customers.

Mr. President, I thank Senators DOLE, KASSEBAUM, and ARMSTRONG for their help on this issue, and I thank the managers of the bill on both sides of the aisle for supporting our amendment. I think it is a reasonable accommodation of consequences of the bill that the drafters had not taken into account, and I urge my colleagues to support it.

I thank the managers of the bill. I thank the distinguished Senator for his help.

The PRESIDING OFFICER. Who seeks recognition?

Mr. BAUCUS. Mr. President, I believe we are prepared to vote on the amendment.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum having been suggested, the clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAUCUS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, before I proceed I would like to recognize the inspiriting work of the distinguished managers of the bill, Senators BAUCUS and CHAFEE. Their commitment, persistence, and patience deserves much praise, and I thank them for it.

In regard to the bill itself, there has been already and will continue to be a great deal of debate on its costs and benefits. In this context, it should be said that environmental laws impose a tax that is paid by society as much as any other tax. Where the costs of this bill are imposed on public utilities, as they are in the case of acid rain controls, it is near to certain that these costs will be passed on to every consumer. Such costs are as much a tax as any tax on income.

Similarly, this bill will impose a tax of sorts on those who lose their jobs as a result of it. We cannot know with any precision who these individuals will be, but the effect of the bill on them will be real and unavoidable. The taking of a livelihood is, it may be said, a form of confiscatory taxation.

The Senate, by a vote of 50 to 49, chose not to provide recompense to coal miners and other workers who will lose their jobs. To the miner who loses his job, and to the community in which he lives, this tax is a harsh one. Many miners may lose their jobs at a point in life where getting to another region, to another occupation, is difficult. The closeness of this vote is a striking measure of our concern for the problem.

This issue of quantifying the impact of what we are doing is one reason why, in the Committee on Environment and Public Works we determined to continue NAPAP—the National Acid Precipitation Assessment Program—indefinitely. NAPAP will now be asked to determine the costs and the benefits of the acid rain control program that the Senate will vote on shortly.

In addition, we have included in the bill a simple heuristic device to show our progress, or lack of it. The committee accepted a provision to create and update a National Acid Lakes Registry—a listing of acidified bodies of water. We will be able to see if the number goes up or down, and if so, by how much.

The only reliable forecast we have of how acidified surface waters might respond to the bill comes from a joint NAPAP-EPA effort called the direct/delayed response project. It projects, for the Northeastern United States, that an emissions control program of the magnitude we are considering will reduce the number of acidic lakes by 80 over the next 50 years. If extrapolated to the entire U.S. population of acidic lakes, we could predict—with a fairly large margin of error—that about 600 lakes would recover, again measured over 50 years. If no emissions controls are enacted, the number of acidified lakes in the Northeast will remain roughly the same.

Such a registry will allow us to verify these predictions. Perhaps they are correct. Perhaps not.

However, these two amendments adopted by the committee apply only to the acid rain portion of the bill before us. This is why I offered on March 7, together with the majority leader, Senator MITCHELL, and the Republican leader, Senator DOLE, an amendment which instructs EPA to measure the benefits and costs of this bill and of the Clean Air Act as a whole—inasmuch as what we do today amends the Clean Air Act of 1970. In this examination, we will no doubt have some surprises. Our theories will be tested. Some will survive, others will change.

If this provision becomes a part of the final bill, as I believe it must, this will be the most ambitious effort of its kind in the history of social legislation.

The effort will be complex—we know how to measure some costs and benefits, but not all. These things are notoriously difficult to express in terms of dollars. Indeed, it may not be possible to assign reasonable dollar values to all of the effects. But, perhaps, the effects can be described and communicated in other ways. But as you begin to think about such things—when you try to put a number on them—you have already learned more than you knew.

This effort will fit well with the proposed Bureau of Environmental Statistics. The legislation to elevate EPA to Cabinet status that the Senate will consider in a few weeks would create such a new bureau to collect and analyze environmental data. The Bureau of Environmental Statistics will centralize data collection and compilation, ensure a high level of quality in the data collected, and analyze and report on such data in an objective way. Or so we hope.

The structure of the Bureau is modeled after several other Federal data collection and statistical analysis organizations, including the Bureau of Labor Statistics, the Energy Information Administration, and the Department of Education's Center for Statistics.

We have long recognized the importance of data collection and analysis. Our Nation's 20th census is now underway, fulfilling the Constitutional requirement and providing us with a wealth of information. More than 100 years ago, in 1867, when Congress established a Bureau of Education, the first purpose of the Federal education agency was collection of "such statistics and facts as shall show the condition and progress of education in the several States and territories."

These data collection and analysis efforts are not rapid things. It may require decades of data to detect and understand societal or environmental trends. The Bureau of Labor Statistics is older than the Department of Labor: It has collected and analyzed employment data since 1888. But even with all of this experience, we did not get monthly unemployment statistics until 1942. They had to learn what to measure and how to report it. The Bureau of Environmental Statistics will have to learn such things too.

All too often the collection and analysis of environmental data has been haphazard at best. The complexity of environmental matters requires that we collect and analyze environmental data on a systematic and continuing basis. This is the philosophy which has guided the BLS, and we ought to bring this philosophy to environmental problems.

The data provided by the Bureau of Environmental Statistics must be readily available to Congress and the public. And the data must be believed—perceived as free of political influence. It is important that the Bureau be a credible, independent statistical entity.

Last week, our colleagues in the House of Representatives attempted to ensure the independence of the Bureau by limiting administration control of the organization and its reports. These restrictions are opposed by the White House.

The credibility of data can be assured without such measures. EPA and the new Bureau of Environmental Statistics must and will conduct its business openly. Its data, analytical methods, and conclusions must be available for public scrutiny and for peer review by the scientific community.

Dr. Milton Russell, chairman of the NAPAP Oversight Review Board, recently discussed the importance in a democratic society of public participation in complex scientific issues. Addressing the scientists gathered at the NAPAP International Review in Hilton Head, Dr. Russell discussed the relationship which must be developed between scientists and the public. He said:

> Those who would introduce new technologies are not in a position of equals negotiating within a partnership, but of worthy petitioners seeking consent, and doing so by trying to convince those with the power that the endeavor is worthy, and in their best interests. * * * informing the public is a duty that the public is owed, not a boon that a scientist can grant. * * * what is to be

communicated is what the public wants to know, not what the scientists want to tell.

The message is both disturbing and hopeful. It is disturbing because it challenges the glowing sense of self righteousness and altruism which most scientists and engineers feel as they do their jobs, confortable in the belief that they are acting in the best interest of their fellow man. But it is hopeful in that it offers a prospect for dulling the sharper edges of conflict that are absorbing so much attention and emotional energy. Controversies will not disappear, but once the decision processes are clear and the place of technology within society is recognized by all, those controversies will lose some of the intensity of moral crusades.

We have a technological culture, but it is embedded within a social and political culture we call democracy. That democracy places the rights of individuals and their wishes in first place. Our people will not stand to be victims—or even beneficiaries—of technological forces beyond their control. But if this control is unwisely applied, technology cannot flourish, and its promise will fade.

We must remember that full public participation in the issues is not only desirable, it is necessary. This is the lesson of Dr. Russell's comments. It is a lesson which EPA, even as it becomes a Cabinet-level Department, ought to make a fundamental principle of its efforts.

Mr. BAUCUS. Mr. President, I appreciate the comments of the Senator from New York.

Mr. CHAFEE. Mr. President, I too appreciate the Senator's comments.

ALLOWANCES FOR RENEWABLE ENERGY

Mr. JOHNSTON. Mr. President, the leadership package of allowance amendments being considered today contains a provision that would establish a renewable energy subsidy program in the Environmental Protection Agency. This provision creates reserve of 80,000 allowances that would be issued to utilities that generate electricity or purchase electricity from a renewable energy powerplant.

I would oppose this provision if there were a chance to oppose it on its own merits. I will explain why in a minute. Unfortunately this provision is surrounded by a package of amendments that I and many of my colleagues support.

We will have to vote on the package as a whole, accepting the bad with the good. Under the present parliamentary situation we must vote for the bad to get the good. So the package will be adopted. The contents of the package have been selected to get the votes. I will support the package, but I oppose this piece of it.

Mr. President, the creation of a special reserve of Clean Air Act allowances to be distributed as a pure subsidy to renewable energy—or to any other currently popular cause—is a very bad idea. If this idea successfully proliferates, it will severely compromise and politicize the allowance system.

Here is how the system proposed would work. A reserve would be created that contains 80,000 allowances. These allowances would be skimmed from the pool of allowances that would otherwise be available to the owners or operators of affected units at affected sources. We don't know how much this reserve will be worth, because we don't know what the value of an allowance will be. But it is not a trivial sum. If an allowance is worth $1,000, an amount that I understand may not be too far off, the reserve will be worth $80 million.

EPA would issue allowances from the reserve to the owner or operator of an affected unit that generates or buys electric energy from a renewable energy powerplant. Allowances would issue on a first-come, first-served basis until the reserve is exhausted. In this context renewable energy is solar energy, geothermal energy, energy derived from biomass, or wind energy.

An eligible renewable energy powerplant would be a plant for which construction was initiated after December 30, 1991, or which realizes a significant increase in energy output from replacement of equipment installed prior to January 1, 1990. The number of allowances issued by EPA would be based on the emission rate of unit owner or operator's cleanest coal or oil plant in pounds of SO_2 per million Btu.

This provision is not free. It removes on the order of $80 million from the allowance system, assuming an allowance is worth $1,000. It removes more if an allowance is worth more. The provision takes allowances from some utilities and gives them to others in a way that is totally unrelated to the purpose of the allowance system. While it takes allowances from the many to give to the few, the value of these allowances is spread over many kilowatt hours of electricity produced from renewable energy.

The value of the subsidy can be calculated if one knows the value of an allowance. Assume the value is $1,000. Then the subsidy is worth 0.2 cents per kilowatt hour for a utility emitting the national average rate of 0.4 pounds of SO_2 per million Btu. By comparison, the average cost of electricity to residences in the United States last year was about 8 cents per kilowatt hour. The proposed subsidy only amounts to 2.5 percent of the price paid by residential users of electricity.

So this subsidy, however well intentioned, cannot make much difference. It is just too small on a kilowatt hour basis. To have a significant impact on renewable energy production, the subsidy would have to be at least 10 times as great, or 2 cents or more per kilowatt hour. At the level proposed, this subsidy cannot be a significant factor in the financing of new renewable energy powerplants.

Because this subsidy cannot make a difference, it will go to projects that would be built anyway. It therefore amounts to a windfall.

This is the kind of thing that would come out if the normal legislative process, involving hearings, had been followed. A program could be designed that would make a difference and would not simply confer a windfall on some wood chip burner that would be built in any event or some geothermal project that already planned to expand its supply.

The Energy and Natural Resources Committee has the jurisdiction over "solar energy systems" under rule XXV 1.(g)(1)13 of the Standing Rules of the Senate. The committee would hold the hearings and mark up the legislation. The committee has done so in the past where renewable energy is concerned. Recent laws enacted include Public Law 101-218, the Renewable Energy and Energy Efficiency Technology Competitiveness Act of 1989, and Public Law 98-370 that established the Committee on Renewable Energy, Commerce and Trade.

When it is discovered how small the subsidy is, there will be calls to expand the number of allotments issued. Enactment of this subsidy will also lead to demands on the allowance system for other worthy causes, just as the crude oil entitlements program of the 1970's was used to subsidize various energy propositions unrelated to the purpose of that program. Under the crude oil entitlements system of the 1970's, entitlements were issued to subsidize numerous sources of energy, including at one time or another, heavy California crude oil to the east coast and Michigan, and electricity produced from burning cherry pits.

The weight of these special allotments eventually destroyed the entitlements program. This provision would be the first attempt to divert allowances for a use unrelated to the purpose of the allowance system. It will not be the last.

Allowances are transferable. They will be bought and sold. Allowances are another form of money: Money not printed by the mint, not included in the budget, and not subject to appropriations acts. This money would be distributed by the Administrator under the provision in question, solely to transfer money to producers of electricity from renewable energy.

Numerous additional objections to the provision would be cited.

Most facilities receiving the subsidy will be qualifying facilities under the Public Utilities Regulatory Policies Act, so this provision applies a new level of subsidy to PURPA benefits.

Solar energy follows the cycle of the Sun. Electricity from the Sun there-

fore substitutes for gas-fired peaking power, not coal-fired baseload capacity. So there is no relation between the solar aspects of this proposal and SO_2 reduction.

The subsidy depends on the price of an allowance, which is variable and uncertain. So the subsidy is variable and uncertain and therefore less valuable.

The provision issues allowances for renewable energy plants operating primarily on renewable energy. The term is undefined in the proposal, so the renewable energy plant could presumably use up to 50 percent fossil fuel and still qualify.

The provision issues allowances for renewable energy plants that realize significant increase in energy output. The term is also undefined. Allowances are earned by the entire plant, not just the increased output. So all existing renewable energy plants become eligible if they just increase output. This weakness simply compounds the windfall.

Mr. President, we are not going to have the opportunity to address these issues in the Senate. Perhaps they can be addressed elsewhere. The process that has been followed so far has produced "something for renewable energy" on the Clean Air Act amendments legislation. It has not produced good renewable energy legislation.

Mr. METZENBAUM. Mr. President, this amendment would help correct a provision in the acid rain title which could hurt a clean powerplant which is about to come on line in my State.

This facility, the Zimmer plant, is going to use a state-of-the-art scrubber which removes the maximum level of sulfur dioxide from the coal. Zimmer will use 10 percent of Ohio's coal production and will support 1,000 coal mining jobs.

It is also a special facility in that it is the first powerplant to be converted from nuclear to coal. This amendment will ensure that Zimmer, which is under construction and has been for several years, is not penalized unfairly. It simply ensures that the Zimmer plant will receive more emission allowances.

Without it, the owners of Zimmer would have had to reduce emissions from their other plants beyond the reductions already made to achieve compliance with the phase II requirements of the legislation. This would have further increased the cost of the bill to Ohio ratepayers. On the other hand, the owners could have decided to switch to low-sulfur coal. This would have thrown more Ohio coal miners out of work. I am pleased the managers agreed to work this out to avert further damage to Ohio.

Mr. HATFIELD. Mr. President, I rise in support of the leadership allowance package and, specifically, an amendment contained therein that Senator FOWLER and I proposed regarding renewable energy. I would like to thank the leadership and Senators BAUCUS and CHAFEE in particular for accepting this amendment as part of the committee-approved package. I would also like to thank Senators MCCLURE, MATSUNAGA, NUNN, REID, and BRYAN for cosponsoring this initiative.

Currently, renewable technologies provide 9 percent of the Nation's electric power. However, nonhydro renewables account for less than 3 percent of that power supply, and very few renewable facilities are owned by utilities. This amendment provides a small incentive to encourage utilities to become acquainted with renewable technologies and to help move them into the mainstream.

Specifically, our amendment will provide an incentive, in the form of allowance credits, for utilities to use renewable technology to meet future resource demands. Allowances will be issued on a first-come basis from an 80,000 renewable energy allowance reserve to utilities using qualifying renewable sources. Qualifying renewables are defined in the legislation to embody emerging technologies such as solar, biomass, wind, and geothermal sources.

The allowances will come from a pro rata reduction of the phase II pool of allowances. Starting in the year 2000, 8,000 tons will be deducted from that pool for 10 years. This reduction equals less than one-tenth of 1 percent of the allowances available every year during phase II of the acid rain program.

The allowance credits earned for commensurate power production will equal 1 year of emissions from a state-of-the-art coal- or oil-fired facility—estimated to be below 0.4 tons of sulfur dioxide per million Btu's. This cost in terms of allowances is small considering that the level of emissions that would be backed-out by using renewable technology instead of coal is probably much higher. The average emission level from existing plants is 1.7 tons of SO_2 per million Btu's.

If the goal of this bill is to promote cleaner air, what could be more compatible than to provide incentives for emerging renewable technology? Every megawatt of power produced by solar, wind, geothermal, or biomass technology reduces the need to acquire fossil-fuel-based generating capacity—and the air emissions that go with it.

As we crafted this amendment, I had hoped that hydroelectric power would also be included in the definition of qualifying renewables. As my colleagues are aware, I come from a region of the country rich in clean, renewable hydropower. The mechanisms for siting water impoundments work very well in the Northwest and balance the needs of our fishery resources with power production, agriculture, and other often-competing uses. However, it became apparent very quickly that, for reasons unrelated to emissions reduction, there was very little support for including hydropower in this bill.

While the Northwest undoubtedly had something to gain by having hydropower in the bill, I agreed to drop it in the hope of furthering the amendment's chances. I did this because I am committed to seeing major generating capacity from renewables in the future. Also, I believe that renewable technology has the potential to sharply reduce hazardous air pollution. That, Mr. President, is why I strongly support this amendment.

Once the cap in the acid rain title of S. 1630 takes effect, utilities are going to need renewable technologies to provide the electricity necessary to serve increases in demand. The amendment that Senator FOWLER and I have offered will help utilities to become familiar with these technologies prior to the compliance dates within this bill. This is an important point. Only through the use of renewables, do we have the chance not only to meet the emissions cap, but to actually improve upon it while not compromising other environmental objectives. If it takes 80,000 allowance credits to help get renewable energy's foot in the door, it is a small price to pay for the future promise of clean, renewable power generation.

Mr. President, there is no better time to be debating this amendment than the day before the "Earth Tech" technology fair opens. Some of my colleagues undoubtedly will be visiting the exhibits on the Mall and attending briefings on the technologies displayed there. While fossil fuels have their place in today's market, it is those new technologies that will ultimately power the future growth of this country. This amendment represents one small step in realizing that goal.

Mr. SYMMS. Mr. President, I would like to discuss briefly the system created for the trading of allowances for sulfur dioxide emissions under the legislation pending before us. Throughout the clean air debate of the past year, the free trading of allowances among the owners and operators of affected units has been recognized as an integral component of the acid rain control program. The administration in particular has placed great emphasis on the use of market forces in this way to allow industry to make environmental changes in the most efficient and cost-effective manner.

The administration's original proposal, S. 1490, provided for allowance trading in an open market, and the Senate committee has embraced the principle as well. In fact, in its report

on S. 1630, the committee stressed that "[t]he transferability of allowance * * * is the key both to the strong environmental policy sought in new title IV of the act and to the flexibility the title creates for sources in choosing the means for complying with their emissions obligations." [p. 316] The committee also pointed out that allowance trading would reap significant cost savings, stating that "the flexibility created by the allowance-trading system alone has been estimated by the EPA to produce a nationwide cost-savings of 50 percent in phase I of the program, 14 percent to 20 percent when the program is first fully implemented at the beginning of phase II and a 20 percent cost-savings in 2010." [p. 316] I'm sure the gentleman recognizes just how vital allowance trading is to the success of the entire acid rain control program.

Mr. BAUCUS. I certainly do. In its discussions on the acid rain title, the group of 15 unanimously agreed that flexible allowance trading is essential. In fact, the issue was not even in question. We all recognized that prompt and expedited allowance trading would help ensure that total reductions would be achieved in the most cost-effective manner and that reduction costs would be allocated equitably.

Mr. SYMMS. I appreciate the Senator's support on this point. To be most effective, the allowance system must be as open, rapid, and flexible as possible, while assuring that the total emission reductions provided for in the legislation are achieved. I would like to clarify exactly how allowance trading would work in practice because some questions have been raised about the degree of flexibility the bill provides to the owners and operators of affected sources.

Under the bill, EPA must allocate annual allowances to the owner or operator of affected units at an affected source equal to the applicable annual tonnage emission limits. [Section 403(a)] An allowance is defined as "an authorization issued to an affected source by the administrator * * * to emit, during or after a specified calendar year, 1 ton of sulfur dioxide." [Section 402(c)] The legislation states that allowances "may be transferred among the owners or operators of affected sources under this title" pursuant to regulations to be promulgated by EPA. [Section 403(b)] However, transfers are not effective until EPA receives and records "written certification of the transfer, signed by a responsible official of each party to the transfer." This certification and recordation requirement clearly contemplates transfers of allowances between owners and operators of affected sources. It in no way suggests that transfers of allowances for affected units among affected sources which are all owned or operated by the same entity or utility system must be certified by that entity or system and recorded by EPA. Is that correct?

Mr. BAUCUS. Yes, I say to the Senator, that is correct. For example, if an owner or operator of two or more affected sources wished to take allowances allocated for one of those sources and use them for another source within the same company or system, that would be permitted without certification and recordation. As you have pointed out, the legislation provides for the transfer of allowances between two different owners or operators of affected sources, and the requirement of written certification signed by a responsible official of each party to the transfer would apply only when distinct owners or operators were involved. In effect, this certification requirement could only apply when the owners or operators of two distinct entities effect a transfer, since it envisions a contractual agreement between two entities. If the owner or operator of an individual utility system wanted to reallocate its allotted allowances within, the owner or operator would have to ensure that the total emissions for all affected units within its system did not exceed the annual limits set in the legislation.

Mr. SYMMS. That is an important point to emphasize. The legislation requires each owner or operator of affected units to submit a compliance plan to EPA outlining how each source will meet the emission requirements under the bill, does it not?

Mr. BAUCUS. It certainly does. The compliance plan must accompany the permit application and it must include a certification that the owner or operator will comply with the requirements of title IV in all circumstances. The legislation also allows EPA to require from the owner or operator of two affected sources an integrated compliance plan providing an overall plan for achieving compliance at the affected sources. We expect EPA to use this integrated compliance plan approach to give owners and operators of affected sources the greatest flexibility in complying with the emission limits applicable to their systems.

Mr. SYMMS. I thank the Senator for this clarification and would like to raise an additional point about the allowance trading system. The legislation before us provides for the issuance of annual allowances which may not be used prior to the calendar year for which they are issued but which may be carried forward to future years if unused in that calendar year. In order to promote maximum flexibility, the legislation also permits the transfer or trading of anticipated allowances prior to the actual issuance of such allowances. As I understand this language, an owner or operator who expected to receive certain allowances could commit to transfer them to another owner or operator before actually having received them. Is that correct?

Mr. BAUCUS. Yes; that is accurate.

Mr. SYMMS. Perhaps the Senator might also address the reverse situation—in other words, the case in which an owner or operator wishes to trade an allowance after the calendar year to which it applies has expired. While the legislation does not specifically address this situation, I expect owners or operators to have comparable flexibility to trade unused allowances in this situation. Accordingly, I would expect EPA to allow for a reasonable period—at least 90 days, if not longer—after the end of the calendar year for owners and operators to trade allowances applicable to that year. Does the Senator agree?

Mr. BAUCUS. I certainly do. This flexibility would allow utilities to "close their books" for emissions and allowances for a calendar year in an orderly fashion. It would also allow utilities to make adjustments for unexpectedly high emissions that may occur near the end of the calendar year, for example. We certainly would expect that the regulations that EPA promulgates will ensure that utilities have a reasonable period of time after the close of a calendar year to complete their allowance transactions for that year. During this period, the owner or operator of an affected unit would have the option to buy or sell the necessary allowances for that calendar year.

Mr. SYMMS. I thank the Senator. Such a provision in the regulations would carry out our intent to provide maximum flexibility for owners and operators who wish to trade allowances and to ensure that the sulfur dioxide control program is as cost-effective and as market-oriented as possible. I also note that the bill provides that emission trading allowances may be bought and sold.

Mr. REID. Mr. President, I am pleased to join Senators FOWLER, HATFIELD, MCCLURE, and MATSUNAGA in sponsoring this amendment.

This amendment recognizes that the cleanup of conventional sources of fossil-fueled energy need not be the sole means for minimizing the environmental harm resulting from power production.

Owners and operators of conventional power plants that emit above the NSPS limits will be the beneficiary of the incentives, the marketable allowances, to produce electricity cleaner.

We have spent considerable time in recent weeks talking about "clean coal," "super-clean, coal-fired plants," and "non-polluting natural gas facilities." Clearly, we must move in the direction of low- or non-polluting industrial practices or power production when compared to our position today.

The alternative of maintaining the status quo, allowing heavy emitters to continue to spoil the air we breathe and the environment in which we live, is clearly no longer a tenable position.

We also need to move in the direction of real alternatives to the conventional power production options: Renewables.

Our objectives with clean air legislation include improving the quality of the air that we breathe, reducing the emissions of criteria and hazardous pollutants into our environment, and ensuring that ecosystems and other environmental values are protected.

Virtually no source of emissions is untouched by this legislation. We know that only too well by now; no one lets us forget it.

It is far-reaching legislation and will be one of the most significant pieces of legislation during this session, if not the most significant. It is, and it must be, comprehensive.

Is energy from renewable sources clean energy?

What environmental risks do we face from producing energy from the primary sources of energy today?

What cleanup costs are avoided in dealing with the power production wastes from the variety of energy sources?

I ask unanimous consent that this entire comparison of emissions of pollutants by energy source type be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

EMISSIONS OF POLLUTANTS FROM ELECTRIC POWER GENERATION: THE TOTAL FUEL CYCLE [1]

[Tons per gigawatt hour]

Energy source	CO_2	NO_x	SO_x	TSP	CO	HC	Nuclear waste	Total
Conventional coal	1058.191	2.986	2.971	1.626	0.267	0.102	NA	1,066.143
Fluidized bed coal	1057.090	1.551	2.968	1.624	0.267	.102	NA	1,063.602
Natural gas IGCC	823.993	0.251	0.336	1.176	NA	NA	NA	825.756
Nuclear	8.590	.034	.029	.003	.018	.001	3.641	12.316
Photovoltaic	5.890	.008	.023	.017	.003	.002	NA	5.943

[2] Carbon Dioxide data adapted by the Council for Renewable Energy Education from Dr. Robert L. San Martin, Deputy Assistant Secretary for Renewable Energy, "Environmental Emissions from Energy Technology Systems: The Total Fuel Cycle," U.S. Department of Energy, Washington, DC, Spring, 1989, p. 5. Other emissions data from Assistant Secretary for Environment, Safety, and Health, "Energy Technologies and the Environment, Environmental Information Handbook," Office of Environmental Analysis, U.S. Department of Energy, October 1988, pp. 333–334.
[3] With Biomass Fuel Regrowth Program.

Note.—TSP: Total Suspended Particulates. NA: Not Applicable. TR: Trace Elements. The total fuel cycle includes resource/fuel extraction, facility construction, and plant operation.

There are alternatives to conventional power sources. Let me summarize from the comparison that was prepared by the Council for Renewable Energy Education.

For the total fuel cycle, the combined sulfur and nitrogen oxides emissions per gigawatt hour generated is more than 4 tons for a fluidized bed coal plant and nearly 6 tons for a conventional coal plant.

By comparison, combined So_x/NO_x emissions from solar, wind, and geothermal energy plants are at trace levels; this means below 0.005 ton. Finally, combined So_x/NO_x emissions from a biomass energy plant are below 1 ton.

To put this into perspective, a conventional powerplant built today would be approximately 1,200 megawatts of electrical power. If this plant would operate at full capacity, in 1 hour it would produce 1,200 megawatt hours of electrical power. One gigawatt is 1,000 megawatts.

The environmental case for renewable energy sources is apparent, but the economics are not. Utility companies have faced a similar problem with cleanup costs for their dirtiest plants.

What makes cleanup feasible is the economic advantage offered by the allowances or incentives.

The creation of an incentive out of the marketable allowances to foster installation and operation of renewable technologies as, for example, replacement of a heavily polluting fossil fueled plant is a modest investment for a potential windfall benefit to the environment. After all, are we not looking to reduce emissions?

I must profess that I am excited about the prospects for utilizing the renewable energy sources addressed by this amendment. I am excited because of my personal experiences in seeing this technology in operation and recognizing its potential.

During this last recess, I had the opportunity to visit the largest operational solar energy power plant in the world in Kramer Junction, CA.

This plant is owned and operated by the Southern California Edison Co. in a joint venture with an independent power producer, Luz, International.

It is a modular plant in that additional units can be added to it. Already greater than 200 megawatts in 1989, it is expected to expand to 600 megawatts by 1994.

Mr. President, I ask unanimous consent that the article from Forbes magazine describing this project be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WARMING TREND

(By James Cook)

Even before dawn breaks over the Sierras, computer systems begin positioning some 540,000 parabolic mirrors to catch the light at Luz International's 840-acre solar electric generating station at Kramer Junction in California's Mojave Desert. Row upon row, the mirrors lock on the sun as it rises and follow it across the sky until dusk, focusing its rays on a thin, black-coated stainless steel pipe. The sun heats the stream of synthetic oil that flows through the pipe to 735 degrees Fahrenheit. Circulated through heat exchangers in a nearby power block, the superheated oil flashes water into steam, and the steam drives a conventional turbine generator to produce electricity for sale to Southern California Edison in Rosemead, Calif.

The world of tomorrow here today? A part of it anyway. It took over four years and $750 million for Luz to get this far, but get there it did. The Luz generating units now in operation, each rated at 30,000 kilowatts, claim the distinction of being the first really commercial-scale thermal solar energy installations in the world.

Scale is one thing, profits another. The Luz plants, owned by a consortium of corporate investors, have depended on various state and federal benefits available to encourage development of alternative energy sources. Without such help Southern California Edison wouldn't be paying higher than market price for the electricity it now takes from Kramer Junction under a 30-year contract, including 7 years at fixed prices. And without various tax benefits, investment in the project would not make much economic sense. Even so, the Luz plants are getting close to being fully competitive. The newest can produce power for under 12 cents a kilowatt-hour, about what a lot of new nuclear power stations do.

Headquartered in Los Angeles, Luz was founded in 1979 by a Rhode Island-born Israeli electrical engineer, Arnold J. Goldman, and a French-born Israeli textile manufacturer, Patrick Francois. Luz was the biblical site of Jacob's ladder, which Jacob renamed Bethel, the place where God dwells, when he saw the angels commuting between heaven and earth. That image gives you some sense of the company's aspirations.

Goldman, now a taut, dark haired, 45-year-old Californian, is a man of parts. Armed with an engineering degree from the University of Southern California, he put in some time with such corporations as Litton Industries. And then, on his own, he designed one of the first word processors, started an outfit called Lexitron Corp. to produce it, and eventually sold out to Raytheon. By then, he had already begun fooling around with solar energy—not photovoltaic cells of the sort Chronar Corp. claims will soon become competitive in the utility market (Forbes, Dec. 12, 1988), but thermal solar power using solar heat to produce steam for conventional electrical generation. Goldman designed the heat-collection elements and the sun sensors and computer controls that are at the heart of the Luz system. His partner, Patrick Francois, drummed up the money to get the project off the ground.

With some initial backing from a joint U.S.-Israeli research agency, Francois and Goldman rounded up nearly $40 million from a group of private investors, including San Francisco's CP National, which owns 38% of the stock.

The proceeds went initially into research and development and later into manufacturing facilities in Israel. "The technology was more or less there," says Francois. "The idea was to take what had been a kind of lab experiment and bring it up to commercial scale."

With seven plants currently in operation, Luz earned $5 million on $155 million in sales last year. Most of that, though, came not from solar power production but from the sale of equipment Luz manufactured to build the various plants. Luz manages and maintains the plants but has no equity in them to speak of. The plants were built as limited partnerships, with large corporate investors like Potomac Electric and Prudential Insurance providing the required debt and equity.

"We saw ourselves as an equipment manufacturer," Francois explains. "We had better use for our money reinvesting in development to keep ahead of declining energy prices and declining tax rates. We started somewhere around 24 cents per kilowatt-hour, but we knew we had better be able to go to 5 cents to 6 cents per kilowatt-hour if we were going to get into the business. You do that either by reducing the cost of the equipment or by increasing the efficiency of output."

The first of five 80-megawatt solar units, a giant step ahead in scale, is slated to go into production at Harper Lake, Calif., 12 miles from Kramer Junction, later this year. The new units will cost about $1 billion altogether, boast more than twice the capacity of Kramer Junction and produce power at less than 8 cents a kwh. For Luz, that means commercial solar energy will at last have arrived.

And not a moment too soon. The tax benefits will run out with the completion of the first of the five new units, and the fixed-price power contracts with Southern California Edison will end after completion of the last of the five plants. So the question is, where does Luz go from there?

The answer is, into the solar energy business for the first time, with the present owners very likely selling stock to the public as they go. "As of 1990," says James C. Bazor, Luz' chief operating officer, "we expect our system to compete on pure economics without any tax breaks."

Bazor joined the company last April to provide the professional management Luz needs if it's going to compete on equal terms in the energy market. He surely knew what he was getting into. He came over from Blount, Inc., the contractor that built the Luz plants.

Jim Bazor doesn't see Luz solar units driving fossil fuel or nuclear plants out of business ("We cannot provide power for base loads") nor even making much of a dent outside the American Southwest ("because of the obvious link with the sun"). But Luz can provide peaking power, potentially lots of it, in summer, when air-conditioning sends power demand through the roof. Peaking power will be needed in the years ahead, Bazor says, and that's what Luz is ideally equipped to provide.

The economic and marketing prospects are so encouraging that Luz is already negotating with potential customers in Spain, India and Israel and trying to drum up business in Arizona and New Mexico. In such places Luz hopes to supply solar energy systems and hardware, not to operate power plants. "There is no reason for power companies not to own and operate solar equipment the way they do any other power source," says Bazor. "If you can have environmentally benign power on economic terms, why would you go to a nuclear plant or anything else?"

Why, indeed. An argument that even the arch-conservative utility industry is likely to find compelling.

Using space-age coatings technology, and optimal demand usage/isolation relationships, this facility has demonstrated that solar energy is closing in on economic viability.

The potential for greater use of solar energy for large-scale application exists and, moreover, it is environmentally benign.

On more than one occasion, I have had the opportunity to drive through the Altamont Pass and marvel at the windmill farms.

In 1989, the total electric power generation in the Altamont Pass exceeded 1,000 gigawatthours; enough to meet the residential needs of nearly half a million people.

Mr. President, I ask unanimous consent that the press release from the American Wind Energy Association describing the increase in wind electricity generation during the 1980's and the reduction in cost of production be printed in the RECORD at this point.

There being no objection, the press release was ordered to be printed in the RECORD, as follows:

MARCH 26, 1990.

WIND ENERGY DURING THE 1980'S—DRAMATIC INCREASE IN ELECTRICITY GENERATION

WASHINGTON, DC—The American Wind Energy Association (AWEA) today released a summary of wind energy's power producton during the 1980s. The report, "Wind Energy in the 80s—A Decade of Development," was prepared by AWEA's West Coast Representative Paul Gipe and is based upon records maintained by electric utilities, wind farm operators, and the California Energy Commission.

In 1989 alone, there was a 17% growth in wind-generated electricity in the United States. There are now more than 14,000 commercial-size wind turbines in California and Hawaii, and these turbines provide a total installed capacity to electric utilities of approximately 1,400 Megawatts (MW).

The costs of wind-generated electricity have declined from 25 cents per kilowatthour (kWh) in 1981 to as low as 5 cents per kWh at the most outstanding sites in 1989. More typical wind sites produce electricity for 7 to 9 cents per kWh.

"Wind energy technology has made remarkable progress over the last decade," according to Randall Swisher, Executive Director of the American Wind Energy Association. "In 1981, the industry was virtually non-existent as a source of utility power, producing only 10,000 kilowatt-hours (kWh), or about enough to serve two homes. In 1989 in California wind generated 2.125 billion kWh, enough to serve the residential needs of a city of over 900,000 people—more than the population of either San Francisco or Washington, D.C.," Swisher said.

Several factors now make it less costly to produce electricity by wind power. Wind turbine efficiency, as measured by what is known as "capacity factors," has increased steadily, rising from an average of 13% in 1985, to almost 25% for new turbines in 1989. (The best performing projects have a capacity factor of over 40%.)

In the first few years of commercial development, technical failure was common. In 1981, for example, the first utility-connected wind turbines were only functioning about 60% of the time. Turbines that have been introduced in the last few years have availability (reliability) factors of over 95% whenever suitable wind speeds exist.

"Even though we have seen great progress in wind's productivity, our goals are far from being met," Swisher said. "Our goal is to achieve a 5 cent per kWh target at typical wind sites sometime between 1995 and 2000. This would make wind fully competitive with conventional technologies such as coal. The major question facing wind technology in the meantime is how to compete with heavily subsidized conventional fuels," Swisher concluded.

A significant comment by Randall Swisher, executive director of the American Wind Energy Association, was that "the major question facing wind technology * * * is how to compete with the heavily subsidized conventional fuels." By providing these incentive allowances to conventionally fueled facilities only, will further widen this gap. This is the wrong message to send.

Finally, in the great State of Nevada, we are beginning to realize the opportunity to utilize the energy potential from our natural thermal springs. In Steamboat Springs, for example, tapping this source of geothermal power has elevated Nevada into a position of being one of the leaders nationwide and worldwide.

We have just begun to realize the opportunity that renewables can offer us after years of neglect through the 1980's.

The unfulfilled promise to better utilize renewable sources of energy to replace or supplement existing conventional sources can no longer be tolerated.

The opportunity can no longer be wasted.

This day signifies the 10th week that this clean air bill will have been the order of business for the Senate. The progress that was made has been tedious at times; nevertheless, we have made progress.

Now is not the time to sell America short. Now is the time to send the right message.

The R&D budget for renewable energy has diminished over the last decade from over $800 million to nearly one-tenth of that level this year. While care for the environment was put on hold during the last decade, the effort to include renewables as an essential element in the power production mix suffered a similar fate.

The Congressional Research Service has reported that "acid rain, air pollution, and other environmental problems linked to conventional generating systems also make renewable power technologies an attractive alternative."

It is a real alternative that can make headway in pollution-free energy production

With this clean air bill, we must send a message in the strongest of terms that pollution prevention is our ultimate objective. Process and front-end cleanup are the ways to minimize environmental degradation; back-end cleanup is inefficient and usually results in an environmental threat that has been transformed into another media: solid or liquid waste.

Tonight, the time certain by which the vote will take place on this bill, is the eve of the opening of Earthtech 90. This is the technology fair organized under the chairmanship of our colleagues, Senators GORE and HEINZ.

Renewable energy sources will be displayed as potential answers to tomorrow's questions.

Many of my colleagues may have seen the wind generator already constructed on the Mall on their trek today. The technology fair will have on display potential solutions, products, and strategies that will focus our sights on the achieving environmentally sustainable development: economic development and environmental protection in harmony.

This amendment provides us with a meager beginning to send this loud and strong message that we have begun to solve tomorrow's environmental problems today, that we have acted responsibly in fostering renewables, and that nonpolluting energy belongs in our national energy mix.

I urge my colleagues to support this amendment enthusiastically.

CLASS OF 85 AMENDMENT

Mr. JOHNSTON. Mr. President, I am pleased that my amendment has been included in the package of so-called "allowance" amendments laid down before the Senate. This amendment is co-sponored by Senators BREAUX, BENTSEN, BINGAMAN, WIRTH, BRYAN, BOREN, BUMPERS, COCHRAN, PRYOR, NICKLES, and GRAMM. The amendment affects only units that utilize natural gas greater than 90 percent of the time. Forty-five percent of Louisiana's electric generation is supplied by these very clean units.

Louisiana is a very clean State. Our average rate of SO_2 emissions is less than 0.2 bls./mmBtu, well below most other States. Much of our electricity is supplied by clean fuels such as natural gas and low sulfur coal. I am proud of Louisiana's efforts to protect the environment.

However, the substitute does not allow the very clean units that burn primarily natural gas the flexibility to burn oil in the event of a natural gas interruption. Interruptions are outside a utility's control and can occur in the course of normal operations or during an emergency.

The problem is most acute after 2010. During the years 2000 to 2009, gas units are provided allowances sufficient to permit them to burn oil 10 percent of the time. After 2010, these units would not be provided with the necessary allowances. Requiring clean fueled units to search out and purchase allowances from dirtier units in order to provide normal service to its customers is patently unfair.

My amendment ensures that utilities can burn oil in the event of a natural gas interruption that is beyond the control of the utility. It is good policy to encourage the continued use of clean fueled generation. This amendment does that.

I understand that this amendment is supported by the leadership and the administration. Furthermore, my amendment is fully consistent with the agreement—it does not increase overall emissions or "break the cap."

Mr. President, we all support clean air. My amendment is consistent with this objective. I thank my colleague, Senator BREAUX, and the rest of the committee for working with me on this.

Mr. BAUCUS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum having been suggested, the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAUCUS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAUCUS. Mr. President, I suggest the absence of a quorum, and I ask consent that the time be equally divided.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAUCUS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAUCUS. Mr. President, when I described the package amendment, I neglected to describe the McConnell amendment which also is included in the package. The amendment offered by the Senator from Kentucky would grant special allowance to the utilities forced to convert to coal in the 1980's under the Federal Fuel Use Act.

The package amendment is modified insofar as the scaled back original request. The original request from the Senator was 20,000 allowances. This package scales that down to 5,000. That 5,000 is included in the total number of allowances to be reallocated.

For the sake of full disclosure, it is appropriate to also mention the fact which does include that 5,000 allowances would be allocated. That request was made by the Senator from Kentucky.

I see the Senator from Maine on the floor. I yield 1 minute to the Senator from Maine.

Mr. COHEN. If I might have 1 minute. I thank the Senator.

Mr. President, we have arrived at a very historic moment in the Senate. For the first time in 13 years, we are poised to enact broad legislation that recognizes a need to take strong action in the control of air pollution.

There are a number of people on the floor at this moment I want to take a moment to commend. I commend the Senator from Montana, and also Senator CHAFEE for his extraordinary effort in holding this coalition together in support of the legislation.

The person most responsible for bringing us to this point is my colleague from Maine, Senator MITCHELL. I know that he has dedicated nearly 10 years of his life to bringing this legislation to a conclusion.

I commend the minority leader, Senator DOLE, because he demonstrated time after time that without his leadership and commitment to this legislation, it would not have been possible.

It is not possible to comment on the passage of this important legislation without also recognizing the strong leadership and commitment to clean air that Senator DOLE has demonstrated during our deliberations. We could not have passed a bill without the minority leader's support and dedication to this issue. The part he has played in ensuring cleaner air for this Nation's citizens must be acknowledged and praised.

Since we last enacted Clean Air Act legislation in 1977, we have witnessed the deterioration of our Nation's air, mostly as a result of the pollution we allow to spill from our cars, factories,

and power plants. More than 100 areas in our country now violate Federal standards for ozone; 40 areas violate the standards for carbon monoxide, and 58 areas violate the standards for particulate matter. The result is a serious, unavoidable health threat to millions of American citizens. In addition to the threat to human health, our air pollution problems have had adverse effects on our lakes, streams, forests, and they have caused the degradation of our national parks, to the detriment of all citizens.

The bill being considered by the Senate reflects a monumental effort, involving hours of debate, both on the Senate floor and in numerous meetings and conversations. The Senate leaders and floor managers have done an admirable job in bringing diverse views together in an effort to write legislation that takes strong steps to achieve clean air. I believe this legislation meets that goal, and I am pleased to support it.

There has been a lot of criticism leveled at this bill, and I have supported amendments to strengthen it in certain areas. But it is of premier importance, in my view, to pass a bill that is significantly stronger than existing law and moves us well toward the national goal of a clean and healthful environment. This bill accomplishes that. We must enact laws within the confines of reality, and the reality here is that significant opposition to approving a stronger act exists. We must enact clean air legislation now, we must do what we can to strengthen current requirements, and we must recognize the consequences of hlding out for an ideal bill. If we do not pass a bill now, our opportunity will be lost for some time. Our hardest work remains ahead of us as agreement with the other body must occur before enactment of a final law. So, let us move ahead now, and not lose the chance to strengthen current law.

The need for clean air has long been on the minds of Maine residents as they have witnessed the deterioration of their lakes and streams due to acid rain. And no matter how much the State worked at reducing the level of pollution causing acid rain, it was not enough. We have been forced to turn to those polluters in distant States whose emissions travel with the prevailing winds to the Northeastern States like Maine and to Canada. This bill's requirements for a 10-million-ton reduction in sulfur dioxide emissions and a 3-million-ton reduction in nitrous oxide emissions over the next 10 years will take us a long way toward seeing the improved health of our natural resources. In achieving these significant reductions, we have been able to hold fast to the important principle of "polluter pays."

We have been seeking acid rain controls for 10 years now, and the issue is a very familiar one to Mainers. During the 10-year span, however, an equally pervasive threat has drifted into Maine in the form of smog. During the summer of 1988, Acadia National Park, located many miles up the Maine coast, posted its first-ever health warning because the ozone level exceeded acceptable standards. This announcement came as a great shock to many who have enjoyed the beauty of Acadia and other parts of Maine. But the fact was that heavy smog, caused by the mix of auto pollution with heat and sunlight, and crept along the coast with increasing intensity until it seriously affected one of the Nation's most beautiful parks. As a result of that incident, many citizens in Maine now have even deeper concerns about the effect of other cities' pollution on Maine.

The requirements in this bill for cities and other nonattainment areas to come into compliance with accepted health standards are meaningful, and I hope they will be more successful than previous requirements have been. By imposing tighter tailpipe standards for cars, trucks, and other vehicles, by requiring incremental progress over a specified period of time, and by getting a better handle on the number and type of pollution sources that exist, polluted areas, including those in Maine, should be able to come into compliance within the timeframes specified.

In addition to urban smog, auto emissions, and acid rain, the bill also addresses a number of other important air pollution issues.

One of the most health-threatening forms of air pollution comes in the form of toxic air emissions from a wide variety of sources. Some emissions occur on an everyday basis, while some are a result of accidents that often have drastic consequences. The EPA has done a woefully inadequate job of establishing emissions standards for the hundreds of toxic pollutants that exist. In 18 years, the Agency has regulated only some sources of seven chemical pollutants. Several hundred chemicals remain unregulated, to the detriment of human health.

The bill requires the EPA to set health-based standards for approximately 200 hazardous air pollutants, and then define sources of those pollutants for the purpose of implementing the standards. All sources must install the strongest technology available. After this occurs, the EPA must then review emission levels to determine whether a significant health risk continues to exist despite the application of the best technology. If that health risk does exist, the source must achieve further reductions so that the risk to human health is reduced.

This new air toxics control program is a very significant step forward in the effort to control air pollution. I believe it will result in significant improvements in the protection of human health from cancer risks and other threats.

Another important problem tackled by the bill is the pollution that has caused the deterioration of the ozone layer in our upper atmosphere. The bill mandates the phase-out of the use of chlorofluorocarbons by the year 2000 and prohibits the use of HCFC's by the year 2015 for new uses and by 2030 for existing uses. While this sets the United States on a unilateral course toward eliminating the use of these chemicals, it is an important course because we generate a significant amount of the world's total. International negotiations to eliminate this global threat will proceed, with the United States in the lead.

From letters I have received in my office, and through an Earth Day contest I have sponsored for Maine students, it is obvious that our children are deeply concerned about the environment. They believe a clean environment is crucial to their successful future, and they are watching what their parents and other adults do to ensure an improved environment.

I hope that enactment of this legislation will enable us to show our children that we adults can make an effort to improve the environment. The challenge is a great one, but the time is at hand. Passage of this bill is in all our interests, but particularly because of our children. They deserve no less.

Mr. BAUCUS. Mr. President, I think the managers are prepared to yield back the remainder of the time.

The PRESIDING OFFICER (Mr. BRYAN). Is all time yielded back? The Chair is inquiring as to whether all the time is yielded back.

Mr. CHAFEE. Yes.

The PRESIDING OFFICER. All time has been yielded back. The question is on agreeing to the amendment of the Senator from Maine.

The amendment (No. 1453) was agreed to.

Mr. BAUCUS. Mr. President, I move to reconsider the vote.

Mr. CHAFEE. I move to lay that on the table.

The motion to lay on the table was agreed to.

ACID RAIN TITLE

Mr. BUMPERS. Mr. President, I want to turn the attention of the managers of the bill to title IV, the acid deposition provisions, and in particular to sections 403, 405, and 406. I would like the managers' help in understanding: First, the language in section 403(a) dealing with pro rata reductions of allowance allocations; second, the language in section 405(a)(2) on pro rata reductions of allowance allocations; and three, the way in which the reserve fund in para-

graph 405(a)(2) integrates with other provisions of section 405 and section 406.

My specific concern is how the provisions would affect Arkansas' clean coal units. First, am I correct that in the year 2000, when phase II of the Acid Rain Program begins, total utility emissions of sulfur dioxide will be capped at 8.90 million tons and that a total of 8.90 million allowances will be allocated to affected utilities across the country? Second, that from the years 2000 through 2009, the EPA Administrator will have a reserve of up to 5.30 million extra allowances, or 530,000 allowances annually, to distribute to affected utilities according to applicable provisions of the bill? Third, that this reserve is funded so to speak, with reductions in emissions of sulfur dioxide achieved in the year 2000.

Mr. BAUCUS. Yes, the Senator is correct.

Mr. BUMPERS. So there are two sources of allowances available to the Administrator during the years 2000 through 2009, one totaling 8.90 million a year, the other a temporary reserve totaling up to 530,000 a year. After the year 2009, total allowances would be limited to 8.90 million. Who did the drafters of the Mitchell-Dole substitute intend to be the recipients of these reserve allowances?

Mr. BAUCUS. One purpose of the reserve is to accommodate—to the greatest extent possible—the allowance requirements of the so-called Class of '85 utilities—i.e., those with 1985 emissions rates below 1.2 lbs/mmBtu—which, because of low utilization during the 1985-87 baseline period, would not be able to get the full benefit of the Class of '85 allowance allocation—which is based on 1985-87 utilization. It is also intended to provide allowances to clean States as defined in section 406, and to the utilities operating at a higher than 1.2 lb. rate that also had low utilization in the baseline period. Many of these are in the Midwest and the Southeast.

Mr. BUMPERS. Arkansas' utilities are among those utilities with a Class of '85 problem. All of our coal-fired units have emissions below 1.2 lbs. mmBtu and are therefore covered by section 405(d) of the substitute amendment. In addition, Arkansas would qualify as a clean State under section 406. I understand that the Environmental Protection Agency has estimated how many allowances each State will qualify for under the substitute amendment. Can the managers tell me how many allowances Arkansas will be eligible for: One, if our Governor elects to have the Administrator allocate allowances under section 406; and two, if the Governor does not so elect?

Mr. BAUCUS. According to preliminary EPA estimates, between 2000 and 2009, Arkansas would receive approximately 95,000 allowances if it elects to come under section 406 and 91,000 allowances if it does not. After the year 2009, Arkansas would continue to receive about 91,000 allowances under the compromise. As a result of Senator JOHNSTON's amendment providing for additional allowances to gas-fired units beyond 2010, however, the number of Arkansas allowances will be greater than 91,000 after 2010.

Mr. BUMPERS. A further point of clarification, under the technical amendments to be proposed by the managers and circulated last week, do the managers intend that clean coal units that elect to come under 405(d)(3)(A)(ii) and B(ii) will not draw allowances from the reserve, created pursuant to section 405(a)(2), for the 2-percent baseline boost?

Mr. BAUCUS. The Senator is correct. The 20-percent baseline boost available to clean coal units can be accommodated within the 8.90 million pool of allowances.

Mr. BUMPERS. Now, section 403 authorizes the Administrator to make pro rata reductions in allowance allocations in order to assure that total annual emissions from utility units do not exceed 8.90 million tons. Section 405(a)(2) authorizes the Administrator to make further reductions in the allowance allocations for each affected utility if he finds that there are not 5.30 million tons of reductions in the year 2000. In other words, Arkansan units could be subject to two so-called rachet provisions—one to get down to 8.90 million tons, and a second to ensure that the reserve created pursuant to section 405(a)(2) contains 5.30 million allowances at the outset even if less than a 5.30-million-ton reduction is achieved in the year 2000. I am very concerned about these potential reductions because my utilities will be counting on every one of those 95,000 allowances in order to operate their clean coal units.

What assurances can the managers provide me that when all of the allocation formulas—other than those allocations from the reserve—are computed for the eligible utilities under this bill, they will not total more than 8.90 million?

Similarly, what degree of confidence do the managers have that there will be 5.30 million tons of emissions reductions to fully fund the section 405(a)(2) reserve in the year 2000? Can the managers provide me with an estimate of the margin of error in that number?

And, since the Administrator's obligation to issue 530,000 allowances from the reserve each year 2000-2009 appears to be absolute, where will the allowances come from to fully fund the reserve if there is not a full 5.30-million-ton reduction in 2000?

Finally, what is the worst case scenario for a pro rata reduction of allowances? And what share of that reduction would be assigned to Arkansas?

Mr. BAUCUS. As the compromise was introduced on March 5, we had a high degree of confidence that the allocation formulas in title IV would result in the allocation of no more than 8.90 million allowances. However, during the course of the debate, Senators have offered, and in some cases we have accepted, amendments that would increase the total number of allowances to be allocated beyond a total of 8.90 million tons. These, of course, would result in a pro rata reduction of each unit's allocation, so that the total number of allowances issued pursuant to all the allocation formulas, including those added by the amendments, would not exceed an 8.90 million total.

As for the level of emission reductions achieved in calendar year 2000, there are several factors that could prevent the Acid Rain Program from achieving 5.30 million tons of SO_2 emissions reductions in 2000. First, bonus allowances awarded to phase I units that use scrubbers could be applied by units in lieu of making actual reductions in that year. Second, some units that qualify for the compliance deadline extension granted for the use of clean coal repowering technology would not be making expected reductions in 2000.

In some ways, I believe I have described the assumptions that would underly a worst-case scenario, but one other should be noted and that would be massive noncompliance by the utilities themselves.

Arkansas' stake in this can be described as follows: Arkansas utilities receive 1 percent of the 8.90 million allowances. For each increment of 10,000 allowances that would have to be reallocated pursuant to any pro rata reduction necessary to maintain the 8.90 million allowance limit, Arkansas utilities would lose 100 allowances, or 1 percent of the total reallocated.

Mr. BUMPERS. I thank the Senator for his explanation, although the scenario he describes makes me very uncomfortable. I would again urge the managers and the conferees on this bill to do everything they can to protect the interests of the clean Class of '85 utilities and the clean States such as Arkansas.

Mr. CONRAD. I would like to ask the floor manager to clarify some aspects of the NO_x amendment offered recently by Senator LOTT. First, it is my understanding that low NO_x burners are not effective in controlling NO_x emissions from cyclone boilers.

Mr. BAUCUS. That is my understanding.

Mr. CONRAD. I would ask further whether the amendment is intended to

require selective catalytic reduction technology on cyclone boilers.

Mr. BAUCUS. The intent of the amendment is to require NO_x controls that are reasonable in cost. If the cost of selective catalytic reduction were to remain in excess of low NO_x burner technology, such technology would not be required for cyclones. There have been significant changes in the types and costs of NO_x controls and we do not know what the most effective controls will be at the end of the century.

Mr. CONRAD. I thank the floor manager.

Mr. KOHL. There are provisions in the clean air bill regarding carbon monoxide nonattainment which may subject two areas of the country to transportation controls when such controls may not be necessary to achieve clean air standards. I am referring to Oshkosh, WI and Steubenville, OH.

Mr. GLENN. The States of Wisconsin and Ohio are currently attempting to bring these two areas into compliance by requiring extensive controls on emissions from stationary sources located in those areas.

Mr. METZENBAUM. I would also like to point out that in my State of Ohio emissions from one steel company appear to be the primary source of the carbon monoxide exceedences.

Mr. KASTEN. The problem in Oshkosh, WI is primarily due to carbon monoxide emissions from inboard and outboard marine engines tested along the Fox River.

Mr. GLENN. It is my understanding that both States are bringing these sources under control and expect to have them in compliance in the near future.

Mr. METZENBAUM. We have letters from EPA Region V which recognize that stationary sources are the primary contributors to the carbon monoxide problems in these areas. I ask unanimous consent that these letters be printed in the RECORD.

Mr. KOHL. We believe that these areas are unique and that transportation controls may be inappropriate. Could the Senator from Montana give his interpretation of this legislation as it affects these two areas?

Mr. BAUCUS. The EPA letters indicate that with respect to these two specific areas, transportation controls may be unnecessary if stationary sources are deemed to be the primary contributor and are brought under control in a timely manner. This legislation should not alter this situation.

Mr. President, I ask unanimous consent that the letters be printed in the RECORD at this point.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

ENVIRONMENTAL PROTECTION AGENCY,
Chicago, IL, March 23, 1990.

DONALD F. THEILER,
Director, Bureau of Air Management, Wisconsin Department of Natural Resources, Madison, WI.

DEAR MR. THEILER: This letter concerns the information sent to Region V on March 23, 1990, as well as technical materials submitted previously regarding carbon monoxide levels in Winnebago County. Based on our review of this information, it appears the carbon monoxide problem is attributable to a point source. If the Administrator in his final action supports our initial finding, then mobile source controls would not be required.

Region V is looking forward to working with your office in resolving this problem. Please contact me if we can be of further assistance.

Sincerely yours,

DAVID KEE,
Director, Air and Radiation Division.

ENVIRONMENTAL PROTECTION AGENCY,
Chicago, IL, March 29, 1990.

PATRICIA P. WALLING,
Chief, Division of Air Pollution Control, Ohio Environmental Protection Agency, Columbus, OH.

DEAR MS. WALLING: This letter concerns information discussed with Region V over the last 2 weeks regarding the carbon monoxide problem in Jefferson County (Steubenville) Ohio. Based on those discussions, we understand that the State believes that the carbon monoxide problem in this area is attributable to a point source. If after State submittal and United States Environmental Protection Agency review of the necessary technical materials, the Administrator, in his final action, supports this conclusion then mobile source controls would not be required in this area.

We are looking forward to working with your office to resolve this issue. Please contact me if we can be of any further assistance.

Sincerely yours,

DAVID KEE,
Director, Air and Radiation Division.

Mr. PELL. Mr. President, I want to make sure that the Clean Air Act, as amended, specifically targets a study of atmospheric deposition to Great Lakes and coastal waters to include coastal waters and coastal estuarine systems in New England.

The goals of this worthy study are spelled out in admirable detail, but I want to be sure that the phrase coastal waters includes our New England coastal systems both above and below the tidal zone.

In Rhode Island, for example, the effects of atmospheric deposition are felt first in our rivers and streams before they are felt in our beautiful Narragansett Bay.

Mr. BAUCUS. I thank the Senior Senator from Rhode Island, Mr. PELL, and I appreciate his concern. It is our intent to include New England's coastal estuarine systems in this study.

Senator CHAFEE. I too, want to assure my colleague, the senior Senator from Rhode Island, Mr. PELL, that his concerns have been met in this legislation.

Mr. PELL. I thank my colleagues for their prompt and favorable consideration.

Mr. BAUCUS. Mr. President, I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum having been suggested, the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAUCUS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 1454 TO AMENDMENT NO. 1293

Mr. BAUCUS. Mr. President, on behalf of Senator HEFLIN, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Is their objection to laying aside the pending amendment? Hearing none, the clerk will report.

The legislative clerk read as follows:

The Senator from Montana [Mr. BAUCUS] for Mr. HEFLIN, proposes amendment numbered 1454 to amendment No. 1293.

Mr. BAUCUS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 248, line 18, after "units," insert the following:

"considering the rate and mass of such emissions, the health and environmental effects of such emissions, technologies which are available to control such emissions and the costs of such technologies."

On page 249, line 3, strike "(C)" and insert "(D)."

On page 249, line 13, strike "(D)" and insert "(E)."

On page 249, line 24, strike "(E)" and insert "(F)."

On page 250, line 5, strike "(F)" and insert "(G)."

On page 249, line 3, before "(D)," insert the following:

"(C) The National Institute of Environmental Health Sciences shall conduct, and transmit to the Congress not later than four years after the date of enactment of this paragraph, a study to determine the threshold level of mercury."

On page 249, line 9, after "paragraph." insert the following:

"The studies required by subparagraphs (A), (B), and (C) shall be placed in the relevant docket for any rulemaking that would establish emissions standards under subsection (d) for particulates or mercury from electricity utility steam generating units and shall be considered by the Administrator, along with other public comments, before any such standard is promulgated."

Mr. HEFLIN. Mr. President, this amendment deals with the regulation of electric utility steam generating units under title III of the Clean Air Act Amendments of 1989. As my colleagues know, the President's bill provided for a 3-year study of these emis-

sions, with a decision on regulations to be made after the completion of that study. The substitute which is currently being considered also contains a subsection that provides for studies of particulate and mercury emissions from utility units. It requires, however, that standards for these emissions be promulgated 5 years after enactment of this legislation. Under my amendment, which represents an important improvement in the substitute, the Administrator would consider the results of the very important EPA studies of particulate and mercury emission before setting any standards for these emissions.

The Administrator would also take into account an additional study which is required under my amendment. This study will be performed by the National Institute of Environmental Health Sciences which is a part of the centers of Disease Control [CDC]. Under my amendment, the Institute is asked to determine the threshold level of mercury. Based on that study and the other mandated mercury study, EPA will be able to determine if there is a need to set a human health based standard for mercury emissions under section 112(d)(4). On that point, I would like to submit for the RECORD a letter from Senator DURENBURGER, the author of much of this provision in the air toxics title which deals specifically with mercury emissions from powerplants. This letter specifically outlines the importance of subsection (d)(4) with respect to mercury emissions from this source.

While this clean air bill has been intensely scrutinized, I believe that through attention to these small details we have avoided the imposition of tremendous unintended and perhaps unnecessary costs to utility ratepayers while preserving or improving the environmental and health benefits we seek.

Mr. BAUCUS. Mr. President, the substitute amendment which is currently being considered contains a subsection that provides for studies of particulate and mercury emissions from utility plants. It requires that standards for these emissions be promulgated 5 years after enactment of this legislation.

Under the amendment offered by the Senator from Alabama, the Adminstrator would consider the results of certain EPA studies of particular and mercury emissions before setting standards for those emissions. Essentially, it would require certain studies be conducted and that the Administrator consider those studies before adopting requirements with respect to particulates of mercury emissions.

Mr. President, I am assured by the minority manager of the bill that this amendment is also acceptable to that side.

With that representation, I am prepared to yield back my time and, on behalf of Senator CHAFEE yield back his time, and urge adoption of the amendment.

The PRESIDING OFFICER. Is there further debate on the amendment?

The amendment (No. 1454) is agreed to.

Mr. BAUCUS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Colorado is recognized.

AMENDMENT NO. 1455 TO AMENDMENT NO. 1293

Mr. WIRTH. Mr. President, Senator ARMSTRONG and I have an amendment numbered 1455 to the bill which has been agreed to on both sides. I ask unanimous consent for its immediate consideration.

The PRESIDING OFFICER. Is there objection to setting aside the pending question and conceding to the Senator's unanimous-consent request?

Hearing none, without objection, it is so ordered.

The clerk will state the amendment.

The legislative clerk read as follows:

The Senator from Colorado [Mr. Wirth] for himself and Mr. ARMSTRONG, proposes an amendment numbered 1455.

Mr. WIRTH. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 208, add a new subsection 211(e), as follows:

(e) ESTABLISHMENT OF A HIGH-ALTITUDE RESEARCH CENTER.—Section 103 of the Clean Air Act is amended by adding at the end thereof the following new subsection:

"( ) The Administrator shall designate at least one center at high-altitude conditions provide research on after-market emission components, dual-fueled vehicles and conversion kits, the effects of tampering on emissions equipment, testing of alternate fuels and conversion kits, and the development of curricula, training courses and materials to maximize the effectiveness of inspection and maintenance programs as they relate to promoting effective control of vehicle emissions at high-altitude elevations. Preference shall be given to existing vehicle emissions testing and research centers that have established reputations for vehicle emissions research and development and training, and that possess in-house Federal Test Procedure capacity.

Mr. WIRTH. Mr. President, this Armstrong-Wirth amendment concerns light-duty vehicle emissions research. As you know, there is an established center already doing this type of testing and research. It is the National Center for Vehicle Emissions Control and Safety [NCVECS] located at the Colorado State University in Fort Collins, CO. EPA has used the center since 1977 for research on this issue. Given the increased need for additional indepth information and intensive research on auto and light duty truck emissions (so as to continually work toward better policies for achieving cleaner air), it makes sense to continue the relationship between NCVECS and EPA. The purpose of this amendment would be to strengthen that relationship, and further EPA research goals in the light-duty emissions arena.

Besides its historic association with EPA, other important facts to note about NCVECS include:

The purpose of the center is to help States with research and training efforts in the area of vehicle emission control.

NCVECS is involved in the development of materials and training for almost all of the inspection and maintenance [I/M] programs across the United States.

Research efforts have ranged from conducting EPA's national tampering survey for the last 5 years, to in-house laboratory experiments for the State of Colorado on effects of diesel emissions on opacity at high altitude.

NCVECS has in-house FTP [Federal Test Procedure] capacity. This recently acquired equipment allows it to conduct high-altitude vehicle emission research.

NCVECS has a cadre of well-informed experts from a variety of disciplines available onsite.

NCVECS has the capability of conducting valid, independent, and unbiased research, without Federal, State, or local interference.

NCVECS has the facilities with sufficient potential and flexibility to accommodate necessary high-altitude equipment, vehicles and, personnel as required for a full, effective high altitude test center.

NCVECS has a 12-year reputation for excellence in vehicle emission training, development, and research.

NCVECS is located at high altitude as defined in the Clean Air Act.

This amendment is agreed to by both sides.

The PRESIDING OFFICER. Is there further debate on the amendment No. 1455 offered by the Senator from Colorado?

The Senator from Montana, Mr. BAUCUS.

Mr. BAUCUS. Mr. President, the majority and minority managers have had an opportunity to examine the amendment offered by the Senator from Colorado. It is a good amendment.

We accept it and yield back the remainder of our time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 1455) is agreed to.

Is there a motion?

Mr. BAUCUS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. WIRTH. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. WIRTH. I thank the distinguished Republican leader and manager of the bill for their consideration.

The PRESIDING OFFICER. The Republican leader is recognized.

Mr. DOLE. Mr. President, in a moment or two I am going to propose a modified Nickles-Heflin-Dole amendment as a substitute for titles V and VI of amendment No. 1293. This in most respects is the same permitting and enforcement amendment that was voted on by the Senate last week. We had two votes. We won the first vote and came very close on the second vote.

After the second vote I entered a motion to reconsider the vote. I am not going to call up that motion now. This will just be an amendment that will be offered under my reservation of the three leadership amendments. It will be one of those amendments.

I think there was a lot of misunderstanding what we intended and what our amendment actually does. The amendment preserves the strong environmental goals of this legislation but it gives greater certainty to the 50,000-or-so sources out there who will be covered under this bill so that they will not have to keep dealing with a changing set of requirements that are unnecessary to protect the public health and environment.

Our staffs—along with the White House, EPA, and Justice Department staffs—met with the committee staffs to address their concerns. A number of changes were made to meet these concerns, guaranteeing vital safeguards in the bill and providing strong enforcement authority.

In view of the late hour and how close we are to completing action on this important measure, as I have indicated I will offer a modified amendment for myself, the Senator from Alabama, and the Senator from Oklahoma, Senator HEFLIN and Senator NICKLES. In order to reduce the time of the Senate to be required to go through the reconsideration process this amendment changed from the original Nickles-Heflin-Dole amendment and that modification will be explained by the distinguished Senator from Oklahoma.

In brief we have added a new requirement for an approvable State permit plan. We have placed a 12-month time limit on the State agency for consideration of permit applications. This amendment would require the State to grant or deny an application for a permit or a permit renewal within 12 months of the date the application was determined to be complete.

We had intended that the EPA would set an appropriate time limit for State approvals. However, during the debate on this amendment, it became clear several Senators preferred to set a reasonable time for the legislation rather than defer setting the deadline to EPA.

This change helps the sources waiting to be permitted and also helps the public. Sources will now be assured of timely notice from the State about what their requirements would be under the Clean Air Act.

The public and the environment will be assured that emission limits will be established by the State agency and imposed on sources within a set time.

The White House, EPA, and Justice Department—with whom we worked closely during the entire process—support the change. And I hope some Senators who voted against the amendment will listen carefully. There is not much time left for debate. This is an important amendment. Keep in mind it is going to affect 50,000 businesses and some are going to be in your State. We are not trying to undo anything. We are just trying to have a little more certainty and flexibility.

AMENDMENT NO. 1456 TO AMENDMENT NO. 1293

(Purpose: To insert a new title V and VI)

Mr. DOLE. Mr. President, I send the amendment to the desk, as I indicated earlier on behalf of myself, Senator HEFLIN, Senator NICKLES, and others.

The PRESIDING OFFICER. Is there objection to setting aside the pending question to amendment No. 1307?

Without objection, it is so ordered.

The clerk will state the amendment.

The legislative clerk read as follows:

The Senator from Kansas [Mr. DOLE], for himself, Mr. NICKLES, Mr. HEFLIN, Mr. NUNN, Mr. MCCLURE, Mr. MCCONNELL, Mr. SIMPSON, Mr. BOREN, Mr. COCHRAN, Mr. BOSCHWITZ, Mr. SYMMS, Mr. MURKOWSKI, Mr. ARMSTRONG, Mr. FORD, and Mr. SHELBY proposes an amendment numbered 1456.

Mr. DOLE. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The text of the amendment is printed in today's RECORD under "Amendments Submitted.")

The PRESIDING OFFICER. The Senator from Oklahoma [Mr. NICKLES].

Mr. NICKLES. Mr. President, first I wish to compliment Senator DOLE and Senator HEFLIN. This is basically the same elements of the so-called Nickles-Heflin-Dole amendment which we discussed at length. Actually, I think we have discussed it at length over the last couple days, and we had a couple of close votes, and I think procedurally most of my colleagues are aware of the fact that this issue would be revisited.

I am hopeful that my colleagues will look seriously at the elements of the amendment. I believe we have had extensive debate. I do not expect to repeat all the debate that we have had in the past but to summarize. It is vitally important for the environment to have a permitting section that works, and to have an enforcement section that works.

This amendment is at the request of both the Administrator of the Environmental Protection Agency and also the Department of Justice. They have helped to write and develop this amendment because they want to have a system that will work.

We have made a couple minor modifications to the previous amendment, a couple of suggestions that were made by colleagues to make this a better section, to insure that the States will act promptly in making the decision on the permits. States will have to make a final determination on a permit application. Once that application is complete, the State permitting authority has to decide and act upon it in 12 months.

I think that is a positive amendment. It is a substantive amendment. It is an important amendment. So I hope my colleagues will look at that.

Again, we have crafted this amendment very carefully. Both sections work together. It is vitally important for the environment. Incidentally, if someone characterizes this amendment again and says this guts permitting and enforcement, they just do not understand the amendment. This amendment provides for significant enforcement. This amendment provides for a permitting section that will work.

Again I encourage my colleagues to think about this amendment, and I hope support it. If not, what we are going to have under the so-called Baucus-Chafee approach, or under the committee approach, is a logjam, a logjam of permits that are going to be stacked up at the EPA headquarters.

Businesses all across the United States are going to be filing permit applications, which they need to do under the law to be in compliance, but these applications may not be acted upon and therefore they may not be granted. Therefore, a lot of jobs, a lot of new construction that we would like to see happen in the United States, unfortunately will be happening in other parts of the country, or maybe will not happen in the United States. They will be happening in Mexico, or maybe in Canada, or in other countries. We do not want that to happen.

There are significant differences. I will highlight the major differences between the Dole-Heflin-Nickles

amendment and the so-called Baucus-Chafee amendment.

The differences are significant, one of which is that we allow a preference for construction permits, a preference. We do not want construction permits to be bogged down in the morass of waiting in line for approval by the permitting authority.

If the construction permit does not go forward, then the plant is not built, the expansion is not made. That is the reason, I tell my colleagues, the majority leader and you others, the building and trades industry of the AFL-CIO supports our amendment, because they want to see jobs in the United States, not just jobs exported into other countries. So that is an important provision.

We also provide in our amendment some operational flexibility for companies so they can change some of the various compositions of their work product and make those changes. Unfortunately, under Chafee-Baucus it cannot happen. So if a company that produces a wide variety of products needs to make some changes, they have to go file a permit application. If that permit application is not acted upon, they cannot get a permit, they cannot make changes, they cannot be competitive, they lose jobs. And we do not want that to happen. We want the jobs to stay in the United States. We want U.S. firms to be environmentally safe, but we also want to be competitive. We want jobs in America and we want to minimize the job loss.

So companies need the operational flexibility. Our amendment provides that. Unfortunately, it is not provided for under the Baucus-Chafee approach.

Another major difference—and maybe the Senator from Alabama [Senator HEFLIN] would like to allude to this—but under the Baucus-Chafee approach, citizens can take an action against EPA discretionary decisions, and to me I think that would be a serious mistake.

What we will have under the Baucus-Chafee approach is that permit decisions, when people are filing for permits, et cetera, they will have people challenging EPA for making a discretionary decision. And so when EPA makes that decision and a citizen group may bring suit and maybe the citizen group has environmental concerns but it could be, or it might be some organization that is not really interested in any change whatsoever—they can file suit against EPA for making that discretionary decision. We would not do that under the Dole-Heflin-Nickles amendment.

There are very significant differences between our amendment and the Baucus-Chafee amendment. Our amendment certainly does streamline the process and I think would make the permitting and enforcement process work.

Again, we have support by the Department of Justice, we have support by EPA, we have support by the Chamber of Commerce, the NFIB, the National Association of Manufacturers, the building and trades industry of the AFL-CIO. It is a good, solid, well-reasoned, well thought out amendment that will help make the permitting and enforcement section work.

I urge my colleagues to support the amendment.

The PRESIDING OFFICER. The Chair would inquire of the sponsors of the amendment, who controls time?

The proponents have 5 minutes 45 seconds as offered by the distinguished Republican leader.

Mr. DOLE. I yield control of the time to the Senator from Oklahoma.

The PRESIDING OFFICER. Who yields time?

Mr. NICKLES. I am happy to yield to my colleague from Alabama such time as he requires.

Mr. HEFLIN. Mr. President, I will not take long. We voted on this twice. I think everybody knows what the issues are and I think we might as well go ahead.

There has been a change made to go back to the Environment and Public Works Committee. When a State agency does not act on a permit within 12 months, then the industry is caused to cease to operate.

I have argued previously and I have called this the cross-examination amendment. If you believe that fairness dictates that you ought to have a right of cross-examination, then you will vote for the Nickles-Heflin-Dole or the Dole-Heflin-Nickles, however it might be arranged. I think it is basic fairness. I think everybody knows the issue, everybody has made up his mind, and I think we ought to go ahead and vote.

Mr. BAUCUS. Mr. President, how much time is remaining on each side?

The PRESIDING OFFICER. Twelve minutes and 24 seconds on your side, and 3 minutes 39 seconds on behalf of those who offered the amendment.

Mr. BAUCUS. Mr. President, I yield myself 3 minutes.

Mr. President, it sounds like this is the same amendment. There may be some minor modifications, but from the statements of the Senator from Alabama and the statements of the Senator from Oklahoma, it sounds like virtually the same amendment earlier offered by the Senators from Oklahoma and Alabama which would extend the permit shield provisions so broadly as to, in effect, allow a source to pollute on matters that are not covered by the permit that would be issued by the permitting agency.

Second, it sounds like the amendment also contains a long list of opportunities to review an enforcement decision made by the permitting agency. The substitute bill before the Senate goes further than current law in bending over backward to give sources the opportunity for preenforcement review, much beyond current law. The earlier Nickles amendment, and it is apparent it is the same Nickles amendment, has this long service of four, maybe even five levels of review which in many respects is a lawyer's relief act and would very much prevent the enforcement provisions of the Clean Air Act.

In addition, Mr. President, subsequent to the earlier debate on the Nickles amendment, the Senate did agree to a modification which made it clear the discretionary action by the Administrator or the permitting agency would not be subject to a citizen suit.

Mr. NICKLES. Will the Senator yield?

Mr. BAUCUS. Very briefly.

Mr. NICKLES. Did the Senator state that a modification has already been made?

Mr. BAUCUS. That is what the Senator said.

Mr. NICKLES. Did the Senator say that applied to all four? There are four different sections that applied to EPA discretionary authority that allowed citizen suits, under the original Baucus-Chafee approach as discussed by Senator SPECTER, that allowed citizen suits against EPA on discretionary activity.

Does the Senator take care of each one of those sections?

Mr. BAUCUS. I might say to the Senator further, the reason for opposing this amendment is the Senator's amendment is coming up at such a late date. I do not know what is in the Senator's amendment. The Senate does not know what is in the Senator's amendment. So it is hard to know which, or agree to which earlier modification applies to the Senator's amendment.

We have already voted on this amendment several times. Under the last vote we defeated it. Very simply, the Clean Air Act means nothing if it cannot be enforced.

The amendment offered by the Senator from Oklahoma very dramatically reduces the enforcement provisions of this bill. And if enforcement provisions of this bill are diluted to such a degree as propounded by the Senator from Oklahoma, then many of the provisions of the Clean Air Act will be virtually useless. It will not amount to anything.

If we are going to clean up this Nation's air, Mr. President, if we are going to successfully enforce the provisions of this bill, we have to have enforcement provisions that work, that gives rights to people of this country

to be sure, as much as possible, that the air is going to be cleaner than it otherwise might be.

For those reasons, Mr. President, and others we debated earlier, I strongly urge the Senate to reaffirm its last vote. And the last vote was to reject the Nickles amendment.

The VICE PRESIDENT. The Senator from Rhode Island.

Mr. CHAFEE. Mr. President, I ask for 3 minutes.

Mr. BAUCUS. I yield 3 minutes to the Senator from Rhode Island.

Mr. CHAFEE. Mr. President, we voted on this amendment a week ago today. And now at 2 minutes of 8 when the final gun goes off, when there is no time for further discussion or even investigation, we are presented with a 32-page amendment.

The distinguished Republican leader says it is different. The distinguished Senator from Oklahoma says it is not different; we ought to know what is in it because it has not changed much. And that is what the Senator from Alabama said. I do not know whether it has or has not changed because you would have to be a magician to look through this and determine whether it is changed or not.

Mr. President, the Nickles amendment preempts State actions in citizens suits to enforce new requirements. It makes compliance with the permit a complete defense. When we are talking about shields, we are talking about somebody who gets the permit, and then that is a shield, nothing else can take place, even though it would prevent the State, the only way they could make changes is if they found actual harm to public health.

Now, actual harm, what does that mean? Somebody drops dead from the emissions that have arisen? Furthermore, we have not yet taken care of the citizen suit provision that is in this amendment. I assume. Who knows? Nobody has read it. That permits the Federal Government to come in at the last moment and stand in the shoes of the citizen who has brought this suit all the way from the beginning. The citizen has to notify the Federal Government, "Look, I am going to sue that polluter."

The Federal Government says, "No, you go ahead. We do not want any part of it."

So the citizen, at his own expense, takes this case all the way up through even the circuit court, and just as he is going to get the final award the Federal Government steps in and says, "We are stepping in. We are going to take over." Big Brother is coming in.

That is not fair at all. Everybody recognizes that.

So, Mr. President, for the very same reasons that we voted to reject this amendment a week ago today, I ask we do the same thing tonight.

The VICE PRESIDENT. Who yields time?

Mr. NICKLES. Mr. President, how much time is remaining?

The VICE PRESIDENT. The Senator from Oklahoma has 3 minutes and 39 seconds. The Senator from Montana has 6 minutes.

The Senator from Oklahoma is recognized.

Mr. NICKLES. Mr. President, just to make a couple of final comments. My colleagues from Montana and Rhode Island said that there were some changes. But it is interesting to note they said that they were willing to make some changes in their amendment because they do not think that EPA should be able to be sued for making discretionary decisions. But it is uncertain whether that change had been made yet. And it is uncertain whether it applied to all four sections. I think it is vitally important that when the change is made, that it apply to all four sections.

I have a letter from the Attorney General. I will put it in the RECORD. But the Attorney General said that under Baucus-Chafee EPA would be sued for making discretionary decisions. EPA is going to make thousands and thousands of discretionary decisions under either proposal. But if we allow EPA to be sued every time they make a discretionary decision, the whole permitting process is just going to be bogged down with litigation.

So with the Baucus-Chafee approach, if we do not amend it as requested by the Attorney General, we are going to have litigation galore, and that will not help the environment. What we will have is EPA using their precious resources defending themselves instead of going out after the polluters.

Then I heard my colleague say, well, this guts compliance, this guts enforcement. That is totally false.

I have on this chart, and we are about out of time, but we have a formal review by an administrative law judge. If he agrees with EPA that there is a violation, that polluter has to stop.

Under the Chafee-Baucus approach, they have an informal review by an EPA employee, a bureaucrat. That bureaucrat can impose fines, $25,000 a day, shut down businesses, put people out of work. This can be appealed under Chafee-Baucus. It can be appealed to the circuit court. There are not very many circuit courts. A circuit court has a three judge panel. Under our approach, it goes to the district court. There are many more district courts. There is only one judge. It is a much more expedited procedure.

Incidentally, I might mention under Chafee-Baucus, if they decided they needed to order a source to comply, they could not. They would have to remand it back to the district court which has injunctive authority. We are already at the district court, so if the district court wanted to issue an injunction and say "Polluter stop," they would have to stop. So ours would be a much more streamlined process. It is a process that would work.

This was not dreamed up by Senator NICKLES. It was put together by the Justice Department. They used a lot of common sense. It would provide real enforcement. So those people who say this amendment lacks enforcement or would gut enforcement do not understand the amendment.

This is a good amendment. It is one which is proenvironment. It will help the environment, and I hope my colleagues will support it.

I reserve the remainder of my time.

The VICE PRESIDENT. Who yields time?

Mr. CHAFEE. I will take 30 seconds.

Mr. BAUCUS. I yield 30 seconds to the Senator from Rhode Island.

The VICE PRESIDENT. The Senator from Rhode Island is recognized for 30 seconds.

Mr. CHAFEE. We always worry about those who are out in the firing lines, and there has been talk about whether this is easier to enforce or is not. The statement is pro environment.

Here is a letter from the State and Territorial Air Pollution Program Administrators, those who have to enforce the law, and they write: We urge you to oppose the Nickles-Heflin-Dole amendment.

The people who have to enforce the law, this is what they have to say.

Mr. NICKLES. Will the Senator yield? They do not enforce the law. It is the Justice Department that enforces the law and EPA enforces the law. It is not them. They implement the law.

Mr. CHAFEE. There is no question about it, and they are opposed to your amendment.

The VICE PRESIDENT. The Senator's 30 seconds have expired.

Mr. DOLE. When is the letter dated?

Mr. CHAFEE. The 26th. It has not changed.

The VICE PRESIDENT. Who yields time? If no one yields time, the time is deducted equally from both sides.

Mr. NICKLES. How much time do I have remaining?

The VICE PRESIDENT. The Senator from Oklahoma has 58 seconds. The Senator from Oklahoma is recognized.

Mr. NICKLES. Mr. President, my colleague mentions a letter by some group that was dated some time ago. That letter came out about the same day we made the original modification. We made modifications to this bill to make it work better.

I think it is vitally important, again, to emphasize to my colleagues that we need a permitting program and an enforcement program that works.

I might mention that the original language was written by EPA and the Department of Justice. They studied it and they said, "Wait a minute, we need to have this more in concert with the Clean Water Act."

They made some mistakes in the Clean Water Act, so they have learned from that.

So both the Justice Department and EPA said, let us learn from our mistakes. Let us come up with a better, more streamlined approach that will help implement the Clean Air Act. And that is what this Senator wants to do. I want to have a Clean Air Act that will work. Frankly, I have been told by enough people, including the administration, including the people who have to enforce the act, that changes need to be made. The companies will be stacked waiting in line for permit applications that will cost jobs in the United States. We do not want that to happen.

The VICE PRESIDENT. The time of the Senator has expired. The Senator from Montana.

Mr. BAUCUS. I yield myself 1 minute.

Mr. President, despite what the Senator from Oklahoma says, it is the judgment of this manager of the bill that this is, in fact, a gutting amendment. There is no question about it. This amendment very dramatically dilutes the enforcement powers of the permitting agency or the appropriate enforcement officials. It also makes it very difficult for people of this country to try to enforce the provisions of this bill. It will be difficult having these provisions enforced. This is a gutting amendment.

I must say, Mr. President, in the West we also call this an ambush. Here it is, a few minutes before the final hour. It is a 34-page amendment. Nobody has a chance to read the amendment. This is an ambush. Frankly, Mr. President, I think this ambush should be rejected for the tactics that are being used here, let alone the provisions of the amendment.

Mr. President, I yield the remainder of my time to the majority leader.

The VICE PRESIDENT. The majority leader is recognized for 3 minutes and 8 seconds.

Mr. MITCHELL. Mr. President, I urge my colleagues to reject this amendment. A Senator who votes for final passage of this bill, and votes for this amendment, is voting to create an authority on one hand and then to make it difficult to enforce that authority on the other hand. The two go together. A right that cannot be enforced is not a right. An authority that cannot be exercised is not an authority.

The issue here is whether we are going to, on the one hand, create the impression of dealing with the problem of clean air and then take the authority away from the EPA.

The Senator from Oklahoma cited a list of people who favor his amendment. Here is a letter from those who have to enforce the law, the State and Territorial Air Pollution Program Administrators, the Association of Local Air Pollution Control Officials. They oppose this amendment. They are the ones who are charged with the responsibility of enforcing the law and they know what impediments this will create to that authority.

I ask unanimous consent that this letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

STAPPA/ALAPCO,
Washington, DC, March 26, 1990.

Hon. JOHN H. CHAFEE,
U.S. Senate, Senate Dirksen Office Building, Washington, DC.

DEAR SENATOR CHAFEE: Last week, on behalf of the State and Territorial Air Pollution Program Administrators (STAPPA) and the Association of Local Air Pollution Control Officials (ALAPCO), we wrote to you expressing our concerns with an amendment—authored by Senators Don Nickles, Howell Heflin and Robert Dole—that would significantly weaken the permitting program proposed by you and other Senate leaders. Since that time, the Nickles-Heflin-Dole amendment has been changed in several respects. However, notwithstanding these recent changes, STAPPA and ALAPCO still have some significant concerns.

Perhaps our greatest concern with the most recent version of the Nickles-Heflin-Dole amendment is that it prohibits permitting agencies from revising the requirements of a permit during its five-year life unless it can be demonstrated that there is "actual harm to public health." As we stated in our earlier letter, this provision could easily allow a permitted source to escape regulatory requirements for almost five years, if such requirements are issued after a source has obtained its permit.

This provision clearly represents not only a significant relaxation to our existing permitting program, but also a loophole that would impede state and local efforts to ensure the timely and effective control of sources of air pollution. STAPPA and ALAPCO urge you to oppose the Nickles-Heflin-Dole amendment.

Sincerely,

BRADLEY J. BECKHAM,
STAPPA President.
JAMES M. LENTS,
ALAPCO President.

Mr. MITCHELL. I specifically and categorically reject the argument presented by the Senator from Oklahoma that the Baucus-Chafee amendment permits citizen suits for discretionary acts. It does not do so. That is an erroneous argument. It is misplaced. It does not describe what is in this bill, whether the Attorney General says it or not.

He is just another person and another lawyer, and his opinion counts for no more than any individual Senator's, especially since the Attorney General is obviously pursuing the policy of the administration.

I can assure my colleagues, if the policy of the administration were in favor of this amendment they would have a letter from the Justice Department saying that it did not provide such authority for such suits, and every Member of this Senate knows that.

Finally, Mr. President, let me say it is hard to reach changes in a 32-page amendment presented 22 minutes before the hour a week after it was debated. But so far as I can see, one change made in the amendment is that it makes it easier for citizen suits to occur than it did under the original Nickles-Heflin amendment. By imposing the 1-year deadline, that creates a threshold within which citizen suits can then be maintained that would not have been possible under the Nickles-Heflin amendment, as proposed.

So in that one respect, the amendment changed, as far as I can tell, and this was a very quick review because we only had the amendment 20 minutes ago. It makes it easier to bring citizen suits than was the case in the original Nickles-Heflin amendment.

Basically, I say to Members of the Senate, there is one issue here. Do we want to enforce the law once we pass the law? Do we want to give the EPA the tools to do what we say we want them to do when we enact the clean air bill? That is the issue here.

A vote against this amendment is a vote to enforce the law that we are about to enact. A vote for this amendment is a vote to say we are creating this authority, but we want to make it tough to have it implemented.

I urge the defeat of this amendment.

Mr. NICKLES. Mr. President, I ask for the yeas and nays.

The VICE PRESIDENT. All time has expired. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. HUMPHREY. Mr. President, since last week I have availed myself of the opportunity to more thorough study to the issues raised by the Nickles amendment. As a result of extensive discussions with Senators on both sides of the issue, and a thorough review of legal concerns raised by the Department of Justice, I have concluded that the Nickles amendment does in fact represent a necessary improvement to the clean air bill.

In particular, the Justice Department has demonstrated the serious problems that would be raised by the bill's provisions regarding citizens' suits based on violations that occurred wholly in the past. Under current law, which I support, citizen plaintiffs can sue for past violations which may

recur, or which present the possibility of additional or continuing harm. However, in the Supreme Court's decision in the Gwaltney case, the Court held that under the identical provisions of the Clean Water Act, citizen suits are not authorized for purely past violations which present no prospect of recurrence or continuing harm. Thus, if the past violator has put in place remedial measures that clearly and conclusively eliminate the cause of the violation, there is no valid basis for a citizen suit.

This reasoning is especially compelling since the citizen plaintiff lacks constitutional standing to sue for a past violation which presents no prospect of present or future harm. Three members of the Supreme Court stated in Gwaltney that a plaintiff would have no standing under the Constitution to sue a defendant which is in full compliance when the suit was filed. I see no reason to jeopardize the constitutionality of the citizen suit procedures with a questionable authorization of citizen suits for wholly past violations.

Further, I note with approval several changes the Senator from Oklahoma has made which clearly improve his amendment. First, it establishes a deadline of 12 months for States to approve permits. Under the Nickles amendment, as modified, if a State does not approve a permit within 12 months then a right of action is created to force the State to act. This is an important improvement over the previous Nickles amendment which had no such deadline.

Further, the amendment has been modified so that permits within the bill could be modified if they pose "actual harm to public health or the environment." The addition of the word "environment" significantly modifies the standard against which the Administrator of the EPA would make his decision to seek changes to existing permits.

At another point in the Nickles amendment, as pending before the Senate, there is a provision to give States the authority to modify permits to protect against a "serious risk to public health or the environment." Again, this language has been changed to add the words "or the environment."

I recommended these changes to the Senator from Oklahoma, and I am pleased that he accepted them. In my view, they are improvements over the Nickles language last considered by the Senate.

Mr. BIDEN. Mr. President, I would like to address generally a few of the enforcement issues raised by my colleagues during debate on the amendment offered by Senators NICKLES and HEFLIN.

When the details of the enforcement title were first made available, I raised concerns about some of the details. Perhaps the most glaring one was a section everyone agreed was an unintended mistake, the provision that has been described as potentially resulting in 50 years in jail for a bookkeeping error.

The negotiations organized by the Senate leadership did not address the enforcement provisions, but the Environment Committee leadership worked to resolve many of the issues involved in separate meetings. As changes were proposed in the enforcement title, many of the provisions I viewed as problematic were fixed, including the risk of an unintended bookkeeping error landing a small business owner in jail. New proposals from both sides that I believe would have been wrong to adopt as part of our Nation's environmental policy were dropped or modified.

During the course of those efforts, I heard what the administration wanted in the title, what industry wanted, but most important what the public needs to have confidence that the other sections of this bill are implemented in a timely manner. Title VI of the leadership amendment balances those often conflicting interests. I have remaining concerns, but with the administration's proposals as the alternative at this time, we should stick with the provisions of the leadership amendment.

I heard during earlier debate that changes are needed to make the enforcement provisions workable. I am not sure what was meant by workable, but I am concerned that it meant that the bad actors, polluters who have raised fighting environmental compliance to a miserable art form, would have many more opportunities than justified to delay compliance with environmental standards.

I heard my distinguished colleague from Wyoming, Senator SIMPSON, remark on the recent trial of Captain Hazelwood, captain of the *Exxon Valdez*, noting that the emotions of the moment can overwhelm a commitment to justice. But the review process for administrative orders in the leadership amendment allows for the orderly and factual review that is so important.

The leadership amendment allows for fast action by the Environmental Protection Agency in emergency situations, when the public's health is threatened. That is only prudent and no one disagrees with that authority. But for the more insidious cases, the slower acting ones in which the public's health is at risk over the long term, no rush to decision is allowed. Title VI allows for review by the Environmental Protection Agency and for court appeals after a decision is made, but it balances these protections with a determination that delay for delay's sake will not be allowed.

I also heard charges that small businessmen could be thrown in jail for failing to maintain records that are not even considered material to reports required for the EPA. This charge illustrates one of more frustrating aspects of the debate over the enforcement provisions. Many of the characterizations of the enforcement provisions do not reflect what is contained in the leadership amendment. To set the record straight, under the leadership amendment, a person knowingly would have to make a false material statement or knowingly fail to file material information to be subject to penalties.

Throughout the amendment proposed by Senator NICKLES, I find a recurring notion that industry demands some higher level of protection than individuals can expect to receive. The leadership amendment establishes conditions in which reasonable people will reach different conclusions. Some of those conclusions may be in industry's favor, others will not. Companies will have the chance to make their case. But we cannot create a situation in which polluters have all the advantages.

When the enforcement provisions of the original bill are compared to what the adminstration asked for, it is obvious that the committee came a long way to accommodate their conerns. When the enforcement title of the leadership package is compared to what we need to protect the legitimate rights of individuals and companies, the title assures there will be no "kangaroo courts" on environmental compliance questions.

And when the enforcement title is compared with the desire of the public to see their air cleaned up, the title in the leadership amendment leaves greater assurance progress will be made.

As was stated in earlier debate, the enforcement and permitting titles of the Clean Air Act are the heart of the law. Tough standards and deadlines are meaningless if we have no way to push companies to meet them, or impose proper penalties if they ignore them. I support the provisions of title VI of the leadership amendment and urge my colleagues to continue to reject the administration's proposals should they again be voted on by the Senate.

The VICE PRESIDENT. The question is on agreeing to amendment No. 1456, offered by the Republican leader.

The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

The VICE PRESIDENT. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 49, nays 51, as follows:

[Rollcall Vote No. 53 Leg.]

YEAS—49

Armstrong	Glenn	Murkowski
Bond	Gorton	Nickles
Boren	Gramm	Nunn
Boschwitz	Grassley	Robb
Burns	Hatch	Rockefeller
Byrd	Heflin	Roth
Coats	Heinz	Rudman
Cochran	Helms	Shelby
Conrad	Humphrey	Simpson
D'Amato	Kassebaum	Specter
Danforth	Kasten	Stevens
DeConcini	Lott	Symms
Dixon	Lugar	Thurmond
Dole	Mack	Wallop
Domenici	McCain	Warner
Ford	McClure	
Garn	McConnell	

NAYS—51

Adams	Fowler	Matsunaga
Baucus	Gore	Metzenbaum
Bentsen	Graham	Mikulski
Biden	Harkin	Mitchell
Bingaman	Hatfield	Moynihan
Bradley	Hollings	Packwood
Breaux	Inouye	Pell
Bryan	Jeffords	Pressler
Bumpers	Johnston	Pryor
Burdick	Kennedy	Reid
Chafee	Kerrey	Riegle
Cohen	Kerry	Sanford
Cranston	Kohl	Sarbanes
Daschle	Lautenberg	Sasser
Dodd	Leahy	Simon
Durenberger	Levin	Wilson
Exon	Lieberman	Wirth

So the amendment (No. 1456) was rejected.

Mr. BAUCUS. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. CHAFEE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAUCUS. Mr. President, we are now past 8 o'clock. Theoretically, other amendments are in order but I am unaware of any amendments that Senators have to offer at this point. Mr. President, I see the Senator from Wyoming on the floor. He may have an amendment.

The VICE PRESIDENT. The Senate is not in order.

Mr. SIMPSON. Mr. President, we have reviewed the procedural situation, 10 minutes equally divided on any remaining amendments. It that correct?

Mr. BAUCUS. That is correct.

Mr. SIMPSON. I will proceed so that our Members can get about the evening's business. I see some very nattily attired.

AMENDMENT NO. 1457 TO AMENDMENT NO. 1295

Mr. SIMPSON. I send an amendment to the desk, and ask for its immediate consideration.

The VICE PRESIDENT. Without objection, the pending amendment will be set aside. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Wyoming [Mr. SIMPSON] proposes an amendment numbered 1457.

Mr. SIMPSON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The VICE PRESIDENT. Without objection, it is so ordered.

The amendment is as follows:

On page 245, line 17, add to Section 112(d) the following new subsection:

"(10) No standard for radionuclide emissions from facilities licensed by the Nuclear Regulatory Commission (or an Agreement State) is required to be promulgated under this section if the Administrator determines, after consultation with the Nuclear Regulatory Commission, that the regulatory program established by the Nuclear Regulatory Commission pursuant to the Atomic Energy Act provides an ample margin of safety to protect the public health. Nothing in this subsection shall preclude or deny the right of any State or political subdivision thereof to adopt or enforce any standard or limitation respecting emissions of radionuclides which is more stringent than the standard or limitation in effect under sections 111 or 112.

Mr. BAUCUS. Mr. President, the Senate is not in order.

The VICE PRESIDENT. The Senator from Montana is correct. Will the Senator from Wyoming suspend? Will those Senators desiring conversation please retire from the Chamber?

The Senator from Wyoming.

Mr. SIMPSON. Mr. President, I hope Senators will pay close attention to this. We had an amendment several days ago, which was debated thoroughly with regard to the regulation of radionuclides. In that measure there was a great deal of debate about the preemption of the States. It seemed that many did not want to preempt the States' authority to issue radionuclide standards which are necessary to protect public health.

Mr. GLENN. Mr. President, may we have order? This is a very important proposal.

The VICE PRESIDENT. The Senator from Ohio is correct. Will the Senate please come to order?

Individuals desiring conversations please either cease conversations or retire from the Chamber.

The Senator from Wyoming.

Mr. SIMPSON. Mr. President, I appreciate the attention. It will not last long. This prior amendment on radionuclides stimulated a great deal of discussion on the preemption of the States, stringency requirements, and so on.

The real issue was dual regulation of radionuclides by the NRC and by the EPA. This is not known as a nuclear power amendment. We have not sighed and cried about it, but what you effectively have done is hurt some facilities in America that you may not have intended to.

The current NRC regulatory program covers not only nuclear powerplants. You also have byproduct facilities such as research reactors, hospitals, clinics using nuclear isotopes, and the radiopharmaceutical industry. Under this regulatory program, the NRC-licensed facilities are required to meet particular safety standards, including specific limits on all of these radioactive emissions. In addition, all facilities licensed by the NRC are required to reduce their emissions to levels which are as low as reasonably achievable, or ALARA.

The NRC regulatory program, including the ALARA principle, has established exposure limits which are extremely low. EPA currently believes that these limits are adequate to protect public health with an ample margin of safety.

So where we are now is a presentation of an amendment. Let me read it to you so there is no whizbangs in it. It does not talk about State preemption. Here is what it says. I hope you will listen carefully. It is not long.

No standard for radionuclide emissions from facilities licensed by the Nuclear Regulatory Commission (or in an agreement State) is required to be promulgated under this section if the Administrator—

That is the Administrator of the EPA—

determines, after consultation with the Nuclear Regulatory Commission that the regulatory program established by the Nuclear Regulatory Commission pursuant to the Atomic Energy Act provides an ample margin of safety to protect the public health. Nothing in this subsection shall preclude or deny the right of any State or political subdivision thereof to adopt or enforce any standard or limitation respecting emissions of radionuclides which is more stringent than the standard of limitation in effect under section 111 or 112.

That is the extent of the amendment. It is simply to provide that there be no dual regulation which is expensive and disruptive. Still at any time the Administrator of the EPA feels the NRC is not doing what they should be doing, they have the right to intervene. Under this amendment, EPA will not be required to issue Clean Air Act regulations for radionuclides emitted from NRC-licensed facilities if the Administrator determines that the existing regulatory program established by NRC pursuant to the Atomic Energy Act is adequate to protect public health with an ample margin of safety—the standard under current section 112.

Although dual regulation will result in increased compliance costs for all NRC-licensed facilities, the added costs will be felt particularly by hospitals and doctors practicing nuclear medicine and radiopharmaceutical companies which produce nuclear isotopes for use in the diagnosis and treatment of disease. These added costs will adversely affect the availability of radioactive materials which are much needed and widely used in medical research, diagnosis, and therapy.

Passage of this amendment will allow EPA to replace the emission standards issued by EPA in November 1989, for NRC-licensed facilities, incuding nuclear powerplants, uranium fuel cycle facilities, and byproduct facilities, if that agency concludes that the existing NRC regulatory program adequately protects public health. I strongly urge EPA to reconsider these regulations in light of this amendment.

Dual regulation is expensive and burdensome for the regulated and the regulator, yet it is the consumer who will ultimately pay the increased costs. This amendment will eliminate dual regulation unless it is shown that additional regulation is necessary, and will in no way affect the authority of the States to regulate even more stringently radionuclide emissions from whatever source.

I reserve the remainder of my time.

Mr. GLENN addressed the Chair.

The VICE PRESIDENT. Who yields time? The Senator from Ohio is recognized.

Mr. GLENN. Mr. President, I rise in opposition to the amendment offered by my distinguished colleague from Wyoming. Mr. President, this is the same vote basically that we had before here in the Senate. It was defeated by a vote of 61 to 36. By that margin, the Senate affirmed that no change can take place in this bill with respect to the regulation of radionuclide emissions.

Now is not the time to revisit an issue which has already been settled by this body. Mr. President, it has been 13 years under the current law. What I did with that vote before, what the Senate did with that vote before, was say it is not that broken down. Should it be reconsidered? Yes. It should be reconsidered. But do we need on this bill to make this kind of a change that changes the State law, State responsibilities this much?

The Senate expressed itself on that. With a little change of language we are asked to consider this change again.

I have said repeatedly that I agree absolutely and 100 percent that States should not be able to abuse their authority under this to prevent what might be a Federal proposal to license or provide facilities within certain States. This is a Federal authority. I want to make sure that there is no misunderstanding of that.

I am not proposing that we make such strict standards that the standards could be used to prevent the Federal facility from coming into a particular State no matter what was best for the whole United States of America.

The EPA Clean Air Act standards are definitely more protective than those of the Nuclear Regulatory Commission. Under the existing statutory authority, the 1977 Clean Air Act, EPA has set an overall public radiation exposure limit of 10 millirem per year for NRC facilities and all other radiation emitters.

That is 50 times more protective than the 30-year-old standard that some 6,000 NRC byproducts, source and special nuclear facilities, have. So this is hardly the time to return to a more lax system of radiological protection. We plan to address this.

I think there needs to be protections put in. But changing a 13-year-old law that has worked well, has not caused any problems, is just not what we should do be doing here on this Clean Air Act in a short time when we already have voted on on this once with a vote of 61 to 36. This is the same subject revisited.

I reserve the remainder of my time.

The VICE PRESIDENT. Who yields time?

Mr. SIMPSON. Mr. President, how much time do I have remaining?

The VICE PRESIDENT. The Senator from Wyoming has 1 minute and 36 seconds, and the opposition has 2 minutes 10 seconds.

Mr. BAUCUS. Will the Senator yield 30 seconds?

Mr. SIMPSON. Yes.

Mr. BAUCUS. Mr. President, as the majority manager of the bill, I am prepared to accept this amendment.

This amendment fulfills an agreement that we attempted to reach in the committee. That is that there would not be dual regulation to both the Nuclear Regulatory Commission and EPA. Preemption does not exist. If the States want stronger standards, they can do so. The public health must be protected, it states. For all those reasons, I accept the amendment. The managers accept this amendment.

Mr. GLENN. Mr. President, I object.

Mr. SIMPSON. Mr. President, how much time do I have?

The VICE PRESIDENT. The Senator from Wyoming has 45 seconds.

Mr. SIMPSON. I yield 25 seconds to my colleague from Louisiana.

Mr. BREAUX. I will be very brief. This amendment in no way resembles, in any way, the amendment we voted on previously. This amendment in no way effects the States' rights to do anything more in greater restrictions. They would still have that right to do it under this amendment. The only thing this does is clarify that EPA is going to regulate radionuclides under the Atomic Energy Act, not under the Clean Air Act. It is vastly different from the previous vote. It should be accepted. We have a tremendous problem having an agency regulate the same thing under two different statutes. This amendment corrects it.

Mr. SIMPSON. Mr. President, I yield 5 seconds to the Senator from Rhode Island.

Mr. CHAFEE. Mr. President, we are prepared to accept the amendment, absent a challenge for a vote.

The VICE PRESIDENT. The Senator has 18 seconds reserved.

Mr. GLENN. Mr. President, I ask for the yeas and nays.

The VICE PRESIDENT. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. COATS. Mr. President, I am pleased that is this 11th hour on consideration of this monumental legislation, S. 1630, the Clean Air Act Amendments, a compromise amendment is being offered concerning Federal regulation of radionuclides.

This amendment will continue to preserve the right of individual States to regulate nuclear facilities for the further protection of their citizens. At the same time, the amendment will allow the Environmental Protection Agency to regulate these facilities if it finds Nuclear Regulatory Commission regulations to be inadequate.

The Environmental Protection Agency is charged with the task of enforcing current Federal environmental law for protection of the health and safety of the American people. I believe EPA should be allowed to fulfill its mission.

Even more important, individual States should have the option of imposing stricter standards, if their imposition is deemed necessary to protect the health and safety of its citizens. This option is an integral element of current Federal environmental law, and should be retained. This is why I supported the Glenn-Heinz amendment, which passed the Senate last month.

The Glenn-Heinz language is not perfect, however, and in fact it has many flaws. One important flaw is the compliance burden which dual regulation entails. Additional regulation is the last thing organizations affected under this amendment need. That is why I am pleased that an amendment is being offered today which represents a compromise between these two positions.

This amendment will allow EPA to regulate radionuclides, but would require that the EPA Administrator first conclude that NRC regulation is inadequate to protect public health. In addition, an individual State's right to require tougher restrictions is fully protected.

I believe this amendment represents the "best of both worlds," and is a fair compromise which I hope will result in a more effective and streamlined process for regulation of emissions from radionuclides.

The VICE PRESIDENT. The opposition has 2 minutes, 9 seconds.

Mr. GLENN. Mr. President, we were given this change just seconds before

it came up on the floor. In fact, I had not been given this amendment in enough time to even complete reading the short amendment before the distinguished Senator from Wyoming brought it up. As I understand it, this would abrogate existing standards, but it could possibly abrogate existing standards and have the effect of doing exactly the same thing that we turned down with the 61-to-36 vote before. It just comes at it from a different direction. As I understand the intent, that is exactly what would happen.

Mr. President, this has been in effect for 13 years and has not caused any problem. I fail to see why it is such a big issue here, just as we are preparing to make a final vote on this bill. We voted on this basic principle 61 to 36, and this has changed a little bit, but if there are areas of this which I do not undertand, it is because we were only given this seconds before it came up on the floor. I reserve the remainder of my time.

Mr. SIMPSON. Mr. President, please hear this, this proposal was circulated to Senator GLENN's staff last week. There is no secret as to what happened. It was just a case of them rejecting everything we proposed. This is not what was voted on last time. This amendment seeks to avoid dual regulation of radio nuclides under this bill. That is all it is. It does not have anything to do with State preemption. A lot of hospitals will be put out of business if we do not do it.

The VICE PRESIDENT. The time for the Senator from Wyoming has expired.

Mr. GLENN. Mr. President, this is not the same amendment. I respectfully disagree with my colleague from Wyoming. We were given a copy of what might be proposed, but the copy that I was given just seconds before the Senator from Wyoming stood up to address this body was different from the one that we had before. So we did not have it.

We voted on this basic issue. The language is changed some, but why take it up now? What is the rush for this? It has not been a problem for 13 years. My position is that it preserves the existing situation that has served us OK for 13 years. Do we need to protect against States having a preemptive right to do what they want to do, no matter what the Federal benefit might be? I say, yes, and I urge people to vote for my position on this. Mr. President, I move to table the amendment.

The VICE PRESIDENT. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

The VICE PRESIDENT. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 33, nays 67, as follows:

[Rollcall Vote No. 54 Leg.]

YEAS—33

Adams	Gore	Mitchell
Bentsen	Graham	Moynihan
Biden	Harkin	Packwood
Bradley	Hatfield	Pell
Bryan	Kennedy	Reid
Bumpers	Kerrey	Riegle
Byrd	Kerry	Rockefeller
Conrad	Lautenberg	Roth
Dixon	Leahy	Sarbanes
Dodd	Metzenbaum	Sasser
Glenn	Mikulski	Wirth

NAYS—67

Armstrong	Fowler	McCain
Baucus	Garn	McClure
Bingaman	Gorton	McConnell
Bond	Gramm	Murkowski
Boren	Grassley	Nickles
Boschwitz	Hatch	Nunn
Breaux	Heflin	Pressler
Burdick	Heinz	Pryor
Burns	Helms	Robb
Chafee	Hollings	Rudman
Coats	Humphrey	Sanford

Dole	Lieberman	Wallop
Domenici	Lott	Warner
Durenberger	Lugar	Wilson
Exon	Mack	
Ford	Matsunaga	

So the motion to lay on the table amendment No. 1457 was rejected.

The VICE PRESIDENT. The question is now on the amendment offered by the Senator from Wyoming. The yeas and nays have been ordered.

Mr. SIMPSON. Mr. President, I would vitiate the yeas and nays.

The VICE PRESIDENT. Is there objection? Without objection, it is so ordered.

The question is on agreeing to the amendment of the Senator from Wyoming.

The amendment (No. 1457) was agreed to.

Mr. DURENBERGER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. CHAFEE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The VICE PRESIDENT. The Senate will please come to order.

The Senate will please come to order so we can proceed to hopefully passage of this bill. The Senate will please come to order.

The Senator from Montana.

AMENDMENT NO. 1458 TO AMENDMENT NO. 1293

Mr. BAUCUS. Mr. President, I have a clarifying amendment which I send to the desk and ask for its immediate consideration.

The VICE PRESIDENT. Without objection, it is so ordered. The pending amendment is set aside. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Montana [Mr. BAUCUS] proposes an amendment numbered 1458 to amendment No. 1293.

Mr. BAUCUS. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The VICE PRESIDENT. Without objection, it is so ordered.

The amendment is as follows:

On page 385, after line 14, insert the following: "The Administrator shall conduct, and transmit to Congress not later than two years after the enactment of this Act, a study of the emissions of hazardous air pollutants from motor vehicle tire incineration facilities and the feasibility of substituting appropriate tire recycling procedures for current and projected tire incineration facilities. There are authorized to be appropriated such sums as may be necessary.".

Mr. BAUCUS. The amendment requires a study on tire burning facilities, review of NO_x emissions from test cells, CTG's for bakeries if appropriate, a modification of desulfurization for the North Slope of Alaska, and modification of extreme ozone nonattainment offset requirements. The amendment has been cleared by the minority manager and I ask for its immediate consideration.

Mr. CHAFEE. It is agreeable to this side, Mr. President.

The VICE PRESIDENT. All time is yielded back. The question is on agreeing to the amendment.

The amendment (No. 1458) was agreed to.

Mr. CHAFEE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. BAUCUS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. McCLURE. Mr President, many of us believe that environmental protection and economic growth are compatible. For this reason we applauded President Bush for his leadership in proposing a long overdue reauthorization and strengthening of the Clean Air Act.

When the President made his proposal last June, it was recognized that it would have profound impacts on our economy and our Nation's energy future. The President's proposal reflected a balance between our desire for enhanced protection of public health, a cleaner environment, and sustained economic growth. That balance was achieved, in part, by providing regulated industry with sufficient flexibility to adopt cost-effective pollution control technologies.

Nevertheless, the costs associated with achieving the anticipated environmental benefits were some $19 billion annually. Thus, many of us were disturbed by the substantially higher initial cost estimate for the measure reported by the Committee on Environment and Public Works which exceeded $40 billion annually.

In large part, the higher costs associated with the committee bill stemmed from the prescriptive nature of the

legislative language, which were accompanied by marginal, incremental environmental benefits. Because of a heightened public awareness of the environment, perceived, as opposed to real, threats to the environment have brought us to the point where the tendency is to act to restrict and inhibit actions not only by industry but by the American people. As a consequence, this legislation essentially prescribes the very lifestyle of many Americans.

We are talking about increase gas taxes, gas rationing, prohibitive bridge tolls, a shift to electric or natural gas powered cars, odd-even driving days, and a massive program of upgrading mass transit. Press reports in California estimate that compliance with Federal Clean Air Act requirements in northern and southern counties may necessitate a $2-per-gallon gasoline tax and $5 bridge tolls.

Throughout this debate we have returned to the recurring question: Do the environmental benefits of this legislation outweigh the economic costs? For me, the answer is no.

But a more critical question is, do the environmental benefits of this legislation outweigh the restrictions on individual freedom that pervade this measure. Again the answer is no.

As a consequence of this legislation, barbed wire fences will stretch across the American landscape restricting the movement of people, restricting use of the personal car, specifying the gasoline that we can use in our personal cars, and restricting consumer products, not to mention the restrictions that will be imposed on industry at significant costs to the American consumer.

Many of these restrictions are based not on scientific data but on perceived threats to the environment. All to frequently overly restrictive theoretical standards are being imposed to address inconclusive threats to public health. There is to much guesswork where the consequences of a particular risk assessment is the devastation that proud families experience from job loss. What benefit is there to a clean environment if, in the process, we needlessly close down vital industries, and place thousands of people out of work? When do we begin to question whether the incremental benefits are worth the swollen costs? This is particularly true with respect to the controls on new automobiles. National controls are being imposed on all new automobiles in order to respond to the special circumstances that exist in California and New England.

For the most part, what flexibility there was in the President's proposal has vanished on the winds of clean air as once again the Congress proposes to substitute its scientific and technical judgment for that of EPA in an attempt to make up for a perceived lack of environmental progress over the last decade.

But more importantly, this legislation abandons the principle that the pollutor pays—a cornerstone of environmental legislation since the 1967 Clean Air Act. This legislation departs from that principle, and such a depature will have significant implications for future economic growth of many regions of our country but, in particular, rural and Western States.

In his January 19 letter, the President enunciated five tests of balance and reasonableness that need to be preserved if we are to achieve a balance between the environmental progress and economic growth that the American people demand. Foremost among these is that the bill not impose aggregate costs on the economy that exceed the considerable costs already embodied in the administration's bill.

In response to this concern, on February 2, Senate leaders and administration officials began extenisve discussion that led to the substitute now pending before the Senate. Out of those discussions came a deeper understanding of the full implications of this legislation for all Americans.

While I was a part of those discussions, I must observe that only a small fraction of the issues of concern were discussed. Early in the process the agenda was restricted to the same 24 provisions of major concern to the administration.

Many other issues identified as matters of concern by fellow Members and the administration were purposely not discussed due to the pressures of time and the preference of the bipartisan managers. These additional concerns have been reflected in the 100 plus amendments to this measure already adopted. And this does not include the several hundred so-called technical amendments to be offered by the floor managers; many of which are substantive in nature, even if agreed to by the administration.

But, more importantly, while a large cross section of the Senate participated in those discussions for the most part their participation was meaningless. The outcome of the deliberations did not represent an agreement between the full Senate leadership and the administration; rather, it was preordained to represent an agreement between the Committee on Environment and Public Works and the administration.

In many instances, the agreement is smoke-and-mirrors. For example, the costs of tier II tailpipe standards are hidden behind a trigger which the administration can assume will not be pulled—therefore the costs of the provision can be scored at zero. However, the Senate negotiators can assume it will be triggered—therefore they can assume the environmental benefits of the additional national controls.

Nevertheless, the economic consequences of the bipartisan agreement that resulted from this negotiation, and is currently pending before the Senate, will be felt by all Americans. Many of its provisions were formulated to deal with the urban air pollution problems of the Northeast and California. Nevertheless, the costs are now going to be imposed on all Americans—rural and urban alike.

ACID RAIN

Among the matters addressed by this legislation is the control of acid rain precursors. These acid rain provisions establish rigid emission caps on all existing electric power plants and a requirement that, after the year 2000, all new, grassroot energy facilities must secure sufficient offsets to achieve zero emissions on a net basis. These requirements will have significant effects on both economic growth and the growth of electricity supplies regionally and nationally.

From its inception in 1967, Federal clean air legislation has advanced on the principle that the polluters pay. With this legislation national policy departs from that principle, and this departure has significant implications for future economic growth in many Southern and Western States. Where and when growth occurs, if at all, will be determined by a federally mandated allowance trading system.

Since 1967, new electric power plants in many Western States have borne the cost of installation of the best available control technology. Now, in order to grow, these Western States must purchase pollution licenses to be derived from allowances created and sold by midwestern and eastern pollutors to defray their costs of control. This is totally unfair and in my opinion an outrageous imposition of majority will as a political expedient on a vulnerable minority.

ALTERNATIVE MOTOR VEHICLE FUELS

In the area of alternative fuels, we once again are about to adopt environmental policies without understanding their energy policy implications—in this instance, it is proposed that the Federal Government create a new, artificial market for alternative fuel vehicles.

What our country needs instead is a well-though-out, coherent, and comprehensive energy strategy designed to satisfy the needs of American consumers well into the 21st century. The goals of such an energy strategy must be: First, to clearly identify the objectives to be achieved; second, to specify in detail the means by which those objectives are to be realized; and, third, to garner political consensus and public acceptance.

In no arena is this need greater than the requirement for secure, long-term

supplies of transportation fuels. Our continued reliance on gasoline as our principal automobile fuel creates significant economic, energy, and environmental consequences for all Americans.

TOXICS

One of the most pervasive provisions of this measure concerns the control of toxic air pollutants. Under the bipartisan agreement, steps are taken to soften the so-called bright-line standards applicable to sources of hazardous air pollutants. However, the Senate simply has not gone far enough to achieve any common sense on this issue.

Under the committee-reported measure, these standards were applied to the so-called theoretical maximum exposed individual over a 70-year lifetime. By comparison, the substitute provides for site specific risk assessment, thus individual facilities will be afforded the opportunity to rebut the regulatory assumptions of the EPA when applying the bright-line standards. While the substitute has moved us in the right direction there is nevertheless a clear and blatant misunderstanding and misuse of this entire area of risk assissment. This methodology should be used as a tool, not a hammer to force industry to prove itself innocent. These provisions thus remain among the most onerous and absurd in the measure before us.

FUELS

With respect to coal, the substitute before us does not recognize the critical role that coal must serve in our country's long-term energy future. If this role is to be satisfied for the benefit of all Americans, national energy and environmental policies encourage the retirement and replacement of old electric power plants with more efficient and cleaner facilities.

After spending over $7 billion on the commercialization of clean coal technologies in recognition that environmental protection and economic growth can be compatible, the measure before us encourages the installation of scrubbers and life-extension of existing facilities at the expense of energy efficiency and long-term environmental quality.

By rejection of my clean coal amendment and that in the Byrd-Bond acid rain proposal, the Senate is committing our country to a high-cost environmental strategy that does not reflect the long-term energy requirements of the United States. Both goals could have been achieved simultaneously. But the substitute before us fails to do so.

The substitute before us ignores current trends in oil imports. While everyone is willing to talk about oil imports, no one is willing to do anything about it. Instead, this new program is prompted by the failure of about 100 areas in our country to meet the ozone ambient air quality standard mandated by the Clean Air Act.

I am one of those that believe that the marketplace can take care of most problems which might arise, regardless of magnitude, and therefore we need not do anything. Well this is not true when it comes to environmental regulations. The substitute before us imposes a straightjacket on the marketplace so that cost-effective solutions are not feasible.

Unless we develop and implement a comprehensive energy-environmental strategy, it is without question that at some point in the not too distant future, we will once again wake up and find ourselves in the midst of a national energy crisis. And once again both our energy and environmental interest will suffer from hastily created policies to satisfy political imperatives.

Our national reliance on the automobile as our principal source of transportation has significant energy and environmental implications for all Americans. Clearly our ability to find an alternative to gasoline as our transportation fuel must play an important and critical role in any national energy policy.

Over the years, the Department of Energy has examined several alternatives to extend or replace gasoline. Alcohol fuels have received the most attention as neat fuels or in low-concentration blends with gasoline. Each alternative fuel has its own unique characteristics and customer acceptance.

Too few people realize that today the United States is more than 54 percent dependent on imported oil and that we are more dependent than we were at the time of the 1973 Arab oil embargo. Of necessity, any Federal mandate for the use of alternative fuels should not, indeed must not, foster greater dependence on imports.

THE PROCESS

Mr. President, we are often quick to characterize this body as the most deliberative legislative body of the Congress. Great care is taken not to set precedents that may infringe on the rights of Members to debate and offer amendments.

Yet with respect to this measure, a complex process has evolved whereby amendments are reviewed and cleared by not just committee staff members, but administration representatives from OMB, EPA, and the Department of Energy.

This process has served to dampen debate since failure to obtain clearance assured opposition by the floor managers. But, and more importantly, representatives of the administration were able to cross the fine line of constitutional separation of the legislative and executive branches of government and directly influence the final form and substance of the measure before us, as if this were a parliamentary rather than a bicameral legislative body.

If this were not bad enough, during the last few days we have been informed of various packages of so-called technical amendments, which are under review by EPA and OMB and committee staff. The obvious question is why, if these are truly technical amendments, do they require administration comments or approval? Such review and approval, by its very nature, suggest that some, if not many, of these amendments are, in fact, substantive in nature and thus should be individually presented to the Senate for consideration.

I recognize in making this statement that is not feasible under the present time agreement to do so.

I also feel it is important to note that many of the amendments deal with provisions already amended by the Senate, yet a copy of the currently amended substitute is not available to individual Members, although 100 plus amendments have already been adopted. Consequently, it is not feasible to fully review the so-called technical amendments to ascertain their full import.

CONCLUSION

Although the measure before us represents progress, there is little reason to celebrate. After years of drought, the American people deserved more from its leadership. Instead of discussing national policies, this debate has been plagued with regional disputes over the distribution of acid rain allowances.

Because many State regulatory actions are not supported by their citizens, Federal preemption is being sought. Yet if the costs of these programs are going to be accepted they need to be understood by the very citizens at whom the benefits are directed. Right now those costs are not understood.

Many of us believe that environmental protection and economic growth can be compatible. For this reason we applauded President Bush's for his leadership in proposing a long overdue reauthorization and strengthening of the Clean Air Act.

The President's proposal reflected a balance between our desire for enhanced protection of public health, a cleaner environment, and sustained economic growth. But that balance no longer exists. The flexibility no longer exists for industry to pursue cost-effective pollution control technologies. And American consumers will ultimately bear these unnecessary costs.

Throughout this debate we have returned to the recurring question: Do the environmental benefits of this legislation outweigh the economic costs? For me, the answer is definitely "No."

But a more critical question is, do the environmental benefits of this leg-

islation outweigh the restrictions on individual freedom that pervade this measure. In my judgment, they do not.

AMENDMENT NO. 1307 TO AMENDMENT NO. 1293

Mr. BAUCUS. Mr. President, I ask for the regular order.

The VICE PRESIDENT. The question is on agreeing to amendment No. 1307.

The amendment (No. 1307) was agreed to.

Mr. BAUCUS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. CHAFEE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1459 TO AMENDMENT NO. 1293

(Purpose: To make technical and conforming amendments to titles I, II, VI, and VII)

Mr. CHAFEE. Mr. President, I send to the desk an amendment to make technical and conforming amendments to titles I, II, VI, and VII and ask for its immediate consideration.

The VICE PRESIDENT. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Rhode Island [Mr. CHAFEE], for himself and Mr. BAUCUS, proposes an amendment numbered 1459 to amendment No. 1293.

Mr. CHAFEE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

Mr. McCLURE. Mr. President, reserving the right to object, and I will not object, but I want everyone to note as they look at that stack of paper that just went to the desk and the stacks of papers which will follow it in terms of the technical amendments, you are buying the pig in the poke. I have been down this road more than once before and you are going to be amazed at what it is that is just now happening. I do not object.

The VICE PRESIDENT. Without objection, it is so ordered.

(The text of the amendment (No. 1459) is printed in today's RECORD under "Amendments Submitted.")

Mr. CHAFEE. Mr. President, all of these amendments have been available since yesterday, and have been reviewed by the administration. I urge their adoption.

The VICE PRESIDENT. Do the Senators yield back their time?

Mr. BAUCUS. Mr. President, I might just add to the statement of the Senator from Rhode Island that these amendments that have been available for some time and reviewed by staff. In addition, I might say if there are needs for technical corrections to the technical amendments, there will be an appropriate time in conference to take care of them. They have been reviewed.

The VICE PRESIDENT. Is all time yielded back?

Mr. DOLE. Mr. President, let me indicate on the technical amendments, I think they have been gone over by EPA staff, by the White House staff, by OMB staff and some I think we are just going to have to take on faith. If there has been a mistake made, I think people on both sides have acted in good faith. There are about 200 pages of technical amendments if anybody wants to leaf through them this evening before you go home.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment (No. 1459) was agreed to.

Mr. CHAFEE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DURENBERGER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1460 TO AMENDMENT NO. 1293

Mr. BAUCUS. Mr. President, I send a technical amendment to the desk to title IV of the pending amendment.

The VICE PRESIDENT. The clerk will report.

The legislative clerk read as follows:

The Senator from Montana [Mr. BAUCUS] proposes an amendment numbered 1460 to amendent No. 1293.

Mr. BAUCUS. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The VICE PRESIDENT. Without objection, it is so ordered.

(The text of the amendment (No. 1460) is printed in today's RECORD under "Amendments Submitted.")

Mr. BAUCUS. Mr. President, we have more technical amendments. I urge the these technical amendments be adopted.

The VICE PRESIDENT. Does the Senator yield back the time? Do all Senators yield back the time?

The question is on agreeing to the amendment.

The amendment (No. 1460) was agreed to.

Mr. CHAFEE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DURENBERGER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1461 TO AMENDMENT NO. 1293

(Purpose: To make technical amendments to title III of the pending amendment)

Mr. DURENBURGER. Mr. President, I send a technical and conforming amendment to title III to the desk and ask for its immediate consideration.

The VICE PRESIDENT. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Minnesota [Mr. DURENBURGER] proposes an amendment numbered 1461 to amendment No. 1293.

Mr. DURENBURGER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The VICE PRESIDENT. Without objection, it is so ordered.

The amendment is as follows:

On page 231, beginning at line 7, strike all through line 9 (paragraph (8)) and insert in lieu thereof the following:

"(8) The term "owner or operator" means any person who owns, leases, operates, controls, or supervises a stationary source.

"(9) The term "existing unit" means any stationary source other than a new source.".

On page 231, line 10, strike "(9)" and insert in lieu thereof "(10)".

On page 232, line 26, (unnumbered lines) following "95487" strike "Cresols/Cresylic acid (isomers and mixtures)" and insert in lieu thereof "o-Cresol".

On page 232, line 27, following "108394" strike "Cresols/Cresylic acid (isomers and mixture)" and insert in lieu thereof "m-Cresol".

On page 232, line 28, following "106445" strike "Cresols/Cresylic acid (isomers and mixtures)" and insert in lieu thereof "p-Cresol".

On page 234, line 24 (unnumbered lines) strike "91255" and insert in lieu thereof "91225".

On page 234, line 50 (unnumbered lines) following "95476" strike "Xylenes (isomers and mixtures)" and insert in lieu thereof "o-Xylenes".

On page 234, line 51, following "108383" strike "Xylenes (isomers and mixtures)" and insert in lieu thereof "m-Xylenes.

On page 234, line 52, following "106423" strike "Xylenes (isomers and mixtures)" and insert in lieu thereof "p-Xylenes".

On page 235, footnote 3, strike "aspect ratio (fiber length divided by fiber diameter) greater than 3" and insert in lieu thereof "aspect ratio (fiber length divided by fiber diameter) greater than or equal to 3".

On page 235, footnote 3, delete the period at the end of the footnote and insert in lieu thereof. ", as emitted from production of fiber and fiber products.".

On page 237, line 3, after "qualifies" insert ", as a result of emissions to the air of such pollutant,".

On page 237, line 13, before "human" strike "the".

On page 237, line 25, strike "of section 104(i)".

On page 238, after line 8, insert the following new paragraph:

"(6) The Administrator may not list elemental lead as a hazardous air pollutant pursuant to this subsection.".

On page 240, line 18, strike "(d)(1)" and insert in lieu thereof "(d)(2) or (d)(4)".

On page 240, line 20, strike "shall not be required to list" and insert in lieu thereof "may delete from the list".

On page 241, line 14, after "subsection (c)." insert "The Administrator may distinguish among classes, types and sizes of sources within a category or subcategory in establishing such standards, except that, there shall be no delay in the compliance date for any standard applicable to any source under subsection (i) as the result of the authority provided by this sentence.".

On page 241, beginning at line 18, strike "each air pollutant subject to this section" and insert in lieu thereof "each hazardous air pollutant emitted by any source in the category or subcategory.

On page 243, line 3, after "stringent" insert ", and may be more stringent".

On page 243, line 9, after "thirty" insert "or".

On page 243, beginning at line 17 strike ", and may be more stringent".

On page 243, line 23, strike "the" and insert in lieu thereof "a".

On page 245, after line 14, insert the following:

"(9) Notwithstanding the provisions of paragraph (2), for categories and subcategories of sources of hazardous air pollutants engaged in mining, extraction, beneficiation, and processing of nonferrous ores, concentrates, minerals, metals, and related in-process materials, the Administrator shall not consider the substitution of, or other changes in, metal- or mineral-bearing raw materials that are used as feedstocks or material inputs, or metal- or mineral-bearing materials processed or derived from such feedstocks or materials in setting emissions standards, work practice standards, operating standards or other prohibitions, requirements or limitations under this section for such categories and subcategories. The prohibition of the preceding sentence shall not apply to the substitution, modification, or changes of chemicals (not including metal- or mineral-bearing materials) used in mining, extraction, beneficiation, or processing of nonferrous ores, concentrates, minerals, metals, and related in-process materials which is necessary to reduce air emissions of such chemicals and for which substitutes that are safe and effective in performing the intended function of the chemical to be substituted are reasonably available.".

On page 245, line 15, strike "(9)" and insert in lieu thereof "(10)".

On page 246, beginning at line 10, strike "not later than three years after such date" and insert in lieu thereof "not later than four years after the date of enactment of the Clean Air Act Amendments of 1990".

On page 246, beginning at line 15, strike "not later than five years after such date" and insert in lieu thereof "not later than six years after the date of enactment of the Clean Air Act Amendments of 1990".

On page 246, beginning at line 20, strike "not later than ten years after such date" and insert in lieu thereof "not later than ten years after the date of enactment of the Clean Air Act Amendments of 1990".

On page 249, line 9, after "paragraph." insert the following: "Such standards shall be consistent with the requirements of subsection (d) and take into account such information on cost and feasibility as is contained in the study required by subparagraph (B).".

On page 250, beginning at line 17, strike all through line 23 and insert in lieu thereof "The".

On page 251, line 2, strike "(s)" and insert in lieu thereof "(r)".

On page 251, line 2, strike "Board." and insert in lieu thereof "Board, with respect to such report. Prior to the evaluation of remaining risks pursuant to paragraph (8), and after notice and opportunity for comment, the Administrator shall publish revised Guidelines for Carcinogenic Risk Assessment or a detailed explanation of the reasons that any recommendations contained in the report of the National Academy of Sciences will not be implemented.".

On page 251, line 6, after "Commission" insert "established by subsection (u)".

On page 251, line 14, strike "(i) (4)-(8)" and insert in lieu thereof "(i)(4) through (i)(8)".

On page 251, line 24, after "result" insert "of".

On page 252, beginning at line 11, strike "section 104(i) of".

On page 253, line 24, after "Commission" insert "established by subsection (u)".

On page 257, line 10, strike "his" and insert in lieu thereof "the minority leader's".

On page 259, line 22, after "Commission" insert "established by subsection (u)".

On page 260, beginning at line 6, strike all through line 9 and insert in lieu thereof the following:

"third time followed by a vote on final passage. This subparagraph is enacted as an exercise of the rulemaking power of the House of Representatives and of the Senate.".

On page 264, line 14, strike "act" and insert in lieu thereof "Act".

On page 226, line 5, strike "standard" and insert in lieu thereof "standard, regulation".

On page 266, line 9, strike "standard" and insert in lieu thereof "standard, regulation".

On page 266, beginning at line 13, strike "After the effective date of any emissions standard under this section, no air pollutant may be emitted from any source in violation of an emissions standard under this section or" and insert in lieu thereof "After the effective date of any emissions standard, limitation or other requirement promulgated under this section, no person may operate any source in violation of such standard, limitation or regulation or an".

On page 266, line 24, strike "(15)" and insert in lieu thereof "(14)".

On page 267, line 7, strike "(7)" and insert in lieu thereof "(6)".

On page 267, line 9, strike "safety" insert "(unless a more stringent limitation is necessary to protect the environment)".

On page 267, line 17, strike "risk".

On page 267, line 20, strike "(7)" and insert in lieu thereof "(6)".

On page 268, line 13, after "person" insert "living within the vicinity of the source".

On page 269, line 19, strike "(6)" and insert in lieu thereof "(5)".

On page 270, line 5, strike "or health risk assessment".

On page 270, beginning at line 8, strike "or health risk assessment".

On page 270, line 10, strike "(7)" and insert in lieu thereof "(6)".

On page 272, line 3, strike "(7)" and insert in lieu thereof "(6)".

On page 272, beginning at line 6, strike "and health risk assessment".

On page 274, line 10, strike "(8)" and insert in lieu thereof "(7)".

On page 272, line 12, strike "and health risk assessment".

On page 272, line 22, strike "or health risk assessment".

On page 273, beginning at line 17, strike "and health risk assessment".

On page 273, beginning at line 24, strike "or health risk assessment".

On page 275, line 14, strike "(9)" and insert in lieu thereof "(8)".

On page 274, beginning at line 20, strike "or health risk assessment".

On page 274, beginning at line 24, strike "or site-specific health risk assessment".

On page 275, beginning at line 5, strike "or health risk assessment".

On page 275, beginning at line 6, strike "or health risk assessment".

On page 275, line 11, strike "or health risk assessment".

On page 276, beginning at line 4, strike "For purposes of this subparagraph the phrase "all available technology and operational controls" shall include all measures which are technically feasible including process modifications and materials substitution to reduce emissions of hazardous air pollutants for the source.".

On page 277, line 17, strike "(10)" and insert in lieu thereof "(9)".

On page 277, line 18, after "(1)" insert "or (2)".

On page 278, line 3, strike "(11)" and insert in lieu thereof "(10)".

On page 278, line 19, after "satisfying" insert "at a minimum".

On page 279, line 9, strike "(e)(7)" and insert in lieu thereof "(e)(8)".

On page 280, line 10, strike "(12)" and insert in lieu thereof "(11)".

On page 281, line 9, strike "(13)" and insert in lieu thereof "(12)".

On page 282, line 10, strike "administrator" and insert in lieu thereof "Administrator".

On page 282, line 13, strike "(14)" and insert in lieu thereof "(13)".

On page 282, line 22, strike "(15(A)(i)" and insert in lieu thereof "(14)(A)(i)".

On page 283, beginning at line 16, strike "in lieu of the requirements of subsections (d), (f), and (g)".

On page 283, line 22, strike "((B)(iii)" and insert in lieu thereof "(B)(iii)".

On page 284, line 7, strike "(A)(i)(I)" and insert in lieu thereof "(A)(ii)(I)".

On page 284, line 9, strike "(1)".

On page 289, line 17, strike "(e) (1)(A) or (3)" and insert in lieu thereof "(e)(1)(A) or (e)(3)".

On page 290, line 20, strike "section" and insert in lieu thereof "paragraph".

On page 293, line 24, strike "(4)" and insert in lieu thereof "(3)".

On page 294, line 1, strike "and (3)".

On page 295, line 2, strike "Insecticide" and insert in lieu thereof "Insecticide,".

On page 296, line 9, strike "(5)" and insert in lieu thereof "(4)".

On page 296, line 10, strike "(4)" and insert in lieu thereof "(3)".

On page 297, line 1, strike "(6)" and insert in lieu thereof "(5)".

On page 297, line 11, strike "(7)" and insert in lieu thereof "(6)".

On page 299, line 15, strike "ecological" and insert in lieu thereof "environmental".

On page 302, beginning at line 12, strike all through line 23 (subsection (m)).

On page 302, line 24, strike "(n)" and insert in lieu thereof "(m)".

On page 303, line 11, strike "(o)" and insert in lieu thereof "(n)".

On page 307, line 24, strike "(p)" and insert in lieu thereof "(o)".

On page 308, line 14, strike "(q)" and insert in lieu thereof "(p)".

On page 309, line 7, strike "(r)" and insert in lieu thereof "(q)".

On page 309, line 20, strike "(s)" and insert in lieu thereof "(r)".

On page 311, line 3, strike "(w)" and insert in lieu thereof "(u)".

On page 311, line 19, strike "(t)" and insert in lieu thereof "(s)".

On page 311, beginning at line 20 strike "within one hundred and five days of the close of the fiscal year for each fiscal year" and insert in lieu thereof "every three years".

On page 312, beginning at line 20, strike all through line 22 (subsection (u)).

On page 312, line 23, strike "(v)" and insert in lieu thereof "(t)".

On page 314, line 7, strike "(W)" and insert in lieu thereof "(u)".

On page 314, line 20, strike "(s)" and insert in lieu thereof "(r)".

On page 319, before line 1, insert the following:

"OTHER PROVISIONS"

On page 319, after line 10 insert the following:

"(c) Prior to establishing standards under section 112(d) for sources employing Frasch sulfur extraction and processing technology, the Administrator shall establish a health threshold for hydrogen sulfide. Emissions standards with respect to hydrogen sulfide for sources employing Frasch sulfur extraction and processing technology shall be established at levels which protect public health with an ample margin of safety, unless a more stringent standard is necessary to protect the environment.".

On page 327, beginning at line 14, strike "The requirements of this subsection shall be enforced in the same manner as the requirements of section 114. The Administrator is authorized to issue administrative orders pursuant to section 113 to assure compliance with the requirements of this subsection."

On page 327, after line 19, insert the following:

"(7) After the effective date of any hazard assessment requirement promulgated pursuant to this subsection and applicable to a facility, it shall be unlawful for any person to operate such facility until such hazard assessment has been prepared or updated as provided in this subsection. For purposes of section 113, 114, 116, 120, 303, 304 and 307 and any other enforcement provisions of this Act, any requirement imposed under this subsection shall be treated as a standard in effect under section 112."

On page 327, line 20, strike "(7)" and insert in lieu thereof "(8)".

On page 335, after line 2, insert the following paragraph and redesignate the succeeding paragraphs accordingly:

"(12) After the effective date of any reporting requirement promulgated pursuant to paragraph (5)(C) it shall be unlawful for any person to fail to report any release of any extremely hazardous substance as required by such paragraph. The Administrator is authorized to enforce any regulation or requirement established by the Board pursuant to paragraph (5)(C) using the authorities of section 113. Any request for information from the owner or operator of a facility made by the Board or by the Administrator under this section shall be treated, for purposes of sections 113, 114, 116, 120, 303, 304 and 307 and any other enforcement provisions of this Act, as a request made by the Administrator under section 114 and may be enforced by the chairperson of the Board or by the Administrator as provided is such sections.".

On page 339, after line 4, insert the following:

"(4) After the effective date of any regulation or requirement imposed under this subsection or subsection (g), it shall be unlawful for any person to operate a facility subject to such requirement in violation of such requirement.".

On page 339, line 5, after "enactment" insert " of this subsection".

On page 341, line 12, after "116," insert "120,".

On page 341, line 13, after "307" insert "and other enforcement provisions of this Act".

On page 343, line 6, strike "(3)" and insert in lieu thereof "(9)".

On page 284, line 21, insert the following:

"(D) Any facility qualifying under this subparagraph and requesting an alternative emissions limitation under subsection (i), shall submit the requisite information under subsection (i), two years prior to the date of compliance for the facility under subparagraph (A)(ii) or (B)(iv).".

Mr. DURENBERGER. As previously indicated, this amendment is technical conforming. It is largely recommendations from the Environmental Protection Agency and others to make it conforming to amendments considered on the floor. I ask that it be agreed to.

The VICE PRESIDENT. Is all time yielded back?

The question is on agreeing to the amendment.

The amendment (No. 1461) was agreed to.

Mr. CHAFEE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DURENBERGER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The VICE PRESIDENT. The Senator from Montana.

Mr. BAUCUS. Mr. President, I believe this is the last amendment before final passage.

The VICE PRESIDENT. The Senate will suspend for 1 moment. May we have order for the final technical amendment?

The Senator from Montana.

AMENDMENT NO. 1462 TO AMENDMENT NO. 1293

(Purpose: To establish priority with respect to clean coal regulatory incentives for units located in states where state utility commissions have taken certain actions; to encourage states to provide equitable clean coal incentives for both investor-owned and noninvestor-owned utilities, and for other purposes)

Mr. BAUCUS. Mr. President, I send an amendment to the desk on behalf of the Senator from North Carolina [Mr. SANFORD] and ask for its immediate consideration.

The VICE PRESIDENT. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Montana [Mr. BAUCUS], for Mr. SANFORD, proposes an amendment numbered 1462 to amendment no. 1293.

Mr. BAUCUS. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The VICE PRESIDENT. Without objection, it is so ordered.

The amendment is as follows:

Add the following new subsection to Section 415, and redesignate other subsections accordingly:

"(d) PRIORITY FOR UNITS LOCATED IN STATES WITH INCENTIVE PROGRAMS.—To the extent practicable, the Federal Energy Regulatory Commission shall, in the selection of units which will be provided incentive rate treatment under subsections (b) or (c), give priority to units located in states where:

(1) the state regulatory commission with jurisdiction over the retail rates of the utility seeking such incentive rate treatment has approved comparable incentives for inclusion in the utility's retail rates, or, if the utility makes no retail sales, where comparable retail rate treatment has been approved for other utilities which make retail sales in the state or states in which the wholesale customers of the utility seeking such incentive rate treatment are located; and

(2) the state regulatory commission accords, to the extent relevant and within its jurisdiction, similar incentives to non-investor-owned utilities on a basis no less favorable than that accorded to investor-owned utilities within its jurisdiction."

Mr. BAUCUS. This amendment makes technical changes with respect to the clean coal FERC regulatory incentives. It has been cleared on both sides.

The VICE PRESIDENT. Do all Senators yield back time?

Mr. CHAFEE. This side concurs and yields back its time.

The VICE PRESIDENT. Is there further debate on the amendment?

If there be no further debate, the question is on agreeing to the amendment.

The amendment (No. 1462) was agreed to.

VOTE ON AMENDMENT NO. 1293, AS AMENDED

The VICE PRESIDENT. Are there further amendments to the leadership substitute?

If there be no further amendments to be offered, the question is on agreeing to the joint leadership substitute as amended.

The amendment (No. 1293), as amended, was agreed to.

Mr. HOLLINGS. Mr. President, I move to reconsider the vote.

Mr. BAUCUS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

VOTE ON THE COMMITTEE SUBSTITUTE, AS AMENDED

The VICE PRESIDENT. The bill is open to further amendment. If there be no further amendment to be offered, the question is on agreeing to the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

Mr. BAUCUS. Mr. President, I move to reconsider the vote.

Mr. CHAFEE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CLARIFYING THE INTENT OF AMENDMENTS TO THE CLEAN AIR ACT OFFERED DURING SENATE FLOOR CONSIDERATION

Mr. SIMPSON. Mr. President, I believe some clarification is in order regarding some of the amendments I offered during consideration of the Clean Air Amendments of 1990. I offered several amendments which were

adopted on voice vote that may need some clarification.

The Simpson amendment requiring environmental impact statements on Federal forest fire policy was meant to ensure that Federal agencies fully take into account the health effects of their fire policy with regard to the potent carcinogens that are contained in wood smoke. The fire review team that reviewed the policy after the devastating Yellowstone fires of 1988 barely touched on the issue of health effects. I believe the American people deserve to have their health adequately protected and to that extent I believe it is necessary to reexamine forest fire policy with that emphasis in mind.

In addition to health effects the Federal agencies and Federal land managers must also take into account and study the effects on visibility in class I areas and in other areas that are caused by Federal forest fire policy. During the devastating fires of 1988 we saw a huge cloud of smoke cover five or six States and that resulted in significant visbility impairment in class I areas and in other areas. These factors must also be taken into account in developing Federal forest fire policy. Many of the Federal land managers who are invovled in managing national parks or class I areas like to talk about visibility protection and how scenic vistas must be protected in our national parks. Yet these same land managers favor a forest fire policy which creates huge volumes of smoke and very significant visibility impairment. It seems to me you can not have it both ways.

The Senate also considered the Adams-Simpson visibility amendment which requires Governors in various regions of the country to look at pollution sources in their regions and make recommendations to the EPA Administrator for controlling those sources if they reduce visibility. In this vein I would note that the environmental impact statements required by Simpson amendment should be included in any consideration that the governors give to regional haze or visibility problems.

Wood Smoke may pose a very significant health threat when individuals are exposed to it chronically and the EPA Administrator may need to regulate cancer causing chemicals from wood smoke in the future.

Mr. PELL. Mr. President, we are nearing the end of a very long road toward passage of a new clean air bill—a road that many of us have traveled for quite some time.

We owe a tremendous debt to the bipartisan leadership which hammered out this compromise measure. It is far from perfect, but it clearly is a big step toward our mutual goal of protecting the health of our citizens and our planet.

Although leaders on both sides had to endure broadsides from their traditional allies, I have been most impressed by the strength, vision, and tenacity of the majority leader and of the minority floor manager.

The senior Senator from Maine [Mr. MITCHELL] has been battling to improve the clean air bill since he came to the Senate. I, too, am accustomed to working over a span of years to enact legislation, but his tenacity is a model to us all.

My colleague, the junior Senator from Rhode Island [Mr. CHAFEE] has done an exemplary job of negotiating a tough compromise and sticking to it in the face of strong, and sometimes strident, opposition.

When I cite their examples of environmental leadership, I do not mean any slight to other leaders—including the majority floor manager, the senior Senator from Montana [Mr. BAUCUS] who have done more than their part.

As we know, leadership carries with it the weight of special obligations and responsibilities. There were times and there were votes when the burden of the compromise must have been extraordinarily frustrating.

GEORGE MITCHELL and JOHN CHAFEE are environmentalists, but I found them on the other side of several key amendments to strengthen the Clean Air Act. I believe their votes were not against the measures, but to protect the compromise.

Throughout the consideration of the Clean Air Act, I have joined in fighting weakening amendments and in supporting strengthening amendments. We lost some big ones, but we also won a few.

I joined my colleagues the junior Senator from Colorado [Mr. WIRTH] and the junior Senator from California [Mr. WILSON] in introducing an amendment to require the development of clean cars through more effective conventional tailpipe controls and development of clean fuel vehicles.

I also joined my colleague the junior Senator from Massachusetts [Mr. KERRY] in introducing an amendment to restore the Federal authority already established in the current Clean Air Act. The threat of Federal intervention is behind some of the most ambitious urban cleanup plans.

Both of these amendments, sadly, were defeated by narrow votes, but other strengthening amendments which I joined in introducing did not meet this fate.

Among those strengthening amendments that did not meet defeat was an important measure that I joined the junior Senator from Tennessee [Mr. GORE] in introducing to eliminate permission for "toxic sacrifice" zones.

Our successes in strengthening the Clean Air Act compromise, however, were limited because of the leadership alliance that was formed to defend the compromise.

Even on votes that were unrelated to the environment, such as the social justice amendment offered by the senior Senator from West Virginia [Mr. BYRD], measures were defeated by the narrowest of margins.

I voted to provide limited special assistance to these miners, because the Clean Air Act targets high-sulfur coal for some of its most intense restrictions. There is no doubt that miners will be hurt by passage of this act.

Frankly, I would have preferred a stronger, as well as a more compassionate, Clean Air Act. Senate passage represents one of the first important steps down a long road, through many hazards, toward enactment into law.

During the negotiations along that road, the Clean Air Act will face many attempts to amend and weaken its provisions. As with any negotiations, I believe we should be asking for the whole loaf of bread and not half a loaf.

Although it is far from perfect, the Clean Air Act represents a substantial improvement over the existing law.

I support final passage because, as I said earlier, I believe this measure is an important step toward our goal of protecting the health of our citizens and our planet.

The Clean Air Act represents a good start, but much work remains to be done. As we approach Earth Day 1990, we are reminded that—after decades of environmental progress—our work has just begun.

Mr. RUDMAN. Mr. President, today the Senate concludes 2 months of deliberations on S. 1630, the Clean Air Act Amendments of 1989. The result is a hard fought comprehensive bill to improve the environment and public health, and I am proud to support it.

A few have vigorously criticized this effort for being a capitulation to polluters. They compare this measure to their perception of perfection, and are prepared to live with nothing, and ever dirtier air, if they cannot have everything. Still others call this bill too stringent and costly. The simple fact is that, in any bill of this magnitude, anyone can find provisions they do not like.

Mr. President, I am happy to say that, today, reason has prevailed over extremism and the American people are the winners. It is true that, in some respects, this bill is a compromise. But, it greatly strengthens the existing Clean Air Act and sets out a vigorous program for the improvement of our Nation's air quality. As Senator MITCHELL noted a couple of weeks ago, if we fail to pass this bill there probably will not be a bill in this century.

One of my principal concerns throughout this debate has been to ensure that the Senate enact tough

acid rain control provisions something I have been working for since coming to the Senate 9 years ago. Acid rain control is critical to the health and environment of the people of New Hampshire, but it has been strongly opposed by regional and industry interests. I am pleased to say the final package effectively retains the total reductions originally called for by S. 1630. More specifically, the compromise before us will achieve nearly 95 percent of the reductions of sulfur dioxide emissions originally prescribed in S. 1630 by the year 2000, and is expected to achieve greater reductions of nitrogen oxide emissions by that time. The agreement also retains the much needed cap on emissions after the year 2000. These are excellent provisions that I hope will bring about the eventual end to the problem of acid rain pollution in this country.

Another area of concern is mobile source pollution. The bill contains aggressive provisions to reduce volatile organic compounds and nitrogen oxide emissions from motor vehicles by 22 and 60 percent respectively by the year 1995. Furthermore, automobile manufacturers must further reduce tailpipe emissions by 50 percent if a number of larger cities do not meet the health standard for ozone by the year 2000. The agreement also includes an innovative and comprehensive clean fuels program designed to achieve significant reductions in motor vehicle emissions by improving the fuel. I should emphasize that these provisions are a great improvement over current law, contrary to the arguments being made by some in the environmental community.

The final bill also contains much needed provisions to regulate toxic air emissions. According to the Environmental Protection Agency, 2.7 billion pounds of highly toxic chemicals were released into the atmosphere in 1987. Chemicals such as benzene, mercury, lead, ammonia, and many others which lead to chronic health problems are released into the air every day. This is especially troubling since EPA, which currently has regulatory authority over air toxic emissions, has chosen to regulate only some sources emitting seven chemicals in the 18 years since the enactment of the original Clean Air Act. The bill before us lists 191 chemicals to be regulated by EPA and requires sources emitting these chemicals to install stringent control technology, leading to nearly a 90-percent reduction of emissions within 10 years. These provisions are likely to be costly and burdensome to industry. However, I believe it is a necessary price to pay in order to protect the public health.

Many other provisions contained in S. 1630 are designed to improve current law, including those regulating emissions from stationary sources in nonattainment areas as well as chemicals which contribute to the depletion of the stratospheric ozone layer.

In total, Mr. President, this is an excellent compromise which will meet one overriding objective: the achievement of clean, healthy air for all Americans. I applaud the floor managers, Senators BAUCUS and CHAFEE, for their herculean efforts to steward this legislation, as well as Senators MITCHELL and DOLE for keeping this important legislation on track. I urge my colleagues to support this measure.

ACID RAIN—CLASS OF '85 PROBLEM

Mr. BUMPERS. Mr. President, I rise in support of the bipartisan compromise on the Clean Air Act amendments, specifically the provisions dealing with acid rain. The Mitchell-Dole substitute on acid rain will lead to significant reductions in the emissions of sulfur dioxide and nitrogen oxide; it will allow utilities the freedom to choose the most cost-effective strategies to control those pollutants; and it will be fair to all of the regions of this country.

I want to express my appreciation to all of the Senators who worked long and hard to hammer out an agreement on the acid rain control title. I especially want to thank the majority leader, Senator MITCHELL and the distinguished floor managers, Senator BAUCUS and Senator CHAFEE, for their responsiveness to my particular concerns with the acid rain title as reported by the Environment Committee.

For my State of Arkansas, the substitute amendment represents a vast improvement over S. 1630 or the President's bill. Arkansas' coal-fired plants are amontg the cleanest in the United States, with State permit levels of 1.2 pounds SO_2 per mmBtu or less, and operating histories well below permitted levels. In fact, our Independence Electric Station near Batesville is the cleanest nonscrubbed unit in the country. We burn clean Wyoming coal, two-thirds of the cost of which is transportation to Arkansas.

Both the President's bill and the committee reported bill would reduce SO_2 emissions by 10 million tons by January 1, 2000. This reduction is achieved by requiring electric utilities to reduce their emissions of SO_2 to a rate of no more than 1.2 pounds per mmBtu by the year 2000 and is maintained by a cap of 8.9 million tons on emissions after the year 2000. Clean units—those that currently have emission rates of less than 1.2 pounds mmBtu—are held to an even stricter standard in the year 2000 and beyond based on their emissions in 1985 and their utilization in the 1985–87 timeframe.

In my view, S. 1630 was unfair to Arkansas because it penalized our already clean utilities. Because S. 1630 used 1985 emission rates—an unusually clean year for Arkansas plants—as the basis for measuring the tonnage cap applicable to utilities in the year 2000, the committee bill could have forced Arkansas' utilities to install very expensive scrubbers. Although Arkansas plants continue to use low-sulfur coal and have emission rates well below 1.2 pounds mmBtu, the extremely low-emission rates we were able to achieve in 1985 cannot be replicated in the future. Looking ahead to the year 2000, Arkansas utilities found that they would be unable to operate their clean coal plants at the levels needed to meet projected demand, without installing emissions control technology or purchasing allowances—from utilities that are currently much dirtier than Arkansas plants—from an uncertain market. The potential costs to Arkansas ratepayers from S. 1630 were unacceptably high.

Thus, Arkansas found itself with a Class of '85 problem—an inequitable situation resulting from the use of 1985 emission rates and 1985–87 fuel consumption in the bill's tonnage cap formula. I notified Senators BAUCUS and MITCHELL of my concerns and proposed some solutions for their consideration. In addition, when the Energy and Natural Resources Committee held hearing on the energy impacts of S. 1630 in January, I discussed this problem at length with the EPA witness, Assistant Administrator William Rosenberg. Everyone agreed that the problem needed to be addressed.

The solution provided by the bipartisan agreement is not 100 percent of what I sought for the utilities in Arkansas but it is very close. In general, the compromise provides Arkansas utilities with much greater operational flexibility than either the President's bill or the committee reported bill. If the allowance trading system operates reasonably well under the new law, no Arkansas units will have to scrubbed to earn operational credits.

Crafting a solution to the Class of '85 problem was challenging, however. While a number of utilities shared a problem with the 1985 baseline, individual situation differed and a solution for one State did not necessarily help another State. Enormous credit is due to the participants in the bipartisan negotiations and their staffs for fashioning a Class of '85 provision that addressed everyone's concerns to the greatest extent possible. Senator DOMENICI deserves special recognition for developing a proposal to provide States with very low average SO_2 emissions rates, such as Arkansas, with an alternative basis to qualify for allowances to help accommodate future growth in the decade after the year 2000. Again, I thank the leadership and the managers for their understanding of and attention to Arkansas' concerns. While, it is too early to know what the House bill will provide on

this issue, I urge the managers of this bill to assure, at the very least, that the compromise fashioned for the Class of '85 and clean States is not weakened in conference with the House and to look for opportunities to improve the allowance trading system.

Finally, because of the complexity of the acid rain title and the importance of its provisions to my State, I would like to engage the managers of the bill with a brief colloquy on those provisions.

Mr. ARMSTRONG. Mr. President, I am voting this evening in favor of S. 1630, the Clean Air Act Amendments of 1989. This is one Senator who has been waiting a very, very long time to cast this vote in favor of tough new rules to clean up America's air. And, for the good this bill does, I will be voting for it with great enthusiasm and a deep sense of satisfaction.

But there are also provisions in this bill that give me great pause and cause me to have decidedly mixed feelings about it. Some of the provisions may ignore science or congressionally commissioned study results, such as the 10-year National Acid Precipitation Assessment Program. Also, I believe some of the provisions use clean air concerns to mask a much broader agenda—regulating growth in the West and departing from the traditional concept of multiple use of our public lands. I think the bill ceded to EPA permitting and enforcement powers that are virtually unlimited; to do so requires a profound trust in the benevolence of this agency that I do not share or think at all prudent. Finally, some provisions may prove extremely punitive and burdensome to business, particularly small businesses.

So I do have very mixed feelings about this bill, but on balance, I believe it meets the test that it is far preferable to the status quo and much better than any bill a future Congress is likely to pass. So, flaws and all, I am going to vote for it.

I must admit, when the Environment and Public Works Committee reported this bill, I had very serious doubts about whether this bill could clear the Senate and whether I could even vote for it. But the compromises agreed to by Senate and administration negotiators have made the committee bill much more palatable than it was when reported by the committee.

I think continuing to improve our air is critical. I have been outspoken around here and in Colorado on the need to move forward, to build on our successes, and I have made this one of my top personal priorities.

I believe we have made great progress in cleaning up our air, both nationally and in Colorado. Since the first Clean Air Act was passed in 1955, it has become an American success story. Today, ambient levels of lead and oxides of nitrogen are well within acceptable health thresholds in most parts of the United States.

Even despite the proliferation of the automobile—source of so much air pollution—America's public health profile has shown steady improvement. Our new cars today have high-tech emission controls that can and do reduce:

Hydrocarbons by 96 percent;

NO_x by 76 percent; and

CO by 96 percent.

One clean air commentator reminisced about that day long ago when "There were about 8,000 cars in the United States, only 10 miles of concrete pavement, few spray cans to destroy the ozone layer * * *. The air was relatively unpolluted * * * and our average life expectancy was 47 years." Today, our life expectancy is up to 75 years and climbing, while the incidence of incurable disease—including cancer—has plummeted.

Colorado exceeds our national progress in cleaning up the air we breathe. Colorado's air—and especially Denver's air—leave a lot to be desired, but there is some reason to think we are on the right track.

Ozone, the pollutant that is choking Southern California is not a clean air problem in Colorado.

Carbon monoxide [CO], which has always been a major part of the Colorado clean air puzzle, has been so reduced—mainly through newer and cleaner cars, and augmented by mandated oxy fuels in winter and improved inspection and maintenance—that even Denver may soon meet the EPA standard for CO. We violated that standard on 150 days in 1970, but on only 36 days in 1986. In 1989, we were in violation only 6 days; and, in the CO season this winter, Denver passed inspection on all but 2 days late last fall. Not long ago, I called for Colorado to launch an ambitious campaign to clean up its air and cut our total CO emissions by half before 1992. I believe we are well on our way to meeting that goal.

Particulates are visible pollution, such as the infamous Brown Cloud in the Denver Metro region; woodburning and dust are key components. Colorado had 19 communities around the State—from small ski towns to the metro area—with serious particulate problems. Strict local controls on woodburning and increased street paving and street sweeping have meant most of Colorado will meet the EPA's particulate standard by the end of this year, though probably not by the June deadline in current law.

But although we have come far in this effort, Mr. President, much remains to be done. The strict technological requirements we enacted for new cars in the 1977 amendments played a considerable part in Colorado's progress in reducing CO emissions. However, current vehicle emission reductions will be overwhelmed in Colorado by the year 2010, due to a projected doubling of vehicle miles traveled in the Denver metropolitan area, so there is a strong imperative to do more.

THE GOOD IN THIS BILL

In my opinion, there are three main points where the bill delivers for Colorado and for the country.

First, it addresses ozone and CO emissions with new technological requirements for vehicles—not only cars, but light- and heavy-duty trucks. In addition, stricter tailpipe standards may be triggered in the future if certain cities continue to fall short of clean air goals. The tailpipe standards build on what are generally regarded as the successful effort in the 1977 clean air amendments, and this provision may do more to clean up Colorado's air in the next 20 years than all the rest of the bill combined.

Second, the acid rain provisions in this bill will reduce sulfur dioxide emissions by 10 million tons or more every year, and cap annual emissions at 12 million tons a year. The acid rain provisions of the bill rely on market-oriented allowances to emit pollutants, while emphasizing clean coal technology and fuel switching that should benefit clean, low-sulfur western coal.

Third, this bill represents the first effort to get serious about limiting the toxics with which we have been gradually poisoning ourselves. The toxics provisions of S. 1630 list the chemicals and chemical families which must be controlled as toxic emissions. Industry is required to install technology achieving maximum emissions control. Any remaining emissions of listed toxics are measured for any residual health risk.

THE BAD IN THIS BILL

I remain deeply concerned about five other aspects of this bill, however, which I think should be tagged for very close scrutiny in the future.

First, I have already mentioned my mistrust of the vast discretion being conferred on EPA by this bill; its permitting and enforcement powers are so greatly expanded that I think we will have to be very alert to how EPA behaves. It will have to do a lot better, in my opinion, than it has with its similarly expansive powers under the Clean Water Act and, frankly, I fully expect Congress to find itself sweeping up the debris from this bull-in-a-china-shop EPA it is creating.

Second, there is real doubt in my mind that the allowance system in the acid rain provision will actually work as planned. It is essential, in my opinion, for the market availability of allowances to work so the market can make available unused allowances to a growing West which needs them. I am especially interested in seeing that the West—with its clean coal and no con-

tribution to the acid rain problem—is not unfairly treated when the allowance system goes into effect. Congress will have to watch this like a hawk in the future, or one of the most important rationales of the bill will be undermined.

Third, the possible residual risk measurement in the toxics section continues to cause concern. The residual risk provision—the maximum exposed individual test of someone spending their entire lifetime of 70 years outdoors at the factory fence, downwind, inhaling emissions—appears to be extremely unrealistic as a measure of cancer risk. Also, small businesses can be grouped as area sources and would have to meet the same tough standard.

Fourth, I am concerned about the overall cost of the bill. President Bush has vowed to veto a clean air bill if its cost to the country comes in at much over $20 billion a year. That is a staggering amount of money, and one the Senate bill now exceeds, probably by a large amount.

Which leads me to my fifth and final reservation. If the bill that finally emerges from negotiations with the House of Representatives goes much further than the Senate bill in terms either of more regulation or greater cost, I would have a very hard time supporting it when it comes again before the Senate.

On the other hand, the conferees may well improve the bill and, if so, I would be more enthusiastic about this legislation.

Mr. KERREY. Mr. President, its been some 13 years since the Congress last amended the Clean Air Act. The American people have waited a long time for its revision and strengthening. Today, I am pleased to join in voting for the passage of a strengthened Clean Air Act.

The need for a revision and strengthening of our Nation's clean air laws is very clear. Millions of Americans are exposed to unhealthy and unsafe air. Today, 20 years after the act's original passage, almost 100 urban areas still violate the Federal ozone standard. Since 1970, the EPA has only managed to establish safe exposure levels for seven chemicals, far short of the several hundred air toxics listed in the original Clean Air Act. There are serious short- and long-term health effects that we can no longer neglect. Aside from the human health costs, our country's air quality has a negative economic and ecological impact.

The bill that we have before us is the result of a long process through which a final package has been achieved through compromise. The very fact that we are here about to vote on a final package is a tribute to the majority leader. No one individual has worked as hard as Senator MITCHELL over the years to bring us to this vote. He has been tenacious, tough and very fair. At moments when it seemed that no further progress could be made he has found middle ground between opposing sides. He has put his reputation on the line and he has not failed us. Senator BAUCUS also deserves credit for his work, as does Senator CHAFEE. Additionally, the Senate Environment and Public Works staff has been helpful in assisting the particular problems faced by each State.

The task has not been easy. The issues are complicated. The compromise we are considering today is a balance among many interests, and as with any compromise it has been criticized from many camps as insufficiently strict, as unduly harsh, and as unnecessary.

Mr. President, there are elements of this bill that I would like to see strengthened. I and other Senators have faced difficult decisions. In considering a number of amendments we have had to weigh our wish to strengthen the current proposal against the risk that the passage of strengthening amendments would make the bill veto bait; that it would break the agreement between the Senate leadership and the administration. I accept the word of the President when he states that he would have vetoed a bill that broke substantially with the agreement. My greatest concern has been that we would not enact a clean air bill. We should not allow the perfect to be the enemy of the good.

Based on this concern, I have chosen to vote against amendments that I would like to have supported, tightening of tailpipe emissions, strengthened the alternative fuel provisions, tightened the provisions covering air toxics, among others. Even without the inclusion of these provisions I believe that we have created a bill that will yield demonstrable health, economic, and ecological benefits. The bill is not perfect but it is far better than current law. The American people have waited long enough for cleaner air. Further, I do not think this is the last time we will visit these issues.

I appreciate that the costs associated with this bill are high, yet so are the costs of inaction. Some areas of the country will face hardships. It is possible that Nebraska will face modest increased costs associated with this bill. Nebraskans will not, however, face the high increases in energy costs and other costs that we might expect in other regions.

Nebraska has the good fortune of being a relatively clean State since we are close to the Powder River Basin in Wyoming, a source for low-sulfur coal. We are also fortunate to have relatively new generating facilities.

I was very concerned about a specific provision in the initial acid rain title of the bill. In specifying the baseline period, the time period that determines the normal operating capacity for powerplants, the bill selected the 1985–87. Unfortunately, that timespan coincided with a severe farm crisis that crippled our economy. Needless to say, our power producing capacity during this period was very low. The original bill out of the Senate Environment and Public Works Committee failed to recognize this low capacity problem. I am very pleased that Senators MITCHELL and BAUCUS were able to provide assistance to low capacity generators in a number of States This assistance will be in the form of a pool of allowances that will be available to low capacity generators, including Nebraska utilities that meet the provision's requirements. This provision was included without breaking the sulfur dioxide cap established by the legislation.

There have also been other improvements in the bill. I am pleased that the Senate included an amendment that I drafted in conjunction with Senator DASCHLE, EXON, HARKIN, DIXON, and DOLE that provided the EPA Administrator the discretion in deciding whether to require small farm operations to file hazard assessment reports for handling normal amounts of anhydrous ammonia. If the EPA Administrator determines that requiring each farmer to file a separate report will not yield public safety benefits, he or she can relieve farmers from having to waste dollars on just one more report.

I am also pleased to have joined with Senators DASCHLE, HARKIN, DOLE, and others in cosponsoring an amendment that requires cleaner burning conventional gasoline in nine severely polluted cities beginning in 1994. The bill also includes a provision mandating a 3.1-percent oxygen content requirement for carbon monoxide nonattainment areas. These amendments not only help ensure cleaner air, but are potentially good for grain-based fuels and fuel additives.

These are minor victories compared to the overall result: a thoroughgoing revision and strengthening of the Clean Air Act. Mr. President, I yield the floor.

Mr. DODD. Mr. President, I rise to express my support for S. 1630, the Clean Air Act.

It has been 13 long years, since 1977, since the Clean Air Act has been reauthorized. Economic and regional conflicts foiled clean air legislation throughout the 1980's—those and the Reagan administration's notion that dirty air was overemphasized and was, anyway, merely the price of progress.

While air quality has improved considerably since the original passage of the Clean Air Act in 1970, significant problems remain. Over 100 areas in

the United States do not meet minimal health standards established by the act for ozone, more than 40 areas have failed to attain the carbon monoxide standard and 58 areas exceed the health standard for particulate matter.

Knowledge of the detrimental health effects of toxic air pollutants has far outstripped the regulatory schedule—leaving an unacceptable gap between controllable risks and a regulatory program to address them.

Early concerns regarding the negative effects of acid deposition have given way to concrete evidence of lake acidification, forest dieback, materials, and visibility damage, and the negative health effects caused by acid deposition and its precursors.

New evidence concerning global warming and its potentially cataclysmic consequences add urgency to the need for near-term action, especially with regard to known ozone-depleting chemicals for which substitutes are readily available.

Unfortunately, during the past decade, a silent health crisis was largely ignored by Congress. Air pollution—smog, acid rain, airborne toxics, and ozone depletion—threaten the American public with cancer, birth defects, lung diseases, and other crippling injuries.

Americans have been saying for years that they want cleaner air. The hard questions—the ones on which the legislation has been hung up for a decade—concern the cost. Who pays, and how much?

The United States is now spending approximately $30 billion a year to hold down air pollution. That is not excessive; it is, for example, a little less than annual spending on cigarettes and tobacco.

It is large enough, however, to have an impact, particularly since some industries and some States inevitably bear heavier burdens than others.

What we have before us is a compromise on clean air which satisfies neither side of the issue completely. Nobody is entirely happy with the compromise clean air bill worked out between the leadership and the Bush administration. Frankly, it is not the bill that I would have written. But it is a balanced compromise, a strong bill that will make a measurable and welcome improvement in existing law—and in the air we breathe.

I am proud of my record, built over my 16 years in the Congress, as a strong environmentalist. But throughout the long debate over the past several months, I supported the leadership coalition when various so-called strengthening amendments were considered because I realize that we must have progress on clean air without perfection.

The compromise bill that we are about to vote on is a triumph of common sense. Without substantial give and take, the legislation was destined to run head-on into a filibuster. The first major assault on the country's air pollution problems in over a decade now has a brightened prospect of becoming law, with much of its toughness intact.

If the bill is passed and enacted into law, the costs of containing air pollution will be raised. The quality of the air also will be improved. Passage of this clean air bill will mark the end of a decade of legislative paralysis, and in that case there is one sure winner: the breathing public.

Probably the most important provision in the compromise bill is the one that expands and tightens the rules on toxic substances in the air—chemicals that make people sick, most of them emitted by industrial processes. The country has learned a lot about air chemistry in the past 20 years. The present clean air law controls only seven toxics. The compromise bill would cover 187 and require every industry to use the best available technology to reduce emissions.

The acid rain provisions of the bill, an issue of concern to all of us in New England, targeting a 10 million ton reduction in sulfur dioxide emissions from powerplants in the next decade, also are an important part of the compromise bill.

Other sections of the bill, concerning airborne industrial pollutants and urban smog, were weakened when compared to the original Senate bill. I must say, Mr. President, that I would not have favored such weakening provisions had I been involved in crafting the compromise.

But even those of us who are strong advocates of tough environmental legislation realize that we all must be prepared to make sacrifices in order to get a bill passed. I am pleased that even these so-called weaker provisions represent tougher environmental standards beyond existing law.

Mr. President, I am also pleased that two of my amendments, one relating to the testing of jet engines, an important industry in my home State of Connecticut, and the other relating to minority owners of jointly funded electric generation facilities, were adopted as part of the final clean air bill.

I wish to commend the majority leader, Senator MITCHELL, for his outstanding work in bringing this legislation to reality. Ever since he has been in the Senate the majority leader has been the leader on clean air legislation.

I also wish to commend the two managers of the legislation, Senator BAUCUS and Senator CHAFEE, for their outstanding work as well.

For the past 10 years, these three Senators worked tirelessly to see to it that the Senate pass clean air legislation.

Finally, I wish to recognize the interest of President Bush who put forth his own clean air bill and was willing to negotiate with the Senate so that a compromise bill could be passed.

Mr. President, the clean air legislation we are about to pass will improve health protection to the American public and provide additional assurances that it will be protected from unreasonable health risks over which it has no control.

With passage of this historic legislation, the long deadlock over clean air legislation will be broken. Instead of rhetoric, we will now have results. And those results will improve the quality of the air that everyone breathes.

Mr. BOND. Mr. President, in expressing thanks to the many people who labored long and hard to achieve a workable compromise I must express a very special thank you and my sincere gratitude to Claire Heffernan, of my staff, and Rusty Matthews and John Wood, of Senator BYRD's staff.

Mr. BRADLEY. Mr. President, it has been 13 years since the Senate last produced legislation on clean air. While some areas have seen improvement in air quality, smog problems have spread beyond the cities to afflict rural areas. We have learned more about the effect of ozone levels on human health, on forests and on agricultural productivity. We have learned about the impact of CFC's in creating the Antarctic ozone hole. We have learned that emissions of sulfur dioxide and nitrogen oxides do indeed cause acid rain.

In those 13 years, our behavior has exacerbated air pollution problems. We are driving more: total vehicle miles traveled in the United States increased by one-third to over 2 trillion miles. The current law does not offer Americans adequate protection from human-produced atmospheric poisons. In short, in the last 13 years, the case for passage of a strong clean air law has become overwhelming.

The Environment and Public Works Committee produced a strong bill that addressed the problems of air pollution. The bill went far toward cleaning our Nation's air. Some Senators and the President said that the bill went too far. They complained that the bill was too costly.

Faced with a Presidential veto, members of the committee, under the leadership of the majority leader, began negotiations with the White House and those who threatened to block action on the bill. The committee bill's champions were forced to accept loopholes, exceptions, and complexity in the compromise. As a result, this bill is not as strong as it could be to protect

the health of Americans from air pollution.

One amendment to the compromise language was offered by my colleague from New Jersey [Mr. LAUTENBERG] and rejected unwisely by the full Sente. The amendment, which I cosponsored, would have protected Americans as fully as we should be from exposure to toxic chemicals. It would have brought the single largest source of toxic chemical emissions in the country—auto emissions—under regulation. But the Senate rejected the opportunity to protect Americans from toxic chemcial emissions from mobile sources. Over one-half of all deaths from exposure to toxic chemicals in the air are caused by emissions from mobile sources, yet the bill denies EPA power to regulate those emissions. The estimated $1.5 billion per year the Lautenberg amendment would cost was deemed "too expensive."

Yet the Senate, by increasing the gasohol subsidy, was prepared to forego $1 billion in funding for mass transit and highway development and has endorsed higher gasoline prices for slight or no health benefit. So clearly, some policy choices have been made that do not use health or the environment as a yardstick.

The Senate also rejected other measures to protect Americans from pollution from automobiles. Americans drive about 2 trillion miles per year, and the figure is climbing. A Clean Air Act that fails to address pollution from automobiles in a very strict fashion fails to attack the major source of smog. Without stringent controls on automobile emissions and the expansion of effective public transportation, we will not clean the air as sufficiently as we could. In the long run continuing growth in auto use will overwhelm the controls we have imposed. The Nation's air—and New Jersey's air—will not get as clean as it should.

I have some addition concerns. The controls on nitrogen oxides in this bill should have been stronger. Nitrogen oxides are not only a major precursor of acid rain, they also are an essential precursor for the formation of photochemical smog, and they are a major component of the brown haze that settles over so many of our cities. The nitrogen oxide controls placed on utilities in this bill need to be beefed up particularly, given the multiple problems caused by these pollutants. Controls are needed not just on utilities, but on industrial burners. Stronger rules on nitrogen oxide emissions from cars are achievable, but they were rejected by the Senate when second-round emissions controls were rejected.

Another issue that deeply concerns me is the Senate's failure to ban leaded gasoline in a timely fashion. In the compromise proposal, lead in gasoline was to be phased out at the earliest next January, and most likely, not until 1993. Faced with the threat to delete this phaseout entirely, the committee accepted an amendment which extends the time for phaseout by an additional 2 years. I opposed the amendment because each year the ban is put off, another million pounds of lead are spewed into the air to end up in water supplies and the soil around our homes. Given the latest alarming information on the incidence of lead poisoning in our children, a ban today is far more appropriate than any postponement. Yet, in order to save some unknown number of farm vehicles, which could have continued to use leaded gasoline indefinitely under the bills original provisions, from "valve wear," we have allowed many times the amount of leaded gasoline needed for protection of farmers to be marketed nationwide in our cities and elsewhere. Such actions made no sense and belittle our collective efforts for a clean environment.

So, Mr. President, I am sorry, as I know the members of the committee and the leadership of the Senate are, that the bill before us does not do all that it can and should to clean the air.

Nonetheless, even with its shortcomings, this bill does in fact represent a significant improvement over existing law. I will vote for passage of the legislation. This legislation, despite its unnecessary expense, will clean the air. And that is the bottom line. This legislation will produce cleaner air, and it will improve the health of Americans.

The bill is complex, it addresses a myriad of issues, and there are some noteworthy virtues. Twenty years after Congress first set clean air goals for our cities, we finally have a bill that requires steady progress toward reducing smog. For the first time, Federal law will protect states from pollution that blows in from neighboring States. This source of pollution is so crucial to New Jersey that it is doubtful that we could meet air quality standards even if all New Jersey's sources of smog were shut down, unless neighboring States took action.

Other provisions of this legislation reduce the exposure of all Americans to airborne toxic chemicals and carcinogens. That is a major achievement. To date, EPA has only managed to regulate seven chemicals. This legislation will initially force the regulation of 187 toxic chemicals, and alter the process by which chemicals are regulated. This bill will end a 20-year legacy of inaction on regulating the poisons emitted by the industrial processes.

Another important element of this legislation is the visionary program it includes to address a major, global environmental issue, the destruction of the stratospheric ozone layer. This bill commits the United States not only to the elimination of CFC's, the most damaging group of chemicals, but also to the elimination of related chemicals. This latter group may be less severely damaging to the ozone, but they still deplete the global shield against ultra-violet radiation.

Another important victory and an important precedent for future environmental law, is the inclusion of an absolute cap on emissions of sulfur dioxide from utilities. In the long run, the cap ensures that emissions of acid rain pollutants does not continue to climb. An absolute cap on emissions makes emissions a scarce and marketable commodity, and encourages businesses to invest in research to reduce them. Harnessing the powers of the market to control pollution must be the direction of environmental protection in the future.

Senator BAUCUS, Senator CHAFEE, and especially the majority leader, Senator MITCHELL, deserve the substantial credit for the writing and shepherding of this bill through this phase of the legislative process.

As the people in Eastern Europe find their voices, one of their first complaints has been the poor quality of the environment, and particularly the severe air pollution. The costs of dirty air in East Germany, Poland, the Soviet Union, and elsewhere have been staggering. Americans believe that economic well-being requires clean air. A healthy economy and a healthy environment are in fact, compatible goals.

I have mixed feelings about this legislation and, given the importance of clean air to all Americans, that is unfortunate. This bill will clean the air. It does not do as much as it should, and the costs to the economy and to the Treasury, will be greater than they need have been. Getting any legislation has required compromise. It is unfortunate that the threat of a Presidential veto has weakened the bill's ability to clean the air in a more thorough way. Achieving clean air for all Americans will require our best efforts and continued vigilance. This bill is an important step, but we still have more to do.

Mr. KERRY. Mr. President it has been 13 years since Congress last had the courage and the muster to address the Clean Air Act. And today, after a month of floor debate and hundreds of hours of meetings and discussions, the Senate is ready to vote on its version of the Clean Air Act.

I want to take a moment if I may to commend the able majority leader, Senator MITCHELL of this diligence in ensuring that this bill made it to the Senate floor and then today to passage. He is an environmental leader and one who has worked hard on this critical issue for as long as I have known, him. I applaud his success in

moving the legislation through the Senate at a time when so many interests—regional, economic and most importantly the interests of the health of our citizens were pulling the act in so many directions.

Mr. President, today I will vote for the passage of the Clean Air Act and send it on to meet later in conference committee with a version that is currently being crafted in the House of Representatives. Is the Senate bill a perfect bill? No, I am sorry to say it is not. Is it an improvement over current law? Yes, I believe it is. Mr. President, the reality is this, last year, the Senate Environment and Public Works Committee voted a great piece of legislation out of committee by a 15 to 1 vote. That initiative was masterful and is one that would have made a serious difference in achieving healthier air quality for our citizens.

So what happened? The fact of the matter is Mr. President, our supposed environmental leader, the President of the United States, George Bush, sent his team to Capitol Hill with the clear message, if the bill cost more than he wanted it to, then he was going to veto it. Mr. President the Clean Air Act of 1970 made protection of the public health the primary purpose of air pollution control. It declared that when public health considerations conflicted with other concerns, that public health be given top priority. Health standards were declared the primary standards. For President Bush, however I am sorry to note, polluter's costs were at least as high a priority. This was all too clear from the message he delivered during the negotiations before the bill came to the Senate floor. For more than 20 days the Bush team negotiated in a back room off the floor of the Senate and whittled away at the fine work of the Environment and Public Works Committee. The President had the opportunity to accept the committee bill, but no, Mr. President, instead he chose to chip away at it, to diminish its protection.

Cost the President says is the issue. Some industry estimates suggest that the bill could cost as much as $22 billion a year. According to the American Lung Association, the health cost associated with dirty air is $100 billion a year. And who pays Mr. President, the industries and businesses across America in health insurance and treatment costs. Even using their own figures one can look at the cost still this way. Either we pay 20 cents to prevent the effects of dirty air on our citizen's health, or a full dollar later in health costs to repair the damage unclean air produces. And those are only the health care costs.

Agricultural damages from polluted air cost over $5 billion a year and damages to statues and buildings from acid rain alone are estimated to run over $2 billion dollars in repairs. Forest and stream, and pond damage, tourism losses and the like could cost additional billions of dollars. So if cost is the issue for the President, then he is confusing that issue with how to limit the price tag. Clearly clean and healthy air will save this Nation tens of billions of dollars and untold human agony.

The bill before us is a compromise, it could have been much better and I suppose it could have been worse. It contains strong provisions to reduce acid rain, limits certain air toxics, and makes some improvements to reduce smog pollution.

Today industries belch out billions of pounds of hazardous toxic air pollutants. In addition, automobiles, trucks and buses spew over 50 percent of America's cancer causing air toxics. In the past the Clean Air Act only required the EPA to control 7 toxic chemicals, this legislation increases that list to 191 and requires all major sources emitting these pollutants to use maximum available control technology known as MACT to control these carcinogens within 10 years. Some estimate that this will decrease the air toxics from major industrial sources by almost 90 percent, and that Mr. President is a great improvement. The legislation also requires the EPA to create a program which will monitor the atmospheric deposition of toxics into both the Great Lakes and coastal waters and for the tourism and fishing industry in my State, I commend the importance of that provision.

Where the bill falls short with regard to air toxics Mr. President, is not with the section dealing with large industrial sources which spew out almost half of the air toxics in the United States, but the problem lies in the fact that it does nothing to eliminate the other half of our air toxics which come from motor vehicles. Mr. President according to the EPA 56 percent of the deaths associated with air toxics come from cars, buses and trucks. The committee bill included a provision that addressed air toxics from motor vehicles, and during the negotiation process the President's emissaries sought to have it eliminated; and unfortunately, they were successful. Last year the President said that toxic air pollution results in 3,000 cancer cases a year. His goal was to reduce this amount by 75 percent. The President is saying one thing and sending his folks to the Hill with another message. He could have easily accepted the committee bill and really done something to achieve that 75 percent reduction but instead he did not.

With regard to ozone pollution known more commonly to us as smog, the bill again makes some improvements but unfortunately falls short in some very significant areas. In 1977, Congress gave areas in the country with severe auto-related pollution 10 years, until 1987, to achieve healthful air quality. As late as 1982, the EPA testified that a majority of the areas were going to miss that deadline. The fact is, that now in 1990, 13 years later, there are 101 areas in this country still suffering from chronic smog; 44 areas with carbon monoxide pollution and more than 50 areas suffering unhealthful levels of fine particulate pollution.

Anyone can suffer from the ill effects of smog pollution. Across this country over half of our citizens live in areas where health standards are not being met. Those especially vulnerable to this pollution include 31 million children, 19 million elderly, 6 million asthmatics, and 7.5 million individuals with chronic lung disease.

On its face, the bill sets up an ambitious system which places new requirements on cities to achieve ozone attainment. It asks cities to attempt to make steady progress toward lowering their smog pollution. Specifically ozone nonattainment areas must reduce VOC's the main ozone pollutant, by 4 percent a year for the first 6 years; then 3 percent a year until the ozone standard is met. The compromise bill also requires some cities to have vehicle inspection and maintenance programs in place as well as stage two vapor controls and transportations control measures.

Mr. President, on paper these look like impressive improvements. But the tools to make this happen I fear have been if not eliminated, severely undermined. The bill includes compliance loopholes that States and industries can drive a Mack truck through which may weaken the bill beyond the current law in this area. Since the first Clean Air Act was enacted, states have been required to develop and carry out plans which would help them eliminate smog pollution and achieve ozone attainment. States and localities have had the legal authority and the Federal Government has had the power to review the plan, and in cases when States fail to implement a plan, or their plan is insufficient, the Federal Government is supposed to come in and implement a Federal plan that will do the job. The threat of Federal Government intervention has forced many States to implement tough plans. In addition, when the Federal Government or the States did not institute an adequate plan, the mandatory requirement under the law has placed the ultimate enforcement tool in the courts, where citizens can sue to force Government action. Mr. President this Federal implementation provision is the meat of the current law. The compromise bill before us today, however, repeals the Federal responsibility and in doing so eliminates an im-

portant incentive to states to achieve clean air.

In addition to stripping away the enforcement lever of the Federal Government, the compromise also provides a loophole which has not existed in current law, that provides a waiver in the pollution control requirements if the industry thinks it will cost too much. The bill includes a provision which says that any Governor from any State can walk away from pollution control requirements whenever he or she conclude that pollution controls cost too much. There is nothing wrong with considering the cost of clean up. Existing law has cost considerations built into the choice of pollution control for every single facility. Not only would this new provision be a paperwork nightmare for States, it would also be an open invitation for polluters to pressure States into emission control concessions. The 1970 law makes health protection the basis for the law. This new loophole places health as a second tier consideration when compared to cost.

Third, the smog title of the bill before us today no longer requires that reasonably available control technology or RACT, be applied to as many existing sources as necessary to reach the health standards in the law. The EPA is no longer given the discretion to control smaller, stationary sources emitting smog forming compounds. Under current law they have had that authority. The bill we are voting on today says that controls must only be required on sources emitting more than 100 tons of pollution per year if they are in serious ozone nonattainment areas, and those sources emitting 50 tons of pollution a year if they are in extreme ozone nonattainment areas. The sad reality is that according to the Congressional Office of Technology Assessment, small stationary sources emitting less than 50 tons of pollution per year, are responsible for nearly half of the Nation's smog forming emissions and are by far the fastest growing segment of the emission inventory.

Mr. President, these three examples I have just pointed out are serious retrenchments from current law. Again like the other concerns I have expressed with the bill before us, none of these provisions which minimize current law were in the committee bill. All three were born out of the negotiation process. None of these ideas were pushed by industry or any Senators for that matter. They were insisted on by the President's men who said the President would not support the bill if he did not get his way.

Like most air pollution, smog is a pollutant that knows no State boundaries. Even if one State works hard to clean up its smog, another State may choose not to. Without a Federal mandate, States are not likely to meet the ambitious reduction plan that is set out in the bill, and consequently our cities will continue to choke on smog. The President could have accepted the committee bill and kept a strong current law with EPA at the helm, but instead he insisted on weakening this section of the Clean Air Act which enforces smog pollution reduction.

Mr. President as you know, I offered an amendment on the Senate floor which would have returned the bill to current law in all of these areas, but unfortunately it was targeted as a deal breaker and Senators who expressed support in the past for the provisions of my amendment felt compelled to vote against it. Unfortunately it lost by a handful of votes. I am pleased to note however, that on the very next day after the vote on the Kerry amendment, the House Energy Committee voted 38 to 2 to include my current law amendment in the House bill. So I am very optimistic that we will visit this issue later in conference committee and do what is right to achieve clean air in our cities.

With regard to tail pipe standards, the bill before us today requires tighter controls on automobiles to reduce air pollution. Automobiles account for 50 percent of America's smog forming hydrocarbons. Under the bill, by 1995 all motor vehicles must reduce their hydrocarbon emissions by 22 percent and their nitrogen oxide emissions by 60 percent. That provision is a good one. However the bill before us today missed the opportunity to do an even better job in the so called second round of tailpipe emissions. In the compromise a second round of reductions goes into effect in 2004, only if 12 cities are still too polluted. In essence if 11 cities are still too polluted no new emissions are required. I can not understand this kind of thinking, but that is what the compromise bill requires. Like other provisions, the committee bill mandated tighter controls on automobiles than the compromise. Again the President was the driving force to weaken this section of the bill and was successful in doing so.

The bill includes some new and important provisions that will help prevent the further depletion of the ozone layer. Not to be confused with low level ozone, the ozone layer screens out harmful ultraviolet rays. The bill before us today requires complete phase out of Chlorofluorocarbons known as CFC's and phases out other ozone depleting chemicals. I applaud this section of the bill.

In the area of acid rain control I am pleased to say the bill is a serious improvement over current law. Mr. President, I participated in the acid rain negotiations on this bill and I must concede that they were probably the most contentious of all of the negotiations on the bill. Acid rain has been an issue I have worked on for many years. My State of Massachusetts has suffered the effects of acid rain for decades. Too many of our rivers, lakes, and streams are lifeless or dying, and significant parts of our forests are in serious decline. Acid rain is literally eating the faces off our historic statues, and the health costs associated with acid deposition has grown steadily.

Each Congress since coming to the Senate I have introduced an acid rain reduction bill. I am pleased that the bill before us will significantly decrease the acid rain pollution that has been falling on the New England States and Canada for far too long.

Mr. President, the evidence is all too clear, acid rain continues to wreak havoc on our environment and produce devastating health effects on our citizens. Although the United States has made some serious efforts to improve the air we breathe, experts say that we still emit roughly 15 percent of the world's sulfur dioxide [SO_2], and 25 percent of the globe's nitrogen oxide [NO_x].

The United States cannot reduce air pollutants worldwide, but as the primary contributor we can act as a model and lead the world in addressing the Earth's environmental woes. The acid rain section of the bill before us today when fully implemented will reduce SO_2 emissions by 10 million tons below the 1980 levels and cap emissions at these levels by the year 2000. Total emissions equal approximatley 23 million tons. This bill will achieve a reduction of just under half of that pollution and that is significant.

The bill before us today is a polluter pay bill. That is the way it should be. At this moment I want to commend again the majority leader for his work on ensuring that we got a bill where the polluters pay. A few years ago Mr. President that seemed close to impossible.

The acid rain provisions provide flexibility to utilities and States. Again there is no cost sharing, and it does not mandate scrubbers. It leaves it up to utilities to reduce pollution in a manner that they deem most effective. It also provides future growth states with an ability to grow.

Mr. President, while the endless debate has been raging about acid rain, Massachusetts and other States, particularly Northeastern States, have been suffering damage. In fact last year, frustrated by the absence of National Clean Air legislation, Massachusetts went ahead with tough new restrictions designed to reduce acid rain emission within the State. The regulations stem from a 1985 law, on which I had the pleasure to work as the Massachusetts Lieutenant Governor, which caps the amount of sulfur dioxide allowed to be emitted in the State. The new proposed regulations are

similar to what we can expect to see nationally from this bill.

Some have asked why Massachusetts was willing to impose such tough standards on itself, when it only contributes 1.3 percent of the SO_2 nationwide, particularly when the majority of SO_2 that falls on the State comes from other States. The answer is simple, the State's rivers, lakes and streams, forests, buildings and now even marine life have suffered for far too long from the ill effects of acid rain. Therefore even the modest improvements that such a cap can produce is necessary. And furthermore, Mr. President, in Massachusetts we recognize that our emissions do flow downwind to neighboring States, and it is our responsibility to curb these emissions.

Although Massachusetts has responded to this information definitively by enacting one of the most comprehensive acid rain control bills in the country which mandates substantial reductions in both sulfur dioxide and nitrogen oxide emissions within the State, they cannot do it alone. And for that reason I am pleased that the bill before us today will do nationally what Massachusetts has already set in motion.

The acid rain provisions are good, and I applaud their inclusion.

Mr. President, there is no simple answer with regard to cleaning up the air that we breathe. There are no simple solutions that everyone will endorse. The cost of a clean air bill is high, but the health and other related cost of no bill is even greater. The bill we have before us today does not have everything I would have liked. The process is not over however, and as the legislation works its way through the House of Representatives there will, I hope, be measures added that strengthen what I have outlined as areas which need improvement.

Mr. President, 20 years ago this month over 20 million citizens across our Nation turned out and demonstrated their concern about the environment. Through parades, teach-ins, nature walks, cleanup efforts, lectures and concerts, Americans told policy makers they wanted real change to save our future environment. Earth Day 1970 provided a powerful impetus to Congress and the Federal Government for the passage of the original Clean Air Act, which we are voting on today. As we embark on Earth Day 1990, and the 20th anniversary, it seems only too fitting that we should pass a stronger, more comprehensive Clean Air Act. Mr. President, let us not forget today after decades of struggle, the environment is no longer an issue about "quality" of life but rather life itself; no longer an issue about how we choose to live but whether we survive at all. The Clean Air bill before us today will move us in the right direction, although with less urgency than is required.

AIR TOXICS DISCUSSION

Mr. DOMENICI. Mr. President, as we move toward completion of our consideration of the Clean Air Act, I wanted to spend a few moments to discuss the compromise that has been worked out on the toxics air pollutants title of the bill.

As one of the members who worked so hard to fashion the language, I believe it is important to focus on what the final agreement does—the benefits that it will provide our society.

First, the basic structure of the air toxics title is to require an initial level of tight controls for all major sources of toxic air releases. This level of controls is determined strictly on the basic of the availability of technology, not on any defined risk to the public.

While questions have been raised regarding the suitability of requiring every emitter of air toxics to incur the cost of install such technology, irrespective of the risk it poses, the basic concept of technology requirements is a necessary first step to assure the public that measures are being taken to address this serious public health threat.

It is expected that the installation of this technology will reduce emissions of air toxics from large industrial sources by approximately 90 percent or more from uncontrolled levels. This is significant reduction, particularly since stationary sources are estimated to be responsible for only roughly 20 percent of the cancer deaths in this country due to toxic air emissions.

It is the second, risk-based phase of the Senate program that has generated so much concern and discussion. After the first round of technology is installed, EPA will be required to evaluate the remaining residual risk from all sources that emit known—as well as suspected—carcinogens.

The bill as reported out of committee required that EPA calculate this risk by determining if the source presented risk greater than 1 in 10,000 to "the individual in the population who is most exposed to emissions." This is premised on a theoretical model assuming continuous exposure to the pollutant by a person standing at the fenceline of a plant for 70 years. After this level was achieved, it was further required that additional reductions occur until a one-in-a-million level of risk is reached.

This so-called bright line standard on its surface has a certain appeal. However, many of us were concerned that such a standard required a level of certainly that cannot be achieved from the current risk assessment process.

The assumptions and methodologies that the Environmental Protection Agency has traditionally employed are conservative in their assumptions about whether a chemical can cause cancer in people, the potency of the chemical, the durations of exposures and the amounts people actually absorb. Such conservation assumptions can lead to overcontrol in many instances. On the other hand, such uncertainties in the science could mean that we are missing certain risks, and despite many conservative assumptions, may not be adequately protecting the public from certain particularly potent chemicals.

Many of us have been persuaded that the best minds of the scientific community need to look into this matter more thoroughly before we proceed with a program where major decisions are going to be made based on a process fraught with uncertainly.

While I don't pretend to have a complete understanding of the technical issues involved in risk assessment, I do know that a number of influential scientists have raised concerns about the need to refine the process.

Almost all of the information that we have developed regarding potential cancer risks derives from animal studies or human epidemiological investigations in which chemical exposures are many times higher than concentrations of pollutants in the ambient air. Consequently, in order to develop an estimate of the cancer risk to humans who are exposed to ambient air concentrations of a chemical, the risk of cancer potency observed at relatively high exposure levels must be extrapolated downward, often by several orders of magnitude.

The problem that scientists confront in attempting to do this is that the true shape of the so-called dose-response curve is not known for the vast majority of chemicals, and actually may never be known. Consequently, a number of critical assumptions and policy choices must be made to estimate the cancer potency or risk at atmospheric concentrations to which the general public may be exposed.

Unless there are data to suggest otherwise, EPA assumes that there is no threshold for the carcinogenic effect of a hazardous air pollutant, and that the dose-response curve is linear. In the case of animal data, EPA utilizes the 95 percent upper confidence limit of the unknown parameters. This approach, EPA acknowledges, does not produce the most probable estimates of the risk, but, instead, identifies an upper limit to the risk.

When a risk assessment is based on human epidemological data, EPA's approach produces an estimate of low-exposure risks that may very well be one or two orders of magnitude higher—that is, 10 or 100 times higher—than the actual levels of risk.

With my statement, I am including a copy of an article that appeared in the Washington Post on Monday, March

26, which discusses the problems with all the models which extrapolate dose-response.

I have only touched on some of the uncertainties relative to risk assessment methodology. What this short discussion does tell us is that we need to learn much more about this process. And because an evaluation of residual risk under this bill will not occur for 5 to 10 years, we do have the time to take positive steps forward.

Consequently, I and others, put forward a proposal during negotiations on toxics calling for a National Academy of Sciences comprehensive review of current risk assessment methodology used by EPA and alternative approaches and the preparation of a report with recommendations on how the process can be improved. As a result of these recommendations, EPA would revise its "Guidelines for Carcinogenic Risk Assessment," as appropriate.

The proposal also establishes a Risk Assessment and Management Commission to review the NAS study and other relative information and provide the Congress with its legislative recommendations on how to proceed with the residual risk process.

An expedited review process for Congress' review of the Commission recommendations is incorporated in the bill. This is an extremely important provision because if the Congress does not act on the report, then by default, EPA must proceed with residual risk determinations based on a 1-in-10,000 risk to an actual—not a hypothetical—person.

I cannot stress more strongly to this body how important it is that a future Congress seriously evaluate this matter before the default kicks in. In 5 years time, our knowledge of science should be significantly advanced. The National Academy will be preparing a comprehensive study that will be examining the many uncertainties that I have raised earlier. All of this additional information must be available to the Congress so that a reasoned decision can be made on how to evaluate residual risk.

Mr. President, I ask unanimous consent that the earlier-referenced Washington Post article be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Mar. 26, 1990]

MEASURING CHEMICALS' DANGERS: TOO MUCH GUESSWORK?

(By Malcolm Gladwell)

When scientists calculate whether pesticide residues kill little children or automobile exhaust causes cancer, there comes a point when they put aside their hard data and their complex theorems and make a guess.

They know the effect of massive doses of each chemical on rats and mice. But public policy is about humans, not animals, and it must apply to chemicals often found in very small amounts. To draw any conclusions about the real world from what they have seen in the laboratory, scientists have had to speculate.

For 20 years, toxicologists have lived with this uncertainty in trying to measure the dangers posed by the chemicals we eat, drink and breathe. But when rising public concern about potentially dangerous chemicals is in conflict with rising costs of eliminating risk, society is faced with increasingly difficult choices. Many scientists are beginning to argue that the guesses made in the name of risk assessment are no longer good enough.

"Many of the leading people in the field are getting very suspicious about animal tests and what they mean," said Bruce Ames, director of the environmental health center at the University of California at Berkeley. "I think we may be being led down the wrong path."

A LINEAR ASSUMPTION

The problem arises from the fact that the risks of developing cancer from typical exposure to many toxic chemicals may be in the range of one in a million or even less. That means that for a laboratory animal experiment to have a chance of detecting a chemical's carcinogenicity at realistic doses, it would have to use millions of animals.

Because that is hardly practical, scientists do the next best thing. They feed a far smaller group of rats or mice a much higher than normal amount of the chemical. It is understood that this creates an unrealistically high incidence of cancer. Then the researchers extrapolate backward to estimate how many cancers would have been caused at a more realistic dose.

In extrapolating, both the Environmental Protection Agency and the Food and Drug Administration make what is called a linear assumption. Or example, if 50 out of 100 rats got cancer from eating a bowl of a particularly nasty chemical every day, then federal health officials assume that at half a bowl a day, half as many would get cancer, and at quarter bowl, a quarter would get sick and so on down to the point where if the rats were nibbling on the chemical only once a month, just one or two would develop tumors.

This is called a linear assumption because a graph of it, called a dose-response curve, would be as straight as a yardstick (see diagram).

Here is where the controversy begins. Although it seems logical that the risk of cancer should change in proportion to the chemical dose, that is only a guess—a guess that is now being called into question.

"When it comes right down to it, why should we expect nature to give us dose-response curves that follow any predictable mathematical formula?" said John Bailar, a toxicologist at Montreal's McGill University. "Why should they follow a straight line or some regular curve? I don't think you can make an iron law about these things."

What if, for example, a chemical is so potent that it poses a grave risk in even the smallest amounts? If low doses do about as much damage as is possible, then large doses could not make much difference. The dose-response curve in this case would be shaped like a kind of street lamp, rising very sharply in the beginning and leveling off at higher doses (See diagram, based on findings for vinyl chloride, a potent carcinogen). If policy decisions are made on the assumption of a straight-line relationship, the risk of intermediate doses would be underestimated.

It may be that a bowlful of this chemical every day, like the hypothetical nasty chemical, still kills 50 out of 100 rats. But a nibble every month, which the linear assumption guessed was killing just one or two, might actually cause cancer in 15 or 20 rats.

Or consider the opposite. What if high doses of a chemical are needed to trigger the comples chain of events that cause cancer? This is a well-known phenomenon among some carcinogens. Formaldhyde is an example (See diagram). In such cases the risk of cancer would look like a hockey stick, increasing only slightly until the critical mass of the chemical is reached and then rising sharply.

Here as well the typical extrapolations about the dangers of low doses might be wrong. A bowl of this chemical, like the hypothetical nasty chemical, might still kill 50 out of 100 rats. But a quarter dose might not even come close to killing a quarter of the rats. If that quantity fell below the cancer threshold, it wouldn't be any more dangerous than a monthly nibble.

The differences among various dose-response curves have implications for policy-making. A chemical the government thinks is safe for human consumption might not be safe at all if its curve resembles the street lamp. Hockey stick chemicals, on the other hand, could be pronounced unacceptable risks when in fact at realistic doses they are virtually harmless.

Large sums spent to reduce exposures to a hockey-stick chemical to extreme lows might buy very little added safety. The money might be better spent redoubling efforts to protect society against street-lamp chemicals.

A "DEFAULT POSITION"

How might chemicals deviate from the yardstick model? Vinyl chloride, a street lamp chemical, is dangerous because the body processes it into another substance that causes potentially cancerous mutations. But the body can only metabolize a limited amount of vinyl chloride at one time. While cancer risks from the chemical rise steeply at lower doses, they level off as the body can no longer process any more of it.

At the same time, recent research into how cancer begins lends some credence to the idea that some chemicals may have a hockey stick shaped-Curve. For example, the greatest risk of cancer from chemical toxins appears to be when cells are dividing rapidly, replacing cells killed by the toxins.

But low levels of a chemical might not cause enough cell damage to kill cells and cause rapid cell proliferation. In many cases, wholesale cell killing—with its accompanying increased risks of cancer—occurs only when a toxin reaches a critical level in the body.

The problem, however, is that scientists understand very few chemicals well enough to know which model they fit, if any.

"Our position is that linear dose extrapolations are the only ones we can justify as a general principle," said David Gaylor, director of the biometry staff of the National Toxicology Program. "It's a default position unless there is convincing evidence to the contrary, which there rarely is. It would be very risky to assume hockey sticks as a rule."

"In most cases the [government's] procedure probably overestimates cancer risks,"

said John Graham, a professor at Harvard University's School of Public Health. "In some cases they are probably underestimating it, and sometimes they might be right on the mark. But what we have to keep in mind is that no one really knows the right answer."

Mr. MOYNIHAN. Mr. President, I thank the distinguished Senator from New Mexico for his comments on risk assessment—and for his support for a National Academy of Sciences analysis of this most important issue.

Throughout the hearings on the clean air bill, the Environment and Public Works Committee listened to the controversies and uncertainties in health risk assessment. But such risk assessment is elemental in all that we seek to do—to protect the health of our citizens. To do so, we must have the facts. We must bring the best science possible to the task. For that reason, during the committee markup, I discussed with committee members the idea of having the National Academy of Sciences conduct a review of risk assessment methodologies and to have NAS recommend to EPA how best to improve such assessments. The final compromise contains a NAS study, and again, I thank the Senator from New Mexico for his efforts and contributions in this regard.

This clean air bill imposes great responsibilities upon EPA. Be it air toxics, ozone nonattainment, acid deposition, or stratospheric ozone depletion, these problem areas involve complex scientific and technical issues. Indeed. Some of which EPA has not really learned how to do. But we must. The problems are complex, and environmental data are still highly variable. But we must not be overwhelmed by complexity—and we must commit to a persistent effort—long-term measurement and analysis—to overcome the uncertainties.

Finally, let me say, Mr. President, that despite the complexity of the scientific issues, EPA must always conduct its business openly. The data, the analytical methods, and the conclusions must all be available for public scrutiny and for scientific peer review. As Dr. Milton Russell, chairman of the NAPAP Oversight Review Board, recently reminded the scientists gathered at the NAPAP International Review in Hilton Head, "informing the public is a duty that the public is owed, not a boon that a scientist can grant." It is a duty which EPA, even as it becomes a Cabinet-level Department, ought to make a fundamental principal of its efforts.

GRAND CANYON VISIBILITY

Mr. DOMENICI. Mr. President, my colleagues from Arizona and I are here today because of a mutual concern—visibility degradation in our national parks. The citizens of New Mexico, like the citizens of Arizona and indeed all Americans, are very concerned about air quality in our national parks and other areas designated as class I under the Clean Air Act.

When the Clean Air Act Amendments were passed in 1977, Congress established a program to address the visibility issue. I have been concerned that the program has not been implemented as Congress intended and hoped. My colleagues from Arizona and I have discussed this issue in detail, especially as it relates to the Grand Canyon. We have discussed the deterioration of visibility in the Grand Canyon and the need for the Park Service and EPA to continue to aggressively investigate the cause of visibility impairment, particularly by continuing the review and analysis of the impact of two large, uncontrolled powerplants that are within 75 miles of the park—the Navajo and Mohave powerplants. Because of these concerns, we want to take a moment before the Senate completes action on the clean air bill to raise this issue with Senators, particularly the chairman and ranking member of the Environment Committee.

Mr. DECONCINI. My distinguished colleague from New Mexico is absolutely correct. Senator MCCAIN and I have discussed with Senator DOMENICI the current efforts to address the visibility in class I areas, with a special interest in the Grand Canyon. As the Senate knows, the National Park Service and EPA have started to work on this issue. These agencies have determined that visibility in the Grand Canyon is being impaired by sources outside the boundaries of the National Park. Specifically, the Park Service and EPA have identified the Navajo Generating Station in Page, AZ as a significant contributor to wintertime visibility impairment. Accordingly, the EPA has filed a notice of proposed rulemaking to require a significant reduction of sulfur dioxide emissions from this powerplant.

Mr. MCCAIN. My friend the senior Senator from Arizona has described the situation accurately. The EPA's regulatory action is particularly significant because this case is one of the first tests of the plume blight provisions contained in the Clean Air Act. Visibility protection, as Senators know, is broken into two phases. Phase 1 is plume blight, and the other of course, is regional haze. The Senator from New Mexico raises an excellent point about the vital need to implement these important programs. The EPA's efforts with respect to Navajo breaks new ground and is promising to all of us who have been concerned about the lack of action on the visibility program.

While scientific study and review of the data pertaining to Navajo continues, we have every expectation that the administrative process will proceed in a timely and proper fashion. This bodes well for the Grand Canyon. But, just as importantly, this action establishes the workability of the visibility program—an important precedent which can be applied to benefit national parks and class I regions throughout the country. We continue to monitor this process closely, as we must do everything we can to protect the canyon and our other national treasures.

Mr. DOMENICI. I am sure the perspective of my colleagues from Arizona relating to the issues associated with the visibility at the Grand Canyon is helpful to Senators. I know we share a common commitment to protecting our national parks. Perhaps the Senator from Arizona could share with the Senate the timeframe within which regulatory actions are expected to take place. He knows of my concern that the final disposition of this matter occur as soon as possible.

Mr. DECONCINI. As I stated previously, the EPA filed a notice of proposed rulemaking on February 9, requiring the Navajo Generating Station to reduce sulfur dioxide emissions. The Office of Management and Budget is currently reviewing this draft proposal. Concurrently, as Senator MCCAIN alluded to, the National Academy of Sciences in association with the Department of the Interior, EPA, and the Department of Energy has empaneled the Committee on Haze in National Parks and Wilderness Areas. The committee was established, in part, to review Park Service data with respect to visibility impairment at the Grand Canyon. In fact, the panel is meeting this week at the canyon. In addition, the Salt River Project, in cooperation with the Park Service and EPA is conducting a comprehensive scientific analysis concerning visibility. This study is scheduled to be completed in October 1990. Finally, I would note that there is a court order governing the pace of the regulatory activity to assure a timely resolution of the issues.

Mr. MCCAIN. The Senator has expressed it well. That is why we are confident that the administrative process involving Navajo is on track. I would also say that advancing the regulatory process and the science in this field will help us understand and address Grand Canyon visibility impairment on a comprehensive basis. I have in mind, specifically the Mohave Generating Station in southwest Nevada. Mohave is located within 60 miles and downwind from Grand Canyon National Park. Because of its proximity to the park, we have an obligation to determine what contribution that particular might be making to visibility impairment. Last September, I wrote the Administrator of the Environmental Protection Agency, William Reilly,

asking him to assess Mohave's contribution. The agency responded that it did not have the financial resources required to conduct the necessary analysis—a point I will address in greater detail in a moment.

As I wrote the Administrator:

Only by comprehensively addressing the problem to include all contributors, can we hope to achieve our air quality goals at the Grand Canyon and meet the legal mandates of the Clean Air Act.

In fact, last week the Senate adopted an amendment which the three of us supported, which will move us in that direction. I would like to commend the Senator from New Mexico for his significant contribution to that amendment. The visibility amendment authorizes additional funds for the implementation of the visibility program—a critical step to effectively tackle the issue of regional haze. I should say that in light of the EPA's response to my letter regarding the Mohave plant, I, along with Senator DECONCINI and Senator DOMENICI, will work to obtain funding authorized by the Senate visibility amendment to study this source so that if it is contributing to Grand Canyon visibility impairment, appropriate regulatory action can be taken.

The amendment will further lead to visibility improvement at Grand Canyon National Park by creating a Grand Canyon Visibility Transport Commission. This commission will provide a coordinated means of identifying and addressing all sources of visibility degradation. The Commission should be especially helpful in addressing pollution sources outside of the immediate vicinity of the canyon, particularly the impact we suffer from pollutants emanating from the Los Angeles Basin.

Mr. DOMENICI. I thank the two distinguished Senators from Arizona. It is my hope that the visibility amendment this body passed several weeks ago will do just that. Many of us spent significant time crafting an amendment that will provide the necessary resources to address the problems involved in assessing visibility impairment and attributing the problems to specific sources and source regions. I am very encouraged that the Administrative process appears to be on track. My friends from Arizona and I would like to put the Senate on notice that we intend to be vigilant in ensuring continued progress. Where a source of visibility impairment has been identified and regulatory action is warranted, we must be prepared to act decisively to prevent undue delay or obstruction. If the administrative process breaks down, which we hope it will not, I would want to work with my colleagues to legislatively remedy such a situation.

Mr. DECONCINI. That's an important point. I am sure that I speak for my colleague, Senator MCCAIN, in saying that the Senator from New Mexico expresses our sentiments exactly. I would like to conclude by saying that Congress must accept responsibility for making sure that the laws we enact are implemented to the fullest extent possible. By doing this, we will protect the Canyon and the other parks in the west.

Mr. MCCAIN. I agree wholeheartedly treasure of importance to us all, and I would hope that the entire Congress would echo and support our sentiments.

NATIONAL UTILITY REFERENCE FILE DATA

Mr. DOMENICI. Mr. President, as we move toward closure on clean air legislation, I wanted to address one specific issue pertaining to allowances for New Mexico. In calculating allowances during the Senate's consideration, EPA has relied on the 1985 numbers generated under the Acid Precipitation Assessment Program, commonly referred to as "NURF" data. We have relied on this data in making our decisions on how to proceed on this legislation. Let me discuss this in terms of a specific powerplant in New Mexico—the Escalante Generating Plant operated by Plains Electric.

This plant is a one-unit facility that began operation 1985. It is superclean—scrubbing clean New Mexico coal by 90 percent. Its emissions limit is 0.2, and the plant often operates well below that limit.

Under the acid rain section of this bill, allowances for existing units are based on the average of 1975-87 emissions, as recorded by the Department of Energy in Form 767. If such forms were not filed, then the baseline is established using 1985 National Acid Precipitation Assessment Program Emissions Inventory, version 2, National Utility Reference file (commonly referred to as the NURF data).

In 1985, Plains Electric filed a Form 767 for financing purposes only. In other words, they were not filing this form in the usual manner.

Consequently, it would be inappropriate to establish this plant's baseline using the figures that were filed for 3 years on Form 767. Instead, I assume that in the calculating the allowances for Escalante, EPA will use as its baseline, NURF data. What that means is that the NURF data of 2,353 tons for Escalante, with the 120 percent formula will provide this plant with 2,823 tons of allowances.

I would like to clarify this point with the manager. Is this because his understanding.

Mr. BAUCUS. I am pleased to respond to the Senator from New Mexico. My staff has reviewed this situation and the Senator is correct.

It is appropriate to base allowances for Escalante on NURF data, and by doing so, Escalante will receive an allowance of 2,823 tons per year.

I am happy to clarify the situation of the one plant and thank the Senator for bringing it to the Senate's attention.

STUDY OF SAFER TIRE RECYCLING

Mr. PELL. Mr. President, I am pleased to report that the Clean Air Act, as amended, includes a measure which I proposed to address the need for more information on tire recycling and alternatives to tire incineration.

I wrote this measure to direct the Environmental Protection Agency to conduct and transmit to Congress, within 1 year of enactment, a study of the emissions of hazardous air pollutants from motor vehicle tire incineration facilities.

It also directs EPA's Administrator to include in that study a report on the feasibility of substituting appropriate tire recycling procedures for current and projected tire incineration facilities.

I share the concern of many Rhode Island residents that a proposed tire recycling facility in a neighboring State may pose a significant threat to our health, our environment and our principle source of drinking water.

Our situation is far from unique and, I believe, the nation needs a detailed and impartial analysis of the risks posed by tire incineration facilities and the benefits of alternative recycling procedures.

The same tires that carry us for tens of thousands of miles, unfortunately do not disappear after their useful life has apparently ended.

Tire dumps pose an environmental risk—they are not only an eyesore and a health hazard, they may catch fire, burn for days and release toxic plumes of smoke and oil.

We must find and foster alternatives, including recycling options, because incineration—even under controlled conditions—is just too threatening to those who live downwind.

I appreciate the consideration and prompt favorable action given to my measure by the senior Senator from Montana [Mr. BAUCUS] and by the junior Senator from Rhode Island [Mr. CHAFEE].

Mr. LIEBERMAN. Mr. President, soon we will cast a vote on final passage of the Clean Air Act. I have lived with this issue so long that I will probably have dreams about it once its gone from our agenda.

But as long as I have been dealing with the Clean Air Act in this session. I am aware that there are others in this Chamber who have been associated with it for a much longer time. Senator MITCHELL, our distinguished majority leader, deserves great credit for his history of concern about clean air, and for his leadership in pulling together the majority that will vote in

favor of this legislation tonight. Without Senator MITCHELL's patience, diligence, dedication to the cause of environmental protection, we would not today be on the verge of passing what is the most significant environmental legislation of the past 20 years.

I also wish to express my admiration and respect for the role played by Senators BAUCUS and CHAFEE in fashioning this bill. With enormous perserverance and good humor, Senator BAUCUS carried this bill through long hearings, markups and negotiations. His willingness to work with and accommodate his colleagues, while at the same time maintaining his commitment to the bill's goals, have been critical to the success of the process.

Senator CHAFEE has been crucial in conveying the enormously complex technical issues in this bill to his colleagues and to the American public, and he played a vital role in building the kind of bipartisan support that is so necessary to passage of the legislation.

It is, for me, the most important vote I have had the opportunity to cast since I arrived in this body last year. I was proud to play a role in helping to shape the bill, through my work on the Environment and Public Works Committee. And I thank the majority leader for giving me the opportunity to participate in the negotiations with the administration over the legislation. It was very difficult for me to decide to support several strengthening amendments to the compromise as it emerged from those negotiations; in Connecticut however, I believed I owed it to my constitutents to go the extra step to try improve the quality of our air which is among the most polluted in America.

That effort was not successful, but I, nonetheless believe this legislation represents a giant step forward in protecting our environment and our health. It will make substantial reductions in the pollution that causes acid, rain, smog, ozone depletion, global warming, and toxic emissions. It will combat the kinds of health problems associated with dirty air, including heart disease, emphysema, cancer, and other diseases that kill and injure Americans every year. It will help us reduce the cost of health care associated with pollution-related disease.

There will be some added costs for Americans associated with this legislation. Some say it will cost us $21 billion a year. I believe that is an inflated figure, but even if it is not, consider this: Americans spend about $21 billion a year on soft drinks. I believe the American people are prepared to spend as much for cleaner air each year as they spend to buy a Coke or a Pepsi.

In fact, I believe that, when it comes to protection of the environment, the American people are ahead of the politicians, press, and pundits. They know that pollution not only harms the world around them, but it harms them and their families. They want strong action, and they're willing to pay for it.

The American people will welcome the Clean Air Act. It is an historic moment for this body, and for the country. I am proud to vote for the Clean Air Act; it will mean cleaner and healthier air for us all.

Mr. LEVIN. Mr. President, I am pleased to support S. 1630, the Clean Air Act Amendments of 1990, as modified by the Mitchell-Dole substitute. I am proud to be an original cosponsor of the Mitchell-Dole substitute, and I plan to cast my vote in favor of the amended bill.

This is an historic measure, one which will enable us to make dramatic progress in addressing the pervasive problem of air pollution.

If enacted, this bill would, for the first time, set specific benchmarks for progress toward clean air in our dirtiest cities. It would establish tough new standards limiting emissions from motor vehicles. It would require the use of clean fuels to further reduce emissions where such reductions are needed the most.

The bill would limit emissions of toxic air pollutants for the first time, requiring the use of maximum achievable control technologies to reduce emissions from each source of such pollutants. If these technologies are not adequate to reduce health risks to an acceptable level, further reductions would be required.

The bill would mandate the reduction of sulfur dioxide emissions by 10 million tons a year below 1980 levels. It establishes a cap on annual sulfur dioxide emissions, beginning in the year 2000. It would establish tight new performance standards for emissions of nitrous oxides from utilities, beginning no later than 1993.

Mr. President, these are dramatic changes to existing law. Some of these steps will be costly, but we cannot expect to fight air pollution without some sacrifice. I believe that this is an equitable bill that fairly spreads the burden of reducing emissions across all segments of our society that contribute to air pollution.

As others have stated, this bill is the product of lengthy and difficult negotiations conducted in the majority leader's office. These discussions were fair and balanced, and I commend the members of the Committee on Environment and Public Works and the representatives of the administration for the patience with which they heard out, and attempted to address, the concerns of Senators.

I particularly wish to thank the majority leader, Senator MITCHELL, and the chairman and ranking minority member of the Subcommittee on Environmental Protection, Senators BAUCUS and CHAFEE, who worked together to achieve a balanced compromise approach. I think we all recognize that this bill could never have reached this stage without the dedication, strength, and persistence of our majority leader.

Mr. President, nobody will get everything that they wanted out of this bill. I know, for example, that the automobile industry feels that the emissions requirements placed on both conventional and alternative fuel vehicles are very stringent, will be very expensive to implement, and indeed, may not even be technologically feasible to meet.

Under this bill, the automobile industry would be required to:

Reduce tailpipe emissions by 30 percent in 1993 and by an additional 50 percent in 2004;

Double the useful life of emissions equipment from 50,000 miles to 100,000 miles;

Comply with strict inspection, maintenance, and recall requirements;

Develop and install on-board computers to identify malfunctions and deteriorations in emissions equipment;

Install on-board cannisters to recapture evaporative emissions during refueling;

Meet strict new cold temperature emissions standards starting in 1993, and standards that are twice as strict beginning in 2000;

Reduce emissions still further through an alternative fuels program in the country's dirtiest cities, beginning in 1995; and

Meet even tighter emissions standards with vehicles sold to the Federal Government and to private fleet owners.

I share some of the automobile industry's concerns about these provisions. I do not believe that we should be enacting into law standards that cannot be met. I have stated in the past my own belief that the so-called second round of auto emissions controls—which are included in the bill—will yield minimal emissions reductions at a very high cost.

At the same time, however, I am aware that this same bill has been criticized by some environmental organizations for watering down the original committee approach too much.

I do not agree.

This bill is balanced. The mobile sources provisions, for example, don't resolve all of the auto industry's concerns with the bill—far from it—but they do address some of the industry's major concerns. These provisions don't do everything the environmentalists would like, but they do contain tight, technology-forcing standards that will give us substantially cleaner air.

Mr. President, I am pleased to support this bill. I am proud of what we

have achieved, and I sincerely hope that we will be able to move forward and enact this bill into law.

Mr. President, I participated extensively in the negotiations on mobile sources. I would like to briefly describe the agreement that we reached on this title of the bill.

To a large extent, the mobile sources agreement reflects a compromise proposal that Senator MITCHELL and I put forward to resolve disputes on title II of the bill. The final agreement, like the original Mitchell-Levin proposal, addresses tier II tailpipe standards, alternative fuels, carbon dioxide emissions, tier I tailpipe standards, and ultraclean vehicles.

First. With regard to tier II tailpipe emissions requirements, the amendment would retain the so-called tier II automobile tailpipe standards in the bill, while requiring the EPA to study the cost effectiveness of a broad range of other emissions reduction strategies, including both mobile and stationary sources. If the EPA determined that another plan would achieve the same reductions as tier II standards and would be more cost effective, the alternative plan would be submitted to Congress for consideration under expedited procedures.

This is the same approach included in the original Mitchell-Levin proposal. In addition, the amendment includes a so-called trigger mechanism, under which the tier II standards would go into effect only if they are needed to achieve clean air.

On this issue, Mr. President, our colleagues on the Environment Committee feel that the tier II emissions standards in the bill are a technologically feasible and economically feasible means of achieving necessary reductions in hydrocarbon, carbon monoxide, and nitrogen oxide emissions. I happen to disagree, and I believe that the administration shares my skepticism.

At the same time, I am pleased that we have been able to overcome our differences and reach a mutually acceptable agreement on this issue.

Under this approach, we are assured that we will get the emissions reductions sought by the committee if they are needed. On the other hand, those who share my belief that the specific approach selected by the committee is not the most cost-effective means of achieving these reductions will have an opportunity to prove their case to EPA and the Congress. I believe that this is a fair and balanced compromise.

Second. With regard to alternative fuels, the original Mitchell-Levin proposal provided simply and directly that there would be no mandated production or sales of alternative fuel vehicles. The specifics of an alternative fuels program which would meet these criteria were left up to further negotiations.

The administration, which has strongly advocated a clean alternative fuels program, accepted our premise that there would be no front-door or back-door mandated production or sales of alternative fuel vehicles and worked with us to craft a mutually acceptable program.

This program has three basic elements: (a) a program for the use of clean alternative fuel vehicles by Federal agencies and in private fleets; (b) general requirements for emissions reductions through the use of clean fuels in severe and extreme nonattainment area; and (c) "opt-in" and "opt-up" provisions allowing the expansion of these programs in certain circumstances.

In addition, the amendment makes it clear that California—which has already proposed its own clean alternative fuels program—is free to go its own way and establish its own standards and requirements.

Each of the three elements of the clean fuels program has been carefully designed to avoid the mandated production and sales that we all agreed to avoid.

a. The fleets program, which was crafted largely by Senator BREAUX, requires the purchase of low-emission vehicles by Federal agencies and operators of private, centrally fueled and centrally maintained fleets. This approach will create a substantial demand for such cars, giving motor vehicle manufacturers a real incentive to bring them into production. However, the provision does not contain any production or sales mandate, direct or indirect.

b. The general program contains phase I and phase II standards, each of which would require substantial reductions in mobile source emissions in the Nation's most polluted areas. EPA is required to provide at least one option for achieving these pollution reductions through the use of reformulated gasoline—thereby avoiding the problem of a back door mandate of vehicle production or sales.

Under phase I of the general program EPA is required to specify a reformulated gasoline which will achieve the required reductions without any change to the vehicle. An auto manufacturer who opts to meet the phase I requirement through the use of reformulated gasoline is required only to produce vehicles that meet the other standards in the bill.

Under phase II of the general program EPA is required to specify a reformulated gasoline which will achieve the required reductions without any change to the vehicle, unless the Administrator determines that it is not technologically and economically feasible to meet the standard through changes to the fuel alone.

If the Administrator makes this determination, EPA is required to specify a reformulated gasoline that gets as close as possible to achieving the standard, and auto manufacturers are required to make minor technical modifications to optimize emissions when the vehicle is operated on reformulated gasoline. If the standard still cannot be achieved, the Administrator must set an interim performance standard at a level that can be achieved.

In the absence of this waiver provision, phase II would be a back door production mandate, because the only way to meet the standard would be by producing and selling a certain percentage of methanol—or other clean fuel cars—whether there was a buyer available or not.

c. There are several different opt-in and opt-up provisions in the bill, but all operate on the same premise—that there will be no front door or back door mandated production or sales of alternative fuel vehicles. Each of these opt-in and opt-up provisions is subject to a finding by the Administrator that it is feasible to produce and deliver the vehicles and fuels sought in the timeframe established by the State.

First, a State may choose to increase the percentage of clean vehicles that private fleetowners are required to purchase. Like the basic fleet requirement, this is a purchase requirement, not a mandated production or sales requirement.

Second, a State may require that all cars sold in the State meet the emissions requirements set under either the California program or the fleets program. This provision is not a production or sales mandate because only cars that are already in production may be required for sale under this program. This is the reason for singling out cars meeting the standards already established under the California program and the fleets program.

Finally, a State may seek to ensure that a portion of the cars sold in the State meet the same standards as cars already being sold under the California or fleets programs. Again, nothing in this section is intended to require the production of cars that are not already being sold under the California program or the fleets program.

If a State chooses this final opt-up approach, it must provide purchase incentives to ensure that the cars will actually be bought. The program doesn't go forward unless the Administrator determines that the demand incentives in the State plan are sufficient to ensure the level of purchases sought by the State and that it is feasible to produce and distribute the vehicles and fuels sought in the time frame provided.

The requirement placed on manufacturers under this approach is to begin the production and distribution of vehicles in accordance with normal busi-

ness practices and to make reasonable efforts to promote and sell the vehicles at a price comparable to the price at which the vehicles are sold in other areas. The amendment makes it clear that no specific level of production or sales may be mandated, and that if sales fall short of State objectives—and manufacturers have met their obligations—the remedy is to revise the plan to include additional purchase incentive or reduce the State targets.

Third. The amendment offered by Senators MITCHELL and DOLE, like the original Mitchell-Levin proposal, also deleted the automobile carbon dioxide emissions standards from the bill. On this point, I believe that global warming is an important issue that should be addressed by the Congress. However, this important issue deserves a balanced approach, in the context of a comprehensive bill, instead of an amendment which imposes arbitrary and burdensome standards on a single industry.

Fourth. The compromise amendment would modify the tier I tailpipe standards in the bill to correspond somewhat more closely to the standards already adopted in California. These changes give automobile manufacturers a 3-year phase-in period and a small allowance for deterioration of emissions equipment between 50,000 and 100,000 miles in use. Even with these modifications, however, the tier I standards in the bill remain tougher than either the existing California standards or the current House proposal—the so-called Waxman-Dingell compromise.

Fifth. Finally, the compromise amendment would add a new provision to the bill, requiring the EPA to report to Congress on the feasibility and cost effectiveness of using ultraclean vehicles to reduce pollution and to develop a plan to foster joint private-public development of ultraclean vehicle technology.

New vehicle technologies are on the horizon now that could reduce emissions levels far below current levels. I am pleased that my colleague from Vermont, Senator JEFFORDS, joined me in pressing for this study in the course of our negotiations on this title of the bill.

One of my major concerns with S. 1630, as it was reported by the committee, was that it would squander financial and engineering resources on short term, incremental changes in existing cars, making technological breakthroughs in clean vehicle technology unlikely.

I am particularly pleased that the Mitchell-Dole amendment will not only reduce the burden on available financial and engineering resources, but will also direct the Administrator of the Environmental Protection Agency, in coordination with other appropriate Federal agencies, to develop a plan to foster joint private-public development of utlraclean vehicle technologies.

Such a joint private-public effort should once again push our country to the forefront of automotive technology, and yield real, significant improvements in air quality in the next century.

My thanks to Senators MITCHELL, BAUCUS, CHAFEE, and their staffs, and my particular thanks to Peter Levine of my staff. Peter Levine made a unique and extraordinary contribution to this bill. His tenacity and intellect made a major, positive difference for my State and the Nation.

Mr. COATS. Mr. President, I would like to make a short statement in favor of the McClure amendment, which was tabled earlier today by a vote of 64 to 33.

I support all four major elements of the McClure amendment. I have been a strong proponent of clean coal technologies from my first days in Congress, and I continue to believe that clean coal technologies are the most cost effective, environmentally sound compliance strategy for not only complying with the bill before us today, but as an abundant, readily accessible and inexpensive resource for post-2000 energy supply.

About 70 percent of the coal reserves in the United States come from so-called high-sulfur coal, or coal which emits more than 1.2 pounds per million Btu. It makes little sense, in my opinion, to pass a law which makes it national policy never to utilize these coal reserves.

Now the legislation before us today, the Mitchell-Dole substitute amendment to S. 1630, the Clean Air Act Amendments, does include some clean coal technology incentives. The substitute amendment allows a 4-year extension, to the end of 2003, for technologies which are categorized as repowering. However, I believe that many other technologies hold as much, if not more, promise as repowering technologies. It makes sense, then, to pass a law which is flexible enough to allow their development.

For this reason, I support provisions in the McClure amendment which would extend the phase II compliance deadline until December 31, 2005, for eligible technologies. I believe this extension will provide additional incentives for the use of clean coal technologies. Furthermore, because of the provision in the amendment requiring any allowances issued after 2002 to be paid back, extension of the deadline for clean coal technologies will result in no net loss to the environment. In fact, I believe that the use of clean coal technologies, many of which produce over 95 percent emissions reduction, are beneficial to the environment.

I also believe it is important to allow EPA, in consultation with the Department of Energy, to expand the list of technologies eligible for the clean coal incentives provided in the bill. In Indiana we have a clean coal technology demonstration project which I believe holds a great deal of promise for the future use of high-sulfur coal in a cost-effective manner. But under the provisions of the substitute amendment to S. 1630, other companies choosing to take advantage of this technology would not be eligible for the clean coal incentives.

I believe it makes little sense to spend billions of dollars to sponsor innovative clean coal technology demonstration projects if we are going to exempt the technologies developed from the incentive provisions of the bill.

Another provision of the amendment which I believe is important, and which I strongly support, is language exempting units which use clean coal technology from the application of the WEPCo decision, which would require compliance with new source performance standards for utility units which have been retrofit with new technology.

Under the provisions of the bill, sulfur dioxide emissions will be reduced by nearly half by the year 2000. There is no reason to penalize utilities which are trying to comply with these stringent requirements in the most cost-effective manner possible. This same reasoning applies to NO_x emissions, which are reduced by 2 million tons by the year 2000 in S. 1630. Language specifically exempting units from the WEPCo decision is essential to Midwestern utilities which will already be heavily impacted under the bill.

Finally, I support language in the amendment which would expand the definition of "repowering" clean coal technologies to include those existing affected units which are being replaced by an entirely new unit located at a different site. In other words, under this provision, an older, dirtier powerplant would continue to receive allowances as though it was being repowered with a clean coal technology. In reality, a new unit would be built, utilizing an approved technology.

While this provision would result in excess generation of emissions in the short term, the amendment contains a "payback" provision, which would require the utility to make up for emissions generated over what allowances would normally have been issued in compliance with the bill.

In effect, by encouraging the building of newer, cleaner powerplants, this provision would be a great boon to the environment, and in the long term would result in far fewer emissions,

not just of sulfur dioxide, but of all other pollutants currently emitted by older power plants.

In conclusion, I believe it is in the interest of the environment, the economy and the consumer to encourage the use of clean coal technologies to comply with Clean Air Act requirements for sulfur dioxide emissions. I am disappointed that the amendment was tabled.

Mr. BREAUX. Mr. President, today is a day for which many of us have worked long and hard. Today is the day on which the U.S. Senate will pass the first reauthorization and strengthening of the Clean Air Act since 1977. Many of our colleagues have worked tirelessly in pursuit of this important goal, but none more than the distinguished majority leader, Senator MITCHELL. His efforts, combined with the tenacity and leadership of the distinguished managers of the bill, the Senators from Montana and Rhode Island, have been instrumental in bringing us to this important day.

Much has been said of the bill we are soon to pass. Critics are never in short supply. Yet, you need not subscribe to and endorse each and every feature of this bill to recognize that it is among the most important legislation that has been considered by the 101st Congress. The scope of this legislation is extraordinary, and the results of its passage will likely be felt for decades. I am proud to have played a role in its development and in crafting the difficult compromises necessary to ensure its passage by the Senate.

I would like to take a few minutes to touch upon several topics that I think are particularly deserving of comment. Title III of S. 1630 includes a wholesale rewrite of section 112 of the Clean Air Act, which deals with the regulation of hazardous air pollutants. The existing section 112 has been a disappointing failure that has resulted in the regulation of only a handful of toxic air pollutants over the past two decades. The revision of section 112 contained in the bill, on which I have worked closely with the distinguished Senator from Minnesota, Senator DURENBERGER, and other members of the Environment and Public Works Committee, will ensure that rapid progress is made in dramatically reducing carcinogenic and other toxic air emissions through the application of stringent control technologies. Rather than continuing to allow the current situation of endless debates over the health effects of exposure to particular pollutants before controls go into place, this legislation will ensure technology controls are applied to control these pollutants. In the limited circumstances in which even these control measures are insufficient, further controls can be applied or sources can be compelled to close their doors.

A significant feature of the air toxics title is the risk-based test for carcinogenic emissions that is to be applied after control technologies are in place. The new section 112(f) directs the Administrator of EPA to promulgate two simultaneously applicable emissions standards for categories or subcategories of emissions sources. One standard must be sufficient to eliminate lifetime risks of carcinogenic effects to the most exposed individual, MEI greater than 1 in 10,000; the second standard must eliminate such risks greater than 1 in 1 million. Assuming that Congress does not further modify the residual risk portion of section 112 in response to the recommendations of the Risk Assessment and Management Commission established under section 112(w), these would be the presumptive standards with which sources must comply after the application of the initial round of control technology.

However, a source can be granted an alternative emissions limitation under section 112(i) upon a demonstration by the owner or operator of the facility, to the satisfaction of the U.S. Environmental Protection Agency or the State, that this alternative emissions limitation provides the most exposed actual person living within the vicinity of the source will not experience an individual lifetime risk of cancer exceeding one in ten thousand. This alternative emissions limitation should be no less stringent than the technology standards issued under section 112(d), and does not exempt a source from having to apply all available technology and operational controls to reduce risks unless a source can prove, again to the satisfaction of the U.S. Environmental Protection Agency or the State, that the cancer risks to the most exposed actual person do not exceed one in one million.

The alternative emissions limitation option under section 112(j) will be based on site-specific health assessments that are performed according to methodology specified by EPA regulations. There will be no opportunities for local public hearings and the public will also have a formal opportunity to comment on the site-specific health assessments.

The alternative emissions limitation option allows use of information about the actual risks to an actual person living in the vicinity of a facility. A facility owner or operator deserves the right to know how effective their substantial investment in control technology is in reducing risks as the public has the right to demand protection of their health with an ample margin of safety.

Let me now direct my remarks to alternative fuels, an important new program. The most important aspect of this program, as contained in section 212(1), is the ultra-clean alternative fuel fleet vehicle requirements. This program provides a market-driven, incentive-based way of introducing alternative fuel vehicle technology and low emission fuels into the general marketplace. By focusing on passenger cars and light-duty vehicles it targets the vehicles most amenable to new technologies.

The program begins by requiring the Federal Government fleet to begin using clean fuel vehicles and alternative fuels in the serious, severe and extreme ozone nonattainment areas. The program begins with model year 1995 vehicles, requiring 30 percent of new vehicles purchased or placed into service in those nonattainment areas to meet a performance standard of 0.25 grams per mile of total in-use emissions of ozone-forming volatile organic compounds and a 75-percent reduction of air toxic emissions, as measured from a conventional-fueled, current technology vehicle. The percentages of new vehicles meeting the performance standard increases to 60 percent in model year 1997 and 90 percent in model year 1999 and after. If EPA determines the 90-percent requirement would impose unreasonable costs to the Federal Government, then a lesser percentage could be specified but in no event less than 60 percent.

There are two advantages in using the Federal fleet to help pave the way for new vehicle technologies and new alternative fuels. The first advantage is the Federal fleet is comprised of a fairly limited mix of vehicle model types. Automobile manufacturers will be able to respond more easily in the early years of this program if there is a more limited spectrum of fleet vehicle models upon which they can focus their engineering efforts. The second advantage is that the Federal Government will help ensure alternative fuels are available in the general marketplace through establishing fueling facilities in the 40 serious, severe and extreme ozone nonattainment areas.

The private fleet program begins with model year 1997 vehicles. The private fleet program requirement is limited to the nine cities with the worst ozone nonattainment problems, those with ozone design values at or above 0.18 parts per million, or those cities who demonstrate the need for the air quality benefits to be derived from an alternative fuel fleet program. It makes sense to focus the substantial investments in new alternative fueling infrastructure, such as natural gas compressor stations, and the introduction of vehicles capable of operating on alternative fuels in those areas with the worst air quality problems.

The private fleet program provides the covered fleet operator with the option, at the operator's sole discretion, to purchase clean alternative fuel vehicles from the motor vehicle manu-

facturer, the original manufacturer of the vehicles, as is the case today, or to purchase clean alternative fuel vehicles which have been converted from gasoline or diesel.

The private fleet provision provides an exemption to the fleet operator if a suitable clean alternative fuel vehicle is not available from a motor vehicle manufacturer. The Administrator of EPA is directed to promulgate regulations which will in turn be used by the Governor of a State, containing an area where this program applies, to determine whether a suitable vehicle is available and whether an exemption shall be granted to a covered fleet operator. The underlying reason for the exemption is the expectation that motor vehicle manufacturers will be able to provide the majority, but not every single variety, of vehicles utilized by fleets. Thus, when the occasion arises that a particular vehicle type is not available, a fleet operator can seek an exemption.

The fleet operator has the option of using a converted vehicle in lieu of a vehicle produced by a motor vehicle manufacturer, but is not mandated to do so. As specified in section 212(a)(1)(F)(ii), as amended in section 206 of the substitute, a covered fleet operator is not required to utilize vehicle conversions to achieve compliance.

The amendment does direct the Administrator to promulgate regulations for the conversion of gasoline or diesel-powered vehicles. These regulations will require that vehicle converters meet stringent requirements for certification, warranty, recall, and other requirements, as specified in the substitute. This provision is intended to be an air quality protection measure, and should not be construed as requiring a fleet operator to utilize a converted vehicle if a clean alternative fuel vehicle is not available from the original manufacturer of the vehicle.

The private fleet program is limited to fleet operators who, as of January 1, 1990, own or lease 20 or more fleet vehicles which are centrally fueled and maintained. It makes sense to focus on central fueling facilities to introduce alternative fuels into the marketplace and central maintenance facilities because of the special maintenance requirements of the alternative fuel vehicle technology and the costs associated with installing alternative fueling facilities.

For the purposes of determining whether a vehicle is covered by the amendment, the intent is that the vehicle is considered to be centrally fueled if it is fueled at a facility that the operator of the vehicle returns to on a routine basis in the normal course of doing business. It is not intended that the definition of central fueling apply to fleet operators who use public fueling facilities, such as service stations, where the locations of those fueling facilities are geographically dispersed. The intent is to cover fleet operators who have fairly routine daily routes they cover in the normal course of business.

Mr. President, the legislation now pending before us is critically important to helping achieve and maintain clean air. I will vote to pass this legislation, and I urge my colleagues to join me. It is time to move this bill forward to conference and, ultimately, to enact it into law.

I appreciate having had the opportunity to participate in drafting and shaping this landmark legislation. The technical and policy directives contained in the Clean Air Act will take us into the next millennium, and hopefully will achieve our goal of protecting public health and the environment from adverse effects associated with air pollution. I want to particularly thank the distinguished chairman of the Subcommittee on Environmental Protection, Senator BAUCUS, and the ranking member, Senator CHAFEE, in guiding our work. I sincerely thank my distinguished colleagues and their staffs for their long hours in helping to shape this bill.

CLEAN AIR AMENDMENTS ADOPTED DURING COMMITTEE CONSIDERATION

Mr. SIMPSON. Mr. President, I would take this opportunity to clarify the intent of two amendments that I offered during the Environment Committee's consideration of the clean air bill before us today. Both of these amendments were adopted on unanimous votes.

The first amendment I would like to clarify was my amendment dealing with best available control technology [BACT] under prevention of significant deterioration [PSD] provisions of the Act. The amendment added the phrase "clean fuels" to the definitions of BACT in order to add a technical change to the law that was needed to correctly repeal the percentage reduction requirement. The addition of the term "clean fuels" indicates to the EPA Administrator that he may consider the use of very clean fuels in meeting the BACT requirements.

Currently EPA reviews PSD permits on a case-by-case basis and makes BACT determinations. EPA has informed me in the Western States that the average BACT determination for fossil-fueled powerplants is 0.6 pounds of SO_2 per million Btu's or below. We know that in certain very limited instances that there is coal that could meet this requirement and we know that natural gas, and cofiring of coal and natural gas can meet this emission limit. The amendment was meant to apply to a very narrow range of circumstances where very clean coals could result in the same emission rate as the use of technology. This amendment would not result in any increase in emissions in the West or any other part of the United States. It was my sole intention to allow the use of clean fuels only where the emissions rate would approximate that which would be required under a technology requirement.

Another amendment I offered in committee deals with fugitive dust models for surface mines. This amendment was meant to direct the EPA Administrator to develop more accurate models for fugitive dust emissions from coal surface mines. Currently, EPA employs a model which was developed for a point source and it does not accurately predict real world emissions from coal surface mines which are not point sources in the classical sense. EPA must develop this model in a timely fashion and while the model is being developed, existing mines may continue to use empirical forms of modeling and monitoring to comply with the EPA regulations. Existing mines may also use State-adopted emission factors.

New mines or mine expansions which are permitted after the date of enactment must use the old model until EPA develops the new model and may continue to use State-approved emission factors. Any mine expansion or new mine that has begun the permitting process prior to the date of enactment shall be considered an existing mine under this amendment. In developing a new model, EPA must take into account the fact that mining operations move from point to point and that there may be various sources of dust within the boundaries of a mined area which may also move from time to time.

Mr. WIRTH. Mr. President, as I have traveled around my home State of Colorado during the last year or so, one of the clearest messages I have received is that people are concerned about the quality of our environment, and they are willing to make some real changes in their lives to help preserve the Earth's fragile life support system.

People want us in the Congress to pass a strong bill to strengthen the Clean Air Act of 1977. I am glad that the United States Senate will soon approve a good clean air bill and send it on to the House of Representatives.

The fact that we are reaching the point of a vote on final passage means to me that all of us in this body owe an enormous debt of gratitude to the majority leader. As a member of the House of Representatives during much of the Reagan administration, I fought many battles to just maintain the status quo—to keep the EPA funded and operating, and to defeat efforts to weaken the Clean Air Act.

Today, we are approaching a vote on final passage on legislation to strengthen the Clean Air Act. We will soon prove the skeptics wrong—and the majority leader deserves our

thanks and our appreciation for the superb job he has done, often under trying circumstances, in shepherding this bill through the Senate.

In the words of the New York Times, March 6, 1990, there can be "progress without perfection." There is much to applaud in this compromise, which the majority leader, the Senator from Montana, the Senator from Rhode Island, and many others worked so hard to put together.

But while this is a good bill, I also believe there are several places where it could have been better. I would like to highlight some of those in my statement. But I also want to emphasize the positive points that I see in this legislation.

ACID RAIN

Acid rain control is the hallmark of this legislation. For a decade or more, scientists have been telling us that sulfur dioxide and nitrogen oxide emissions from electric utilities and other sources are destroying lakes and streams hundreds of miles downwind of those pollution sources. And for nearly as long, scientists and citizens have been urging us to cut emissions by 50 percent to stop acid rain.

Opponents of acid rain controls have argued that we just didn't have enough information to assess the link between emissions and deposition. Others argued that we couldn't even be sure that acid rain is a serious threat, or that its costs didn't justify a legislative solution. But the public long ago had rendered its verdict—the people of this country think it is time to dramatically cut emissions so we can prevent the loss of more lakes and more miles of streams.

This bill will do that, Mr. President, and I want to reiterate my appreciation for the time and energy the majority leader and so many other Senators invested in making that happen.

This bill is good environmental policy for those areas that were being devastated by acid rain. It is also good news for the Western States.

Colorado, like so many other States in the Rocky Mountain region, has already made the investments to clean up emissions from our powerplants. I and many of my colleagues have long argued that we in the West should not have to also pay to clean up powerplants in the East—and this bill sticks with the principle of polluter pays.

Many of my colleagues and I also urged that an acid rain bill should provide utilities with the freedom to choose how they meet the legislation's stringent new emission standards. Again, this bill preserves that important principle of freedom of choice—and it will make Colorado's abundant natural gas and Colorado's high-Btu, low-sulfur coal strong competitors in the search for clean-burning fuels for powerplants.

The leadership's substitute bill is built on an innovative emissions trading program that minimizes the cost of the acid rain package. This is an approach that Senator HEINZ and I advocated in our Project '88 report on cost-effective environmental initiatives, and which was subsequently championed by the President.

In giving credit where credit is due, there is no question that, particularly with regard to acid rain, the leadership of President Bush has made a tremendous contribution to our efforts. His tackling the acid rain problem head on, and finding a way to deal with it that makes economic as well as environmental sense.

We have done a lot of fine tuning of those provisions in the course of our consideration of this bill, much of which I believe to have served the public well. I offered an amendment to insure fair treatment of independent power producers—power generators other than utilities—which I believe made this a better bill.

That fine tuning also included an amendment I offered to insure that small municipal generators were not left out of the bill by virtue of their smallness. This problem was brought to my attention by the Arkansas River Valley Power Authority, and with the help of the managers of the bill, we were able to include in the bill provisions ensuring that this utility, and others like it, would receive the acid rain allowances they need to continue their operations in the future.

MOBILE SOURCES

Mr. President, across the country there are 44 urban areas which still have not met the national clean air standards for carbon monoxide. And more than 100 areas still have ozone pollution that exceeds the national standards. As a result, more than 150 million Americans live in areas that exceed the standards that the EPA has set to protect Americans' health. Those high pollution levels represent a serious health problem for this Nation and it is past time we began to address that problem.

Cars and trucks are an overwhelming part of the problem. In Colorado, mobile sources account for more than 75 percent of carbon monoxide pollution, as well as 50 percent of Denver's brown cloud.

Today's cars run much cleaner than cars produced 10 years ago. But Americans are driving more cars, and they are driving those cars more miles. That is certainly true in Colorado, where we now drive an average of 35 million miles every day—and where the total vehicle miles traveled is predicted to nearly double by the year 2010.

Unless we do something to control emissions from mobile sources, the sheer number of miles driven will overwhelm the steps we already have taken to reduce vehicle emissions.

COLD STARTS

That is why I have been working for several years for tough new standards to control carbon monoxide emissions from cars when they are started in cold weather. It can take as much as 5 minutes for a car's emission control equipment to warm up and begin operating effectively in cold weather. During that time, the car is essentially running without emission controls. Multiply that one car by the tens of thousands of cars that are being started at the same time at the end of every business day and you get a sense of the problem—a huge amount of pollution being generated in a very short time.

The lack of a cold-start requirement is a primary reason that 44 areas exceed the pollution standards. Getting a tough cold-start provision will make a very big dent in Denver's carbon monoxide pollution well into the next century. This bill contains a tough cold-start standard for light duty vehicles, and that represents a big step forward.

DIESEL FUEL

Another big step forward for Denver and other western cities is this bill's requirement that the sulfur content of diesel fuel must be reduced. More than 40,000 diesel vehicles operate along Colorado's front range, and they consume 206 million gallons of diesel fuel every year. Even though these diesel vehicles are only 2 percent of all cars and trucks, they emit as much as 3½ tons of particulates into the air on a winter day. Those emissions are a major contributor to the brown cloud. Those particles are also very small and, when inhaled, are deposited deep within our lungs along with literally thousands of other chemicals, many of which can cause cancer.

The new diesel fuel standards in this legislation will significantly reduce the health risks caused by diesel emissions, and will reduce Denver's brown cloud by as much as 5 percent. That is a major step forward.

ALTERNATIVE FUELS

In addition, the leadership amendment to the Clean Air Act includes an important component on alternative fuels. These measures will lead to the use of reformulated gasoline in some ozone nonattainment areas, and will require some fleet vehicles in our most polluted cities to use clean-burning fuels like natural gas and methanol.

The leadership also accepted an amendment I offered to enable cities with carbon monoxide pollution to reap the same types of benefits that the program in the leadership amendment was designed to deliver to cities with ozone pollution problems.

These are the kinds of steps that we need to take to break America's addic-

tion to the gasoline engine. But I believe that this bill could have, and should have, done much more toward that end.

Senator WILSON of California and I offered an ambitious amendment to strengthen this part of the bill. That amendment lost because it was portrayed as a "deal breaker." I regret that. I believe the Wirth-Wilson amendment would have improved this bill, by setting up an ambitious program to clean up gasoline, to use domestically produced fuels, and to make alternatives to gasoline an everyday reality in America by early in the next century.

TOXICS

Finally, Mr. President, I want to mention the section of this bill dealing with toxic pollutants. I understand the concerns of some of our colleagues about whether we should rely predominantly on technology-based standards for controlling toxic chemicals in the air.

But I also recognize how far we have come in the last 10 years in dealing with this whole issue of toxic emissions; 6 or 7 years ago, I may well have been the first Member of the House of Representatives to introduce a comprehensive bill to regulate the enormous range of airborne toxic chemicals.

I know from first-hand experience how hard it is to find a way to deal uniformly with all of those different chemicals. I want to commend the majority leader and our colleague from Louisiana Senator BREAUX, again, for their hard work in trying to find a compromise on this very difficult issue.

LOCAL CONCERNS

Finally, Mr. President, in reviewing what this bill does include, I want to thank the managers of the bill for their consideration of local issues that we brought to their attention. I went to the managers with concerns brought to me by the Arkansas River Power Authority about the affects of the acid rain section of the bill on their future operations, and we were able to work out an amendment that dealt with those concerns.

I asked the managers for their help in supporting critical research on ways to control pollution from vehicles, and they supported proposals that I and Senator ARMSTRONG had worked on with the Colorado Department of Health, Colorado State University, and the Colorado School of Mines. I want to thank the managers again for their willingness to consider these proposals on their merits, and for their help in seeing that they were included in the final bill.

Mr. President, I think this is a good bill. But as the New York Times, the Denver Post, and my hometown newspaper all editorialized, it could be a better bill. I would like to take a few moments to outline where I think we could—and should—make improvements.

IMPROVEMENTS WE SHOULD HAVE MADE

Mr. President, the Colorado Department of Health has told me that if Denver is going to keep carbon monoxide pollution under control—once we meet the Clean Air Act standards for this pollutant, which we hope to do by the middle of this decade—we are going to have to do three things. The first is to reduce emissions from cold engines, which this bill does.

The second is to make sure that pollution control equipment continues to meet emission standards for the full useful life of vehicles. Existing law only requires auto makers to show that this equipment will last for 50,000 miles. The original Senate bill would have changed that by requiring pollution control equipment to last for the full useful life of a car or truck—100,000 miles.

The leadership amendment now before the Senate will dilute that requirement. It requires that the emission control equipment last for 100,000 miles, but, and this is a very big "but," the bill's fine print relaxes the emission standards for the second 50,000 miles.

Mr. President, many people think we should be mandating both a tougher emission standard and a 100,000-mile useful life standard. At a minimum, we should insist that pollution controls last for the life of a car—and we should not relax emission standards as part of the bargain. For the price of a hubcap or two, we can produce catalytic converters that will last for the life of a car—we should be insisting on that.

The third thing the Colorado experts have said we must do to keep Denver's air clean in the next decade is cut back on emissions from individual cars and trucks. One way to do that is to set tougher emission standards. I support that. The bill before us may require tougher standards, if a large number of cities are still suffering from ozone pollution as the decade ends. I hope that the final bill sent to the President does better.

A TOUGHER ALTERNATIVE FUELS PROGRAM

Another way to achieve the same goal would be to develop an aggressive program for the use of alternative fuels and clean-running cars. And while the bill's alternative fuels provisions are good, this is one area where I think we need to make them even better to protect the air millions of people breathe every day.

What should we be doing?

First, we should require oil companies to clean up the gasoline we use. If we know how to take cancer-causing chemicals and smog-forming chemicals out of gasoline—and we do—then there is no reason we shouldn't require this to be done, as broadly as possible.

Second, we should require that commercial and government fleets convert to alternative fuels in most ozone and carbon monoxide nonattainment areas beginning in 1994; and we should do everything we can to introduce nearly pollution-free vehicles powered by hydrogen, electricity, and solar power by the end of the century.

Third, we should be promoting the widespread use of clean-fueled vehicles by the general public starting in Los Angeles and our most polluted cities.

Is that a doable goal, Mr. President? Of course, it is. As President Bush has said, we must find a way to reconcile the automobile with the environment. Alternative fuels, such as ethanol, natural gas, and propane offer the potential for enormous reductions in pollution—and will also help us reduce our trade deficit and enhance our energy security. We should be embracing these new fuels and these new technologies with enthusiasm.

Finally, Mr. President, I would like to outline some of my other concerns with the substitute amendment. I raise these in part because I am disturbed by the precedent we may be setting, and in part because I am not convinced we should be changing the existing Clean Air Act in some of these areas:

For example, section 172 of the existing Clean Air Act requires nonattainment cities to work steadily toward cleaning up their air. Mayor Pena of Denver, and others, have argued eloquently that we should not relax the pressure on cities to clean up their air.

But the leadership amendment will significantly weaken existing law by permitting cities to get a waiver from additional requirements if they believe the costs of clean air are too high. I think every American has the right to breathe clean air, and I don't believe we should let cities avoid tough measures to meet minimum health standards because economists think it will be too expensive.

Another example, Mr. President, is that the substitute amendment seems to eliminate the requirement for the EPA to prepare an attainment plan if the State fails to do so. While the EPA has not had to actually prepare many plans on its own, the threat of such action has been essential to the completion of good clean air plans in States like Arizona and Colorado. I do not understand why we are changing that part of the Clean Air Act.

As I have said Mr. President, I think this is a good bill, and I am deeply gratified by the majority leader's diligent efforts to pass a clean air bill. I do think this bill could be stronger in several respects. I have tried to outline the areas that are of greatest concern to me. We can do better—we can always do better. But when the debate

is behind us, I intend to support this bill enthusiastically.

This is not the end of the fight. It is a new beginning. The steps I have advocated which go beyond what this body has accepted now will be debated again—and I expect to advocate them again, if, as seems likely, the steps we take now do not prove sufficient to the very, very tough goal of achieving clean, healthy air for every American.

This bill represents an important step. But let us not forget the goal—clean air for every American. Let us keep that goal clearly in view, and resolve to keep working for it.

Mr. HEFLIN. Mr. President, I would like to address a series of questions and observations about the provisions of the Mitchell-Dole substitute dealing with MACT standards for coke ovens, to the distinguished Senator from Montana, one of the Senators most involved in developing this substitute.

In fashioning the provisions of title III of the substitute dealing with coke oven emissions, we found it necessary to supply more detail in the language of the legislation than usual.

We wanted to assure that technology-based standard emission standards under section (d), referred to in the Committee report as Maximum Achievable Control Technology [MACT] were set at levels indicative of the best performing coke ovens now in operation. Also, we wanted to differentiate between the level of MACT to which all coke producers would be held, and a more aggressive and capital intensive technology-based requirement. Specifically, because of the potentially large capital costs associated with meeting this more aggressive requirement, we included a provision deferring the residual risk requirements of title III until 2020 for sources which committed to this requirement as encouragement to coke producers to substantially reduce their emissions as soon as possible.

This meant that we needed to be somewhat precise in the descriptions of the performance standards under the MACT concept that would apply to coke oven emissions. Specific numbers such as 8 percent leaking doors, 5 percent leaking offtakes, and 16 seconds per charge were written into the legislative language. Even so, these numbers are not sufficient detail to constitute a complete regulation. EPA will need to promulgate additional regulatory detail before the owners of coke ovens will know what is needed to comply with MACT. The first of those regulations is required to be promulgated not later than 2 years after enactment, although EPA has done much of the regulatory development in connection with the National Emission Standard for Hazardous Air Pollutants [NESHAP] for coke oven emissions proposed in April 1987.

This leads to my question. First, it is my understanding that the term "coke oven emissions" as used in section 112 is consistent with the use of this term in that proposed NESHAP. Is it the understanding of the distinguished Senator that the concept of the coke oven NESHAP will be followed in other matters as well, such as the method by which the leaking door percentage and the time limit on charging emissions will be measured. In particular, I seek assurance that the standards of section 112 (d)(8) and (i)(15)(A)(ii) and (B)(iii) are not never to be exceeded standards, but standards that would be expressed as a logarithmic mean of several events, as in the 1987 NESHAP.

Mr. BAUCUS. Mr. President, the Senator is correct in his understanding. To give meaning to the precise numbers of those provisions, EPA will need to supply methods for determining compliance through rulemaking. As subsection (i)(15)(C) provides, these will be national test methods. I fully expect that these standards will involve the statistical treatment of data on observations, in a manner similar to the 1987 NESHAP for coke oven emissions.

Mr. HEFLIN. Mr. President, I thank the Senator. My second question relates to the interrelationship between the provisions of sections 112 (d)(8) and (i)(15)(A)(ii) and (B)(iii) and the basic definition of MACT in subsection (d). It is my understanding that paragraph (8) generally describes what EPA is to promulgate as MACT for coke ovens and that the levels specified in that paragraph are intended to be the levels EPA will promulgate as MACT. The Agency, however, could approve an alternative means of emission limitation such as a positive capture system in lieu of numerical leakage rate restrictions if it achieves at least an equivalent level of control. It is my understanding that only in subsection (i)(15)(B)(iii) is it intended that EPA may vary from the specified leakage rate restrictions, including the 3-percent rate for doors, in setting emission standards for independent coke producers. It is also my understanding that the MACT performance standards could be met by whatever means a coke producer prefers and EPA would not be expected to add any equipment standards such as requiring the installation of new doors to these performance standards.

Mr. BAUCUS. Mr. President, the Senator has accurately described the effects of these provisions.

Mr. BIDEN. Mr. President, during the weeks the Senate has debated reform of the Clean Air Act, several references have been made to the historic nature of this effort. For the first time in 13 years, the laws regulating pollution of our Nation's air will be improved.

I am not convinced this is a historic moment in the truest sense of the word. I believe overdue may be a more appropriate term. Recognizing that we are doing what should have been done years ago underscores the risks of failing to send this bill to the President.

The national debate on clean air has alerted us to many aspects of environmental law that I believe had not been focused on before. One of those aspects is a disagreement over the will or ability of business to address voluntarily their pollution problems.

Environmental law is unique in demanding that industry meet goals which are often criticized as unobtainable. Consider laws that affect transportation, health, agriculture, defense or just about any other area. For those laws and the programs they establish, there is a much greater certainty that the goals can be met.

For defense, our Nation's security is not based on a weapons system that is not even on the drawing board. In agriculture, we do not set policy on the expectation that a miracle crop or hybrid will appear to solve all our problems. In health, we do not set programs on the expectation that a particular disease will be cured by the turn of the century.

But so often, those are the types of assumptions we make in environmental law, particularly in clean air legislation. No solution may be in hand, but goals are set and businesses are required to meet them. This approach often requires a leap of faith, but the record shows that it works.

One of the most important titles in this bill seeks to regulate emissions of air toxics. The standards are tough. Emissions are to aim for levels that present a cancer risk of less than 1 in 1 million to the public. Latitude is provided for industries that can show the goal is impossible. This section of the bill was heavily criticized by industry.

But let us make one point clear: Companies have until well past the turn of the century to meet that goal. They have over a decade to study a production process, look for improvements and modifications, and make those changes.

Opponents claim the goal is unreachable, dismissing out of hand the evidence that by setting far-reaching goals, we often spur the development of innovations to reach them.

When Senator Edmund Muskie pushed through the original Clean Air Act in 1970, auto tailpipe emission standards were based on what was needed to end smog alerts in our Nation's cities. Technology to meet those standards was uncertain and far from proven. The goal was set anyway.

A recent Washington Post article related part of the history of the development of the catalytic converter, the invention that made it possible for

automakers to meet the emission standards. The article described how an engineer named Dick Klimisch worked 6 years and spent $1 billion of General Motors' money to find the right combination of elements to convert engine pollutants into water, carbon dioxide and nitrogen.

Without passage of the Clean Air Act in 1970, does anyone believe that General Motors would have invested $1 billion in Dick Klimisch's lab? The automakers are not alone among American industries in being reluctant to address their pollution problems without government direction. Their burden may be heavier than most. Time and time again, a deadline has been to focus industry resources on an aspect of business—pollution control—that is thought to be of little importance to owners or shareholders.

Mr. President, I ask unanimous consent that copy of the Washington Post article be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. BIDEN. Mr. President, the catalytic converter was a bigger jump in technology than most environmental laws can ever expect to bring about, but it is by no means an isolated example of successful forcing of technology. Reformulated gasoline is the latest example of an unpredicted result tough environmental standards can bring to the market.

Until ARCO's announcement last August of the development of a reformulated gasoline that cuts emissions from cars built before 1975 by 15 percent, changes in the constituent parts of gasoline was not perceived as having a large role in addressing air quality problems. After the announcement, gasoline's role in cutting auto emissions received a great deal more attention.

What led ARCO to invest in the development of the new gasoline? A New York Times article of August 16, 1989, shed some light on factors in their decision. Quoting from the article:

> ARCO, acknowledged that the changes involved in devising its new fuel for older cars were simple and could have been made a long time ago if the company had felt the need to do so * * * [ARCO's] incentive for devising the new formulation was the growing threat posed by regulations in California and proposed rules in Washington, D.C.

The technology sat on the shelf for years because not enough was done to pull it into the market. Finally, air quality in Los Angeles reached such abysmal levels that regulations opened a market. The purpose of aggressive environmental legislation is to create a market for similar products before conditions reach the equivalent of the 100 days of smog suffered by Los Angelenos.

I ask unanimous consent that the article be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 2.)

Mr. BIDEN. Mr. President, finally, from my experience with efforts to establish a national pollution prevention program, I repeatedly have found that American industry has an impressive capability to solve or reduce pollution problems when they give them the attention they deserve. Industry may squawk about the impossibility of meeting emission goals through end-of-pipe technology, but regulatory and liability threats in other environmental laws have led more and more companies to look at ways to eliminate pollutants at the front end of the process. As beneficial as pollution prevention is, it is clear it did not develop without a push from vigorous environemental regulation.

EPA predicts that wider adoption of pollution prevention could cut hazardous waste generation by one-third. Hundreds of case studies show that companies will find ways to prevent air pollution in the first place rather than install the expensive scrubbers and other technological fixes that are commonly viewed as the only way to meet heightened standards. The leadership amendment makes prevention the first priority for facilities in addressing emissions of hazardous pollutants.

Mr. President, I have described the impact of tough environmental standards for two reasons. First, because during the course of this debate the American public has heard conflicting claims that standards called for in the bill are feasible or impossible, cost effective or outrageously expensive. But a review of the record clearly shows that in environmental law, we must reach beyond the known and the comfortable. In doing so, we challenge engineers as well as the public.

Second, I wanted to illustrate that the concern some have that environmental regulation automatically means lifestyle disruption or burdensome changes is usually unfounded.

In 1980, offical attitudes took a dramatic turn that led to a decade of inaction on the environment. The environmental movement fought rearguard battles, struggling for symbolic victories. There was no middle gound and progress was unheard of. Conditions again changed for 1990, and tactics must change with them. In contrast to the 1980's, I do not believe the public will accept another decade of inaction on clean air should improvements be so clearly needed.

We can return to clean air legislation in this decade. What we are passing today is not the last word on clean air for decades to come. The 13 years since Congress last reauthorized the Clean Air Act should be viewed as the exception rather than the rule. All Americans know the environment is an issue that cannot be ignored; and we also know that it affects each of us in unforeseen ways.

This bill has been criticized for not taking huge strides, as the original Clean Air Act did. Some view that as a good development, but many who have waited over a decade for reform of this law do not. The standard of some the most ardent supporters of clean air legislation was not met, but it should be clear that this legislation is far too important to let pass by.

For 8 years, in the face of intransigent and insurmountable opposition from the administration, clean air legislation made no progress. That stone wall is gone. We now have a President who recognizes the need for reform of the Clean Air Act. But he has made clear his own limit on how far to go.

There was a temptation during debate on this bill to test that limit. The President's line in the sand at $20 billion forced some hard choices on the negotiators and on the Senate. We had to decide whether the gains of an amendment that would push the projected price tag above the President's limits were worth scuttling the whole bill. The decision was whether to accept only that legislation which pushes well into the unknown or to get back on course with a bill the President will sign.

I am not prepared to chance a veto if the bill crosses that line. The President may not be committed to the aggressive clean air legislation that many of us believe is needed, but he has laid down the parameters he is willing to accept. Staying within those guidelines, we can still make tremendous progress on cutting auto emissions, reducing pollutants from industrial plants, and cleaning up the air in our Nation's cities.

This bill cuts sulfur dioxide emissions by 10 tons. Would we see any reduction in that pollutant by the end of the century if we failed to pass this legislation?

The bill calls for emission standards for 191 hazardous air pollutants. Would the process of setting those start if this bill is not signed into law? In 19 years of EPA efforts to regulate those emission, seven pollutants have been listed. A rapid increase under current law is unlikely.

The bill calls for at least one round of tighter auto tailpipe standards and most likely a second round in the year 2004. Does anyone believe that even the first round of standards would be in place if this bill fails?

The bill establishes a much stronger permit program for large emitters, and that program will be a mechanism to ratchet down those emissions. Will that happen without reform?

The bill will help develop alternatively fueled vehicles, cleaner gasoline, and reformulated gasoline. Will those improvements, crucial to the short and long-term quality of our Nation's air, come about in the absence of reform of the Clean Air Act?

There are dozens of other improvements that will be needlessly delayed if we fail to send this legislation to the President. Those are the real costs of killing this bill. Hypothetical benefits of waiting for more receptive conditions do not match up with the costs of further delay.

There is a second temptation that I was concerned about. That is the writing of detailed prescriptions to dictate exactly how environmental problems should be solved. I do not believe that is the proper role of Congress. One strength of the original Clean Air Act, as I described earlier, is that it set broad standards. We must make sure those standards are properly drawn and met, but we should avoid the urge to wander into determining the best way to meet those standards.

When Senator Muskie drafted the Clean Air Act in the late 1960's, he based the standards on what was needed to protect public health. The bill reported by the Environment Committee last year did the same. The committee bill indicates the steps we may well have to take in the future to make our air healthy. I viewed the criticism of the committee-reported bill as a reflection of how far we have to go in reconciling our need for healthy air with entrenched attitudes that resist making the necessary changes.

There are those who would attempt to reverse those attitudes in one grand motion, who would seek to ignore the lessons of the past and accept only the pinnacle in legislation. While I understand the reason behind those feelings, I do not believe they are in the best interests of our Nation's air.

Clean air legislation is never easy. This bill will affect each one of us in hundreds of ways every day. But that is because dirty, polluted air leaps from hundreds of sources, all of which must do their part to end their contribution to the problem.

For the present, we must be satisfied with enactment of this bill. For the future, we must never again allow it to develop that merely bringing clean air legislation before the Senate is considered an historic event. This bill is long overdue, and it is time we put in place such clearly needed reforms.

EXHIBIT 1

AUTO-POLLUTION DEBATE HAS RING OF THE PAST—DESPITE SUCCESS, DETROIT RESISTS

(By Michael Weisskopf)

DETROIT.—In 1967, when Dick Klimisch of General Motors Corp. began delving into the black art of "catalysis" as a possible cure for auto pollution, he attracted few believers.

Working in a tiny GM laboratory, Klimisch spent the next six years and $1 billion of GM's money to prove the skeptics wrong. Nicknamed "Captain Catalyst," he searched the periodic table until he found the right chemical combination to catalyze, or trigger, a reaction in the exhaust system of an automobile that rendered noxious emissions into harmless gases.

The "catalytic coverter," encased in a stainless steel vessel and connected to the engine of virtually every new car since 1975, not only assured that the auto industry could comply with the ambitious tailpipe standards of the 1970 Clean Air Act. It also became the nation's most powerful weapon against urban smog—a signal contribution still trumpeted by Detroit as proof of its ingenuity and commitment to clean air.

But the history of catalytic converters reveals another side of Detroit. The industry refined the technology only after Congress imposed strict limits and deadlines and foreign car makers threatened to develop cleaner engines. It lobbied forcefully against passage of the standards in 1970, calling them unobtainable, disastrously expensive and environmentally unnecessary. It pressed its case right up to the date of installing the first catalytic converters, and even after the devices put millions of cars into compliance, it fought to have the standards relaxed for cars and not extended to trucks.

Now as Congress attempts to strengthen the Clean Air Act, Detroit's ability to take another big slice out of tailpipe pollution is a major issue. Once again, automakers and their powerful political sponsors in Washington insist that it is not feasible or necessary and that congressional dictates to do so would be financially ruinous. They say the catalytic converter has done just about everything it can do.

To critics, it is a familiar refrain from an industry capable of changing only when forced by statutory deadline.

"We have to look at industry's arguments in light of our past experiences," said Michael Walsh, former director of the Environmental Protection Agency's mobile source program. "Their public posture is always much more pessimistic than technical reality. No place is that more evident than with the catalytic converter. As we consider the next generation of controls, we have to keep that lesson in mind."

Few experts outside the industry dispute that a new generation is needed. Cars are the primary source of ozone smog, a serious respiratory irritant created when two tailpipe pollutants—hydrocarbons and nitrogen oxides—are baked in sunlight.

Emissions of the two pollutants have been substantially curbed by the catalytic converter, which refined a process used since medieval times to chemically transform substances into almost everything from beer to high-octane gasoline.

But the gain in air quality has been limited because the number of vehicle miles traveled nationwide since 1970 has nearly doubled. And the explosive growth of autos projected for the next 15 years threatens to wipe out the gains altogether.

Smog is less of an acute health threat today in the most polluted cities of the 1960s, such as Los Angeles and New York, where hot summer weather drove people to hospital emergency rooms. But it is far more pervasive than 20 years ago, exceeding health standards in more than 100 cities, including Washington, and in once-pristine places such as Acadia National Park in Maine.

More also is known today of smog's withering effect on farmlands and forests as well as its role as a "greenhouse gas" that traps solar heat and raises Earth's temperature.

Nevertheless, Detroit has managed for the past decade to block tighter emission controls by wielding formidable political power.

The Big Three automakers are among the most generous congressional campaign donors, contributing $2.2 million to Senate and House candidates since 1981, according to the Public Interest Research Group. And with dealerships in virtually every congressional district and sizable plants in more than a quarter of them, the industry has a built-in grass-roots organization to pressure lawmakers.

But the industry's greatest political asset is Rep. John D. Dingell (D-Mich.), chairman of the House Energy and Commerce Committee. Dingell, whose wife lobbied for GM before their marriage in 1981 and still works in its Washington office, protects the auto interests of his Detroit district with the tenacity of a mother hen.

Dingell frequently intervenes to delay or scuttle regulations aimed at car makers, and he kept clean air legislation out of his committee during the 1980s, except when the Reagan administration tried to roll back tailpipe standards early in the decade.

Even in the current congressional battle over revising the Clean Air Act, Dingell has helped limit damage to Detroit. He agreed to sponsor President Bush's package but only after making sure it omitted the tough auto provisions of other bills, such as a second tightening of standards early next century and requirements for greatly increased gas mileage. And he maneuvered to water down Bush's most ambitious plan—mass production of clean-fuel cars.

Automakers were not as well placed 20 years ago when Sen. Edmund S. Muskie (D-Maine) was Congress's most influential voice on clean air. Impatient with earlier anti-smog efforts, Muskie decided to force the production of clean cars by setting standards based on the health needs of cities, not on Detroit's view of what was feasible.

His legislation, passed by Congress in 1970, called for 90 percent cuts in hydrocarbons and carbon monoxide by 1975 and the same for nitrogen oxides by 1976.

It was a few years earlier that the possibility of using catalytic converters as an antipollution device first attracted attention. The idea came from independent suppliers of the devices to oil refineries for use in transforming petroleum into high-octane gasoline. Why not use the same catalysts to neutralize the byproducts of gasoline burned in car engines?

Detroit was not receptive. The main problem was lead, then injected into gasoline to reduce engine knock and boost octane. Industry officials argued that lead would ruin the devices. Anyway, they argued, catalytic converters would never survive the jostling they would receive in cars.

Whether Detroit gave catalysts a fair hearing is open to dispute. In 1969, the automakers were charged by the Justice Department with conspiring to delay the development of antipollution devices. The antitrust suit was settled later that year when the companies, without conceding wrongdoing, agreed to stop any illegalities.

At GM, meanwhile, interest in catalysts grew with the hiring in 1967 of Klimisch, then 28 and fresh from a job at E.I. Du Pont de Nemours and Co. experimenting with cheaper was of catalyzing petroleum moles-

cules into synthetic fabric for women's underwear.

In two years, Klimisch found by trial and error that a catalyst containing precious metals—platinum and palladium—retains enough oxygen when exposed to the high temperatures of engine exhaust to convert hydrocarbons into water vapor and harmless carbon dioxide, and carbon monoxide into carbon dioxide.

When the converter, then a vessel of ceramic beads coated in precious metals, survived an in-house road test of 50,000 miles, "We couldn't believe it," Klimisch recalled. "The conventional wisdom was that we'd never get it to last so long."

The breakthrough persuaded GM President Edward Cole to issue a historic and startling statement on Jan. 15, 1970. Speaking to the Society of Automotive Engineers, he called on oil companies to take lead out of gasoline to facilitate the use of catalytic converters in cars. Throwing down the gauntlet, he announced that starting with 1971 models, all GM cars would be able to run on unleaded gasoline.

In Washington, however, GM joined Chrysler Corp. and Ford Motor Co. in opposing standards proposed by Muskie that seemed obtainable in Klimisch's lab. Lee A. Iacocca, then Ford's executive vice president, said in September 1970 that the limits "could prevent continued production of automobiles" and "do irreparable damage to the American economy."

Opposition persisted in the early 1970s as Detroit pleaded with the EPA to suspend the standards under a waiver clause in the 1970 law. By 1973, Chrysler President John J. Riccardo called the limits still "beyond the capability of known technology." His company attempted to muzzle an independent catalyst manufacturer from lobbying for the technology by threatening loss of Chrysler business, informed sources said.

And a GM official testified at a spring 1973 EPA hearing that forcing Detroit to install the devices in 1975 models would be technically and economically disastrous.

In May 1973, the EPA agreed to relax the standards for two years. But with catalytic converters proving to be a boon to fuel efficiency and performance, GM announced six weeks later that all of its 1975 models would be equipped with the devices.

"The industry did not use good judgment in the public relations aspect of the issue," said David Cole, son of the late GM president and director of an independent auto research center at the University of Michigan.

Klimisch explained that GM did not have access until 1973 to platinum and palladium mined in South Africa to produce catalysts for millions of cars per year. He spent most of his time after 1969 experimenting with base-metal substitutes.

By 1981, after another precious metal—rhodium—was found to strip oxygen from nitrogen oxides and turn them into harmless nitrogen, the catalytic converter finally allowed Detroit to reach and even exceed the federal standards.

The converters now shaped as ceramic honeycombs washed in precious metals, have been fitted in more than 110 million U.S. cars and are exported to Europe and Japan.

The devices have been so successful that Congress is considering legislation to require further reductions in tailpipe emissions beyond the 96 percent cut already attained in hydrocarbons and carbon monoxide and 76 percent in nitrogen oxides.

The industry says that while it may be able to slightly improve the converters, the target for early next century conditionally set in the clean air bill now under consideration in the Senate—reductions of 98.7 percent in hydrocarbons and carbon monoxide and 95.2 percent in nitrogen oxides—is not feasible technologically, and even if it were, it would cost too much.

"We can't squeeze much more out of the catalytic converter," said Klimisch, now director of environmental activities in GM's corporate offices.

As usual, feasibility is debatable. The California Air Resources Board has found that with adjustments, the catalytic converter can achieve the higher standards for up to 40,000 miles. Even the EPA acknowledges that the standards can be achieved but questions whether they are worth the increased costs; estimates range from $125 to $500 a car.

"I came out of the whole exercise with catalytic converters as a technological optimist in what the industry can do," said Walsh, the EPA's top auto pollution expert in the 1970s and now a private consultant. "When you give them a challenge, they meet it."

EXHIBIT 2

ARCO OFFERS NEW GASOLINE TO CUT UP TO 15% OF OLD CARS' POLLUTION

(By Matthew L. Wald)

WASHINGTON, August 15.—In a first step in its strategy to make gasoline environmentally competitive with cleaner alternatives. ARCO announced today that it would replace leaded gasoline at its California pumps with a "reformulated" fuel that could cut pollution from cars manufactured before 1975 by up to 15 percent.

The new gasoline could also be used in off-road vehicles, construction equipment and other vehicles that use leaded fuel.

ARCO acknowledged that the changes involved in devising its new fuel for older cars were simple and could have been made long ago if the company had felt the need to do so.

"We're already selling all the gasoline we can make," said James S. Morrison, executive vice president of ARCO. He said the company's incentive for devising the new formulation was the growing threat posed by regulations in California and proposed rules in Washington, DC.

The new fuel will cost about 2 cents a gallon more to produce. ARCO said it would absorb the cost.

ARCO, the leading marketer of gasoline in Southern California, the region of the nation with the strictest environmental controls, also said it hoped to introduce reformulated gasoline for newer vehicles that use unleaded gasoline in the next three to five years.

OTHER COMPANIES TO FOLLOW

Industry experts said other companies were likely to follow ARCO's lead in introducing fuel formulated for low pollution, known as "designer" gasoline, as a response to proposals in Washington and in California that would force auto makers to design and sell large numbers of cars using methanol, compressed natural gas and other alternative fuels to meet new clean-air standards.

"They are seeing the writing on the wall," said Bill Kelly, a spokesman for the South Coast Air Quality Management District in Los Angeles, which confirmed ARCO's claims for the new fuel. "They want to remain players here. They think they can do it through pushing gasoline formulation and technology."

The company said that the changes to improve the environmental performance of unleaded gasolines are also thought to be relatively simple, but that it needed to engage in extensive testing, and would face heavy expenses in reconfiguring refineries.

The gasoline companies face tough targets. Methanol can cut the air pollutants emitted from new cars by 50 percent. But they believe that a much smaller saving might make their product environmentally competitive because it could be quickly introduced on all cars.

ARCO said that in tests its new fuel for pre-1975 cars reduced evaporative emissions of smog-causing chemicals from them by 21 percent, cut carbon monoxide by 9 percent, nitrogen oxide by 5 percent and hydrocarbons by 4 percent.

POLLUTION FROM PRE-1975 CARS

Such reductions are among many that are important in reducing overall vehicle pollution, like the introduction of equipment at gas stations to reduce evaporation when cars are filling their gas tanks. Pre-1975 cars are thought to account for as much as 30 percent of all vehicle pollution in Southern California, where mild weather allows vehicles to last longer, and California officials hailed today's announcement.

"This gasoline will be most helpful in reducing emissions from older cars that do not have sophisticated emission-control systems," said Jananne Sharpless, chairwoman of the California Air Resources Board.

A 20-year-old car puts out 8 to 10 times as much pollution as a new car, Ms. Sharpless said.

Jerry Martin, a spokesman for the board, said the board's staff was working on proposed regulations for cleaner-burning fuel. "We'd like to see the entire fuel industry move in the direction that ARCO has," he said.

The new fuel will have the same octane as leaded fuel, 88, Mr. Morrison said, but it will have less butane, making it less prone to evaporation. Evaporation of unburned fuel is a leading source of the chemicals that combine, in the presence of sunlight, to form ground-level ozone. California has already forced refiners to cut the butane content lower than other areas of the country.

OZONE-PRODUCING CHEMICALS

The new ARCO fuel also cuts olefins and aromatics, a group of chemicals that help make ozone. It cuts benzene, one aromatic, by 50 percent and sulfur by 80 percent. The company also added methyl tertiary butyl ether, known as MTBE, an additive used by many refineries to raise octane. MTBE raises the oxygen content of the fuel, which promotes cleaner burning. Cars will perform as well or better, the company said.

ARCO said it was naming the new gasoline, which will be introduced Sept. 1, Emission Control 1, or EC-1. ARCO said it would sell the fuel at its more than 700 stations in Southern California, from Santa Barbara to San Diego. It will be dispensed from the pumps that now hold leaded fuel. Since those pumps have a wide nozzle—designed to prevent the introduction of leaded fuel into cars that need unleaded—EC-1 will not be available to drivers of newer cars.

Industry experts say that other oil companies, spurred by President Bush's proposal for fleets of cars running on anything but gasoline, are developing similar products.

"Everybody is looking at reformulated gasoline right now," said Gere Smith, a spokesman for Philips Petroleum, in

Bartlesville, Okla. "Everybody is looking at whatever it's going to take."

Terry F. Yosie, vice president for health and environment at the American Petroleum Institute, said, "It's an indication of how seriously the industry's taking the clean-air issue, and looking at its own products."

"IT REALLY REGISTERED"

ARCO said it started work in March, after California's South Coast Air Quality Management District proposed a 20-year plan that would eliminate gasoline-powered cars in favor of vehicles using methanol, ethanol, compressed natural gas and electricity. "It really registered that we were going to have to do something," Mr. Morrison said.

That plan was approved today by the California Air Resources Board in Sacramento.

Nationally, 13 percent of the gasoline sold is leaded, said the American Petroleum Institute, and that 13 percent fuels about 18 percent of the cars on the road. Old cars consume a disproportionately smaller share of the gasoline because they are driven fewer miles each year than new cars, experts say, but even driving those short distances, they produce more than their share of pollution.

Mr. Morrison said that ARCO hoped other would follow its lead, and that his company would provide the specifications to the new fuel to any refiner that asked. But there is no secret to the new formulation, he said. "They could buy a gallon and analyze it," he said.

Mr. CONRAD. Mr. President, I rise to express my support for the Mitchell-Dole substitute to S. 1630, a bill to amend the Clean Air Act. I had hoped that Congress would enact clean air legislation during the 100th Congress; I am optimistic that Congress will enact clean air legislation during this Congress.

The air quality in many regions of the country is intolerable, and there is room for improvement in others. Americans deserve better. The ability to breath healthy air and live in a clean environment is a right every bit as fundamental as those found in the Bill of Rights.

As the majority leader said in his statement following last year's failed attempt to amend the act, "[a]ir pollution is a man-made phenomenon. We have it within our power to control it. What we cannot control is the fact that human beings depend on air to survive."

I commend my colleague from North Dakota and the chairman of the Senate Committee on Environment and Public Works, Senator BURDICK, and the chairman and ranking member of the Subcommittee on Environmental Protection, Senator BAUCUS and Senator CHAFEE, for their dedication and determination to bring this matter to the floor.

I also recognize and thank the majority leader, Senator MITCHELL, for the outstanding leadership he has demonstrated during this long debate. He has tirelessly devoted over 10 years of his legislative career to ensuring that Americans live healthier lives.

The bill before us contains comprehensive titles on attainment, mobile sources, air toxics, acid rain, permits, enforcement, and ozone. Many will claim that the Mitchell-Dole substitute to S. 1630 is too tough and others will argue that it falls short of what we need. Indeed, most Members of this body, including myself, would have drafted the bill differently if given the opportunity.

Legislating, however, involves the art of compromise and is the art of the possible. If Congress is able to enact new amendments to the Clean Air Act, then everyone will have made sacrifices and everyone will have made concessions. It has been 12 years since Congress last revised the Clean Air Act—a testament to the need for compromise to ensure a healthy environment.

I am proud to say that North Dakota is a leader in the fight to save our air. It is one of only three States—together with Arkansas and Hawaii—that meet all of the Federal standards for ambient air quality. An extraordinary accomplishment given the fact that North Dakota is an energy-producing State—a State that not only provides electricity to its residents, but exports electricity to other regions of the country.

These accomplishments have not been without a price, however. We have invested over $350 million in sulfur dioxide removal systems, and our operation and maintenance costs for those systems are $23 million per year. More than 70 percent of our electrical generating capacity is fitted with scrubbers.

It has been the objective of the congressional delegation from North Dakota to ensure that the bill recognizes these accomplishments and investments. I believe that it does. With respect to sulphur dioxide emissions, several examples illustrate my point.

First, the bill excludes direct cost-sharing; North Dakota ratepayers will not have to pay for other States to clean up their emissions.

Second, there is no mandated scrubbing for plants. The bill repeals the percentage reduction provisions of the 1977 act, which forced plants in North Dakota to install scrubbers while plants in other regions got by with cheaper pollution controls.

Third, the bill recognizes the unique properties of the lignite coal. The bill permits lignite boilers in attainment States to continue to emit at 1985 levels.

As for emissions of oxides of nitrogen, no North Dakota boilers will be affected by the NO_x reductions until at least the year 2000. Further, cyclone boilers are exempt from NO_x reductions unless new technology is developed that would not cost more than low-NO_x burners for other power sources. North Dakota uses cyclone boilers for 40 percent of its generating capacity.

Tangential boilers will have a maximum allowable rate of 0.450 lbs/mmBtu's. Before 1997, a more stringent rate may be set only if new, more effective low-NO_x burners are available. Any new rate would go into effect January 1, 2000. Half of our power in North Dakota comes from tangential boilers. and most of these boilers meet the 0.450 standard. Also, an alternative emissions rate can be specified for boilers which cannot meet NO_x emission standards after properly installing and using low-NO_x burners or other approved technology.

The bill includes emissions averaging, which allows owners of affected boilers to average their total emissions to meet the NO_x standards. It also excludes a trading system for NO_x, which helps a State like North Dakota from having to purchase pollution allowances for any growth in NO_x emissions.

Finally, I am pleased that the bill will promote the use of ethanol and other oxygenated fuels in cities with the worst smog problems. These sections of the bill are "win-win" provisions for agriculture and the environment.

It has also been my objective to assure that the bill contains a rational relationship between cost and benefits. A healthy environment and a healthy economy are not mutually exclusive. A very marginal increase in air quality must always be weighed against the cost of producing that increment. Contrary to what some might assert, this is not and should not be a bill based upon health standards alone.

As a member of the Senate Committee on Energy and Natural Resources, I have also been concerned that clean air legislation be considered in the context of a national energy strategy. As is so often the case these days, energy and environmental issues are entwined, and the relationship will only grow closer. The chairman of the Energy Committee, Senator JOHNSTON, held hearings in January on this subject, and the hearings have enhanced the debate on this bill.

I am satisfied that the Mitchell-Dole substitute to S. 1630 is an improved version of the bill reported by the committee with respect to these matters.

As comprehensive as the bill is, there is one major omission, and that is the failure to address the effects of international air pollution.

As the Committee on Environment and Public Works noted in its report on S. 1630, air pollution recognizes no State or international borders. The bill adddresses emissions problems within the United States but is silent on the subject of international pollution.

I was an original cosponsor of the McClure amendment, which would have established fairness and balance in international energy trade, and I am disappointed that it was not adopted.

North Dakota, a State that borders two Canadian provinces, is very familiar with the problems of international transboundary emissions. As an energy producer, we are also very sensitive to the impacts of U.S. legislation on international competition. While more than 70 percent of North Dakota's generating capacity is scrubbed, in Canada, not a single coal-fired unit is fitted with a continuous emission control device.

If cleaner air is our objective, then we must be vigilant in our attempts to include other nations in our effort.

As stewards of this planet, we have a moral obligation to convey clean air to future generations. This bill is one of the most important pieces of legislation that Congress will consider this session, and I am pleased to support it.

Mr. THURMOND. Mr. President, 2 months ago during the opening of this debate on clean air, I stated my support and cosponsorship of S. 1490, the clean air legislation forwarded to the Congress by President Bush. At that time, I also mentioned a few concerns I had with S. 1630, the clean air bill reported by the Environment and Public Works Committee which we have been considering.

Since that time, there have been many long hours of negotiations between the majority leader, Senator MITCHELL, the Republican leader, Senator DOLE, the managers of this bill, Senators BAUCUS and CHAFEE, the Environmental Protection Agency, and several others. The administration, the two leaders, and the managers are all to be commended for their hard work. The result of the negotiations is the compromise substitute leadership amendment. Comprehensive in scope, this amendment addresses ambient air quality standards, mobile source controls, alternative fuels, air toxics, acid rain, the permitting of businesses, the protection of the ozone layer, and enforcement authority.

Mr. President, although this is not a perfect bill, it is one which truly represents the great art of compromise. The bill contains some provisions of which I do not approve. However, taken as a whole, I believe it is a fair bill, and I am pleased to support it. This legislation should provide health benefits to all Americans in the decades ahead.

Mr. WALLOP. Mr. President, tonight the Senate is voting on perhaps the major legislative issue of this session of Congress. The debate has extended from winter into spring and in the process, we have managed to provide something for everyone. But, is the final product in the best interest of our country? My conclusion must be no, this bill should not be passed.

This is the second clean air bill passed by the Senate during my term of office. In 1977, I served on the Environment Committee, and participated in the drafting of that year's reauthorization. I supported the bill, but my support came reluctantly.

The 1977 bill turned out to be a bad one for the Western States—as we were burdened with cleanup requirements for our utilities that did not apply to the worst polluters in the Midwestern States. Western Senators also learned a lesson from that experience. A major reason for the lengthy legislative drafting of today's bill is our desire to ensure a fair bill.

My good friend from Wyoming, AL SIMPSON, has undertaken an incredible task in fighting for an equitable bill. Taking into account the effect of the bill on Wyoming, my State has fared well. I have no apologies. We deserve every benefit we receive from this bill. And Senator SIMPSON has worked hard for them. Our low-polluting, low-sulfur coal will continue to find a market. Our powerplants, which emit miniscule amounts of sulfur dioxide, will finally receive credit for past sacrifices. From these perspectives, the bill is attractive to both Senators from Wyoming.

But this bill affects all Americans and therein, it fails. It will set back, even ignore, the $8 billion we have already invested in clean coal technology. It postpones, and very expensively, the fight to control the most toxic powerplant emissions, namely the nitrous oxides.

We have neglected, in fact, refused to deal with the permitting changes the administration required. This means that American industry cannot be certain that once permitted to invest in new plants, they can depend on their investment to come to production with any certainty. All these provisions count, Mr. President, against American industry and American jobs with no commensurate environmental improvement. We have allowed our emotions to run in front of our technology.

One of the most promising clean energy capabilities of the future—nuclear energy—will be put at great risk. The cost of this risk damages our own clean air attainment expectations while adding to the potential for Japanese dominance in the world of nuclear energy technology.

There are other provisions which deflect my enthusiasm for this legislation. I cannot accept the cost to our economy. We sometimes forget that we are involved in a global economy. Competition and costs do not stop at our borders. That is the reason I supported the free trade agreement 2 years ago. Simply put, this bill decreases the ability of American industry to compete in the global marketplace.

Once the Dole-Mitchell compromise was reached, I asked the administration to provide an accurate cost estimate of the package—specifically whether it would violate the parameters the President had set for supporting the bill. I have received no response. I know that the real costs of this bill exceed what was said to be acceptable to the White House.

EPA has estimated the cost at $24 billion, but the Business Roundtable provided a "best case" estimate of $46 billion for the three major provisions. The disparity is too great, especially when both agree on the amount of pollution the bill will remove.

What this means is that automakers will spend $7.5 billion a year to reduce emissions by 1 percent. The bill even goes so far as to provide the formula petroleum companies must follow in developing gasoline. American industry will receive an annual bill of $4.1 billion to reduce acid rain, which the Government's National Acid Precipitation Assessment Project study indicates damages barely 0.1 percent of the trees in the East, and 750 of the thousands of lakes in the region. In fact, this legislation will deacidify only 75 lakes, at the cost of $4 billion per lake!

A study by the Harvard Institute on Economic Research on Environmental Regulation and Economic Growth concludes that the type of action we are taking today retards economic growth due to reduced productivity, and higher operating and financial costs. Some argue that the health benefits outweigh the negative impacts on our economy. But, the issue of health risk and exposure is very unsettled.

I have previously discussed this issue in regards to asbestos—one example of a substance for which there is no consensus on the actual health risk, yet which is now regulated by EPA. We have no clear theory on public health risks, yet this bill will mandate controls for a whole list of unknown risks. I understand that the National Academy of Science will finally be studying methods for health risk assessment, but for now, we will make demands without knowing why.

We made mistakes back in 1977. We are making even more mistakes today. This time, I will reluctantly have to vote against this legislation.

Mr. HEINZ. Mr. President, this is the first major revision of the Clean Air Act in 13 years. It is overdue.

Our Nation has not achieved our clean air goals. Our current regulatory system is failing to solve the problems we indentified more than a decade ago. Moreover, emerging science has made us aware of new dangers: global warming, the disappearance of the protective ozone shield, and the long-

term effect of toxic air emissions on public health.

The need for urgent action is evident. This legislation meets that need.

Today, for example, over 100 million Americans are exposed to urban smog because they live in areas that fail to meet ozone standards. Under current law for ozone nonattainment, communities are merely required to meet a certain goal by a certain time. There is no mechanism to ensure steady progress towards the goal. There is no strategy to separately address the pollution generating components affecting the quality of the air. There are no realistic penalties for communities that fail to meet the goal. And, consequently, far too many communities have not met the ozone standard.

Our bill would provide the strategy and mechanisms missing from current law. Under this legislation, the Nation's air will improve steadily from year to year.

Some of my constituents believe that this bill is too strong. This is a tough bill. It will make significant improvements in the public health of millions of people. It will also impose significant costs on businesses. Should this legislation become law, it would represent the most stringent air pollution control law on the books in the world today.

Our legislation will force automakers to reduce smog-causing pollutants, demand that coal-fired utility plants cut back on sulfur dioxide emissions that cause acid rain, phase out production of ozone-depleting CFC's, and require steel, oil, chemical, and other manufacturers to restrict nearly 200 toxic substances in the air.

In the first round of controls, air toxic emissions will be reduced by 90 percent. Sulfur dioxide emissions, the precursors of acid rain, will be reduced by 10 million tons. By 1995, all vehicles coming on the road will have reduced their hydrocarbon emissions by 22 percent and their nitrogen oxide emissions by 60 percent. In the most severely impacted cities, beginning in 1997, fleets of more than 20 vehicles will be required to use alternative fuels that reduce ozone emissions by 80 percent and toxics by 75 percent.

Mr. President, we have labored long and hard to achieve these goals using least cost solutions. I believe the marketplace is far too important to be either a foe or a bystander in our pollution prevention efforts. As an ally, market mechanisms can help us achieve far more in the way of pollution prevention at far less cost to the economy as a whole. I am proud that the President cited Project 88, a report commissioned by the Senator from Colorado [Mr. WIRTH] and I, as the basis for the credit-trading program included in the acid rain title which is designed to introduce market forces into the achievement of our environmental goals.

Mr. President, we have been successful in improving this legislation during the long Senate debate. For instance, the Boschwitz amendment will provide small business with the assistance they need to comply with the law despite their limited resources. The Glenn-Heinz amendment will preserve the rights of States and communities to regulate at more stringent levels the emissions of radionuclides, and that is an important reaffirmation of our Federal system of government.

As a whole, I believe that this bill is a good piece of legislation. It is not perfect.

This bill would be better if it contained the Byrd-Heinz amendment to provide meaningful transition and training assistance to workers who will lose their jobs as a result of this bill, and it would be far better if it contained the Specter-Heinz amendment to maintain stable coal markets to avert job losses by providing a tax credit for companies to install clean coal technologies.

I share the anger of my colleagues from the Appalachian region. The Senate refused to recognize the disproportionate burden that this bill places on our region of the country. Some of my colleagues from the region have said that this bill is so unfair that they will be compelled to vote against. I am not persuaded, as they evidently are, that we can no longer influence the fairness issue, that all is lost for our people and our States. I, for one, will continue to advocate consideration of our region's special needs not only as this bill moves forward in the House, but also on other legislative vehicles that come before the Senate.

Mr. President, clean air is in our Nation's interest. Despite our differences, and despite our regional concerns, each of us is elected to advance the national interest. I believe this bill does, and I will support it.

I congratulate President Bush, without whose initiative this process would not have started, the majority leader, whose selfless work over many years has brought us to this point today, and my colleagues in the Senate, whose atention to these complex and difficult issues has been meticulous. This is sound legislation. It is important legislation. I urge my colleagues to vote for it.

Mr. WARNER. Mr. President, the Senate is about to conclude action on a landmark piece of legislation to amend the Clean Air Act. Mr. President, S. 1630, as amended by the Mitchell-Dole compromise and certain other amendments approved on the floor in the last few weeks, is certainly one of the most important pieces of legislation that I have considered since coming to the Senate almost 12 years ago.

The legislation to be put to a vote later today is comprehensive in nature: It provides for a renewed attack on ozone and carbon monoxide pollution in our cities, as well as much-needed new regulation of acid rain and toxic air pollutants. Additional controls in these areas are vital to the health and welfare of all Americans.

Mr. President, when I took the floor to discuss this legislation in January, I stated my hope that the Senate could work to produce a strong, yet fair and cost-effective clean air bill. In my view, Mr. President, the Senate will in all likelihood produce just such a bill today. I will state to my colleagues that S. 1630, as amended, is not a perfect bill, but it does go a long way to bring balance to the process of restoring our air quality. There is no doubt that this legislation will impose great costs on the economy as a whole, and to all American consumers individually. However, the proposal before the Senate for final consideration in large part brings those into line with the amount of benefits produced.

Mr. President, in my analysis of S. 1630, as amended, I have found much that will be helpful to the citizens of the Commonwealth of Virginia. First and foremost, the Senate bill sets strict but realistic deadlines for all areas out of attainment to comply with with health standards for ozone. The Senate clean air bill will, therefore, provide the measures necessary for nonattainment areas like northern Virginia, Richmond, and Norfolk to improve air quality for all of its citizens.

The Senate bill will also address the problems of acidification in the lakes and rivers of Virginia and of visibility in the Shenandoah National Park. It will also set standards to reduce toxic air emissions in our State. All of these benefits will come to Virginians with some sacrifice—indeed, the whole country will have to make sacrifices—but at a greatly reduced cost compared to the costs imposed by the original S. 1630.

Mr. President, I think the Senate has worked hard to produce a strong, effective bill at a reasonable cost. The managers of the bill have labored many long hours to bring the bill to this point. I have worked closely with the managers, other Members of the Committee on Environment and Public Works, as well as other Members of the Senate to do my part to produce just such a credible piece of legislation. I commend my colleagues for a job well done.

Mr. SIMPSON. Mr. President, it has been a long and tortuous road we have taken in trying to get a clean air bill passed. There have been many detours along the way and fits and jerks of progress. But today we finally have completed the first half of the jour-

ney. We must still complete conference committee consideration after the House acts—and that will be a long and grueling task.

We would not be voting on final passage of this bill if it were not for the courage and fine leadership of George Bush, GEORGE MITCHELL, and BOB DOLE. I would take this opportunity to single out President Bush for special praise because he was the catalyst that helped bring all the critically needed participants together. Without the President's leadership and willingness to put clean air legislation forward I doubt that the rest of us could have pulled it off.

Then I can't help but observe that GEORGE MITCHELL was a real stalwart and vital advocate over the last 3 months. The majority leader exhibited tenacity, courage, and conviction in conducting negotiations on a clean air compromise. He fully recognized that the bomb throwers on both sides of the issue were not going to play a constructive role and he forged ahead undaunted by their inflammatory press releases and statements.

I would be remiss if I didn't mention BOB DOLE and his staff and their remarkable participation in all of the deliberations. Senator DOLE deserves a great deal of credit for his fine leadership and his willingness to get involved in some very tough issues.

Then we have the two warriors in the trenches—JOHN CHAFEE and MAX BAUCUS—who have sat here on the floor day in and day out. They have been very patient and constructive and we all appreciate their diligence.

And my sincere thanks to my strong right arm throughout, Brent Erickson. He did a superb job for me and made me very proud of a young man I have known nearly all my life. And my thanks to Lucy Swartz who was a steady source of support and assistance on the radionuclide issue.

I would also like to take a moment to thank Governor Sununu and the Alliance for Acid Rain Control. Governor Sununu helped form this group of Governors who have advocated acid rain reduction and flexibility and many of the things that are in this bill. We often hear people who like to bash around Governor Sununu, but that is only because he is so capable and accessible to us all. He is a fine instrument in the orchestration of this bill and was always available to us.

This bill is landmark legislation and the American people have been well served by the Senate. I don't agree with everything in this bill and I know the conference committee may be even more difficult than Senate consideration. But I feel now that the President will sign a clean air bill into law this year and the American people will have what they deserve—cleaner air and a recognition of certain economic realities that accompany it. It is a good piece of work.

Mr. DURENBERGER. Mr. President, tonight after years of trying and weeks of debate, the Senate will pass a clean air bill that will give the United States of America the cleanest, safest, and healthiest air in the industrialized world. It reduces, across the board, all air pollutants: Sulfur dioxide, cancer causing toxics, carbon monoxide, particulates, and ozone.

The result is air we can breathe with confidence and certainty because we will have cleaner cars, trucks, and buses; we will have cleaner factories, powerplants, and industries; and we will have cleaner vistas, skylines, and horizons. This, Mr. President, is an accomplishment to be proud of and that will save millions of citizens unnecessary suffering.

Over the past few weeks the Senate has been debating legislation to reauthorize the Clean Air Act. I believe this may be the most important piece of environmental legislation which has ever been put on the Senate Calendar. With the active support of the President of the United States, we may soon witness the signing of legislation that will determine the quality of our environment well into the next century.

It is my purpose today to briefly review the air quality problems which are addressed by this legislation, to summarize its major provisions.

ACID RAIN

Acid rain has been of major concern to Minnesotans for most of the past decade. The northeastern portion of our State which contains some of the most beautiful wilderness resources in the Nation is an area extremely sensitive to acid deposition. Minnesota, acting on its own, has already established an aggressive program to reduce the pollutants which can cause damage to our lakes and forests.

Sulfur dioxide and oxides of nitrogen, the two pollutants which cause the acid rain problem, are propelled into the atmosphere by smokestacks and tailpipes all across America. The yearly loading for each of these pollutants is approximately 20 million tons. The sulfur dioxide comes principally from electric powerplants burning coal. The nitrogen oxides are about half from industry and half from our cars and trucks.

These pollutants can travel hundreds of miles from their point of release to the place where they affect the environment. Tall smoke stacks designed to protect public health from sulfur dioxide pollution in areas close to powerplants have made these pollutants a major issue on a continental scale. It is the issue that divides us most frequently from our best friend in the community of nations. The sensitive resources of our Canadian friends to the north are being ravaged by pollutants produced in our industrial heartland.

The damage caused by acid rain includes destruction of aquatic resources as lakes and streams are made sterile. The acids do billions of dollars in damage to manmade materials including buildings and monuments. The sulfates and nitrates which are precursors of acid rain reduce visibility in national parks in the Eastern United States and are beginning to threaten vistas in the West. The acid aerosols which form from these particulates are now recognized as a public health problem which may contribute significantly to bronchial disease. And finally, these pollutants may play a role in the decline of Eastern forests at high elevations which has occurred at an accelerating pace in recent years.

Acid rain is an issue which excites sharp regional passions. The Northeast is the area of the country which suffers most of the damage. The industrial Midwest mines and burns the high sulfur coal which is causing most of the damage. The West has abundant supplies of low sulfur coal and the Southeast produces natural gas—two fuels which the producing regions would like to sell as part of the solution. That mix of interests has meant deadlock in the Congress on clean air for almost a decade.

The acid rain title of the bill being considered by the Senate is based on the legislation proposed by President Bush. It reduces sulfur dioxide emissions by 10 million tons below 1980 levels by the year 2000. After the year 2000, sulfur dioxide emissions are capped. Any powerplant wishing to increase emissions or any new powerplant coming on line must secure offsetting SO_2 reductions at another facility.

The emissions reduction and the permanent cap are to be implemented through an allowance system. Each powerplant is to be granted specific allowances which permit emissions based on a plant-by-plant pollution limit. Powerplants which do not emit as much SO_2 as their allowances would permit because they have cleaned up to very stringent levels are free to sell those allowances to other utilities that emit more. In this way, both the 10 million ton emissions reduction and the permanent cap can be implemented in the most cost-effective manner.

The bill reported by the committee also mandates reductions in the emission of oxides of nitrogen from new and existing powerplants and from large diesel and turbine engines. The bill has a goal of reducing NO_x emission by 2 million tons below the levels that would otherwise be experienced in 2000.

NONATTAINMENT

Clean air legislation must also address the difficult problem of urban

pollution. Under the Clean Air Act, EPA has set standards to protect the public health from a handful of pollutants which cause a widespread threat. These are pollutants like ozone—which to most people is smog—and carbon monoxide—a pollutant which comes principally from the tailpipe of cars. These are city problems, generally. More than 100 million Americans live in cities which do not meet the Federal health standards for smog and carbon monoxide.

Back in 1970 when the Clean Air Act was passed, two strategies were developed for smog and carbon monoxide. Since much of the problem is attributable to cars and trucks, EPA was told to set air pollution standards for vehicles. And the second part of strategy relied on the States to develop plans for controlling emissions from industrial sources in areas where the standards were being exceeded.

The Federal Motor Vehicle Control Program—as the strategy for cars and trucks is called—has been a great success. Carbon monoxide emissions from the tailpipes of new cars are about 90 percent lower than emissions from cars that were manufactured in 1970. Hydrocarbon emissions—that is generally gasoline vapors—which are the primary element in smog formation have also been reduced by about 90 percent. Another pollutant contributing to smog—the nitrogen oxides—have also been reduced by about 75 percent. As we review the Clean Air Act, I think we must keep in mind how much progress has actually been made in controlling emissions from the automobile.

There is more that can be done, of course. One of the difficult remaining problems on carbon monoxide is high emissions during the cold weather months. Minneapolis and St. Paul, as one might expect, have a cold weather carbon monoxide problem and are in nonattainment for this pollutant. Engines and pollution control systems just don't function as effectively when the car is started on a cold winter morning. The catalytic converter which reduces these pollutants does not function until it heats up to several hundred degrees. And a cold engine makes more pollution because the fuel doesn't burn well.

There is reason to believe that modifications in auto pollution control can be made which will contribute to a further substantial reduction in the carbon monoxide nonattainment problem. One technology is a second catalytic converter located nearer the engine block. It would light off immediately and handle the pollution until the big catalyst was hot enough to take over. It's not possible to move the big catalyst closer to the engine, because if they get too hot, they burn up and you get no pollution reduction. The small light off catalyst near the engine block would be bypassed as soon as the larger catalyst began to function. The bill the Senate is about to pass will require such technology.

On the ozone side, the biggest difference we can make in the motor vehicle contribution to the air pollution problem is a matter of the fuel rather than the car itself. Gasoline is not a simple compound. It is made up of many different chemical elements. And the mix has changed over the years. As oil markets changed some chemicals available in abundant amounts have become much cheaper than others. For instance, butane is much cheaper than gasoline and can be added to gasoline in large quantities without greatly reducing the performance of the fuel. But butane—as everyone who has flicked a Bic lighter knows—produces much more vapor than gasoline. As oil refiners have added more butane to motor fuels, more hydrocarbon vapors have been released to the atmosphere to cause smog and other pollution problems.

So, the bill will prevent the oil companies from adding butane to the fuel. This will actually save the consumer money. On hot days most of the butane was evaporating before it reached the engine anyway. The gas tank heats up as a car is operated. The fuel in the tank heats up and vapors are formed. These vapors may be released from the gas cap or they may travel through the car to a canister that collects evaporative emissions and feeds them to the engine. The problem is that these canisters weren't designed to handle lots of butane emissions. So the butane was escaping the canister, before it could be used as fuel. Consumers have been paying to fill their tank with fuel that never reaches the engine and creates tremendous air pollution problems, as well. That problem is fixed by the bill.

We can also put ethanol into our fuel to reduce the air pollution problem. Ethanol is made from corn. Minnesota is the Nation's third leading corn-producing State. The ethanol contains extra oxygen atoms. This extra oxygen improves the combustion process and reduces the amount of air pollutants that are produced. For instance, combustion which might have produced a lost of CO—carbon monoxide—is improved to produce CO_2 when extra oxygen from ethanol is present. CO is a poison. Carbon dioxide is what we breathe out when we exhale. The bill requires that fuel containing extra oxygen be used in all the cities like St. Paul where violations of the Federal health standard for carbon monoxide occur. I am pleased to say that I was the sponsor of that requirement. The ethanol will be produced from surplus corn.

So, we've made great strides on the mobile source side of the nonattainment question, but more can be done. The same cannot be said for the other half of this process, the State planning effort. The original 1970 statute gave the States 3 years to write and implement plans that would assure attainment of the public health standards. When large numbers of areas still had not attained healthy air by 1977, the Congress enacted sweeping amendments to the law that gave States up to 10 more years, to December 1987. That deadline has now passed and the failure to meet standards is still a critical problem in dozens of cities—102 cities fail the ozone standard; 44 fail the carbon monoxide standard.

We have made some progress. The number of days when the air is unhealthy have been fewer in this decade. For many of the cities with the worst pollution problems, the highest levels of pollution have been brought down dramatically. And a substantial number of cities have actually attained the ozone and carbon monoxide standards.

But these modest successes are not the major theme in this story. Anyone making an objective report on the State planning process of the Clean Air Act must say that the effort has largely failed to produce results. Many of the control strategies promised by the States have never been implemented or were implemented in only a halfhearted way. This is a program that is broke.

And simply repeating the same old cycle one more time—even if we all promise to be serious this time—is not going to solve the problem. To some extent the planning process invites failure. A State implementation plan is a promise to achieve a healthy air quality at some distant date 5 or 10 years in the future. To support the promise the plan must make all sorts of assumptions. Emissions of air pollutants must be projected years into the future. Planners tend to underestimate growth so that emissions will be lower. If emissions are too high to project attainment, control strategies must be proposed. Planners tend to greatly overestimate the efficacy of these control strategies. And the promise strategies must be implemented. Politicians find ways to delay and deflect these control strategies when the time for implementation arrives.

We need to do at least three things to remedy this problem. First, we need better tools for the planning process. The bill requires that many cities develop detailed emissions inventories and use sophisticated air quality models to understand their pollution problem. In many areas these tools have not been applied in the past.

Second, we need more resources at the State level to carry out implementation plans once they are proposed. The bill imposes fees on stationary

sources as a way to raise money for State air pollution programs. The stationary source fees are $25 per ton of emissions, so the clean operator will pay less than those who are still emitting at high levels.

And third, we need to force emissions down on a regular basis. Rather than complicated 10-year plans that try to take into account 1,000 factors that may affect air quality, we need to count pollution by the ton and insist that each year and every year the number of tons goes down. That's in the bill. A 4-percent reduction in the emissions of hydrocarbons and carbon monoxide in the ozone and CO nonattainment areas every year.

AIR TOXICS

The third major issue addressed by this legislation is toxic air pollutants. Under the Clean Air Act these substances are called hazardous air pollutants. They are generally cancer-causing substances, but other health and environmental problems may also be caused by air toxics.

There are hundreds of air toxics of concern. Some examples are mercury, arsenic, asbestos, benzene, radionuclides, perchloroethylene which is used as dry cleaning fluid, ethylene oxide which is a sterilant used in hospitals, toluene which is a major component of gasoline, ammonia used in fertilizer, methyl isocyanate which was the chemical building block of a fertilizer released at Bhopal, and dioxin which is a byproduct of combustion whenever chlorine is present in the fuel.

OSHA regulates about 500 air toxics in the workplace. A few States with active programs have regulated a total of 708 different toxic air pollutants. Recently, major manufacturing facilities were required to report their toxic emissions. The total for the firms required to report was 2.7 billion pounds. That is estimated to be about one-fifth of all toxic emissions in the United States as only a portion of the very largest sources were required to report.

Most of the air toxics discussion focuses on cancer. EPA estimates that something like 2,700 cancers are caused each year in the United States as the result of toxic air emissions.

Well, you might say that is a relatively small problem compared to other environmental risks or health problems which result from careless lifestyles. There are approximately 450,000 fatal cancer cases in the United States each year; 2,700 cancers in a population of 250 million is a 1-in-100,000 risk, which to some is an acceptable price to pay for an industrial society. And if the risks were spread evenly among the whole of the population with each of us bearing an equally small portion, perhaps air toxics wouldn't be on the congressional agenda.

But risks are not spread evenly. Those living near point sources of industrial emissions may face very high cancer risks—1-in-1,000 or even 1-in-100 are typical risks for those persons who experience maximum exposure to various categories of industrial emissions. For one pollutant, butadiene, which is used to make tires, the risks at some sites are by EPA's projections 3-in-10. That is there will be 3 excess cancers for every 10 people maximally exposed at these sites. That's simply not an acceptable price whatever the benefits of this particular chemical.

Risks can also be elevated as the result of the urban soup of pollutants that some Americans are forced to breathe. So it's not just the national cancer incidence that is of concern. It is also the high risks faced by those individuals who experience extraordinary exposures in some communities.

And, of course, it is not only cancer. Many of the air toxics, especially the metals, can lead to other adverse health effects. And in recent months we have become aware of the environmental effects of these pollutants. The most dramatic evidence of damage is coming out of my region of the country, the Great Lakes. It is estimated that 80 percent of the toxics loading up Lake Superior is air deposition and that even for Lake Michigan—whose problems we normally associate with industrial discharges to rivers and tributaries—50 percent of the toxics are from air deposition.

That's the routine side of the air toxics problem—everyday emissions from industry, commerce, and transportation sources. But we have also been awakened to the problem of sudden, catastrophic releases as the result of the catastrophe which occurred in Bhopal, India, and a series of accidents here in the United States.

Again, I'll start with some EPA statistics. The Agency keeps something called the acute hazards events data base which recorded 11,048 chemical accidents between 1980 and 1985. These accidents killed 309, injured another 11,341 and forced the evacuation of 464,677. EPA thinks the data base captures about the problem. These accidents resulted in the release of 420 million pounds of air toxics.

As part of its work on this accident data base, EPA analyzed 29 events with the highest potential for damage to health and the environment. These events were compared to the release at Bhopal which killed 3,000 and injured over 200,000 others. Considering only the toxicity and volume of the chemicals released in the 29 United States events, 17 of these events had the potential for more damage than Bhopal and all 29 had the potential of 50 percent or more of the Bhopal effect. That few were killed or injured in these accidents is due principally to the location of the facilities and the weather at the time of the release.

So here's a summary of the problem. A background cancer risk of 1-in-100,000—from a few dozen air toxics that EPA has studied—dramatically higher risks for some portion of the population—noncancer effects—growing evidence of environmental damage—and an increasing number of catastrophic events which cause immediate death and injury and release large quantities of toxic pollutants.

EPA has not done a good job of controlling toxic air pollution under the existing Clean Air Act. In 18 years EPA has listed only eight pollutants and standards have been issued for only some sources of seven. During that same period of time, the handful of States with active air toxic programs have written standards of one type or another for 708 different pollutants. That suggests the size of chasm which yawns between the problem and the solution at the Federal level.

The Air Toxics Program which is now before the Senate is based on legislation which I introduced last year. Subsequently, President Bush submitted a bill containing a very similar program.

The air toxics title begins by establishing a list of approximately 200 hazardous air pollutants. The list in the bill was prepared by EPA.

Any source emitting any one of these pollutants in quantities greater than 10 tons or any combination greater than 25 tons is classified as a major source and subject to regulation under the bill.

In addition to the list of pollutants, EPA is to establish a list of source categories for purposes of promulgating standards. Each major source is placed in a category. The emissions standards apply to sources in a category refineries, smelters, boilers, incinerators, chemical plants, cotton gins, POTW's, coke ovens, et cetera, rather than to pollutants. There may be 150-250 source categories.

For each category of sources, EPA will promulgate a standard which requires the installation of maximum achievable control technology [MACT] by the sources in the category. MACT standards are generally best available technology standards and can take cost into account. In setting MACT standards, EPA is to give priority to pollution prevention measures like process changes and materials substitution. Standards for all source categories are to be promulgated within 10 years. Existing sources must comply with MACT standards not later than 3 years after they are promulgated.

Any source which makes a voluntary reduction of 90 percent in emissions of hazardous air pollutants before De-

cember 31, 1992, will be granted an exemption from the MACT standards which would otherwise apply to the source.

It may be that the MACT technology-based standards will not reduce emissions sufficiently to remove all risks to health and environment of concern. If significant risks remain, EPA is to tighten the standards 5 years after the initial MACT standard is promulgated.

Each source subject to these standards will be required to apply for a permit. The permit and enforcement aspects of the program will be managed by the States.

In addition to major sources, the bill also has area source program. Area sources are the small, but possibly numerous sources, of toxic pollutants. Dry cleaners, service stations, paint shops, wood stoves, cars and trucks, pesticide applications, and so on. Although the risks from each source are small, EPA believes that in the aggregate area sources may cause as much as 75 percent of the cancers in some urban areas.

S. 1630 adds new provisions to the Clean Air Act to prevent chemicals accidents like that which occurred at Bhopal and require efforts to mitigate the effects of those accidents that do occur.

The bill establishes a five-member Board to investigate chemical accidents which cause death, injury, or severe property damage. The authorities and activities of the Board are similar to those exercised by the National Transportation Safety Board. The Board is to determine the probable cause of each chemical accident under its jurisdiction—those at fixed facilities—and to make recommendations to EPA on measures that might be adopted to reduce the risk of accidents. The Board would have no regulatory authority of its own.

EPA is authorized to promulgate accident prevention, detection, and correction regulations including requirements for design, operation, maintenance, and training at facilities handling extremely hazardous substances. These regulations would generally be issued in response to recommendations for safety improvements made by the Board.

So, that's a general outline of the bill and the problems that it is designed to address. It's a very comprehensive piece of legislation which will affect the lives of all Americans. In addition to the hundreds of individual provisions, one overriding issue which has developed is the cost of clean air. The President, as I said, has submitted a clean air bill of his own. It is a good bill. But it doesn't go as far as the bill which is pending in the Senate. It doesn't deal with the CFC's which are attacking the stratosphere and breaking down the shield which protects Earth from ultraviolet radiation. It doesn't include a string health standard for air toxics. It doesn't address the problem of municipal garbage burners. It doesn't make any start at all on the problem of global warming. In each of those areas the Senate bill is a little stronger, pushes a little bit more.

Of course, the President's bill costs less. We currently spend about $32 billion per year on air pollution in the United States. As a percentage of GNP that's less than we were spending at the beginning of the last decade. The President's bill would add about $20 billion to the price tag by the year 2005. Not tomorrow, but over a 15-year period of time. The Senate bill would be somewhat more expensive—and the debate has come down to how much more can we afford?

Compared to the costs of poor health, lost work days, acid lakes and forests, vistas that are never seen, climate changes that melt ice caps and turn the birch forest of northern Minnesota to grasslands—the Senate bill is a big savings for our country. We can afford the effort it calls for. We need the protection which it provides for the health of our people, the unspoiled beauty and bounty of our natural resources, and for the quality of life on our planet.

The VICE PRESIDENT. The bill is open to further amendment. If there be no further amendments to be proposed, the question is on the engrossment and third reading of the bill.

The bill (S. 1630), as amended, was ordered to be engrossed for a third reading, and was read the third time.

The VICE PRESIDENT. The bill having been read the third time, the question is, Shall it pass?

The yeas and nays have not been ordered.

Mr. BAUCUS. Mr. President, I ask for the yeas and nays.

The VICE PRESIDENT. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The VICE PRESIDENT. There being no further debate, the bill having been read the third time, the question is, Shall it pass? On this question, the yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

The VICE PRESIDENT. Are there any other Senators in the Chamber who desire to vote?

The result was announced, yeas 89, nays 11, as follows:

[Rollcall Vote No. 55 Leg.]

YEAS—89

Adams	Bond	Bumpers

So the bill (S. 1630) as amended, was passed; as follows:

TITLE IV—ACID DEPOSITION CONTROL

SEC. 401. The Clean Air Act is amended by adding the following new title:

"TITLE IV—ACID DEPOSITION CONTROL

"FINDINGS AND PURPOSES

"SEC. 401. (a) FINDINGS.—The Congress finds that—

"(1) the presence of acidic compounds and their precursors in the atmosphere and in deposition from the atmosphere represents a threat to natural resources, ecosystems, materials, visibility, and public health;

"(2) the principal sources of the acidic compounds and their precursors in the atmosphere are emissions of sulfur and nitrogen oxides from the combustion of fossil fuels;

"(3) the problem of acid deposition is of national and international significance;

"(4) strategies and technologies for the control of precursors to acid deposition exist now that are economically feasible, and improved methods are expected to become increasingly available over the next decade;

"(5) current and future generations of Americans will be adversely affected by delaying measures to remedy the problem;

"(6) reduction of total atmospheric loading of sulfur dioxide and nitrogen oxides will enhance protection of the public health and welfare and the environment; and

"(7) control measures to reduce precursor emissions from steam-electric generating units should be initiated without delay.

"(b) PURPOSES.—The purpose of this title is to reduce the adverse effects of acid deposition through reductions in annual emissions of sulfur dioxide of ten million tons from 1980 emission levels, and, in combination with other provisions of this Act, of nitrogen oxides emissions of approximately two million tons from 1980 emission levels, in the forty-eight contiguous States and the District of Columbia. It is the intent of this title to effectuate such reductions by requiring compliance by affected sources with prescribed emission limitations by specified deadlines, which limitations may be met through alternative methods of compliance provided by an emission allocation and transfer system. It is also the purpose of

this title to encourage energy conservation, use of renewable and clean alternative technologies, and pollution prevention as a long-range strategy for reducing air pollution and other adverse impacts of energy production and use.

"DEFINITIONS

"SEC. 402. As used in this title—

"(a) The term 'affected source' means a source that includes one or more affected units.

"(b) The term 'affected unit' means a unit that is subject to emission reduction requirements or limitations under sections 403(e), 404, 405, 406, 407, 409, or 410 of this title.

"(c) The term 'allowance' means an authorization, issued to an affected source by the Administrator under this title, to emit, during or after a specified calendar year, one ton of sulfur dioxide.

"(d) The term 'baseline' means the annual quantity of fossil fuel consumed by an affected unit, measured in millions of British Thermal Units ('mmBtu's'), calculated as follows:

"(1) For each utility unit that was in commercial operation prior to January 1, 1985, the baseline shall be the annual average quantity of mmBtu's consumed in fuel during calendar years 1985, 1986, and 1987, as recorded by the Department of Energy pursuant to Form 767. For any utility unit for which such form was not filed, the baseline shall be the level specified for such unit in the 1985 National Acid Precipitation Assessment Program (NAPAP) Emissions Inventory, Version 2, National Utility Reference File (NURF). For non-utility units, the baseline is the NAPAP Emissions Inventory, Version 2. The Administrator may exclude periods during which a unit is shutdown for a continuous period of four months or longer.

"(2) For any other non-utility unit that is not included in the NAPAP Emissions Inventory, Version 2, the baseline shall be the annual average quantity, in mmBtu consumed in fuel by that unit, as calculated pursuant to a method which the administrator shall prescribe by regulation to be promulgated not later than eighteen months after enactment of the Clean Air Act Amendments of 1990.

"(3) CORRECTION OF DATA.—The Administrator shall, upon application or on his own motion, by December 31, 1991, correct any factual errors in data from which affected Phase II units' baselines or actural 1985 emission rates have been calculated. Corrected data shall be used for purposes of issuing allowances under the title. Such corrections shall not be subject to judicial review, nor shall the failure of the Administrator to correct an alleged factual error in such reports be subject to judicial review.

"(e) The term 'capacity factor' means the ratio between the actual electric output from a unit and the potential electric output from that unit.

"(f) The term 'compliance plan' means a plan submitted pursuant to section 408 describing how the source will comply with all applicable requirements under this title, including a schedule and description of the method or methods for compliance and certification by the owner or operator that the source is in compliance with the requirements of this title.

"(g) The term 'continuous emission monitoring system' (CEMS) means the equipment as required by section 412, used to sample, analyze, measure, and provide on a continuous basis a permanent record of emissions and flow (expressed in pounds per million British thermal units (lbs/mmBtu), pounds per hour (lbs/hr) or such other form as the Administrator may prescribe by regulations under section 412 of this title).

"(h) The term 'existing unit' means a unit (including units subject to section 111) that commenced commercial operation before the date of enactment of the Clean Air Act Amendments of 1990. Any unit that commenced commercial operation before the date of enactment of the Clean Air Act Amendments of 1990 which is modified, reconstructed, or repowered after the date of enactment of the Clean Air Act Amendments of 1990 shall continue to be deemed an existing unit for the purposes of this title. For the purposes of this title, existing units shall not include simple combustion turbines.

"(i) The term 'generator' means a device that produces electricity and which is reported as a generating unit pursuant to Department of Energy Form 860.

"(j) The term 'new unit' means a unit that commences commercial operation on or after the date of enactment of the Clean Air Act Amendments of 1990.

"(k) The term 'permitting authority' means the Administrator, or the State or local air pollution control agency, with an approved permitting program under part B of title III of the Act.

"(l) The term 'repowering' means replacement of an existing coal-fired boiler with one of the following clean coal technologies: atmospheric or pressurized fluidized bed combustion, integrated gasification combined cycle, magnetohydrodynamics, direct and indirect coal-fired turbines, integrated gasification fuel cells, or as determined by the Administrator, in consultation with the Secretary of Energy, a derivative of one or more of these technologies, and any other technology capable of controlling multiple combustion emissions simultaneously with improved boiler generation efficiency and with significantly greater solid waste reduction relative to the performance of technology in widespread commercial use as of the date of enactment of the Clean Air Act Amendments of 1990. For the purpose of this title, the term 'repowering' shall also include any oil and/or gas-fired unit which has been awarded clean coal technology demonstration funding as of January 1, 1991, by the Department of Energy.

"(m) The term 'reserve' means the bank of allowances established by the Administrator either under section 404(a)(2) or under section 405(a)(2).

"(n) The term 'State' means one of the forty-eight contiguous States and the District of Columbia.

"(o) The term 'unit' means a fossil fuel-fired combustion device.

"(p) The term 'actual 1985 emission rate', for electric utility units means the annual sulfur dioxide or nitrogen oxides emission rate in pounds per million Btu as reported in the NAPAP Emissions Inventory, Version 2, National Utility Reference File. For non-utility units, the term 'actual 1985 emission rate' means the annual sulfur dioxide or nitrogen oxides emission rate in pounds per million Btu as reported in the NAPAP Emission Inventory, Version 2.

"(q) The term 'utility unit' means a unit that serves a generator in any State that produces electricity for sale. For purposes of this title, a unit that cogenerates steam and electricity shall be considered a utility unit if the unit supplies more than one-third of its potential electric output capacity and more than twenty-five megawatts electrical output to any utility power distribution system for sale.

"(r) The term 'allowable 1985 emissions rate' means a federally enforceable emissions limitation for sulfur dioxide or oxides of nitrogen, applicable to the unit in 1985. Where the emissions limitation for a unit is not expressed in pounds of emissions per million Btu, or the averaging period of that emissions limitation is not expressed on an annual basis, the Administrator shall determine the annual equivalent of that emissions limitation to establish the allowable 1985 emissions rate.

"(s) The term 'qualifying phase I technology' means a technological system of continuous emission reduction which achieves a 90 per centum reduction in emissions of a pollutant from the emissions that would have resulted from the use of fuels which were not subject to treatment prior to combustion.

"(t) The term 'alternative method of compliance' means a method of compliance in accordance with one or more of the following authorities:

"(1) the purchase and use of allowances in addition to those allocated to a unit directly by the Administrator, at sale in accordance with section 403(a)(2);

"(2) the purchase and use of allowances in addition to those allocated to a unit directly by the Administrator, at auction in accordance with section 403(a)(3);

"(3) the use of transferred allowances held between allowance holders pursuant to section 403(b);

"(4) a substitution plan submitted and approved in accordance with subsections 404 (b) and (c);

"(5) a phase I extension plan approved by the Administrator under section 404(d), using qualifying phase I technology as determined by the Administrator in accordance with that section; or

"(6) repowering with a qualifying clean coal technology under section 409.

"(u) The term 'commenced' as applied to construction of any new electric utility unit means that an owner or operator has undertaken a continuous program of construction or that an owner or operator has entered into a contractual obligation to undertake and complete, within a reasonable time, a continuous program of construction.

"(v) The term 'commenced commercial operation' means to have begun to generate electricity for sale.

"(w) The term 'construction' means fabrication, erection, or installation of an affected unit.

"(x) The term 'industrial source' means a unit that does not serve a generator that produces electricity, a 'non-utility unit' as defined in this section, or a process source as defined in section 410(e).

"(y) The term 'non-utility unit' means a unit that serves a generator that produces electricity which sells no more than one-third of its potential electric output capacity and no more than twenty-five megawatts electrical output to any utility power distribution system.

"(z) The term 'designated representative' means a responsible person or official authorized by the owner or operator of a unit to represent the owner or operator in matters pertaining to the holding, transfer, or disposition of allowances allocated to a unit, and the submission of and compliance with permits, permit applications, and compliance plans for the unit.

"(aa) The term 'life-of-the-unit, firm power contractual arrangement' means a contractual arrangement under which a utility receives a specified amount or percentage of capacity and associated energy generated by a specified generating unit (or units) and pays its proportional amount of such unit's total costs, for the life of the unit.

"SULFUR DIOXIDE ALLOWANCE PROGRAM FOR EXISTING AND NEW UNITS

"SEC. 403. (a) ALLOCATIONS OF ANNUAL ALLOWANCES FOR EXISTING AND NEW UNITS.—(1) For the emission limitation programs under this title, the Administrator shall allocate annual allowances for the unit, to be held or distributed by the designated representative of the owner or operator of each affected unit at an affected source in accordance with this title, in an amount equal to the annual tonnage emission limitation calculated under section 404, 405, 406, 409, or 410 except as otherwise specifically provided elsewhere in this title. Except as provided in sections 405(a)(2) and 410, beginning January 1, 2000, the Administrator shall not allocate or issue annual allowances to emit sulfur dioxide pursuant to section 405 in such an amount as would result in total annual emissions of sulfur dioxide from utility units in excess of 8.90 million tons: *Provided,* That the Administrator shall not take into account unused allowances carried forward by owners and operators of affected units or by other persons holding such allowances, following the year for which they were issued. If necessary to meeting the restrictions imposed in the preceding sentence, the Administrator shall reduce, pro rata, the annual allowances allocated for each unit subject to the requirements of section 405, based on allowances allocated pursuant to subsections (b) (1), (3), (4) and (5); (c) (1), (2) and (3); (d)(4); (e); (f); (g) (1), (2) and (4); (h)(1) and (3); (i); (j); and the equivalent of the emissions limitation requirements of paragraphs (5) and (6) of subsection (d), of section 405. Subject to the provisions of paragraphs (2) and (3) of this subsection, the Administrator shall issue allowances for each affected unit at an affected source annually, as provided in paragraphs (2) and (3) and section 408. If an existing unit is, or would be, subject to the requirements of section 404, 405, or 406 is removed from operation after the date of enactment of the Clean Air Act Amendments of 1990, such removal from operation shall not affect the number of allowances allocated or issued for the unit annually as provided in section 408.

"(2)(A) FIXED PRICE SALE OF ALLOWANCES.—In accordance with the provisions of this paragraph, the Administrator, pursuant to regulations promulgated not later than eighteen months after the date of enactment of the Clean Air Act Amendments of 1990, shall offer and sell allowances, at a price of $1,500 per ton (adjusted for inflation to the date of payment based on the Consumer Price Index beginning on the date of enactment of the Clean Air Act Amendments of 1990 and annually thereafter) in accordance with regulations for the use of allowances pursuant to subsection (b). The number of allowances offered and sold under this paragraph that can become useable in any given calendar year shall not exceed one hundred thousand. The Administrator shall offer to sell the maximum number of allowances permitted under this subparagraph and shall complete such sales as provided further under this paragraph. No allowance offered and sold under this paragraph shall become useable (i) prior to the year 2000, and (ii) until two calendar years after the calendar year in which it has been offered.

"(B) Beginning ninety days after the promulgation of regulations and anytime thereafter, an applicant under this paragraph may submit an application or applications for the purchase of allowances. An applicant shall demonstrate that (i) the applicant is, or will be an owner or operator of a unit subject to subsection (e), and (ii) the applicant has entered into binding agreements to construct the unit for which the allowances are being sought or that the public service commission with jurisdiction over the unit has given its approval for the construction and operation of the unit. No applications may be: (i) for the purchase of more than the number of allowances needed to operate the unit, for which allowances are being sought, for a period of twenty years, or (ii) for the purchase of allowances that become useable in a given calendar year in an amount greater than the number of allowances needed to operate the unit, for which allowances are being sought, for a period of one year.

"(C) The Administrator shall approve or disapprove applications no later than ninety days after submission by the applicant. Notwithstanding the fact that the approval of applications may exhaust the supply of allowances available to subsequent applicants in a given year, the Administrator shall consider applications in order of submission and, subject to the restrictions of subparagraph (A), approve such applications if the requirements of subparagraph (B) are met. If an application that would otherwise be approved would exhaust the supply of allowances in a given year, the Administrator shall offer to sell only those allowances in the application that are still available to be offered. The Administrator shall calculate an estimated purchase price to the applicant according to subparagraph (A) and rules promulgated under this paragraph. Such estimated purchase price shall reflect the discounted present value of the payments that the applicant would otherwise make if it were to pay for the allowances applied for on a year-to-year basis, and shall provide for the use of a discount rate equal to an interest rate on short-term borrowing by the Department of the Treasury. Each applicant shall be required to pay earnest money equal to one half per centum of the estimated purchase price within six months of approval of the application. Upon the receipt of such payment the Administration shall issue to the applicant a letter certifying that the applicant is eligible to purchase allowances as specified in the approved application and stating that such eligibility shall expire one year and one day prior to the calendar year in which any of the allowances becomes useable. Within 90 days of receipt of such payment, the Administrator shall distribute such payment pro-rata to the owners or operators of affected units from whose allocations allowances may be deducted under subparagraph (D).

"(D) The Administrator shall promulgate regulations not later than thirty-six months after the date of enactment of the Clean Air Act Amendments of 1990 specifying: (i) one or more payment options (accounting for the earnest money paid for under subparagraph (C)) for purchase of allowances applied for under this paragraph, and (ii) methods by which an applicant can decrease, without penalty, the number of allowances purchased relative to the number of allowances applied for. Not later than one year and one day prior to the calendar year in which any of the allowances that have been reserved in accordance with an approved application become useable, the applicant who wishes to purchase such reserved allowances shall make a payment to the Administrator as specified in regulations promulgated under this subparagraph. If the applicant does not make such payment, the earnest money paid under subparagraph (C) shall be forfeited and the applicant's eligibility to purchase the allowances applied for shall expire. Following each payment specified in the regulations, the Administrator shall issue the allowances paid for to the approved applicant and on a pro-rata basis deduct, from the allowances allocated pursuant to subsections (b) (1), (3), (4), and (5); (c) (1), (2), and (3); (d)(4); (e); (f); (g) (1), (2) and (4); (h) (1) and (3); (i); (j) and the equivalent of the emissions limitations requirements of paragraphs (5) and (6) of subsection (d), of section 405 for the calendar year for which the purchased allowances are issued, allowances in an amount equal to the number of purchased allowances issued. The Administrator shall record the transfers of allowances as a result of each sale in accordance with the requirements of subsection (b). Within ninety days of the issuance of allowances, all funds collected as a result of the sale of such allowances under this paragraph shall be disbursed on a pro-rata basis to the owners or operators of the affected units from whose allocations the allowances are deducted. No funds transferred from a purchaser to the owners or operators of the affected units from whose allocations the allowances are deducted shall be treated for any purpose as revenue of the United States. Any allowances that are available for sale under this paragraph, and that remain unsold as of one year prior to the calendar year in which they become useable, shall be added to the allowances available for sale at auction under paragraph (3).

"(3)(A) ALLOWANCE AUCTION.—In accordance with the provisions of this paragraph, the Administrator shall conduct auctions of allowances no less than twice in each calendar year beginning in calendar year 1995 and in each year thereafter. In conducting such auctions the Administrator, in accordance with the requirements for the use of allowances pursuant to subsection (b), may sell both allowances which are useable in the calendar year in which an auction is held and allowances which are not useable until a specified calendar year following the auction: *Provided,* That—

"(i) no allowance sold in an auction under this paragraph shall be useable prior to the year 2000;

"(ii) except for allowances contributed under subparagraph (D) of this paragraph and allowances added under subparagraph (D) of paragraph (2), the total number of allowances sold in auctions under this paragraph that can become useable in any given calendar year shall not exceed one hundred thousand; and

"(iii) in each calendar year beginning with the year 2000, the number of allowances that have been previously sold at auction and that become useable in such year together with the number of allowances that are offered for sale at auction in such year and become useable in such year shall not be less than one hundred thousand.

In each auction the Administrator shall offer to sell long-term streams of allowances

consisting of allowances that are not useable until specified calendar years following the auction. Such long-term streams shall be sufficient to permit the operation of units that in the aggregate would use no less than seven thousand five hundred allowances per year for a period beginning no earlier than the calendar year following such auction and not less than fifteen years thereafter. Allowances not sold in long-term streams shall be offered no later than two years from the calendar year in which they become useable. Not later than thirty-six months after the enactment of the Clean Air Act Amendments of 1990, the Administrator, after consultation with the Secretary of the Treasury and the Chairman of the Federal Energy Regulatory Commission, shall promulgate regulations setting forth the method by which each auction shall be conducted. The regulations shall assure that the auction is open to any person who may hold allowances pursuant to this section and shall not require that a minimum price be met for the purchase of allowances. Allowances awarded at auction may be used for any purpose subject to the provisions of this title. Persons awarded allowances pursuant to each auction shall be required to pay a specified per centum of the total purchase price within a specified period of time subsequent to the date of award, as set forth in the regulations promulgated under this paragraph, except as otherwise provided in subparagraph (B). Upon the receipt of such payment the Administrator shall issue to the person a letter certifying that the person is eligible to purchase allowances as specified according to the bid and award and stating that such eligibility shall expire one year prior to the calendar year in which any of the allowances becomes useable. Within ninety days of receipt of such payment, the Administrator shall distribute such payment pro-rata to the owners or operators of affected units from whose allocations allowances may be deducted under subparagraph (B).

"(B) Not later than one year prior to the calendar year in which any of the allowances awarded to a person becomes useable, such person who wishes to purchase such awarded allowances shall pay to the Administrator the balance of the purchase price. In the case of an award of allowances in which one or more allowances are useable in the year of award, the person who wishes to purchase such allowances shall pay the full purchase price within a specified period of time less than a year after the award, as set forth in the regulations promulgated under this paragraph. If the person does not consummate a purchase, any amount previously paid shall be forfeited and the person's eligibility to purchase such allowances shall expire. The Administrator shall issue the auctioned allowances as purchased to the person and on a pro rata basis deduct, from the allowances allocated pursuant to subsections (b) (1), (3), (4), and (5); (c) (1), (2), and (3); (e); (f); (g) (1), (2), and (4); (h) (1) and (3); (i); (j) and the equivalent of the emissions limitation requirements of paragraphs (5) and (6) of subsection (d), of section 405 for the calendar year for which the purchased allowances are issued, allowances in an amount equal to the number of purchased allowances issued.

"(C) Within ninety days of the issuance of allowances, all funds collected as a result of the sale of allowances under this paragraph shall be disbursed to the owners or operators of the affected units from whose allocations the allowances are deducted. Such disbursement shall be on a pro-rata basis except with respect to proceeds from the sale of contributed allowances under subparagraph (D). No funds transferred from a purchaser to the owners or operators of the affected units from whose allocations the allowances are deducted shall be treated for any purpose as revenue of the United States. The Administrator shall make information publicly available concerning the nature, price, and results of each auction including the prices of successful bids and shall record the transfers of allowances as a result of each auction and purchase in accordance with the requirements of subsection (b).

"(D) Any holder of allowances may contribute to any auction allowances and shall receive the proceeds from the auction of such allowances. Allowances contributed for auction under this subparagraph may be useable in the calendar year in which an auction is held or may not be useable until a specified calendar year following the auction in accordance with the requirements for allowance use specified in subsection (b). Allowances that are contributed and sold shall be deducted from the allowances allocated to the owner or operator making the contribution. The holder of such allowances may specify a minimum sale price and time of payment provided that the Administrator finds that doing so would not interfere with the purposes and functioning of the auction.

"(4) The regulations promulgated under paragraphs (2) and (3) and the discretion exercised by the Administrator in conducting sales and auctions shall be consistent with the competitive functioning of a national market for allowances and preservation of competition in the electric power industry. Pursuant to rulemaking after public notice and comment the Administrator may at any time after the year 2001 decrease the number of allowances sold in, and modify other terms of, the sales and auctions provided under paragraphs (2) and (3) if the Administrator finds that such changes would be consistent with the competitive functioning of a national market for allowances and the preservation of competition in the electric power industry. Pursuant to the regulations the Administrator may by delegation or contract provide for the conduct of sales or auctions under the Administrator's supervision by other departments or agencies of the United States Government or by nongovernmental agencies, groups, or organizations.

"(b) ALLOWANCE TRANSFER SYSTEM.—Allowances issued under this title may be transferred among designated representatives of the owners or operators of affected sources under this title and any other person who lawfully holds such allowances, as provided by the allowance system regulations to be promulgated by the Administrator not later than eighteen months after the date of enactment of the Clean Air Act Amendments of 1990. Such regulations shall establish the allowance system prescribed under this section, including, but not limited to, requirements for the issuance, transfer, and use of allowances under this title. Such regulations shall prohibit the use of any allowance prior to the calendar year for which the allowance was issued, and shall provide, consistent with the purposes of this title, for the identification of unused allowances, and for such unused allowances to be carried forward and added to allowances allocated in subsequent years, including allowances issued to units subject to phase I requirements (as described in section 404) which are applied to emissions limitations requirements in phase II (as described in section 405). Transfers of allowances shall not be effective until written certification of the transfer, signed by a responsible official of each party to the transfer, is received and recorded by the Administrator. Such regulations shall permit the transfer of allowances prior to the issuance of such allowances. Recorded pre-issuance transfers shall be deducted by the Administrator from the number of allowances which would otherwise be issued to the transferor, and added to those allowances issued to the transferee. Pre-issuance transfers shall not affect the prohibition contained in this subsection against the use of allowances prior to the year for which they are issued.

"(c) INTERPOLLUTANT TRADING.—Not later than January 1, 1994, the Administrator shall furnish to the Congress a study evaluating the environmental and economic consequences of amending this title to permit trading sulfur dioxide allowances, for nitrogen oxides allowances.

"(d) ALLOWANCE TRACKING SYSTEM.—The Administrator shall promulgate, not later than eighteen months after the date of enactment of the Clean Air Act Amendments of 1990, a system for issuing, recording, and tracking allowances, which shall specify all necessary procedures and requirements for an orderly and competitive functioning of the allowance system. All allowance allocations and transfers shall, upon recordation by the Administrator, be deemed a part of each unit's permit requirements pursuant to section 408, without any further permit review and revision. If the Administrator determines that the use of a code that prescribes safety standards for equipment design, procedures, and systems developed by a professional organization or entity (including the American National Standards Institute and the American Society of Mechanical Engineers) is appropriate, the Administrator shall require the use of such code.

"(e) NEW UTILITY UNITS.—After January 1, 2000, it shall be unlawful for a new utility unit to emit an annual tonnage of sulfur dioxide in excess of the number of allowances to emit held for the unit by the unit's owner or operator. Such new utility units shall not be eligible for an allocation of sulfur dioxide allowances under subsection (a)(1), unless the unit is subject to the provisions of subsection (g) (2) or (3) of section 405. New utility units may obtain allowances from any unit allocated allowances under this title. The owner or operator of any new utility unit in violation of this subsection shall be liable for fulfilling the obligations specified in section 411 of this title.

"(f) NATURE OF ALLOWANCES.—An allowance issued under this title is a limited authorization to emit sulfur dioxide or nitrogen oxides in accordance with the provisions of this title. Such allowance may be limited, revoked, or otherwise modified in accordance with the provisions of this title or other authority of the Administrator. Such allowance does not constitute a property right.

"(g) PROHIBITION.—It shall be unlawful for any person to hold, use, or transfer any allowance issued under this title, except in accordance with regulations issued by the Administrator. It shall be unlawful for any affected unit to emit sulfur dioxide in excess of the number of allowances held for use for that unit for that year by the owner or operator of the unit. Allowances may not

be used prior to the calendar year for which they were issued. Nothing in this section or in the allowance system regulations shall relieve the Administrator of the Administrator's permitting, monitoring and enforcement obligations under this Act, nor relieve affected sources of their requirements and liabilities under this Act.

"(h) Nothing in this title shall be construed to interfere with or impair any program for competitive bidding for power supply in a State in which such program is established.

"(i) APPLICABILITY OF THE ANTITRUST LAWS.—

"(1) Nothing in this section affects—

"(A) the applicability of the antitrust laws to the transfer, use, or sale of allowances, or

"(B) the authority of the Federal Energy Regulatory Commission under any provision of law respecting unfair methods of competition or anticompetitive acts or practices.

"(2) As used in this section, 'antitrust laws' means those Acts set forth in section 1 of the Clayton Act (15 U.S.C. 12), as amended.

"PHASE I SULFUR DIOXIDE REQUIREMENTS

"SEC. 404. (a) EMISSION LIMITATIONS.—(1) After January 1, 1995, each source that includes one or more affected units listed in table A is an affected source under this section. After January 1, 1995, it shall be unlawful for any affected unit (other than an eligible phase I unit under section 404(d)(2)) to emit sulfur dioxide in excess of the tonnage limitation stated as a total number of allowances in table A for phase I, unless (i) the emissions reduction requirements applicable to such unit have been achieved pursuant to subsection (b) or (d), or (ii) the owner or operator of such unit holds for use allowances to emit not less than the unit's total annual emissions. The owner or operator of any unit in violation of this section shall be fully liable for such violation including, but not limited to, liability for fulfilling the obligations specified in section 411 of this title.

"(2) Not later than December 31, 1991, the Administrator shall determine the total tonnage of reductions in the emissions of sulfur dioxide from all utility units in calendar year 1995 that will occur as a result of compliance with the emissions limitation requirements of this section, and shall establish a reserve of allowances equal in amount to the number of tons determined thereby not to exceed a total of 3.50 million tons. In making such a determination, the Administrator shall compute for each unit subject to the emissions limitation requirements of this section the difference between: (A) the product of its baseline multiplied by the lesser of each unit's allowable 1985 emissions rate and its actual 1985 emissions rate, divided by 2,000, and (B) the product of each unit's baseline multiplied by 2.50 lbs/mmBtu divided by 2,000, and sum the computations. The Administrator shall adjust the foregoing calculation to reflect projected calendar year 1995 utilization of the units subject to the emissions limitations of this section that the Administrator finds would have occurred in the absence of the imposition of such requirements. Not later than June 1, 1996, the Administrator shall adjust, if necessary, the number of allowances remaining in the reserve to reflect the actual emissions reductions achieved by such units during calendar year 1995 as measured by CEMS pursuant to section 412. Such an adjustment shall be deemed necessary if the sum of the reductions actually achieved in calendar year 1995 and the number of allowances issued from the reserve, created pursuant to this paragraph, in calendar year 1995 to eligible phase I extension units pursuant to subsection (d) does not equal the reductions projected by the Administrator for calendar year 1995. In making any such adjustment, the Administrator shall take into account, inter alia, whether emissions reductions achieved by any unit subject to the requirements of this section resulted from reduced utilization of the unit as compared with its baseline or from shutting the unit down and whether additional emissions of sulfur dioxide from units not subject to the emissions limitations of this section occurred as a result of those units' provision of electrical generation to compensate for the reduced output resulting from any affected unit's reduced utilization or shutdown. Pursuant to subsection (d), the Administrator shall issue allowances from the reserve established hereinunder until the earlier of such time as all such allowances in the reserve are issued or December 31, 1999.

"(b) SUBSTITUTIONS.—The owner or operator of an affected unit under subsection (a) may include in its section 408 permit application and proposed compliance plan a proposal to reassign, in whole or in part, the affected unit's sulfur dioxide reduction requirements to any other unit(s) under the control of such owner or operator. Such proposal shall specify—

"(1) the designation of the substitute unit or units to which any part of the reduction obligations of subsection (a) shall be required, in addition to, or in lieu of, any original affected units designated under such subsection;

"(2) the original affected unit's baseline, the actual and allowable 1985 emissions rate for sulfur dioxide, and the authorized annual allowance allocation stated in table A;

"(3) calculation of the annual average tonnage for calendar years 1985, 1986, and 1987, the substitute unit or units, based on the baseline for each unit, as defined in section 402(d), multiplied by the lesser of the unit's allowable 1985 emissions rate;

"(4) the emissions rates and tonnage limitations that would be applicable to the original and substitute affected units under the substitution proposal;

"(5) documentation, to the satisfaction of the Administrator, that the reassigned tonnage limits will, in total, achieve the same or greater emissions reduction than would have been achieved by the original affected unit and the substitute unit or units without such substitution; and

"(6) such other information as the Administrator may require.

"(c) ADMINISTRATOR'S ACTION ON SUBSTITUTION PROPOSALS.—

"(1) The Administrator shall take final action on such substitution proposal in accordance with section 408(c): *Provided*, That the substitution proposal fulfills the requirements of this subsection. The Administrator may approve a substitution proposal in whole or in part and with such modifications or conditions as may be consistent with the orderly functioning of the allowance system and which will ensure the emissions reductions contemplated by this title. If a proposal does not meet the requirements of subsection (b), the Administrator shall disapprove it. The owner or operator of a unit listed in table A shall not substitute another unit or units without the prior approval of the Administrator.

"(2) Upon approval of a substitution proposal, each substitute unit, and each source with such unit, shall be deemed affected under this title, and the Administrator shall issue a permit to the original and substitute affected source and unit in accordance with the approved substitution plan and section 408. The Administrator shall allocate allowances for the original and substitute affected units in accordance with the approved substitution proposal pursuant to section 403. It shall be unlawful for any source or unit that is allocated allowances pursuant to this section to emit sulfur dioxide in excess of the emissions limitation provided for in the approved substitution permit and plan unless the owner or operator of each unit governed by the permit and approved substitution plan holds for use allowances to emit not less than the units total annual emissions. The owner or operator of any original or substitute affected unit operated in violation of this subsection shall be fully liable for such violation, including liability for fulfilling the obligations specified in section 411 of this title. If a substitution proposal is disapproved, the Administrator shall issue allowances to the original affected unit or units in accordance with subsection (a).

"(d) ELIGIBLE PHASE I EXTENSION UNITS.—(1) The owner or operator of any affected unit subject to an emissions limitation requirement under this section may petition the Administrator in its permit application under section 408 for an extension of two years of the deadline for meeting such requirement, provided that the owner or operator of any such unit holds for use allowances to emit not less than the unit's total annual emissions for each of the two years of the period of extension. To qualify for such an extension, the affected unit must either employ a qualifying phase I technology, or transfer its phase I emissions reduction obligation to a unit employing a qualifying phase I technology. Such transfer shall be accomplished in accordance with a compliance plan, submitted and approved under section 408, that shall govern operations at all units included in the transfer, and that specifies the emissions reduction requirements imposed pursuant to this title.

"(2) Such extension proposal shall—

"(A) specify the unit or units proposed for designation as an eligible phase I extension unit;

"(B) provide an executed contract, which may be contingent upon the Administrator approving the proposal, for the design engineering, and construction of the qualifying phase I technology for the extension unit, or for the unit or units to which the extension unit's emission reduction obligation is to be transferred;

"(C) specify the unit's or units' baseline, actual 1985 emissions rate, allowable 1985 emissions rate, and projected utilization for calendar years 1995 through 1999;

"(D) require CEMS on both the eligible phase I extension unit or units and the transfer unit or units beginning no later than January 1, 1995; and

"(E) specify the emission limitation and number of allowances expected to be necessary for annual operation after the qualifying phase I technology has been installed.

"(3) The Administrator shall review and take final action on each extension proposal in order of receipt, consistent with section 408, and for an approved proposal shall designate the unit or units as an eligible phase I extension unit. The Administrator may approve an extension proposal in whole or in part, and with such modifications or conditions as may be necessary, consistent with

the orderly functioning of the allowance system, and to ensure the emissions reductions contemplated by the title.

"(4) In order to determine the number of proposals eligible for allocations from the reserve and the number of allowances remaining available after each proposal is acted upon, the Administrator shall reduce the total number of allowances remaining available in the reserve by the number of allowances calculated according to subparagraphs (A), (B) and (C) until either no allowances remain available in the reserve for further allocation or all approved proposals have been acted upon. If no allowances remain available in the reserve for further allocation before all proposals have been acted upon by the Administrator, any pending proposals shall be disapproved. The Administrator shall calculate allowances equal to—

"(A) the difference between the lesser of the average annual emissions in calendar years 1988 and 1989 or the projected emissions tonnage for calendar year 1995 of each eligible phase I extension unit, as designated under paragraph (3), and the product of the unit's baseline multiplied by an emission rate of 2.50 lbs/mmBtu, divided by 2,000;

"(B) the difference between the lesser of the average annual emissions in calendar years 1988 and 1989 or the projected emissions tonnage for calendar year 1996 of each eligible phase I extension unit, as designated under paragraph (3), and the product of the unit's baseline multiplied by an emission rate of 2.50 lbs/mmBtu, divided by 2,000; and

"(C) the difference between the product of each unit's baseline multiplied by an emission rate of 1.20 lbs/mmBtu, divided by 2,000, and the tonnage level specified under subparagraph (E) of paragraph (2) of this subsection multiplied by a factor of 3.

"(5) Each eligible phase I extension unit shall receive allowances determined under subsection (a)(1) or (c) of this section. In addition, in calendar year 1995, the Administrator shall issue to each eligible phase I extension unit, from the allowance reserve created pursuant to subsection (a)(2), allowances equal to the difference between the lesser of the average annual emissions in calendar years 1988 and 1989 or its projected emissions tonnage for calendar year 1995 and the product of the unit's baseline multiplied by an emission rate of 2.50 lbs/mmBtu, divided by 2,000. In calendar year 1996, the Administrator shall issue to each eligible unit, from the allowance reserve created pursuant to subsection (a)(2), allowances equal to the difference between the lesser of the average annual emissions in calendar years 1988 and 1989 or its projected emissions tonnage for calendar year 1996 and the product of the unit's baseline multiplied by an emission rate of 2.50 lbs/mmBtu, divided by 2,000. It shall be unlawful for any source or unit subject to an approved extension plan under this subsection to emit sulfur dioxide in excess of the emissions limitations provided for in the permit and approved extension plan, unless the owner or operator of each unit governed by the permit and approved plan holds for use allowances to emit not less than the unit's total annual emissions.

"(6) In addition to allowances specified in paragraph (5), the Administrator shall issue to the owner or operator of each eligible phase I extension unit employing qualifying phase I technology, for calendar years 1997, 1998, and 1999, additional allowances, from any remaining allowances in the reserve created pursuant to subsection (a)(2), following the reduction provided for in paragraph (4), not to exceed the difference between (A) the product of each eligible unit's baseline times an emission rate of 1.20 lbs/mmBtu, divided by 2,000, and (B) the tonnage level specified under subparagraph (D) of paragraph (2) of this subsection. However, the number of allowances issued shall be reduced, on a pro rata basis, as the result of any adjustment by the Administrator's June 1, 1996 recalculation of the level of the reserve under subsection (a)(2) of this section.

"(7) After January 1, 1997, in addition to any liability under this Act, including under section 411, if any eligible phase I extension unit employing qualifying phase I technology or any transfer unit under this subsection emits sulfur dioxide in excess of the annual tonnage limitation specified in the extension plan, as approved in paragraph (3) of this subsection, the Administrator shall, in the calendar year following such excess, deduct allowances equal to the amount of such excess from such unit's annual allowance allocation.

"(e) RENEWABLE ENERGY TECHNOLOGY RESERVE.—(1) Notwithstanding any other provision of law, beginning on January 1, 1995, the Administrator may allocate from a Renewable Energy Technology Reserve a tonnage amount equal to a total of 80,000 tons of allowances for emissions of sulfur dioxide pursuant to section 403, in an annual amount to be determined by the Administrator subject to paragraph (2) to owners or operators of affected units at affected sources. Such allowances shall be allocated to an owner or operator described in this subparagraph in an amount calculated pursuant to paragraph (2) if, beginning on January 1, 1991, such owner or operator—

"(A) generates electricity at a new renewable energy power plant (as defined in paragraph (4)); or

"(B) purchases electric energy generated at a new renewable energy power plant owned or operated by any person other than the owner or operator of an affected source.

"(2) The Administrator shall allocate annual allowances from the Renewable Energy Technology Reserve pursuant to paragraph (1) as follows:

"(A) Any annual allowance allocated under this subparagraph shall be allocated in a tonnage amount equal to the number of kilowatt hours generated or purchased by the owner or operator (as described in paragraph (1)), multiplied by the emissions rate of the lowest emitting coal- or oil-fired unit of the operating company applying for the allowance (as defined by the Administrator in concurrence with the Secretary of Energy, and excluding any oil- and gas-fired unit with an average annual fuel consumption for calendar year 1985 that, on a Btu basis, exceeded 90 per centum consumption in the form of natural gas), divided by 2,000. (The product of such calculation shall be divided by one hundred to reflect the conversion rate between Btu's and kilowatt hours, assuming a heat transfer of ten thousand Btu's per kilowatt hour).

"(B) Allowances allocated under this paragraph shall be allocated in accordance with the order of receipt of applications for such allowances.

"(3) Beginning on January 1, 2000, the Administrator shall deduct an tonnage amount equal to eight thousand tons per year for a period of ten years from the annual allocation of allowances for units subject to requirements of section 405 on a pro rata basis. Such allowances shall be deposited in the Renewable Energy Technology Reserve. The pro rata share for each such unit shall be calculated on the basis of the allowances that would be allocated pursuant to subsections (b)(1), (3), (4), and (5); (c)(1), (2), and (3); (d)(4); (e); (f); (g)(1), (2), and (4); (h)(1) and (3); (i); (j) and the equivalent of the emissions limitations requirements of paragraphs (5) and (6), of subsection (d); of section 405.

"(4) As used in this subsection, the term 'new renewable energy power plant' means a power plant for which construction is initiated on or after January 1, 1991, or which realizes a significant increase in energy output (as defined and determined by the Administrator, in concurrence with the Secretary of Energy) attributable to the replacement of renewable energy equipment (as defined and determined by the Administrator, in concurrence with the Secretary of Energy) installed prior to January 1, 1991, by more efficient of productive renewable energy equipment (as determined by the Administrator in concurrence with the Secretary of Energy), and that operates primarily on energy derived from—

"(A) solar sources;

"(B) geothermal sources;

"(C) biomass sources; or

"(D) wind sources.

"(f) APPLICATION FOR ALLOWANCES FROM THE RENEWABLE ENERGY TECHNOLOGY RESERVE.—The owner or operator of an affected unit under subsection (a) may submit an application to the Administrator at any time after January 1, 1991, for allowances from the Renewable Energy Technology Reserve to be calculated using the formula described in subparagraph (A) of subsection (e)(2). Such application shall include—

"(1) the number of kilowatt hours the affected units generated or purchased from a new renewable energy power plant as defined in subsection (e)(4); and

"(2) documentation of kilowatt hours generated or purchased as recorded in a certified meter reading from the point of entry into the utility grid, or in an executed sales contract.

"(g) ACTION BY ADMINISTRATOR.—(1) The Administrator, in consultation with the Secretary of Energy, shall approve or disapprove an application submitted pursuant to subsection (f) not later than six months after receipt of the application. If an application proposal does not meet the require-

ments of subsection (f), the Administrator shall disapprove the application.

"(2) If the Administrator approves an application submitted pursuant to subsection (f), the Administrator shall notify the applicant in writing of the number of allowances to be received pursuant to this paragraph. On or after January 1, 1995, the Administrator shall allocate allowances for the affected units in accordance with the amount specified in the written notification described in this subparagraph, upon written request by the owner or operator of the affected units at the affected source.

"PHASE II SULFUR DIOXIDE REQUIREMENTS

"SEC. 405. (a) APPLICABILITY.—(1) After January 1, 2000, each steam-electric existing utility unit as provided below is subject to the limitations or requirements of this section. Each utility unit subject to an annual sulfur dioxide tonnage emission limitation under this section is an affected unit under this title. Each source that includes one or more affected units is an affected source. In the case of an existing unit that was not in operation during calendar year 1985, the emission rate for a calendar year after 1985, as determined by the Administrator, shall be used in lieu of the 1985 rate. The owner or operator of any unit operated in violation of this section shall be fully liable under this Act for fulfilling the obligations specified in section 411 of this title.

"(2) Following the issuance of permits pursuant to section 408 to the owners or operators of units subject to the emissions limitation requirements of this section, the Administrator shall calculate the total tonnage of reductions in the emissions of sulfur dioxide from all utility units in calendar year 2000, achieved as result of compliance by units subject to this section with the emissions limitation requirements of subsections (b) (1), (3), (4), and (5); (c) (1), (2), and (3); (d)(4); (e); (f); (g) (1), (2), and (4); (h) (1) and (3); (i); (j); and the equivalent of the emissions limitation requirements of paragraphs (5) and (6) of subsection (d). In calculating such reductions the Administrator shall compute for each unit subject to the emissions limitation requirements of section 404 the difference between: (A) the product of each unit's baseline multiplied by 2.50 lbs/mmBtu divided by 2,000, and (B) the product of each unit's baseline multiplied by 1.20 lbs/mmBtu, divided by 2,000. For each unit not subject to section 404, but subject to the emissions limitation requirements of subsections (b) and (c) of this section, except for those units granted an extension pursuant to section 409, the Administrator shall compute the difference between: (A) the product of each unit's baseline multiplied by the lesser of its allowable 1985 emissions rate and its actual 1985 emissions rate, divided by 2,000, and (B) the product of each unit's baseline multiplied by 1.20 lbs/mmBtu, divided by 2,000, and sum the computations. The Administrator shall adjust the foregoing calculation to reflect the utilization of such plants that the Administrator finds would have occurred in the absence of the imposition of emissions limitation requirements. The Administrator shall establish a reserve of allowances equal in number to the tons so calculated and adjusted to reflect the actual emissions reductions achieved during calendar year 2000, as measured by CEMS pursuant to section 412, up to a limit of 5.30 million allowances. If the Administrator determines that the total of actual emissions reductions achieved in calendar year 2000 is less than 5.30 million tons, the Administrator shall deduct from each unit's annual allocation its pro rata share of 10 per centum of the difference between 5.30 million tons and actual emissions reductions achieved in calendar year 2000. Each unit's pro rata share shall be calculated on the basis of allowances that would be allocated in subsections (b) (1), (3), (4), and (5); (c) (1), (2), and (3); (d)(4); (e); (f); (g) (1), (2), and (4); (h) (1) and (3); (i); (j); and the equivalent of the emissions limitation requirements of paragraphs (5) and (6) of subsection (d). Notwithstanding any other provision of this paragraph, pursuant to section 403, subsections (b)(2), (c)(3), (d)(3) (A), and (B), (g)(3), (h)(2) of this section, and section 406(a), the Administrator shall issue annually 530,000 allowances from the reserve established hereunder for calendar years 2000 through 2009.

"(b) UNITS EQUAL TO, OR ABOVE, 75 MWE AND 1.20 LBS/MMBTU.—(1) Except as otherwise provided in paragraph (3), after January 1, 2000, it shall be unlawful for any existing utility unit that serves a generator with nameplate capacity equal to, or greater, than 75 MWe and an actual 1985 emission rate equal to or greater than 1.20 lbs/mmBtu (excluding units subject to section 111 of the Act or to a federally enforceable emissions limitation for sulfur dioxide equivalent to an annual rate of less than 1.20 lbs/mmBtu) to exceed an annual sulfur dioxide tonnage emission limitation equal to the product of the unit's baseline multiplied by an emission rate equal to 1.20 lbs/mmBtu, divided by 2,000, unless the owner or operator of such unit holds for use allowances to emit not less than the unit's total annual emissions.

"(2) After January 1, 2000, the Administrator shall allocate and issue annually for each unit subject to the emissions limitation requirements of paragraph (1) with an actual 1985 emissions rate greater than 1.20 lbs/mmBtu and less than 2.50 lbs/mmBtu and a baseline capacity factor of less than 60 per centum, allowances from the reserve created pursuant to subsection (a)(2) in an amount equal to 1.20 lbs/mmBtu multiplied by 50 per centum of the difference, on a Btu basis, between the unit's baseline and the unit's fuel consumption at a 60 per centum capacity factor.

"(3) After January 1, 2000, it shall be unlawful for any existing utility unit with an actual 1985 emissions rate equal to or greater than 1.20 lbs/mmBtu whose annual average fuel consumption during 1985, 1986, and 1987 on a Btu basis exceeded 90 per centum in the form of lignite coal which is located in a State in which, as of July 1, 1989, no county or portion of a county was designated non-attainment under section 107 of this Act for any pollutant subject to the requirements of section 109 of this Act to exceed an annual sulfur dioxide tonnage limitation equal to the product of the unit's baseline multiplied by the lesser of the unit's actual 1985 emissions rate or its allowable 1985 emissions rate, divided by 2,000, unless the owner or operator of such unit holds allowances to emit not less than the unit's total annual emissions.

"(4) After January 1, 2000, the Administrator shall allocate and issue annually for each unit subject to the emissions limitation requirements of paragraph (1) for which was issued a prohibition order or a proposed prohibition order (from burning oil), which unit subsequently converted to coal between January 1, 1980 and December 31, 1985, allowances equal to the difference between (A) the product of the unit's annual fuel consumption, on a Btu basis, at a 65 per centum capacity factor multiplied by the lesser of its actual or allowable emissions rate during the first full calendar year after conversion, divided by 2,000, and (B) the number of allowances allocated for the unit pursuant to paragraph (1): *Provided*, That the number of allowances allocated and issued pursuant to this paragraph shall not exceed an annual total of five thousand. If necessary to meeting the restriction imposed in the preceding sentence the Administrator shall reduce, pro rata, the annual allowances allocated and issued for each unit under this paragraph.

"(c) COAL OR OIL-FIRED UNITS BELOW 75 MWE AND ABOVE 1.20 LBS/MMBTU.—

"(1) Except as otherwise provided in paragraph (3), after January 1, 2000, it shall be unlawful for a coal or oil-fired existing utility unit that serves a generator with nameplate capacity of less than 75 MWe and an actual 1985 emission rate equal to, or greater than, 1.20 lbs/mmBtu (excluding units subject to section 111 of the Act or to a federally enforceable emissions limitation for sulfur dioxide equivalent to an annual rate of less than 1.20 lbs/mmBtu) and which is a unit owned by a utility operating company whose aggregate nameplate fossil fuel steam-electric capacity is equal to, or greater than, 250 MWe to exceed an annual sulfur dioxide emissions limitation equal to the product of the unit's baseline multiplied by an emission rate equal to 1.20 lbs/mmBtu, divided by 2,000, unless the owner or operator of such unit holds allowances to emit not less than the unit's total annual emissions.

"(2) After January 1, 2000, it shall be unlawful for a coal or oil-fired existing utility unit that serves a generator with nameplate capacity of less than 75 MWe and an actual 1985 emission rate equal to, or greater than, 1.20 lbs/mmBtu (excluding units subject to section 111 of the Act or to a federally enforceable emissions limitation for sulfur dioxide equivalent to an annual rate of less than 1.20 lbs/mmBtu) and which is a unit owned by a utility operating company whose aggregate nameplate fossil fuel steam-electric capacity is less than 250 MWe to exceed an annual sulfur dioxide tonnage emissions limitation equal to the product of the unit's baseline multiplied by the lesser of its actual 1985 emissions rate or its allowable 1985 emissions rate, divided by 2,000, unless the owner or operator of such unit holds for use allowances to emit not less than the unit's total annual emissions.

"(3) After January 1, 2000, it shall be unlawful for any existing utility unit with a nameplate capacity below 75 MWe and an actual 1985 emissions rate equal to, or greater than, 1.20 lbs/mmBtu which became operational on or before December 31, 1965, which is owned by a utility operating company with a total fossil fuel steam-electric generating capacity greater than 250 MWe and less than 450 MWe which serves fewer than 78,000 electrical customers as of the date of enactment of the Clean Air Act Amendments of 1990 to exceed an annual sulfur dioxide emissions tonnage limitation equal to the product of its baseline multiplied by the lesser of its actual or allowable 1985 emission rate, divided by 2,000, unless the owner or operator holds for use allowances to emit not less than the units total annual emissions. After January 1, 2010, it shall be unlawful for each unit subject to the emissions limitation requirements of this paragraph to exceed an annual emissions tonnage limitation equal to the product of its baseline multiplied by an emis-

sions rate of 1.20 lbs/mmBtu, divided by 2,000, unless the owner or operator holds for use allowances to emit not less than the unit's total annual emissions.

"(4) After January 1, 2000, the Administrator shall allocate and issue annually for each unit subject to the emissions limitation requirements of paragraph (1) with an actual 1985 emissions rate equal to, or greater than, 1.20 lbs/mmBtu and less than 2.50 lbs/mmBtu and a baseline capacity factor of less than 60 per centum, allowances from the reserve created pursuant to subsection (a)(2) in an amount equal to 1.20 lbs/mmBtu multiplied by 50 per centum of the difference, on a Btu basis, between the unit's baseline and the unit's fuel consumption at a 60 per centum capacity factor.

"(d) COAL-FIRED UNITS BELOW 1.20 LBS/MMBTU.—

"(1) After January 1, 2000, it shall be unlawful for any coal-fired utility unit the lesser of whose actual or allowable 1985 sulfur dioxide emissions rate is less than 0.60 lbs/mmBtu to exceed an annual sulfur dioxide tonnage emission limitation equal to the product of the unit's baseline multiplied by the lesser of 0.60 lbs/mmBtu or the unit's allowable 1985 emissions rate, divided by 2,000, unless the owner or operator of such unit holds for use allowances to emit not less than the unit's total annual emissions.

"(2) After January 1, 2000, it shall be unlawful for any coal-fired utility unit the lesser of whose actual or allowable 1985 sulfur dioxide emissions rate is equal to, or greater than, 0.60 lbs/mmBtu and less than 1.20 lbs/mmBtu to exceed an annual sulfur dioxide tonnage emissions limitation equal to the product of the unit's baseline multiplied by the lesser of its actual 1985 emissions rate or its allowable 1985 emissions rate, divided by 2,000, unless the owner or operator of such unit holds for use allowances to emit not less than the unit's total annual emissions.

"(3)(A) At the election of an operating company, after January 1, 2000, the Administrator shall allocate and issue annually for each unit subject to the emissions limitation requirements of paragraph (1), allowances in an amount equal to either (i) the product of the lesser of 0.60 lbs/mmBtu or the unit's allowable 1985 emissions rate multiplied by the difference, on a Btu basis, between the unit's baseline and its fuel consumption at a 60 per centum capacity factor, or (ii) 20 per centum of the allowances allocated for the unit pursuant to paragraph (1) and section 403. Allocations made pursuant to clause (i) shall include allowances subject to the restrictions imposed pursuant to section 403(a)(1) as well as allowances from the reserve created pursuant to subsection (a)(2) of this section.

"(B) At the election of the operating company, after January 1, 2000, the Administrator shall allocate and issue annually for each unit subject to the emissions limitation requirements of paragraph (2), allowances in an amount equal to either (i) the product of the lesser of the unit's allowable 1985 emissions rate or its actual 1985 emissions rate multiplied by the difference, on a Btu basis, between the unit's baseline and its fuel consumption at a 60 per centum capacity factor, divided by 2,000, or (ii) 20 per centum of the allowances allocated for the unit pursuant to paragraph (2) and section 403. Allocations made pursuant to clause (i) shall include allowances subject to the restrictions imposed pursuant to section 403(a)(1) as well as allowances from the reserve created pursuant to subsection (a)(2) of this section.

"(C) An operating company with units subject to the emissions limitation requirements of this subsection may elect only one formula for the allocation of allowances as provided under subparagraphs (A) and (B), which elected formula shall apply to the annual allowance allocation for each and every unit in the operating company subject to the emissions limitation requirements of this subsection. The Administrator shall issue allowances pursuant to subparagraphs (A) and (B) only in accordance with this subparagraph.

"(4) Notwithstanding any other provision of this section, at the election of the owner or operator, after January 1, 2000, the Administrator shall allocate and issue in lieu of allocation, pursuant to paragraph (1), (2), (3), (5), or (6), allowances for a unit subject to the emissions limitation requirements of this subsection which commenced commercial operation on or after January 1, 1981 and before December 31, 1985, which was subject to, and in compliance with, section 111 of the Act in an amount equal to the unit's annual fuel consumption, on a Btu basis, at a 65 per centum capacity factor multiplied by the unit's allowable 1985 emissions rate, divided by 2000.

"(5) After January 1, 2010, it shall be unlawful for any coal-fired utility unit the lesser of whose actual or allowable 1985 sulfur dioxide emissions rate of less than 0.60 lbs/mmBtu to exceed an annual sulfur dioxide tonnage emission limitation equal to the product of the unit's baseline multiplied by the lesser of 0.60 lbs/mmBtu or the unit's allowable 1985 emissions rate and a numerical factor of 120 per centum, divided by 2,000, unless the owner or operator of such unit holds for use allowances to emit not less than the unit's total annual emissions.

"(6) After January 1, 2010, it shall be unlawful for any coal-fired utility unit the lesser of whose actual or allowable 1985 sulfur dioxide emissions rate is equal to, or greater than, 0.60 lbs/mmBtu and less than 1.20 lbs/mmBtu to exceed an annual sulfur dioxide tonnage emissions limitation equal to the product of the unit's baseline multiplied by the lesser of its actual 1985 emissions rate or its allowable 1985 emissions rate and a numerical factor of 120 per centum, divided by 2,000, unless the owner or operator of such unit holds for use allowances to emit not less than the unit's total annual emissions.

"(7) For the purposes of this section, in the case of an oil- and gas-fired unit which has been awarded a clean coal technology demonstration grant as of January 1, 1991, by the United States Department of Energy, such unit may use any three consecutive years between 1980 and 1989 in calculating its baseline, as defined in section 402(d)(1).

"(e) OIL AND GAS-FIRED UNITS EQUAL TO OR GREATER THAN 0.60 LBS/MMBTU AND LESS THAN 1.20 LBS/MMBTU.—After January 1, 2000, it shall be unlawful for any oil and gas-fired utility unit the lesser of whose actual or allowable 1985 sulfur dioxide emission rate is equal to, or greater than, 0.60 lbs/mmBtu, but less than 1.20 lbs/mmBtu to exceed an annual sulfur dioxide tonnage limitation equal to the product of the unit's baseline multiplied by the lesser of the unit's allowable 1985 emissions rate or its actual 1985 emissions rate and a numerical factor of 120 per centum divided by 2,000, unless the owner or operator of such unit holds for use allowances to emit not less than the unit's total annual emissions.

"(f) OIL AND GAS-FIRED UNITS LESS THAN 0.60 LBS/MMBTU.—After January 1, 2000, it shall be unlawful for any oil and gas-fired utility unit the lesser of whose actual or allowable 1985 emission rate is less than 0.60 lbs/mmBtu and whose average annual fuel consumption during 1985, 1986, and 1987 on a Btu basis was 90 per centum or less in the form of natural gas to exceed an annual sulfur dioxide tonnage emissions limitation equal to the product of the unit's baseline multiplied by the lesser of 0.60 lbs/mmBtu or the unit's allowable 1985 emissions and a numerical factor of 120 per centum, divided by 2,000, unless the owner or operator of such unit holds for use allowances to emit not less than the unit's total annual emissions.

"(g) UNITS THAT COMMENCE OPERATION BETWEEN 1985 AND DECEMBER 31, 1995.—(1) After January 1, 2000, it shall be unlawful for any utility unit that has commenced commercial operation on or after January 1, 1985, but not later than September 30, 1990 to exceed an annual sulfur dioxide tonnage emission limitation equal to the product of the unit's annual fuel consumption, on a Btu basis, at a 65 per centum capacity factor multiplied by the unit's allowable sulfur dioxide emission rate (converted, if necessary, to pounds per mmBtu), divided by 2,000 unless the owner or operator of such unit holds for use allowances to emit not less than the unit's total annual emissions.

"(2) After January 1, 2000, the Administrator shall allocate and issue to the owner or operator of any utility unit that commences commercial operation, or has commenced commercial operation, on or after October 1, 1990, but not later than December 31, 1992 allowances in an amount equal to the product of the unit's annual fuel consumption, on a Btu basis, at a 65 per centum capacity factor multiplied by the lesser of 0.30 lbs/mmBtu or the unit's allowable sulfur dioxide emission rate (converted, if necessary, to pounds per mmBtu), divided by 2,000: *Provided,* That after January 1, 2000, the Administrator shall allocate and issue for each unit with a nameplate capacity equal to, or greater than, 1,000 MWe that commences, or has commenced commercial operation, on or after October 1, 1990, but not later than June 30, 1991, allowances in an amount equal to the product of the unit's annual fuel consumption, on a Btu basis, at a 65 per centum capacity factor multiplied by the lesser of 0.50 lbs/mmBtu or the unit's allowable sulfur dioxide emission rate (converted, if necessary, to pounds per mmBtu), divided by 2,000.

"(3) After January 1, 2000, the Administrator shall allocate and issue to the owner or operator of any utility unit that has commenced construction before December 31, 1990 and that commences commercial operation between January 1, 1993 and December 31, 1995, allowances from the reserve created pursuant to subsection (a)(2) in an amount equal to the product of the unit's annual fuel consumption, on a Btu basis, at a 65 per centum capacity factor multiplied by the lesser of 0.30 lbs/mmBtu or the unit's allowable sulfur dioxide emission rate (converted, if necessary, to pounds per mmBtu, divided by 2,000.

"(4) After January 1, 2000, it shall be unlawful for any existing utility unit that has completed conversion from predominantly gas fired operation to coal fired operation between January 1, 1985 and December 31, 1987, for which there has been issued a proposed or final prohibition order pursuant to section 301(b) of the Powerplant and Indus-

trial Fuel Use Act of 1978 (42 U.S.C. 8301 et seq. repealed 1987) to exceed an annual sulfur dioxide tonnage emissions limitation equal to the product of the unit's annual fuel consumption, on a Btu basis, at a 65 per centum capacity factor multiplied by the lesser of 1.20 lbs/mm/Btu or the unit's allowable 1987 sulfur dioxide emissions rate, divided by 2,000, unless the owner or operator of such unit has obtained allowances equal to its actual emissions.

"(5) Any unit that is a qualifying small power production facility or qualifying cogeneration facility within the meaning of section 3(17)(C) or 3(18)(B) of the Federal Power Act (16 U.S.C. (17)(c) or 796(18)) that—

"(A) has commenced operation as of December 31, 1989, or

"(B) has entered into a power sales contract prior to December 31, 1989, shall not be subject to the emissions limitations pursuant to this section, or to any other provisions of this title, except if the Administrator has approved a designation of such unit under section 410.

"(h) OIL AND GAS-FIRED UNITS LESS THAN 10 PER CENTUM OIL CONSUMED.—(1) After January 1, 2000, it shall be unlawful for any oil- and gas-fired utility unit whose average annual fuel consumption during 1985, 1986 and 1987 on a Btu basis exceeded 90 per centum in the form of natural gas to exceed an annual sulfur dioxide tonnage limitation equal to the product of the unit's baseline multiplied by the unit's actual 1985 emissions rate divided by 2,000 unless the owner or operator of such unit holds for use allowances to emit not less than the unit's total annual emissions.

"(2) Beginning January 1, 2000, the Administrator shall allocate and issue annually for each unit subject to the emissions limitation requirements of paragraph (1) allowances from the reserve created pursuant to subsection (a)(2) in an amount equal to the unit's baseline multiplied by 0.050 lbs/mmBtu, divided by 2,000.

"(3) Beginning January 1, 2010, the Administrator shall allocate and issue annualy for each unit subject to the emissions limitation requirements of paragraph (1) allowances in an amount equal to the unit's baseline multiplied by 0.050 lbs/mmBtu, divided by 2,000.

"(i)(1) In addition to allowances allocated pursuant to this section, the Administrator shall allocate and issue annually allowances for each unit, subject to an emissions limitation requirement under this section, and located in a State that—

"(A) has experienced a growth in population in excess of 25 per centum between 1980 and 1988 according to State Population and Household Estimates, With Age, Sex, and Components of Change: 1981-1988 issued by the United States Department of Commerce, and

"(B) had an installed capacity of more than 30,000,000 kw in 1988,

in an amount equal to the difference between (A) the number of allowances that would be allocated for the unit pursuant to the emissions limitation requirements of this section applicable to the unit adjusted to reflect the unit's annual average fuel consumption on a Btu basis of any three consecutive calendar years between 1980 and 1989 (inclusive) as elected by the owner or operator and (B) the number of allowances allocated for the unit pursuant to the emissions limitation requirements of this section: *Provided*, That the number of allowances allocated and issued pursuant to this subsection shall not exceed an annual total of 40,000. If necessary to meeting the 40,000 allowance restriction imposed under this subsection the Administrator shall reduce, pro rata, the additional annual allowances allocated and issued to each unit under this subsection.

"(2) After January 1, 2000, the Administrator shall allocate and issue annually for each unit subject to the emissions limitation requirements of subsection (b)(1), (A) the lesser of whose actual or allowable 1980 emissions rate has declined by 50 per centum or more as of the date of enactment of the Clean Air Act Amendments of 1990, (B) whose actual emissions rate is less than 1.2 lbs/mmBtu as of January 1, 2000, (C) which commenced operation after January 1, 1970 and (D) which is owned by a utility company whose combined kilowatt-hour sales have increased by more than 20 per centum between calendar year 1980 and the date of enactment of the Clean Air Act Amendments of 1990, allowances in an amount equal to the difference between (i) the number of allowances that would be allocated for the unit pursuant to the emissions limitation requirements of subsection (b)(1) adjusted to reflect the unit's annual average fuel consumption on a Btu basis for any three consecutive years between 1980 and 1989 (inclusive) as elected by the owner or operator and (ii) the number of allowances allocated for the unit pursuant to the emissions limitation requirements of subsection (b)(1): *Provided*, That the number of allowances allocated and issued pursuant to this paragraph shall not exceed an annual total of 5,000. If necessary to meeting the 5,000-allowance restriction imposed in the last clause of the preceding sentence the Administrator shall reduce, pro rata, the additional allowances allocated and issued to each unit pursuant to this paragraph.

"(j) CERTAIN MUNICIPALLY-OWNED POWER PLANTS.—(1) After January 1, 2000, the Administrator shall allocate and issue annually for each existing municipally owned oil and gas-fired utility unit with nameplate capacity equal to, or less than, 40 MWe, the lesser of whose actual or allowable 1985 sulfur dioxide emission rate is less than 1.20 lbs/mmBtu, allowances in an amount equal to the product of the unit's annual fuel consumption on a Btu basis at a 60 per centum capacity factor multiplied by the lesser of its allowable 1985 emission rate or its actual 1985 emission rate, divided by 2,000.

"(2) After January 1, 2000, the Administrator shall allocate and issue annually for each existing municipally owned coal-fired utility unit with nameplate capacity less than 25 MWe, the lesser of whose actual or allowable 1985 sulfur dioxide emission rate is less than 1.20 lbs/mmBtu, allowances in an amount equal to the product of the unit's annual fuel consumption on a Btu basis at a 60 per centum capacity factor multiplied by the lesser of its allowable 1985 emission rate or its actual 1985 emission rate, divided by 2,000.

"ALLOWANCES FOR STATES WITH EMISSIONS RATES AT OR BELOW 0.80 LBS/MMBTU

"SEC. 406. (a) ELECTION OF GOVERNOR.—In addition to allocations of allowances pursuant to subsections (b) (1), (3), (4) and (5); (c) (1), (2) and (3); (d)(4); (e); (f); (g) (1), (2) and (4); (h) (1) and (3); (i); (j); and the equivalent of the emissions limitation requirements of paragraphs (5) and (6) of subsection (d), of section 405, upon the election of the Governor of any State, with a 1985 state-wide annual sulfur dioxide emissions rate equal to or less than 0.80 lbs/mmBtu, averaged over all fossil fuel-fired utility steam generating units, the Administrator, in lieu of allocations pursuant to subsections (b)(2), (c)(3), (d)(3) (A)(i) and (B)(i), (g)(3), and (h)(2) of section 405, shall allocate and issue allowances from the reserve created pursuant to section 405(a)(2) to all such units in the State in an amount equal to 125,000 multiplied by the unit's pro rata share of electricity generated in calendar year 1985 at fossil fuel-fired utility steam units in all States eligible for the election.

"(b) NOTIFICATION OF ADMINISTRATOR.—Not later than January 1, 1997, each Governor of a State eligible to make an election under paragraph (a) shall notify the Administrator of such election. In the event that the Governor of any such State fails to notify the Administrator of the Governor's elections, the Administrator shall allocate and issue allowances pursuant to section 405.

"(c) ALLOWANCES AFTER JANUARY 1, 2010.—After January 1, 2010, the Administrator shall allocate and issue allowances to units subject to the provisions of this section pursuant to section 405.

"NITROGEN OXIDES EMISSION REDUCTION PROGRAM

"SEC. 407. (a) APPLICABILITY.—On the date that a coal-fired utility unit becomes an affected unit pursuant to sections 404, 405, 409, or on the date a unit subject to the provisions of section 404(d) or 409(b), must meet the SO_2 reduction requirements, each such unit shall become an affected unit for purposes of this section and shall be subject to the emission limitations for nitrogen oxides set forth herein.

"(b) EMISSION LIMITATIONS.—(1) Not later than eighteen months after enactment of the Clean Air Act Amendments of 1990, the Administrator shall by regulation establish annual allowable emission limitations for nitrogen oxides for the types of utility boilers listed below, which limitations shall not exceed the rates listed below: *Provided*, That the Administrator may set a rate higher than that listed for any type of utility boiler if the Administrator finds that the maximum listed rate for that boiler type cannot be achieved using low NO_x burner technology. The maximum allowable emission rates are as follows:

"(A) for tangentially-fired boilers, 0.45 lb/mmBtu;

"(B) for dry bottom wall-fired boilers and for cell burners, 0.50 lb/mmBtu.

After January 1, 1995, it shall be unlawful for any unit that is an affected unit on that date and is of the type listed in this paragraph to emit nitrogen oxides in excess of the emission rates set by the Administrator pursuant to this paragraph.

"(2) Not later than January 1, 1997, the Administrator shall, by regulation, establish allowable emission limitations on a lb/mmBtu, annual average basis, for nitrogen oxides for the following types of utility boilers:

"(A) wet bottom wall-fired boilers;

"(B) cyclones;

"(C) all other types of utility boilers.

The Administrator shall base such rates on the degree of reduction achievable through the retrofit application of the best system of continuous emission reduction, taking into account available technology, costs and energy and environmental impacts; and which is comparable to the costs of nitrogen oxides controls set pursuant to subsection (b)(1). Not later than January 1, 1997, the Administrator may revise the applicable

emission limitations for tangentially-fired and dry bottom, wall-fired boilers (including cell burners) to be more stringent if the Administrator determines that more effective low NO_x burner technology is available: *Provided,* That no unit that is an affected unit pursuant to section 404 and that is subject to the requirements of subsection (b)(1), shall be subject to the revised emission limitations, if any.

"(c) REVISED PERFORMANCE STANDARDS.—(1) Not later than January 1, 1993, the Administrator shall propose revised standards of performance to section 111 for nitrogen oxides emissions from fossil-fuel fired steam generating units, including both electric utility and nonutility units. Not later than January 1, 1994, the Administrator shall promulgate such revised standards of performance. Such revised standards of performance shall reflect improvements in methods for the reduction of emissions of oxides of nitrogen.

"(d) ALTERNATIVE EMISSION LIMITATIONS.—The permitting authority shall, upon request of an owner or operator of a unit subject to this section, authorize an emission limitation less stringent than the applicable limitation established under subsection (b)(1) or (b)(2) upon a determination that—

"(1) a unit subject to subsection (b)(1) cannot meet the applicable limitation using low NO_x burner technology; or

"(2) a unit subject to subsection (b)(2) cannot meet the applicable rate using the technology on which the Administrator based the applicable emission limitation.

The permitting authority shall base such determination upon a showing satisfactory to the permitting authority, in accordance with regulations established by the Administrator not later than eighteen months after enactment of the Clean Air Act amendments of 1990, that the owner or operator—

"(1) has properly installed appropriate control equipment designed to meet the applicable emission rate;

"(2) has properly operated such equipment for a period of fifteen months (or such other period of time as the Administrator determines through the regulations), and provides operating and monitoring data for such period demonstrating that the unit cannot meet the applicable emission rate; and

"(3) has specified an emission rate that such unit can meet on an annual average basis.

The permitting authority shall issue an operating permit for the unit in question, in accordance with section 408 and part B of title III—

"(i) that permits the unit during the demonstration period referred to in subparagraph (2) above, to emit at a rate in excess of the applicable emission rate;

"(ii) at the conclusion of the demonstration period to revise the operating permit to reflect the alternative emission rate demonstrated in paragraphs (2) and (3) above.

Units subject to subsection (b)(1) for which an alternative emission limitation is established shall not be required to install any additional control technology beyond low NO_x burners. Nothing in this section shall preclude an owner or operator from installing and operating an alternative NO_x control technology capable of achieving the applicable emission limitation.

"(e) EMISSIONS AVERAGING.—In lieu of complying with the applicable emission limitations under subsection (b)(1), (b)(2), or (d), the owner or operator of two or more units subject to one or more of the applicable emission limitations set pursuant to these sections, may petition the permitting authority for alternative contemporaneous annual emission limitations for such units that ensure that (1) the actual annual emission rate in pounds of nitrogen oxides per million Btu averaged over the units in question is a rate that is less than or equal to (2) the Btu-weighted average annual emission rate for the same units if they had been operated, during the same period of time, in compliance with limitations set in accordance with the applicable emission rates set pursuant to subsections (b)(1) and (b)(2).

"If the permitting authority determines, in accordance with regulations issued by the Administrator not later than eighteen months after enactment of the Clean Air Act Amendments of 1990; that the conditions in the paragraph above can be met, the permitting authority shall issue operating permits for such units, in accordance with section 408 and part B of title III, that allow alternative contemporaneous annual emission limitations. Such emission limitations shall only remain in effect while both units continue operation under the conditions specified in their respective operating permits.

"PERMITS AND COMPLIANCE PLANS

"SEC. 408. (a) PERMIT PROGRAM.—This title shall be implemented by operating permits issued in accordance with the provisions of this section and part B of title III of this Act. Not later than eighteen months after enactment of the Clean Air Act Amendments of 1990, the Administrator shall promulgate regulations consistent with regulations required to be promulgated under title III of this Act to implement a Federal permit program to issue permits for affected sources under this title. Following promulgation, the Administrator shall issue a permit in accordance with this title and part B of title III to implement the requirements of sections 403, 404, 410, 411, 412, 413, and 414. Such permit shall supersede any permit application and proposed compliance plan submitted by the owner or operator under subparagraph (1). Any permit issued by the Administrator, or by a State with a permit program approved under part B of title III of this Act, shall prohibit each of the following:

"(1) exceedances of applicable sulfur dioxide or nitrogen oxide emissions limitations,

"(2) annual emissions of sulfur dioxide or nitrogen oxides in excess of the applicable emissions limitation under this title, unless, in the case of sulfur dioxide, the owner or operator holds allowances to emit not less than the total annual emissions of the affected unit or source,

"(3) the use of any allowance prior to the year for which it was issued, and

"(4) contravention of any other provision of the permit.

"(b) PERMIT APPLICATIONS AND COMPLIANCE PLANS GENERALLY.—Permit applications required by this seciton shall be submitted by the designated representative of the owner or operator of the unit, shall identify each person on whose behalf allowances will be received, and shall specify the nature and extent of the interest of each person. Each permit application shall be submitted by the designated representative of the owner or operator and shall be accompanied by a compliance plan for the source to comply with its requirements under this title. The compliance plan shall provide all necessary information on the schedule and means by which the source will comply with its annual tonnage emissions limitation, as provided under this title, including specification of the owner's or operator's intent to use an alternative method of compliance, and the owner's or operator's certification that such owner or operator will comply with the requirements of this title in all circumstances, including, but not limited to, those in which such owner or operator fails for whatever reason to secure any such additional allowances necessary to achieve compliance. The Administrator may also require—

"(1) for a source, a demonstration of compliance with any other applicable emissions limitation or requirement under this Act, and

"(2) from the owner or operator of two or more affected sources, an integrated compliance plan providing an overall plan for achieving compliance at the affected sources.

"(c) FIRST PHASE PERMITS.—The Administrator shall issue permits to the affected sources under section 404 as follows—

"(1)(A) Not later than thirty months after the date of enactment of the Clean Air Act Amendments of 1990, the designated representative of the owner or operator of each affected source under sections 404 and 407 shall submit a permit application and proposed compliance plan for that source in accordance with regulations issued by the Administrator. The permit application and proposed compliance plan shall be binding on the owner and operator, and be enforceable for purposes of this Act, until a permit is issued by the Administrator for the source pursuant to this section and title III of this Act. During pendency of the permit application and proposed compliance plan, the designated representative of the owner or operator may amend such application or plan automatically provided that the Administrator is given prior notification of such amendment.

"(B) In the case of a compliance plan for an affected source under sections 404 and 407 for which the owner or operator proposes to meet the requirements of that section by reducing utilization of the unit as compared with the baseline prescribed in section 402(d), or by shutting down the unit, the owner or operator shall include in the proposed compliance plan a specification of the unit or units that will provide electrical generation to compensate for the reduced output at the affected source, or a demonstration that such reduced utilization will be accomplished through energy conservation or improved unit efficiency. The unit to be used for such compensating generation, which is not otherwise an affected unit under sections 404 and 407, shall be deemed an affected unit under section 404, subject to all of the requirements for such units under this title, except that allowances shall be allocated to such compensating unit in the amount of an annual limitation equal to the product of the unit's baseline multiplied by the lesser of the unit's actual 1985 emissions rate or its allowable 1985 emissions rate, divided by 2,000.

"(2) The Administrator shall review each proposed compliance plan to determine whether it satisfies the requirements of this title, and shall approve or disapprove such plan within six months after receipt of a complete submission. The Administrator may approve a compliance plan in whole or in part, and with such modifications or conditions as may be necessary consistent with the orderly functioning of the allowance

system and to ensure the emissions reductions contemplated by this title.

"(d) SECOND PHASE PERMITS.—(1) To implement sections 403, 405, 406, 407, 409, 410, 411, 412, 413, and 414, each State in which one or more sources subject to those sections are located, shall submit a comprehensive and enforceable permit program to the Administrator for approval in accordance with this title and part B of title III. The Administrator shall approve any permit program meeting the requirements of this title and part B of title III.

"(2) The designated representative of the owner or operator of each affected source under section 405, including an affected unit under section 409, shall submit a permit application and proposed compliance plan (which shall include a description of any alternative method of compliance) for that source to the permitting authority, not later than January 1, 1994.

"(3) Not later than July 1, 1995, each State with an approved permit program pursuant to this section and part B of title III of this Act shall issue permits with all necessary compliance plan requirements and conditions to the owners and operators of existing affected sources under section 405, that satisfy the requirements of this Act. In the case of a State without an approved permit program, or a State that fails to issue permits to all of its existing affected sources by July 1, 1995, the Administrator shall, not later than July 1, 1996, issue a permit with all necessary compliance plan requirements and conditions to the owner or operator of each such affected source. The Administrator or permitting authority may approve a compliance plan in whole or in part and with such modifications or conditions as may be necessary consistent with the orderly functioning of the allowance system and to ensure the emissions reductions contemplated by this title.

"(4) The owner or operator of any unit subject to the requirements of section 406 shall submit a permit application and proposed compliance plan for such unit to the permitting authority not later than July 1, 1997. Not later than January 1, 1998, the permitting authority shall issue a permit to the owner or operator that satisfies the requirements of this title and part B of title III, including any appropriate monitoring reporting requirements.

"(5) The designated representative of the owner or operator of any unit subject to the requirements of section 407 shall submit a permit application and proposed compliance plan for such unit to the permitting authority, not later than January 1, 1997. The Administrator shall, not later than July 1, 1998, issue a permit and compliance plan to the owner or operator of each such affected source that has not been issued a State permit. The permitting authority shall issue a permit to the owner or operator that satisfies the requirements of this title and part B of title III, including any appropriate monitoring and reporting requirements.

"(e) NEW UNIT PERMITS.—(1) Each State shall submit a comprehensive and enforceable operating permit program for new units to the Administrator for approval, as provided under part C of title III. The Administrator shall take final action on complete new unit permit program submittals within one year of their receipt.

"(2) The designated representative of the owner or operator of each source that includes one or more new units shall submit a permit application and proposed compliance plan to the permitting authority not later than twenty-four months prior to January 1, 2000, or to commencing commercial operation of the new unit, whichever is later. The permitting authority shall issue a permit and compliance plan to the owner or operator of the new unit that satisfies the requirements of this title and part B of title III, including any appropriate monitoring and reporting requirements.

"(f) ELECTION UNIT PERMITS.—(1) Each State shall submit a comprehensive and enforceable operating permit program for election units under section 410 to the Administrator for approval, as provided under part B of title III. The Administrator shall take final action on complete election unit permit program submittals within one year of their receipt.

"(2) The owner or operator of each source that includes one or more election units shall submit a permit application and proposed compliance plan to the permitting authority with the proposed election designation. The permitting authority shall issue a permit and compliance plan to the owner or operator of the election unit that satisfies the requirements of this title and part B of title III, including any appropriate monitoring and reporting requirements.

"(g) AMENDMENT OF APPLICATION AND COMPLIANCE PLAN.—At any time after the submission of a permit application and proposed compliance plan under this section, the permit applicant may submit a revised permit application and compliance plan, in accordance with the requirements of this section or part B of title III.

"(h) PROHIBITION.—It shall be unlawful for an owner or operator and its designated representative (1) to fail to submit a permit application or proposed compliance plan in accordance with the deadlines specified in this section or otherwise to fail to comply with regulations implementing this section, or (2) to operate any source subject to this title except in compliance with the terms and requirements of a permit application and proposed compliance plan, or a permit and compliance plan issued by the Administrator or a State with an approved permit program.

"(i) MULTIPLE OWNERS.—No permit under this section shall be issued to an affected unit until the designated representative of the owner or operator has filed a certification concerning the holding and distribution of allowances. Where there are multiple holders of a legal or equitable title to or a leasehold interest in such a unit, or where a utility purchases power from an affected unit under life-of-the-unit, firm power contractual arrangements, the certification shall (1) state that allowances will be deemed to be held or distributed in proportion to each holder's legal, equitable, leasehold, or contractual share or, (2) if such multiple holders have expressly provided for a different distribution of allowances by contract, state that allowances will be deemed to be held or distributed in accordance with the contract. A passive lessor, or a person who has an equitable interest through such lessor, whose rental payments are not based, either directively or indirectly, upon the revenues or income from the affected unit shall not be deemed to be a holder of a legal, equitable, leasehold, or contractual interest for the purpose of holding or distributing allowances as provided in this subsection, unless expressly provided for in the leasehold agreement. Except as otherwise provided in this subsection, where all legal or equitable title to or interest in an affected unit is held by a single person, the certification shall state that all allowances received by the unit are deemed to be held for that person.

"REPOWERED SOURCES

"SEC. 409. (a) AVAILABILITY.—Not later than December 31, 1997, the owner or operator of an existing unit subject to the requirement of section 405 may demonstrate to the permitting authority that one or more units will be repowered with a qualifying clean coal technology to comply with the requirements under section 405. The owner or operator shall, as part of any such demonstration, provide, not later than January 1, 2000, satisfactory documentation of a preliminary design and engineering effort for such repowering and an executed and binding contract for the majority of the equipment to repower such unit and such other information as the Administrator may require by regulation.

"(b) EXTENSION.—(1) An owner or operator satisfying the requirements of subsection (a) shall be granted an extension of the emission limitation requirement compliance date for that unit from January 1, 2000, to December 31, 2003. The extension shall be specified in the permit issued to the source under section 408, together with any compliance schedule and other requirements necessary to meet second phase requirements by the extended date. Any unit that is granted an extension under this section shall not be eligible for a waiver under section 111(j) of this Act, and shall continue to be subject to requirements under this title as if it were a unit subject to section 405.

"(2) If (A) the owner or operator of an existing unit has been granted an extension under paragraph (1) in order to repower such unit with a clean coal unit, and (B) such owner or operator thereafter satisfies the Administrator (i) that the clean coal technology to be utilized by such unit is economically or technologically infeasible, (ii) that by January 1, 2000, the owner or operator has demonstrated to the Administrator a good faith effort to achieve compliance with the requirements of subsection (a), and (iii) that such existing unit will be retrofitted or repowered with equipment utilizing another clean coal technology or other available control technology, then such extension shall continue until December 31, 2003.

"(c) ALLOWANCES.—(1) For the period of the extension under this section, the Administrator shall issue to the owner or operator of the affected unit, annual allowances for sulfur dioxide equal to the affected unit's baseline multiplied by the lesser of the unit's federally approved State Implementation Plan emissions limitation or its actual emission rate for 1995. Such allowances may not be transferred or used by any other source to meet emission requirements under this title. The source owner or operator shall notify the Administrator sixty days in advance of the date on which the affected unit for which the extension has been granted is to be removed from operation to install the repowering technology.

"(2) Effective on that date, the unit shall be subject to the requirements of section 405. Allowances for the year in which the unit is removed from operation to install the repowering technology shall be calculated as the product of the unit's baseline multiplied by 1.20 lbs/mmBtu, divided by 2,000, and prorated accordingly, and are transferable.

"(3) Allowances for such existing utility units for calendar years after the year the

repowering is complete shall be calculated as the product of the existing unit's baseline multiplied by 1.20 lbs/mmBtu, divided by 2,000.

"(d) CONTROL REQUIREMENTS.—Any unit qualifying for an extension under this section that does not increase actual hourly emissions for any pollutant regulated under the Act shall not be subject to any standard of performance under section 111 of this Act.

"(e) EXPEDITED PERMITTING.—State permitting authorities and, where applicable, the Administrator, are encouraged to give expedited consideration to permit applications under parts C and D of title I of this Act for any source qualifying for an extension under this section.

"(f) PROHIBITION.—It shall be unlawful for the owner or operator of a repowered source to fail to comply with the requirement of this section, or any regulations of permit requirements to implement this section, including the prohibition against emitting sulfur dioxide in excess of allowances held.

"ELECTION FOR ADDITIONAL SOURCES

"SEC. 410. (a) APPLICABILITY.—The owner or operator of any unit that is not; nor will become, an affected unit under section 403(e), 404, or 405, or that is a process source under subsection (e), that emits sulfur dioxide, may elect to designate that unit or source to become an affected unit and to receive allowances under this title. An election shall be submitted to the Administrator for approval, along with a permit application and proposed compliance plan in accordance with section 408. The Administrator shall approve a designation that meets the requirements of this section, and such designated unit, or source, shall be issued allowances, and be an affected unit for purposes of this title.

"(b) ESTABLISHMENT OF BASELINE.—The baseline for a unit designated under this section shall be established by the Administrator by regulation, based on fuel consumption and operating data for the unit for calendar years 1985, 1986, and 1987, or if such data is not available, the Administrator may prescribe a baseline based on alternative representative data.

"(c) EMISSION LIMITATIONS.—Annual emissions limitations for sulfur dioxide shall be equal to the product of the baseline multiplied by the lesser of the unit's 1985 actual or allowable emission rate in lbs/mmBtu, or, if the unit did not operate in 1985, by the lesser of the unit's actual or allowable emission rate for a calendar year after 1985 (as determined by the Administrator), divided by 2,000.

"(d) PROCESS SOURCES.—The Administrator shall establish a program under which the owner or operator of a process source that emits sulfur dioxide may elect to designate that source as an affected unit for the purpose of receiving allowances under this title. The Administrator shall, by regulation, define the sources that may be designated; specify the emissions limitation; specify the operating, emission baseline, and other data requirements; prescribe CEMS or other monitoring requirements; and promulgate permit, reporting, and any other requirements necessary to implement such a program.

"(e) ALLOWANCES AND PERMITS.—The Administrator shall issue allowances to an affected unit under this section in an amount equal to the emissions limitation calculated under subsection (c) or (d), in accordance with section 403. Such allowance may be used in accordance with, and shall be subject to, the provisions of section 403. Affected sources under this section shall be subject to the requirements of sections 403, 408, 411, 412, 413, and 414.

"(f) LIMITATION.—Any unit designated under this section shall not transfer or bank allowances produced as a result of reduced utilization or shutdown: *Provided*, That such allowances may be transferred or carried forward for use in subsequent years to the extent that the reduced utilization or shutdown results from the replacement of thermal energy from the unit designated under this section, with thermal energy generated by any other unit or units subject to the requirements of this title, and the designated unit's allowances are transferred or carried forward for use at such other replacement unit or units. In no case may the Administrator allocate to a source designated under this section allowances in an amount greater than the emissions resulting from operation of the source in full compliance with the requirements of this Act. No such allowances shall authorize operation of a unit in violation of any other requirements of this Act.

"(g) IMPLEMENTATION.—The Administrator shall issue regulations to implement this section not later than eighteen months after enactment of the Clean Air Act Amendments of 1990.

"(h) SMALL DIESEL REFINERIES.—The Administrator shall issue allowances to owners or operators of small diesel refineries who produce diesel fuel after October 1, 1993 meeting the requirements of subsection 211(i) of this Act.

"(A) ALLOWANCE PERIOD.—Allowances may be issued under this subsection only for the period from October 1, 1993, through December 31, 1999.

"(B) ALLOWANCE DETERMINATION.—The number of allowances issued pursuant to this paragraph shall equal the annual number of pounds of sulfur dioxide reduction attributable to desulfurization by a small refinery divided by 2,000. For the purposes of this calculation, the concentration of sulfur removed from diesel fuel shall be the difference between 0.274 per centum (by weight) and 0.050 per centum (by weight).

"(C) REFINERY ELIGIBILITY.—As used in this subsection, the term 'small refinery' shall mean a refinery or portion of a refinery—

"(i) which has bona fide crude oil throughput of less than eighteen million two hundred and fifty thousand barrels per year, as reported to the Department of Energy, and

"(ii) which is owned or controlled by a refiner with a total combined bona fide crude oil throughput of less than fifty million one hundred eighty-seven thousand and five hundred barrels per year, as reported to the Department of Energy.

"(D) LIMITATION PER REFINERY.—The maximum number of allowances that can be annually issued to a small refinery pursuant to this subsection is one thousand and five hundred.

"(E) LIMITATION ON TOTAL.—In any given year, the total number of allowances issued pursuant to this subsection shall not exceed thirty-five thousand.

"EXCESS EMISSIONS PENALTY

"SEC. 411. (a) EXCESS EMISSIONS PENALTY.—The owner or operator of any unit or process source subject to the requirements of sections 403, 404, 405, 406, 407 or 409, or designated under section 410, that emits sulfur dioxide or nitrogen oxides for any calendar year in excess of the unit's emissions limitation requirement or, in the case of sulfur dioxide, of the allowances the owner or operator holds for use for the unit for that calendar year shall be liable for the payment of an excess emissions penalty, except where such emissions were authorized pursuant to section 110(l). That penalty shall be calculated on the basis of the number of tons emitted in excess of the unit's emissions limitation requirement or, in the case of sulfur dioxide, of the allowances the operator holds for use for the unit for that year, multiplied by $2,000. Any such penalty shall be due and payable without demand to the Administrator as provided in regulations to be issued by the Administrator by no later than eighteen months after the date of enactment of the Clean Air Act Amendments of 1990. Any such fee shall be deposited in the United States Treasury pursuant to the Miscellaneous Receipts Act. Any penalty due and payable under this section shall not diminish the liability of the unit's owner or operator for any fine, penalty or assessment against the unit for the same violation under any other section of this Act.

"(b) EXCESS EMISSIONS OFFSET.—The owner or operator of any affected source that emits sulfur dioxide during any calendar year in excess of the unit's emissions limitation requirement or of the allowances held for use for the unit for the calendar year, shall be liable to offset the excess emissions by an equal tonnage amount in the following calendar year, or such longer period as the Administrator may prescribe. The owner or operator of the source shall, within sixty days after the end of the year in which the excess emissions occurred, submit to the Administrator, and to the State in which the source is located, a proposed plan to achieve the required offsets. Upon approval of the proposed plan by the Administrator, as submitted, modified or conditioned, the plan shall be deemed as a condition of the operating permit for the unit without further review or revision of the permit. The Administrator shall also deduct allowances equal to the excess tonnage from those issued for the source for the calendar year, or succeeding years during which offsets are required, following the year in which the excess emissions occurred.

"(c) PENALTY ADJUSTMENT.—The Administrator shall, by regulation, adjust the penalty specified in subsection (a) for inflation, based on the Consumer Price Index, on the date of enactment and annually thereafter.

"(d) PROHIBITION.—It shall be unlawful for the owner or operator of any source liable for a penalty and offset under this section to fail (1) to pay the penalty under subsection (a), (2) to provide, and thereafter comply with, a compliance plan as required by subsection (b), or (3) to offset excess emissions as required by subsection (b).

"MONITORING, REPORTING, AND RECORDKEEPING REQUIREMENTS

"SEC. 412. (a) APPLICABILITY.—The owner and operator of any source subject to this title shall be required to install and operate CEMS on each affected unit at the source, and to quality assure the data for sulfur dioxide, nitrogen oxides, opacity and volumetric flow at each such unit. The Administrator shall, by regulations issued not later than eighteen months after enactment of the Clean Air Act Amendments of 1990, specify the requirements for CEMS, for any alternative monitoring system that is demonstrated as providing information with the

same precision, reliability, accessibility, and timeliness as that provided by CEMS, and for recordkeeping and reporting of information from such systems. Such regulations may include limitations or the use of alternative compliance methods by units equipped with an alternative monitoring system as may be necessary to preserve the orderly functioning of the allowance system, and which will ensure the emissions reductions contemplated by this title.

"(b) FIRST PHASE REQUIREMENTS.—Not later than thirty-six months after enactment of the Clean Air Act Amendments of 1990, the owner or operator of each affected unit under section 404, including, but not limited to, units that become affected units pursuant to subsections (b) and (c) and eligible units under subsection (d), shall install and operate CEMS, quality assure the data, and keep records and reports in accordance with the regulations issued under subsection (a).

"(c) SECOND PHASE REQUIREMENTS.—Not later than January 1, 1995, the owner or operator of each affected unit that has not previously met the requirements of subsections (a) and (b) shall install and operate CEMS, quality assure the data, and keep records and reports in accordance with the regulations issued under subsection (a).

"(d) UNAVAILABILITY OF EMISSIONS DATA.—If CEMS data or data from an alternative monitoring system approved by the Administrator under subsection (a) is not available for any affected unit during any period of a calendar year in which such data is required under this title, and the owner or operator cannot provide information, satisfactory to the Administrator, on emissions during that period, the Administrator shall deem the unit to be operating in an uncontrolled manner during the entire period for which the data was not available and shall, by regulation which shall be issued not later than eighteen months after enactment of the Clean Air Act Amendments of 1990, prescribe means to calculate emissions for that period. The owner or operator shall be liable for excess emissions fees and offsets under section 411 in accordance with such regulations. Any fee due and payable under this subsection shall not diminish the liability of the unit's owner or operator for any fine, penalty, fee or assessment against the unit for the same violation under any other section of this Act.

"(e) PROHIBITION.—It shall be unlawful for the owner or operator of any source subject to this title to operate a source without complying with the requirements of this section, and any regulations implementing this section.

"GENERAL COMPLIANCE WITH OTHER PROVISIONS

"SEC. 413. Except as expressly provided, compliance with the requirements of this title shall not exempt or exclude the owner or operator of any source subject to this title from compliance with any other applicable requirements of this Act.

"ENFORCEMENT

"SEC. 414. It shall be unlawful for any person subject to this title to violate any prohibition of, requirement of, or regulation promulgated pursuant to this title shall be a violation of this Act. In addition to the other requirements and prohibitions provided for in this title, the operation of any affected unit to emit sulfur dioxide in excess of allowances held for use for such unit shall be deemed a violation, with each ton emitted in excess of allowances held constituting a separate violation.

"CLEAN COAL TECHNOLOGY REGULATORY INCENTIVES

"SEC. 415. (a) DEFINITION.—For purposes of this section, 'clean coal technology' means any technology, including technologies applied at the precombustion, combustion, or post combustion stage, at a new or existing facility which will achieve significant reductions in air emissions of sulfur dioxide or oxides of nitrogen associated with the utilization of coal in the generation of electricity, process steam, or industrial products, which is not in widespread use as of the date of enactment of this title.

"(b) FEDERAL RATE INCENTIVES.—(1) Within twenty-four months after enactment of this section, the Federal Energy Regulatory Commission shall complete a rulemaking to establish a demonstration program for regulatory incentives to promote the development of clean coal technologies and other innovative control technologies that limit powerplant emissions. The regulatory incentives shall include—

"(A) establishment of an incentive rate of return for clean coal or other innovative emission control technologies that recognizes their inherent risk; and

"(B) allowance of a ten- to twenty-year amortization period to recover the capital costs of a clean coal or other innovative emission control technology.

"(2) The Federal Energy Regulatory Commission demonstration program is subject to the following—

"(A) the program initially will have a five-year life;

"(B) the program will cover no more than four units in each technology class; and

"(C) the technology classes eligible for the program should be reasonably likely to realize significant cost reductions when employed.

"(3) At the end of the five-year demonstration program, the Federal Energy Regulatory Commission shall review the merits of the program and determine whether it should be extended or made permanent.

"(c) FERC PREAPPROVAL OF PRUDENCE FOR CLEAN COAL TECHNOLOGY COSTS.—The Federal Energy Regulatory Commission shall establish a process for negotiating with potential developers of clean coal technology or other innovative control technology projects to agree upon cost caps for future projects and preapproval of the prudency of expenses for those projects if the expenses fall within the agreed-upon cap.

"(d) PRIORITY FOR UNITS LOCATED IN STATES WITH INCENTIVE PROGRAMS.—To the extent practicable, the Federal Energy Regulatory Commission shall, in the selection of units which will be provided incentive rate treatment under subsection (b) or (c), give priority to units located in States where—

"(1) the State regulatory commission with jurisdiction over the retail rates of the utility seeking such incentive rate treatment has approved comparable incentives for inclusion in the utility's retail rates, or, if the utility makes no retail sales, where comparable retail rate treatment has been approved for other utilities which make retail sales in the State or States in which the wholesale customers of the utility seeking such incentive rate treatment are located; and

"(2) the State regulatory commission accords, to the extent relevant and within its jurisdiction, similar incentives to noninvestor-owned utilities on a basis no less favorable than that accorded to investor-owned utilities within its jurisdiction.

"(e) REVISED REGULATIONS FOR CLEAN COAL TECHNOLOGY DEMONSTRATIONS.—

"(1) APPLICABILITY.—This subsection applies to physical or operational changes to existing facilities for the sole purpose of installation, operation, cessation, or removal of a temporary or permanent clean coal technology demonstration project. For the purposes of this section, a clean coal technology demonstration project shall mean a project conducted under title II, section 101(d) of the Further Continuing Appropriations Act of 1985 (section 5903(d) of title 42 of the United States Code), or subsequent appropriations, up to a total amount of $2,500,000,000 for commercial demonstration of clean coal technology, or similar projects funded through appropriations for the Environmental Protection Agency. The Federal contribution for a qualifying project shall be at least 20 per centum of the total cost of the demonstration project.

"(2) TEMPORARY PROJECTS.—Installation, operation, cessation, or removal of a temporary clean coal technology demonstration project that is operated for a period of five years or less, and which complies with the State implementation plans for the State in which the project is located and other requirements necessary to attain and maintain the national ambient air quality standards during and after the project is terminated, shall not subject such facility to the requirements of section 111 or part C or D of title I.

"(3) PERMANENT PROJECTS.—(A) For permanent clean coal technology demonstration projects that constitute repowering as defined in section 402(l) of this title, any qualifying project shall not be subject to standards of performance under section 111 or to the review and permitting requirements of part C for any pollutant the potential emissions of which will not increase as a result of the demonstration project.

"(B) Any permanent clean coal technology demonstration project that constitutes a retrofit project and, notwithstanding the provisions of paragraph (1), any other utility unit pollution control project, including, but not limited to, alterations that allow the use of natural gas as a fuel, where such project constitutes a retrofit pollution control project and where such project complies with the State implementation plans for the State in which the project is located, and with other requirements necessary to attain and maintain the national ambient air quality standards shall not be deemed to be a major modification subject to the review and permitting requirements of part C or D of title I: *Provided*, That the project will not result in a significant net increase in actual emissions of any pollutant regulated under this Act. For purposes of this subsection, the Administrator shall presume that a retrofit project will not result in an increase in the capacity utilization of the source. This presumption may be overcome if the Administrator concludes, based on information submitted pursuant to regulations or interpretative rulings promulgated under this section, that there is a likelihood that hours of operation or rates of production will increase because of the retrofit project. For purposes of this subsection, 'retrofit project' is defined as the permanent installation or operation of an emissions control system or device designed primarily to improve the control or prevention of emissions of any air pollutant, other than a repowering as defined in section 402(l) of this title.

"(4) EPA REGULATIONS.—Not later than twelve months after the date of enactment, the Administrator shall promulgate regulations or interpretive rulings to revise requirements under section 111 and parts C and D, as appropriate, to facilitate projects consistent in this subsection. With respect to parts C and D, such regulations or rulings shall apply to all areas in which EPA is the permitting authority. In those instances in which the State is the permitting authority under part C or D, any State may adopt and submit to the Administrator for approval revisions to its implementation plan to apply the regulations or rulings promulgated under this subsection.

"(f) ENCOURAGEMENT OF STATE INCENTIVE PROGRAMS.—Because the use of clean coal technologies is in the national interest, States, including their agencies and political subdivisions which regulate public utility rates and charges, are encouraged to provide additional incentives for their implementation. Those incentives may include, but are not limited to—

"(1) Preapproval of recovery of capital costs and other expenses, within reasonable bounds agreed upon before project construction;

"(2) elimination of retroactive 'used and useful' reviews for clean coal technologies;

"(3) rapid amortization of clean coal technology expenditures; and

"(4) immediate recovery of a portion of clean coal technology expenses through a fuel adjustment clause or by some other method.".

FOSSIL FUEL USE

SEC. 402. (a) Any person who enters into a contract under which such person receives hydroelectric energy in return for the provision of electric energy by such person shall use allowances held by such person as necessary to satisfy such person's obligations under such contract.

(b) A Federal Power Marketing Administration shall not be subject to the provisions and requirements of this title with respect to electric energy generated by hydroelectric facilities and marketed by such Power Marketing Administration. Any person who sells or provides electric energy to a Federal Power Marketing Administration shall comply with the provisions and requirements of this title.

REPEAL OF PERCENT REDUCTION

SEC. 403. (a) REPEAL.—Section 111(a)(1) of the Clean Air Act is amended to read as follows:

"(1) The term 'standard of performance' means a standard for emissions of air pollutants which reflects the degree of emission limitation achievable through the application of the best system of emission reduction which (taking into account the cost of achieving such reduction and any nonair quality health and environmental impact and energy requirements) the Administrator determines has been adequately demonstrated.".

(b) REVISED REGULATIONS.—Not later than three years after the date of enactment of the Clean Air Act Amendments of 1990, the Administrator shall promulgate revised regulations for standards of performance for new fossil fuel fired electric utility units commencing construction after the date on which such regulations are proposed that, at a minimum, require any source subject to such revised standards to emit sulfur dioxide at a rate not greater than would have resulted from compliance by such source with the applicable standards of performance under this section prior to such revision.

(c) APPLICABILITY.—The provisions of subsections (a) and (b) apply only so long as the provisions of section 403(e) of the Clean Air Act remain in effect.

(d) BACT DETERMINATIONS.—Section 169(3) of the Clean Air Act is amended by inserting: ", clean fuels," after "including fuel cleaning,".

ACID DEPOSITION STANDARDS

SEC. 404. Not later than thirty-six months after the date of enactment of this Act, the Administrator of the Environmental Protection Agency shall transmit to the Committee on Environment and Public Works of the Senate and the Committee on Energy and Commerce of the House of Representatives a report on the feasibility and effectiveness of an acid deposition standard or standards to protect sensitive and critically sensitive aquatic and terrestrial resources. The study required by this section shall include, but not be limited to, consideration of the following matters:

(a) identification of the sensitive and critically sensitive aquatic and terrestrial resources in the United States and Canada which may be affected by the deposition of acidic compounds;

(b) description of the nature and numerical value of a deposition standard or standards that would be sufficient to protect such resources;

(c) description of the use of such standard or standards in other Nations or by any of the several States in acid deposition control programs;

(d) description of the measures that would need to be taken to integrate such standard or standards with the control program required by title IV of the Clean Air Act;

(e) description of the state of knowledge with respect to source-receptor relationships necessary to develop a control program on such standard or standards and the additional research that is on-going or would be needed to make such a control program feasible; and

(f) description of the impediments to implementation of such control program and the cost-effectiveness of deposition standards compared to other control strategies including ambient air quality standards, new source performance standards and the requirements of title IV of the Clean Air Act.

NATIONAL ACID LAKES REGISTRY

SEC. 405. The Administrator of the Environmental Protection Agency shall create a National Acid Lakes Registry that shall list, to the extent practical, all lakes that are known to be acidified due to acid deposition, and shall publish such list within one year of the enactment of this Act. Lakes shall be added to the registry as they become acidic or as data become available to show they are acidic. Lakes shall be deleted from the registry as they become nonacidic.

INDUSTRIAL SO_2 EMISSIONS

SEC. 406. (a) Not later than January 1, 1995 and every five years thereafter, the Administrator of the Environmental Protection Agency shall transmit to the Congress a report containing an inventory of national annual sulfur dioxide emissions from industrial sources, including units subject to section 405(g)(5) of the Clean Air Act, for all years for which data are available, as well as the likely trend in such emissions over the following twenty-year period. The reports shall also contain estimates of the actual emission reduction in each year resulting from promulgation of the diesel fuel desulfurization regulations under section 214.

(b) Whenever the inventory required by this section indicates that sulfur dioxide emissions from industrial sources, including units subject to section 405(g)(5) of the Clean Air Act, may reasonably be expected to reach levels greater than 5.60 million tons per year, the Administrator of the Environmental Protection Agency shall take such actions under the Clean Air Act as may be appropriate to ensure that such emissions do not exceed 5.60 million tons per year. Such actions may include the promulgation of new and revised standards of performance for new sources, including units subject to section 405(g)(5) of the Clean Air Act, under section 111(b), as well as promulgation of standards of performance for existing sources, including units subject to section 405(g)(5) of the Clean Air Act, under authority of this section. For an existing source regulated under this section, "standard of performance" means a standard which the Administrator determines is applicable to that source and which reflects the degree of emission reduction achievable through the application of the best system of continuous emission reduction which (taking into consideration the cost of achieving such emission reduction, and any nonair quality health and environmental impact and energy requirements) the Administrator determines has been adequately demonstrated for that category of sources.

(c) Regulations promulgated under section 405(b) shall not prohibit a source from electing to become an affected unit under section 410.

SENSE OF THE CONGRESS ON EMISSION REDUCTIONS COSTS

SEC. 407. It is the sense of the Congress that the Clean Air Act Amendments of 1990, through the allowance program, allocates the costs of achieving the required reductions in emissions of sulfur dioxide and oxides of nitrogen among sources in the United States. Broad based taxes and emissions fees that would provide for payment of the costs of achieving required emissions reductions by any party or parties other than the sources required to achieve the reductions are undesirable.

CONTINUATION OF THE NATIONAL ACID PRECIPITATION ASSESSMENT PROGRAM

SEC. 408. (a) The National Acid Precipitation Assessment Program created by Public Law 96-294 shall be continued pursuant to this section. The Chairman of the Joint Chairs of the National Acid Precipitation Task Force shall be the Administrator of the Environmental Protection Agency.

(b) The Task Force shall sponsor monitoring and research in the Federal agencies and in the scientific community that is necessary to understand the effects of the emissions control program created by this title. The Task Force shall undertake cost-benefit analyses of the effects of the emissions control program created by this title.

(c) The Task Force shall provide for the collection of information regarding—

(1) natural and anthropogenic emissions of the precursors of acid deposition;

(2) actual levels of all types of acid deposition;

(3) the status of ecosystems (including forests and terrestrial waters), materials, and visibility affected by acid deposition; and

(4) the costs and benefits of the control program created by this title.

The Task Force shall assure that this data is interpreted in such a way as to allow interested persons to determine as accurately

as possible the total effects of the emissions control program created by this title.

(d) The Task Force shall provide for the maintenance and updating of models that describe the interaction of emissions with the atmosphere such as the Regional Acid Deposition Model, and models that describe the response of ecosystems to acid deposition.

(e) The Task Force shall make a unified budget recommendation. Every two years beginning in 1992, the Task Force shall submit a report to the President and the Congress describing the results of its investigations and analysis of the effects of the emissions control program contained in this title.

(f)(1) The Administrator of the Environmental Protection Agency shall sponsor monitoring and research and submit to Congress annual and periodic assessment reports on—

(A) the occurrence and effects of acid deposition on surface waters located in that part of the United States west of the Mississippi River;

(B) the occurrence and effects of acid deposition on high elevation ecosystems (including forests, and surface waters); and

(C) the occurrence and effects of episodic acidification, particularly with respect to high elevation watersheds.

(2) The Administrator of the Environmental Protection Agency shall analyze data generated from the studies conducted under paragraph (1), data from the Western Lakes Survey and other appropriate research and utilize predictive modeling techniques that take into account the unique geographic, elimatological, and atmospheric conditions which exist in the western United States to determine the potential occurrence and effects of acid deposition due to any projected increases in the emission of sulfur dioxide and nitrogen oxides in that part of the United States located west of the Mississippi River. The Task Force shall include the results of the project conducted under this paragraph in the reports issued to Congress under paragraph (1).

(g) There are authorized to be appropriated the amount of $10,000,000 per year to carry out the purposes of this section, to remain available until expended.

MONITOR ACID RAIN PROGRAM IN CANADA

SEC. 409. (a) The Administrator of the Environmental Protection Agency, in consultation with the Secretary of State, the Secretary of Energy, and other persons the Administrator deems appropriate, shall prepare and submit a report to Congress on January 1, 1994, January 1, 1999, and January 1, 2005.

(b) The report to Congress shall analyze the current emission levels of sulfur dioxide and nitrogen oxides in each of the provinces participating in Canada's acid rain control program, the amount of emission reductions of sulfur dioxide and oxides of nitrogen achieved by each province, the methods utilized by each province in making those reductions, the costs to each province and the employment impacts in each province of making and maintaining those reductions.

(c) Beginning on Janaury 1, 1999, the reports shall also assess the degree to which each province is complying with its stated emissions cap.

REPORT ON CLEAN AND TECHNOLOGIES EXPORT PROGRAMS

SEC. 410. The Secretary of Energy in consultation with the Secretary of Commerce shall provide a report to the Congress within one year of enactment of this legislation which will identify, inventory and analyze clean coal technologies export programs within United States Government agencies including the Departments of State, Commerce, and Energy and at the Export-Import Bank and the Overseas Private Investment Corporation. The study shall address the effectiveness of interagency coordination of export promotion and determine the feasibility of establishing an interagency commission for the purpose of promoting the export and use of clean coal technologies.

ACID DEPOSITION RESEARCH BY THE UNITED STATES FISH AND WILDLIFE SERVICE

SEC. 411. There are authorized to be appropriated to the United States Fish and Wildlife Service of the Department of the Interior an amount equal to $500,000 to fund research related to acid deposition and the monitoring of high altitude mountain lakes in the Wind River Reservation, Wyoming, to be conducted through the Management Assistance Office of the United States Fish and Wildlife Service located in Lander, Wyoming and the University of Wyoming.

STUDY OF BUFFERING AND NEUTRALIZING AGENTS

SEC. 412. There are authorized to be appropriated to the United States Fish and Wildlife Service of the Department of the Interior an amount equal to $250,000 to fund a study to be conducted in conjunction with the University of Wyoming of the effectiveness of various buffering and neutralizing agents used to restore lakes and streams damaged by acid deposition.

ASBESTOS IN SCHOOLS

SEC. 413. (a) Section 203(d) of title II of the Toxic Substances Control Act is amended by adding the following new paragraph at the end thereof:

"(7) EPA INFORMATION OR ADVISORY.—The Administrator shall, not later than 30 days after enactment of this paragraph, publish and distribute to all local education agencies and State governors information or an advisory to—

"(A) facilitate public understanding of the relative risks associated with in-place asbestos-containing building materials;

"(B) promote the least burdensome response actions;

"(C) describe the limited circumstances in which asbestos removal is necessary to protect human health; and

"(D) describe the relative risks associated with removal of asbestos-containing building materials.

Such information or advisory shall be based on the best available scientific evidence and shall be revised, republished and redistributed as appropriate, to reflect new scientific findings.".

(b) Title II of the Toxic Substances Control Act is amended by adding the following new section at the end thereof:

"ASBESTOS HEALTH EFFECTS STUDY

"SEC. 216. The Administrator in conjunction with the Health Effects Institute shall conduct a study to identify, characterize, and quantify risks to human health from exposure to each form of asbestos, including but not limited to the health effects of serpentine and amphibole fibers, and report to Congress within twenty-four months after enactment of this section. Not later than ninety days after completion and submission of such study, the Administrator shall report to Congress with recommendations for modifications or changes, if any, to statutory or regulatory requirements under this Act. Such recommendations shall be based on the findings of the study prepared under this section and such other information as the Administrator deems appropriate.".

Mr. CHAFEE. Mr. President, I move to reconsider the vote.

Mr. BAUCUS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. SIMPSON. Mr. President, I just want a moment of time to have a brief colloquy with the Senator from Montana and perhaps the other floor manager, Senator CHAFEE. But in any event, I ask if the Senator would concur that we have dealt with, as completely as we think we could, the percentage reduction in the acid rain section of the bill. I would inquire of the floor manager, if we have not completed our work in that area, left some vestiges of that reprehensible provision, that we could work on that in conference together. Does the floor manager concur in that?

Mr. BAUCUS. Mr. President, I very much agree with the statement of the Senator from Wyoming. It is a snake out in the weeds. It is not yet dead. We have beat on it. It is practically dead. But it is true that we made major advances in repealing the percentage reduction, a very heinous, objectionable provision that is in the current law.

When we go to conference, that would be a good opportunity for us to make the best effort to repeal percentage reduction. The Senator makes a very good point. We made a major advance toward repeal of the percentage reduction, but when we go to conference we will try to go further.

Mr. CHAFEE. Mr. President, if there is anybody in this Senate who has been associated with percentage reduction, it has been the distinguished Senator from Wyoming. On my death bed, if I receive a notice that Senator SIMPSON is coming to look at this near corpse, I will think, ah, percentage reduction. I think we have beaten percentage reduction to death, but if we have not given it that death blow, we can follow up in some other fashion and get rid of it finally.

Mr. SIMPSON. Mr. President, the cadaverous figure that will be hanging over the death bed of the Senator from Rhode Island will be the shade of ALAN K. SIMPSON.

I want to thank these two remarkable people, Senator BAUCUS and Senator CHAFEE, for their ultimate patience and courtesy to all of us in a terribly intense several weeks. They did a superb job with great equanimity and great courtesy, and I think they are a tribute to the Senate in this instance and always in other cases. I thank the Chair.

EXPRESSIONS OF GRATITUDE

Mr. BAUCUS. Mr. President, I extend my deepest gratitude to the

staff that has worked even more than Senators on this bill. Frankly, I do not know where the staff has found the energy to devote the time and attention they have to this bill. Senators have stayed up late at night negotiating, sometimes past 2 or 3 in the morning. We would think we were tired. The staff had not even begun to work when we left. They were here in the morning when we returned at sometimes 8 o'clock, 7:30.

I would like to read the names of the people to whom I am personally very indebted and very grateful. They are David Strauss, staff director of the EPW Committee; Mike Shields, from my home State of Montana; Kate Kimball. I do not know anybody who worked harder and knows the intricacies of this bill more than Kate Kimball; Cliff Rothenstein; Joe Goffman.

I pay particular attention and note particularly Jennifer Hess. Jennifer was particularly concerned with the mobile source and stationary source provisions of this bill. She delivered her second child, Andrew McLean Beach, just a couple weeks ago. During one of the more intense points when we were working on this bill, in one of the sessions back in the room just off the floor, just a week or two prior to the delivery Jennifer fainted. She was working so hard. I am particularly grateful and indebted to her.

I mention also Lynn Schlosser. He has worked very diligently, as has everyone else, including Zach Church, Ingrid Utech, Janice Nace, and Karen Spence.

Those are just a few on the majority side. I know there are others who worked with the majority leader, who worked with the individual Senators, some Senators on the committee, some Senators not on the committee.

Mr. President, I frankly find it virtually impossible to understand how hard they have worked and the degree to which they have dedicated themselves to this bill. It is miraculous and I just want them to know they are very special people. We tip our hats to them. I do not see how they did it.

The PRESIDING OFFICER (Mr. EXON). The Senator from Rhode Island.

Mr. CHAFEE. Mr. President, I join in the tribute to the staff. The distinguished floor leader of the bill left it to me to cover those who worked particularly hard on our side, and I will read their names: Bob Hurley, who is the minority staff director; Kathy Cudlipp, whom we all know, who has been involved with clean air for so many, many years; Jimmie Powell, who masters the toxic air emission area like none of us have ever seen before; Steve Shimberg, counsel to the minority, who was here constantly and of tremendous help; and Steve Rody.

I also join in the tribute to the majority staff that Senator BAUCUS listed. It is a staff that has worked as a unit, regardless of whether they were on the majority or minority side. They have been terrific. This bill is a very, very complicated bill. There is no way in the world that the Senators could master what is in it.

Now, Mr. President, I would like to talk a little bit about those Senators with whom I have had the privilege of working. I start off with the majority leader. As I have said so many, many times, there is nobody in this Senate who knows this legislation better and is more eloquent in discussing it than the majority leader, Senator MITCHELL. I think it is only fair to say it is his baby. He has been nursing this along for years. As a mater of fact, he has constantly protested that he does not want to make a life's work out of it, and I am glad that he no longer has to make a life's work out of it, although there is a conference where we will be calling upon him.

Senator BAUCUS, from Montana, who is the chairman of the subcommittee and the floor manager for this legislation, has done a terrific job. He has been patient. He has many times made painful votes that were perhaps contrary to what he believed, but the agreement was an agreement and he stuck with the agreement in order to get a bill. He overlooked the fact that perfection might lie down the road somewhere; that he had to make these votes. I tip my hat to him for what he has done.

Senator DOLE, on our side, made these tough votes and lead us along, mustered the votes. We would never have won some of these crucial votes, 49, 50, without the tremendous support of Senator DOLE.

Senator DURENBERGER was here all the time. He is an expert in some particular section where we turned over the leadership, certainly on this side; toxic air emissions, for example. He was tremendous.

And the same for Senator JEFFORDS from Vermont.

I would like to also include what we might call the allowance twins. I mentioned them before, Senators DOMENICI and GRAMM.

So it has been a great pleasure to work on this legislation. We are not through yet. We have many more rows to hoe, particularly in the conference and what follows thereafter.

The PRESIDING OFFICER (Mr. KERRY). The Senator from Minnesota.

Mr. DURENBERGER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. LEVIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Michigan is recognized.

Mr. LEVIN. I thank the Chair.

(The remarks of Mr. LEVIN pertaining to the introduction of S. 2410 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

The PRESIDING OFFICER. The majority leader is recognized.

Mr. MITCHELL. Mr. President, I join my colleagues, Senator BAUCUS and Senator CHAFEE, in expressing gratitude to the members of the staff, both majority and minority, who each devoted very large portions of their lives over the past year to bring this legislation to reality. Particularly in the last 3 months, each of these staff members has devoted hundreds of hours, often working throughout the night to help us, the Members of the Senate, advance the legislation.

They all deserve the gratitude of the American people and, while some may recognize the names or faces of the Senators involved, very few Americans will recognize the names and faces of the staff persons. So their reward must be the certain knowledge that they participated in a tremendous achievement for the American people, legislation which will make life safer and better for millions of Americans for years to come.

I would like to again publicly acknowledge the gratitude I feel to the President of the United States who supported clean air legislation, went beyond that and presented his own bill, and with whom we worked cooperatively to reach this result. We did not and do not agree on every provision in the bill. But I think it clear that we would not be at this point but for the President's support and efforts, and for that I am grateful, as I am to my colleague, the distinguished Republican leader, Senator DOLE, with whom we have worked very closely now over the past few months and whose efforts to maintain the seemingly fragile compromise and to see it through to completion were indispensable and I am very grateful to him.

Finally, Mr. President, I cannot find the words to express the sense of gratitude I feel to Senator BAUCUS and Senator CHAFEE, two friends and colleagues with whom I have worked for nearly 10 years on the Senate Environment Committee to write and enact clean air legislation. We faced many obstacles.

Looking back over that 10-year period, there were a great many disappointments, keen disappointments; three times in the 1980's the committee reported clean area legislation—and everyone understands that just to get to the point of reporting a bill out of committee requires a tremendous

effort—only to fail to see it enacted. This time the committee produced under the tremendous leadership of its chairman, Senator BAUCUS, the subcommittee chairman, the most sweeping, comprehensive, and most effective bill yet, and we were able to bring it to completion with an overwhelming vote of support, 89 to 11, here in the Senate.

That has been an enormous tribute to perseverance, to their insistence, to their skill and to the commitment that they brought to this task. The more difficult something is, perhaps the better the victory.

I can say with my colleagues that it took 10 years, but right now I feel as though it were worth it, and if for no other reason that it gave me the opportunity to work even more closely and to become even more friendly on a personal and professional level with two of the finest persons I ever had the privilege to know, let alone work with, Senator BAUCUS and Senator CHAFEE. So I am very, very grateful to them.

Mr. President, I would like to mention two persons just briefly, one I mentioned in the press conference previously, but I think it should be part of the record. That is Roger Porter of the President's staff, who represented the President throughout the negotiations that led to this legislation. Mr. Porter conducted himself with enormous skill, integrity, ability, candor, and forthrightness.

When the negotiations were over, I told the President personally, and I now repeat publicly, that the President was superbly represented in the negotiations by Mr. Porter. The President should be pleased and commended for the quality of the person representing him in this effort.

We did not agree on many issues. We still do not agree on many issues. But the disagreements were never personal or disagreeable, and Mr. Porter always stated the administration's position in a very forthright and effective manner. I think all of my colleagues who participated in the negotiations would agree with that.

Finally, I cannot help but mention the person who has been, besides my parents, the most influential in my life and the most influential with respect to environmental legislation, and that is Senator Muskie, to whom reference has been made several times here. He was, in my judgment, the greatest environmental legislator in our Nation's history, the man who wrote these laws from scratch.

It is one thing to be revising laws and extending and improving them; it is another to create them as he did. He was the pioneer, the creator of environmental law in our society. It is my great honor to succeed him in the Senate. And to him I express gratitude not only on my own personal behalf, but for all Americans whose lives have been made safer and better as a result of his efforts. He was an inspiration to all of us, everyone here, and the man who made everything which followed him possible.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Republican leader.

Mr. DOLE. Mr. President, I know the hour is late. I certainly express my thanks to all of our colleagues and to a great number of staff people. Sometimes we fail to appreciate, particularly on my own staff, Jim Whittinghill, deputy staff director, who also spent I do not know how many hundreds of hours on this particular legislation. And Barbara Bankoff, who we consult with in the leaders' office, had been an invaluable help in many, many areas. Plus outstanding staff people from the Department of Energy, CEA, EPA, White House, Justice and Interior. The list of names are as follows:

DOE: Linda Stuntz, Doug Carter, Ted Williams, Carmen DiFiglio, Len Coburn, Mike Delello, and Dean Burridge.

CEA: Dick Smallensee and Howard Gruenspecht.

EPA: Bill Reilly, Bill Rosenberg, Jim Strock, Rob Brenner, Kate Fay, Jeanette Wiltse, Tom Kiernan, John Beale, Nancy Kete, Jill Grant, Keith Mason, Alan Eckert, Rich Osias, Charlie Carter, Howard Hoffman, Michael Winer, Kevin McLean, Mike Alushin, Dick Wilson, Stan Meiburg, Bill Harnett, and Brian McLean.

White House: Roger Porter, Bob Grady, Boyden Gray, Rob Fairweather, John Schmitz, David Rifkin, David Sloane, and Teresa Gorman.

Justice: Mark Haag, Jennifer Haverkamp, and Ann Shields.

Interior: David O'Neal, Barry Williamson, and Alby Modiano.

In each and every case they were directly involved and deeply involved on a daily and hourly basis and I do not know how many total hours were consumed in the majority leader's office because I was not there all the time, but some of them were, and it must have been hundreds of hours plus weekends, plus half the night. So I think in each case it is another demonstration of the dedication that our public, not just public officials, but that our civil servants have in the job they do. And many times it goes unnoticed and many times they are criticized, being part of the bureaucracy. I can say in this instance I do not know of any of those that I know personally that did not give every minute of their time and every ounce of their effort.

So we made history today. We passed the clean air bill. We have laid down a marker for future generations. It is a bill that dwarfs previous attempts. And I was on that committee at the time Senator Muskie was leading the efforts on the environment and I agree with the commenting earlier made by the majority leader that Senator Muskie certainly should be recognized a sort of the pioneer and sort of led the way in cleaning up the environment, and I was honored to be on that committee and had some opportunity to work with Senator Muskie at that time.

I would simply say that we have not done enough. It is not tough enough. And let us keep in mind we are not finished yet. This is one step. We have a House bill that is in the process. We have a conference where we will have differences between the House and Senate, between the Congress and the administration, and between different groups who have a right to speak up during the conference. It is called interest groups, not particularly special interest groups, but they may be environmental. It may be the private sector. And all of these voices must be heard and it must be reconciled before a bill finally comes back to us for final action.

So I would say that those who wanted rhetoric, well, they had their rhetoric. But those who wanted results, we had the results tonight, broad bipartisan support, precisely what we set out to do when it started. There really were no partisan differences. Once we agreed that certain amendments would in effect be deal breakers, then it became I think the responsibility of many of us to make certain that that did not happen.

So I would say, as I have said before, that certainly the distinguished majority leader deserves special credit and special congratulations because, notwithstanding the fact we were able to work together, first, he understood the bill and, second, he had the responsibility as the majority leader to get it done.

I did not have that responsibility. I wanted to help. But if it did not happen, I could say, "Well, I cannot help it; I do not have enough votes."

So I certainly commend the majority leader and the President of the United States and my colleagues, Senator BAUCUS, Senator CHAFEE, Senator DURENBERGER, and others.

Mr. President, the Senate has just made history. With the passage of the clean air bill, we have lain down a marker that future generations will look back upon and say, thank you, this is the day we turned the corner. This is the day we started to win the fight for cleaner air and a healthier America.

For more than a decade, concerned Americans have been demanding action. Today we have delivered.

From ground zero, we have crafted landmark legislation that dwarfs any previous attempt to clean up the air we breathe: It's massive in scope; com-

plex, comprehensive, and costly. But the bottom line says, it was worth it.

Some special interests say we haven't done enough. The bill isn't tough enough. Compared to what? Compared to current law, this act looks like the Declaration of Independence.

The Senator wanted a bill. The majority leader wanted a bill. The President of the United States wanted a bill. And so did the American people.

Together, we got the job done. For those who wanted rhetoric over results, I say you can breathe easier—thanks to the leadership of George Bush and GEORGE MITCHELL.

Mr. President, not since 1977—13 years ago—has the Congress passed a reauthorization of the Clean Air Act. Due to our failure to act, more than 50 percent of the population of the United States now lives in areas which are out of compliance with the national ambient air quality standards set by the Federal Government.

During these 13 years, the Clean Air Act has almost become the second Civil War, pitting State against State, alcohol fuels against hydrocarbon fuels, hard coal against soft coal, and unions and business owners against professional environmentalists.

Into this fray came a true environmental hero—George Bush. The President was willing to put his enormous popularity at risk to achieve dramatically significant advancements in the cleanliness of the air we all breath.

Without question, we would not be at this point today without the leadership of our President; without the environmental commitment he made to the American people during the Presidential campaign; and without his forceful action to ensure those promises were met by the Congress of the United States.

In joining my colleague, the distinguished majority leader, in sponsoring the substitute before us today, I intended to address critics of the legislation—whether against it for being too weak, or too strong—with the fact that we have achieved a good, tough, yet responsible stewardship of the quality of our Nation's air.

This has been a difficult bill for the Senate to consider. There were no magic wands for us to wave. We had to sit down, roll up our sleeves, and sift through stack after stack of studies, recommendations, and, at times, pure speculation. But after days and weeks and months of dedicated and determined work, we ended up with a good, solid package.

I don't think we have rushed a bill through. As a matter of fact, the Senate consumed 21 days on this bill. No issue that I am aware of escaped intense scrutiny.

Some critics charge that we should have adopted two amendments—one which would have imposed what are called Federal implementation plans and a second which would have imposed unprecedented new costs and other requirements on fuel and automobiles.

As I said in earlier statements, although Federal implementation plans may sound like a reasonable, get-tough, policy, they will not work. We simply don't have the Federal personnel to test the tailpipe of every car, to visit every factory, dry cleaner, baker and gasoline pump. This would have resulted in a total breakdown in any area with a Federal implementation plan and would have resulted in worse—not better—air quality.

The second amendment, although very well intentioned, just went too far. There are areas in the country which may need to require ultra-clean vehicles and ultra-clean fuels. Los Angeles, for example, has such severe air pollution problems that some fuels we haven't even considered will be necessary to bring that area into attainment. But we don't need this approach everywhere.

That is the reason I joined with the junior Senator from South Dakota and a number of other colleagues in proposing an amendment to require reformulated gasoline—reformulated gasoline with fewer toxics and more oxygen—to be used in all vehicles in the most polluted cities. In the first year alone, this one amendment will require the use of 18 billion gallons of cleaner fuel than was originally proposed in the substitute. This is a major, achievable, and yet responsible, amendment.

We have debated jobs on the floor. Let me state very clearly once again—this bill will cost thousands of jobs and affect thousands of others. The majority of these jobs won't be from identifiable plant closings. Rather, it will come from a decision to invest in pollution control rather than keeping 100 percent current employees; it will come from complying with the act as opposed to giving raises, health benefits, parental leave, or the long list of other initiatives some of my colleagues continue to demand.

But, the bill has strong, defensible benefits. Health costs will be reduced, air will be tangibly cleaner, and we will be able to hand to our children a country far less polluted than it was on the day that they were born.

This has not been an easy struggle. Regional, as opposed to partisan, differences has to be put aside for the benefit of the Union. Long days and nights had to be invested. And every Senator had to delve into the minutiae.

Many of my Republican colleagues spent what to some Senators would seem to be careers on this bill, including those on the Committee on Environment and Public Works—Senators CHAFEE, SIMPSON, SYMMS, DURENBERGER, WARNER, JEFFORDS, and HUMPHREY. Other gave untold hours in addition to their other duties. Finally, I would like to congratulate two Senators on the other side of the aisle. First, the distinguished chairman of the Appropriations Committee, and President pro tempore, ROBERT C. BYRD of West Virginia. The residents of that State got even more than they could have imagined when they sent him to Washington, and he has represented them with dignity and tenacity.

The majority leader, GEORGE MITCHELL, deserves great credit for the success of this bill. He has been subjected to unfair criticism and chronic complaining. Yet he has proceeded fairly and patiently, keeping his sight on our goal of a cleaner healthier America, I congratulate him on this success, and look forward to our service together across this sometimes wide, sometimes very narrow center aisle of the Senate.

Mr. BAUCUS. Mr. President, I join the majority leader, the minority leader, and Senator CHAFEE in expressing gratitude for the content of this bill, and also for the efforts that everyone has undertaken.

I can think of no bill in the two terms that I have been in the Senate which is as sweeping, as comprehensive, and yet as much in the public interest, truly in the public interest, as this bill.

We pass many bills, Mr. President—tax bills, reconciliation bills. We confirm Presidential appointments. We take many actions here. But I cannot think of any other effort which is as comprehensive and yet as much truly in the public interest as this bill. I, therefore, am very gratified to be associated with it.

I also cannot think of any other effort which not only required but which exercised so much teamwork to ensure the passage of a major bill, beginning with the President—the President's green light, the President's strong interest in the passage of clean air legislation, indeed his submission of a major bill to the Senate. He was, in a sense, the team leader. He helped initiate the clean air legislation this year.

However, I think the true team leader, the true quarterback, the one who is most responsible for the passage of this truly important bill is the majority leader, Senator MITCHELL.

I cannot find the words that express my admiration for his skills, his intelligence, his creativity, his patience—and certainly his patience—his willingness, and his energy to go the extra mile to find a way to pass a bill that truly is in the best public interest. And certainly his demeanor, his manner, his courtesy, his dignity, which also helped clear the passage of this bill.

I again cannot find the words to express the degree to which I appreciate

what he has done. I say all this because the American people should realize that it is the majority leader, it is Senator MITCHELL, probably more than any other person on the face of this Earth, who is most responsible for the passage of this bill.

Indeed, were it not for Senator MITCHELL, I am quite confident, Mr. President, that either this clean air bill would not pass or, if it were to pass, it would be so diluted, it would be so chopped up, it would be such a mishmash that we would not here tonight be speaking so proudly in favor of it.

The American people should recognize that it is Senator MITCHELL primarily who is most responsible for this major, very important legislation.

That is not to diminish the efforts of the minority leader, Senator DOLE. Senator DOLE's involvement, too, was integral and necessary for the passage of this bill. And certainly Senator CHAFEE, who has been on this committee, who has worked more, spent more time for more years in reaching this moment tonight than I, by far.

Mr. President, I am just a part of this process. I helped. I stood here on the floor. I helped to put a few of the pieces together. I have done all that I can, all that I could humanly call up to try to aid in finding a solution to the passage of this bill.

But it is others, frankly, who deserve lion's share of the credit—certainly the majority leader, the President, Senator DOLE, and Senator CHAFEE. And the American people should, too, realize not only the majority leader, but those other Senators, as well as the President, who deserve major credit for this bill.

I suppose, Mr. President, we are waxing eloquent tonight because we just finally passed this bill and we want to savor our victory. We want to savor this moment where we truly have done so much, in our judgment, for the public interest.

But beside all that and beyond that, I believe very strongly that, after the House passes a similar bill and after we have adopted a conference report and the President signs the bill, not only the Senate but House Members and the executive branch and the American people will be further down the road toward breathing cleaner air. And tonight we are taking one step down that road, a major step, but certainly a step that we all savor tonight.

Mr. President, I yield the floor.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAUCUS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER TO PRINT S. 1630, AS PASSED

Mr. BAUCUS. Mr. President, I ask unanimous consent that the bill be printed as passed.

The PRESIDING OFFICER. Without objection, it is so ordered.

MORNING BUSINESS

Mr. BAUCUS. Mr. President, I ask unanimous consent there be a period for morning business with Senators permitted to speak therein.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMEMORATING NATIONAL AUCTIONEERS WEEK APRIL 1-7 1990

Mr. DOLE. Mr. President, this week 5,000 members of the National Auctioneers Association, with headquarters located in Overland Park, KS, are celebrating National Auctioneers Week. Under the leadership of President Ronald Faison of Zebulon, NC, and President-Elect Wayne Stewart of Audubon, IA, The centuries old tradition of the auction still plays an important role in cities and rural communities across the Nation.

OPEN FORUM WITH COMPETITIVE BIDDING

Whether the auctioneer is selling livestock, grain, classic automobiles, real estate, or fine antiques, the excitement of the event and the enthusiasm of the crowd bring good fun and good business. The Federal Government, preferring a competitive setting to stimulate good prices in an open forum, uses the auction to dispose of surplus and used property.

Auctioneers will have an increasing role in the sale or Government property. Last year, Congress recognized the important role for auctioneers when it passed the financial Institutions Recovery, Reform and Enforcement Act. In that legislation, auction marketing is specifically included as a method for disposing of assets from failed thrift institutions.

A recent issue of the Auctioneer magazine describes the dynamics of a public auction in an article which I ask unanimous consent be printed at this point in my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DISCOVER THE EXCITEMENT DURING NATIONAL AUCTIONEERS WEEK

Auctioneers throughout the United States and Canada will be calling attention to the many advantages of the auction method of marketing during National Auctioneers Week. Sponsored by the 5,000-member National Auctioneers Association (NAA). This year's observance is scheduled for April 1-7th.

By some accounts, the auction dates back to 500 B.C. But auctioneers aren't content to rest upon the accomplishments of their venerable past. Instead, they are playing a vital role in today's ecomony and looking eagerly toward the 21st century.

Today's auctioneers are more than fast talkers. They are professionals, knowledgeable in a wide range of marketing skills. And the auction, once thought of as the sale of last resort, has been recognized as an alternative capable of turning valuable property into instant cash for the seller.

Many auctioneers learned the basics of their profession through the intensive instruction offered at one of the several privately operated auction schools, while others got into the business though home study or under the tutelage of an older, experienced practitioner. After embarking upon their new careers, many have continued their educations by attending the educational seminars and workshops conducted by the NAA and the various state associations. Other have enrolled in the program sponsored by the Certified Auctioneers Institute, an organization affiliated with the NAA.

While an estimated 23 million Americans attend auctions annually, a surprising number of people have never discovered the advantages offered by auction marketing and are apprehensive about what they will encounter at an auction.

Perhaps one of the most misunderstood aspects of the auction is the rapid-fire chant of the auctioneer. In the simplest terms, the chant is merely a series of numbers connected by "filler words" that allow the buyers time to think between bids. Rhythm is as important as speed in developing an effective chant, but nothing is more vital than clarity. Auctioneers will adjust their speed, depending on the bidding experience level of their crowd, and the numbers in a good chant will be readily understood.

Upon arrival at the auction site, you should register for a bidder number and read the rules printed on it or displayed on posters. Don't be embarrassed to ask questions if you don't understand a policy. You should also inspect the merchandise carefully, as most is sold on an "an is-where is" basis. This means it is not guaranteed.

We've all heard the old story about the fellow who attended an auction, scratched his nose and came home with an item he hadn't intended to buy. Well, don't be frightened away by such tales—the auctioneer realizes when you are bidding and when you are not.

In order to bid at an auction, you must make contact with the auctioneer or the ringperson. To do this, hold up up bidder card, your hand, or shout "yes." The auctioneer will make eye contact with you, take your bid and immediately turn and seek another bid. You may remove yourself from the process at any point by shaking your head "no." And, should the auctioneer misinterpret your signal, simply report the mistake right away.

The important thing to remember is that the procedure is easily understood—and fun. Over the years, the auction method of marketing has proved an effective price-setting mechanism that takes into account current market variables. That's true whatever commodity is being sold. The pricing of such raw materials as grain, tobacco, and wood are directly tied to the auction block, yet the auctioneer also helps establish the value of more glamorous commodities such as fine art and antiques.

The objectivity and fairness of a well-run auction is often favored by the courts to carry out their decrees and by executors and trustees to help fulfull their responsibilities. The legal presumption is that a public auction of property to the highest bidder is a sales among disinterested third parties and that the result will be the best and highest available price.

The auction method has long been associated with rural America, but today you're just as likely to find it being used in a major metropolitan area as selling livestock down on the farm. While more livestock is sold at auction than by all other sales methods combined, the auctioneer is equally at home amid the sophistication of a charity fundraiser. The fast-pace wholesale auto auction, developed in the 1930's as a device to help balance dealer inventories, continues to thrive, while other auctioneers set records for the sale of the classic Duesenbergs and '57 Chevys favored by automobile collectors.

One of the fastest-growing segments of the auction industry is concerned with the sale of real estate. Today, the competitive bidding process is being used to sell everything from urban residences to farmland, from industrial plants to apartment complexes. The reason is simple—it works.

With the auction, time-consuming private negotiations are eliminated, and the auctioneer's focused-marketing skills bring in the maximum number of qualified buyers. Prior financing arrangements ensure earlier closure of the sale, and money the seller might have had to spend for insurance, taxes, and maintenance while the property was "on the market" is freed for more productive purposes.

The auction advantage isn't limited to the private sector. Local, state and federal agencies have disposed of surplus property worth tens of millions of dollars through auctions.

Auctioning excess public property is a "win-win" situation for both the government and the taxpayer. Whether it's the town council offering surplus office equipment or the Resolution Trust Corp. disposing of prime real estate acquired from a failed S&L, auctions generate the best prices. And they do through competitive bidding under full public scrutiny.

The auction can be the best place to buy what you're looking for—or sell what you have—at a fair market price.

200 MEMBERS IN KANSAS

Mr. DOLE. I join Kansas Auctioneers Association President Leland W. Boesker of Moundridge and Col. L.H. "Bing" Carter of Gardner, a longtime leader in the profession, and more than 200 members from Kansas in encouraging everyone to experience auction fever by attending an auction during National Auctioneers Week.

MRS. SUE ROYAL TOWNSEND, CORONER OF AIKEN COUNTY

Mr. THURMOND. Mr. President, I rise today to pay tribute to Mrs. Sue Royal Townsend, a valued friend and the able coroner of my home county of Aiken, SC, for her innovative efforts to reduce traffic fatalities. Mrs. Townsend, who has served as Aiken County Coroner since 1982, is a dedicated public servant. I believe that her program, which was highlighted in the March 12, 1990, edition of the Augusta Chronicle, could prove extremely beneficial to every county in America.

Last year, South Carolina State Representative Edward Simpson (Clemson) introduced legislation to require that the locations of traffic fatalities be marked by white crosses. Although the bill was tabled in the house of representative's education committee, the impetus behind it was not to be forgotten.

Upon receiving permission from the South Carolina State Highway Department, Mrs. Townsend began painting white crosses to mark the location of traffic fatalities in her county. The crosses, which are 2 by 2½ feet, serve to remind passing motorists of dangerous areas and will hopefully encourage them to drive more carefully. According to Mrs. Townsend, the program has received nothing but positive responses in the community.

In 1989, 996 people lost their lives as the result of traffic accidents in South Carolina. In Aiken County, 37 of these deaths will be marked with white crosses by a coroner who is attempting to raise triumph from tragedy. I commend Sue Townsend for her commitment to this endeavor, and I urge my colleagues to consider supporting similar programs in their communities. As Mrs. Townsend has so appropriately demonstrated, we must do all that we can to ensure the safety of the citizenry who we as public officials have been elected to serve.

I ask unanimous consent that the Augusta Chronicle article, entitled "White Markers Carry Deadly Message" be included in the RECORD immediately following my remarks, and I encourage each of my colleagues to read it in its entirety.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Augusta Chronicle, Mar. 12, 1990]

WHITE MARKERS CARRY DEADLY MESSAGE

(By Diane Spitzer)

AIKEN.—White crosses dot the highways in Aiken County—a constant reminder of those who died there.

They are a message from the coroner, who has seen each of the traffic fatalities.

The white spray-painted 2-by-2½-foot crosses are there to show the exact spots where people have died in traffic accidents. Coroner Sue Townsend said she hopes the crosses will make people drive more carefully.

"The purpose of it first of all is for people to be aware that it's happened and maybe they'll slow down because that's a dangerous area," she said.

When a person dies in an accident, family members often like to go to the scene, Mrs. Townsend said, and the crosses are there to help them find it.

Cynthia Clark's son, Bryan, was killed in a March 4 traffic accident on Interstate 20 in Aiken County near the South Carolina-Georgia line. Mrs. Townsend marked the scene with a cross.

"I'm still looking for it, but when she told me the road had been marked, I got a warm feeling, like how nice that is," Mrs. Clark said. "It's nice because parents do wonder. 'Where did it happen?' I think it's a nice, warm thing that she's doing for the families because families want to know.

"I'd like to see the crosses all across the state, so people would be aware how dangerous the road is," Mrs. Clark said.

Mrs. Townsend began painting the crosses on the road in April after she got the idea from a bill that was introduced in the South Carolina Legislature that would have required the locations of traffic fatalities be marked by white crosses. The bill was introduced by Rep. Edward Simpson, R-Clemson, but was tabled in the House of Representatives Education Committee.

"I thought it was a neat idea so I got permission to do it," she said. "I have gotten nothing but positive responses."

Mrs. Townsend remembers the first cross she painted. It was on Piney Heights Road in Langley, where a young girl was killed in an accident.

Some interpreted that first cross as proof a satanic cult was involved in the girl's death. Mrs. Townsend said someone even covered the cross with black paint.

"I tried to make it real clear then that I was the one who painted the cross in the road, and there wasn't a cult doing it."

There were 37 traffic deaths in Aiken County last year. Mrs. Townsend said she hasn't painted crosses at each of the locations, but her goal is to get them all done by this summer.

"I can't forget any spot that I've worked in this county. I have some families who call me and say 'Why haven't you put a cross there?'

"Hopefully this spring we're going to go back and try to put them all down. I want these families to know those people haven't been forgotten."

Mrs. Townsend said she tries to put the crosses down immediately after a fatal accident, while the roads are still blocked. But sometimes she forgets and other times she can't do it because the roads are wet.

State highway patrolmen do try to help her though.

"While I've been attending to other matters, they have done them for me," she said. "We work as a team out there. In fact, they will remind me that I have forgotten the cross."

It has only cost Mrs. Townsend about $3 to paint the crosses in the road. She has a plastic and wooden stencil of a cross, and she found a case of paint that is used for painting the white lines in the road in the county maintenance shed.

Aiken County is the only county in the state to paint crosses on the road.

TERRY ANDERSON

Mr. MOYNIHAN. Mr. President, I rise to inform my colleagues that today marks the 1,844th day that Terry Anderson has been held in captivity in Beirut.

TRIBUTE TO MARGARET V. O'HARA ON HER 100TH BIRTHDAY

Mr. LEVIN. Mr. President, I am privileged to have the opportunity to wish Ms. Margaret V. O'Hara a happy 100th birthday on this 3d day of April, 1990.

Born in Mount Pleasant, MI, to Francis P. O'Hara and Anna J. Monahan, Margaret O'Hara went on to graduate from Sacred Heart Academy in Mount Pleasant, MI. She is also a graduate of Wayne State University and has received a life teaching certificate from Central Michigan University.

Margaret V. O'Hara taught for 50 years in Michigan's public school system, and she has spent the majority of her teaching days at the Greenfield Union School in Detroit, MI.

On Sunday, April 8, 1990, there will be a reception in her honor celebrating her 100th birthday with family and friends. I am pleased to extend birthday wishes to Margaret O'Hara, whose dedication to the education of our young provided an enduring contribution to her community, her State, and her Nation.

PROF. JACK WALKER OF THE UNIVERSITY OF MICHIGAN

Mr. LEVIN. Mr. President, I come before the Senate to commemorate the life and contributions of Prof. Jack Walker, the chair of the Department of Political Science at the University of Michigan.

Professor Walker died on January 29, in an automobile accident in California. He was on sabbatical serving as a fellow at the Center for Advanced Study in the Behavioral Sciences in Stanford, CA.

Professor Walker authored two books, wrote numerous articles, received the Guggenheim Fellowship, and was a senior fellow at the Woodrow Wilson International Center for Scholars.

In addition, Professor Walker served as an LSA associate dean for academic appointments from 1984 to 1987. He was also a research scientist at the Institute of Public Policy, serving as its director from 1974 to 1979.

Mr. President, academia has lost a true and respected scholar in Professor Walker. He will be deeply missed by family, friends, and colleagues.

Mr. BREAUX. Mr. President, this week I have the privilege of participating in the 2000/Love tennis celebration to End World Hunger by the Year 2000. 2000/Love features four of our brightest tennis stars, Ivan Lendl, John McEnroe, Andre Agassi, and Tim Mayotte, who will play exhibition matches tonight at the Capital Centre. Most of the proceeds from 2000/Love will benefit the Hunger Project and a smaller amount will go to D.C. Hunger Action. The organizations hope to raise $300,000 from the event.

Mr. President, 950 million people—one-fifth of the world's population—suffer from chronic malnutrition. One out of every five human beings spend all their waking hours thinking about and looking for food. Malnutrition claims 35,000 people each day and more than a quarter of a million children every month. At present, Ethiopia, Somalia, and the Sudan are in the grip of famine and millions of people are threatened.

The Hunger Project is a worldwide effort to raise the world's consciousness about the problem of hunger. As of January 1990, more than 6 million people in 152 countries have declared their commitment to the end of the persistence of hunger by enrolling themselves in the Hunger Project. In addition, it has staff and volunteer operations in 22 countries.

However, hunger is not confined to sub-Saharan Africa, South Asia, and Latin America. Thirty-two million Americans, one-third of them children, live in poverty. Many, if not most of these people are hungry. Many of America's hungry live here in our Nation's Capital. D.C. Hunger Action is an information clearinghouse for Washington, DC. It maintains lists of emergency food providers in the Capital, documents the extent of hunger in the District of Columbia, and advocates legislation addressing the hunger crisis.

The battle against hunger must be fought on several fronts. The United States and other nations provide emergency food assistance to famine-stricken regions. Unfortunately, corrupt officials and civil war have prevented much of this food from reaching the people who need it. Limited food giveaways have also occurred in this country.

However, environmental degradation and poor farming methods pose greater long-term problems for solving the problem of hunger. Climatic change is reshaping and expanding the world's deserts, especially in Africa. Alternating periods of drought and heavy rainfall also contribute to soil erosion, as do the poor farming methods prevalent in many Third World countries. Deforestation, which may provide farmland for a short period, eventually contributes to changes in rainfall and temperature patterns, which then lead to desertification.

Mr. President, there are a host of other issues which the world will have to address as part of any solution to the hunger crisis. Health care in the developing world, especially for children under five, must be improved. Basic education must be improved as well, especially for women. Studies have shown that educating women lowers the mortality rate of their children, and results in increased food production. Most importantly, according to a 1986 study by the United Nations, they have fewer children. Slowing the rate of population growth in impoverished countries is a vital component of the war on hunger.

Although eradication of hunger is costly and must compete with other foreign and domestic priorities for scarce Federal dollars, the world is undergoing a remarkable transformation that could result in a concerted effort by the industrialized North to help the poorer nations of the south. 2000/Love estimates that it will cost $3 billion a year to end chronic hunger, both at home and abroad. This estimate puts a worldwide assault on hunger well within the realm of possibility, especially if the anticipated cuts in defense expenditures by NATO and Soviet bloc forces are realized.

Mr. President, I salute the organizers and the players who have helped to make tonight's exhibition possible. I know that my colleagues join me in supporting 2000/Love's goal of eliminating hunger by the turn of the century so that no member of the family of man shall go without food.

RHODE ISLAND RESIDENT RECEIVES NEH/READER'S DIGEST AWARD

Mr. PELL. Mr. President, I am proud to note that a constituent of mine has recently received a prestigious award for excellence in education. Mr. Jeffrey E. Simpson of Middletown, RI, has been named one of 52 teacher-scholars of the year by the National Endowment for the Humanities. One elementary or secondary teacher from each State, the District of Columbia, and the U.S. Virgin Islands was selected from among 566 applicants. Mr. Simpson will receive a substantial cash award allowing a year's leave during which he will pursue studies in Romantic poetry. His school, St. George's High School in Middletown, RI, will receive $500 for the expansion of their library.

The award, now in its second year, was established by the Endowment in conjunction with Reader's Digest to encourage increased scholarship among teachers. Mr. Simpson's receipt of the award reflects the tremendous faith the Endowment has in his future as an educator. I would like to extend my sincere congratulations to Mr. Simpson and to wish him well in his academic pursuits and career as an educator.

UNLV RUNNIN' REBELS CAPTURE NCAA CHAMPIONSHIP

Mr. REID. Mr. President, all Nevada is smiling today after watching the University of Nevada-Las Vegas Runnin' Rebels capture the NCAA national basketball championship last night in Denver, CO. The UNLV Rebels ran all the way to a 103–73 victory over the Duke University Blue Devils. This 30-point margin was the widest ever in a NCAA championship game—103 points is also the most points ever scored by a team in the

history of the NCAA finals. After a highly successful season and tournament wins against some tough teams, the taste of victory was sweeter than any of the thousands of Rebel fans, including myself, could have imagined.

Let me take this opportunity to pay a public tribute to the Runnin' Rebels, a group of exceptionally talented athletes, and their able and dedicated coach, Jerry Tarkanian. Working together they brought UNLV its first-ever national title. These fine young men have given the State of Nevada, the city of Las Vegas, and their own university reason to be proud.

This was Coach Tarkanian's 17th season at UNLV and throughout his years here, he has committed himself to building a basketball team that strives toward the ideals of athletic excellence and sportsmanship. It is obvious by last night's performance that the Runnin' Rebels have realized these goals.

Twice before, in 1977 and 1987, Coach Tarkanian has skillfully led the Runnin' Rebels down the road to the Final Four. The Rebels' rise to national recognition has paralleled the development of the university itself. Nevada is the fastest growing State in the country and Clark County, which is home to UNLV, is one of the fastest growing regions. That is why it is so important that UNLV receive the national attention it deserves. Not only is the university proud of its championship basketball team, but it is proud to be rated one of the West's up-and-coming universities in the October 1989 edition of U.S. News & World Report.

The Runnin' Rebels have done a great service to their school and to the State of Nevada by spreading the word across the country that Las Vegas has more to offer than bright lights and gambling halls. These young men represent Las Vegas with all the expertise, charm, and flair that they exhibit on the basketball court. And in return, the southern Nevada community has opened up its arms to support the burgeoning university and the Runnin' Rebels. Few Nevadans, old and new, have been able to resist catching the Rebel fever which has made the thousands of fans, clad in their scarlet and grey, just about as famous as the players themselves. And it is obvious to those across the Nation who watched last night's game that the Runnin' Rebels and their fans are a combination that just cannot be beat—something Nevadans knew all along.

Mr. BRYAN. I heartily concur with the comments just made by my senior colleague.

REGARDING IRAQ

Mr. PELL. Mr. President, Iraq's President, Saddam Hussein, has taken a very dangerous course with regard to chemical weapons. His latest statements demonstrate that Iraq is one of a handful of nations who do not yet understand that chemical weapons are viewed as anathema by most of the civilized world. Threatening to use these abhorrent weapons is irresponsible and provocative.

We must remember that Iraq used chemical weapons illegally against Iraq on a number of occasions in the course of the Iran-Iraq war, and Iraq gassed its own citizens in 1988. Against this background, Saddam Hussein's boasts and threats are particularly chilling. I urge that he cease and desist from these bellicose policies and actions lest he create problems he will deeply regret.

These latest threats by Iraq underscore the importance of legislative action at an early date to erect effective sanctions against nations that use chemical weapons illegally or against their own citizens. The Senate will have an opportunity to address this issue when it takes up S. 195, the Chemical and Biological Weapons Control Act of 1989. This bill, which I introduced and which currently has more than 30 cosponsors, was reported unanimously by the Committee on Foreign Relations late last year.

CONGRESSIONAL PAY

Mr. REID. Mr. President, recently my colleagues and I were confronted with the difficult matter of congressional pay. A complex issue by nature, the situation became particularly tense in the charged political arena. Amidst the many passionate voices, reason and logic were difficult to hear.

Like many of my colleagues, I needed to study the issue not the politics. When I was finally able to close the doors to my office, I was delighted to read "Pay Raise Proposals for Members of Congress, Top Officials and Federal Judges: Issues and Outlooks." Once again, the Congressional Research Service proved itself as an invaluable resource.

In this CRS report James McGrath at the Library of Congress prepared an excellent, well-researched paper. Congress will surely revisit the matter of congressional pay. For those who are seriously interested in this complex issue, I highly recommend Mr. McGrath's valuable contribution to this debate.

MESSAGES FROM THE HOUSE

At 7:49 p.m., a message from the House of Representatives, delivered by Mr. Hays, one of its reading clerks, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1096) to provide for the use and distribution of funds awarded the Seminole Indian in dockets 73, 151, and 73-A of the Indian Claims Commission.

The message also announced that the House has passed the following bills, without amendment:

S. 1813. An act to ensure that funds provided under section 4213 of the Indian Alcohol and Substance Abuse Prevention and Treatment Act of 1986 may be used to acquire land for emergency shelters; and

S. 1949. An act to amend the Labor Management Relations Act of 1947 to permit parties engaged in collective bargaining to bargain over the establishment and administration of trust funds to provide financial assistance for employee housing.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-2697. A communication from the Secretary to the Interstate Commerce Commission, transmitting, pursuant to law, notice that the Commission in Finance Docket No. 31469 has extended the time period for issuing a final decision by 60 days; to the Committee on Commerce, Science, and Transportation.

EC-2698. A communication from the Under Secretary of Defense (Acquisition), transmitting, pursuant to law, a report on Department of Defense procurement from Small and Other Business firms for the period October 1989 through January 1990; to the Committee on Small Business.

EC-2699. A communication from the Secretary of Agriculture, transmitting a draft of proposed legislation to recover costs of establishing standards and specifications for agricultural products; to the Committee on Agriculture, Nutrition and Forestry.

EC-2700. A communication from the Assistant Secretary of the Army (Installations, Logistics & Environment), transmitting, pursuant to law, notification of the intent to study the conversion to contract performance of a commercial activity being performed by Department of Defense employees; to the Committee on Armed Services.

EC-2701. A communication from the Secretary of the Navy, transmitting, pursuant to law, notification of a proposal to transfer the submarine *Requin* to the Carnegie Institute, Pittsburgh, Pennsylvania; to the Committee on Armed Services.

EC-2702. A communication from the Secretary of the Interstate Commerce Commission, transmitting, pursuant to law, notification that the Commission in Finance Docket No. 31530 has extended the time period for issuing a final decision by 60 days; to the Committee on Commerce, Science, and Transportation.

EC-2703. A communication from the Deputy Associate Director for Collection and Disbursement, Minerals Management Service, Department of the Interior, transmitting, pursuant to law, notification of the Department's intention to make refunds of offshore lease revenues where a refund or recoupment is appropriate; to the Committee on Energy and Natural Resources.

EC-2704. A communication from the Deputy Associate Director for Collection and Disbursement, Minerals Management

Service, Department of the Interior, transmitting, pursuant to law, a report on the refund of certain overpayments of offshore lease revenues; to the Committee on Energy and Natural Resources.

EC-2705. A communication from the Assistant Administrator of the Environmental Protection Agency, transmitting, pursuant to law, a report on progress in implementing the Great Lakes Water Quality Agreement with Canada; to the Committee on Environment and Public Works.

EC-2706. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, a report entitled "Incentives Arrangements Offered by Health Maintenance Organization and Competitive Medical Plans to Physicians"; to the Committee on Finance.

EC-2707. A communication from the Chairman of the Interstate Commerce Commission, transmitting, pursuant to law, the annual report of the Commission under the Government in the Sunshine Act for calendar year 1989; to the Committee on Governmental Affairs.

EC-2708. A communication from the Secretary of Transportation, transmitting, pursuant to law, a report on activities undertaken to implement the Commercial Space Launch Act of 1984 and the Commercial Space Launch Act Amendments of 1988; to the Committee on Commerce, Science, and Transportation.

EC-2709. A communication from the Assistant Attorney General (Legislative Affairs), transmitting a draft of proposed legislation entitled "Debt Collection Act Amendments of 1990"; to the Committee on Governmental Affairs.

EC-2710. A communication from the Acting Director of the Office of Government Ethics, transmitting a draft of proposed legislation to amend the Ethics in Government Act of 1978 to increase the authorization of appropriations for the Office of Government Ethics; to the Committee on Governmental Affairs.

EC-2711. A communication from the Secretary of Health and Human Services, transmitting a draft of proposed legislation to provide for the financing of the retirement system of the Public Health Service Commissioned Corps on an actuarially sound basis; to the Committee on Governmental Affairs.

EC-2712. A communication from the Director of the Office of Personnel Management, transmitting, pursuant to law, the annual report of the Office under the Freedom of Information Act for calendar year 1989; to the Committee on the Judiciary.

EC-2713. A communication from the General Counsel of the Federal Mediation and Conciliation Service, transmitting, pursuant to law, the annual report of the Service under the Freedom of Information Act for calendar year 1989; to the Committee on the Judiciary.

EC-2714. A communication from the Attorney General of the United States, transmitting, pursuant to law, notification that in appealing the grant of a preliminary injunction in Olympic Federal Savings and Loan Association v. Director, Office of Thrift Supervision; to the Committee on the Judiciary.

EC-2715. A communication from the Chairman of the National Commission on Libraries and Information Science, transmitting a draft of proposed legislation to improve the operation of the United States National Commission on Libraries and Information Science, and for other purposes; to the Committee on Labor and Human Resources.

EC-2716. A communication from the Secretary of Veterans Affairs, transmitting a draft of proposed legislation to amend title 38, section 5004(a)(3)(A), United States Code, to raise the Department of Veterans Affairs' minor construction cost limitation from $2 million to $3 million, and for other purposes; to the Committee on Veterans' Affairs.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-446. A resolution adopted by the City Council of Duluth, Minnesota favoring the reauthorization of the Low-Income Home Energy Assistance Program and an increase in appropriations for the program; to the Committee on Appropriations.

POM-447. A joint resolution adopted by the Legislature of the State of Maine; to the Committee on Armed Services.

"JOINT RESOLUTION MEMORIALIZING THE PRESIDENT AND THE CONGRESS OF THE UNITED STATES TO RECOGNIZE THE ACHIEVEMENTS OF WOMEN IN COMBAT POSITIONS

"We your Memorialists, the Members of the One Hundred and Fourteenth Legislature of the State of Maine, now assembled in the Second Regular Session, most respectfully present and petition the President and the Congress of the United States as follows:

"Whereas the 225,000 women serving in the Armed Forces of the United States comprise almost 11 percent of the total strength of the armed services; and

"Whereas the women who are now serving in the armed forces have sought and received assignments that are likely to expose many of them to hostile fire, such as serving in the military police and as helicopter pilots; and

"Whereas 771 female soldiers joined in the invasion of Panama and many of them participated in combat operations distinguishing themselves with valor; and

"Whereas many of the women carried full combat gear and participated in active engagement with Panamanian Defense Forces, but are nonetheless not entitled to receive a Combat Infantryman Badge because of Army regulations that limit the badge only to certain types of units; and

"Whereas it is equitable to ensure that when women soldiers are exposed to the same risks as their male counterparts they will receive the appropriate honors and credit; now, therefore, be it

"RESOLVED: That We, your Memorialists, respectfully recommend and urge the President and the Congress of the United States to direct the Department of Defense to change Army regulations so as to ensure that a Combat Participation Badge is available to all who face hostile fire, regardless of unit designation, and to take other action necessary in order that the women who distinguished themselves in the invasion of Panama are recognized with all appropriate honors; and be it further

"RESOLVED: That suitable copies of this Memorial, duly authenticated by the Secretary of State, be transmitted to the Honorable George H.W. Bush, President of the United States, to the President of the Senate and the Speaker of the House of Representatives of the Congress of the United States and to each Member of the Maine Congressional Delegation."

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. KENNEDY, from the Committee on Labor and Human Resources, without amendment:

H.R. 7: A bill to amend the Carl D. Perkins Vocational Education Act to extend the authorities contained in such Ac through the fiscal year 1995.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. BENTSEN, from the Committee on Finance:

Jo Anne B. Barnhart, of Delaware, to be Assistant Secretary for Family Support, Department of Health and Human Services.

(The above nomination was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. HOLLINGS, from the Committee on Commerce, Science, and Transportation:

James B. Edwards, of South Carolina, to be a Member of the Board of Directors of the Communications Satellite Corporation until the date of the annual meeting of the Corporation in 1991;

James B. Edwards, of South Carolina, to be a Member of the Board of Directors of the Communications Satellite Corporation until the date of the annual meeting of the Corporation in 1993;

William D. Phillips, of Missouri, to be an Associate Director of the Office of Science and Technology Policy;

Eugene Wong, of California, to be an Associate Director of the Office of Science and Technology Policy;

Donald Robert Quartel, Jr., of Florida, to be a Federal Maritime Commissioner for the term expiring June 30, 1994;

Henry J. Cauthen, of South Carolina, to be a Member of the Board of Directors of the Corporation for Public Broadcasting for a term expiring March 1, 1994;

Lloyd Kaiser, of Pennsylvania, to be a Member of the Board of Directors of the Corporation for Public Broadcasting for a term expiring March 1, 1994; and

Robert Marshall White, of Minnesota, to be Under Secretary of Commerce for Technology.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

Mr. HOLLINGS. Mr. President, for the Committee on Commerce, Science, and Transportation, I also report favorably nomination lists in the National Oceanic and Atmospheric Administration and the Coast Guard, which were printed in full in the CONGRESSIONAL RECORDS of January 23 and 25, and March 5, 1990, and ask unanimous

consent, to save the expense of reprinting on the Executive Calendar, that these nominations lie at the Secretary's desk for the information of Senators.

The PRESIDING OFFICER. Without objection, it is so ordered.

By Mr. REIGLE, from the Committee on Banking, Housing, and Urban Development:

Edward W. Kelley, Jr., of Texas, to be a member of the Board of Governors of the Federal Reserve System for a term of fourteen years from February 1, 1990; and

Robert H. Swan, of Utah, to be a Member of the National Credit Union Administration Board for the term of six years expiring August 2, 1995.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. KERRY (for himself, Mr. DASCHLE, Mr. HARKIN, Mr. CONRAD, and Mr. EXON):

S. 2394. A bill to extend and review agricultural price support and related programs for the 1991 through 1995 crops of wheat, feed grains, oilseeds, and other commodities, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. MACK (for himself and Mr. GRAHAM):

S. 2395. A bill to temporarily suspend the duty on metal oxide varistors; to the Committee on Finance.

By Mr. CRANSTON (by request):

S. 2396. A bill to amend title 38, sections 5002(d), 5004(a)(3)(A), and 5009(i)(2) United States Code, to raise the Department of Veterans Affairs' minor construction cost limitation from $2 to $3 million, and for other purposes; to the Committee on Veterans Affairs.

S. 2397. A bill to amend title 38, United States Code, to expand the Secretary's authority to make temporary appointments of certain health care personnel employed in the Veterans Health Services and Research Administration; to the Committee on Veterans Affairs.

By Mr. DANFORTH (for himself, Mr. MCCAIN, Mr. HOLLINGS, Mr. LOTT, Mr. PACKWOOD, Mr. BURNS, Mr. PRESSLER, and Mr. BOND):

S. 2398. A bill to authorize the continuation of the National Senior Olympic Games; to the Committee on Commerce, Science, and Transportation.

By Mr. DANFORTH (for himself, Mr. MCCAIN, Mr. LOTT, Mr. PACKWOOD, Mr. BURNS, Mr. PRESSLER, and Mr. BOND):

S. 2399. A bill to authorize the registration of the word mark "National Senior Olympics"; to the Committee on Commerce, Science, and Transportation.

By Mr. ARMSTRONG:

S. 2400. A bill to amend section 7430 of the Internal Revenue Code of 1986 with respect to eligibility of taxpayers to receive attorney fees and other costs; to the Committee on Finance.

By Mr. KASTEN:

S. 2401. A bill to amend the Food Security Act of 1985 to eliminate barriers to great lakes maritime trade, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. DODD:

S. 2402. A bill for the relief of Mary P. Carlton and Lee Alan Tan; to the Committee on the Judiciary.

By Mr. BAUCUS:

S. 2403. A bill to designate certain lands in Montana as wilderness, to release other forest lands for multiple use management, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. MACK (for himself and Mr. GRAHAM):

S. 2404. A bill to permit issuance of a certificate of documentation for employment in the coastwise trade of the United States for the vessel the *Lady Rose Anne*; to the Committee on Commerce, Science, and Transportation.

By Mr. GARN (for himself and Mr. HATCH):

S. 2405. A bill to direct the Secretary of the Army to convey to the University of Utah a portion of the property constituting Fort Douglas, UT; to the Committee on Armed Services.

By Mr. CRANSTON (by request):

S. 2406. A bill to amend title 26, United States Code, to require the Secretary of the Treasury to disclose certain information from the files of the Internal Revenue Service to the Secretary of Veterans Affairs for the purpose of verifying entitlement to, and determining the correct amount of, title 38, United States Code, pension benefits; to the Committee on Finance.

By Mr. BENTSEN:

S. 2407. A bill to amend the Public Health Service Act with the respect to the size of the service areas of qualified organ procurement organizations, and to provide for the establishment of a temporary advisory committee to make certain recommendations with respect to the procurement and transportation of human organs; to the Committee on Labor and Human Resources.

By Mr. GLENN:

S. 2408. A bill to establish a system for labeling of plastic resin products, and to promote recycling of plastics and use of degradable plastics; to the Committee on Environment and Public Works.

By Mr. FOWLER (for himself, Mr. DOLE, Mr. PRYOR, Mr. BOND, Mr. COCHRAN, Mr. BOREN, Mr. CONRAD, Mr. BAUCUS, Mr. KERREY, Mr. HEFLIN, Mr. HELMS, Mr. MCCONNELL, and Mr. DASCHLE):

S. 2409. A bill to develop and promote environmentally sound agricultural practices, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. LEVIN:

S. 2410. A bill to amend the Internal Revenue Code of 1986 to prevent avoidance of tax by certain foreign-owned corporations and to impose a tax on dispositions of stock in domestic corporations by 10 percent foreign shareholders; to the Committee on Finance.

By Mr. BYRD:

S.J. Res. 284. A joint resolution to designate the week beginning September 16, 1990 as "National Give the Kids a Fighting Chance Week"; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. MOYNIHAN (for himself, Mr. BENTSEN, Mr. BRADLEY, and Mr. HEINZ):

S. Res. 267. A resolution to express the sense of the Senate that the President ought promptly send to the Senate nominations for the vacancies on the Social Security Board of Trustees; to the Committee on Finance.

By Mr. LAUTENBERG (for himself, Mr EXON, Mr. SIMON, Mr. D'AMATO, Mr. SPECTER, Mr. BAUCUS, and Mr. REID):

S. Con. Res. 115. A concurrent resolution express the sense of the Congress regarding future funding of Amtrak; to the Committee on Commerce, Science, and Transportation.

By Mr. D'AMATO (for himself and Mr. DECONCINI):

S. Con. Res. 116. A concurrent resolution commending Poland and Prime Minister Mazowiecki for their courageous and resolute stand in permitting charter flights to carry Soviet Jews to Israel; to the Committee on Foreign Relations.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. KERREY (for himself, Mr. DASCHLE, Mr. HARKIN, Mr. CONRAD, and Mr. EXON):

S. 2394. A bill to extend and revise agricultural price support and related programs for the 1991 through 1995 crops of wheat, feed grains, oilseeds, and other commodities, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

FARM INCOME AND FLEXIBILITY ACT

● Mr. KERREY. Mr. President, I am pleased to join my colleagues, Senators DASCHLE, HARKIN, CONRAD, and EXON, in introducing the Farm Income and Flexibility Act of 1990.

This legislation is more that the product of several Senators from the Plains States. It reflects the views and recommendations of the thousands of farmers and ranchers that we have heard from over the past several months.

In the hearing and meetings that we have held with producers, they told us—

They are frustrated by the complexity and rigidity of today's farm programs;

They are fearful that target prices and loan rates will continue their 5-year decline; and

They are concerned that environmental pressures will stampede Congress into imposing stringent new regulations dictating how they must farm.

Today I am pleased to tell those farmers and ranchers that the bill we are introducing addresses each of these concerns.

Our bill would provide producers the income protection they need and the planting freedom they desire so that they—rather than the Government—can decide which crops to grow. This needed flexibility, coupled with more equitable price support levels for various commodities, will allow producers to be more responsive to market signals and make it easier for them to conserve soil and reduce chemical use by following sound crop rotation practices.

In the process of granting producers more flexibility, I believe we have developed a program that is far simpler as well. The result should come as welcome relief to producers who in the 1980's spent more time filling out paperwork at their ASCS office than their forefathers did behind a plow.

The legislation would accomplish these objectives by—

Abolishing the current crop-specific base system in favor of returning to a Normal Crop Acreage [NCA] base for the entire farm;

Providing cost-of-production increases in target prices and higher, but still market-clearing loan rates; and

Offering higher income support levels for certain crops, such as soybeans, oats, and barley, so that increased planting flexibility will not result in unwarranted acreage shifts to the major commodities for which the Government today guarantees a relatively higher target price.

Mr. President, I must point out another major concern held by those who produce the food that feeds our Nation. They are dismayed and resentful because the Department of Agriculture is as likely to criticize our farm programs as it is to defend those same programs before a consuming public.

I share that concern. In my view, the administration has failed to offer consumers or taxpayers any rationale for maintaining our farm programs. The administration had a chance to make that case to the public when they unveiled their farm bill proposals in early February, but they let that opportunity, and others, pass by.

Why should these farm programs be continued? Why should the Federal Government continue to provide a system of price supports for farmers?

Let me give three reasons. First, the inherent instability that afflicts agricultural production is unlike that facing any other industry. Farmers do not know when they plant a crop whether that crop will fail or produce a record harvest. That risk can threaten the best of farmers, and consumers can ill-afford to leave the supply of the most basic commodity—food—to the vagaries of nature.

When they are well managed, our farm programs allow us in good years to isolate surplus production in farmer-held reserves that can be released when drought or other natural disasters threaten a sudden drop in food production. Thus these programs help us to temper both the very low and very high prices that can wreak havoc for producers, the livestock industry, and consumers.

Second, it is a fact that Americans have the best bargain in the world when it comes to food costs. According to the United Nations and the U.S. Department of Agriculture, U.S. consumers today spend just 10.4 percent of this disposable income on food—the lowest level in history and less than consumers in any other country.

What's more, the producer's share of each dollar spent on food has dropped to an all-time low. In 1988, according to USDA, farmers and ranchers received only 30 cents of each dollar spent on food consumed at home. That is a drop of 19 percent from the level of just 8 years ago, when, in 1980, producers received 37 cents of each food dollar.

Third, farm program costs do not account for a disproportional share of total Federal outlays. The cost of Commodity Credit Corporation price support programs is estimated to be $8.2 billion in fiscal year 1990 and $10.5 billion in fiscal year 1991. Both figures represent less than 1 percent of the Federal budget in those years.

If we secure the $12 billion that we believe is needed to maintain a reasonable farm program in fiscal year 1991, such a cost would still represent less than 1 percent of the Federal budget, less than the average of farm program costs during the decade of the 1980's, and about the same share of the budget that was spent on agriculture during the "boom" years of the 1970's.

I would like to make one final point, Mr. President. This bill includes, for the first time, a declaration from Congress to the Secretary of Agriculture regarding the wheat and feed grain ending stock quantities that must be maintained to ensure that farm prices remain at reasonable levels. The purpose of this section is to ensure, as I believe we can, that our farm programs are managed in such a way that producers, consumers, and taxpayers all stand to gain from our farm policy.

Mr. President, I ask unanimous consent that a summary of the legislation and the text of the bill be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2394

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the "Farm Income and Flexibility Act of 1990".

(b) TABLE OF CONTENTS.—The table of contents is as follows:

Sec. 1. Short title; table of contents.

TITLE I—WOOL AND MOHAIR

Sec. 101. Extension of wool and mohair price support program.

TITLE II—WHEAT

Sec. 201. Loans, payments, and acreage reduction program for the 1991 through 1995 crops of wheat.
Sec. 202. Nonapplicability of certificate requirements.
Sec. 203. Suspension of land use, wheat marketing allocation, and producer certificate provisions.
Sec. 204. Suspension of certain quota provisions.
Sec. 205. Nonapplicability of section 107 of the Agricultural Act of 1949 to the 1991 through 1995 crops of wheat.

TITLE III—FEED GRAINS

Sec. 301. Loans, payments, and acreage reduction program for the 1991 through 1995 crops of feed grains.
Sec. 302. Nonapplicability of section 105 of the Agricultural Act of 1949 to the 1991 through 1995 crops of feed grains.

TITLE IV—OILSEEDS

Sec. 401. Loans for oilseeds for 1991 through 1995 marketing years.

TITLE V—SUGAR

Sec. 501. Sugar price support.

TITLE VI—GENERAL COMMODITY PROVISIONS

SUBTITLE A—ACREAGE BASE AND YIELD SYSTEM

Sec. 601. Acreage base and yield system.

SUBTITLE B—WHEAT AND FEED GRAIN ENDING STOCKS

Sec. 611. Wheat and feed grain ending stocks.
Sec. 612. Public comment on wheat and feed grain programs.

SUBTITLE C—MISCELLANEOUS COMMODITY PROVISIONS

Sec. 621. Payment limitations.
Sec. 622. Advance deficiency and diversion payments.
Sec. 623. Advance recourse commodity loans.
Sec. 624. Interest payment certificates.
Sec. 625. Commodity Credit Corporation sales price restrictions.
Sec. 626. Disaster payments.
Sec. 627. Multiyear set-asides.
Sec. 628. Supplemental set-aside and acreage limitation authority.
Sec. 629. Producer reserve program for wheat and feed grains.
Sec. 630. Normally planted acreage.
Sec. 631. Special grazing and hay program.
Sec. 632. Advance announcement of programs.
Sec. 633. Determinations of the Secretary.
Sec. 634. Application of terms in the Agricultural Act of 1949.
Sec. 635. Normal supply.
Sec. 636. National Agricultural Cost of Production Standards Review Board.

SUBTITLE D—HONEY

Sec. 641. Honey price support.

SUBTITLE E—TECHNICAL AND CONFORMING AMENDMENTS

Sec. 651. Conforming amendments.

SUBTITLE F—EFFECTIVE DATE

Sec. 661. Effective date.

TITLE I—WOOL AND MOHAIR

SEC. 101. EXTENSION OF WOOL AND MOHAIR PRICE SUPPORT PROGRAM.

Section 703 of the National Wool Act of 1954 (7 U.S.C. 1782) is amended by striking "1990" each place it appears in subsections (a) and (b) and inserting "1995".

TITLE II—WHEAT

SEC. 201. LOANS, PAYMENTS, AND ACREAGE REDUCTION PROGRAM FOR THE 1991 THROUGH 1995 CROPS OF WHEAT.

The Agricultural Act of 1949 is amended—

(1) effective beginning with the 1991 crop of wheat, by repealing sections 107A, 107B, and 107D (7 U.S.C. 1445b, 1445b-1, and 1445b-3); and

(2) effective only for the 1991 through 1995 crops of wheat, by inserting after section 107 (7 U.S.C. 1445a) the following new section:

"SEC. 107A. LOANS, PAYMENTS, AND ACREAGE REDUCTION PROGRAM FOR THE 1991 THROUGH 1995 CROPS OF WHEAT.

"Notwithstanding any other provision of law:

"(a) LOANS AND PURCHASES.—

"(1) IN GENERAL.—Except as provided in paragraphs (2) and (3), the Secretary shall make available to producers loans and purchases for each of the 1991 through 1995 crops of wheat at such level as the Secretary determines will maintain the competitive relationship of wheat to other grains in domestic and export markets after taking into consideration the cost of producing wheat, supply and demand conditions, and world prices for wheat.

"(2) MINIMUM LEVEL.—The loan and purchase level determined under paragraph (1) shall not be less than 75 percent, nor more than 85 percent, of the simple average price received by producers of wheat, as determined by the Secretary, during the marketing years for the immediately preceding 5 crops of wheat, excluding the year in which the average price was the highest and the year in which the average price was the lowest in the period, except that the loan and purchase level for a crop determined under this subsection may not be less than $2.75 per bushel.

"(3) REPAYMENT.—

"(A) IN GENERAL.—The Secretary may permit a producer to repay a loan made under paragraph (1) for a crop at a level that is the lesser of—

"(i) the loan level determined for the crop; or

"(ii) the prevailing world market price for wheat, as determined by the Secretary.

"(B) PREVAILING WORLD MARKET PRICE.—If the Secretary permits a producer to repay a loan in accordance with subparagraph (A), the Secretary shall prescribe by regulation—

"(i) a formula to define the prevailing world market price for wheat; and

"(ii) a mechanism by which the Secretary shall announce periodically the prevailing world market price for wheat.

"(4) SIMPLE AVERAGE PRICE.—For purposes of this section, the simple average price received by producers for the immediately preceding marketing year shall be based on the latest information available to the Secretary at the time of the determination.

"(b) PAYMENTS.—

"(1) DEFICIENCY PAYMENTS.—

"(A) IN GENERAL.—The Secretary shall make available to producers payments for each of the 1991 through 1995 crops of wheat in an amount computed by multiplying—

"(i) the payment rate; by

"(ii) the acreage on the farm planted to the crop; by

"(iii) the farm program payment yield for the crop for the farm.

"(B) DEVOTING ACREAGE TO CONSERVATION USES.—

"(i) ACREAGE CONSIDERED PLANTED.—If an acreage reduction program under subsection (d)(2) is in effect for a crop of wheat and the producers on a farm devote a portion of the acreage of the farm (as determined in accordance with subsection (d)(2)(A)) equal to more than 8 percent of the acreage of the farm for the crop planted during the previous crop year (hereinafter referred to in this subparagraph as the 'previous acreage'), or all of the previous acreage, to conservation uses (except as provided in subparagraph (G))—

"(I) the portion (or all) of the previous acreage of the farm in excess of 8 percent of the acreage devoted to conservation uses (except as provided in subparagraph (G)) shall be considered to be planted for the purpose of determining the normal crop acreage farm base in accordance with section 503 and for the purpose of determining the acreage on the farm required to be devoted to conservation uses in accordance with subsection (d)(2)(C); and

"(II) the producers shall be eligible for payments under this paragraph on the acreage.

"(ii) PAYMENTS.—Notwithstanding any other provision of this section, any producer who elects to devote all or a portion of the previous acreage of the farm to conservation uses (or other uses as provided in subparagraph (G)) under this subparagraph shall receive deficiency payments on the acreage that is considered to be planted and eligible for payments under this subparagraph for the crop at a per-bushel rate established by the Secretary, except that the rate may not be established at less than the projected deficiency payment rate for the crop, as determined by the Secretary. The projected payment rate for the crop shall be announced by the Secretary prior to the period during which wheat producers may agree to participate in the program for the crop.

"(iii) ADVERSE EFFECT ON AGRIBUSINESS AND OTHER INTERESTS.—The Secretary shall implement this subparagraph in such a manner as to minimize the adverse effect on agribusiness and other agriculturally related economic interests within any county, State, or region. In carrying out this subparagraph, the Secretary is authorized to restrict the total quantity of acreage that may be taken out of production under this subparagraph, taking into consideration the total quantity of acreage that has or will be removed from production under other price support, production adjustment, or conservation program activities. No restrictions on the quantity of acreage that may be taken out of production in accordance with this subparagraph in a crop year shall be imposed in the case of a county in which producers were eligible to receive disaster emergency loans under section 321 of the Consolidated Farm and Rural Development Act (7 U.S.C. 1961) as a result of a disaster that occurred during the crop year.

"(iv) CROP ACREAGE AND PAYMENT YIELD.—The normal crop acreage farm base and wheat farm program payment yield of the farm shall not be reduced due to the fact that a portion (or all) of the previous acreage of the farm was devoted to conserving uses (except as provided in subparagraph (G)) under this subparagraph.

"(v) LIMITATION.—Other than as provided in clauses (i) through (iv), payments may not be made under this paragraph for any crop of wheat on a greater acreage than the acreage actually planted to wheat.

"(vi) CONSERVATION USE ACREAGE UNDER OTHER PROGRAMS.—Any acreage considered to be planted to wheat in accordance with clause (i) may not also be designated as conservation use acreage for the purpose of fulfilling any provisions under any acreage reduction or land diversion program requiring that the producers devote a specified acreage to conservation uses.

"(C) PAYMENT RATE.—

"(i) IN GENERAL.—The payment rate for wheat shall be the amount by which the established price for the crop of wheat exceeds the higher of—

"(I) the weighted average market price in a State received by producers in the State during the first 5 months of the marketing year for the crop, as determined by the Secretary; or

"(II) the loan level determined for the crop.

"(ii) WEIGHTED AVERAGE MARKET PRICE.—In determining the payment rate, per bushel, for established price payments for a crop of wheat under this subparagraph, the Secretary shall use the weighted average market price in a State, per bushel of wheat, received by producers in the State during the first 5 months of the marketing year for the crop, as determined by the Secretary.

"(D) ESTIMATED PAYMENTS.—

"(i) IN GENERAL.—Notwithstanding any other provision of this Act, in the case of each of the 1991 through 1995 crops of wheat, the Secretary shall—

"(I) by December 1 of each of the marketing years for the crops, estimate the weighted average market price in each State, per bushel of wheat, received by producers in the State during the marketing year;

"(II) by December 15 of the marketing year, use the estimate to make available to producers who have elected the payment option authorized by this clause not less than 75 percent of the increase in established price payments estimated to be payable with respect to the crop under this subparagraph; and

"(III) adjust the amount of each final established price payment for wheat to reflect any difference between the amount of any estimated payment made under this clause and the amount of actual payment due under this subparagraph.

"(ii) TIME FOR ELECTION.—Producers shall elect the payment option authorized by clause (i) at the time of entering into a contract to participate in the program established by this section for the crop.

"(E) ESTABLISHED PRICE.—The established price for wheat shall not be less than $4.00 per bushel for each of the 1991 through 1995 crops of wheat, except that the established price for wheat for each of the crops shall be adjusted to reflect any change during the last calendar year ending before the beginning of each such crop year in the index of prices paid by farmers for production items, taxes, and wage rates in the calendar year, as determined by the Secretary.

"(F) REDUCTION FOR DISASTER PAYMENTS.—The total quantity on which payments would otherwise be payable to a producer on a farm for any crop under this paragraph shall be reduced by the quantity on which any disaster payment is made to the producer for the crop under paragraph (2).

"(G) CONSERVING CROPS.—The Secretary may permit, subject to such terms and con-

ditions as the Secretary may prescribe, all or any part of acreage otherwise required to be devoted to conservation uses as a condition of qualifying for payments under subparagraph (B) to be devoted to sweet sorghum or the production of guar, sesame, castor beans, mustard seed, crambe, plantago ovato, flaxseed, triticale, rye, commodities for which no substantial domestic production or market exists but that could yield industrial raw material being imported, or likely to be imported, into the United States, or commodities grown for experimental purposes (including kenaf and milkweed), subject to the following sentence. The Secretary may permit the acreage to be devoted to the production only if the Secretary determines that—

"(i) the production is not likely to increase the cost of the price support program and will not affect farm income adversely; and

"(ii) the production is needed to provide an adequate supply of the commodity, or, in the case of commodities for which no substantial domestic production or market exists but that could yield industrial raw materials, the production is needed to encourage domestic manufacture of the raw material.

"(2) DISASTER PAYMENTS.—

"(A) PREVENTED PLANTING.—

"(i) IN GENERAL.—Except as provided in subparagraph (C), if the Secretary determines that the producers on a farm are prevented from planting any portion of the acreage intended for wheat to wheat or other nonconserving crops because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the Secretary shall make a prevented planting disaster payment to the producers in an amount equal to the product obtained by multiplying—

"(I) the number of acres so affected but not to exceed the acreage planted to wheat for harvest (including any acreage that the producers were prevented from planting to wheat or other nonconserving crops in lieu of wheat because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the immediately preceding year; by

"(II) 75 percent of the farm program payment yield established by the Secretary; by

"(III) a payment rate equal to 33⅓ percent of the average of the established prices for the crop.

"(ii) FORM OF PAYMENT.—Payments made by the Secretary under this subparagraph may be made in the form of cash.

"(B) REDUCED YIELDS.—Except as provided in subparagraph (C), if the Secretary determines that because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the total quantity of wheat that the producers are able to harvest on any farm is less than the result of multiplying 60 percent of the farm program payment yield established by the Secretary for the crop by the acreage planted for harvest for the crop, the Secretary shall make a reduced yield disaster payment to the producers at a rate equal to 50 percent of the established price for the crop for the deficiency in production below 60 percent for the crop.

"(C) CROP INSURANCE.—Producers on a farm shall not be eligible for—

"(i) prevented planting disaster payments under subparagraph (A), if prevented planting crop insurance is available to the producers under the Federal Crop Insurance Act (7 U.S.C. 1501 et seq.) with respect to the wheat acreage of the producers; or

"(ii) reduced yield disaster payments under subparagraph (B), if reduced yield crop insurance is available to the producers under such Act with respect to the wheat acreage of the producers.

"(D) ADMINISTRATION.—

"(i) ECONOMIC EMERGENCIES.—Notwithstanding subparagraph (C), the Secretary may make a disaster payment to the producers on a farm under this paragraph if the Secretary determines that—

"(I) as the result of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the producers have suffered substantial losses of production either from being prevented from planting wheat or other nonconserving crops or from reduced yields;

"(II) the losses have created an economic emergency for the producers;

"(III) crop insurance indemnity payments under the Federal Crop Insurance Act (7 U.S.C. 1501 et seq.) and other forms of assistance made available by the Federal Government to the producers for the losses are insufficient to alleviate the economic emergency; and

"(IV) additional assistance must be made available to the producers to alleviate the economic emergency.

"(ii) ADJUSTMENTS.—The Secretary may make such adjustments in the amount of payments made available under this subparagraph with respect to an individual farm so as to ensure the equitable allotment of the payments among producers, taking into account other forms of Federal disaster assistance provided to the producers for the crop involved.

"(c) PAYMENT YIELDS.—The farm program payment yields for farms for each crop of wheat shall be determined under title V.

"(d) ACREAGE REDUCTION PROGRAM.—

"(1) IN GENERAL.—

"(A) ESTABLISHMENT.—Notwithstanding any other provision of this Act, except as provided in subparagraph (E), if the Secretary determines that the total supply of wheat, in the absence of an acreage reduction program, will be excessive taking into account the need for an adequate carryover to maintain reasonable and stable supplies and prices and to meet a national emergency, the Secretary may provide for any crop of wheat an acreage reduction program as described in paragraph (2).

"(B) CONSERVATION ACREAGE RESERVE FACTOR.—In making a determination under subparagraph (A), the Secretary shall take into consideration the number of acres placed in the conservation acreage reserve established under section 1231 of the Food Security Act of 1985 (16 U.S.C. 3831).

"(C) ANNOUNCEMENTS.—If the Secretary elects to put an acreage reduction program into effect for any crop year, the Secretary shall announce the program not later than June 1 prior to the calendar year in which the crop is harvested.

"(D) ADJUSTMENTS.—Not later than July 31 of the year previous to the year in which the crop is harvested, the Secretary may make adjustments in the program announced under subparagraph (C) if the Secretary determines that there has been a significant change in the total supply of wheat since the program was first announced.

"(E) INELIGIBILITY FOR LOANS, PURCHASES, AND PAYMENTS.—As a condition of eligibility for loans, purchases, and payments for any such crop of wheat, the producers on a farm must comply with the terms and conditions of an acreage reduction program and, if applicable, a land diversion program.

"(2) ACREAGE REDUCTION PROGRAM.—

"(A) PERCENTAGE REDUCTIONS.—If a wheat acreage reduction program is announced under paragraph (1), the reduction shall be achieved by applying a uniform percentage reduction to the acreage of wheat planted for harvest on each wheat-producing farm.

"(B) INELIGIBILITY FOR LOANS, PURCHASES, AND PAYMENTS.—Producers who knowingly do not comply with the acreage reduction program shall be ineligible for wheat loans, purchases, and payments with respect to that farm.

"(C) ACREAGE DEVOTED TO CONSERVATION USES.—A number of acres on the farm equal to the number of acres required to be withdrawn from the production of wheat shall be devoted to conservation uses, in accordance with regulations issued by the Secretary.

"(3) ADMINISTRATION.—

"(A) PROTECTION FROM WEEDS AND EROSION.—The regulations issued by the Secretary under paragraph (2) with respect to acreage required to be devoted to conservation uses shall assure protection of the acreage from weeds and wind and water erosion.

"(B) CONSERVING CROPS.—The Secretary may permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of the acreage to be devoted to sweet sorghum, or the production of guar, sesame, castor beans, mustard seed, crambe, plantago ovato, flaxseed, triticale, rye, milkweed, or other commodity, if the Secretary determines that the production is needed to provide an adequate supply of the commodities, is not likely to increase the cost of the price support program, and will not affect farm income adversely.

"(C) HAYING AND GRAZING.—

"(i) IN GENERAL.—Except as provided in clauses (ii) and (iii), haying and grazing of acreage designated as conservation use acreage for the purpose of meeting any requirements established under an acreage reduction program (including a program conducted under subsection (b)(1)(B)) or land diversion program established under this section shall be permitted, except during any consecutive 5-month period that is established by the State committee established under section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(b)) for a State. The 5-month period shall be established during the period beginning April 1, and ending October 31, of a year.

"(ii) NATURAL DISASTERS.—In the case of a natural disaster, the Secretary may permit unlimited haying and grazing on the acreage.

"(iii) ADVERSE ECONOMIC EFFECTS.—Haying and grazing shall not be permitted for any crop under clause (i) if the Secretary determines that haying and grazing would have an adverse economic effect.

"(D) SUMMER FALLOW PRACTICES.—In determining the quantity of land to be devoted to conservation uses under an acreage reduction program with respect to land that has been farmed under summer fallow practices, as defined by the Secretary, the Secretary shall consider the effects of soil erosion and such other factors as the Secretary considers appropriate.

"(4) LAND DIVERSION PAYMENTS.—

"(A) IN GENERAL.—The Secretary may make land diversion payments to producers of wheat, whether or not an acreage reduction program for wheat is in effect, if the Secretary determines that the land diversion payments are necessary to assist in adjusting the total national acreage of wheat to desirable goals. The land diversion pay-

ments shall be made to producers who, to the extent prescribed by the Secretary, devote to approved conservation uses an acreage of cropland on the farm in accordance with land diversion contracts entered into by the Secretary with the producers.

"(B) AMOUNTS.—The amounts payable to producers under land diversion contracts may be determined through the submission of bids for the contracts by producers in such manner as the Secretary may prescribe or through such other means as the Secretary determines appropriate. In determining the acceptability of contract offers, the Secretary shall take into consideration the extent of the diversion to be undertaken by the producers and the productivity of the acreage diverted.

"(C) ADVERSE EFFECTS ON COUNTY OR LOCAL COMMUNITY.—The Secretary shall limit the total acreage to be diverted under agreements in any county or local community so as not to affect adversely the economy of the county or local community.

"(5) CONSERVATION PRACTICES.—

"(A) WILDLIFE FOOD PLOTS OR HABITAT.—Any acreage required to be devoted to conservation uses and any additional diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies. The Secretary may pay an appropriate share of the cost of practices designed to carry out the purposes of this subparagraph.

"(B) SOIL AND WATER CONSERVATION PRACTICES.—The Secretary may also pay an appropriate share of the cost of approved soil and water conservation practices (including practices that may be effective for a number of years) established by the producer on acreage required to be devoted to conservation uses or on additional diverted acreage.

"(C) PUBLIC ACCESSIBILITY.—The Secretary may provide for an additional payment on the acreage in an amount determined by the Secretary to be appropriate in relation to the benefit to the general public if the producer agrees to permit, without other compensation, access to all or such portion of the farm, as the Secretary may prescribe, by the general public, for hunting, trapping, fishing, and hiking, subject to applicable State and Federal regulations.

"(6) PARTICIPATION AGREEMENTS.—

"(A) EXECUTION.—An operator of a farm desiring to participate in the program conducted under this subsection shall execute an agreement with the Secretary providing for the participation not later than such date as the Secretary may prescribe.

"(B) TERMINATION OR MODIFICATION.—The Secretary may, by mutual agreement with producers on a farm, terminate or modify any such agreement only by reducing any acreage reduction requirements or land diversion requirements, if the Secretary determines the action necessary because of an emergency created by drought or other disaster or to prevent or alleviate a shortage in the supply of agricultural commodities. The Secretary may not modify the agreement to provide for deficiency payments to be made to producers in any manner that is inconsistent with subsection (b)(1).

"(e) VOLUNTARY PRODUCTION LIMITATION PROGRAM.—

"(1) IN GENERAL.—If a wheat acreage reduction program or a land diversion program is announced under subsection (d) for a crop of wheat, the producers on a farm shall be considered to have met the requirements of such program if the producers meet the requirements of the voluntary production limitation program established under this subsection.

"(2) LIMITATION ON MARKETING.—In order to comply with the voluntary production limitation program, the producers on a farm must agree not to market, barter, donate, or use on the farm (including use as feed for livestock) in a marketing year a quantity of wheat in excess of the wheat production limitation quantity for the farm for the marketing year.

"(3) PRODUCTION LIMITATION QUANTITY.—For purposes of this subsection, the production limitation quantity for a farm for a marketing year for a crop shall equal the product obtained by multiplying—

"(A) the acreage permitted to be planted to wheat under the acreage reduction program or land diversion program in effect for the crop for the farm; by

"(B) the higher of—

"(i) the farm program payment yield for the farm; or

"(ii) the average of the yield per harvested acre for wheat for the farm for each of the 5 crop years immediately preceding the crop year during which the producers first participate in the program established under this subsection, excluding the crop years with the highest and lowest yield per harvested acre and any crop year in which the commodity was not planted on the farm.

"(4) TERMS AND CONDITIONS.—Producers on a farm who elect to participate in the program established under this subsection for a crop of wheat shall—

"(A) enter into an agreement with the Secretary providing that the producers shall comply with the program for the crop;

"(B) not plant program commodities for harvest in a quantity in excess of the normal crop acreage farm base; and

"(C) be considered to have complied with the terms and conditions of the wheat acreage reduction program or land diversion program for the crop, even though the acreage planted to wheat on the farm exceeds the permitted acreage provided under the acreage reduction or land diversion program.

"(5) EXCESS PRODUCTION.—

"(A) IN GENERAL.—Any quantity of wheat produced in a crop year on a farm in excess of the production limitation quantity for the farm may be stored by the producers for a period of not to exceed 5 marketing years and may be used only in accordance with this paragraph.

"(B) MARKETING IN SUBSEQUENT YEAR.—

"(i) PARTICIPANTS IN PROGRAM.—Producers on a farm who are participating in the program established under this subsection may market, barter, or use a quantity of the excess wheat referred to in subparagraph (A) equal to the difference between the production limitation quantity for the farm for the crop year subsequent to the crop year in which the excess wheat is produced less the quantity of wheat produced on the farm during the crop year.

"(ii) PARTICIPANTS IN ACREAGE REDUCTION PROGRAM.—Producers on a farm who are participating in an acreage reduction or a land diversion program for a crop of wheat may market, barter, or use a quantity of the excess wheat referred to in subparagraph (A) in an amount that reflects the quantity of wheat that would be expected to be produced on acreage that the producers agree to devote to approved conservation uses (in excess of any acreage reduction or land diversion requirements) during a crop year, as determined by the Secretary.

"(6) DUTIES OF SECRETARY.—In carrying out the program established under this subsection, the Secretary—

"(A) shall issue such regulations as are necessary to carry out the program;

"(B) may require increased acreage reduction or land diversion requirements with respect to producers who have had excess wheat production in order to allow the producers to market, barter, or use the production in subsequent years;

"(C) shall take appropriate measures designed to prevent the circumvention of the program established under this subsection, including the imposition of penalties;

"(D) may require producers who participate in the program for a crop, but who fail to comply with the terms and conditions of the program, to refund all or a part of any deficiency payments received with respect to the crop;

"(E) may require the forfeiture to the Commodity Credit Corporation of any wheat that is produced in excess of the production limitation quantity and that is not marketed, bartered, or used within 5 marketing years; and

"(F) shall ensure equitable treatment for producers who participate in the program if the Secretary allows increases (based on actual production levels) in the determination of farm program payment yields for wheat for the farm.

"(f) DEFAULTS; WAIVER OF DEADLINES.—

"(1) DEFAULTS.—If the failure of a producer to comply fully with the terms and conditions of the program conducted under this section precludes the making of loans, purchases, and payments, the Secretary may, nevertheless, make the loans, purchases, and payments in such amounts as the Secretary determines are equitable in relation to the seriousness of the failure.

"(2) WAIVER OF DEADLINES.—The Secretary may authorize the county and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(b)) to waive or modify deadlines and other program requirements in cases in which lateness or failure to meet the other requirements does not affect adversely the operation of the program.

"(g) REGULATIONS.—The Secretary may issue such regulations as the Secretary determines necessary to carry out this section.

"(h) COMMODITY CREDIT CORPORATION.—The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation.

"(i) ASSIGNMENT OF PAYMENTS.—The provisions of section 8(g) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(g)) (relating to assignment of payments) shall apply to payments under this section.

"(j) SHARING OF PAYMENTS.—The Secretary shall provide for the sharing of payments made under this section for any farm among the producers on the farm on a fair and equitable basis.

"(k) TENANTS AND SHARECROPPERS.—The Secretary shall provide adequate safeguards to protect the interests of tenants and sharecroppers.

"(l) CROSS-COMPLIANCE.—

"(1) IN GENERAL.—Except as provided in paragraph (2), compliance on a farm with the terms and conditions of any other commodity program may not be required as a condition of eligibility for loans, purchases, or payments under this section.

"(2) ACREAGE REDUCTION PROGRAM FOR OTHER COMMODITIES.—The Secretary may require that, as a condition of eligibility of

producers on a farm for loans, purchases, or payments under this section, the producers on the farm comply with any acreage reduction program that is in effect for any other commodity planted for harvest on the farm.".

SEC. 202. NONAPPLICABILITY OF CERTIFICATE REQUIREMENTS.

Sections 379d through 379j of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1379d-1379j) (relating to marketing certificate requirements for processors and exporters) shall not be applicable to wheat processors or exporters during the period June 1, 1991, through May 31, 1996.

SEC. 203. SUSPENSION OF LAND USE, WHEAT MARKETING ALLOCATION, AND PRODUCER CERTIFICATE PROVISIONS.

Sections 331 through 339, 379b, and 379c of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1331 through 1339, 1379b, and 1379c) shall not be applicable to the 1991 through 1995 crops of wheat.

SEC. 204. SUSPENSION OF CERTAIN QUOTA PROVISIONS.

The joint resolution entitled "A joint resolution relating to corn and wheat marketing quotas under the Agricultural Adjustment Act of 1938, as amended", approved May 26, 1941 (7 U.S.C. 1330 and 1340) shall not be applicable to the crops of wheat planted for harvest in the calendar years 1991 through 1995.

SEC. 205. NONAPPLICABILITY OF SECTION 107 OF THE AGRICULTURAL ACT OF 1949 TO THE 1991 THROUGH 1995 CROPS OF WHEAT.

Section 107 of the Agricultural Act of 1949 (7 U.S.C. 1445a) shall not be applicable to the 1991 through 1995 crops of wheat.

TITLE III—FEED GRAINS

SEC. 301. LOANS, PAYMENTS, AND ACREAGE REDUCTION PROGRAM FOR THE 1991 THROUGH 1995 CROPS OF FEED GRAINS.

The Agricultural Act of 1949 is amended—

(1) effective beginning with the 1991 crop of feed grains, by repealing sections 105A, 105B, and 105C (7 U.S.C. 1444c, 1444d, and 1444e); and

(2) effective only for the 1991 through 1995 crops of feed grains, by inserting after section 105 (7 U.S.C. 1444b) the following new section:

"SEC. 105A. LOANS, PAYMENTS, AND ACREAGE REDUCTION PROGRAM FOR THE 1991 THROUGH 1995 CROPS OF FEED GRAINS.

"Notwithstanding any other provision of law:

"(a) LOANS AND PURCHASES.—

"(1) IN GENERAL.—Except as provided in paragraphs (2) and (3), the Secretary shall make available to producers loans and purchases for each of the 1991 through 1995 crops of corn at such level as the Secretary determines will encourage the exportation of feed grains and not result in excessive total stocks of feed grains after taking into consideration the cost of producing corn, supply and demand conditions, and world prices for corn.

"(2) MINIMUM LEVEL.—The loan and purchase level determined under paragraph (1) shall not be less than 75 percent, nor more than 85 percent, of the simple average price received by producers of corn, as determined by the Secretary, during the marketing years for the immediately preceding 5 crops of corn, excluding the year in which the average price was the highest and the year in which the average price was the lowest in the period, except that the loan and purchase level for a crop determined under this subsection may not be less than $2.10 per bushel.

"(3) REPAYMENT.—

"(A) IN GENERAL.—The Secretary may permit a producer to repay a loan made under paragraph (1) or (6) for a crop at a level that is the lesser of—

"(i) the loan level determined for the crop; or

"(ii) the prevailing world market price for feed grains, as determined by the Secretary.

"(B) PREVAILING WORLD MARKET PRICE.—If the Secretary permits a producer to repay a loan in accordance with subparagraph (A), the Secretary shall prescribe by regulation—

"(i) a formula to define the prevailing world market price for feed grains; and

"(ii) a mechanism by which the Secretary shall announce periodically the prevailing world market price for feed grains.

"(4) SIMPLE AVERAGE PRICE.—For purposes of this section, the simple average price received by producers for the immediately preceding marketing year shall be based on the latest information available to the Secretary at the time of the determination.

"(5) OTHER FEED GRAINS.—The Secretary shall make available to producers loans and purchases for each of the 1991 through 1995 crops of grain sorghums, barley, oats, and rye, respectively, at such level as the Secretary determines is fair and reasonable in relation to the level that loans and purchases are made available for corn, taking into consideration the feeding value of the commodity in relation to corn and other factors specified in section 401(b).

"(b) PAYMENTS.—

"(1) DEFICIENCY PAYMENTS.—

"(A) IN GENERAL.—The Secretary shall make available to producers payments for each of the 1991 through 1995 crops of corn, grain sorghums, oats, and barley, in an amount computed by multiplying—

"(i) the payment rate; by

"(ii) the acreage on the farm planted to the crop; by

"(iii) the farm program payment yield for the crop for the farm.

"(B) DEVOTING ACREAGE TO CONSERVATION USES.—

"(i) ACREAGE CONSIDERED PLANTED.—If an acreage reduction program under subsection (d)(2) is in effect for a crop of feed grains and the producers on a farm devote a portion of the acreage of the farm (as determined in accordance with subsection (d)(2)(A)) equal to more than 8 percent of the acreage of the farm for the crop planted during the previous crop year (hereinafter referred to in this subparagraph as the 'previous acreage'), or all of the previous acreage, to conservation uses (except as provided in subparagraph (G))—

"(I) the portion (or all) of the previous acreage of the farm in excess of 8 percent of the acreage devoted to conservation uses (except as provided in subparagraph (G)) shall be considered to be planted for the purpose of determining the normal crop acreage farm base in accordance with section 503 and for the purpose of determining the acreage on the farm required to be devoted to conservation uses in accordance with subsection (d)(2)(C); and

"(II) the producers shall be eligible for payments under this paragraph on the acreage.

"(ii) PAYMENTS.—Notwithstanding any other provision of this section, any producer who elects to devote all or a portion of the previous acreage of the farm to conservation uses (or other uses as provided in subparagraph (G)) under this subparagraph shall receive deficiency payments on the acreage that is considered to be planted and eligible for payments under this subparagraph for the crop at a per-bushel rate established by the Secretary, except that the rate may not be established at less than the projected deficiency payment rate for the crop, as determined by the Secretary. The projected payment rate for the crop shall be announced by the Secretary prior to the period during which feed grain producers may agree to participate in the program for the crop.

"(iii) ADVERSE EFFECT ON AGRIBUSINESS AND OTHER INTERESTS.—The Secretary shall implement this subparagraph in such a manner as to minimize the adverse effect on agribusiness and other agriculturally related economic interests within any county, State, or region. In carrying out this subparagraph, the Secretary is authorized to restrict the total quantity of acreage that may be taken out of production under this subparagraph, taking into consideration the total quantity of acreage that has or will be removed from production under other price support, production adjustment, or conservation program activities. No restrictions on the quantity of acreage that may be taken out of production in accordance with this subparagraph in a crop year shall be imposed in the case of a county in which producers were eligible to receive disaster emergency loans under section 321 of the Consolidated Farm and Rural Development Act (7 U.S.C. 1961) as a result of a disaster that occurred during the crop year.

"(iv) CROP ACREAGE AND PAYMENT YIELD.—The normal crop acreage farm base and feed grain farm program payment yield of the farm shall not be reduced due to the fact that a portion (or all) of the previous acreage of the farm was devoted to conserving uses (except as provided in subparagraph (G)) under this subparagraph.

"(v) LIMITATION.—Other than as provided in clauses (i) through (iv), payments may not be made under this paragraph for any crop of feed grains on a greater acreage than the acreage actually planted to feed grains.

"(vi) CONSERVATION USE ACREAGE UNDER OTHER PROGRAMS.—Any acreage considered to be planted to feed grains in accordance with clause (i) may not also be designated as conservation use acreage for the purpose of fulfilling any provisions under any acreage reduction or land diversion program requiring that the producers devote a specified acreage to conservation uses.

"(C) PAYMENT RATE.—

"(i) IN GENERAL.—The payment rate for a crop of corn, grain sorghums, oats, and barley shall be the amount by which the established price for the crop exceeds the higher of—

"(I) the weighted average market price in a State received by producers in the State during the first 5 months of the marketing year for the crop, as determined by the Secretary; or

"(II) the loan level determined for the crop.

"(ii) WEIGHTED AVERAGE MARKET PRICE.—In determining the payment rate, per bushel, for established price payments for a crop of feed grains under this subparagraph, the Secretary shall use the weighted average market price in a State, per bushel of feed grains, received by producers in the State during the first 5 months of the marketing year for the crop, as determined by the Secretary.

"(D) ESTABLISHED PRICE FOR CORN.—The established price for corn shall not be less than $2.75 per bushel for each of the 1991 through 1995 crops of corn, except that the established price for corn for each of the crops shall be adjusted to reflect any change during the last calendar year ending before the beginning of each such crop year in the index of prices paid by farmers for production items, taxes, and wage rates in the calendar year, as determined by the Secretary.

"(E) ESTABLISHED PRICE FOR OTHER GRAINS.—The established price for each of the 1991 through 1995 crops of grain sorghums, oats, and barley shall be not less than $2.61 per bushel for grain sorghums, not less than $2.27 per bushel for oats, and not less than $2.72 per bushel for barley, except that the established price for grain sorghums, oats, and barley for each of the crops shall be adjusted to reflect any change during the last calendar year ending before the beginning of each such crop year in the index of prices paid by farmers for production items, taxes, and wage rates in the calendar year, as determined by the Secretary.

"(F) REDUCTION FOR DISASTER PAYMENTS.—The total quantity on which payments would otherwise be payable to a producer on a farm for any crop under this paragraph shall be reduced by the quantity on which any disaster payment is made to the producer for the crop under paragraph (2).

"(G) CONSERVING CROPS.—The Secretary may permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of acreage otherwise required to be devoted to conservation uses as a condition of qualifying for payments under subparagraph (B) to be devoted to sweet sorghum or the production of guar, sesame, castor beans, mustard seed, crambe, plantago ovato, flaxseed, triticale, rye, commodities for which no substantial domestic production or market exists but that could yield industrial raw material being imported, or likely to be imported, into the United States, or commodities grown for experimental purposes (including kenaf and milkweed), subject to the following sentence. The Secretary may permit the acreage to be devoted to the production only if the Secretary determines that—

"(i) the production is not likely to increase the cost of the price support program and will not affect farm income adversely; and

"(ii) the production is needed to provide an adequate supply of the commodity, or, in the case of commodities for which no substantial domestic production or market exists but that could yield industrial raw materials, the production is needed to encourage domestic manufacture of the raw material.

"(2) DISASTER PAYMENTS.—

"(A) PREVENTED PLANTING.—

"(i) IN GENERAL.—Except as provided in subparagraph (C), if the Secretary determines that the producers on a farm are prevented from planting any portion of the acreage intended for feed grains to feed grains or other nonconserving crops because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the Secretary shall make a prevented planting disaster payment to the producers in an amount equal to the product obtained by multiplying—

"(I) the number of acres so affected but not to exceed the acreage planted to feed grains for harvest (including any acreage that the producers were prevented from planting to feed grains or other nonconserving crops in lieu of feed grains because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the immediately preceding year; by

"(II) 75 percent of the farm program payment yield established by the Secretary; by

"(III) a payment rate equal to 33⅓ percent of the established price for the crop.

"(ii) FORM OF PAYMENT.—Payments made by the Secretary under this subparagraph may be made in the form of cash.

"(B) REDUCED YIELDS.—Except as provided in subparagraph (C), if the Secretary determines that because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the total quantity of feed grains that the producers are able to harvest on any farm is less than the result of multiplying 60 percent of the farm program payment yield established by the Secretary for the crop by the acreage planted for harvest for the crop, the Secretary shall make a reduced yield disaster payment to the producers at a rate equal to 50 percent of the established price for the crop for the deficiency in production below 60 percent for the crop.

"(C) CROP INSURANCE.—Producers on a farm shall not be eligible for—

"(i) prevented planting disaster payments under subparagraph (A), if prevented planting crop insurance is available to the producers under the Federal Crop Insurance Act (7 U.S.C. 1501 et seq.) with respect to the feed grain acreage of the producers; or

"(ii) reduced yield disaster payments under subparagraph (B), if reduced yield crop insurance is available to the producers under such Act with respect to the feed grain acreage of the producers.

"(D) ADMINISTRATION.—

"(i) ECONOMIC EMERGENCIES.—Notwithstanding subparagraph (C), the Secretary may make a disaster payment to the producers on a farm under this paragraph if the Secretary determines that—

"(I) as the result of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the producers have suffered substantial losses of production either from being prevented from planting feed grains or other nonconserving crops or from reduced yields;

"(II) the losses have created an economic emergency for the producers;

"(III) crop insurance indemnity payments under the Federal Crop Insurance Act (7 U.S.C. 1501 et seq.) and other forms of assistance made available by the Federal Government to the producers for the losses are insufficient to alleviate the economic emergency; and

"(IV) additional assistance must be made available to the producers to alleviate the economic emergency.

"(ii) ADJUSTMENTS.—The Secretary may make such adjustments in the amount of payments made available under this subparagraph with respect to an individual farm so as to ensure the equitable allotment of the payments among producers, taking into account other forms of Federal disaster assistance provided to the producers for the crop involved.

"(c) PAYMENT YIELDS.—The farm program payment yields for farms for each crop of feed grains shall be determined under title V.

"(d) ACREAGE REDUCTION PROGRAM.—

"(1) IN GENERAL.—

"(A) ESTABLISHMENT.—Notwithstanding any other provision of this Act, except as provided in subparagraph (E), if the Secretary determines that the total supply of corn, grain sorghum, barley, oats, or rye, in the absence of an acreage reduction program, will be excessive taking into account the need for an adequate carryover to maintain reasonable and stable supplies and prices and to meet a national emergency, the Secretary may provide for any of the crops an acreage reduction program as described in paragraph (2).

"(B) CONSERVATION ACREAGE RESERVE FACTOR.—In making a determination under subparagraph (A), the Secretary shall take into consideration the number of acres placed in the conservation acreage reserve established under section 1231 of the Food Security Act of 1985 (16 U.S.C. 3831).

"(C) ANNOUNCEMENTS.—If the Secretary elects to put an acreage reduction program into effect for any crop year, the Secretary shall announce the program not later than September 30 prior to the calendar year in which the crop is harvested.

"(D) ADJUSTMENTS.—Not later than November 15 of the year previous to the year in which the crop is harvested, the Secretary may make adjustments in the program announced under subparagraph (C) if the Secretary determines that there has been a significant change in the total supply of feed grains since the program was first announced.

"(E) INELIGIBILITY FOR LOANS, PURCHASES, AND PAYMENTS.—As a condition of eligibility for loans, purchases, and payments for any such crop of feed grains, the producers on a farm must comply with the terms and conditions of an acreage reduction program and, if applicable, a land diversion program.

"(2) ACREAGE REDUCTION PROGRAM.—

"(A) PERCENTAGE REDUCTIONS.—If a feed grain acreage reduction program is announced under paragraph (1), the reduction shall be achieved by applying a uniform percentage reduction to the acreage of corn, grain sorghum, barley, oats, or rye, respectively, planted for harvest on each feed grain-producing farm.

"(B) INELIGIBILITY FOR LOANS, PURCHASES, AND PAYMENTS.—Producers who knowingly do not comply with the acreage reduction program shall be ineligible for feed grain loans, purchases, and payments with respect to that farm.

"(C) MALTING BARLEY.—The Secretary may provide that no producer of malting barley shall be required as a condition of eligibility for feed grain loans, purchases, and payments to comply with any acreage reduction under this paragraph if the producer has previously produced a malting variety of barley for harvest, plants barley only of an acceptable malting variety for harvest, and meets such other conditions as the Secretary may prescribe.

"(D) ACREAGE DEVOTED TO CONSERVATION USES.—A number of acres on the farm equal to the number of acres required to be withdrawn from the production of feed grains shall be devoted to conservation uses, in accordance with regulations issued by the Secretary.

"(3) ADMINISTRATION.—

"(A) PROTECTION FROM WEEDS AND EROSION.—The regulations issued by the Secretary under paragraph (2) with respect to acreage required to be devoted to conservation uses shall assure protection of the acreage from weeds and wind and water erosion.

"(B) CONSERVING CROPS.—The Secretary may permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of the acreage to be devoted to sweet sorghum, or the production of guar,

sesame, castor beans, mustard seed, crambe, plantago ovato, flaxseed, triticale, rye, milkweed, or other commodity, if the Secretary determines that the production is needed to provide an adequate supply of the commodities, is not likely to increase the cost of the price support program, and will not affect farm income adversely.

"(C) HAYING AND GRAZING.—

"(i) IN GENERAL.—Except as provided in clauses (ii) and (iii), haying and grazing of acreage designated as conservation use acreage for the purpose of meeting any requirements established under an acreage reduction program (including a program conducted under subsection (b)(1)(B)) or land diversion program established under this section shall be permitted, except during any consecutive 5-month period that is established by the State committee established under section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(b)) for a State. The 5-month period shall be established during the period beginning April 1, and ending October 31, of a year.

"(ii) NATURAL DISASTERS.—In the case of a natural disaster, the Secretary may permit unlimited haying and grazing on the acreage.

"(iii) ADVERSE ECONOMIC EFFECTS.—Haying and grazing shall not be permitted for any crop under clause (i) if the Secretary determines that haying and grazing would have an adverse economic effect.

"(4) LAND DIVERSION PAYMENTS.—

"(A) IN GENERAL.—The Secretary may make land diversion payments to producers of feed grains, whether or not an acreage reduction program for feed grains is in effect, if the Secretary determines that the land diversion payments are necessary to assist in adjusting the total national acreage of feed grains to desirable goals. The land diversion payments shall be made to producers who, to the extent prescribed by the Secretary, devote to approved conservation uses an acreage of cropland on the farm in accordance with land diversion contracts entered into by the Secretary with the producers.

"(B) AMOUNTS.—The amounts payable to producers under land diversion contracts may be determined through the submission of bids for the contracts by producers in such manner as the Secretary may prescribe or through such other means as the Secretary determines appropriate. In determining the acceptability of contract offers, the Secretary shall take into consideration the extent of the diversion to be undertaken by the producers and the productivity of the acreage diverted.

"(C) ADVERSE EFFECTS ON COUNTY OR LOCAL COMMUNITY.—The Secretary shall limit the total acreage to be diverted under agreements in any county or local community so as not to affect adversely the economy of the county or local community.

"(5) CONSERVATION PRACTICES.—

"(A) WILDLIFE FOOD PLOTS OR HABITAT.—Any acreage required to be devoted to conservation uses and any additional diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies. The Secretary may pay an appropriate share of the cost of practices designed to carry out the purposes of this subparagraph.

"(B) SOIL AND WATER CONSERVATION PRACTICES.—The Secretary may also pay an appropriate share of the cost of approved soil and water conservation practices (including practices that may be effective for a number of years) established by the producer on acreage required to be devoted to conservation uses or on additional diverted acreage.

"(C) PUBLIC ACCESSIBILITY.—The Secretary may provide for an additional payment on the acreage in an amount determined by the Secretary to be appropriate in relation to the benefit to the general public if the producer agrees to permit, without other compensation, access to all or such portion of the farm, as the Secretary may prescribe, by the general public, for hunting, trapping, fishing, and hiking, subject to applicable State and Federal regulations.

"(6) PARTICIPATION AGREEMENTS.—

"(A) EXECUTION.—An operator of a farm desiring to participate in the program conducted under this subsection shall execute an agreement with the Secretary providing for the participation not later than such date as the Secretary may prescribe.

"(B) TERMINATION OR MODIFICATION.—The Secretary may, by mutual agreement with producers on a farm, terminate or modify any such agreement only by reducing any acreage reduction requirements or land diversion requirements, if the Secretary determines the action necessary because of an emergency created by drought or other disaster or to prevent or alleviate a shortage in the supply of agricultural commodities. The Secretary may not modify the agreement to provide for deficiency payments to be made to producers of feed grains in any manner that is inconsistent with subsection (b)(1).

"(e) VOLUNTARY PRODUCTION LIMITATION PROGRAM.—

"(1) IN GENERAL.—If a feed grain acreage reduction program or a land diversion program is announced under subsection (d) for a crop of feed grains, the producers on a farm shall be considered to have met the requirements of the program if the producers meet the requirements of the voluntary production limitation program established under this subsection.

"(2) LIMITATION ON MARKETING.—In order to comply with the voluntary production limitation program, the producers on a farm must agree not to market, barter, donate, or use on the farm (including use as feed for livestock) in a marketing year a quantity of feed grains in excess of the feed grain production limitation quantity for the farm for the marketing year.

"(3) PRODUCTION LIMITATION QUANTITY.—For purposes of this subsection, the production limitation quantity for a farm for a marketing year for a crop shall equal the product obtained by multiplying—

"(A) the acreage permitted to be planted to feed grains under the acreage reduction program or land diversion program in effect for the crop for the farm; by

"(B) the higher of—

"(i) the farm program payment yield for the farm; or

"(ii) the average of the yield per harvested acre for feed grains for the farm for each of the 5 crop years immediately preceding the crop year during which the producers first participate in the program established under this subsection, excluding the crop years with the highest and lowest yield per harvested acre and any crop year in which the commodity was not planted on the farm.

"(4) TERMS AND CONDITIONS.—Producers on a farm who elect to participate in the program established under this subsection for a crop of feed grains shall—

"(A) enter into an agreement with the Secretary providing that the producers shall comply with the program for the crop;

"(B) not plant program commodities for harvest in a quantity in excess of the normal crop acreage farm base; and

"(C) be considered to have complied with the terms and conditions of the feed grain acreage reduction program or land diversion program for the crop, even though the acreage planted to feed grains on the farm exceeds the permitted acreage provided under the acreage reduction or land diversion program.

"(5) EXCESS PRODUCTION.—

"(A) IN GENERAL.—Any quantity of feed grains produced in a crop year on a farm in excess of the production limitation quantity for the farm may be stored by the producers for a period of not to exceed 5 marketing years and may be used only in accordance with this paragraph.

"(B) MARKETING IN SUBSEQUENT YEAR.—

"(i) PARTICIPANTS IN PROGRAM.—Producers on a farm who are participating in the program established under this subsection may market, barter, or use a quantity of the excess feed grains referred to in subparagraph (A) equal to the difference between the production limitation quantity for the farm for the crop year subsequent to the crop year in which the excess feed grains are produced less the quantity of feed grains produced on the farm during the crop year.

"(ii) PARTICIPANTS IN ACREAGE REDUCTION PROGRAM.—Producers on a farm who are participating in an acreage reduction or a land diversion program for a crop of feed grains may market, barter, or use a quantity of the excess feed grains referred to in subparagraph (A) in an amount that reflects the quantity of feed grains that would be expected to be produced on acreage that the producers agree to devote to approved conservation uses (in excess of any acreage reduction or land diversion requirements) during a crop year, as determined by the Secretary.

"(6) DUTIES OF SECRETARY.—In carrying out the program established under this subsection, the Secretary—

"(A) shall issue such regulations as are necessary to carry out the program;

"(B) may require increased acreage reduction or land diversion requirements with respect to producers who have had excess feed grain production in order to allow the producers to market, barter, or use the production in subsequent years;

"(C) shall take appropriate measures designed to prevent the circumvention of the program established under this subsection, including the imposition of penalties;

"(D) may require producers who participate in the program for a crop, but who fail to comply with the terms and conditions of the program, to refund all or a part of any deficiency payments received with respect to the crop;

"(E) may require the forfeiture to the Commodity Credit Corporation of any feed grains that is produced in excess of the production limitation quantity and that is not marketed, bartered, or used within 5 marketing years; and

"(F) shall ensure equitable treatment for producers who participate in the program if the Secretary allows increases (based on actual production levels) in the determination of farm program payment yields for feed grains for the farm.

"(f) DEFAULTS; WAIVER OF DEADLINES.—

"(1) DEFAULTS.—If the failure of a producer to comply fully with the terms and conditions of the program conducted under this section precludes the making of loans, pur-

chases, and payments, the Secretary may, nevertheless, make the loans, purchases, and payments in such amounts as the Secretary determines are equitable in relation to the seriousness of the failure.

"(2) WAIVER OF DEADLINES.—The Secretary may authorize the county and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(b)) to waive or modify deadlines and other program requirements in cases in which lateness or failure to meet the other requirements does not affect adversely the operation of the program.

"(g) REGULATIONS.—The Secretary may issue such regulations as the Secretary determines necessary to carry out this section.

"(h) COMMODITY CREDIT CORPORATION.—The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation.

"(i) ASSIGNMENT OF PAYMENTS.—The provisions of section 8(g) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(g)) (relating to assignment of payments) shall apply to payments under this section.

"(j) SHARING OF PAYMENTS.—The Secretary shall provide for the sharing of payments made under this section for any farm among the producers on the farm on a fair and equitable basis.

"(k) TENANTS AND SHARECROPPERS.—The Secretary shall provide adequate safeguards to protect the interests of tenants and sharecroppers.

"(l) CROSS-COMPLIANCE.—

"(1) IN GENERAL.—Except as provided in paragraph (2), compliance on a farm with the terms and conditions of any other commodity program may not be required as a condition of eligibility for loans, purchases, or payments under this section.

"(2) ACREAGE REDUCTION PROGRAM FOR OTHER COMMODITIES.—The Secretary may require that, as a condition of eligibility of producers on a farm for loans, purchases, or payments under this section, the producers on the farm comply with any acreage reduction program that is in effect for any other commodity planted for harvest on the farm.".

SEC. 302. NONAPPLICABILITY OF SECTION 105 OF THE AGRICULTURAL ACT OF 1949 TO THE 1991 THROUGH 1995 CROPS OF FEED GRAINS.

Section 105 of the Agricultural Act of 1949 (7 U.S.C. 1444b) shall not be applicable to the 1991 through 1995 crops of feed grains.

TITLE IV—OILSEEDS

SEC. 401. LOANS FOR OILSEEDS FOR 1991 THROUGH 1995 MARKETING YEARS.

Effective only for the 1991 through 1995 crops of soybeans, sunflower seeds, canola, rapeseed, safflower seeds, flax and such other oilseeds as the Secretary of Agriculture may determine, title II of the Agricultural Act of 1949 is amended—

(1) in section 201 (7 U.S.C. 1446)—

(A) in the matter preceding subsection (a), by striking "tung nuts," and inserting the following: "soybeans, sunflower seeds, canola, rapeseed, safflower seeds, flax and such other oilseeds as the Secretary may determine,"; and

(B) by striking subsections (i) and (l); and

(2) by adding at the end the following new section:

"SEC. 204. LOANS FOR OILSEEDS FOR 1991 THROUGH 1995 MARKETING YEARS.

"(a) DEFINITION OF OILSEEDS.—As used in this section, the term 'oilseeds' means soybeans, sunflower seeds, canola, rapeseed, safflower seeds, flax and such other oilseeds as the Secretary may determine.

"(b) RECOURSE LOANS.—The Secretary shall support the price of oilseeds through recourse loans in each of the 1991 through 1995 marketing years as provided in this section.

"(c) LOAN LEVELS.—

"(1) SOYBEANS.—The loan level for each of the 1991 through 1995 crops of soybeans shall be $6.25 per bushel.

"(2) SUNFLOWER SEEDS, CANOLA, RAPESEED, SAFFLOWER SEEDS, AND FLAX.—The loan level for each of the 1991 through 1995 crops of sunflower seed, canola, rapeseed, safflower seed, and flax shall be $0.125 per pound.

"(3) OTHER OILSEEDS.—The loan level for each of the 1991 through 1995 crops of oilseeds, other than oilseeds referred to in paragraph (1) or (2), shall be such level as the Secretary determines will take into account the historical price relationship between each type of oilseeds and soybeans, the prevailing loan level for soybeans, and the historical oil content of each type of oilseeds and soybeans.

"(3) ADJUSTMENT.—Notwithstanding paragraphs (1) and (2), the Secretary may reduce the loan level established for a crop of oilseeds under this subsection by an amount not to exceed 10 percent of the level, if the Secretary determines that the reduction is necessary to—

"(A) discourage excessive plantings of oilseeds and the buildup of excessive stocks;

"(B) maintain the support level of soybeans relative to the support levels for alternative crops, taking into account any acreage reduction programs in effect for the crops;

"(C) maintain domestic and export markets for oilseeds; or

"(D) minimize the cost associated with a program carried out under this section, taking into account the need to maintain a viable and competitive domestic oilseed industry.

"(4) EFFECT ON FUTURE YEARS.—Any reduction in the loan level determined under paragraph (3) shall not be considered in determining the loan level for subsequent years.

"(d) REPAYMENT.—

"(1) IN GENERAL.—The Secretary shall permit a producer of oilseeds to repay a loan made under this section for a crop at a level that is the lesser of—

"(A) the loan level determined for the crop; or

"(B) the prevailing world market price for the applicable oilseed, as determined by the Secretary.

"(2) PREVAILING WORLD MARKET PRICE.—The Secretary shall prescribe by regulation—

"(A) a formula for determining the prevailing world market price for oilseeds; and

"(B) a mechanism by which the Secretary shall periodically announce the prevailing world market price for oilseeds.

"(e) MARKETING YEAR.—

"(1) SOYBEANS.—For purposes of this section, the marketing year for soybeans shall be the 12-month period beginning on September 1 and ending on August 31.

"(2) OTHER OILSEEDS.—For purposes of this section, the marketing year for each type of oilseeds, other than soybeans, shall be prescribed by the Secretary by regulation.

"(f) ANNOUNCEMENTS.—

"(1) PRELIMINARY ANNOUNCEMENT.—The Secretary shall make a preliminary announcement of the level of price support for each type of oilseeds for a marketing year not later than July 15 of the year prior to the marketing year for the crop. The announced level shall be based on the latest information and statistics available at the time of the announcement.

"(2) FINAL ANNOUNCEMENT.—The Secretary shall make a final announcement of the level of price support not later than November 15 of the year prior to the marketing year for the crop of oilseeds.

"(g) CROSS-COMPLIANCE.—Notwithstanding any other provision of law—

"(1) the Secretary shall not require participation in any production adjustment program for oilseeds or any other commodity as a condition of eligibility for price support for oilseeds;

"(2) the Secretary shall not permit the planting of oilseeds for harvest on acreage required to be devoted to conservation uses or diverted from production under any other Federal Government program;

"(3) the Secretary may not authorize payments to producers to cover the cost of storing oilseeds; and

"(4) oilseeds may not be considered an eligible commodity for any reserve program.".

TITLE V—SUGAR

SEC. 501. SUGAR PRICE SUPPORT.

Effective only for the 1991 through 1995 crops of sugar beets and sugarcane, title II of Agricultural Act of 1949 (as amended by section 401 of this Act) is further amended—

(1) in section 201 (7 U.S.C. 1446)—

(A) in the matter preceding subsection (a), by striking "honey, and milk" and inserting "honey, milk, sugar beets, and sugarcane"; and

(B) by striking subsection (j); and

(2) by adding at the end the following new section:

"SEC. 205. SUGAR PRICE SUPPORT FOR 1991 THROUGH 1995 CROPS.

"(a) IN GENERAL.—The price of each of the 1991 through 1995 crops of sugar beets and sugarcane, respectively, shall be supported in accordance with this section.

"(b) SUGARCANE.—The Secretary shall support the price of domestically grown sugarcane through nonrecourse loans at such level as the Secretary determines appropriate but not less than 18 cents per pound for raw cane sugar, except that the level may be increased under subsection (d).

"(c) SUGAR BEETS.—The Secretary shall support the price of domestically grown sugar beets through nonrecourse loans at such level as the Secretary determines is fair and reasonable in relation to the loan level for sugarcane.

"(d) INCREASE IN SUPPORT PRICE.—

"(1) IN GENERAL.—The Secretary may increase the support price for each of the 1991 through 1995 crops of domestically grown sugarcane and sugar beets from the price determined for the preceding crop based on such factors as the Secretary determines appropriate, including changes (during the 2 crop years immediately preceding the crop year for which the determination is made) in the cost of sugar products, the cost of domestic sugar production, and other circumstances that may adversely affect domestic sugar production.

"(2) REPORT.—If the Secretary makes a determination not to increase the support price under subparagraph (A), the Secretary shall submit a report containing the findings, decision, and supporting data for the determination to the Committee on Agriculture of the House of Representatives and

the Committee on Agriculture, Nutrition, and Forestry of the Senate.

"(e) ANNOUNCEMENTS.—The Secretary shall announce the loan rate to be applicable during any fiscal year under this section as far in advance of the beginning of that fiscal year as is practicable consistent with the purposes of this section.

"(f) TERM.—Loans under this section during any fiscal year shall be made available not earlier than the beginning of the fiscal year and shall mature before the end of the fiscal year.".

TITLE VI—GENERAL COMMODITY PROVISIONS

Subtitle A—Acreage Base and Yield System

SEC. 601. ACREAGE BASE AND YIELD SYSTEM.

Effective beginning with the 1991 crops, title V of the Agricultural Act of 1949 (7 U.S.C. 1461 et seq.) is amended to read as follows:

"TITLE V—ACREAGE BASE AND YIELD SYSTEM

"SEC. 501. PURPOSE.

"The purpose of this title is to prescribe a system for establishing normal crop acreage farm bases and program yields for the wheat, feed grain, upland cotton, extra long staple cotton, rice, and soybean and other oilseed programs under this Act that is efficient, equitable, flexible, predictable, and promotes maintenance of water quality, natural soil fertility, and international competitiveness for United States agricultural commodities.

"SEC. 502. DEFINITIONS.

"For purposes of this title:

"(1) COUNTY COMMITTEE.—The term 'county committee' means the county committee established under section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(b)) for the county in which the farm is administratively located.

"(2) OILSEEDS.—The term 'oilseeds' means soybeans, sunflower seeds, canola, rapeseed, safflower seeds, flax, and such other oilseeds as the Secretary may determine.

"(3) PROGRAM CROP.—The term 'program crop' means any crop of wheat, feed grains, upland cotton, extra long staple cotton, or rice.

"SEC. 503. NORMAL CROP ACREAGE FARM BASES.

"(a) IN GENERAL.—The Secretary shall provide for the establishment and maintenance of normal crop acreage farm bases for the 1991 through 1995 crop years.

"(b) DETERMINATION BY COUNTY COMMITTEE.—The county committee, in accordance with regulations prescribed by the Secretary, shall determine the normal crop acreage farm base for a farm for a crop year.

"(c) CALCULATION.—The normal crop acreage farm base for a farm for a crop year shall consist of the total of—

"(1) the crop acreage bases for all program crops for the 1990 crop year (established under this title as it existed before the amendment made by section 601 of the Farm Income and Equity Act of 1990); and

"(2) the average of the acreage planted or considered planted to all oilseeds during the 1986 through 1990 crop years.

"(d) ACREAGE CONSIDERED PLANTED—For the purpose of subsection (c), acreage considered planted to a crop referred to in subsection (c) shall include—

"(1) any acreage required to be devoted to conservation uses and diverted acreage on a farm;

"(2) any acreage on the farm that producers were prevented from planting to the crop because of drought, flood, or other natural disaster, or other condition beyond the control of the producers; and

"(3) any acreage on the farm which the county committee determines is necessary to be included in establishing a fair and equitable farm acreage base.

"SEC. 504. FARM PROGRAM PAYMENT YIELDS.

"(a) IN GENERAL.—The Secretary shall provide for the establishment of a farm program payment yield for each farm for each program crop for each of the 1991 through 1995 crop years.

"(b) CALCULATION.—The farm program payment yield for a program crop for any farm for each of the 1991 through 1995 crop years shall be not less than—

"(1) the farm program payment yield established for the crop on the farm for the 1990 crop year under this title (as it existed before the amendment made by section 601 of the Farm Income and Flexibility Act of 1990); or

"(2) the average of the harvested yields for program crops on the farm during the immediately preceding 5 years, excluding the year in which the yield was the highest and the year in which the yield was the lowest.

"(c) ADJUSTMENTS.—The county committee, in accordance with regulations prescribed by the Secretary, may adjust any program yield for any program crop for any farm if the program yield for the crop on the farm does not accurately reflect the productive potential of the farm because of the occurrence of a natural disaster or other similar condition beyond the control of the producer.

"SEC. 505. PLANTING AND PRODUCTION HISTORY OF FARMS.

"Effective for each of the 1991 and subsequent crop years, each county committee, in accordance with regulations prescribed by the Secretary, may require any producer who seeks to establish a normal crop acreage farm base or farm program payment yield for a farm for a crop year to provide planting and production history of the farm for each of the 5 crop years immediately preceding the crop year.

"SEC. 506. ESTABLISHMENT OF BASES AND YIELDS BY COUNTY COMMITTEES.

"Each county committee may, in accordance with regulations prescribed by the Secretary, provide for the establishment of a normal crop acreage farm base and farm program payment yield with respect to any farm administratively located within the county if the normal crop acreage farm base or farm program payment yield cannot otherwise be established under this title. The bases and yields shall be established in a fair and equitable manner, but no such bases or yields shall be established for a farm if the producer on the farm is subject to sanctions under title XII of the Food Security Act of 1985 (16 U.S.C. 3801 et seq.) for cultivating highly erodible land or converted wetland.

"SEC. 507. APPEALS.

"The Secretary shall establish an administrative appeal procedure that provides for an administrative review of determinations made with respect to normal crop acreage farm bases and farm program payment yields.

"SEC. 508. PAYMENTS AND OTHER BENEFITS.

"(a) LIMITATION ON COMBINED ACREAGE.—In order to be eligible for any deficiency payment or other benefit under this Act with respect to any crop year, the producers on a farm shall limit the combined acreage devoted to the production of program crops and oilseeds to a number of acres equal to the normal crop acreage farm base established under this title for the farm for the crop year.

"(b) PLANTING FLEXIBILITY.—Unless otherwise provided by law, the Secretary shall permit the producers on a farm to devote the acreage as the producers may choose to the production of any crop or oilseed, except that the producers shall comply with the requirements of paragraph (1) with respect to the combined acreage devoted to program crops and oilseeds. The Secretary shall ensure that the planting of nonprogram crops will not reduce the normal crop acreage base for a farm.".

Subtitle B—Wheat and Feed Grain Ending Stocks

SEC. 611. WHEAT AND FEED GRAIN ENDING STOCKS.

Effecting beginning with the 1991 crops of wheat and feed grains, section 425 of the Agricultural Act of 1949 (7 U.S.C. 1433d) is amended to read as follows:

"SEC. 425. WHEAT AND FEED GRAIN ENDING STOCKS.

"(a) FINDINGS.—Congress finds that—

"(1) a fundamental goal of Federal farm programs is to maintain year-to-year ending stocks of agricultural commodities at levels that are both adequate and manageable;

"(2) producers of agricultural commodities are provided improved opportunities to earn reasonable income from the market by policies that seek to avoid price depressing surpluses through the maintenance of adequate and manageable ending stocks;

"(3) consumers of agricultural commodities (including the livestock and processing industries) are well-served by the price and supply stability that results from the maintenance of adequate and manageable ending stocks;

"(4) the cost to taxpayers associated with farm programs is minimized by the maintenance of adequate and manageable ending stock levels that allow agricultural producers to receive a fair price for their commodities; and

"(5) the position of the United States as a reliable and competitive supplier of agricultural commodities to the world market is enhanced by policies that take into account projected export demand in determining adequate and manageable ending stock levels for United States commodities.

"(b) GOALS.—In order for the United States to achieve the goal declared in subsection (a) (1), the Secretary shall (except as provided in subsection (d)) use all authorities available to the Secretary (including authority to expand markets for United States commodities and to implement acreage reduction programs) in a manner intended to ensure that quantities of wheat and feed grains on hand in the United States on the final day of the marketing year each of the 1991 and subsequent crops of wheat and feed grains will not exceed—

"(1) in the case of wheat, 20 percent of the total domestic and export use for each crop of wheat, as determined by the Secretary; and

"(2) in the case of feed grains, 15 percent of the total domestic and export use for each crop of feed grains, as determined by the Secretary.

"(c) PROCLAMATIONS.—Except as provided in subsection (d), the Secretary shall proclaim, as a quantity of bushels, the ending stocks goal established under subsection (b) for each crop of wheat and feed grains not later than—

"(1) in the case of wheat, the date on which the acreage reduction program for the crop of wheat is announced under this Act; and

"(2) in the case of feed grains, the date on which the acreage reduction program for the crop of feed grains is announced under this Act.

"(d) DIFFERENCES BETWEEN ENDING STOCK GOALS.—

"(1) IN GENERAL.—Subject to paragraph (2), the Secretary may proclaim ending stocks goals under subsection (c) that are different from the ending stocks goals established under subsection (b).

"(2) REPORT.—If the Secretary proclaims ending stock goals in accordance with paragraph (1), the Secretary (on the day the proclamation is is issued) shall report to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate the reasons why the Secretary has determined that the ending stocks goals established under subsection (b) are inappropriate. The report shall include an estimate of the likely change in prices received by producers and costs to the Federal Government expected to result from the decision of the Secretary to diverge from the ending stocks goals established under subsection (b).".

SEC. 612. PUBLIC COMMENT ON WHEAT AND FEED GRAIN PROGRAMS.

Effective beginning with the 1991 crops of wheat and feed grains, title IV of the Agricultural Act of 1949 (7 U.S.C. 1421 et seq.) is amended by adding at the end the following new section:

"SEC. 426. PUBLIC COMMENT ON WHEAT AND FEED GRAIN PROGRAMS.

"(a) IN GENERAL.—In order to further the policies established in section 425 and to ensure that producers and consumers of wheat and feed grains are provided with reasonable opportunity to comment on the price support and acreage reduction program for each of the 1991 and subsequent crops of wheat and feed grains, the Secretary shall request public comment regarding the programs in accordance with this section.

"(b) WHEAT.—

"(1) OPTIONS.—Not less than 60 days before any price support and acreage reduction program is announced for a crop of wheat under this Act, the Secretary shall propose for public comment various program options for the crop of wheat.

"(2) ANALYSES.—Each option proposed by the Secretary shall be accompanied by an analysis that includes the estimated planted acreage, production, domestic and export use, ending stocks, season average producer price, program participation rate, and cost to the Federal Government that would likely result from each option.

"(3) ESTIMATES.—In announcing the program for a crop of wheat under this Act, the Secretary shall include an estimate of the planted acreage, production, domestic and export use, ending stocks, season average producer price, program participation rate, and cost to the Federal Government that is expected to result from the program as announced.

"(c) FEED GRAINS.—

"(1) OPTIONS.—Not less than 60 days before any price support and acreage reduction program is announced for a crop of feed grains under this Act, the Secretary shall propose for public comment various program options for the crop of feed grains.

"(2) ANALYSES.—Each option proposed by the Secretary shall be accompanied by an analysis that includes the estimated planted acreage, production, domestic and export use, ending stocks, season average producer price, program participation rate, and cost to the Federal Government that would likely result from each option.

"(3) ESTIMATES.—In announcing the program for a crop of feed grains under this Act, the Secretary shall include an estimate of the planted acreage, production, domestic and export use, ending stocks, season average producer price, program participation rate, and cost to the Federal Government that is expected to result from the program as announced.".

Subtitle C—Miscellaneous Commodity Provisions

SEC. 621. PAYMENT LIMITATIONS.

(a) IN GENERAL.—Section 1001 of the Food Security Act of 1985 (7 U.S.C. 1308) is amended—

(1) in paragraph (1)—

(A) by striking "1987 through 1990 crops" and inserting "1991 through 1995 crops"; and

(B) by striking "(excluding any deficiency payments described in paragraph (2)(B)(iv) of this section)";

(2) in paragraph (2)(A), by striking "1987 through 1990 crops" and inserting "1991 through 1995 crops"; and

(3) in the first sentence of paragraph (2)(B)—

(A) by inserting "and" at the end of clause (ii);

(B) by striking clauses (iii) through (vi) and inserting the following new clause:

"(iii) any gain realized by a producer from repaying a loan for a crop at a lower level than the original loan level established under the Agricultural Act of 1949."

(b) FOREIGN PERSONS.—Section 1001C(a) of the Food Security Act of 1985 (7 U.S.C. 1308-3(a)) is amended by striking "1989 and 1990 crops" and inserting "1991 through 1995 crops."

SEC. 622. ADVANCE DEFICIENCY AND DIVERSION PAYMENTS.

(a) IN GENERAL.—Section 107C of the Agricultural Act of 1949 (7 U.S.C. 1445b-2) is amended—

(1) in subsection (a)(1), by striking "1988 through 1990" and inserting "1991 through 1995"; and

(2) in subsection (b), by striking "1986 through 1990" and inserting "1991 through 1995".

(b) CONFORMING AMENDMENT.—Section 1002 of the Food Security Act of 1985 (Public Law 99-198; 99 Stat. 1446) is amended by striking "Effective only for the 1986 through 1990 crops of wheat, feed grains, upland cotton, and rice, section" and inserting "Section".

SEC. 623. ADVANCE RECOURSE COMMODITY LOANS.

(a) IN GENERAL.—Section 424 of the Agricultural Act of 1949 (7 U.S.C. 1433c) is amended by striking "1986 through 1990" and inserting "1991 through 1995".

(b) CONFORMING AMENDMENT.—Section 1003 of the Food Security Act of 1985 (Public Law 99-198; 99 Stat. 1447) is amended by striking "Effective for the 1986 through 1990 crops, the" and inserting "The".

SEC. 624. INTEREST PAYMENT CERTIFICATES.

(a) IN GENERAL.—Section 405(b)(1) of the Agricultural Act of 1949 (7 U.S.C. 1425(b)(1)) is amended by inserting after "programs, for" the following: "the 1991 through 1995 crops of".

(b) CONFORMING AMENDMENT.—Section 1004 of the Food Security Act of 1985 (Public Law 99-198; 99 Stat. 1447) is amended by striking "Effective only for the 1986 through 1990 crops, section" and inserting "Section".

SEC. 625. COMMODITY CREDIT CORPORATION SALES PRICE RESTRICTIONS.

Effective only for the marketing years for the 1991 through 1995 crops, section 407 of the Agricultural Act of 1949 (7 U.S.C. 1427) is amended—

(1) in the third sentence—

(A) in the second proviso, by striking "section 103(a)" and inserting "section 103"; and

(B) by striking the language following the third colon and inserting the following: "*Provided*, That, notwithstanding any other provision of law, the Corporation may not sell any of its stocks of wheat, corn, grain sorghum, barley, oats, and rye, respectively, at less than (A) 115 percent of the current national average loan rate for the commodity, adjusted for the current market differentials reflecting grade, quality, location, and other value factors as the Secretary determines appropriate plus reasonable carrying charges, or (B) if the Secretary permits the repayment of loans made for a crop of the commodity at a rate that is less than the loan level determined for the crop, 115 percent of the average loan repayment rate that is determined for the crop during the period of the loans.";

(2) in the fifth sentence, by striking "current basic county support rate including the value of any applicable price-support payment in kind (or a comparable price if there is no current basic county support rate)" and inserting the following: "current basic county loan rate (or a comparable price if there is no current basic county loan rate)"; and

(3) in the seventh sentence, by striking ", but in no event shall the purchase price exceed the then current support price for such commodities" and inserting: "or unduly affecting market prices, but in no event shall the purchase price exceed the Corporation's minimum sales price for the commodities for unrestricted use".

SEC. 626. DISASTER PAYMENTS.

Effective only for the 1991 through 1995 crops of peanuts, sugar beets, sugarcane, soybeans, sunflower seeds, canola, rapeseed, safflower seeds, flax, and such other oilseeds as the Secretary of Agriculture may determine, title II of Agricultural Act of 1949 (as amended by sections 401 and 501 of this Act) is further amended—

(1) in section 201 (7 U.S.C. 1446), by striking subsection (k); and

(2) by adding at the end the following new section:

"SEC. 206. DISASTER PAYMENTS FOR 1991 THROUGH 1995 CROPS OF PEANUTS, OILSEEDS, SUGAR BEETS, AND SUGARCANE.

"(a) DEFINITION OF OILSEEDS.—As used in this section, the term 'oilseeds' means soybeans, sunflower seeds, canola, rapeseed, safflower seeds, flax, and such other oilseeds as the Secretary may determine.

"(b) PREVENTED PLANTING.—If the Secretary determines that the producers on a farm are prevented from planting any portion of the acreage on the farm intended for peanuts, oilseeds, sugar beets, or sugarcane to peanuts, oilseeds, sugar beets, sugarcane, or other nonconserving crops because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the Secretary may make a prevented planting disaster payment to the

producers in an amount equal to the product obtained by multiplying—

"(1) the number of acres so affected but not to exceed the acreage planted to peanuts, oilseeds, sugar beets, or sugarcane for harvest (including any acreage that the producers were prevented from planting to the commodity or to other nonconserving crops in lieu of peanuts, oilseeds, sugar beets, or sugarcane because of drought, flood or other natural disaster, or other condition beyond the control of the producers) in the immediately preceding year; by

"(2) 75 percent of the farm program payment yield established by the Secretary; by

"(3) a payment rate equal to 50 percent of the loan and purchase level for the crop.

"(c) REDUCED YIELDS.—If the Secretary determines that because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the total quantity of peanuts, oilseeds, sugar beets, or sugarcane that the producers are able to harvest on any farm is less than the result of multiplying 60 percent of the farm program payment yield established by the Secretary for the crop by the acreage planted for harvest for the crop, the Secretary may make a reduced yield disaster payment to the producers at a rate equal to 50 percent of the loan and purchase level for the crop for the deficiency in production below 60 percent for the crop.

"(d) ADJUSTMENTS.—The Secretary may make such adjustments in the amount of payments made available under this paragraph with respect to an individual farm so as to assure the equitable allotment of the payments among producers, taking into account other forms of Federal disaster assistance provided to the producers for the crop involved.".

SEC. 627. MULTIYEAR SET-ASIDES.

Section 1010(1) of the Food Security Act of 1985 (7 U.S.C. 1445i(1)) is amended—

(1) by striking "beyond the 1990 crops" and inserting "beyond the 1995 crops"; and

(2) by striking "1986 through 1990" and inserting "1991 through 1995".

SEC. 628. SUPPLEMENTAL SET-ASIDE AND ACREAGE LIMITATION AUTHORITY.

(a) IN GENERAL.—Section 113 of the Agricultural Act of 1949 (7 U.S.C. 1445h) is amended—

(1) by striking "section 105C or 107D" and inserting "section 105A or 107A"; and

(2) by striking "1986 through 1990" and inserting "1991 through 1995".

(b) CONFORMING AMENDMENT.—Section 1011 of the Food Security Act of 1985 (Public Law 99-198; 99 Stat. 1454) is amended by striking "Effective for the 1986 through 1990 crops of wheat and feed grains, section" and inserting "Section".

SEC. 629. PRODUCER RESERVE PROGRAM FOR WHEAT AND FEED GRAINS.

Clause (2) of the third sentence of section 110(b) of the Agricultural Act of 1949 (7 U.S.C. 1445e(b)) is amended by inserting before the semicolon at the end the following: ", except that the amount shall not be less than the higher of (A) 26½ cents per bushel, or (B) rates paid by the Commodity Credit Corporation to commercial warehouses".

SEC. 630. NORMALLY PLANTED ACREAGE.

Section 1001 of the Food and Agriculture Act of 1977 (7 U.S.C. 1309) is amended—

(1) by striking "1990" each place it appears and inserting in lieu thereof "1995"; and

(2) in subsection (c), by striking paragraph (2) and inserting the following new paragraph:

"(2) the acreage on the farm planted to the crop.".

SEC. 631. SPECIAL GRAZING AND HAY PROGRAM.

The first sentence of section 109(a) of the Agricultural Act of 1949 (7 U.S.C. 1445d(a)) is amended by striking "1990" and inserting "1995".

SEC. 632. ADVANCE ANNOUNCEMENT OF PROGRAMS.

Section 406(b) of the Agricultural Act of 1949 (7 U.S.C. 1426(b)) is amended—

(1) by striking "1987 through 1991" each place it appears in paragraphs (1) and (2) and inserting "1992 through 1996";

(2) in paragraph (3)(B)(ii)—

(A) by striking "1991" each place it appears and inserting "1996";

(B) by striking "1990" each place it appears and inserting "1995"; and

(C) by striking "Food Security Act of 1985" and inserting "Farm Income and Flexibility Act of 1990".

SEC. 633. DETERMINATIONS OF THE SECRETARY.

Section 1017(b) of the Food Security Act of 1985 (Public Law 99-198; 99 Stat. 1459) is amended by striking "1986 through 1990" and inserting "1991 through 1995".

SEC. 634. APPLICATION OF TERMS IN THE AGRICULTURAL ACT OF 1949.

Effective only for the 1991 through 1995 crops of wheat, feed grains, upland cotton, and rice, subsection (k) of section 408 of the Agricultural Act of 1949 (7 U.S.C. 1428(k)) is amended to read as follows:

"(k)(1) Reference made in sections 402, 403, 406, 407, and 416 to the terms 'support price', 'level of support', and 'level of price support' shall be considered to apply as well to the loan and purchase level for wheat, feed grains, upland cotton, and rice under this Act.

"(2) References made to the terms 'price support', 'price support operations', and 'price support program' in such sections and in section 401(a) shall be considered as applying as well to loan and purchase operations for wheat, feed grains, upland cotton, and rice under this Act.".

SEC. 635. NORMAL SUPPLY.

Notwithstanding any other provision of law, if the Secretary of Agriculture determines that the supply of wheat, corn, upland cotton, or rice for the marketing year for any of the 1991 through 1995 crops of the commodity is not likely to be excessive and that program measures to reduce or control the planted acreage of the crop are not necessary, such a decision shall constitute a determination that the total supply of the commodity does not exceed the normal supply and no determination to the contrary shall be made by the Secretary with respect to the commodity for the marketing year.

SEC. 636. NATIONAL AGRICULTURAL COST OF PRODUCTION STANDARDS REVIEW BOARD.

Section 1014 of the Agriculture and Food Act of 1981 (7 U.S.C. 4110) is amended by striking "1990" and inserting "1995".

Subtitle D—Honey

SEC. 641. HONEY PRICE SUPPORT.

Effective only for the 1991 through 1995 crops of honey, title II of the Agricultural Act of 1949 (as amended by sections 401, 501, and 626 of this Act) is further amended—

(1) in section 201 (7 U.S.C. 1446), by striking subsection (b); and

(2) by adding at the end the following new section:

"SEC. 207. HONEY PRICE SUPPORT FOR 1991 THROUGH 1995 CROPS.

"(a) LOANS, PURCHASES, AND OTHER OPERATIONS.—For each of the 1991 through 1995 crops of honey, the price of honey shall be supported through loans, purchases, or other operations at not less than 56.86 cents per pound, as determined by the Secretary.

"(b) REPAYMENT.—The Secretary may permit a producer to repay a loan made to the producer under this section for a crop at a level that is the lesser of—

"(1) the loan level determined for such crop; or

"(2) such level as the Secretary determines will—

"(A) minimize the number of loan forfeitures;

"(B) not result in excessive total stocks of honey;

"(C) reduce the costs incurred by the Federal Government in storing honey; and

"(D) maintain the competitiveness of honey in domestic and export markets.

"(c) PLEDGING ADULTERATED OR IMPORTED HONEY AS COLLATERAL.—

"(1) IN GENERAL.—If the Secretary determines that a person has knowingly pledged adulterated or imported honey as collateral to secure a loan made under this section, such person shall, in addition to any other penalties or sanctions prescribed by law, be ineligible for a loan, purchase, or payment under this section for the 3 crop years succeeding such determination.

"(2) ADULTERATED HONEY.—For purposes of paragraph (1), honey shall be considered adulterated if—

"(A) any substance has been substituted wholly or in part for such honey;

"(B) such honey contains a poisonous or deleterious substance that may render such honey injurious to health, except that in any case in which such substance is not added to such honey, such honey shall not be considered adulterated if the quantity of such substance in or on such honey does not ordinarily render it injurious to health; or

"(C) such honey is for any other reason unsound, unhealthy, unwholesome, or otherwise unfit for human consumption.".

Subtitle E—Technical and Conforming Amendments

SEC. 651. CONFORMING AMENDMENTS.

(a) MISCELLANEOUS COMMODITY PROVISIONS.—The Agricultural Act of 1949 (7 U.S.C. 1441 et seq.) (as amended by sections 201, 622, and 624 of this Act) is further amended by redesignating sections 107C, 107E, and 107F (7 U.S.C. 1445b-2, 1445b-4, and 1445b-5) as sections 107B, 107C, and 107D, respectively.

(b) DESIGNATED NONBASIC AGRICULTURAL COMMODITIES.—Effective beginning with the 1991 crops, section 201 of the Agricultural Act of 1949 (7 U.S.C. 1446) (as amended by sections 401, 501, 626, and 641 of this Act) is further amended—

(1) by striking subsections (a), (b), and (e) through (l);

(2) in the first sentence—

(A) by inserting "(a)" before "The Secretary"; and

(B) by striking "as follows:" and inserting "in accordance with this title.";

(3) in subsection (c), by striking "subsection (d)" and inserting "this title"; and

(4) by redesignating subsections (c) and (d) as subsections (b) and (c), respectively.

(c) HONEY.—Section 405A(a) of the Agricultural Act of 1949 (7 U.S.C. 1425a(a)) is amended—

(1) by striking "section 201(b)" both places it appears and inserting "section 207"; and

(2) by striking "section 201(b)(2)(B)" and inserting "section 207(b)(2)".

Subtitle F—Effective Date

SEC. 661. EFFECTIVE DATE.

Except as otherwise provided in title I through this title, such titles and the amendments made by such titles shall become effective beginning with the 1991 crop of a commodity.

SUMMARY OF THE FARM INCOME AND FLEXIBILITY ACT OF 1990

ACREAGE BASE REDEFINED TO PROVIDE FLEXIBILITY

Establishes a Normal Crop Acreage (NCA) base for each farm that is the total of the farm's current crop-specific basis (wheat, corn, sorghum, oats, barley, etc.), plus the acreage planted to oilseeds (soybeans, sunflowers, canola, flax, etc.) on the farm during the past 5 years.

Abolishes crop-specific bases and requires that farm program benefits be provided only for the commodity actually planted.

Producers may plant any mix of program crops and oilseeds they desire within their NCA. They may plant any non-program, non-oilseed crop they choose without losing NCA base history, although no farm program payments may be made on such crops.

TARGET PRICES IMPROVED

Provides cost of production increases in wheat, corn, sorghum, oats, and barley target prices, beginning with the 1991 crop. Requires that deficiency payments be calculated based on average wheat and feed grain prices in each state (rather than national average prices). This assures that all farmers will receive the same support levels.

LOAN RATES INCREASED

Repeals the "Findley" provision for wheat and feed grains, continues the basic loan rate formula (i.e., 75–85% of the average price received by producers during the past 5 years, excluding the highest and lowest years), but establishes minimum wheat and corn loan rates as follows: wheat, increased from $1.95 to $2.75; corn, increased from $1.57 to $2.10.

This removes the Secretary's authority to unilaterally lower loan rates by 20% and reduces government budget exposure.

OILSEEDS, OATS, BARLEY GIVEN EQUAL TREATMENT

Raises income support levels for certain commodities (oilseeds, oats, and barley) to levels that are fair in relation to target prices for wheat and corn, in order to provide equal income protection to producers of these crops and to discourage unwarranted acreage shifts between commodities under NCA flexibility.

Oilseeds—establishes a marketing loan of $6.25 per bushel for soybeans and 12.5 cents per pound for sunflowers, canola, safflowers, and flax with authority for USDA to reduce the statutory loan rate by up to 10 percent in any one year. These recourse loans may be repaid at prevailing world prices or the loan rate, whichever is less. Each farm's entire oilseed production would be eligible for the loan.

Oats/Barley—increases the oats target price from $1.45 to $2.27 per bushel, and the barley target price from $2.36 to $2.72, and provides for cost-of-production adjustments in these levels for the 1991–1995 crops.

ACREAGE REDUCTION PROGRAMS (ARPS) MODIFIED

Authorizes separate ARPs for each program commodity, but prohibits ARPs for oilseeds. Thus, the amount of a farm's NCA that must be idled in order for producer to qualify for benefits under annual price support programs will depend on the mix of crops that the producer chooses to plant and the ARP, if any, that may be in effect for each commodity.

OPTIONAL BUSHEL-BASED PROGRAM ESTABLISHED

Permits each producer who wishes to adopt alternative agriculture practices the option to comply with an acreage reduction program that may be announced by agreeing not to market, barter, donate, or use on the farm a quantity of wheat or feed grains in excess of an amount of bushels equal to the farm's acreage planted to the commodity times the average annual yield on the farm during the previous 5 years, reduced by the same percentage as any ARP that may be in effect for the commodity.

Any excess quantity may be stored and carried forward for use in future years (e.g., during a drought) to meet a farm's bushel allocation in those years.

Under this program, a producer may meet any ARP requirement for wheat or feed grains by agreeing to limit the amount of grain marketed from the farm by the same percentage as any ARP requirement, rather than by removing acreage from production.

WHEAT AND FEED GRAIN ENDING STOCKS TARGETED

Establishes ending stock targets equal to 20% of total projected use for wheat (approximately 500 million bushels) and 15% for feed grains (approximately 1.2 billion bushels, in the case of corn).

The Secretary of Agriculture is authorized to diverge from these targets, but only if the Secretary provides to Congress a statement of the change in farm prices and cost to the taxpayer that will result from the different ending stock targets that the Secretary may announce.

IMPROVED OPPORTUNITY FOR PUBLIC COMMENT ON WHEAT AND FEED GRAIN PROGRAMS

In order to encourage the Secretary of Agriculture to adhere to the wheat and feed grain ending stock targets established in the bill, and to enhance the public's opportunity to provide input as USDA determines the details of annual farm programs, the secretary is required, when seeking public comment on the various options that may be proposed for annual acreage reduction programs for wheat and feed grains, to provide an estimate of the planted acreage, production, domestic and export use, ending stocks, season average producer price, program participation rate, and cost to the Federal Government that would likely result from each option. Identical information must accompany each program as it is announced.

FARMER-OWNED RESERVE (FOR) PROGRAM EXTENDED

Extends current law with respect to the FOR program for wheat and feed gains, but provides that storage payments made to farmers with FOR grain must be made at the *higher* of the present rate of 26.5 cents per bushel, per year, *or* the average rate paid by the Commodity Credit Corporation (CCC) to commercial grain elevators storing government-owned grain.

SUGAR, HONEY, AND WOOL PROGRAMS EXTENDED

Extends the current sugar, honey, and wool programs through 1995.●

Mr. DASCHLE. Mr. President, I rise today together with my colleagues Senator HARKIN, Senator KERREY, Senator CONRAD, and Senator EXON, to introduce FIFA, the Farm Income and Flexibility Act of 1990. This legislation provides a viable alternative to the policies embodied in the admnistration's farm bill proposal.

An alternative approach to our Nation's farm programs is needed, given the consequences of the 1985 farm bill. One of its few redeeming features is that, by pumping billions of dollars into deficiency payments, it enabled some producers to hang on. But what about the thousands that have gone out of business since 1985? To prevent this from recurring, producers need to get more of their income through higher market prices.

In the effort to achieve international competitiveness, grain prices have been driven way below world equilibrium levels by the farm programs in an attempt to regain and maintain world market share. I question whether this has been the most effective way to ensure demand for our farmers' products. This philosophical premise of the 1985 bill has been shown by events to have been largely a mistake.

Unfortunately the administration's response to the needs of American agriculture for the nineties is lacking. I have previously called the proposal a fill-in-the-blank proposal because it fails to address the tough issues such as where to set target prices. But it also has blanks in terms of outlining an administration vision of any new direction for American agriculture. It's just more of the same until such time as we get sold down the river in GATT.

The one so-called new idea in the bill is in fact the already discredited idea of decoupling. Except this time it is being presented to Congress in the guise of flexibility. But let there be no mistake, this is the wolf in sheep's clothing. By tying program payments to 1990 bases, producers payments will be decoupled from their plantings, even if the payment rate is determined by market prices. This kind of decoupling would have a disastrous effect on the price stabilizing role of the program. Without the link between payments and production, balancing supply and demand will become practically impossible.

While I applaud the administration for endorsing the normal crop acreage approach, by imposing decoupled payments on the system, its usefulness is greatly diminished. Unless the support price imbalances between program crops and the oilseeds are corrected, we will be setting the stage for huge destabilizing shifts in crop acreage around the country. Specifically, the administration's proposal discriminates against crops such as barley and

oats that are important in many parts of the country, including my State of South Dakota.

These are deficiencies in the 1985 farm bill that the administration's proposal fails to address. However, there are programs that predate the 1985 bill that are working well that the administration wants to tinker with. The wool and honey programs are two programs that have an outstanding performance record. The adage "if it ain't broke, don't fix it" should apply to these programs.

The same can almost be said of the administration's proposal for the farmer-owned reserve. While the program may need some adjustments, it does not need to be eliminated, which is what, in effect, the administration's so-called revisions would do.

One final note on the administration's proposal that will be addressed in separate legislation: proposing the termination of the crop insurance program is one of the most controversial actions this administration has taken in agricultural policy since President Bush was elected. Going cold turkey on the program is simply impractical, quite aside from the merits of the program. Producers are making their new crop year planting decisions now and need to know that insurance will be available to them. It is my hope that Congress will do everything possible to see that the current program is fully funded this year.

In spite of my serious reservations with the administration's proposal, I do appreciate the effort that Secretary Yeutter and his staff have put into their plans. There are positive elements and I look forward to working with the administration to resolve the differences that we have.

The legislation we are introducing today offers a strong new direction for American agriculture. It is strong on prices and therefore strong on assuring higher farm income. It is strong on giving producers the flexibility to plant what they want and not tying them into producing for the program. It is a strong environmental proposal because of greater flexibility and allowing producers a bushel-based payment option.

The decline in farm income, that we have so often heard Senator CONRAD describe, can be reversed by this proposal by ensuring higher prices for farmers. By raising loan rates and indexing target prices to cost of production, farmers will get better returns from the market, and know that they have income protection that will not be eroded by inflation. Together with the implementation of a marketing loan for oilseeds, this legislation ensures the viability of wheat, feedgrains, and oilseeds producers.

The Normal Crop Acreage [NCA] approach, with a realignment of support prices and payments tied to what is actually produced on the base, allows producers the freedom to diversify their crop production practices. This will allow for more environmentally beneficial farming practices and create greater economic opportunity for producers.

The realignment of target prices is particularly critical for barley and oats, both of which are tremendously important to the State of South Dakota. The State ranked first in oats production in 1987 and third in 1988. The State also grows between 700,000 to 1 million acres of barley each year.0

The record will clearly show that, with barley production costs and target prices over the decade of the eighties clearly out of line, our producers have had woefully inadequate income protection. Only in 1986 did the target price actually cover production costs, and since then, because of the 1985 farm bill, the gap has widened dramatically. Perhaps that's why acreage dropped by almost 30 percent between 1985 and 1988.

That was the good news when you compare it to what has happened to this country's oats industry. The target price for oats has never been anywhere near covering producers' costs of production, and the gap between them is just getting bigger. So, despite the amazing increase in demand for oats for human consumption, we have been unable to increase our domestic production. Harvested acreage declined from 8.2 million acres in 1985 to 5.6 million in 1988. No wonder oats have been flooding across the border from Canada.

The realignment of these support prices, bringing the oats and barley target prices to $2.27 and $2.72 respectively and introducing a soybean marketing loan of $6.25, will not only ensure adequate protection for producers, but will encourage stable production patterns between commodities. With tighter stocks management that this bill requires of USDA, the programs can be administered more easily and USDA's role in affecting the market will be made more explicit. The new farm bill must force USDA to publicly acknowledge the huge influence its program decisions have on the market and producers' incomes.

Mr. President, in summary, this legislation will provide for higher farm income and allow producers greater planning flexibility, all under simplified rules that benefit both producers and USDA.

Mr. HARKIN. Mr. President. I am very pleased to join with my colleagues in introducing this commodity legislation today. A strong new farm bill is essential to ensure the survival of family farms, to support the efforts of American farmers to maintain and open foreign markets, and to sustain the economic base of small towns and rural communities.

To find out what farm families and rural communities need in a new farm bill we took the Agriculture Committee out of Washington for field hearings and conducted mail surveys and town meetings. We did that because we want a farm bill that serves the needs and the goals of rural America—a farm bill written here in this country with the advice and involvement of people living on farms and in small towns, not at a negotiating table in Geneva or elsewhere.

We believe the commodity legislation we are introducing today will serve the needs of rural America, now and into the 1990's, and do so responsibly within the limits of the Federal budget.

THE NEED FOR ADEQUATE FARM INCOME

Farmers are very concerned about the prospects for farm income in the coming decade. The past decade served as a bitter reminder that a healthy agriculture is essential for a sound rural economy and strong rural communities. The message is clear: low farm income brings economic devastation and human tragedy to rural America. We must not forget that lesson as we craft a new farm bill.

To be sure, the situation is better for farmers and rural communities now than it was a few years back, but it is a tenuous recovery that could easily turn around.

So I am very disappointed in the way our own Secretary of Agriculture is painting an unrealistically rosy picture of the farm economy in order to sell the administration's policies. Secretary Yeutter says that net farm income is at record levels and that is what the public and urban members of Congress are led to believe. But when those figures are adjusted for inflation it is clear that we had much higher net farm income in many previous years.

President Bush's budget calls for cutting $1.5 billion in commodity program spending next year. A cut of $1.5 billion distributed among the commodity programs would translate into a 14-cent cut in the corn target price and a 20-cent cut in the wheat target price. But even if cuts are avoided and target prices are frozen, inflation will eat away at farm income. If the corn target price stays at $2.75, by 1995 the target price would really be only $2.15 in 1989 dollars with inflation at 5 percent.

And remember, in 1970 we spent 2.5 percent of the Federal budget on commodity programs. Commodity program spending is now less than 1 percent of the budget, and if the administration has its way it will be down to eight-tenths of 1 percent.

Our bill provides for target price adjustments beginning with the 1991 crop to take into account increases in the prices farmers pay for production

inputs. We establish a new loan program for soybeans and other oilseeds and increase the target prices for oats and barley. And we require that farmers be paid the same as commercial warehouses for storing grain in the farmer owned reserve. Deficiency payments will be calculated on the basis of average market prices in each State rather than national average prices in order better to reflect the actual prices farmers receive for their crops.

FARM PROGRAM FLEXIBILITY

Farmers also want more freedom under the farm program to make their own planting decisions. Our bill will establish a Normal Crop Acreage [NCA] program to provide this flexibility in order to encourage crop rotations and planting in response to the market.

Ours is a simplified and understandable NCA program. The NCA base for a farm consists of the total of current program crop bases plus the average acreage planted to oilseeds over the past 5 years. Within the NCA base the farmer may plant any crop, including legumes or grasses, without affecting the NCA base history. Farm program payments will be made only for program crops and oilseeds actually grown.

ENVIRONMENT AND CONSERVATION

Farmers also need changes in commodity program rules to enable them to address environmental and conservation concerns. Our Normal Crop Acreage Program will facilitate crop rotations. In addition, our bill establishes an optional program allowing producers to limit the actual quantity of bushels they market or use instead of idling acreage under acreage reduction programs. This option provides environmental benefits by allowing a farmer to produce the same number of bushels on a larger number of acres through less intensive production practices.

MARKETING LOAN PROGRAM FOR OILSEEDS

I want to give some additional attention to a part of our bill that I believe is especially important to my State of Iowa. The bill establishes a new marketing loan program for soybeans and oilseeds. The loan rate for soybeans will be $6.25 a bushel, with USDA having authority to lower the loan rate by no more than 10 percent. The loan rate under the current program is $4.53 a bushel.

The loan may be repaid at either the loan rate or the prevailing world price, whichever is lower. Our bill will put our U.S. soybean producers in a strong position to sell at world prices and compete for their fair share of international markets.

It is clear that our soybean producers need such a program to hold and regain international market share. U.S. exports of soybeans have fallen by 35 percent since 1979, while world trade in soybeans has increased by 21 percent. U.S. soybean acreage has fallen nearly 10 million acres since 1979. Hence, over the past 10 years, U.S. soybean production declined 15 percent while world soybean production increased 15 percent.

The planting flexibility of the Normal Crop Acreage program in our bill combined with the marketing loan program will encourage farmers to grow more soybeans. In Iowa, about one-fifth of corn acres are in continuous corn. Rotating with soybeans has positive agronomic and environmental effects. Crop rotation often results in a 10- to 15-percent increase in yields and savings in fertilizer, insecticide, and possibly herbicide costs. It takes about 1.2 pounds of nitrogen to grow a bushel of corn following corn, but only about 0.8 pound of nitrogen to grow a bushel of corn following soybeans.

The most important aspect of the oilseeds marketing loan program, though, is the protection it provides for farm income for producers. Soybean production in Iowa for 1989 was nearly 323 million bushels. If the price could be increased by 50 cents a bushel, that would mean $160 million in additional income for Iowa farmers in 1 crop year.

Mr. President, this is a good bill for farmers and rural America.●

By Mr. MACK (for himself and Mr. GRAHAM):

S. 2395. A bill to temporarily suspend the duty on metal oxide varistors; to the Committee on Finance.

TEMPORARY SUSPENSION OF DUTY

● Mr. MACK. Mr. President, I am introducing legislation today to temporarily suspend the duty on metal oxide varistors. Before we made the transition to the harmonized tariff schedules, metal oxide varistors entered the United States duty free, as these items are not produced in the United States. Under the new tariff system, the duty on metal oxide varistors suddenly jumped to six percent. This duty increase occurred simply because of the substantial differences in nomenclature between the old and new tariff systems. This legislation will resolve this inequity, and I hope that my colleagues will support the bill.●

By Mr. CRANSTON (by request):

S. 2396. A bill to amend title 38, sections 5002(d), 5004(a)(3)(A), and 5009(i)(2) United States Code, to raise the Department of Veterans Affairs' minor construction cost limitation from $2 million to $3 million, and for other purposes; to the Committee on Veterans' Affairs.

INCREASE IN MINOR CONSTRUCTION COST LIMITATION

Mr. CRANSTON. Mr. President, as chairman of the Veterans' Affairs Committee, I have today introduced, by request, S. 2396, a bill to increase, from $2 to $3 million, the minimum amount of Department of Veterans Affairs construction projects classified as major construction projects. The Secretary of Veterans Affairs submitted this legislation by letter dated March 26, 1990, to the President of the Senate.

My introduction of this measure is in keeping with the policy which I have adopted of generally introducing—so that there will be specific bills to which my colleagues and others may direct their attention and comments—all administration-proposed draft legislation referred to the Veterans' Affairs Committee. Thus, I reserve the right to support or oppose the provisions of, as well as any amendment to, this legislation.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD at this point, together with the March 26, 1990, transmittal letter and enclosed section-by-section analysis.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2396

Be it enacted by the Senate and the House of Representatives of the United States of America in Congress assembled,

That Chapter 81 of title 38, section 5002(d), United States Code, is amended by striking from section 5002(d) the language "medical facility which is expected to involve a total expenditure of more than $2,000,000," and inserting in lieu thereof the phrase "major medical facility project as defined by section 5004(a)(3)(A)."

SEC. 2. Chapter 81 of title 38, section 5004(a)(3)(A), United States Code, is amended by striking the dollar threshold stated in section 5004(a)(3)(A) "$2,000,000," and inserting in lieu thereof "$3,000,000,".

SEC. 3. Chapter 81 of title 38, section 5009(i)(2), United States Code, is amended by striking the dollar threshold stated in section 5009(i)(2) "$2,000,000" and inserting in lieu thereof "$3,000,000".

THE SECRETARY OF VETERANS AFFAIRS,
Washington, March 26, 1990.

Hon. DAN QUAYLE,
President of the Senate, Washington, DC.

DEAR MR. PRESIDENT: There is transmitted herewith a draft bill "To amend title 38, section 5004(a)(3)(A), United States Code, to raise the Department of Veterans Affairs' minor construction cost limitation from $2 million to $3 million and for other purposes." It is requested that the bill be referred to the appropriate commmittee for prompt consideration and enactment.

The draft measure would amend title 38, section 5004(a)(3)(A), by changing the dollar threshold which, in part, defines a VA major medical facility project, from $2 million to $3 million. Corresponding amendments are required to title 38, section 5002(d), which requires the Secretary to consider the sharing of health-care resources with the Department of Defense when projects cost over $2 million and section 5009(i)(2) which provides that funds in the revolving fund may be expended for a project or more than $2 million for the con-

struction, alteration, or acquisition of a parking facility.

The proposal to increase the minor construction limitation from $2 million to $3 million is primarily based on the need to stay current with inflation. While inflation is indeed the primary element in the request for an increase in the minor construction limitation, program efficiency is also an important element in this proposal. The trend towards planning a project into multiple smaller projects or phases, each with its own distinct identity is becoming more prevalent in order to keep within the current $2 million limitation. Each of these projects or phases require the full administrative process from inception to completion. Increasing the minor construction limitation to $3 million would help reduce the possible need for multiple projects or phasing and increase administrative productivity on projects. The proposal would produce these savings by reducing the need for multiple projects and through program efficiencies but savings are not quantifiable.

The Office of Management and Budget advises that there is no objection to the submission of this legislative proposal to the Congress and that its enactment would be in accord with the program of the President.

Sincerely yours,

EDWARD J. DERWINSKI.

SECTION-BY-SECTION ANALYSIS

Section 1 of the draft bill would amend section 5002(d) of title 38 to provide that the Secretary will consider the possibility of a sharing agreement with the Department of Defense as an alternative to all or part of a major medical facility project. This proposed change ties the statutory requirement to all major medical facilities projects as defined by section 5004(a)(3)(A). That is, all medical facility projects for which appropriations are sought as "major construction" projects.

Instead of using a specific dollar level, section 5002(d) would be amended to indicate that consideration to the option of sharing must be given before the "construction, alteration, or acquisition . . . of a major medical facility." Under the existing statute "major medical facility project" is defined as "a project for the construction, alteration, or acquisition of a medical facility involving a total expenditure of more than $2 million." *See* 38 U.S.C. § 5004(a)(3)(A) (1989).

Section 2 of the draft bill would amend section 5004(a)(3)(A) of title 38 to increase the statutory minor construction cost limitation from $2 million to $3 million. This proposed change reflects increased costs for construction as a result of inflation.

Section 3 of the draft bill would amend section 5009(i)(2) of title 38 to increase the dollar limit currently set forth in the statute thereby making it consistent with the proposed changes.

Current law (38 U.S.C. § 5004(a)(3)(A) and the Construction, Minor, appropriation language) limits the cost of minor construction projects to $2 million or less. This level has been in effect since Fiscal Year 1981. Prior to Fiscal Year 1981, the cost limitation for minor projects was $1 million.

By Mr. CRANSTON (by request):

S. 2397. A bill to amend the title 38, United States Code, to expand the Secretary's authority to make temporary appointments of certain health care personnel employed in the Veterans Health Services and Research Administration; to the Committee on Veterans' Affairs.

TEMPORARY APPOINTMENT OF CERTAIN HEALTH CARE PERSONNEL

Mr. CRANSTON. Mr. President, as chairman of the Veterans' Affairs Committee, I have today introduced, by request, S. 2397, a bill to expand the Department of Veterans Affairs' authority to make temporary appointments of certain health care personnel. The Secretary of Veterans Affairs submitted this legislation by letter dated March 21, 1990, to the President of the Senate.

My introduction of this measure is in keeping with the policy which I have adopted of generally introducing—so that there will be specific bills to which my colleagues and others may direct their attention and comments—all administration-proposed draft legislation referred to the Veterans' Affairs Committee. Thus, I reserve the right to support or oppose the provisions of, as well as any amendment to, this legislation.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD at this point, together with the March 21, 1990, transmittal letter and enclosed analysis of the draft bill.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2397

Be it enacted by the Senate and the House of Representatives of the United States of America in Congress assembled, That section 4114(a)(3) of title 38, United States Code, is amended—

(a) by striking out the second sentence in subparagraph (A) and inserting in lieu thereof the following:

"Temporary full-time appointments of persons who have successfully completed a full course of training as a nurse, physical therapist, practical or vocational nurse, occupational therapist, or pharmacist in a recognized school for that occupation, approved by the Secretary, and who are pending registration or licensure in a State or certification by a national board recognized by the Secretary, shall not exceed two years."

(b) by inserting after the first sentence in paragraph (C) the following:

"A student who has a temporary appointment under this paragraph and who is pursuing an academic program leading to a degree in physical therapy, occupational therapy or pharmacy approved by the Secretrary may be reappointed for a period not to exceed the duration of such student's academic program."

THE SECRETARY OF VETERANS AFFAIRS,
Washington, DC, March 21, 1990.

Hon. DAN QUAYLE,
President of the Senate, Washington, DC.

DEAR MR. PRESIDENT: There is transmitted herewith a draft bill "To amend title 38, United States Code, to expand the Secretary's authority to make temporary appointments of certain health care personnel employed in the Veterans Health Services and Research Administration." We request that it be referred to the appropriate committee for prompt consideration and enactment. Provisions similar to those in the enclosed draft bill were included in the larger S. 1004, introduced at our request on May 16, 1989, by Senator Cranston. The other provisions of that larger draft bill have been enacted or dropped. However, VA continues to experience difficulty recruiting qualified health care professionals and the need to expand VA's appointment authority in that regard remains a concern. Thus, we are submitting a new draft bill, containing only the relevant portions of our earlier proposed bill, for consideration.

The enclosed draft bill would expand the temporary appointment authority under 38 U.S.C. § 4114(a)(3) for graduate nurses, physical therapists, practical or vocational nurses, occupational therapists, and pharmacists. VA continues to experience critical staffing shortages in these health-care professions. The current statute, which limits temporary appointments of such professionals to one year, places the VA at a serious disadvantage when competing against other health-care employers for this scarce pool of health care professionals.

Under current Office of Personnel Management regulations, Va employees with temporary appointments for one year or less are ineligible for health care and life insurance benefits. See 5 C.F.R. § 870.202(a)(1) and § 890.102(c). Private employers, competing for the same scarce personnel, routinely offer such benefits to graduates when they are first employed, making VA employment less desirable to new recruits. In addition, graduate health-care professionals who receive temporary appointments under section 4114(a)(3)(A) are employed with the expectation that, upon becoming registered, licensed, or certified, they will be converted to a probationary appointment under 38 U.S.C. § 4103(3) (with full benefit status). A graduate whose temporary appointment expires before he or she receives the requisite license, certification, or registration is likely to seek employment elsewhere, further frustrating VA efforts to ensure continuity and staffing stability.

The proposed amendment would authorize the VA to appoint graduate health-care personnel who have successfully completed a full course of training as a nurse, physical therapist, practical or vocational nurse, occupational therapist, or pharmacist, in a program approved by the Secretary and who are awaiting registration or licensure in a State, or certification by a national board recognized by the Secretary, for up to two years. This extended temporary appointment period would enable such personnel to obtain health care and life insurance benefits. It would also reassure graduates considering career options with the VA that they do not risk a break in employment pending licensure within the two-year timeframe, a time during which prospective licensees might be enticed to accept employment outside the VA.

The draft bill would also amend 38 U.S.C. § 4114(a)(3)(C) by authorizing the reappointment of students who hold a temporary appointment under section 4114(a)(3), for a period not to exceed the duration of the student's academic program. This authority would apply only to students pursuing an academic program leading to a degree in physical therapy, occupational therapy and pharmacy, which has been approved by the Secretary. The law currently allows temporary appointments of most medical

support personnel for one year (section 4114(a)(3)(A)) but does not permit reappointment (section 4114(a)(3)(C). This current authority has been used to appoint students who are enrolled in good standing at an accredited school in one of the above-listed occupations, but in many cases the one-year appointment terminates before the student receives his or her degree. This interruption in the "internship" hinders the VA's opportunity to employ, observe, and identify promising students, and results in the loss of potential career personnel in these occupations.

The proposed amendment provides for reappointment, as opposed to extending the initial appointment period. Accordingly, the period of initial appointment can serve as an opportunity for VA to assess the student's performance and potential. The proposed amendment would allow the VA to reappoint such students for a period not to exceed the duration of their academic program leading to a degree. With appropriate orientation and supervision, such students could be appointed as technicians and perform duties of increasing sophistication consistent with the level of training they have completed. Moreover, because the draft bill would enable more stable employment relationships with students during their training, permanent VA employment may be more attractive to the students. Thus, the proposed change would help VA meet current staffing needs in these occupations as well as enhance the Department's opportunity to recruit and retain promising students for career service. There are no costs associated with this draft bill.

The Office of Management and Budget advises that there is no objection from the standpoint of the Administration's program to the submission of this legislative proposal to the Congress.

Sincerely yours,

EDWARD J. DERWINSKI.

ANALYSIS OF DRAFT BILL

Section 1(a) of the draft bill would amend 38 U.S.C. § 4114(a)(3)(A) to authorize temporary full-time appointments for up to two years of persons who have successfully completed a full course of training as a nurse, physical therapist, practical or vocational nurse, occupational therapist, or pharmacist, and who are awaiting registration or licensure in a State, or certification by a national board recognized by the Secretary. The training must have been in a recognized school for that occupation, approved by the Secretary. This section (4114(a)(3)(A)) currently limits such appointments to one year. The draft bill adopts language from a similar provision in section 4114(a)(3)(A) which permits the appointment of graduate nurses who are awaiting registration, for a period not to exceed two years. The draft bill would delete this provision, but the same appointment authority for graduate nurses would be encompassed in the broader provision which the draft bill proposes as its replacement.

Section 1(b) of the draft bill would amend 38 U.S.C. § 4114(a)(3)(C) by authorizing the reappointment of students who hold a temporary appointment under section 4114(a)(3), for a period not to exceed the duration of the student's academic program. This authority would apply only to students pursuing an academic program leading to a degree in physical therapy, occupational therapy and pharmacy, which has been approved by the Secretary. The law currently allows temporary appointments of most medical support personnel for one year (section 4114(a)(3)(A)) and does not permit reappointment (section 4114(a)(3)(C)). The proposed amendment is similar to existing authority in section 4114(a)(3)(C) which permits VA to reappoint nursing students for a second year, in that it provides for reappointment as opposed to extending the initial appointment period.

By Mr. DANFORTH, (for himself, Mr. MCCAIN, Mr. HOLLINGS, Mr. LOTT, Mr. PACKWOOD, Mr. BURNS, Mr. PRESSLER, and Mr. BOND):

S. 2398. A bill to authorize the continuation of the National Senior Olympic games; to the Committee on Commerce, Science, and Transportation.

By Mr. DANFORTH (for himself, Mr. MCCAIN, Mr. LOTT, Mr. PACKWOOD, Mr. BURNS, Mr. PRESSLER, and Mr. BOND):

S. 2399. A bill to authorize the registration of the word mark "National Senior Olympics"; to the Committee on Commerce, Science, and Transportation.

NATIONAL SENIOR OLYMPIC GAMES

Mr. DANFORTH. Mr. President, today I am introducing two bills to allow senior citizens to continue to participate in the U.S. National Senior Olympic [USNSO] games.

The USNSO was created in 1985 in order to provide citizens over age 55 with the opportunity to compete in a national Olympiad. The first National Senior Olympics were held in St. Louis in 1987. This event attracted over 2,500 participants, including athletes from Canada and Taiwan.

After the conclusion of this successful event, the U.S. Olympic Committee [USOC] informed the USNSO that it could use the word "Olympics" no longer. Despite considerable discussion, the USOC would not modify its position.

On March 29, 1988, I joined 17 other Members of the Senate in writing to the USOC to urge it to permit the USNSO to continue to use the term "Olympics." The USOC indicated that it would not object to local "Senior Olympics," but it would not permit a national "Senior Olympics." According to the USOC, such games would "compete programmatically or financially with the U.S. Olympic effort."

Mr. President, the USOC's decision is wrong. By passing the Amateur Sports Act of 1978, Congress recognized that an effective coordinating body is essential to developing competitive Olympic teams. But the USOC's mission is not limited to fielding strong teams. The Commission is directed by law to establish national goals for amateur athletic activities. This applies to all Americans. The USOC has done a commendable job with the Special Olympic for disabled Americans and the Junior Olympics for young Americans. The USOC fully recognizes and supports these important competitions as part of the Olympic movement. In the case of the Special Olympics, the USOC permits use of the name "Olympics" because the competition is directed by a member organization which performs an enumerated purpose of the Amateur Sports Act. The Junior Olympics enjoy this privilege as a result of a grandfather clause in the original law passed by Congress to incorporate the USOC. In both cases, Congress acknowledged its support for these competitions in statute. The time has come for Congress to promote a National Senior Olympic competition. The law must be expanded to afford Americans over the age of 55 the opportunity to participate in an official Olympiad.

The USOC has the authority to permit the USNSO to use the Olympic name. To date, the USOC has refused. The Supreme Court has upheld the plain meaning of the Amateur Sports Act which grants the USOC complete authority over use of the name "Olympics." Negotiations between the USOC and the Senior Olympics have not resolved this issue. The only solution is to change the law to reflect the importance of a National Senior Olympic competition.

The first bill that I am introducing amends the Amateur Sports Act of 1978 to authorize the USNSO to use the name "Olympics" in order to promote athletic competition among our Nation's senior citizens. The second bill will permit USNSO to register "National Senior Olympics" as its trademark under the Lanham Act.

Mr. President, these are modest measures, but they are important to the Senior Olympics. Elderly Americans should have the same opportunity as disabled Americans and young Americans to participate in official Olympic games. I urge my colleagues to support these bills.

Mr. PRESSLER. Mr. President, I am pleased to join my distinguished colleague, Senator DANFORTH, in introducing legislation to authorize the registration of the World Senior games as the "National Senior Olympics," and provide for the continuation of the National Senior Olympic games. Since its inception in 1985, the U.S. National Senior Olympics [USNSO] have been denied use of the trademark "Olympics" by the U.S. Olympics Committee. This legislation would permit use of the trademark "Olympics" by the USNSO.

I have actively supported the senior games since their first event in 1987. For the past 2 years, I have served on the advisory board for the games. These competitions recognize the value of fitness and health to older Americans. The World Senior games

emphasize exercise and athletics while providing an excellent opportunity for senior citizens to meet other seniors.

The use of the "Olympics" trademark would enhance the visibility of the World Senior games and promote a very worthwhile event. The promotion of healthy physical activity is as important for senior citizens as it is for the youth of America.

By Mr. ARMSTRONG:

S. 2400. A bill to amend section 7430 of the Internal Revenue Code of 1986 with respect to eligibility of taxpayers to receive attorney fees and other costs; to the Committee on Finance.

ELIGIBILITY FOR ATTORNEY FEES AND OTHER COSTS

● Mr. ARMSTRONG. Mr. President, imagine you are walking down the steps of the Tax Court, finally victorious after a 4-year running battle with the Internal Revenue Service over a $10,000 claim against you for additional taxes owed. The judge in the case ruled in your favor, the IRS was wrong all along.

As you reach the bottom of the steps, you shake hands with your lawyer and he hands you his final bill for $8,000. Out of no fault of your own as the court has decided, the Federal Government through its agent the IRS has caused you to lose $8,000, not to mention months and years weeks of worry.

Under current law, you may recover reasonable litigation and administrative costs, such as professional fees, court costs, et cetera, incurred in defending yourself but only if you prevail in the case and if you can prove the IRS "was not substantially justified" in pressing its case. Not only is the burden of proof on you as the taxpayer, but you have a very murky standard to meet in order to recover your costs.

The facts are, the IRS claimed you owed additional tax, the Tax Court ruled in your favor, and you're out $8,000. Whether the IRS thought it had a good case or not is completely irrelevant. You have suffered a financial loss at the hands of the Government and you should be entitled to recover the full $8,000.

The Senate recognized the inequity in this situation when it shifted the burden of proof to the IRS as part of the Technical and Miscellaneous Revenue Act of 1988. Under the Senate's provision, the IRS was required to prove its position was substantially justified. This provision in the Senate's bill was dropped in conference.

I believe it only fair for a taxpayer to be compensated to the extent he incurs costs in successfully defending himself against claims of the IRS. While the Senate's position in 1988 was an improvement over current law, I believe it missed a basic principle. Whether the IRS was substantially justified and whoever is tasked with proving justification is irrelevant to the fact the taxpayer has suffered a financial loss at the hands of the Government through no fault of his or her own.

This situation is unfair and unacceptable. Therefore, I am introducing legislation with a single purpose: to remove the standard of "substantially justified" and replace it with the simple rule that if the taxpayer prevails in a tax dispute with the IRS, then the taxpayer may recover the costs of defending himself.●

By Mr. KASTEN:

S. 2401. A bill to amend the Food Security Act of 1985 to eliminate barriers to Great Lakes maritime trade, and for other purposes; to the Committee on Commerce, Science, and Transportation.

AGRICULTURAL EXPORT REVITALIZATION ACT

● Mr. KASTEN. Mr. President, I rise today to address a matter of great importance to the State of Wisconsin. It is also a matter of plain common sense.

As my colleagues well know, agriculture is the foundation of Wisconsin's economy. Wisconsin has long been the Nation's leader in producing a whole array of agricultural products, and agriculture is the lifeblood of countless small communities in what is largely a rural State.

A second key component of Wisconsin's economy is the Great Lakes. These huge and majestic bodies of water provide natural resources, tourism, and trade for the State.

Unfortunately, right now there is a Federal law which is devastating these two key sectors of Wisconsin's economy. This law simply must be changed.

The 1985 farm bill made changes to Public Law 480—the Food for Peace Program. Everyone supports the Food for Peace Program. Over the years, it has been a very successful foreign aid tool. This program, which involves the shipment of agricultural products to needy, less fortunate nations, has been a tremendous help in our battle to end world famine and hunger.

However, the 1985 farm bill changed the way in which we ship Food for Peace cargoes. This change has raised the cost of the program, and forced us to ship less grain overseas than might otherwise be possible.

Specifically, the 1985 farm bill increased the cargo preference requirement for the Food for Peace Program—the amount of goods which must be sent on U.S.-flagged vessels—from 50 percent to 75 percent of all goods shipped. It also guaranteed, through a set-aside, a short-term continuation of Food for Peace shipments to the Great Lakes.

This change was called for to help the U.S. shipbuilding industry. Our domestic shipbuilders have long been under siege by foreign competition. It was argued that increasing the percentage of U.S. ships carrying Food for Peace cargoes would spark a demand for more U.S. ships—thus helping the domestic shipbuilding industry.

But Mr. President, this has not happened. There has been no real increase in U.S. shipbuilding activity since the enactment of the 1985 farm bill.

What has taken place, however, is a steep decline in Food for Peace trade activity in the Great Lakes region. The Port of Milwaukee, for example, handled 220,000 tons of Food for Peace cargo in 1987. Last year, they handled 70,000 tons. So far this year, they have not handled any.

Why is this the case? It is more costly for a ship to come up the St. Lawrence Seaway into the Great Lakes than it is to simply head for a saltwater port. Foreign-flagged vessels are willing to do it—U.S.-flagged ships are not. The higher the cargo preference requirement mandated by Federal law, the worse Great Lakes ports do.

So even though grain products can be purchased at far less cost in Milwaukee than elsewhere, they must be shipped 1,500 miles south to be put on a U.S. vessel—instead of being loaded on a foreign ship in Milwaukee. This simply does not make sense. It imposes inefficiencies on the system, and it hurts Wisconsin's farmers. The farm community in my State is being damaged by a Federal policy which forces them to compete unfairly with other regions of the country. We should not be pitting farmer against farmer—but instead working for a sensible policy which we can all unite behind.

I support the U.S. shipbuilding industry. I have a number of shipbuilders in my State. I feel we should have Federal policies which will preserve our shipbuilding capability. But increasing the cargo preference requirement has not made a difference. All it has done is shift exisitng ship business from the Great Lakes to saltwater ports. This is not right.

We need to get back to a more honest policy. Today I am introducing legislation, the Agricultural Export Revitalization Act, which will reverse this unfortunate aspect of the 1985 farm bill. Specifically, the Agricultural Export Revitalization Act would do three things. First, it would restore the Great Lakes set-aside for 3 more years. Second, it would gradually reduce the cargo preference requirement on Food for Peace cargoes. From 75 percent in 1990, we would shift to 65 percent in 1991, 55 percent in 1992 and 50 percent thereafter. Third, it would direct the Secretary of State to begin a new round of discussions with the Canadian Government aimed at eliminating tolls on the St. Lawrence

Seaway—tolls which further add to Great Lakes shipping costs.

When enacted, the Agricultural Export Revitalization Act would return Food for Peace cargo preference requirements to their historic levels. This would give Great Lakes ports the opportunity to compete freely and fairly for Food for Peace cargoes. It would give Wisconsin a fighting chance to save more than 3,000 jobs that are directly linked to port activity. It would provide new export markets for Wisconsin farm products. It would reduce inefficiencies in the Food for Peace Program. And it would help save the Government money.

I urge my colleagues to give their strong support to the Agricultural Export Revitalization Act.●

By Mr. BAUCUS:

S. 2403. A bill to designate certain lands in Montana as wilderness, to release other forest lands for multiple use management, and for other purposes; to the Committee on Energy and Natural Resources.

MONTANA INTERIM ROADLESS LANDS RELEASE AND CONSERVATION ACT

Mr. BAUCUS. Mr. President, today I rise to introduce the Montana Interim Roadless Lands Release and Conservation Act. For more than a decade, I have listened to Montanans on the roadless lands issue. My mail on this issue has numbered in the tens of thousands of letters. By 1988, Congress has held over 100 hours of hearings on Montana wilderness.

Last summer, I added to this record by holding four hearings in Montana. In 2 days, I heard from over 700 Montanans. I remained at each hearing until every single Montanan in the room had a chance to speak.

Consistently, one message came through loud and clear: It is time to settle this issue, and it is time to settle it in a balanced, evenhanded fashion. It is time to move Montana forward and put this issue behind us.

I call on all Montanans to join me by adopting this balanced interim approach called for in my bill. While I will keep an open mind to suggested modifications, I must caution everyone that based on my years of experience with this issue, I believe this bill represents a balance that is in Montana's best interest. I hope that we can act quickly to put this issue to rest.

Mr. President, last fall, President Bush paid Montana the honor of a visit to help us celebrate our 100th year as a State.

Inspired by the grandeur of our Big Sky Country, the President said something I, and most other Montanans, agree with:

> Montanans have made a decision never to let environmental exploitation go unchecked. We can have a sound ecology and a strong economy.

In a word, the President advocated balance.

I believe Montana's future depends upon achieving such a balance. Traditional industries like timber, mining, and agriculture remain the backbone of our economy.

Without these natural resource jobs, many of our children will be forced to leave Montana. Yet, without our open spaces and wild lands, many of these same young Montanans would have little incentive to remain.

And other less traditional industries are beginning to discover what some of us have known all along: Montana is a great place to live and a great place to do business.

For instance, tourism is on the upswing, pumping almost $1 billion a year into our economy. And other new businesses, like Patagonia's mail order operation in Bozeman, were lured to Montana by the high quality of life our wild lands and clean environment help assure.

While President Bush spent only a brief time in my home State, his comments captured the mood of Montana's mainstream. We're not much interested in extreme or one-sided solutions to complex problems. Montanans want balance.

COMMON SENSE FROM MONTANA'S MAINSTREAM

Two weeks ago, the Great Falls Tribune conducted "man on the street" interviews with a number of Montanans about the future of our State. In almost every interview, these Montanans expressed a desire for balance. They expressed an unquenchable optimism that we can create jobs and conserve our land.

I'd like to take a moment to share some of these mainstream voices of Montana common sense with the Senate: Steve Marquesen, a restaurateur from Columbia Falls:

> We need our environment, but we need our timber industry too * * *. Montanans should take some real pride in what we are. We have our problems, but our quality of life—including the slower pace, mountains, and scenery—is much better than any other place.

Ray Soulsby, a rancher from Stanford:

> Montanans need to learn to use their resources, but not use them up * * *. We need to take care of the land; it's all we've got.

Rosemary Caton, a flower shop owner from Laurel:

> We have two challenges. One is providing jobs and getting new industry to come to Montana. The other is keeping our land beautiful and wild.

And, finally, Tom Sebase, a computer businessman from Polson:

> Montana's biggest obstacle is the fight between environmentalists and the people who are pro-industry. Because of that, Montana is stifled. I'd like to see a balance reached between our traditional economy and new ideas.

Steve, Ray, Rosemary, and Tom echo the views I hear almost every weekend when I return home. Times are tough in Montana. We need jobs. But we don't want to lose the natural values that make Montana special.

With our economy relying heavily upon natural resources, achieving such a balance will always involve a degree of struggle and compromise between competing interests.

Yet, when it comes to deciding the future of our remaining roadless lands, this struggle has, at times, escalated to fight beyond the bounds of reason. Crass politics and genuine personal convictions on both sides have combined to pit Montanan against Montanan in a struggle that never seems to end.

Sadly, when the conflict rises to this level, there are no winners; all Montanans lose.

A BALANCED BILL

It's time to call a truce. Let's put narrow special interests aside and seek middle ground. We must find a balanced solution and move forward to face other issues confronting Montana as we enter our second century of statehood.

That is why today I am introducing the Montana Interim Roadless Lands Release and Conservation Act of 1990.

Given the level of emotion surrounding this issue, no Montana roadless lands bill is going to be totally noncontroversial. But there is land which has been proposed over and over again for release or wilderness.

In order to solve as much of this problem as we can now, I propose dealing with as many of these consensus areas as we can now. This approach will release more land and protect more areas. It will also leave fewer areas to be decided to a later date.

By solving part of the roadless lands question, this bill will conserve sensitive lands and create jobs for our natural resource industries.

It will release approximately 3.2 million acres of currently roadless lands to nonwilderness multiple-use management. Many of these newly released lands are rich in natural resources. And that means jobs for Montanans.

For example, my bill releases over 1 million acres of timber the Forest Service has identified as suitable for harvest. This makes available roughly 97 percent of the harvestable timber on Montana's national forests for nonwilderness multiple use. Last October, in testimony before a joint hearing of the Senate Agriculture and Energy Committees, Forest Service Chief Dale Robertson testified that a bill releasing roughly this amount of timber would eliminate a big problem facing his agency's timber program in Montana.

At the same time, my bill would permanently protect approximately

870,000 enivronmentally sensitive roadless acres. These are the headwaters of our famed blue ribbon trout streams, our most sensitive wildlife habitat, and our prime back country recreation areas.

This added protection means holding onto a part of what's best about Montana—our clear running trout streams, our unrivaled big game populations, our natural beauty and our solitude.

Protecting these lands also has an economic benefit. The important Montana businesses of outfitting, tourism, and recreation rely on these lands remaining wild.

For those controversial lands that have been neither released nor designated as wilderness, difficult questions remain to be answered by a future Congress. However, I believe this partial approach will narrow the issues and make it easier for a future Congress to revisit the issue and finish the job.

As with previous roadless lands bills I have supported, my bill carefully excludes from wilderness all groomed snowmobile trails and all patented mining claims. My bill also protects the rights of those prospectors who have staked unpatented claims in newly designated wilderness areas.

The partial approach outlined in my bill identifies for wilderness or for release those lands upon which a consensus currently exists. However, I remain open to evidence that there are additional lands which can now be released or made wilderness. Thus, if before this legislation is enacted, it can be shown that consensus exists on other lands, I will seriously consider new proposals for their disposition.

This same openminded approach also holds true for the uniquely national issue of release language. My bill includes release language that I know can pass Congress. This is the same fundamental release language approved by the Senate Energy Committee last year when it reported the Idaho wilderness bill sponsored by that committee's distinguished ranking member and former chairman, Senator MCCLURE.

While I will oppose any radical attempt to change release language, the language included in this bill represents a starting point. There are many within industry and the Forest Service who contend the existing RARE II language is outdated because of the development of the forest plans on Montana's 10 national forests and recent court cases. This is a complex legal issue. But I believe fundamental fairness dictates that industry receive nothing more and nothing less than the same degree of release agreed to by Congress in the 1984 compromise.

Therefore, I am willing to amend my bill to include revised release language. However, let's not pretend such changes will happen overnight. Unlike the strictly Montana issues of acreage and boundaries, release language is an issue setting national precedent. Future wilderness bills in other States could be affected by changed release language in a Montana bill.

As a member of the Agriculture Committee, I am willing to do what I can to bring about revised release language. Yet I cannot do this alone. Any changes must meet with the approval of the chairmen of the Energy and Agriculture Committees, industry and the conservation community. Absent such a broad-based consensus, new release language is unlikely to pass this Congress.

In closing, Mr. President, for more than a decade I have listened to what Montanans want on this issue. My mail on this issue has numbered in the tens of thousands of letters. By 1988, Congress had held over 100 hours of hearings on Montana wilderness.

Last summer I added to this record by holding four hearings in Montana. In 2 days, I heard from over 700 Montanans. I remained at each hearing until every single Montanan in the room had had a chance to speak.

Consistently, one message came through loud and clear: It's time to settle the issue in a balanced fashion and move Montana forward.

Therefore, I call on all Montanans to join me by adopting this balanced interim approach. While I remain willing to compromise on anything but what's right for Montana's land and people, I must caution that based on my years of experience with this issue, I believe my bill represents a balance that is Montana.

I hope we can act quickly to put this issue to rest.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2403

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be referred to as the "Montana Interim Roadless Lands Release and Conservation Act of 1990".

SEC. 2. FINDINGS AND PURPOSES.

(a) FINDINGS.—The Congress finds that—

(1) many areas of undeveloped National Forest System lands in the State of Montana possess outstanding natural characteristics which give them high value as wilderness and will, if properly preserved, contribute as an enduring resource of wild land for the benefit of the American people;

(2) the existing Department of Agriculture Land and Resource Management Plans for National Forest System's lands in the State of Montana have identified areas which, on the basis of their landform, ecosystem, associated wildlife, and location will help to fulfill the National Forest System's share of a quality National Wilderness Preservation System;

(3) the existing Department of Agriculture Land and Resource Management Plans for National Forest System lands in the State of Montana and the related congressional review of such lands have also identified areas that—

(A) do not possess outstanding wilderness attributes; or

(B) do possess outstanding energy, mineral, timber, grazing, dispersed recreation, or other values,

which should not be designated as components of the National Wilderness Preservation System but should be available for nonwilderness multiple uses under the land management planning process and other applicable law.

(b) PURPOSES.—The purposes of this Act are to—

(1) designate certain National Forest System lands in the State of Montana as components of the National Wilderness Preservation System, in furtherance of the purposes of the Wilderness Act (16 U.S.C. 1131 et seq.), in order to preserve the wilderness character of the land and to protect watersheds and wildlife habitat, preserve scenic and historic resources, and promote scientific research, primitive recreation, solitude and physical and mental challenge; and

(2) ensure that certain other National Forest System lands in the State of Montana be available for nonwilderness uses.

SEC. 3. WILDERNESS DESIGNATIONS.

(a) DESIGNATION.—In furtherance of the purposes of the Wilderness Act (16 U.S.C. 1131 et seq.), the following lands in the State of Montana are designated as wilderness and, therefore, as components of the National Wilderness Preservation System:

(1) Certain lands in the Beaverhead National Forest, Montana, which comprise approximately 25,000 acres, as generally depicted on a map entitled "Italian Peaks Wilderness—Proposed", dated April 1990, which shall be known as the Italian Peaks Wilderness.

(2) Certain lands in the Beaverhead National Forest, Montana, which comprise approximately 79,500 acres, as generally depicted on a map entitled "East Pioneer Wilderness—Proposed", dated April 1990, which shall be known as the East Pioneer Wilderness.

(3) Certain lands in the Beaverhead, Bitterroot, and Deerlodge National Forests, Montana, which comprise approximately 38,000 acres, as generally depicted on a map entitled "Anaconda-Pintler Wilderness Additions—Proposed (North Big Hole, Storm Lake, Upper East Fork)", dated April 1990, which are incorporated in and shall be deemed to be a part of the Anaconda-Pintler Wilderness.

(4) Certain lands in the Bitterroot and Lolo National Forests, Montana, which comprise approximately 55,600 acres, as generally depicted on a map entitled "Selway-Bitterroot Wilderness Additions—Proposed", dated April 1990, which are incorporated in and shall be deemed to be a part of the Selway-Bitterroot Wilderness.

(5) Certain lands in the Custer National Forest, Montana, which comprise approximately 5,800 acres, as generally depicted on a map entitled "Lost Water Canyon Wilderness—Proposed", dated April 1990, which shall be known as the Lost Water Canyon Wilderness.

(6) Certain lands in the Custer National Forest, Montana, which comprise approximately 5,700 acres, as generally depicted on a map entitled "Absaroka Beartooth Wilderness Additions—Proposed (Timberline Creek, Stateline, Mystic Lake)", dated April 1990, which are incorporated in and shall be deemed to be a part of the Absaroka Beartooth Wilderness.

(7) Certain lands in the Deerlodge National Forest, Montana, which comprise approximately 40,300 acres, as generally depicted on a map entitled "Flint Creek Range Wilderness Proposed", dated April 1990, which shall be known as the Flint Creek Range Wilderness.

(8) Certain lands in the Deerlodge, Bitterroot, and Lolo National Forests, which comprise approximately 64,800 acres as generally depicted on a map entitled "Stony Mountain Wilderness—Proposed", dated April 1990, which shall be known as the Stony Mountain Wilderness.

(9) Certain lands in the Flathead National Forest, Montana, which comprise approximately 10,250 acres, as generally depicted on a map entitled "Bob Marshall Additions—Proposed (Limestone Cave, Slippery Bill)", dated April 1990, which are incorporated in and shall be deemed to be a part of the Bob Marshall Wilderness.

(10) Certain lands in the Flathead National Forest, Montana, which comprise approximately 184,320 acres, as generally depicted on a map entitled "Jewell Basin/Swan Wilderness—Proposed", dated April 1990, of which—

(A) the part marked for inclusion in the Bob Marshall Wilderness is incorporated in and shall be deemed to be a part of the Bob Marshall Wilderness; and

(B) the remaining part shall be known as the Jewell Basin Wilderness.

(11) Certain lands in the Flathead National Forest, Montana, which comprise approximately 960 acres, as generally depicted on a map entitled "North Mission Mountain Wilderness Additions—Proposed", dated April 1990, which are incorporated in and shall be deemed to be a part of the North Mission Mountain Wilderness.

(12) Certain lands in the Gallatin National Forest, Montana, which comprise approximately 7,000 acres, as generally depicted on a map entitled "North Absaroka Wilderness Additions—Proposed (Republic Mountain, Tie Creek, Dexter Point)", dated April 1990, which are incorporated in and shall be deemed to be a part of the Absaroka-Beartooth Wilderness.

(13) Certain lands in the Gallatin National Forest, which comprise approximately 22,000 acres, as generally depicted on a map entitled "Earthquake Wilderness—Proposed", dated April 1990, which shall be known as the Earthquake Wilderness.

(14) Certain lands in the Gallatin National Forest, Montana, which comprise approximately 23,000 acres, as generally depicted on a map entitled "Cowboys Heaven Wilderness—Proposed", dated April 1990, which shall be known as the Cowboys Heaven Wilderness.

(15) Certain lands in the Helena National Forest, Montana, which comprise approximately 15,000 acres, as generally depicted on a map entitled "Mount Baldy Wilderness—Proposed", dated April 1990, which shall be known as the Mount Baldy Wilderness.

(16) Certain lands in the Helena National Forest, Montana, which comprise approximately 19,000 acres, as generally depicted on a map entitled "Electric Peak Wilderness—Proposed", dated April 1990, which shall be known as the Electric Peak Wilderness.

(17) Certain lands in the Helena National Forest, Montana, which comprise approximately 10,500 acres, as generally depicted on a map entitled "Gates of the Mountain Wilderness Additions—Proposed (Big Log)", dated April 1990, which are incorporated in and shall be deemed to be part of the Gates of the Mountain Wilderness.

(18) Certain lands in the Helena National Forest, Montana, which comprise approximately 8,500 acres as generally depicted on a map entitled "Black Mountain Wilderness—Proposed", dated April 1990, which shall be known as the Black Mountain Wilderness.

(19) Certain lands in the Helena National Forest, Montana, which comprise approximately 26,000 acres, as generally depicted on a map entitled "Camas Creek Wilderness—Proposed", dated April 1990, which shall be known as the Camas Creek Wilderness.

(20) Certain lands in the Helena National Forest, Montana, which comprise approximately 21,900 acres, as generally depicted on a map entitled "Nevada Mountain Wilderness—Proposed", dated April 1990, which shall be known as the Nevada Mountain Wilderness.

(21) Certain lands in the Helena National Forest, Montana, which comprise approximately 60,000 acres, as generally depicted on a map entitled "Elkhorns Wilderness—Proposed", dated April 1990, which shall be known as the Elkhorns Wilderness.

(22) Certain lands in the Kootenai National Forest, Montana, which comprise approximately 51,500 acres, as generally depicted on a map entitled "Scotchman Peaks Wilderness—Proposed", dated April 1990, which shall be known as the Scotchman Peaks Wilderness.

(23) Certain lands in the Lolo National Forest, Montana, which comprise approximately 94,000 acres, as generally depicted on a map entitled "Great Burn Wilderness—Proposed", dated April 1990, which shall be known as the Great Burn Wilderness.

(24) Certain lands in the Lolo National Forest, Montana, which comprise approximately 60,830 acres, as generally depicted on a map entitled "Quigg Wilderness—Proposed", dated April 1990, which shall be know as the Quigg Wilderness.

(b) MAPS AND LEGAL DESCRIPTIONS.—(1) The Secretary of Agriculture (referred to as the "Secretary") shall file the maps referred to in subsection (a) and legal descriptions of each wilderness area designated by subsection (a) with the Committee on Energy and Natural Resources of the Senate and the Committee on Interior and Insular Affairs of the House of Representatives, and each such map and legal description shall have the same force and effect as if included in this Act.

(2) The Secretary of Agriculture may correct clerical and typographical errors in the maps and legal descriptions submitted pursuant to paragraph (1).

(3) Each map and legal description referred to in paragraph (1) shall be on file and available for public inspection in the office of the Chief of the Forest Service, Department of Agriculture.

(c) ADMINISTRATION.—Subject to valid existing rights, each wilderness area designated by subsection (a) shall be administered by the Secretary of Agriculture in accordance with the provisions of the Wilderness Act (16 U.S.C. 1131 et seq.) governing areas designated by that Act as wilderness areas, except that, with respect to any area designated in subsection (a), any reference to the effective date of the Wilderness Act shall be deemed to be a reference to the date of enactment of this Act.

(d) ACQUISITION OF LANDS IN THE BLACK MOUNTAIN WILDERNESS.—The Secretary, under authority of other law, shall give special attention to the acquisition of lands within the Black Mountain Wilderness.

(e) WILDERNESS AREA PERIMETERS.—(1) Congress does not intend that the designation of a wilderness area in subsection (a) will lead to the creation of protective perimeters or buffer zones around the wilderness area.

(2) That nonwilderness activities or uses can be seen or heard from areas within a wilderness area shall not, of itself, preclude such activities or uses up to the boundary of the wilderness area.

(f) GRAZING.—The grazing of livestock, where established prior to the date of enactment of this Act, in wilderness areas designated in subsection (a) shall be administered in accordance with section 4(d)(4) of the Wilderness Act (16 U.S.C. 1133(d)(4)) and section 108 of the Act entitled "An Act to designate certain National Forest System lands in the States of Colorado, South Dakota, Missouri, South Carolina, and Louisiana for inclusion in the National Wilderness Preservation System, and for other purposes" (94 Stat. 3271; 16 U.S.C. 1133 note).

(g) COLLECTION DEVICES.—(1) Within the wilderness areas designated in subsection (a), neither the Wilderness Act (16 U.S.C. 1131 et seq.) nor this Act shall be construed to prevent the installation and maintenance of hydrological, meteorological, or climatological collection devices and ancillary facilities subject to such conditions as the Secretary deems desirable, where such facilities or access are essential to flood warning, flood control, and water reservoir operation purposes.

(2) Access to the devices and facilities described in paragraph (1) shall be by the means historically used, if that method is the least intrusive practicable means available.

SEC. 4. CONSOLIDATION OF WILDERNESS AREAS.

(a) CONSOLIDATION.—In order to consolidate existing contiguous wilderness areas, the lands comprising the Great Bear Wilderness Area designated by the Act entitled "An Act to designate the Great Bear Wilderness, Flathead National Forest, and enlarge the Bob Marshall Wilderness, Flathead and Lewis and Clark National Forests, State of Montana", approved October 28, 1978 (92 Stat. 2062; Public Law 95-546) and the Scapegoat Wilderness Area designated by the Act entitled "An Act to designate the Scapegoat Wilderness, Helena, Lolo, and Lewis and Clark National Forests, in the State of Montana", approved August 20, 1972 (86 Stat. 578; Public Law 92-395) are incorporated in and deemed to be a part of the Bob Marshall Wilderness.

(b) REFERENCES TO WILDERNESS AREAS.—The designations of the Great Bear Wilderness Area and the Scapegoat Wilderness Area are abolished, and any reference to the Great Bear Wilderness Area or the Scapegoat Wilderness Area in any law, regulation, map, document, record, or other paper of the United States shall be considered to be a reference to the part of the Bob Marshall Wilderness Area formerly so designated.

SEC. 5. WATER RIGHTS.

(a) FINDINGS.—The Congress finds that the waters within the wilderness areas designated by section 3(a) are headwaters, and

accordingly, that there is no effect on downstream appropriation of waters.

(b) RULES OF CONSTRUCTION.—Nothing in this Act—

(1) shall be construed to affect valid existing water rights as provided under Montana State law;

(2) is intended to affect the determination of expressed or implied reserved water rights as determined under other laws; or

(3) is intended to create any precedent or implication as to the manner in which the courts should treat the issue of water rights with respect to downstream wilderness areas, if any, that may be designated by a future Act of Congress.

SEC. 6. STATE FISH AND WILDLIFE AUTHORITY.

In accordance with section 4(d)(7) of the Wilderness Act (16 U.S.C. 1133(d)(7)), nothing in this Act shall be construed as affecting the jurisdiction or responsibilities of the State of Montana with respect to wildlife and fish in the national forests in Montana.

SEC. 7. RELEASE TO NONWILDERNESS USE.

(a) FINDINGS.—The Congress finds that—

(1) the Department of Agriculture has completed the Second Roadless Area Review and Evaluation Program (RARE II);

(2) the Department of Agriculture, with substantial public input, has reviewed the wilderness potential of these and other areas through its Land and Resource Management Plan for the National Forests; and

(3) the Congress has made its own examination of the National Forest System roadless areas in the State of Montana and of the environmental impacts associated with alternative allocations of such areas.

(b) DIRECTION RESPECTING CERTAIN LANDS.—On the basis of such review, the Congress determines and directs that—

(1) without passing on the questions of the legal and factual sufficiency of the RARE II final environmental impact statement (dated January 1979) with respect to National Forest System lands in States other than Montana, that statement shall not be subject to judicial review with respect to National Forest System lands in the State of Montana;

(2) with respect to the reviews of lands in the State of Montana that were conducted by the Department of Agriculture in wilderness studies pursuant to Public Law 94-557, in RARE II, and in the unit plans and the Forest Plan for the Beaverhead National Forest that were in effect prior to completion of RARE II, those reviews shall be deemed for the purposes of the initial land management plans required for those lands by the Forest and Rangeland Renewable Resources Planning Act of 1974 to be an adequate consideration of the suitability of such lands for inclusion in the National Wilderness Preservation System, and the Department of Agriculture shall not be required to review the wilderness option prior to the revision of the plan, but shall review the wilderness option when the plans are revised, which revisions will ordinarily occur on a 10-year cycle, or at least every 15 years, unless prior to that time the Secretary finds that conditions in a unit have significantly changed;

(3) except for lands designated as wilderness in section 3(a) and lands described in section 8, the lands in the State of Montana referred to in paragraph (2) that have been subjected to study for designation as wilderness, and all parcels of land in the State of Montana of less than 5,000 acres (regardless whether they have been studied for designation as wilderness), shall be managed for multiple use in accordance with land management plans pursuant to section 6 of the Forest and Rangeland Renewable Resources Planning Act of 1974 (16 U.S.C. 1604), and those lands need not be managed for the purpose of protecting their suitability for wilderness designation prior to or during revision of the initial land and resource management plans;

(4) if revised land and resource management plans in the State of Montana are implemented pursuant to section 6 of the Forest and Rangeland Renewable Resources Planning Act of 1974 (16 U.S.C. 1604) and other law, lands not recommended for wilderness designation and lands not described in section 8 need not be managed for the purpose of protecting their suitability for wilderness designation prior to or during revision of those plans, and areas recommended for wilderness designation shall be managed for the purpose of protecting their suitability for wilderness designation as may be required by the Forest and Rangeland Renewable Resources Planning Act of 1974 and other law; and

(5) unless expressly authorized by Congress, the Department of Agriculture shall not conduct any further statewide roadless area review and evaluation of National Forest System lands in the State of Montana for the purpose of determining their suitability for inclusion in the National Wilderness Preservation System.

(c) DEFINITION.—As used in this section, and as provided in section 6 of the Forest and Rangeland Renewable Resources Planning Act of 1974 (16 U.S.C. 1604), the term "revision" shall not include an amendment to a plan.

SEC. 8. LANDS NEITHER DESIGNATED AS WILDERNESS NOR RELEASED.

(a) MANAGEMENT.—(1) Subject to valid existing rights, the lands described in subsection (b) shall be managed by the Secretary to maintain and preserve their current natural roadless qualities and to assure that Congress has an unimpaired opportunity to consider their status in the future.

(2) Nothing in this section shall—

(A) have any effect on the law applicable to travel plans for national forests within the State of Montana; or

(B) preclude such management activities as the Secretary deems necessary in the event of fire or infestation of insects or disease.

(b) DESCRIPTION OF LANDS.—The lands referred to in subsection (a) comprise the following areas, as described in maps that the Secretary of Agriculture shall file with the Committee on Energy and Natural Resources of the Senate and the Committee on Interior and Insular Affairs of the House of Representatives:

Area name	National Forest	Net acres
Tobacco Roots	Beaverhead	17,700
West Big Hole	Beaverhead	86,000
Line Creek Plateau	Custer	20,680
Pryor Mountains	Custer	12,020
North Fork	Flathead	117,380
Crazy Mountains	Gallatin	96,100
McKay Creek	Kootenai	14,200
Galena	Kootenai	19,300
Cabinet Face East	Kootenai	55,600
Cabinet Face West	Kootenai	15,300
Chippewa Creek	Kootenai	1,700
Catarack Creek	Kootenai	17,900
Rodrick	Kootenai	22,900
Gold Hill	Kootenai	10,800
Grizzly Peak	Kootenai	6,000
Trout Creek	Kootenai	31,400
Buckhorn Ridge	Kootenai	22,600
Tenderfoot Deep Creek	Lewis & Clark	93,400
Choteau Mtn.—Volcano Reef	Lewis & Clark	19,840
Deep Creek	Lewis & Clark	41,900
Renshaw Mountain	Lewis & Clark	46,000
Silver King-Falls Creek	Lewis & Clark	77,440
Teton River High Peaks	Lewis & Clark	35,000
Cube Iron-Silcox	Lolo	36,000
Clearwater-Monture	Lolo	68,600
Sheep Mtn.	Lolo	30,400

SEC. 9. SPECIAL MANAGEMENT AREAS.

(a) DESIGNATION.—For the purposes of conserving and protecting the exceptional scenic fish and wildlife, biological, educational and recreational values of certain National Forest System lands in the State of Montana, the following designations of special management areas are made:

(1) The Mount Helena National Education and Recreation Area located in the Helena National Forest, Montana, comprising approximately 3,900 acres, as generally depicted on a map entitled "Mount Helena Education and Recreation Area—Proposed", dated April 1990.

(2) The Ross Creek Cedars National Recreation Area located in the Kootenai National Forest, Montana, comprising approximately 700 acres, as generally depicted on a map entitled "Ross Creek Cedars Biological Area—Proposed", dated April 1990.

(3) The Cottonwood Lake National Recreation Area located in the Deerlodge National Forest, comprising approximately 8,300 acres, as generally depicted on a map entitled "Cottonwood Lake National Recreation Area—Proposed", dated April 1990.

(4) The Gibson Reservoir National Recreation Area located in the Lewis and Clark National Forest, Montana, and comprising approximately 24,100 acres, as generally depicted on a map entitled "Gibson Reservoir National Recreation Area—Proposed", dated April 1990.

(b) MAPS.—(1) The Secretary shall file the maps described in subsection (a) with the Committee on Energy and Natural Resources of the Senate, and the Committee on Interior and Insular Affairs of the House of Representatives, and each such map shall have the same force and effect as if included in this Act.

(2) The Secretary may correct clerical errors in the maps described in subsection (a).

(3) Each map described in subsection (a) shall be on file and available for public inspection in the office of the Chief of the Forest Service, Department of Agriculture.

(c) ADMINISTRATION.—(1) Except as otherwise provided in this subsection, the Secretary shall administer the special management areas designated in subsection (a) as recreation areas in accordance with the laws applicable to the National Forest System.

(2) The Secretary may permit management activities in the areas designated in subsection (a) if such activities are compatible with the purposes for which the areas were designated.

(3) The use of motorized equipment in the special management areas designated in subsection (a) may be allowed if such activi-

ty is compatible with the purposes for which the areas are designated.

(4) The grazing of livestock in special management areas designated in subsection (a), where established prior to the date of enactment of this Act, shall be permitted to continue subject to applicable law.

(5) The Secretary shall manage the Mount Helena Recreation Area with a focus on education, and all management activities in that area shall be conducted in a way that provides the public with education on natural resources protection and management.

(6) The special management areas designated in subsection (a) shall be administered as components of the National Forests in which they are located. Land and resource management plans for the affected National Forests prepared in accordance with the Forest and Rangeland Renewable Resources Planning Act of 1974, shall emphasize achievement of the purposes for which the areas are designated.

(7) Nothing in this section shall preclude such measures as the Secretary deems necessary in the event of fire or infestation of insects or disease.

(d) WITHDRAWAL.—Subject to valid existing rights, all federally owned lands within the special management areas designated in subsection (a) are withdrawn from all forms of entry, appropriation, and disposition under the geothermal and mineral leasing laws.

SEC. 10. ELKHORNS NATIONAL RECREATION AND WILDLIFE AREA.

(a) DESIGNATION.—The area of the Helena and Deerlodge National Forests comprising approximately 175,700 acres, as generally depicted on a map entitled "Elkhorns National Recreation and Wildlife Area—Proposed", dated April 1990, is designated as a national recreation and wildlife area. and shall hereafter be managed generally as a national recreation area that emphasizes enhancement of big game habitat.

(b) MAPS.—(1) The Secretary shall file the map described in subsection (a) with the Committee on Energy and Natural Resources of the Senate and the Committee on Interior and Insular Affairs of the House of Representatives, and the map shall have the same force and effect as if included in this Act.

(2) The Secretary may correct clerical errors in the map described in subsection (a).

(3) The map shall be on file and available for public inspection in the office of the Chief of the Forest Service, Department of Agriculture.

(c) ADMINISTRATION.—(1) Subject to subsection (d), the Secretary shall administer the area so as to achieve the purposes of a national recreation and wildlife area that emphasizes enhancement of big game habitat. Where compatible with such emphasis, management also shall provide for recreational opportunities and the maintenance and enhancement of habitat for nongame species.

(2) The Secretary may permit management activities in the Elkhorns National Recreation and Wildlife Area if such activities are compatible with the purposes for which the Elkhorns National Recreation and Wildlife Area was designated.

(3) The Elkhorns National Recreation and Wildlife Area shall be administered as a component of the Helena and Deerlodge National Forests. Land and resource management plans for those National Forests prepared in accordance with the forest and Rangeland Renewable Resources Planning Act of 1974, shall emphasize achieving the purposes for which the area is designated.

(d) ELKHORNS-2.—(1) The lands within the Elkhorns National Recreation and Wildlife Area designated as "Elkhorns-2" on the map referenced in paragraph (1) shall, notwithstanding any other provision of this section, remain roadless, except that motorized equipment may be used by the Secretary after public notice and opportunity for comment and a finding by the Secretary that such use is required for habitat improvement for fish and wildlife. Any area disturbed by such motorized equipment shall be restored to contour and revegetated with appropriate native plant species as expeditiously as possible.

(2) Subject to valid existing rights, all federally owned lands within the area designated as "Elkhorns-2" are hereby withdrawn from all forms of entry, appropriation and disposal under the mining and public land laws and from disposition under the geothermal and mineral leasing laws.

(e) PREVENTIVE MEASURES.—Nothing in this section shall preclude such measures as the Secretary deems necessary in the event of fire, or infestation of insects or disease.

SEC. 11. BADGER TWO-MEDICINE AREA.

(a) WITHDRAWAL.—(1) Subject to valid existing rights, until Congress determines otherwise, all federally owned lands as depicted on a map entitled "Badger Two-Medicine Area", dated April 1990, comprising approximately 116,600 acres, are withdrawn from all forms of entry, appropriation, and disposal under the mining and public land laws and from disposition under the geothermal and mineral leasing laws.

(2) Nothing in this section shall preclude the gathering of timber by the Blackfeet Tribe in exercise of valid treaty rights within the Badger Two-Medicine Area.

(3)(A) With respect to oil and gas leases on Federal lands within the Badger Two-Medicine Area, no surface disturbance shall be permitted pursuant to such leases until Congress determines otherwise.

(B) Notwithstanding any other law, the term of any oil and gas lease that is subject to the limitation imposed by subparagraph (A) shall be extended for a period of time equal to the term that such limitation remains in effect.

(b) JOINT LAND MANAGEMENT PLAN.—(1) The Forest Service shall cooperate with the Blackfeet Tribe in the preparation of a joint land management plan for the Badger Two-Medicine Area.

(2) The land management plan described in paragraph (1) shall consider a range of management options, including—

(A) all of the uses required to be considered by the Multiple-Use Sustained Yield Act of 1960 (16 U.S.C. 528 et seq.); and

(B) the protection and preservation of areas used by members of the Blackfeet Tribe for cultural or religious purposes.

(3) The Forest Service shall provide technical assistance to the Blackfeet Tribe in preparation of the land management plan.

(c) APPLICATION OF LAW.—(1) Development and review of the land management plan described in subsection (b) shall be subject to applicable existing law, including the National Forest Management Act of 1976 (90 Stat. 2949), and shall, after the opportunity for public comment and review, be incorporated into the Land and Resource Management Plan for the Lewis and Clark National Forest.

(2) An action taken pursuant to this subsection shall not be considered to be a significant amendment or revision of the Land and Resource Management Plan for the Lewis and Clark National Forest.

(d) COMPLETION OF PLAN.—It is the intent of Congress that the Forest Service and the Blackfeet Tribe shall complete the land management plan described in subsection (b) by no later than 3 years after the date of enactment of this Act. After opportunity for public review and comment, the plan shall be submitted to Congress. Congress shall consider the plan within 2 years after receipt and, if it deems necessary, enact legislation to implement the plan.

(e) TREATY RIGHTS.—Nothing in this section shall be construed to diminish, prejudice, add to, or otherwise affect the treaty rights of the Blackfeet Tribe in the Badger Two-Medicine Area or the rights of the United States.

SEC. 12. PLUM CREEK LAND EXCHANGE—PORCUPINE AREA.

(a) IN GENERAL.—The Secretary of Agriculture shall, notwithstanding any other law, exchange lands and interests in lands with Plum Creek Timber, L.P. (referred to in this section as the "company") in accordance with this section.

(b) DESCRIPTION OF LANDS.—(1) If the company offers to the United States the fee title to approximately 8,130.67 acres of land of the company which is available for exchange to the United States as depicted on a map entitled "Plum Creek Timber and Forest Service Proposed Porcupine Land Exchange", dated May 20, 1988, the Secretary of the Interior shall accept a warranty deed to such land and, in exchange therefor, and subject to valid existing rights, convey by patent the fee title to approximately 9,181.74 acres of National Forest System lands available for exchange to the company as depicted on such map, subject to—

(A) the reservation of ditches and canals as required by the Act entitled "An Act making appropriations for sundry civil expenses of the Government for the fiscal year ending June thirtieth, eighteen hundred and ninety-one, and for other purposes", approved August 30, 1890 (26 Stat. 391; 43 U.S.C. 945);

(B) the reservation of rights under Federal oil and gas lease numbers 49432, 32843 and 55325; and

(C) such other terms, conditions, reservations and exceptions as may be agreed upon by the Secretary of Agriculture and the company.

(2) On termination or relinquishment of the leases referred to in paragraph (1)(B), all the rights and interests in land granted therein shall immediately vest in the company, its successors and assigns, and the Secretary of Agriculture shall give notice of that event by a document suitable for recording in the county wherein the leased lands are situated.

(c) EASEMENTS.—At closing on the conveyances authorized by this section:

(1) In consideration of the easements conveyed by the company as provided in paragraph (2), the Secretary of Agriculture shall execute and deliver to the company easements over federally owned lands for such existing or future roads as are needed to provide the company, its successors and assigns, access to company-owned lands.

(2) In consideration of the easements conveyed by the United States as provided in paragraph (1), the company shall execute and deliver to the United States easements over company-owned lands for such existing or future roads as are needed to provide the

United States, and its assigns, access to federally owned lands.

(3) Road easements conveyed pursuant to this subsection shall be in the form customarily used by the Forest Service and cooperators for cost-shared roads in Road Right-of-Way Construction and Use Agreements.

(d) REVOCATION OF ORDER OF WITHDRAWAL.—The order of withdrawal contained in Executive Order No. 30-Montana 7-Phosphate Reserve, dated October 9, 1917 (960 acres, more or less), insofar as it applies to the lands conveyed by the United States in the transactions authorized by this section, is revoked.

(e) MAPS.—The maps referred to in subsection (b) are subject to such minor corrections as the Secretary of Agriculture and the company may agree to. The Secretary of Agriculture shall notify the appropriate committees of Congress of any correction made pursuant to this subsection.

(f) TIMING OF TRANSACTION.—It is the sense of Congress that the conveyances authorized by this section should be completed within 90 days after the date of the enactment of the Act.

(g) FOREST LANDS.—All lands conveyed to the United States pursuant to this section shall be national forest lands administered by the Secretary of Agriculture.

SEC. 13. PLUM CREEK LAND EXCHANGE-GALLATIN AREA.

(a) IN GENERAL.—The Secretary of Agriculture shall, notwithstanding any other law, acquire, by exchange and cash equalization in the amount of $3,400,000, certain lands and interests in land of the Plum Creek Timber, L.P. (referred to in this section as the "company") in and adjacent to the Hyalite-Porcupine-Buffalo Horn Wilderness Study Area, the Scapegoat Wilderness Area, and other land in the Gallatin National Forest in accordance with this section.

(b)(1) DESCRIPTION OF LANDS.—If the company offers to the United States the fee title to approximately 37,752.15 acres of land of the company which is available for exchange to the United States as depicted on a map entitled "Plum Creek Timber and Forest Service Proposed Gallatin Land Exchange", dated May 20, 1988, the Secretary of the Interior shall accept a warranty deed to such land and, in exchange therefor, and subject to valid existing rights, convey by patent the fee title to approximately 12,414.06 acres of National Forest System lands available for exchange to the company as depicted on such map, subject to—

(A) the reservation of ditches and canals required by the Act entitled "An Act making appropriations for sundry civil expenses of the Government for the fiscal year ending June thirtieth, eighteen hundred and ninety-one, and for other purposes", approved August 30, 1890 (26 Stat. 391; 43 U.S.C. 945);

(B) the reservation of rights under Federal Oil and Gas Lease numbers 49739, 55610, 23290, 29230, 40389, 5367Q, 40215, 38678, 33385, 53736, and 38684; and

(C) such other terms, conditions, reservations and exceptions as may be agreed upon by the Secretary of Agriculture and the company.

(2) On termination or relinquishment of the leases referred to in paragraph (1), all the rights and interests in land granted therein shall immediately vest in the company, its successors and assigns, and the Secretary of Agriculture shall give notice of that event by a document suitable for recording in the county wherein the leased lands are situated.

(c) EASEMENTS.—At closing on the conveyances authorized by this section:

(1) In consideration of the easements conveyed by the company as provided in paragraph (2), the Secretary of Agriculture shall execute and deliver to the company to easements for such existing or future roads as are needed to provide the company, its successors and assigns, access to company-owned lands.

(2) In consideration of the easements conveyed by the United States as provided in paragraph (1), the company shall execute and deliver to the United States easements over company-owned lands for such existing or future rights-of-way as are needed to provide the United States, and its assigns, access to federally owned lands.

(3) Road easements conveyed pursuant to this subsection shall be in the form customarily used by the Forest Service and cooperators for cost-shared roads in Road Right-of-Way Construction and Use Agreements.

(d) MAPS.—The maps referred to in subsection (b) are subject to such minor corrections as the Secretary of Agriculture and the company may agree to. The Secretary of Agriculture shall notify the appropriate Committees of Congress of any corrections made pursuant to the subsection.

(e) TIMING OF TRANSACTION.—It is the sense of Congress that the acquisition authorized pursuant to this section should be completed within 90 days after the date of enactment of an Act making the appropriation authorized by subsection (g).

(f) FOREST LANDS.—All lands conveyed to the United States pursuant to this section shall be national forest lands administered by the Secretary of Agriculture.

(g) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this section the sum of $3,400,000, which amount the Secretary shall, when appropriated, pay to the company to equalize the value of the exchange of land authorized by this section.

SEC. 14. SEVERED MINERALS EXCHANGE.

(a) FINDINGS.—The Congress finds that—

(1) underlying certain areas in Montana described in subsection (b) are mineral rights owned by subsidiaries of Burlington Resources, Inc. (referred to in this section as the "company");

(2) there are federally owned minerals underlying lands of the company lying outside those areas;

(3) the company has agreed in principle with the Department of Agriculture to an exchange of mineral rights to consolidate surface and subsurface ownerships and to avoid potential conflicts with the surface management of such areas; and

(4) it is desirable that an exchange be completed within 2 years after the date of enactment of this Act.

(b) DESCRIPTION OF MINERAL INTERESTS.—(1) Pursuant to an exchange agreement between the Secretary of Agriculture and the company, the Secretary of Agriculture may acquire mineral interests owned by the company or an affiliate of the company thereof underlying surface lands owned by the United States located in the areas depicted on the maps entitled "Severed Minerals Exchange, Clearwater-Monture Area", dated September 1988 and "Severed Minerals Exchanges, Gallatin Area", dated September 1988, or in fractional sections adjacent to those areas.

(2) In exchange for the mineral interests conveyed to the Secretary of Agriculture pursuant to paragraph (1), the Secretary of the Interior shall convey, subject to valid existing rights, such federally owned mineral interests as the Secretary of Agriculture and the company may agree upon.

(c) EQUAL VALUE.—(1) The value of mineral interests exchanged pursuant to this section shall be approximately equal based on available information.

(2) To assure that the wilderness or other natural values of the areas are not affected, a formal appraisal shall not be required for any mineral interest proposed for exchange, but the Secretary of Agriculture and the company shall fully share all available information on the quality and quantity of mineral interests proposed for exchange.

(3) In the absence of adequate information regarding values of minerals proposed for exchange, the Secretary of Agriculture and the company may agree to an exchange on the basis of mineral interests of similar development potential, geologic character, and similar factors.

(d) IDENTIFICATION OF FEDERALLY OWNED MINERAL INTERESTS.—(1) Subject to paragraph (2), mineral interests conveyed by the United States pursuant to this section shall underlie lands the surface of which are owned by the company.

(2) If there are not sufficient federally owned mineral interests of approximately equal value underlying Company lands, the Secretary of Agriculture and the Bureau of Land Management may identify for exchange any other federally owned mineral interest in land in the State of Montana of which the surface estate is in private ownership.

(e) CONSULTATION WITH BLM.—(1) The Secretary shall consult with the Bureau of Land Management in the negotiation of the exchange agreement authorized by subsection (b), particularly with respect to the inclusion in such an agreement of a provision calling for the exchange of federally owned mineral interests lying outside the boundaries of units of the National Forest System.

(2) Notwithstanding any other law, the Secretary of the Interior shall convey the federally owned mineral interests identified in a final exchange agreement between the Secretary of Agriculture and the company and its affiliates.

(f) DEFINITION.—For purposes of this section, the term "mineral interests" includes all locatable and leasable minerals, including oil and gas, geothermal resources, and all other subsurface rights.

(g) ENVIRONMENTAL LAW.—The execution and performance of an exchange agreement and the taking of other actions pursuant to this section shall not be deemed a major Federal action significantly affecting the quality of the environment within the meaning of section 102 of the National Environmental Policy Act of 1969 (42 U.S.C. 4332), nor shall they require the preparation of an environmental assessment under that Act.

SEC. 15. LANDS ADMINISTERED BY THE BUREAU OF LAND MANAGEMENT.

(a) FINDING.—The Congress has sufficiently reviewed the suitability of the Bitter Creek Wilderness Study Area (MT-064-356, BLM Wilderness Study Number) and approximately 2,500 acres of the Axolotl Lakes Wilderness Study Area (MT-076-069, BLM Wilderness Study Number) as generally depicted on a map entitled "Axolotl Lakes WSA", dated March 1990, for wilderness designation and finds that those lands have been sufficiently studied for wilderness pursuant to section 603 of the Federal Land

Policy and Management Act of 1976 (43 U.S.C. 1782).

(b) DIRECTION.—The Congress directs that the areas described in subsection (a) are no longer subject to the requirement of section 603(c) of the Federal Land Policy and Management Act of 1976 pertaining to management in a manner that does not impair suitability for preservation as wilderness.

SEC. 16. MISCELLANEOUS.

(a) SIGNIFICANCE OF ACTIONS.—Actions taken pursuant to this Act shall not be considered to constitute a significant amendment or revision of the land and resource management plans for national forests in the State of Montana.

(b) MINERAL SURVEYS.—The Congress directs the Secretary of the Interior and the Secretary of Agriculture to expeditiously complete mineral surveys for roadless lands within the State of Montana, as provided in the Wilderness Act (16 U.S.C. 1131 et seq.).

SEC. 17. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated—

(1) such sums as are necessary for the development of a wilderness education and ranger training complex at the Ninemile Ranger Station, Lolo National Forest, Montana; and

(2) such sums as are necessary to carry out this Act.

By Mr. MACK (for himself and Mr. GRAHAM):

S. 2404. A bill to permit issuance of a certificate of documentation for employment in the coastwise trade of the United States for the vessel the *Lady Rose Anne*; to the Committee on Commerce, Science, and Transportation.

DOCUMENTATION OF VESSEL "LADY ROSE ANNE"

● Mr. MACK. Mr. President, I rise to introduce a bill authorizing issuance of a certificate of documentation for employment in the coastwise trade of the United States for the vessel *Lady Rose Anne.*

Lady Rose Anne was built in Swansboro, NC in 1976 by Uniflite Inc. The owner, Mr. Pasquale Caprio, purchased the vessel in November 1989 with the hope of mounting a charter fishing and dive boat business. Mr. Caprio indicated the initial restriction was placed on the vessel due to the first owner being an illegal alien. All the subsequent owners have been U.S. citizens.

Senator GRAHAM and I have reviewed Mr. Caprio's request for a waiver and feel a waiver should be granted for the *Lady Rose Anne.*●

By Mr. GARN (for himself and Mr. HATCH):

S. 2405. A bill to direct the Secretary of the Army to convey to the University of Utah a portion of the property constituting Fort Douglas, UT; to the Committee on Armed Services.

FORT DOUGLAS LAND TRANSFER

● Mr. GARN. Mr. President, I rise today on behalf of myself and Senator HATCH to introduce legislation which would transfer a portion of the property constituting Fort Douglas to the University of Utah. This legislation came as a result of the Defense Secretary's Commission on Base Realignment and Closure December 1988 recommendation to close Fort Douglas with the exception of the Reserve component functions, which will be retained within the fort.

I supported the establishment and recommendations of the Base Closure Commission as a means of addressing the controversial issue of base closures. The Department of Defense has tried to realign bases for economy and close other bases which have marginal value. However, because of political opposition it became impossible to actually move ahead with base closures. In order to remove this parochial element from the process, Congress agreed to allow an independent commission to study the base closure proposals and determine which bases could be closed to save money and not compromise legitimate military base functions. No single bases have been set aside for special consideration to remain open. I believe that the Congress has acted responsibly in this endeavor.

The Commission acknowledged that Fort Douglas is positioned in the center of the University of Utah campus which severely restricts the fort's operational flexibility. In fact, the University of Utah already manages and operates approximately 75 percent of the original Fort Douglas military reservation. Hence, the University of Utah is the logical recipient of the surplus Army land. In the search for the best use of the land, the Utah delegation unanimously agrees that the University of Utah constitutes the most appropriate use of the land.

Consistent with the Base Closure Commission, this bill retains the Reserve Component activity on a portion of Fort Douglas. This proposal is also consistent with the specific recommendations made by the Army reserves for the continued use of part of the facility. These recommendations are currently being reviewed by the Secretary of the Army. I am firmly committed to preserving the military reserve portions at Fort Douglas. This bill attempts to strike a balance between the Reserve Component requirements and the University of Utah's use of the surplus land. Because this bill does not attempt to draw any specific boundaries, the decision about which portions to declare excess will be determined solely by the Secretary of the Army.

The legislation represents more than a year of negotiations with State and local officials, the local residents and with the affected Federal agencies. Unlike with many of the other bases slated for closure across the country, there is unanimity of purpose with those that are interested in Fort Douglas. Namely, that the University of Utah be provided the property.

Fort Douglas is unusual in that 45 acres of the installation have been designated as a national landmark. The base chapel, the museum, the parade grounds, and several other facilities are listed on the National Register of Historic Places and are provided protection under Federal law. This legislation requires that if these properties are surplus they will be maintained consistent with historical preservation requirements.

Fort Douglas and the University of Utah have been cooperative neighbors for decades. I believe that this land exchange legislation is crafted in such a manner that this healthy relationship between the two institutions will continue in the future.

Mr. President, I ask that a copy of the bill be printed in the CONGRESSIONAL RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2405

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. CONVEYANCE OF FORT DOUGLAS, UTAH, TO THE UNIVERSITY OF UTAH.

(a) CONVEYANCE.—(1) Except as provided in paragraphs (2), (3), and (4), the Secretary of the Army shall convey to the University of Utah all right, title, and interest of the United States in and to the land comprising Fort Douglas, Utah, together with improvements thereon.

(2) The Secretary shall except from the property conveyed under paragraph (1) such land, not in excess of 64 acres, and improvements thereon as may be necessary for the Army to continue conducting Army Reserve activities at the Fort Douglas location.

(3) The Secretary shall also except from the property conveyed under paragraph (1) the land at Fort Douglas constituting the Fort Douglas Post Cemetery, consisting of approximately four acres.

(4) In connection with the property retained for Army Reserve activities and the property constituting the Army Post Cemetery, the Secretary shall reserve to the United States in the property conveyed such rights-of-way and other easements as may be necessary for ingress to and egress from the property retained.

(b) CONSIDERATION.—(1) The conveyance under subsection (a) shall be made only on the condition that the State of Utah and the University of Utah waive any entitlements that have not been exercised on behalf of the University of Utah before the date of the enactment of this Act and that may be due to the State of Utah or the University of Utah on behalf of the University of Utah under—

(A) section 3 of the Act entitled "An Act to establish the office of Surveyor-General of Utah, and to grant Land for School and University Purposes", approved February 21, 1855 (10 Stat. 611); and

(B) sections 8 and 12 of the Act entitled "An Act to enable the people of Utah to form a constitution and State government, and to be admitted into the Union on equal footing with the original States", approved July 16, 1894 (28 Stat. 110).

(2) The waiver referred to in paragraph (1) shall be executed in such manner as the

Secretary of the Army, after consultation with the Attorney General of the United States, determines necessary to effectively waive any unexercised entitlements under those laws.

(c) CONDITION.—(1) The conveyance provided for in subsection (a) may be made only on condition that—

(A) the State of Utah agree to maintain and operate, as provided in paragraph (2), the Army museum located on the property conveyed to the University of Utah pursuant to this Act; and

(B) the University of Utah agree—

(i) to maintain and operate, as provided in paragraph (2), the Army chapel and other historical buildings located on the property referred to in clause (A); and

(ii) to preserve and maintain, as provided in paragraph (2), the parade grounds that are a part of the property referred to in clause (A).

(2) The Army museum, Army chapel, and other historical buildings referred to in paragraph (1) shall be maintained and operated, and the parade grounds referred to in that paragraph shall be preserved and maintained, in a manner consistent with Federal laws and regulations pertaining to the preservation of historical sites, buildings, and monuments, as specified by the Secretary of the Interior.

(d) REVERSIONARY RIGHT.—If the University of Utah uses the property conveyed pursuant to subsection (a) for any purpose other than educational or research purposes, all right, title, and interest in and to such property shall automatically revert to the United States and the United States shall have the right of immediate entry thereon.

(e) DEADLINE FOR CONVEYANCE.—The conveyance under subsection (a) shall be made not later than one year after the date of the enactment of this Act.

(f) JOINT USE OF UTILITY SYSTEMS.—The Secretary may enter into an agreement with the University of Utah under which the Army and the University would—

(1) jointly use the existing utility systems located at Fort Douglas at the time of the conveyance provided for under subsection (a);

(2) equitably share the cost of maintaining, operating, and replacing (as necessary) the systems; and

(3) pay on a pro rata basis for the utilities consumed by each of the parties.

(g) ADDITIONAL TERMS AND CONDITIONS.—The Secretary may require such additional terms and conditions in connection with the conveyance provided for under subsection (a) as the secretary considers necessary to protect the interest of the United States.

(h) ADDITIONAL EXCESS PROPERTY.—In the event that any lands constituting Fort Douglas, Utah, that are not conveyed pursuant to subsection (a) are declared excess to the needs of the Army after the date of the conveyance provided for in that subsection shall be conveyed subject to a reversionary clause in favor of the United States as provided in subsection (d).●

Mr. HATCH. Mr. President, I am privileged to cosponsor this bill with my Utah colleague, Senator GARN, and to commend his leadership in its development.

This bill acknowledges what I believe to have been the best way to resolve this explosive issue of transferring land from our community of military reservists and satisfying the demands of the Department of Defense by proposing a conflict resolution that works.

More than 1 year of intense, sometimes conflicting discussions went into the fashioning of this bill. From the outset, I took the position that I would refrain from expressing an opinion until the Salt Lake community had submitted its recommendations for a land use plan. I am convinced that this process has worked well and that all interests have been well represented.

I must say that, at the outset, I joined only six Senators in opposing the creation of the Base Realignment and Closure Commission. I felt that the military threat to our national interests was too unclear, that there was great uncertainty as to how the Reserve components would be restructured in the event of overseas troop withdrawals, and that there were more immediate and certainly more promising sources of defense budget savings that could be found. Nor was I particularly pleased about the proposal to politicize the Base Commission staff, which I believe was avoided in the final analysis. I also believed, at one point, that I could further develop Fort Douglas by bringing to it the Army's Troop Support Command in St Louis. "TROSCOM," as it is referred to, was on a strip of land far too small for its 5,000 employees. And, most of TROSCOM's maintenance and equipment servicing work was done at Tooele Army Depot. With a $200 million annual procurement budget as well, TROSCOM was a natural tenant for Fort Douglas. The Army and the Base Commission rejected my request on the grounds that TROSCOM's space was sufficient. I note with some regret, Mr. President, that the Army has now decided to break up TROSCOM and scatter its functions to its other commodity commands.

On the positive side, I am very pleased with the outcome. The University of Utah is the best custodian for this valuable conveyance. And I welcome the generous offer of the State of Utah to maintain the Army Museum. Let me add parenthetically that this museum is a treasure trove of information on the so-called Buffalo Soldiers, black Army units that were posted there 92 years ago. The history of their rich association with the Utah community is something of deep pride to me.

I also hope that as we see the prospects for overseas U.S. force reduction grow daily, that the 96th Army Reserve Command will prosper. Salt Lake City is one of a very few cities in the Nation to host what is becoming a major mobilization activity. Fort Douglas will continue to host a full general hospital, the largest type of medical unit in the Defense Department. The interchange between the University of Utah Medical Center and the 96th ARCOM is something I sought to preserve at all costs.

Mr. President, I believe that we can now move forward and develop Fort Douglas in a way that will meet the future needs of our community and our Nation.

By Mr. CRANSTON (by request):

S. 2406. A bill to amend title 26, United States Code, to require the Secretary of the Treasury to disclose certain information from the files of the Internal Revenue Service to the Secretary of Veterans Affairs for the purpose of verifying entitlement to, and determining the correct amount of, title 38, United States Code, pension benefits; to the Committee on Finance.

DISCLOSURE OF CERTAIN INFORMATION TO THE DEPARTMENT OF VETERANS AFFAIRS

Mr. CRANSTON. Mr. President, as chairman of the Veterans' Affairs Committee, I have today introduced, by request, S. 2406, a bill to provide the Department of Veterans Affairs with access to certain third-party and self-employment tax data for purposes of verifying incomes of VA pension applicants and recipients. The Secretary of Veterans Affairs submitted this legislation by letter dated March 15, 1990, to the President of the Senate.

My introduction of this measure is in keeping with the policy which I have adopted of generally introducing—so that there will be specific bills to which my colleagues and others may direct their attention and comments—all administration-proposed draft legislation referred to the Veterans' Affairs Committee. Thus, I reserve the right to support or oppose the provisions of, as well as any amendment to, this legislation.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD at this point, together with the March 15, 1990, transmittal letter and enclosed section-by-section analysis.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2406

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. DISCLOSURE AUTHORITY.

Section 6103(1) of the Internal Revenue Code of 1986 (26 U.S.C. § 6103(1)) is amended by adding at the end thereof the following new paragraph:

"(12) Disclosure of certain limited return information to the Department of Veterans Affairs.—

(A) RETURN INFORMATION FROM INTERNAL REVENUE SERVICE.—Upon written request, the Secretary shall furnish to the Secretary of Veterans Affairs return information with respect to the name and social security account number (or numbers, if the individual involved has more than one such number) of a taxpayer, and the nature, source, and

amount of a taxpayer's earned and unearned income from the Internal Revenue Service files.

(B) RESTRICTION ON DISCLOSURE.—The Secretary shall disclose return information under subparagraph (A) only for the purpose of, and to the extent necessary in, verifying entitlement to, and determining the correct amount of benefits under title 38, United States Code, chapter 15, survivors' and disability pension claims, including programs protected under the savings provisions of Section 306, Public Law No. 95-588.

SECTION 2. TECHNICAL AND CONFORMING AMENDMENTS.

(a) Section 6103(p)(3)(A) of title 26, United States Code, is amended by striking "(1)(1), (4)(B), (5), (7), (8), (9), (10), or (11)," and inserting in lieu thereof "(1)(1), (4)(B), (5), (7), (8), (9), (10), (11), or (12),".

(b) Section 6103(p)(4) of title 26, United States Code, is amended by striking "(1)(1), (2), (3), (5), (10), or (11)" and inserting in lieu thereof "(1)(1), (2), (3), (5), (10), (11), or (12)".

(c) Section 6103(p)(4)(ii) of title 26, United States Code, is amended by striking "(1)(1), (2), (3), (5), (10), or (11)" and inserting in lieu thereof "(1)(1), (2), (3), (5), (10), (11), or (12)".

The Secretary of Veterans Affairs,
Washington, March 15, 1990.

Hon. DAN QUAYLE,
President of the Senate, Washington, DC.

DEAR MR. PRESIDENT: The enclosed bill and section-by-section analysis are presented for your consideration as a proposal responding in part to the general error detection program recommendations offered by the President's Private Sector Survey on Cost Control (commonly referred to as the "Grace Commission") for the Department of Veterans Affairs (VA). Essentially, this proposed legislation would allow VA access to tax return information maintained by the Internal Revenue Service (IRS) so that a more accurate evaluation of eligibility for, or the correct amount of, income based VA pension benefits could be made with an anticipated result of significant cost savings for the VA (i.e., $61 million in Fiscal Year 1991 as proposed in the President's budget).

Recognizing the IRS's legitimate concern over privacy and voluntary taxpayer compliance interests, the scope of the proposed bill is narrowly designed to allow VA access to IRS tax return information (i.e., income data from third party returns similar to that now disclosed under 26 U.S.C. 6103(l)(7) for Deficit Reduction Act of 1984 (DEFRA) programs) for making determinations in only the VA pension program (i.e., rather than all current or future VA benefits programs with an income or employment status reporting requirement). Moreover, survivors' and disability pension under Chapter 15, title 38, United States Code, is the primary VA benefits program with such a reporting requirement for eligibility, at least in terms of number of persons reporting. We currently have in excess of 1.3 million pension claimants, including veterans and their surviving spouses and children. Accordingly, this is the program which has received the most detailed and extensive consideration of the value of the availability of the IRS information to the VA.

Currently, the VA provides an income-based or "means test" pension benefit to veterans permanently and totally disabled (38 U.S.C. 521), their surviving spouses (38 U.S.C. 541), or their surviving children (38 U.S.C. 542). Additional limited pension benefit authority is also granted by Section 306 of Pub. L. No. 95-588 and Section 9 of Pub. L. No. 86-211. On an annual basis, the Department reviews the continued eligibility of persons receiving pension benefits. This review determines whether the annual amount of that benefit, which under current law is reduced $1 for $1 based on income, should be adjusted according to changes in an individual's income. Those individuals receiving pension benefits are required to submit an annual income report listing all sources and amounts of income. As indicated by the Grace Commission Report, "The pension area, in particular, could contain many errors caused by incomplete reporting, misinterpretation of the AIQ forms, or fraud" (Commission Report, "Report on the Veterans Administration," 1983, at p. 26). Thus, the Commission suggested in Recommendation No. VA 2-2 (p. 27 of the report) that the VA pursue all possible computer matching opportunities.

The Department has already established regular computer matching of income data with other Federal entities such as the Social Security Adminsitration (SSA) and the Office of Personnel Management. (Parenthetically, we note that the VA is not currently obtaining any data from the SSA which is subject to 26 U.S.C. § 6103. The data exchange which we have been pursuing for years with the SSA is limited to exchange of VA and SSA benefit payment information.) These matches and various audits by the VA Inspector General (IG) have tended to confirm the suspicions of the Grace Commission. However, not all possibilities for verifying pension income reports have been legally available for exploration. The VA, without access to IRS taxpayer records and IRS information return records, remains unable to monitor effectively and to verify income from third party sources, such as wages, interest, or retirement benefits. With access to IRS information, the VA would be in a better position to detect fraud and control possible issuance of incorrect payments.

We have sought state information in this regard; however, while all states currently are required to have centralized wage reporting systems, several states have statutory provisions preventing the disclosure of state wage information for computer matching administrative activities. Also, states' records are variable in content, posing administrative problems in pursuing multiple matches, and usually reflect "running quarters" which do not necessarily provide a true annual picture of income. Nevertheless, even assuming all states would agree to participate, the VA would still have no system for verifying other income from private sector sources. These sources, moreover, are not required to comply with VA requests for information. Indeed, the VA is generally barred from seeking and financial institutions are generally barred from releasing information about account holders' records under the Right to Financial Privacy Act of 1978, Title XI of Pub. L. No. 95-630, as amended (12 U.S.C. §§ 3401-3422).

There is only one easily accessible, consolidated, and reliable source of information for almost all types of income, namely IRS records. We need access to the information returns filed by employers and financial institutions, etc., to verify income and to detect instances of unreported or underreported income.

This was validated in a recent GAO report entitled "VETERANS PENSIONS: Using Tax Data to Vertify Income Can Identify Significant Potential Erroneous Payments," which was completed in March 1988. That report concluded that Congress should consider amending the Internal Revenue Code of 1986 (26 U.S.C. § 6103(1)(7)) to grant VA access (i.e., for purposes of verifying income reported by pension beneficiaries and applicants) to the same earned and unearned income information that section 2651(k)(1) of the DEFRA, Pub. L. No. 98-369, already authorizes 55 Federal, state and local agencies who administer seven specified income-based or affected benefits programs (e.g., aid to families with dependent children, medicaid, supplemental security income, unemployment compensation, and food stamps) to receive for use in "determining eligibility for or the correct amount of benefits."

That conclusion came from analyzing the detailed, quantitative results derived from computer matching of a representative sample of VA pension records with IRS return information. The cost effectiveness of such matching was amply supported by the data which revealed that with access to tax data the VA would have been able to identify $157.2 million in potential overpayments to 134,200 pension beneficiaries in 1984. The GAO estimated that the cost effectiveness of using tax data to verify income reported by pension beneficiaries to the VA (i.e., in the annual self-reporting questionnaire form the Department solicits from those beneficiaries) was at a favorable ratio of 11:1.

In addition to the cost benefits, the GAO concluded that the Treasury Department's policy that alternate sources of income information must be exhausted prior to seeking IRS data was neither practicable nor efficient in this instance. For example, the GAO observed that if the VA were to redesign the annual questionnaire, this would not be a substitute for independently verifying income using third-party reported tax data. Neither would requiring pension beneficiaries to annually submit to the VA copies of IRS Form 1040 be acceptable because: (1) not all pension beneficiaries meet the minimum income necessary for filing a return; (2) the 1040 Form would not provide independent verification of the accuracy of the income reported; and (3) VA access would be more intrusive of personal privacy in that details extraneous to the needs of the pension program would be unnecessarily disclosed. Further, the GAO acknowledged that resorting to quarterly wage information from the individual 50 states was impractical, even if all state agencies cooperated and data accuracy was ensured, because, for example, state wage data excludes earned income for the following categories of individuals: Federal military and civilian personnel, railroad workers, and the self-employed. Moreover, interest or dividend information (i.e., other than from the IRS Form 1099 file) cannot be sought by or disclosed to the VA by financial institutions due to the Right to Financial Privacy Act, and it would be an administratively very difficult task for the VA to obtain this information from every corporation or business.

In light of the foregoing, we believe that justification exists for expanding IRS authority to disclose tax return information to the VA for purposes of determining eligibility and payment amounts for pension benefits. State and local agencies currently access IRS information for use in verifying eligibility and correct payment amounts for certain Federally funded benefits programs. The VA should be afforded similar access to IRS return information in order to make

such determinations in its major income-based program, disability and survivors' pension.

Savings would be realized primarily through the prevention of future overpayments (i.e., cost avoidance). Additional savings will be realized by collecting receivables that will be created from past overpayments on accounts where reduction, rather than termination, occurs. In these types of cases, the overpayment is simply offset against a claimant's future monthly benefits. Other traditional means of collection would be used in cases where benefits are terminated.

The VA pension benefits program has a Fiscal Year 1991 Budget request of approximately $3.8 billion. In addition, we estimate savings of $61 million in Fiscal Year 1991 from this proposal and strongly believe the potential exists for realizing significant cost savings for the VA pension program over the next 5 years. Indeed, as noted above, the GAO with access to IRS tax data identified $157.2 million in potential overpayments to 134,200 pension beneficiaries in 1984. Moreover, shortly following that GAO finding, the Congressional Budget Office (CBO) projected a $698 million net savings over a 5 year period while commenting on several bills similar in purpose to our proposed bill which were introduced in the second session of the 100th Congress (i.e., S. 2611, section 309 of H.R. 5114 and section 703 of S. 2011), but which included three other VA means-tested programs. Comparable CBO estimates were projected on virtually identical bills introduced later in the first session of the 101st Congress (i.e., S. 1633, section 704 of S. 13, section 5701 of S. 1750 and section 11650 of H.R. 3299).

Additional evidence of substantial savings can be found in the results of early VA computer matching projects using wage information. The first two completed projects were: (1) Selected Federal employment and retirement records with VA pension records, and (2) State of Georgia wage files with VA pension records. The first project was a limited Federal matching experience involving selected Federal records (including Office of Personnel Management employment and retirement files and Department of Defense active service and retirement files). This project alone uncovered an overpayment amount of $7.5 million which, in some cases, included years of overpayments.

The second project was an IG audit in Georgia involving an automated match of the VA's compensation and pension payment system with Georgia's Bureau of Employment Security's wage file. About 1,600 cases were sent to the VA Regional Office in Atlanta for adjudicative review after earnings and employment status were confirmed with employers. During the review, the Regional Office verified 989 erroneous payments. These cases involved $5,922,019 in overpayments with an average value of $5,987. In many cases, the overpayments included amounts developed over a period of several years. The review also documented annual cost avoidance by the prevention of future payments in 471 cases. The total annual cost avoidance was $1,042,225, averaging $2,212.

Our experience with computer matches of state wage and VA pension benefits information has now expanded to states other than Georgia (i.e., Florida, Missouri, New York, Texas, Virginia, Maryland, Connecticut, Pennsylvania, Tennessee and Washington State), and has reinforced our belief that significant cost savings can be accomplished both from recoupment of overpayments and from cost avoidance. As a result of the computer matches of wage information from the states (including Georgia) listed above, 17,952 cases were sent to VA regional offices for adjudicative review after earnings and employment status were confirmed with employers. With that process having been nearly completed (i.e., 16,142 cases as of January 18, 1989), the VA regional offices in the above states verified 7,940 erroneous payments totaling over $48 million in overpayments. Also documented were 2,918 cases in which cost avoidance through prevention of future overpayments would result in an annual savings of approximately $6.8 million. (Note: Of the total overpayments, over $43 million (or 71.3 percent), involving 5,666 cases was determined to have been received fraudulently.)

An aggressive approach to verifications, aided by IRS information, would prevent many overpayments and result in cost avoidance savings. This effect would directly result from claimants' knowledge of the Department's improved verification ability and from claimants' corresponding efforts to report correctly the income information on which their claims are initially or subsequently reviewed. The present misreporting should be reduced to the fullest extent possible. We believe that access to IRS information for verification and for continuous monitoring will go a long way to achieving this end. We recognize that, as claimant reporting improves, the incidence of overpayments and cost avoidance will diminish. A greater proportion of future cost avoidance and savings will be achieved through this deterrent effect on claimant reporting.

Projecting from our experience with computer matches of earned income we expect to find similar results from unearned income matches. However, because of the current bar to disclosure of IRS information to the VA and the unavailability of any other efficient verification source, no refinement of the earlier cited cost savings is possible.

Recognizing the need for additional personnel and resources to effectively administer a VA-IRS computer match, VA is planning to request an additional 100 full-time equivalent employees at a cost of $3.7 million for FY 1991. This request is, however, contingent upon the passage of this legislation granting VA authority to access IRS information.

The relatively low cost of matching IRS return information with VA files is especially significant when considering the alternatives. If no verification occurs, misreporting may well intensify or, at least, remain at the current level. Verifications from alternative sources are administratively very difficult because of a variety of legal barriers (such as the bar against financial institutions releasing information about account holders' records) or cost prohibitive, or at least much more costly than automated matching with a single source, i.e., the IRS records.

More importantly, we do not believe it is sound public policy, regardless of the amounts involved, to allow recipients of need or income-based programs to continue to misrepresent their income to a Federal agency while at the same time the Federal government voluntarily blinds itself, but not states, to available information. Although records and information submitted to the Government for tax purposes should, in our opinion, be confidential, we do believe that such confidentiality should not be absolute. Under certain circumstances, confidentiality considerations should and do yield to other significant concerns, such as the maintenance of the integrity of Government benefit payment programs.

Extending IRS disclosure authority as contemplated under the bill would not unwarrantedly invade the privacy of those taxpayers who participate in the VA pension program. Under this bill, the beneficiary taxpayer would be treated no differently than those 80 million taxpayers participating in the DEFRA programs referred to above. Moreover, this group of taxpayers may already include many of our pensioners who are also beneficiaries under these other programs which already participate in matches with IRS records. Finally, the VA would use IRS information in almost all cases only as a starting lead for purposes of directing the Department to other primary sources for independently verifying or corroborating income information. IRS information will be destroyed as soon as it is no longer needed.

In any event, with respect to confidentiality of the information to be received from the IRS, it should be noted that the VA is committed to treating claims information and sensitive medical records with confidentiality. Twenty-eight million veterans and dependents who have claims or are eligible for VA benefits have records covered by existing Federal privacy laws (e.g., 38 U.S.C. §§ 3301, 3305, 4132; the Privacy Act of 1974, 5 U.S.C. § 552a). Under these laws, the VA is accustomed to routinely providing extensive protections for sensitive data in veterans' medical records, claims folders, and other types of program records. The VA can and will provide appropriate confidentiality for all IRS data.

An issue related to intrusion of taxpayer privacy is the Treasury Department's concern that an invasion of privacy for nontax purposes may tend to erode voluntary taxpayer compliance with the income tax laws. We believe that concern is largely diminished under our bill which provides only limited access to IRS tax data. The scope of the bill permits VA access to only the Social Security Number, name and the nature (i.e., earned or unearned), source and amount of income of a taxpayer.

This information is, in many cases, obtainable from third-party returns (similar to that now disclosed under 26 U.S.C. § 6103(l)(7) for DEFRA programs) rather than directly from individual taxpayer's returns. This is noteworthy in that those entities which submit income information to the IRS (e.g., employers reporting employee earned income on a W-2 Form and financial institutions reporting interest and dividend information on Form 1099) will continue to report taxpayer income information regardless of privacy instrusion because they are required by law to comply with IRS reporting requirements.

As to the "due process" provisions of the bill, we note that these are compatible with existing VA adjudication procedures: (1) a predetermination notice explaining the proposed action and informing an individual of his or her rights; (2) an opportunity for a personal hearing, submission of rebutting evidence, and representation by a veterans' service organization, agent or lawyer; (3) at least one 60-day period and successive 60-day periods for further development and review of the case depending upon the extent of an individual's desire to pursue his or her rights; and (4) notice of a final decision and available appellate rights (if an overpayment is created, additional information is provided concerning debt collection

processing). Even after the VA has begun implementing its final decision, evidence submitted by an individual warranting a reversal of that determination will be carefully reviewed according to the above procedures and appropriate action taken, including in some cases, allowed restoration of benefits pending completion of development and final decisionmaking. Thus, any potential adverse action taken against a VA claimant or beneficiary as a result of receipt of IRS information would be accomplished only after independent verification and extensive "due process" procedures.

In closing, we add one final point. It is apparent from the foregoing that this proposal has been considered from a number of vantage points. Real savings from collection of identified overpayments and future costs avoidance cannot be doubted. Further, we believe our proposal adequately safeguards the privacy of Federal beneficiaries involved in the proposed disclosure. There could also be a concern that disclosure might reduce individual taxpayer compliance with the Federal tax laws, resulting in a significant loss of tax revenue. Where, as in this case, however, the tax related information is derived not from individual taxpayers but from third parties (i.e., businesses, banks, corporations and other institutions), it is difficult to identify how such taxpayer noncompliance could arise.

Thank you for the opportunity to present this timely legislative proposal for your consideration.

The Office of Management and Budget advises that there is no objection to the presentation of this proposal to Congress, and that its enactment would be in accord with the program of the President.

Sincerely yours,

EDWARD J. DERWINSKI.

SECTION-BY-SECTION ANALYSIS

This proposal would amend the Internal Revenue Code of 1986 by adding a new paragraph to subsection 6103(1) of title 26, United States Code, which concerns disclosure of returns and return information for purposes other than tax administration. The bill would require the IRS to release taxpayer wage and unearned income information upon the written request of the Secretary of Veterans Affairs for use in determining eligibility for, or the correct amount of, VA pension benefits, which are based upon income.

The VA requires only a limited portion of the wide ranging information included in the definition "return information" of 26 U.S.C. § 6103(b)(2). The scope of our draft bill (i.e., as delineated in section 1 of the bill) is narrowed to permit VA access to only the Social Security Number, name and the nature (i.e., earned or unearned), source and amount of income of a taxpayer. This information is, in many cases, obtainable from third party returns (similar to that now disclosed under 26 U.S.C. § 6103(1)(7) for Deficit Reduction Act of 1984 (DEFRA) programs). The process will not, in most cases, require access to the return filed by the taxpayer including address and personal exemption information. Moreover, the obtained information would be restricted in use for only the purpose of conducting periodic computer matches by Social Security Number and name to achieve income verification of all disability and death pension claims.

The Secretary already has authority under 38 U.S.C. § 3006 to request and be provided information from other Federal agencies "for purposes of determining eligibility for or amounts of benefits, or verifying other information with respect thereto." However, this bill would remove the restrictions placed upon the IRS by the Tax Reform Act of 1976 (Pub. L. No. 94-455) regarding nontax use of IRS tax files—at least for this limited VA purpose.

In effect, enactment of section 1 of the bill would place the VA in a similar situation to other Federal agencies and even state and local agencies who administer specified benefits programs (AFDC, Medicaid, SSI, food stamps, etc.) which now have access to certain IRS income information under 26 U.S.C. § 6103(1)(7) for purposes of administering those income-based benefits programs. In contrast to these programs, however, the VA would be authorized to received not only "unearned" income information from the IRS but wage information as well. Access to limited return information by other agencies was, as with the VA, initiated by a recommendation of the "Grace Commission." Such access would assist the VA in administrating its programs and in controlling fraud, waste and abuse.

Detailed procedures for accomplishing this matching of VA and IRS income information would be contained in a memorandum of understanding between the VA and IRS once this access authority exists. Since the VA would access return information only through computer matching techniques, any potential IRS concern over disruption of its administrative activities should be lessened.

In addition, the VA will afford each claimant procedural due process before taking any action to suspend, reduce, terminate or deny any benefit based upon income. Nothing in this proposed legislation would eliminate or reduce the entitlement of any qualified VA beneficiary. It would merely allow the VA to use an effective instrument, previously provided to other Government agencies, to ensure that the furnishing of pension-based benefits is in accordance with statutory requirements.

In this regard, the VA will apply the formal mechanism outlined in the DEFRA guidelines adopted by Congress when it enacted the present means-test disclosure authority of 26 U.S.C. § 6103(1)(7). (See, H. Rep. 861, 98th Cong., 2d Sess., at pp. 1410-1412). Moreover, under the VA's already existing procedures, the claimant would be allowed an opportunity to present evidence to rebut or clarify the information received from the IRS. this rebuttal/clarification process requires complete reconsideration of the pending decision by the VA. Each claimant will have the usual right to a personal hearing before a decision becomes final.

The VA would ensure confidentiality of all information which it obtains from the IRS. In implementing a matching program with the IRS, the VA will adhere to existing guidelines under the Computer Matching and Privacy Act of 1988 (Pub. L. No. 100-503) for such programs. The Department also will modify benefit applications and income report forms to notify claimants and affected beneficiaries that the income information reported is subject to verification through IRS record checks.

Section 2 of the bill would conform the VA to the safeguards on the use of IRS return information provided for similar disclosures to other agencies imposed by 26 U.S.C. § 6103(p)(4). It would also relieve the IRS of the burden of making a Privacy Act (i.e., 5 U.S.C. § 552a(c)) accounting of routine disclosures made to the VA.

By Mr. GLENN:

S. 2408. A bill to establish a system for labeling of plastic resin products, and to promote recycling of plastics and use of degrable plastics; to the Committee on Environment and Public Works.

RECYCLABLE AND DEGRADABLE PLASTICS LABELING ACT

● Mr. GLENN. Mr. President, it is with great pleasure that I come before the Senate today to introduce the Recyclable and Degradable Plastics Labeling Act of 1990. This legislation can play a role in our effort to reduce the amount of plastic waste that is accumulating in our landfills.

The accumulation of solid waste in our municipal landfills is one of the most urgent and fundamental environmental problems facing Federal, State, and local officials today. Plastic is now estimated to account for 7 percent of the 150 million tons of solid waste produced in this country each year. By the year 2000 this figure is expected to rise to 10 percent. The solution to the solid waste problem will be multifaceted. Science is providing us with agricultural commodity based plastic products which will degrade in months or years rather than centuries. Recycling of plastics, which is in its infancy, also offers great promise. Both recycling of plastics and use of degradable plastics will play a role in easing the burden of solid waste disposal.

Mr. President, this legislation addresses the need to be able to identify the type of resin used in plastic containers in order to promote recycling and use of degradable plastics. Currently only two types of plastic resins are readily recyclable. These are the resins used in milk jugs and soda bottles that can be recognized by the containers themselves. Other resins that are recycled are generally processed together into a junk plastic with limited applications. A labeling system would make it possible to recycle more plastic resins into more products.

My interest in solutions to the solid waste problem is not new. In 1988 I chaired a hearing of the Committee on Governmental Affairs focusing on the extent of Federal and private sector efforts in developing standards for degradable plastics. Last year I introduced S. 1237, the Degradable Commodity Plastics Procurement and Standards Act. This bill focused on the development of uniform definitions, standards, and research methods for degradable plastic products. The bill I am introducing today builds on S. 1237. It provides the consumer and the recycler with the information that is needed to dispose of this plastic waste in the most environmentally sound manner. This is true not only for degradables, but also other plastics that can be recycled.

Mr. President, this bill is basic and straightforward. It will require that most plastic containers manufactured or sold in the United States be labeled as to resin type. A triangular symbol will be molded or printed on the container and will identify the plastic type by number as well as by an abbreviation. The required labeling system expands on one that has already been accepted by a number of States and includes degradable plastics. The bill establishes penalties for noncompliance and charges the Environmental Protection Agency with rulemaking and enforcement.

Mr. President, I ask unanimous consent that the text of this bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2408

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. FINDINGS.

The Congress finds that—

(1) reduction of solid waste through recycling and use of biodegradable plastics can have a positive impact on the problem of solid waste accumulation in municipal landfills, and can conserve resources and save money;

(2) there are presently no national standards for labeling plastic products to distinguish resin type, or whether the product is biodegradable;

(3) the existence of national standards and requirements for labeling resin type and biodegradability will promote recycling and encourage use of biodegradable products; and

(4) the Federal Government should assist in promotion of recycling and use of degradable plastic products.

SEC. 2. DEFINITIONS.

As used in this Act—

(1) PLASTIC CONTAINER.—The term "Plastic Container" means a vessel with a capacity of 8 fluid ounces or more, made of plastic designed to hold some commodity, including, but not limited to, plastic bottles and plastic garbage and leaf bags.

(2) DEGRADABLE.—The term "degradable" means the ability of a material to be reduced, by exposure to microorganisms, light or chemicals, to environmentally benign subunits within the shortest period of time consistent with the material's intended use, but in no event greater than a 5-year period.

(3) PLASTIC.—The term "plastic(s)" means a material that contains as an essential ingredient one or more organic polymeric substances of large molecular weight, and at some stage in the manufacture or processing into finished articles can be shaped by flow.

SEC. 3. LABELING.

(a) IDENTIFICATION OF PLASTIC RESIN.—Within the 12-month period following the date of the enactment of this Act, the Administrator of the Environmental Protection Agency shall issue such regulations as may be necessary to require manufacturers of plastic containers, manufactured or offered for sale in the United States to take such action as may be necessary to assure that such containers are labeled to identify the plastic resin used in its manufacture in accordance with this Act.

(b) SYMBOL.—The label required under subsection (a) shall consist of a triangular-shaped symbol comprised of three equal-length arrows, such arrows being curved at the apexes of the triangular-shaped symbol with the heads of the arrows pointing in a clockwise direction. A specific number within the symbol and a series of letters immediately below the base of the symbol will identify the specific type of plastic resin from which the container was produced, as follows:

(1) The number "1" and the letters "PETE" for polyethelene terephthalate.

(2) The number "2" and the letters "HDPE" for high density polyethylene.

(3) The number "3" and the letter "V" for vinyl.

(4) The number "4" and the letters "LDPE" for low density polyethylene.

(5) The number "5" and the letters "PP" for polypropylene.

(6) The number "6" and the letters "PS" for polystyrene.

(7) The number "7" and the word "OTHER" for other resins or multiple resins.

(8) The number "8" and the word "DEGRADABLE" for degradable resins.

(c) LABELING UNIFORMITY.—No State or political subdivision thereof may enforce any requirement of State or local law applicable to the labeling of any plastic container required by this Act, including any penalties for violations thereof, unless such requirement is equally as stringent as the provisions of this Act. No State or political subdivision thereof may enforce any ban under State or local law on manufacture, sale, distribution, or use of any plastic container if such container displays a label in conformance with the requirements of this Act.

SEC. 4. PENALTY.

(a) CIVIL PENALTY.—Any person or entity which violates this Act shall be subject to a civil penalty assessed by the Administrator of the Environmental Protection Agency of not more than $5,000 for each offense.

(b) CIVIL PENALTY.—Any person or entity which knowingly violates this Act shall be guilty of a misdemeanor and upon conviction shall be fined under title 18, United States Code, imprisoned for not more than one year, or both, for each offense.

SEC. 5. MONITORING.

The Administrator of the Environmental Protection Agency shall, by regulation, establish and implement a system for monitoring compliance and enforcement of the provisions of this Act.

SEC. 6. REPORT.

Not later than one year after the date of the enactment of this Act, and annually thereafter, the Administrator of the Environmental Protection Agency shall prepare and submit, to the Committee on Governmental Affairs of the Senate and the Committee on Government Operations of the House of Representatives, a progress report that contains the following information:

(1) information as to the extent of enforcement of compliance with the provisions of this Act;

(2) information as to the problems, if any, incurred in the administration of the provisions of this Act;

(3) statistics on the number and type of violations detected and prosecuted by the Federal Government and by the States; and

(4) a summary of personnel and financial resources required to implement this Act.

SEC. 7. AUTHORIZATION.

There is authorized to be appropriated such sum as may be necessary to carry out this Act.●

By Mr. FOWLER (for himself, Mr. DOLE, Mr. PRYOR, Mr. BOND, Mr. COCHRAN, Mr. BOREN, Mr. CONRAD, Mr. BAUCUS, Mr. KERREY, Mr. HEFLIN, Mr. HELMS, Mr. MCCONNELL, and Mr. DASCHLE):

S. 2409. A bill to develop and promote environmentally sound agricultural practices, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

CONSERVATION PROMOTION ACT

Mr. FOWLER. Mr. President, I rise today to introduce the Conservation Promotion Act of 1990, to ensure the responsible stewardship and sustained productivity of America's farmlands. I am pleased to join with original cosponsors Senators DOLE, PRYOR, BOND, COCHRAN, BOREN, CONRAD, BAUCUS, KERREY, HEFLIN, HELMS, MCCONNELL, and DASCHLE.

As we approach the 1990 farm bill, issues of environmental protection and food safety are receiving an unprecedented emphasis—and rightly so. I think it is important to point out that this is not occuring strictly at the behest of consumers and environmentalists. Farmers are also leading the drive for improved conservation and stewardship.

Every hearing I have held as chairman of the Forestry and Conservation Subcommittee, every poll of farmers conducted around the country bears out my belief that our farmers are committed to the sustainability of agriculture, the elimination of health risks, and the safeguarding of our natural resources.

Fortunately, we laid a strong foundation for further improvements in the conservation provisions of the 1985 farm bill. Those programs, such as the conservation reserve, have been extremely successful. We have received excellent cooperation throughout the agricultural community, and it is very clear that farmers are willing to do more, that they support the strengthening of these programs, and they are interested in even more far-ranging reforms of agricultural practices. In fact, farmers are already ahead of our legislative efforts.

Pesticide applications leveled off toward the end of the 1980's, and a recent poll of Iowa farmers showed that 93 percent would like to further reduce their use of agricultural chemicals. The majority of respondents were motivated by health and stewardship concerns, as well as the prospect of reducing production costs.

Another phenomenon that demands our attention is the unprecedented experimentation by our farmers with integrated pest management, pest man-

agement practices, low-input and even organic farming going on in the fields of America.

The legislation I am introducing today incorporates the many workable environmental innovations in American agriculture today and places them into a single comprehensive package. This practical approach to improved stewardship encompasses a preventative approach to water quality, a range of voluntary options for farmers to protect wetlands and an expansion of the Conservation Reserve Program to cover even more environmentally sensitive areas. In the area of integrated crop management, this legislation calls for increased research in improved techniques, and base protection for farmers who are willing to adopt these innovations.

Over the past 2 years, since we began the process of writing the 1990 conservation title, I have worked with environmental, consumer, and commodity groups to fashion solid proposals that can gain broad support.

Mr. President, balancing economic and environmental concerns is always difficult, and it can prove divisive. I believe, however, that we will see a broad spectrum of environmentalists and farmers coming together on these issues, united by a strong ethic of stewardship. In this climate, I am confident that we will adopt a conservation title that meets the practical needs of our farmers. I believe it will also respond to public demands for a cleaner environment, and satisfy the public interest in sustainable agriculture, natural resource protection, and food safety.

Meeting such a broad range of goals is an ambitious project. I believe that this legislation does strike the proper overall balance in tying Federal farm programs to farmland conservation. It breaks down the unnatural barriers—too often created by Government programs—between traditional agriculture and basic ecology. Most importantly, it works of the very practical principle that our farmers in the field are, and must continue to be, our front line for environmental protection in American agriculture.

The Conservation Promotion Act has been endorsed by a broad range of agricultural organizations, including the American Agriculture Movement, American Soybean Association, National Association of Conservation Districts, National Cotton Council, U.S. Rice Producers Legislative Group, National Association of Wheat Growers, National Barley Growers, Georgia Peanut Commission, American Sugar Cane League, Alabama Farmers Federation, National Corn Growers Association, American Society of Farm Managers and Rural Appraisers, Dairymen, Inc., Delta Council of Mississippi, National Sunflower Association, Southeastern Poultry Association, Midwest Sustainable Coalition, Georgia Farm Bureau, National Family Farm Coalition, National Farmers Union, Florida Sugar Cane League, Southwestern Peanut Growers Association, North Carolina Peanut Producers Association, and the American Beekeepers Federation.

Mr. DOLE. Mr. President, today I am pleased to join with Senator FOWLER and others in introducing legislation to better conserve our soil and enhance the quality of our water—two vital concerns to farmers and others in rural America. I want to commend Senator FOWLER and others in the agricultural community for their leadership in an area that is of growing concern to more and more Americans. I am also pleased to note that the legislation we are introducing today is supported by a majority of the agricultural community, including the National Association of Wheat Growers, the National Association of Conservation Districts, the National Corn Growers Association, and the American Soybean Association.

I believe this bill, along with Senator BOND's and Senator LUGAR's conservation bills, provide good starting points for our deliberation on the conservation title of the 1990 farm bill. These bills have much in common with my "Environmental Conservation Acreage Reserve Program,"—ECARP—introduced in 1988.

The legislation being introduced today addresses concerns about protecting our land, water, and wildlife areas. It calls for an expanded CRP, with an increased emphasis on enrolling wetlands, shelterbelts, and windbreaks, and promotes environmentally sound agricultural practices.

WATER QUALITY AND THE ENVIRONMENT

Mr. President, farm families care more than anyone else about their primary assets—the land and its water. They are the closest to our soil and water resources and care the most about their quality. Regardless of what some groups might like people to think, no one has more at stake or cares more than our own farm families.

PROVISIONS

The bill introduced today woud accomplish several objectives. It would extend CRP authorization for a total of not less than 40 million acres nor, at the discretion of the Secretary, more than 50 million acres. Signups would extend through 1995. It encourages the enrollment of environmentally sensitive land, including sinkholes, filter strips, wetlands, and other areas that involve groundwater protection.

The bill calls for the establishment of several new programs that would encourage the nurturing of our soil, water, and wildlife resources. A Soil Restoration Program would be established for multiyear land restoration, and a wetland easement program would be developed.

The legislation has other important features. It expands research and provides additional technical assistance to enhance conservation-oriented agricultural practices.

The legislation also directs additional resources to the Midwest States through reauthorization and expansion of the Great Plains Conservation Program. It targets additional resources to the Midwest States, in a fiscally sound manner, to further promote conservation and protect our environment.

BUDGET CONSIDERATIONS

Because the bill gives the Secretary considerable discretion, it gives the CRP needed flexibility. It allows the Secretary to target acres that would provide the greatest environmental benefits for the dollars spent. With $1.7 billion going annually for rental payments on the 34 million acres currently enrolled, fiscal accountability is a critical element. It is an element that will be a focal point of not only environmental policy discussions, but of the farm bill debate in general.

CONCLUSIONS

Mr. President, this legislation helps balance the concerns of farmers, environmentalists, and the Federal Government. By directing our financial resources toward environmentally sensitive land, we can provide for the betterment of our land and water, to the benefit of future generations.

My 1988 ECARP principles, Senator LUGAR's and Senator BOND's conservation bills, and this piece of legislation provide a groundwork for conservation discussions under the 1990 farm bill. These pieces of legislation are a strong foundation, supported by a majority of the agricultural community, through which we can reach a compromise on the conservation issue.

I plan to work closely with Chairman LEAHY, and Senators LUGAR, BOND, and FOWLER, as well as others, in pulling together an environmentally responsible conservation package that is supported by our agricultural community and that helps keep America a leader in world agriculture.

Mr. COCHRAN. Mr. President, I join my distinguished colleague from Georgia, Senator FOWLER and the distinguished Republican leader, Senator DOLE, in cosponsoring the Conservation Promotion Act of 1990, a bill to provide for the conservation of our environment and natural resources while ensuring the continued success of the Nation's agricultural sector.

This bill incorporates many of the key provisions of Senator BOND's Agricultural Conservation Research and Enhancement Act of 1990, which I cosponsored last week, and expands on many of the successful conservation

initiatives established by the 1985 Food Security Act.

Initiatives such as the Conservation Reserve Program play a significant role in protecting fragile cropland and promoting the renewal of our natural resources. This bill authorizes a discretionary expansion of the Conservation Reserve Program to include a wider array of environmentally sensitive agricultural lands. It also creates a program for the restoration and protection of our wetlands habitats.

In addition, this bill promotes the safe water supply essential to sound agricultural practices. It also expands research and provides additional assistance to enhance conservation-oriented agricultural practices.

The Conservation Reserve Program ensures the protection of valuable topsoil. Last year, approximately 34 million acres were enrolled in this program. When trees and other vegetation reach maturity on this acreage, soil erosion will be reduced by an estimated 600 million tons annually.

Conservation is very important to Mississippi farmers. Last year, nearly 750,000 acres of Mississippi's farmland was placed in the Conservation Reserve Program. Further, over 70 percent of Mississippi's delta region, my State's most productive farming area, can be classified as wetlands areas.

There is obvious linkage between environmental protection and agriculture. Since farmers depend on the environment for their livelihood, they have a strong interest in improving America's conservation practices.

I urge Senators to support this long-term legislative commitment to the conservation and preservation of our natural resources essential to the health and prosperity of our Nation.

Mr. PRYOR. Mr. President, I am honored to join as an original cosponsor today on a piece of legislation that should prove to be a critical turning point in agriculture's quest to maintain and improve the environment from which it produces the bountiful and stable food supply we all enjoy. This bill has endured a healthy lengthy process of probing discussions in order to reach this point of introduction, which should symbolize the thought and effort required to produce the Conservation Promotion Act of 1990.

A strong degree of commitment has also been necessary in order to reach such a balanced and beneficial piece of legislation. This commitment, best exemplified by my colleague from Georgia, Senator FOWLER, has provided a forum for the voices of the environment and agriculture to offer contributions and direction as we attempt to craft a major portion of the conservation title of the 1990 farm bill. Many have long made a ready distinction between farmers and environmentalists. I have long contended that farmers are environmentalists, serving as our primary stewards of the land. The role of the farmer in this capacity is reflected in this bill, which should result in a responsible and improved protection of the environment as well as adequate production of agriculture.

There are several provisions in this bill that I have been fortunate enough to have had the opportunity to be active on, those being the Soil Restoration Program, the Water Storage Program, and a provision that helps make our wetlands regulations more practical. The Soil Restoration Program will make it possible to enroll additional land in the Conservation Reserve Program by expanding the eligibility of land and enrolling it for 3 years instead of 10. Obviously, this should become a vital provision in improving our soil quality. The Water Storage Program creates the opportunity for farmers to build reservoirs for surface water storage, in hopes of allowing our ground water supply to replenish itself more quickly and completely each year. Producers would be able to count any land used for such storage facilities as set aside. In the wetlands provision, we have succeeded in developing a practical measure for saving those valuable natural resources without further advancing the maturity of the "Frankenstein Monster" that currently guides wetland policy. Under the wetlands provision in this bill, there will not be any additional drainage or clearing of wetlands, but there will be a consistent and commonsense approach that will enable farmers to continue farming the land they have always farmed, in some cases for generations. These measures are reflective of the entire Conservation Promotion Act of 1990 in that they strike a meaningful and constructive balance between the environment and food production.

The leadership and role of Senator FOWLER in developing this important legislation cannot be overemphasized. He has led agriculture to the table, at times kicking and screaming, and shown the way in which agriculture can increase its contributions toward preserving our environment. Simply stated, this coalition would not have been possible had it not been for WYCHE FOWLER. Of course, guidance and thought from Senator DOLE and Senator BOND assisted in keeping this effort together. The cooperation that characterized the dialog has enabled us to introduce something that is good for the environment, good for the farmer, and ultimately good for the consumer. Most importantly Mr. President, this will prove to be good for the generations who follow us.

Mr. MCCONNELL. Mr. President, today I join my colleague from Georgia as we introduce the Conservation Promotion Act of 1990. This bill would establish a new 5-year conservation program for our Nation's agricultural producers. The provisions in the act would build upon and strengthen the 1985 Food Security Act in several areas where some important needs have been identified.

Agriculture has rebounded in the last 5 years partly due to improving domestic and world economic conditions but most importantly due to the policy guidelines established in the 1985 Food Security Act. U.S. growth has been stable, exports are on the rise, our trade balance is improving, the income-to-debt ratios for agriculture are favorable, and farm incomes have improved dramatically. At the same time public support of the agricultural sector is now down to half its peak level in 1986. During this same period of time we have made impressive progress on the conservation and environmental agenda for the Nation. Much has been accomplished in a very short period of time by our Nation's agricultural, conservation, and environmental groups without any major adverse effects on our ability to economically meet the world's food and fiber production needs.

Some very significant conservation and environmental achievements have been made over the last 5 years since enactment of the 1985 Food Security Act. Our Nation's agricultural producers have responded to the many challenges added to their daily agendas by the important provisions for conservation concerns in title XII of the 1985 act. The Department of Agriculture, its cooperating agencies, the State and local conservation districts, along with this Nation's agricultural producers have cooperated very effectively in striving to ensure that the goals and objectives of the Congress outlined in the legislation would be met.

Since 1985, we now have 33.9 million acres in the Conservation Reserve Program with nearly 2.2 million acres planted to trees, about 410,000 acres of cropped wetlands are enrolled, 143,000 acres of land subject to scour erosion are enrolled, and 49,000 acres of filter strips alongside our Nation's rivers and streams are now enrolled in the program. In total, the Conservation Reserve Program will result in 655 million tons of erosion reduction annually when vegetative levels called for in the 10-year contracts with producers are fully established. This reduction in erosion represents nearly 21 percent of all the national cropland erosion.

In addition, we now have about 1.4 million producers across the country with conservation plans for their highly erodible cropland covering some 139 million acres. I believe this is a testament not only to the excellent assistance from our Federal and State cooperating conservation agencies but to the genuine concern of our Nation's farmers and ranchers. Nearly 30 per-

cent of the acres planned already have conservation systems applied as of this date. Wetland determinations have been completed for 25 percent of participating farmers.

I am very proud that Kentucky just last year added 5,600 new conservation district cooperators to their rolls bringing the total to nearly 98,000 cooperators. About three-fifths of Kentucky's 5.4 million acres are considered highly erodible; all of these acreages now have approved conservation compliance plans. In addition Kentucky has 416,000 acres in the Conservation Reserve Program, 3,000 acres of which are in trees, 13,000 acres of which have wildlife plantings, and over 2,000 acres devoted to environmentally sensitive wetlands, scour erosion areas, and for filter strips surrounding creeks and streams. All of our Nation's farmers and ranchers have responded positively and effectively to the concerns we all share for the sensitive and fragile environment in which we live. The hallmark for consistency and continuity in our Nation's agricultural policies with respect to commodity production, commerce, trade, and conservation began with passage of the 1985 Food Security Act.

Yet, Mr. President, with all of the accomplishments we must recognize that not all of the goals set out in our 1985 Food Security Act have been fully achieved. A stellar effort was made and the efforts are not only commendable but in many regards quite remarkable. However, the 1985 act did specify a 40- to 45-million acre Conservation Reserve Program with the expectation that up to 12.5 percent of the reserve be devoted to trees. These goals are realistic and reasonable. With some adjustments in program participation provisions we can address surface and ground water quality concerns along with wildlife and wetlands preservation needs while still maintaining viable agriculture. Many of the potential environmental benefits were overlooked or simply could not be adequately addressed given the priorities for erosion control reduction, time, and available resources, as well as the absence of some legislative authorities needed to tackle difficult environmental problems in implementing the 1985 act provisions.

It is important that we learn from our past experiences and move at this time to improve and refine our efforts through this 1990 bill. We must recognize that we now have the opportunity to build upon strengths in the 1985 act and address today's important conservation and environmental needs. We must, at the same time, continue to build and improve on the fabric of our agricultural economy. While I am a strong proponent of conservation and environmental concerns, the advancements which are made should be prudent and judicious to the Nation's agricultural producers. Fairness, equity, and practicability need to be at the forefront in our considerations of what can and ought to be done today.

Our Nation's first and foremost environmentalists have always been agricultural producers; they are the stewards of the land, they drink water from our Nation's streams, lakes, and ground water acquifers. They are concerned about the quality and condition of the land, air, and water resources and they are prepared to do their part in addressing the problems. The bill being introduced today reflects this concern, commitment, and builds upon the significant conservation and environmental achievements we have made in the last 5 years.

In Kentucky we are very proud and honored that the Environmental Protection Agency just announced a $105,000 supplemental award to us for our already approved $578,000 program to implement the section 319 Non-point Source Program. Kentucky was one of only 12 States to receive such a supplemental award. The honor award was bestowed as a result of EPA's recognition of the resolve and commitment of our citizens to voluntarily address the nonpoint source problems. Our divisions of water, conservation, and agriculture worked closely in concert with one another and with the conservation districts to develop a realistic, workable, and effective implementation strategy. This is the first award of this nature ever received by Kentucky and it exemplifies the commitment we have for the environment and our citizens resolve to do something constructively and voluntarily.

The 1990 bill establishes a minimum 40-million acre conservation reserve with discretion to the Secretary to target an additional 10 million acres for environmentally sensitive lands. In order to sustain the soil and water conservation accomplishments the producers' crop base would be protected and the producer would also have the option of an additional 5-year extension of existing contracts. This will give the Secretary the latitude and direction needed to address today's important environmental issues and give producers the correct incentives to retain and maintain marginal land in vegetative cover where it is best suited. Provisions of the bill in this area includes sinkholes in karst areas, wetlands, wellheads, and wildlife areas. These are very important concerns in Kentucky since 60 percent of our 25 million acres has some karst topography about 2 million of it in the major cropland areas and we also have about 150,000 acres of wetlands in these same areas. In Kentucky, we are concerned about these environmentally sensitive areas and we support the development of a variety of options and alternatives to resolve the problems. Giving the Secretary discretionary authority to use the Conservation Reserve Program as an option for producers where no other viable alternative exists will add to the choices available to address critical environmental problems.

One of President Bush's high priorities and one explicitly addressed by this 1990 act is the strong program to provide incentives for planting trees which are so important for protection and preservation of our soil, air, and water resources. I am a supporter of the America the Beautiful campaign and recognize, as I know you do Mr. President, that in spite of our best efforts in implementing the 1985 Food Security Act we simply did not do enough to get trees planted, particularly hardwoods. In the 1990 bill, marginal land which has not been cropped would now be eligible for the Conservation Reserve Program if placed in trees. The bill also strengthens the provisions to encourage long-term contracts for wetlands, windbreaks, and shelterbelts.

Several other important provisions are contained in the bill to ensure consistency for producers. These improvements will help to eliminate potential inequities in treatment measures for land that graduates from the CRP, eliminate some unrealistic ownership requirements on land obtained through foreclosure or bankruptcy, and provide more equitable criteria for those who may wish to consider whole farm enrollment.

In implementing the 1985 Food Security Act one of my principal concerns was judicious and fair treatment of our producers in Kentucky who, as a result of their unique agricultural produce, used long-term rotations as a part of their normal operations. I was very happy to report to my constituency the cooperative attitude of the Soil Conservation Service in development of their conservation compliance plans to be considerate, workable, and economically realistic. Without a pragmatic approach to development of these compliance plans it would have been sure bankruptcy for many of Kentucky's producers. As I understand it from my colleagues this was also the case in many other States as well.

Agriculture in Kentucky is not only a very important sector of our economy, but it is also substantially more diversified than generally perceived. Yes, Kentucky is the No. 1 producer of our Nation's tobacco products and tobacco is our primary crop. However, few realize that we are third in the Nation for forage and hay, in the top 15 for livestock and major grain production, and in the top 20 and growing for dairy products. We continue to seek means to strengthen our livestock and dairy industry. The concerns of the Nation and the import of conser-

vation and environmental issues are broadly shared by Kentucky's citizens; we have a diversified economy, and we are very interested in all titles of the Food Security Act. Solutions and considerations to our collective concerns about environmental improvement and conservation of the Nation's resources must take the tack of prudent, practical, and pragmatic measures which do not impose unnecessary costs, hardship, or regulations on our Nation's agricultural producers.

Another important provision of the bill would clarify producer responsibility for compliance only to that land upon which they have control. Under previous legislation it was possible for a producer renting land to be adversely affected by a landlord's decisions on or from land not controlled by the tenant. The 1990 bill rectifies this inequity. The bill further establishes a multiyear set-aside program to enhance measures designed to build soil tilth and fertility on acreages which otherwise may have been left idled to weeds.

In order to help build our knowledge base on chemical use this bill directs the Secretary to develop, analyze, and disseminate information on the farm use of chemicals, nutrients, and other inputs in agriculture. Some promote mandatory reporting of chemicals and nutrients used in agriculture; others promote stricter regulations on use and certification. The premise being that overapplications occur frequently and purposefully. Such a premise ignores the fact that use of these inputs are an important component in costs of production and producers strive diligently to economize in every area possible. Rates of applications are important concerns but equally and perhaps overriding is the timing and methods of application relative to crops grown, soils, climate, topography, expected weather conditions, and proximity to potentially affected water. What is really needed and what is supported in this bill is accelerated information, education, technical, and financial assistance to our Nation's producers.

Contributions and concerns of our chemical industry have been negligently overlooked in much of the debate in this area. This is one of the most heavily regulated industries in our country. Chemical manufacturers have espoused a constructive, responsible, and progressive attitude on environmental concerns numerous times and are aggressively pursuing the development of environmentally safer chemicals. There continue to be advances in technology through research, innovation, and product introduction demonstrating the real and legitimate concerns about the environment which are shared by chemical manufacturers. Some of the more recent product developments are for materials which quickly degrade in the environment, which have negligible toxicity levels, leave little or no residue on crops or in the environment, do not affect water quality, and require less active ingredients. Such products are now available in the market for certain compounds and more are in development. The industry is also developing safer packaging, storage, and application methods for agricultural producers. Technology is responding to the public plea, maybe not as fast as many would like, but the positive response is there and it is important that we recognize this progress.

While I share the concerns about chemical and nutrient occurrence in our surface and ground waters there is still a great deal of debate in the scientific community about how, when, and by what means these materials got into our water. In considering the merits for different methods to obtain better information on imputs used in agriculture it is, as I said before, extremely important that we keep in mind what is reasonable and practicable. Mandatory reporting of chemical use begs the technical considerations, the handling, storing, timing, and methods of applications, and oversimplifies the basis for concern about how and why certain materials may have entered the environment and what should be done to resolve the problems. I believe, very strongly, that a voluntary information program is the best way to obtain improved insight into today's concerns about chemical use in agriculture. Directing the Secretary to develop, analyze, and disseminate information on farm use of chemicals, nutrients, and other inputs with voluntary participation by producers is the most prudent means to obtain this information today and it is the method specified in our bill.

Another important area addressed in this 1990 bill is for restoration of wetlands that had been converted for crop production. Producers would have the option for voluntary restoration of these wetlands with cost sharing available to help defray the expenses or they may exercise rights to grant permanent easements. Many producers in this country already have long-term rotations including grasses and legumes for building soil tilth and fertility, some of the land included in rotations of this type may also have some small areas meeting wetlands criteria. In the 1990 bill, producers with a cropping history for any period of 6 years between 1975 and 1985 on wetlands would be exempted from the so-called swampbuster provision on these acres. Another important provision in the bill is for mitigation in the case where a producer may find it necessary to convert existing wetlands for cropping purposes. In cases such as this, the producer must comply with mitigation requirements to replace and replenish a wetland area of like size and quality as that converted. The provisions of the bill in this area will ensure no further loss of wetlands and strongly supports President Bush's "no net loss of wetlands" policy.

An important provision in the 1990 bill which transcends all of the compliance components is the handling of circumstances where a violation may occur. Current legislation jeopardizes all Federal program participation benefits a producer may be receiving regardless of severity of the infraction, many of which may in fact involve minor acreages or unintended mistakes and misinterpretations on the part of producers. The 1990 bill rectifies this complication, avoids unfair or harsh treatment, and directs the Secretary to develop and implement guidelines to enforce the intent of Congress in a fair, judicious, and equitable manner by linking penalties which may be necessary for compliance violations to severity and/or frequency of infractions.

Water quality is one of the major focal points for redirecting and strengthening efforts through the 1990 bill. In the 1990 bill USDA is directed to substantially enhance its technological development efforts for practices and measures which agricultural producers can use to reduce the risk of water contamination from their operations. Increased research, education, information, technical assistance, and financial assistance are cornerstones of the accelerated water quality program. Effective measures and practices will be included in field office technical guides. Close coordination, collaboration, and linkages with the nonpoint source implementation plans of States are directed in order to help prioritize the allocation of Federal resources. The bill also stipulates the provision of assistance to improve our knowledge base through cooperation in efforts to develop and enhance correlated information on soils and water quality monitoring data. The bill also authorizes the USDA to provide assistance to private citizens for the purpose of defraying costs for testing the quality of water coming from their wells. A strong retraining program for extension personnel will further improve our ability to provide the most up-to-date information and technology available to our Nation's agricultural producers.

For agricultural producers willing to accept the challenge and risks for developing innovative integrated crop management systems the bill provides base and crop yield history protection. Producers trying new and innovative techniques face the uncertainty of natural events but also the risk of charting some new paths. The bill establishes a research base of 3 million acres for integrated crop management systems with a 5-million acre cap per

year over the last 4 years of the program. Commodity program participation payments for producers involved in the research program will be protected. The Secretary is directed to develop technical guides for these new crop management systems and to establish a voluntary stewardship program for producers who may wish to try some or all components of the integrated crop management systems.

Mr. President, our 1990 bill is a comprehensive effort to meld together, in a consistent framework, the legitimate conservation and environmental concerns we all share with our continued needs to provide a healthy vigorous economic setting for agriculture. This 1990 bill strengthens its predecessor 1985 Food Security Act in important areas for environmental and conservation enhancements in a setting which promotes equitable, fair, and pragmatic solutions to the problems.

By Mr. LEVIN:

S. 2410. A bill to amend the Internal Revenue Code of 1986 to prevent avoidance of tax by certain foreign-owned corporations and to impose a tax on dispositions of stock in domestic corporations by 10 percent foreign shareholders; to the Committee on Finance.

FOREIGN TAX EQUITY ACT

Mr. LEVIN. Mr. President, I am pleased today to introduce the Foreign Tax Equity Act of 1990. This is a companion bill legislation recently introduced in the House of Representatives by the chairman of the Ways and Means Committee, Congressman DAN ROSTENKOWSKI.

This legislation is designed to enhance our ability to make sure that foreign owned or controlled companies that carry on trade or business in the United States pay their fair share of taxes. It also has the goal of making sure that foreigners who own a significant amount of stock in U.S. corporations and who sell that stock are not treated any more favorably than U.S. taxpayers in the same situation.

As things stand now, there appears to be almost a black hole into which the profits from some foreign companies doing business in the U.S. seem to disappear. For example, in 1986 foreign controlled domestic corporations had more than $500 billion in receipts, but paid only $3 billion in U.S. taxes.

At a minimum, these facts raise the likelihood that some foreign-owned or controlled companies are engaging in a shell game in which the profits start in the United States and end up abroad. In light of the stiff challenges which may U.S.-owned and controlled corporations have in competing with their foreign counterparts located in this country, and in light of the huge Federal budget deficit, we cannot tolerate or afford being the victims of sleight of hand games by foreign controlled or owned corporations doing business here. The IRS should focus more of its attention on making sure that foreign owned or controlled corporations are not adding insult to injury by improving their competitive edge through tax evasion and, then, shifting the extra tax burden to hard-working Americans. With all the challenges facing us, now is not the time for foreign companies to star in an updated version of "How to Succeed in Business By Not Really Paying."

Legislation which was enacted last year increased the reporting requirements with respect to transactions between foreign corporations and any corporation which is at least 25 percent foreign owned and which is either a domestic or foreign corporation that conducts a trade or business in the United States. The bill which I am introducing today will allow the Internal Revenue Service to examine these transactions for more tax years than last year's legislation did. Under this legislation, the IRS could look at open tax years of firms currently being audited. It would also allow the IRS to extend the statute of limitations for 3 years beyond the current statute of limitations. In addition, this legislation would extend the coverage of these enhanced reporting requirements to all foreign corporations that carry on trade or business in the United States. This provision would, thereby, extend coverage to foreign branches which are doing business in the United States but not incorporated in the United States.

This legislation is also designed to correct a current inequity in the tax code. Currently, if U.S. taxpayers sell shares in a corporation doing business in this country, they must pay tax on any gain which results from the sale. Foreign taxpayers who own stock in the same U.S. corporation and sell that stock are not now required to pay tax on a similar gain. The legislation I am introducing today attempts to correct that imbalance by requiring that foreign corporation or nonresident aliens that own 10 percent or more of the stocks in the U.S. corporation incur a tax liability on the gain that results from the sale. The income would be treated as effectively connected with the conduct of a U.S. trade or business. Under this legislation, the tax would be collected, in the first instance, by withholding 10 percent of the gross proceeds from the transaction. If this is later found to exceed the foreign taxpayers' actual tax liability, then they would be eligible for a refund. However, this bill does not override any existing treaty to the extent that the treaty would prevent imposition of the tax on a person that is a qualified resident of a treaty country.

Mr. President, the Joint Committee on Taxation estimates that the Foreign Tax Equity Act will raise approximately $1 billion over 5 years. It will also be a step in the direction of restoring fairness to the tax code, which is something that is always important, but which we are more conscious of every year as April 15th approaches.

Mr. President, I ask unanimous consent that a text of this legislation be included in the RECORD following my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2410

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Foreign Tax Equity Act of 1990".

TITLE I—TREATMENT OF CERTAIN FOREIGN-OWNED CORPORATIONS

SEC. 101. APPLICATION OF AMENDMENTS MADE BY SECTION 7403 OF REVENUE RECONCILIATION ACT OF 1989 TO TAXABLE YEARS BEGINNING ON OR BEFORE JULY 10, 1989.

(a) GENERAL RULE.—The amendments made by section 7403 of the Revenue Reconciliation Act of 1989 shall apply to—

(1) any requirement to furnish information under section 6038A(a) of the Internal Revenue Code of 1986 (as amended by such section 7403) if the time for furnishing such information under such section is after the date of the enactment of this Act,

(2) any summons issued after such date of enactment, and

(3) any requirement under such section 6038A(a) to maintain records which were in existence on or after March 20, 1990,

without regard to when the taxable year (to which such information, summons, or records relate) began.

(b) CONTINUATION OF OLD FAILURES.—In the case of any failure with respect to a taxable year beginning on or before July 10, 1989, which first occurs on or before the date of the enactment of this Act but which continues after such date of enactment, section 6038A(d)(2) of the Internal Revenue Code of 1986 (as amended by subsection (c) of such section 7403) shall apply for purposes of determining the amount of the penalty imposed for 30-day periods referred to in such section 6038A(d)(2) which begin after the date of the enactment of this Act.

SEC. 102. OTHER REPORTING REQUIREMENTS.

(a) GENERAL RULE.—Subpart A of part III of subchapter A of chapter 61 of the Internal Revenue Code of 1986 (relating to information concerning persons subject to special provisions) is amended by inserting after section 6038B the following new section:

"SEC. 6038C. INFORMATION WITH RESPECT TO FOREIGN CORPORATIONS ENGAGED IN U.S. BUSINESS.

"(a) REQUIREMENT.—If a foreign corporation (hereinafter in this section referred to as the 'reporting corporation') is engaged in a trade or business within the United States at any time during the taxable year—

"(1) such corporation shall furnish (at such time and in such manner as the Secretary shall by regulations prescribe) the information described in subsection (b), and

"(2) such corporation shall maintain (at the location, in the manner, and to the

extent prescribed in regulations) such records as may be appropriate to determine the liability of such corporation for tax under this title as the Secretary shall by regulations prescribe (or shall cause another person to so maintain such records).

"(b) REQUIRED INFORMATION.—For purposes of subsection (a), the information described in this subsection is—

"(1) the information described in section 6038A(b), and

"(2) such other information as the Secretary may prescribe by regulations relating to any item not directly connected with a transaction for which information is required under paragraph (1).

"(c) PENALTY FOR FAILURE TO FURNISH INFORMATION OR MAINTAIN RECORDS.—The provisions of subsection (d) of section 6038A shall apply to—

"(1) any failure to furnish (within the time prescribed by regulations) any information described in subsection (b), and

"(2) any failure to maintain (or cause another to maintain) records as required by subsection (a),

in the same manner as if such failure were a failure to comply with the provisions of section 6038A.

"(d) ENFORCEMENT OF REQUESTS FOR CERTAIN RECORDS.—

"(1) AGREEMENT TO TREAT CORPORATION AS AGENT.—The rules of paragraph (3) shall apply to any transaction between the reporting corporation and any related party who is a foreign person unless such related party agrees (in such manner and at such time as the Secretary shall prescribe) to authorize the reporting corporation to act as such related party's limited agent solely for purposes of applying sections 7602, 7603, and 7604 with respect to any request by the Secretary to examine records or produce testimony related to any such transaction or with respect to any summons by the Secretary for such records or testimony. The appearance of persons or production of records by reason of the reporting corporation being such an agent shall not subject such persons or records to legal process for any purpose other than determining the correct treatment under this title of any transaction between the reporting corporation and such related party.

"(2) RULES WHERE INFORMATION NOT FURNISHED.—If—

"(A) for purposes of determining the amount of the reporting corporation's liability for tax under this title, the Secretary issues a summons to such corporation to produce (either directly or as an agent for a related party who is a foreign person) any records or testimony,

"(B) such summons is not quashed in a proceeding begun under paragraph (4) of section 6038A(e) (as made applicable by paragraph (4) of this subsection) and is not determined to be invalid in a proceeding begun under section 7604(b) to enforce such summons, and

"(C) the reporting corporation does not substantially comply in a timely manner with such summons and the Secretary has sent by certified or registered mail a notice to such reporting corporation that such reporting corporation has not so substantially complied,

the Secretary may apply the rules of paragraph (3) with respect to any transaction or item to which such summons relates (whether or not the Secretary begins a proceeding to enforce such summons). If the reporting corporation fails to maintain (or cause another to maintain) records as required by subsection (a), and by reason of that failure, the summons is quashed in a proceeding described in subparagraph (B) or the reporting corporation is not able to provide the records requested in the summons, the Secretary may apply the rules of paragraph (3) with respect to any transaction or item to which the records relate.

"(3) APPLICABLE RULES.—If the rules of this paragraph apply to any transaction or item, the treatment of such transaction (or the amount and treatment of any such item) shall be determined by the Secretary in the Secretary's sole discretion from the Secretary's own knowledge or from such information as the Secretary may obtain through testimony or otherwise.

"(4) JUDICIAL PROCEEDINGS.—The provisions of section 6038A(e)(4) shall apply with respect to any summons issued under paragraph (2)(A); except that subparagraph (D) of such section shall be applied by substituting 'transaction or item' for 'transaction'.

"(e) DEFINITIONS.—For purposes of this section, the terms 'related party', 'foreign person', and 'records' have the respective meanings given to such terms by section 6038A(c).".

(b) CONFORMING AMENDMENTS.—

(1) Paragraph (1) of section 6038A(a) of such Code is amended by striking "or is a foreign corporation engaged in trade or business within the United States".

(2) The table of sections for subpart A of part III of subchapter A of chapter 61 of such Code is amended by inserting after the item relating to section 6038B the following new item:

"Sec. 6038C. Information with respect to foreign corporations engaged in U.S. business.".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to—

(1) any requirement to furnish information under section 6038C(a) of the Internal Revenue Code of 1986 (as added by this section) if the time for furnishing such information under such section is after the date of the enactment of this Act,

(2) any summons issued after such date of enactment, and

(3) any requirement under such section 6038C(a) to maintain records which were in existence on or after March 20, 1990,

without regard to when the taxable year (to which such information, summons, or records relate) began.

SEC. 103. EXTENSION OF STATUTE OF LIMITATIONS FOR CERTAIN FOREIGN-RELATED DEFICIENCIES.

(a) GENERAL RULE.—Subsection (c) of section 6501 of the Internal Revenue Code of 1986 (relating to limitations on assessment and collection) is amended by adding at the end thereof the following new paragraph:

"(9) CERTAIN FOREIGN-RELATED DEFICIENCIES.—

"(A) IN GENERAL.—If, before the expiration of the time prescribed by this section for the assessment of any foreign-related deficiency (determined with regard to extensions under paragraph (4))—

"(i) the Secretary determines that such deficiency cannot be accurately assessed before the expiration of such period by reason of delay or other actions of the taxpayer which prevented the timely assessment of such deficiency, and

"(ii) The Secretary sends by certified or registered mail a notice of such determination to the taxpayer,

the Secretary may extend the period during which such deficiency may be assessed by an additional period of not more than 3 years. Not more than 1 extension may be made under the preceding sentence with respect to any deficiency.

"(B) FOREIGN-RELATED DEFICIENCY.—For purposes of subparagraph (A), the term 'foreign-related deficiency' means—

"(i) any deficiency of a domestic corporation which is 25-percent foreign-owned to the extent such deficiency is attributable to a transaction directly or indirectly with a related party who is a foreign person, and

"(ii) any deficiency of a foreign corporation with respect to the taxes imposed pursuant to sections 882 and 884.

"(C) JUDICIAL PROCEEDINGS.—

"(i) REVIEW.—Notwithstanding any law or rule of law, any taxpayer to which a notice of a determination under subparagraph (A) has been mailed shall have the right to begin a proceeding to review such determination not later than the 90th day after the day on which such notice was mailed. If such a proceeding is not begun on or before such 90th day, such determination by the Secretary shall be binding and shall not be reviewed by any court.

"(ii) JURISDICTION.—The United States district court for the district in which the taxpayer resides or is found shall have jurisdiction to hear any proceeding brought under clause (i). Any order or other determination in such a proceeding shall be treated as a final order which may be appealed.

"(iii) SUSPENSION OF STATUTE OF LIMITATIONS.—If the taxpayer brings a proceeding under clause (i), the running of any period of limitations under this section or section 6531 with respect to the deficiency to which the proceeding relates shall be suspended for the period beginning on the date on which the notice under subparagraph (A) was mailed and ending on the date on which there is a final determination in the proceeding. In no event shall any such period expire before the 90th day after the day on which there is a final determination in such proceeding.

"(D) DEFINITIONS.—For purposes of this paragraph, the terms '25-percent foreign-owned', 'foreign person', and 'related party' have the respective meanings given such terms by section 6038A(c).".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to any deficiency—

(1) for any taxable year ending after the date of the enactment of this Act, or

(2) for any taxable year ending on or before such date of enactment if the period during which such deficiency may be assessed under section 6501 of the Internal Revenue Code of 1986 (determined without regard to the amendments made by subsection (a)) has not expired before such date of the enactment.

TITLE II—TAX ON DISPOSITION OF STOCK IN DOMESTIC CORPORATIONS BY 10-PERCENT FOREIGN SHAREHOLDERS

SEC. 201. DISPOSITION OF STOCK IN DOMESTIC CORPORATIONS BY 10-PERCENT FOREIGN SHAREHOLDERS.

(a) GENERAL RULE.—Subpart D of part II of subchapter N of chapter 1 of the Internal Revenue Code of 1986 (relating to miscellaneous provisions) is amended by adding at the end thereof the following new section:

"SEC. 899. DISPOSITION OF STOCK IN DOMESTIC CORPORATIONS BY 10-PERCENT FOREIGN SHAREHOLDERS.

"(a) GENERAL RULE.—

"(1) TREATMENT AS EFFECTIVELY CONNECTED WITH UNITED STATES TRADE OR BUSINESS.—For

purposes of this title, if any nonresident alien individual or foreign corporation is a 10-percent shareholder in any domestic corporation, any gain or loss of such individual or foreign corporation from the disposition of any stock in such domestic corporation shall be taken into account—

"(A) in the case of a nonresident alien individual, under section 871(b)(1), or

"(B) in the case of a foreign corporation, under section 882(a)(1),

as if the taxpayer were engaged during the taxable year in a trade or business within the United States through a permanent establishment in the United States and as if such gain or loss were effectively connected with such trade or business and attributable to such permanent establishment. Notwithstanding section 865, any such gain or loss shall be treated as from sources in the United States.

"(2) 21-PERCENT MINIMUM TAX ON NONRESIDENT ALIEN INDIVIDUALS.—

"(A) IN GENERAL.—In the case of any nonresident alien individual, the amount determined under section 55(b)(1)(A) shall not be less than 21 percent of the lesser of—

"(i) the individual's alternative minimum taxable income (as defined in section 55(b)(2)) for the taxable year, or

"(ii) the individual's net taxable stock gain for the taxable year.

"(B) NET TAXABLE STOCK GAIN.—For purposes of subparagraph (A), the term 'net taxable stock gain' means the excess of—

"(i) the aggregate gains for the taxable year from dispositions of stock in domestic corporations with respect to which such individual is a 10-percent shareholder, over

"(ii) the aggregate of the losses for the taxable year from dispositions of such stock.

"(C) COORDINATION WITH SECTION 897(a)(2).—Section 897(a)(2)(A) shall not apply to any nonresident alien individual for any taxable year for which such individual has a net taxable stock gain, but the amount of such net taxable stock gain shall be increased by the amount of such individual's net United States real property gain (as defined in section 897(a)(2)(B)) for such taxable year.

"(b) 10-PERCENT SHAREHOLDER.—

"(1) IN GENERAL.—For purposes of this section, the term '10-percent shareholder' means any person who at any time during the shorter of—

"(A) the period after March 19, 1990, and before the date of the disposition, or

"(B) the 5-year period ending on the date of the disposition,

owned 10 percent or more (by vote or value) of the stock in the domestic corporation.

"(2) CONSTRUCTIVE OWNERSHIP.—

"(A) IN GENERAL.—Section 318(a) (relating to constructive ownership of stock) shall apply for purposes of paragraph (1).

"(B) MODIFICATIONS.—For purposes of subparagraph (A)—

"(i) paragraph (2)(C) of section 318(a) shall be applied by substituting '10 percent' for '50 percent', and

"(ii) paragraph (3)(C) of section 318(a) shall be applied—

"(I) by substituting '10 percent' for '50 percent', and

"(II) in any case where such paragraph would not apply but for subclause (I), by considering a corporation as owning the stock (other than stock in such corporation) owned by or for any shareholder of such corporation in that proportion which the value of the stock which such shareholder owns in such corporation bears to the value of all stock in such corporation.

"(3) TREATMENT OF STOCK HELD BY CERTAIN PARTNERSHIPS.—

"(A) IN GENERAL.—For purposes of this section, if—

"(i) a partnership is a 10-percent shareholder in any domestic corporation, and

"(ii) 10 percent or more of the capital or profits interests in such partnership is held (directly or indirectly) by nonresident alien individuals or foreign corporations,

each partner in such partnership who is not otherwise a 10-percent shareholder in such corporation shall, with respect to the stock in such corporation held by the partnership, be treated as a 10-percent shareholder in such corporation.

"(B) EXCEPTION.—

"(i) IN GENERAL.—Subparagraph (A) shall not apply with respect to stock in a domestic corporation held by any partnership if, at all times during the 5-year period ending on the date of the disposition involved—

"(I) the aggregate bases of the stock and securities in such domestic corporation held by such partnership was less than 25 percent of the partnership's net adjusted asset cost, and

"(II) the partnership did not own 50 percent or more (by vote or value) of the stock in such domestic corporation.

The Secretary may by regulations disregard any failure to meet the requirements of subclause (I) where the partnership normally met such requirements during such 5-year period.

"(ii) NET ADJUSTED ASSET COST.—For purposes of clause (i), the term 'net adjusted asset cost' means—

"(I) the aggregate bases of all of the assets of the partnership other than cash and cash items, reduced by

"(II) the portion of the liabilities of the partnership not allocable (on a proportionate basis) to assets excluded under subclause (I).

"(C) EXCEPTION NOT TO APPLY TO 50-PERCENT PARTNERS.—Subparagraph (B) shall not apply in the case of any partner owning (directly or indirectly) more than 50 percent of the capital or profits interests in the partnership at any time during the 5-year period ending on the date of the disposition.

"(D) SPECIAL RULES.—For purposes of subparagraph (B) and (C)—

"(i) TREATMENT OF PREDECESSORS.—Any reference to a partnership or corporation shall be treated as including a reference to any predecessor thereof.

"(ii) PARTNERSHIP NOT IN EXISTENCE.—If any partnership was not in existence throughout the entire 5-year period ending on the date of the disposition, only the portion of such period during which the partnership (or any predecessor) was in existence shall be taken into account.

"(E) OTHER PASS-THRU ENTITIES; TIERED ENTITIES.—Rules similar to the rules of the preceding provisions of this paragraph shall also apply in the case of any pass-thru entity other than a partnership and in the case of tiered partnerships and other entities.

"(c) COORDINATION WITH NONRECOGNITION PROVISIONS; ETC.—

"(1) COORDINATION WITH NONRECOGNITION PROVISIONS.—

"(A) IN GENERAL.—Except as provided in subparagraph (B), any nonrecognition provision shall apply for purposes of this section to a transaction only in the case of—

"(i) an exchange of stock in a domestic corporation for other property the sale of which would be subject to taxation under this chapter, or

"(ii) a distribution with respect to which gain or loss would not be recognized under section 336 if the sale of the distributed property by the distributee would be subject to tax under this chapter.

"(B) REGULATIONS.—The Secretary shall prescribe regulations (which are necessary or appropriate to prevent the avoidance of Federal income taxes) providing—

"(i) the extent to which nonrecognition provisions shall, and shall not, apply for purposes of this section, and

"(ii) the extent to which—

"(I) transfers of property in a reorganization, and

"(II) changes in interests in, or distributions from, a partnership, trust, or estate,

shall be treated as sales of property at fair market value.

"(C) NONRECOGNITION PROVISION.—For purposes of this paragraph, the term 'nonrecognition provision' means any provision of this title for not recognizing gain or loss.

"(2) CERTAIN OTHER RULES MADE APPLICABLE.—For purposes of this section, rules similar to the rules of subsections (g) and (j) of section 897 shall apply.

"(d) CERTAIN INTEREST TREATED AS STOCK.—For purposes of this section—

"(1) any option or other right to acquire stock in a domestic corporation,

"(2) the conversion feature of any debt instrument issued by a domestic corporation, and

"(3) to the extent provided in regulations, any other interest in a domestic corporation other than an interest solely as creditor,

shall be treated as stock in such corporation.

"(e) TREATMENT OF CERTAIN GAIN AS A DIVIDEND.—In the case of any gain which would be subject to tax by reason of this section but for a treaty and which results from any distribution in liquidation or redemption, for purposes of this subtitle, such gain shall be treated as a dividend to the extent of the earnings and profits of the domestic corporation attributable to the stock. Rules similar to the rules of section 1248(c) (determined without regard to paragraph (2)(D) thereof) shall apply for purposes of the preceding sentence.

"(f) REGULATIONS.—The Secretary shall prescribe such regulations as may be appropriate to carry out the purposes of this section, including—

"(1) regulations coordinating the provisions of this section with the provisions of section 897, and

"(2) regulations aggregating stock held by a group of persons acting together."

(b) WITHHOLDING OF TAX.—Subchapter A of chapter 3 of such Code is amended by adding at the end thereof the following new section:

"SEC. 1447. WITHHOLDING OF TAX ON CERTAIN STOCK DISPOSITIONS.

"(a) GENERAL RULE.—Except as otherwise provided in this section, in the case of any disposition of stock in a domestic corporation by a foreign person who is a 10-percent shareholder in such corporation, the withholding agent shall deduct and withhold a tax equal to 10 percent of the amount realized on the disposition.

"(b) EXCEPTIONS.—

"(1) STOCK WHICH IS NOT REGULARLY TRADED.—In the case of a disposition of stock which is not regularly traded, a withholding agent shall not be required to deduct and withhold any amount under subsection (a) if—

"(A) the transferor furnishes to such withholding agent an affidavit by such transferor stating, under penalty of perjury, that section 899 does not apply to such disposition because—

"(i) the transferor is not a foreign person, or

"(ii) the transferor is not a 10-percent shareholder, and

"(B) such withholding agent does not know (or have reason to know) that such affidavit is not correct.

"(2) STOCK WHICH IS REGULARLY TRADED.—

"(A) IN GENERAL.—Except as provided in subparagraph (B), a withholding agent shall not be required to deduct and withhold any amount under subsection (a) with respect to any disposition of regularly traded stock if such withholding agent does not know (or have reason to know) that section 899 applies to such disposition.

"(B) SPECIAL RULE WHERE SUBSTANTIAL DISPOSITION.—If—

"(i) there is a disposition of regularly traded stock in a corporation, and

"(ii) the amount of stock involved in such disposition constitutes 1 percent or more (by vote or value) of the stock in such corporation,

subparagraph (A) shall not apply but paragraph (1) shall apply as if the disposition involved stock which was not regularly traded.

"(C) NOTIFICATION BY FOREIGN PERSON.—If section 899 applies to any disposition by a foreign person of regularly traded stock, such foreign person shall notify the withholding agent that section 899 applies to such disposition.

"(3) NONRECOGNITION TRANSACTIONS.—A withholding agent shall not be required to deduct and withhold any amount under subsection (a) in any case where gain or loss is not recognized by reason of section 899(c) (or the regulations prescribed under such section).

"(c) SPECIAL RULE WHERE NO WITHHOLDING.—If

"(1) there is no amount deducted and withheld under this section with respect to any disposition to which section 899 applies, and

"(2) the foreign person does not pay the tax imposed by this subtitle to the extent attributable to such disposition on the date prescribed therefor,

for purposes of determining the amount of such tax, the foreign person's basis in the stock disposed of shall be treated as zero or such other amount as the Secretary may determine (and, for purposes of section 6501, the underpayment of such tax shall be treated as due to a willful attempt to evade such tax).

"(d) DEFINITIONS AND SPECIAL RULES.—For purposes of this section—

"(1) WITHHOLDING AGENT.—The term 'withholding agent' means—

"(A) the last United States person to have the control, receipt, custody, disposal, or payment of the amount realized on the disposition, or

"(B) if there is no such United States person, the person prescribed in regulations.

"(2) FOREIGN PERSON.—The term 'foreign person' means any person other than a United States person.

"(3) REGULARLY TRADED STOCK.—The term 'regularly traded stock' means any stock of a class which is regularly traded on an established securities market.

"(4) AUTHORITY TO PRESCRIBE REDUCED AMOUNT.—At the request of the person making the disposition or the withholding agent, the Secretary may prescribe a reduced amount to be withheld under this section if the Secretary determines that to substitute such reduced amount will not jeopardize the collection of the tax imposed by section 871(b)(1) or 882(a)(1).

"(5) OTHER TERMS.—Except as provided in this section, terms used in this section shall have the same respective meanings as when used in section 899.

"(6) CERTAIN RULES MADE APPLICABLE.—Rules similar to the rules of section 1445(e) shall apply for purposes of this section.

"(e) REGULATIONS.—The Secretary shall prescribe such regulations as may be appropriate to carry out the purposes of this section, including regulations coordinating the provisions of this section with the provisions of sections 1445 and 1446."

(c) EXCEPTION FROM BRANCH PROFITS TAX.—Subparagraph (C) of section 884(d)(2) of such Code is amended to read as follows:

"(C) gain treated as effectively connected with the conduct of a trade or business within the United States under—

"(i) section 897 in the case of the disposition of a United States real property interest described in section 897(c)(1)(A)(ii), or

"(ii) section 899,".

(d) REPORTS WITH RESPECT TO CERTAIN DISTRIBUTIONS.—Paragraph (2) of section 6038B(a) of such Code (relating to notice of certain transfers to foreign person) is amended by striking "section 336" and inserting "section 302, 331, or 336".

(e) CLERICAL AMENDMENTS.—

(1) The table of sections for subpart D of part II of subchapter N of chapter 1 of such Code is amended by adding at the end thereof the following new item:

"Sec. 899. Dispositions of stock in domestic corporations by 10-percent foreign shareholders."

(2) The table of sections for subchapter A of chapter 3 of such Code is amended by adding at the end thereof the following new item:

"Sec. 1447. Withholding of tax on certain stock dispositions."

(f) EFFECTIVE DATE.—

(1) IN GENERAL.—Except as otherwise provided in this subsection, the amendments made by this section shall apply to dispositions after March 19, 1990, except that section 1447 of the Internal Revenue Code of 1986 (as added by this section) shall not apply to any disposition before the date 6 months after the date of the enactment of this Act.

(2) BINDING CONTRACT.—The amendments made by this section shall not apply to any disposition pursuant to a written binding contract in effect on March 19, 1990, and at all times thereafter before the disposition.

(3) COORDINATION WITH TREATIES.—

(A) IN GENERAL.—Sections 899 (other than subsection (e) thereof) and 1447 of the Internal Revenue Code of 1986 (as added by this section) shall not apply to any disposition if such disposition is by a qualified resident of a foreign country and the application of such sections to such disposition would be contrary to any treaty between the United States and such foreign country which was in effect on March 20, 1990, and at the time of such disposition.

(B) QUALIFIED RESIDENT.—For purposes of subparagraph (A), the term "qualified resident" means any resident of the foreign country entitled to the benefits of the treaty referred to in subparagraph (A); except that such term shall not include a corporation unless such corporation is a qualified resident of such country (as defined in section 884(e)(4) of the Internal Revenue Code of 1986).

By Mr. BYRD:

S.J. Res. 284. Joint resolution to designate the week beginning September 16, 1990 as "National Give the Kids a Fighting Chance Week"; to the Committee on the Judiciary.

NATIONAL GIVE THE KIDS A FIGHTING CHANCE WEEK

Mr. BRYD. Mr. President, in the 100th Congress, I sponsored a joint resolution to highlight the efforts of a number of organizations that assist children and their families in seeking treatment for craniofacial deformities. The joint resolution designating the "National Craniofacial Deformity Awareness Week" was passed by the Congress and signed by the President in 1988.

Since that time, efforts to treat youngsters with craniofacial deformities have become even more noted and published. Organizations such as the International Craniofacial Foundations, Inc., and the National Foundation for Facial Reconstruction have not only served Americans but have also opened their hearts to Soviet children, giving those boys and girls a fighting chance to lead normal and productive lives.

Today, I am introducing a joint resolution to designate the week of September 16–22, 1990. as "National Give the Kids a Fighting Chance Week."

Its is estimated that as many as 200,00 victims of craniofacial deformities are under the age of 5. These children are often hidden from the outside world so that they may be protected from the rude stares and cruel comments of strangers.

Many families are unaware that effective treatment may be available for these children. I hope, that with the passage of this joint resolution, we can continue to focus the public's attention on the thousands of children who suffer from the physicial and emotional trauma brought on by craniofacial deformities.

With the designation of the week of September 16, 1990, as "National Give the Kids a Fighting Chance Week," we shall aid the efforts of the organizations that help individuals, many of whom have believed they were outcasts of society, to live normal; and productive lives.

I ask my colleagues to join me in cosponsoring this joint resolution.

ADDITIONAL COSPONSORS

S. 273

At the request of Mr. HEINZ, the name of the Senator from Arizona [Mr. DECONCINI] was added as a cosponsor of S. 273, a bill to amend title 39, United States Code, to designate as nonmailable matter solicitations of do-

nations which could reasonably be misconstrued as a bill, invoice, or statement of account due, solicitations for the purchase of products or services which are provided either free of charge or at a lower price by the Federal Government connection or endorsement, unless such matter contains an appropriate, conspicuous disclaimer, and for other purposes.

S. 341

At the request of Mr. HOLLINGS, the name of the Senator from Rhode Island [Mr. PELL] was added as a cosponsor of S. 341, a bill to amend the Federal Aviation Act of 1958 to prohibit discrimination against blind individuals in air travel.

S. 1006

At the request of Mr. LEAHY, the name of the Senator from Alabama [Mr. HEFLIN] was added as a cosponsor of S. 1006, a bill to encourage innovation and productivity, stimulate trade, and promote the competitiveness and technological leadership of the United States.

S. 1067

At the request of Mr. GORE, the name of the Senator from Louisiana [Mr. BREAUX] was added as a cosponsor of S. 1067, a bill to provide for a coordinated Federal research program to ensure continued United States leadership in high-performance computing.

S. 1355

At the request of Mr. BUMPERS, the name of the Senator from Alaska [Mr. STEVENS] was added as a cosponsor of S. 1355, a bill to assist private industry in establishing a uniform residential energy efficiency rating system, and for other purposes.

S. 1358

At the request of Mr. RIEGLE, the name of the Senator from Nebraska [Mr. KERREY] was added as a cosponsor of S. 1358, a bill to amend the Social Security Act to take into account monthly earnings in determining the amount of disability benefits payable to a recipient of disabled adult child's benefits and certain other beneficiaries and to provide for continued entitlement to disability and Medicare benefits for such individuals, and other purposes.

S. 1361

At the request of Mr. FOWLER, the name of the Senator from Florida [Mr. MACK] was added as a cosponsor of S. 1361, a bill to amend title 38, United States Code, to require that burials be permitted in national cemeteries on weekends and holidays under certain conditions, and for other purposes.

S. 1458

At the request of Mr. WALLOP, the name of the Senator from Montana [Mr. BURNS] was added as a cosponsor of S. 1458, a bill to amend chapter 6 of title 5, United States Code, relating to regulatory flexibility analysis.

S. 1511

At the request of Mr. PRYOR, the name of the Senator from Connecticut [Mr. LIEBERMAN] was added as a cosponsor of S. 1511, a bill to amend the Age Discrimination in Employment Act of 1967 to clarify the protections given to older individuals in regard to employee benefit plans, and for other purposes.

S. 1630

At the request of Mr. REID, his name was added as a cosponsor of S. 1630, a bill to amend the Clean Air Act to provide for attainment and maintenance of health protective national ambient air quality standards, and for other purposes.

At the request of Mr. BAUCUS, the name of the Senator from Oregon [Mr. HATFIELD] was added as a cosponsor of S. 1630, supra.

S. 2079

At the request of Mr. LEVIN, his name was added as a cosponsor of S. 2079, a bill to amend the Immigration and Nationality Act to provide for temporary protected status for Lebanese nationals.

S. 2210

At the request of Mr. D'AMATO, the name of the Senator from New Hampshire [Mr. RUDMAN] was added as a cosponsor of S. 2210, a bill to provide for preservation of competitive rail freight service routes in the Northeastern United States.

SENATE JOINT RESOLUTION 195

At the request of Mr. D'AMATO, the name of the Senator from California [Mr. WILSON] was added as a cosponsor of Senate Joint Resolution 195, a joint resolution proclaiming Christopher Columbus to be an honorary citizen of the United States.

SENATE JOINT RESOLUTION 240

At the request of Mr. SYMMS, the names of the Senator from Oregon [Mr. PACKWOOD], the Senator from Delaware [Mr. ROTH], and the Senator from Virginia [Mr. WARNER] were added as cosponsors of Senate Joint Resolution 240, a joint resolution designating the week of June 10, 1990, through June 16, 1990, as "Multiple-Use Sustained-Yield Week."

SENATE JOINT RESOLUTION 271

At the request of Mr. WALLOP, the names of the Senator from Arkansas [Mr. BUMPERS], the Senator from Minnesota [Mr. DURENBERGER], the Senator from Utah [Mr. GARN], the Senator from Utah [Mr. HATCH], the Senator from New Hampshire [Mr. HUMPHREY], the Senator from Vermont [Mr. JEFFORDS], the Senator from Maine [Mr. MITCHELL], the Senator from Kansas [Mrs. KASSEBAUM], the Senator from Wisconsin [Mr. KASTEN], the Senator from Alaska [Mr. MURKOWSKI], the Senator from Georgia [Mr. NUNN], the Senator from Arkansas [Mr. PRYOR], the Senator from Alabama [Mr. SHELBY], the Senator from Michigan [Mr. LEVIN], the Senator from Indiana [Mr. COATS], the Senator from California [Mr. WILSON], the Senator from Illinois [Mr. DIXON], the Senator from New York [Mr. MOYNIHAN], the Senator from Florida [Mr. MACK], the Senator from Virginia [Mr. WARNER], and the Senator from South Carolina [Mr. THURMOND] were added as cosponsors of Senate Joint Resolution 271, a joint resolution to designate July 10, 1990 as "Wyoming Centennial Day."

SENATE JOINT RESOLUTION 274

At the request of Mr. LAUTENBERG, the names of the Senator from California [Mr. CRANSTON], the Senator from Illinois [Mr. DIXON], the Senator from Mississippi [Mr. COCHRAN] were added as cosponsors of Senate Joint Resolution 274, a joint resolution to designate the week beginning June 10, 1990 as "National Scleroderma Awareness Week."

SENATE JOINT RESOLUTION 277

At the request of Mr. LUGAR, the name of the Senator from Illinois [Mr. DIXON] was added as a cosponsor of Senate Joint Resolution 277, a joint resolution designating October 6, 1990, as "German-American Day."

SENATE CONCURRENT RESOLUTION 97

At the request of Mr. D'AMATO, the name of the Senator from Oregon [Mr. PACKWOOD] was added as a cosponsor of Senate Concurrent Resolution 97, a concurrent resolution expressing the sense of the Congress with respect to popular anti-Semitism in the Soviet Union.

SENATE CONCURRENT RESOLUTION 99

At the request of Mr. PRYOR, the names of the Senator from Maryland [Mr. SARBANES], the Senator from California [Mr. CRANSTON], and the Senator from Iowa [Mr. GRASSLEY] were added as cosponsors of Senate Concurrent Resolution 99, a concurrent resolution expressing the sense of the Congress concerning the 25th anniversary of the Older Americans Act of 1965.

SENATE CONCURRENT RESOLUTION 102

At the request of Mr. DIXON, the name of the Senator from New York [Mr. D'AMATO] was added as a cosponsor of Senate Concurrent Resolution 102, a concurrent resolution expressing the sense of the Congress regarding the existing borders between Germany and Poland.

SENATE CONCURRENT RESOLUTION 106

At the request of Mr. BOSCHWITZ, the name of the Senator from Colorado [Mr. WIRTH] was added as a cosponsor of Senate Concurrent Resolution 106, a concurrent resolution expressing the sense of the Congress concerning Jersusalem and the peace process.

SENATE RESOLUTION 239

At the request of Mr. DECONCINI, the name of the Senator from Missis-

sippi [Mr. COCHRAN] was added as a cosponsor of Senate Resolution 239, a resolution expressing the sense of the Senate denouncing the military offensive in Angola and urging an immediate ceasefire.

SENATE RESOLUTION 263

At the request of Mr. LAUTENBERG, the name of the Senator from Michigan [Mr. LEVIN] was added as a cosponsor of Senate Resolution 263, a resolution to express the sense of the Senate regarding the need to establish a sound national transportation policy integrating all modes of transportation and maintaining a significant Federal role.

AMENDMENT NO. 1432

At the request of Mr. MURKOWSKI, the name of the Senator from Minnesota [Mr. BOSCHWITZ] was added as a cosponsor of amendment No. 1432 proposed to S. 1630, a bill to amend the Clean Air Act to provide for attainment and maintenance of health protective national ambient air quality standards, and for other purposes.

SENATE CONCURRENT RESOLUTION 115—TO EXPRESS THE SENSE OF THE CONGRESS REGARDING FUTURE FUNDING OF AMTRAK

Mr. LAUTENBERG (for himself, Mr. EXON, Mr. SIMON, Mr. D'AMATO, Mr. SPECTER, Mr. BAUCUS, and Mr. REID) submitted the following concurrent resolution; which was referred to the Committee on Commerce, Science, and Transportation.

S. CON. RES. 115

Whereas Amtrak, the National Railroad Passenger Corporation, was established by the United States Congress in 1971 to assume operation of rail passenger services in this country;

Whereas Amtrak now operates 220 trains daily over a 24,000 mile route system, and also owns or controls the high speed Northeast Corridor rail line between Washington, D.C., and Boston, Massachusetts;

Whereas Amtrak has and will continue to reduce its dependence on Federal funding which has declined from $896,300,000 in fiscal year 1981 to $604,000,000 in fiscal year 1990, a reduction of 56 percent in constant dollars;

Whereas Amtrak covers an increasing percentage of its total costs from its own revenues, and the revenue-to-cost ratio has improved from 48 percent in fiscal year 1981 to 72 percent in fiscal year 1989, and a projected 75 percent in 1990;

Whereas it is now Amtrak's specific goal to eliminate its need for any Federal operating support and cover 100 percent of its operating costs from its own revenues by the year 2000;

Whereas Amtrak revenues in fiscal year 1989 were $1.27 billion, an increase of 14.7 percent over 1988, which resulted from increases in transportation, real estate, mail and express, and corporate development revenues;

Whereas Amtrak provided transportation for more than 21.4 million intercity passengers in 1989 and carried 17.4 million commuter passengers for State commuter authorities;

Whereas Amtrak generated 5.86 billion passenger miles in fiscal year 1989 and the ratio of passenger miles per train mile (an indicator of the number of passengers riding the average train one mile) increased from 177 in fiscal year 1987 to 188 in fiscal year 1989, reflecting the increased density of passengers on Amtrak trains;

Whereas Amtrak is an ongoing business and any drastic reduction in public support, or the elimination of Federal funds, would force the corporation in bankruptcy and threaten the end of the rail passenger service across the country;

Whereas the Federal and State governments have invested heavily to modernize Amtrak facilities, purchase new rolling stock, and upgrade the high speed Northeast Corridor, which raised the value of Amtrak's net assets to over $4 billion, all of which would have to be sold at scrap value if rail passenger service were eliminated;

Whereas some 23,700 Amtrak employees in 44 States would become unemployed if the corporation received no public funds and was forced into bankruptcy;

Whereas termination of rail passenger service would trigger $2.7 billion in Amtrak liability to pay labor protection to affected employees, and if Amtrak is rendered insolvent, labor would turn to the United States Government for payment of these claims;

Whereas an Amtrak shutdown of the Northeast Corridor would drastically increase the cost, and disrupt the provision of daily commuter service by New Jersey Transit, the Southeastern Pennsylvania Transportation Administration, the Maryland Department of Transportation, and the Massachusetts Bay Transit Authority, for the approximately 180,000 people per day who use these carriers over Amtrak owned and operated rail lines in Washington, D.C., Maryland, Pennsylvania, New Jersey, New York, and Massachusetts;

Whereas the shutdown of the Northeast Corridor would disrupt freight service provided by Conrail and other carriers on the Corridor, which serve numerous businesses including General Motors, Ford, Chrysler, DuPont, General Foods, and General Electric;

Whereas Amtrak carries more than twice as many passengers between and among the Northeast Corridor stations of New York, Newark, Philadelphia, Wilmington, Baltimore, and Washington, than all airlines combined, and over one-third of all air and rail passengers daily between Washington, D.C., and New York alone;

Whereas a shutdown of intercity rail service in the Northeast Corridor would strain already busy and overcrowded airports along the Atlantic seaboard;

Whereas Amtrak provides needed transportation for lower-income and elderly travelers and serves numerous locations that have no other means of public intercity transportation;

Whereas both Amtrak's labor and management workers have made efforts to improve productivity, and as such, Amtrak will be the first railroad in this country to operate its trains nationwide under totally revised and modernized work rules;

Whereas all major industrialized Western nations have taken pride in establishing rail service and publicly funding their passengers systems;

Whereas Congress has consistently supported a balanced national transportation network, including the financial support of various modes of transportation, making this country the most mobile in the world and making travel available to persons of all income levels;

Whereas part of this balanced transportation system established by Congress has included the provision of intercity rail passenger service; and

Whereas Congress has voted numerous times to authorize and appropriate sufficient funds to operate a national rail passenger system and has rejected efforts to eliminate Federal funding for Amtrak: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of the Congress that—

(1) Amtrak should be supported by the Federal Government at a level that will enable it to continue to operate a national railway system, to acquire new passenger equipment and modernize its maintenance facilities, and to continue the progress that has been made to improve its financial performance and service levels; and

(2) the Secretary of Transportation and the Administrator of the Federal Railroad Administration should work closely with Amtrak management to—

(A) identify areas and assist in implementing changes that will further lower Amtrak's dependence on public funding without adversely affecting service;

(B) insure that safety is given the highest priority possible as part of the management's responsibility to provide rail passenger service; and

(C) take steps to preserve and ensure the adequacy of the national rail passenger infrastructure as a key element in a balanced national transportation system.

SEC. 2. A copy of this resolution shall be transmitted to the President, the Secretary of Transportation, and the Administrator of the Federal Railroad Administration.

Mr. LAUTENBERG. Mr. President, I rise today to introduce a sense of the Congress resolution reaffirming the support of this body for the National Railroad Passenger Corporation, better known as Amtrak. I am pleased to be joined by Senators SIMON, EXON, D'AMATO, SPECTER, BAUCUS and REID.

For years, the administration has sought to eliminate Federal funding for Amtrak. These efforts, fortunately, have been thwarted by Congress. Congress understands the importance of Amtrak and has preserved a strong, national rail passenger system for the millions of Americans who depend on that service.

Amtrak is a vital link to our national transportation network. Its elimination would have dramatic implications for transportation in this country. Let's look at the facts. In 1989 Amtrak served 38.9 million people and operated 220 trains daily over a 24,000-mile route system in 44 States. In addition, approximately 180,000 commuters in a number of States rely on Amtrak's rails each and every day to get to and from work.

A large percentage of Amtrak's passengers travel along Amtrak's Northeast corridor line, one of the Nation's most important transportation assets. In 1989, Amtrak carried over 30,000

noncommuter passengers every day between the cities located on the Northeast corridor. The importance of Amtrak in my region can hardly be overestimated. Twice as many passengers traveled by Amtrak between and among the Northeast corridor stations of New York, Newark, Philadelphia, Wilmington, Baltimore, and Washington as on all the airlines combined. If this service were eliminated, most of these riders would be forced to fly between Washington and New York. To carry just the 4,400 passengers who daily travel between New York and Washington, and additional 60-70 airline flights would be required each day. Anyone who is familiar with the congestion in our skies knows that that just isn't possible.

But the harsh effects would not be limited to the Northeast corridor passengers. Nearly half of Amtrak's riders and two-thirds of its revenues come from its noncorridor operations. These are principally long-haul services, whose passengers are largely poor and elderly travelers. Over 100 communities served by Amtrak have no air service and approximately the same number have no direct intercity bus service. Thirty-one communities served by Amtrak have neither air nor bus service. For these communities, Amtrak is the primary or sole mode of public transportation.

Discontinuing Amtrak service would also produce an immediate unemployment impact. Amtrak currently employs 23,500 people and 400 employees with other railroads, nationwide. Under current law, the discontinuance of Amtrak service would trigger $2.7 billion in legally imposed labor protection. payments to Amtrak employees over a 6-year period. Amtrak's assets would be in sufficient to pay the labor protection claims, and Amtrak's employees would look to the Federal Government for payment. Thus, despite the termination of rail passenger service, the taxpayer would be required to fund a multibillion-dollar bailout for Amtrak. In addition, the U.S. Government would have to pay the enormous administrative costs in dealing with the Amtrak bankruptcy estate, distributing necessary real estate and property to other users, and handling creditors.

Amtrak is a tremendous success story. Its growth and success have come in the face of major budgetary constraints. From fiscal year 1981 to fiscal year 1990 Federal support from Amtrak declined from $896.3 million to $604 million, a reduction of 56 percent in constant dollars. Yet during that time, virtually all of Amtrak's performance indicators improved. Revenues were up in fiscal year 1989 to $1.27 billion, an increase of 14.7 percent over 1988. It's revenue to cost ratio has improved from 48 percent in fiscal year 1981 to 72 percent in fiscal year 1990, and a projected 75 percent in fiscal year 1991. Each year Amtrak gets more and more efficient and more important to a balanced national transportation network.

In spite of all this, the administration's new transportation policy calls for the elimination of Amtrak funding. This is short-sighted and ignores the long-term needs of our country. Further, it ignores the fact that Amtrak has a specific plan to eliminate the need for Federal support by the year 2000.

With short-term Federal capital support and a few other steps, Amtrak projects that it will be able to recover 100 percent of its operating costs in 10 years. But, rather than encourage this, the administration would cut off Amtrak now. The result: the loss of intercity passenger rail service, instead of a system that could be self-sustaining within the decade—a feat that no other industrialized country, even those with major rail commitments, has come close to accomplishing.

As chairman of the Appropriations Subcommittee on Transportation, I have worked closely with Graham Claytor, Amtrak's president, to make Amtrak less dependent on Federal funding while maintaining and improving service. Amtrak should have the opportunity to continue these efforts, and I will work with Mr. Claytor in this endeavor.

Mr. President, I ask Congress to reaffirm the view that Amtrak should remain a viable entity for its millions of passengers who depend on its existence. I urge my colleagues to support this resolution.

SENATE CONCURRENT RESOLUTION 116—COMMENDING POLAND

Mr. D'AMATO (for himself and Mr. DECONCINI) submitted the following concurrent resolution; which was referred to the Committee on Foreign Relations:

S. CON. RES. 116

Whereas the Soviet Union is allowing the largest outflow of Soviet Jews in modern history;

Whereas in the face of Arab pressure and threats of terrorist retaliation the Soviet Union has slowed negotiations with Israel on direct charter flights for Soviet Jews to Israel and Hungary temporarily terminated such flights; and

Whereas Poland has announced that it will allow charter flights to carry Soviet Jews to Israel: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That the Congress hereby commends Poland and Prime Minister Tadeusz Mazowiecki for their courageous and resolute stand in the face of terrorist intimidation.

● Mr. D'AMATO. Mr. President, I rise to introduce a concurrent resolution commending Poland and Prime Minister Tadeusz Mazowiecki for reaffirming the policy of allowing charter flights to carry Soviet Jews to Israel in the face of Arab and terrorist pressure.

Soviet Jewish emigration has reached peaks never before imagined possible. President Gorbachev has opened the floodgates. This policy, however, is his and his alone, and, as we are seeing in Lithuania, Gorbachev's high wire act is always subject to an unexpected fall.

More worrisome still, Gorbachev's policy of openness has reawakened nationalist impulses throughout the Communist bloc. One of the more deplorable pieces of baggage associated with this rise of nationalism is a parallel rise of anti-Semitism. Pamyat, the Russian nationalist group, has raised the spectre of pogroms.

The threats of Pamyat are being taken seriously. It is imperative that we take advantage of the opportunity President Gorbachev has provided, and see that everything be done to ease the flow of Soviet Jews out of the Soviet Union and to Israel. Unfortunately, a serious impediment has arisen that has given even the Soviets pause.

The Arab States, and, more ominously, various terrorist groups, concerned that the influx of Soviet Jews into Israel will help Israel to win the battle of demographics against the Palestinians have threatened retaliation against states that allow charter flights to carry Soviet Jews to Israel.

In reaction, the Soviet Union has slowed negotiations with Israel over such direct flights and Hungary temporarily halted them outright. Poland, however, undaunted by these threats, has reaffirmed its willingness to allow charter flights to carry Soviet Jewish refugees to Israel.

Mr. President, I think Poland deserves our highest praise for its steadfast position. Terrorist threats, as we learned most recently, and most horribly, over Lockerbie, Scotland, are not to be taken lightly. I offer this resolution in acknowledgment of the bravery of the Polish people.●

SENATE RESOLUTION 267—RELATIVE TO VACANCIES ON THE SOCIAL SECURITY BOARD OF TRUSTEES

Mr. MOYNIHAN (for himself, Mr. BENTSEN, Mr. BRADLEY, and Mr. HEINZ) submitted the following resolution; which was referred to the Committee on Finance:

S. RES. 267

SEC. 1. FINDINGS.—The Senate finds that—

(1) in the Social Security Amendments of 1983, Public Law 98-21, Congress made provision for two members of the public, one Democrat and one Republican, to serve on the Board of Trustees of the Federal Old-Age and Survivors Insurance and Disability Insurance Trust Funds for four-year terms;

(2) in September 1984 President Reagan nominated the first public trustees, and these nominees were confirmed by the Senate the same month. The statutory terms of the first public trustees expired in September 1988, and subsequent recess appointments by President Reagan of the same individuals to the same posts expired on November 22, 1989;

(3) President Bush has not so far nominated any individuals to fill the posts of public trustees, and the posts remain vacant;

(4) the Social Security Act requires the Social Security Board of Trustees to report to the Congress not later than the first day of April of each year on the operation and status of the trust funds; and

(5) April 1 has passed and the Board of Trustees has not submitted the required report on the status of the trust funds by the required due date.

SEC. 2. SENSE OF THE SENATE.—It is the sense of the Senate that the President should send to the Senate nominations for two public trustees to fill the current vacancies on the Social Security Board of Trustees, and upon confirmation such trustees should be afforded full participation in the preparation of this year's trustees report.

Mr. MOYNIHAN. Mr. President, I rise to submit a resolution to express the sense of the Senate that the President ought promptly send to the Senate nominations for the vacancies on the Social Security Board of Trustees. I am joined by Senators BENTSEN, BRADLEY, and HEINZ.

As you know, Mr. President, in the Social Security Amendments of 1983 Congress made provision for two members of the public, one Democrat and one Republican, to serve on the board of trustees of the Federal Old-Age and Survivors Insurance and Disability Insurance Trust Funds. The public trustees are nominated by the President and confirmed by the Senate for 4-year terms. The other trustees are the Secretaries of Treasury, Labor, and Health and Human Services, who serve ex officio.

In September 1984, President Reagan nominated the first public trustees, and the nominees were confirmed by the Senate the same month. Their statutory terms expired on September 28, 1988, and subsequent recess appointments of the same individuals expired at the end of the last session of Congress. The posts have been vacant since.

On June 13, 1989, Senator BENTSEN, the distinguished chairman of the Finance Committee, and I, as chairman of the Social Security Subcommittee, wrote President Bush to recommend that Dr. Alicia Munnell, senior vice president and director of research, Federal Reserve Bank of Boston, be nominated as the Democratic public trustee.

Mr. President, the statutory duty of the Board of Trustees is to hold the trust funds. But perhaps their most important specific task is to submit to the Congress an annual report on the status of the trust funds. Under the Social Security Act, the annual trustees report is to be submitted no later than April 1. It is now April 3 and there is as yet no report.

To be sure, the reports have been late before. But since 1984 the report has been prepared with the participation of public trustees, and this year it will not be. There are none.

Mr. President, the present situation is regrettable. I offer this resolution to draw attention to the matter in the hope that we may promptly put public trustees in place so that they may get on with the preparation and submission of the annual report.

I ask unanimous consent to include in the RECORD at the conclusion of my remarks a letter to President Bush from Lawrence T. Smedley of the National Council of Senior Citizens, urging the President to fill the vacancies on the Social Security Board of Trustees, and a copy of the letter that Senator BENTSEN and I wrote to the President last June on this subject.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

NATIONAL COUNCIL OF SENIOR CITIZENS,
Washington, DC, March 28, 1990.

The PRESIDENT,
The White House, Washington, DC.

DEAR MR. PRESIDENT: The National Council of Senior Citizens is quite concerned about the continuing vacancies of the two public trustee positions on the Old Age Survivors' Disability and Hospital Insurance Board of Trustees. For over a year now, no permanent appointment has existed for either the Republican or the Democratic slot. Currently, there is no nominee before the Senate Finance Committee.

It is our understanding that Senators Bentsen and Moynihan have suggested Alicia Munnell as the public member representing their party. Dr. Munnell is known to us at the National Council of Senior Citizens and we have the highest opinion of her. If another candidate of similar quality is not available, we see no reason to delay in submitting her nomination.

For us and millions of beneficiaries, the Social Security Board of Trustees is a serious matter. We find it unacceptable that vacancies continue for these positions. We hope, Mr. President, that you will act promptly on this matter.

Sincerely,

LAWRENCE T. SMEDLEY,
Executive Director.

U.S. SENATE,
COMMITTEE ON FINANCE,
Washington, DC, June 13, 1989.

Hon. GEORGE H.W. BUSH,
The White House, Washington, DC.

DEAR MR. PRESIDENT: We write to recommend Dr. Alicia Munnell, Senior Vice President and Director of Research, Federal Reserve Bank of Boston, for the post of Democratic public trustee of the Social Security Trust Funds.

As you may know, in the Social Security Amendments of 1983 (Public Law 98-21) Congress made provision for two members of the public, one Democrat and one Republican, to serve on the Board of Trustees of the Federal Old-Age and Survivors Insurance and Disability Insurance Trust Funds for four-year terms. The purpose was to increase citizen involvement and confidence in the Social Security system. The public trustees are nominated by the President and confirmed by the Senate. The other trustees are the Secretaries of Treasury (Managing Trustee), Labor, and Health and Human Services, who serve ex officio.

In 1984 President Reagan appointed Ms. Suzanne Denbo Jaffe, a Democrat, and Mrs. Mary Falvey Fuller, a Republican, to be the first public trustees. Their statutory terms expired last year, and they presently serve under recess appointments of January 3, 1989.

It is our hope that you will consider nominating Dr. Munnell this year to be the next Democratic public trustee of the Trust Funds. Dr. Munnell is particularly well qualified for this post by virtue of her exceptional knowledge of the budgetary, economic, and policy issues related to the accumulating Trust Fund reserves, a knowledge demonstrated in her many published writings in this area. We are including Dr. Munnell's resume for your reference.

Thank you for your consideration of our recommendation.

Sincerely,

LLOYD BENTSEN,
Chairman,
Committee on Finance.
DANIEL PATRICK MOYNIHAN,
Chairman,
Subcommittee on Social Security and Family Policy.

AMENDMENTS SUBMITTED

CLEAN AIR ACT AMENDMENTS

McCLURE (AND MURKOWSKI) AMENDMENT NO. 1438

Mr. McCLURE (for himself, Mr. MURKOWSKI, and Mr. MCCONNELL) proposed an amendment to amendment No. 1293 (in the nature of a substitute) proposed by Mr. MITCHELL (and others) to the bill (S. 1630) to amend the Clean Air Act to provide for attainment and maintenance of health protective national ambient air quality standards, and for other purposes, as follows:

(1)(A) on page 390, amend lines 6 through 19, to read as follows:

"(l) The term (1) 'clean coal technology' means any technology included on a list to be published not later than December 31, 1992, and amended from time to time, by the Administrator, with the concurrence of the Secretary of Energy. Such list shall include—

"(A) the following clean coal technologies: atmospheric or pressurized fluidized bed combusion, integrated gasification combined cycle, magnetohydrodynamics, direct and indirect coal-fired turbines, integrated gasification fuel cells, derivatives of one or more of these technologies, and any other technology capable of simultaneously reducing or removing emissions of sulfur oxides and oxides of nitrogen;

"(B) any oil and/or gas-fired utility unit which has been awarded clean coal technology demonstrations funding as of January 1, 1991, by the Secretary of Energy; and

"(C) any additional technologies, including precombustion, combustion or post-com-

bustion technologies, or any feedstocks derived therefrom which technology or feedstock provides improved performance relative to the performance of technology in widespread commercial use as of the date of enactment of the Clean Air Act Amendments of 1989, as determined by the Administrator, with the concurrence of the Secretary of Energy, based upon consideration of the following criteria: efficiency of energy consumption, number of pollutants controlled, effect on the derating of a boiler, reduction of volumes of by-product solid and other wastes, and differences in availability dates.

"(2) 'clean coal unit' means a utility unit that utilizes a clean coal technology.

"(3) 'retrofit' means, for purposes of section 409, to install a clean coal technology at an existing utility unit with equipment or facilities utilizing a clean coal technology. Such term includes replacement of all or part of an existing utility unit with equipment or facilities utilizing clean coal technology at the same site.

"(4) 'replace' or 'replacement' means, for the purposes of section 409, to retire an existing utility unit and replace such unit with a new clean coal unit at the same or a different site, but only if—

"(A) the new clean coal unit is designated under section 409(a) by the owner or operator of the existing utility unit as replacing such unit,

"(B) the existing unit will be retired from service on or before the date on which the designated new unit enters commercial service, [and]

"(C) the new unit is located in the same air quality region as the existing unit, and

"(D) any allowances otherwise available to the existing unit pursuant to section 409(c) shall be transferred to the designated replacement unit.".

(B) On page 444, line 10, after "SEC. 415." delete existing subsection (a) and redesignate subsections (b) through (e) as new subsections (a) through (d), respectively.

(2) on page 435, amend from lines 3 through page 437, line 20, to read as follows:

"RETROFIT AND REPLACEMENT

"SEC. 409. (a) AVAILABILITY.—Not later than December 31, 1997, the owner or operator of an existing unit subject to the requirement of section 405 may demonstrate to the permitting authority that one or more units will be retrofitted as a clean coal unit or replaced with a clean coal unit designated by the owner or operator of the existing unit, for the purposes of complying with the requirements under section 405. The owner or operator shall, as a part of any such demonstration, provide, not later than January 1, 2000, satisfactory documentation of a preliminary design and engineering effort for such retrofit or replacement and an executed contract for the majority of the equipment for such unit and such other information as the Administrator may require by regulation. If the owner or operator of an existing unit proposes to retrofit or replace such unit with a clean coal unit that uses a clean coal technology listed under section 402(l), and such proposed retrofit or replacement is incorporated in a compliance plan under section 408(b) and an approved permit under section 408(d), approval of such permit shall be deemed to satisfy the requirements of the first sentence of this subsection.

"(b) EXTENSION.—(1) An owner or operator satisfying the requirements of subsection (a) shall be granted an extension of the emission limitation requirement compliance date for the unit to be retrofitted or replaced from January 1, 2000, to December 31, 2003. The extension shall be specified in the permit issued to the source under section 408, together with any compliance schedule and other requirements necessary to meet second phase requirements by the extended date. Any unit that is granted an extension under this section shall not be eligible for a waiver under section 111(j) of this Act.

(2) If—

(A) the owner or operator of an existing unit has been granted an extension under paragraph (1) in order to retrofit or replace such unit with a clean coal unit, and

(B) such owner or operator thereafter satisfies the Administrator (i) that the clean coal technology to be utilized by such unit is economically or technologically infeasible, (ii) that by January 1, 2000, the owner or operator has demonstrated to the Administrator a good faith effort to achieve compliance with the requirements of subsection (a), and (iii) that such existing unit will be retrofitted or repowered with equipment or facilities utilizing another clean coal technology or other available control technology.

then such extension shall be available until no later than December 31, 2003.

"(3) Any retrofit or replacement unit or any unit qualifying under paragraph (2), which receives an extension until December 31, 2003, may elect to receive an additional two-year extension until December 31, 2005, provided that the allowances issued to that unit shall be reduced during such period after the unit is placed in service as the Administrator may prescribe (but not less than two years) by the excess of (A) the aggregate number of allowances which the unit received and used during the two-year period that the extension applied, over (B) the aggregate allowances to which the unit would have been entitled (but for the extension) under section 405.

"(c) ALLOWANCES.—(1) For the period of the extension under this section, the Administrator shall issue to the owner or operator of the affected unit, annual allowances for sulfur dioxide equal to the affected unit's baseline multiplied by the lesser of the unit's federally approved State Implementation Plan limitation or its actual emission rate for 1995. Such allowances may not be transferred or used by any other source to meet emission requirements under this title. In the case of any existing unit that is to be retrofitted as a clean coal unit, the source owner or operator shall notify the Administrator sixty days in advance of the date on which the affected unit for which the extension has been granted is to be removed from operation to install the clean coal technology.

"(2) Effective on that date, the source shall be subject to the requirements of section 405. Allowances for the year in which the source is removed from operation to install the clean coal technology shall be calculated by multiplying 1.20 lbs/mmBtu by the existing utility unit, divided by 2,000, and prorated accordingly, and are transferable.

"(3) Allowances for calendar years after the year the retrofit or replacement is complete shall be calculated by multiplying 1.20 lbs/Btu of sulfur dioxide by the existing utility unit's baseline divided by 2,000.

"(4) An owner or operator of an existing unit satisfying the requirements of subsection (a) while using petroleum coke as a fuel shall be eligible for the same regulatory incentives under section 415(b)(1) as a qualifying clean coal technology.

"(5) Allowances issued to a replacement unit described in section 402(1)(4) shall be reduced during such period after the replacement unit is placed in service as the Administrator may prescribe (but not less than four years) by an amount equal to the excess of (A) the aggregate number of allowances issued under paragraph (1) and used by the existing unit during the extension period provided under subsection (b) over (B) the aggregate allowances to which the existing unit would have been entitled (but for this section) under section 405 during the calendar years that paragraph (1) applied.

"(d) CONTROL REQUIREMENTS.—Any source qualifying for an extension under this section that does not increase actual hourly emissions for any pollutant listed as a criteria pollutant under section 108 of the Act shall not be subject to the requirements of parts C and D of this Act for that pollutant.

"(e) EXPEDITED PERMITTING.—State permitting authorities and, where applicable, the Administrator, are encouraged to give expedited consideration to permit applications under parts C and D for any source qualifying for an extension under this section, that will increase its actual emissions as specified in section 409(d)."

"(g) APPLICABILITY OF NEW SOURCE REQUIREMENTS.—No existing utility unit or source subject to this title shall be subject to any standard under section 111(b) or be required to obtain a permit under sections 165 or 173 as a result of any physical or operational change that occurs at such unit or source after the date of enactment of this title provided that any such change in the unit's or source's physical and operational design does not increase the maximum potential capacity of the unit or source to emit criteria air pollutants under its physical and operational design.".

(3) on page 447, modify lines 12 through 14, to read as follows: "pollutant listed as a criteria pollutant under section 108 of the Act, except that the potential post-repowering emissions from that pollutant do not exceed the potential pre-repowering emissions for that pollutant as a result of the demonstration project.".

SYMMS (AND HELMS) AMENDMENT NO. 1439

Mr. SYMMS (for himself and Mr. HELMS) proposed an amendment to amendment No. 1293 (in the nature of a substitute) proposed by Mr. MITCHELL (and others) to the bill (S. 1630), supra, as follows:

At the appropriate place in amendment No. —, insert the following:

COMMUNITY INVOLVEMENT IN CLOSING DECISIONS

Section 112 of the Clean Air Act, as amended by this Act, is further amended by adding at the end thereof the following new section:

"SEC. . COMMUNITY INVOLVEMENT IN CLOSING DECISIONS.—No plant, facility, or source shall be required to cease operations, nor shall be put in jeopardy of ceasing operations because of action taken with respect to its permits, fees, or fines, as a result of exceeding the standards issued pursuant to subsection (f) of this section, unless and until such time as a question shall have been placed in referendum before the com-

munity exposed to the risks which exceed the standard, and at least 50 percent respond in the negative. Prior to the issuance of any standard pursuant to subsection (f), the Administrator shall, by rulemaking, determine the appropriate methodology for conducting such referenda. The question placed before the exposed population shall be worded as follows:

Question: Shall (name of plant, facility, or source) remain in operation notwithstanding the fact that the U.S. Environmental Protection Agency has projected the possibility that an individual born and standing on the fenceline of this (plant, facility, or source) for 70 years may be subject to a lifetime cancer risk of greater than [1 in 10,000 or 1 in 1,000,000].

Even should less than 50 percent respond in the negative, no plant, facility or source may increase its emission of the substance or substances whose risk was the subject of referendum beyond the level emitted at the time the question was placed in referendum. Should a standard issued under subsection (f) be based on an exposure other than 70 years at the fenceline, the question posed may be modified to reflect the actual exposure assumption used.

JEFFORDS AMENDMENT NO. 1440

Mr. JEFFORDS proposed an amendment to amendment No. 1293 (in the nature of a substitute) proposed by Mr. MITCHELL (and others) to the bill (S. 1630), supra, as follows:

On page 319, after line 10, insert the following new section:

"CHEMICAL PROCESS SAFETY MANAGEMENT

"SEC. 303. (a) The Secretary of Labor shall act under the Occupational Safety and Health Act of 1970 (29 U.S.C. 653) to prevent accidental releases of chemicals which could pose a threat to employees. Not later than twelve months after the date of enactment of this section, the Secretary of Labor, in coordination with the Administrator, shall promulgate, pursuant to the Occupational Safety and Health Act, a chemical process safety standard designed to protect employees from hazards associated with accidental releases of highway hazardous chemicals in the workplace.

"(b) The Secretary shall include as part of such standard a list of highly hazardous chemicals, which include toxic, flammable, highly reactive and explosive substances. The list of such chemicals may include those chemicals listed by the Administrator under section 302 of the Emergency Planning and Community Right to Know Act of 1986, Title III of the Superfund Amendments and Reauthorization Act [SARA]. The Secretary may make additions to such list when a substance is found to pose a threat of serious injury or fatality in the event of an accidental release in the workplace.

"(c) Such standard shall, at minimum, require employers to:

"(1) develop and maintain written safety information identifying, workplace chemical and process hazards, equipment used in the processes, and, technology used in the processes;

"(2) perform a workplace hazard assessment, including, as appropriate, identification of potential sources of accidental releases, an identification of any previous release within the facility which had a likely potential for catastrophic consequences in the workplace, estimation of the workplace effects of a range of releases, estimation of the health and safety effects of such a range on employees;

"(3) consult with workers and their representatives on the development and conduct of hazard assessments and the development of chemical accident prevention plans and provide access to these and other records required under the standard;

"(4) establish a system to respond to the workplace hazard assessment findings, which shall address prevention, mitigation and emergency responses;

"(5) periodically review the workplace hazard assessment and response system;

"(6) develop and implement written operating procedures for the chemical process including procedures for each operating phase, operating limitations, and safety and health considerations;

"(7) provide written safety and operating information to employees and train employees in operating procedures, emphasizing hazards and safe practices;

"(8) ensure contractors and contract employees are provided appropriate information and training;

"(9) train and educate employees and contractors in emergency response in a manner as comprehensive and effective as that required by the regulation promulgated pursuant to section 126(b) of SARA;

"(10) establish a quality assurance program to ensure that initial process related equipment, maintenance materials, and spare parts are fabricated and installed consistent with design specifications;

"(11) establish maintenance systems for critical process related equipment including written procedures, employee training, appropriate inspections, and testing of such equipment to ensure ongoing mechanical integrity;

"(12) conduct pre-start-up safety reviews of all newly installed or modified equipment;

"(13) establish and implement written procedures to manage change to process chemicals, technology, equipment and facilities; and,

"(14) investigate every incident which results in or could have resulted in a major accident in the workplace, with any findings to be reviewed by operating personnel and modifications made if appropriate.

"(d) Nothing in this section may be construed to diminish the authority of the States and political subdivisions thereof as described in section 304(k).".

On page 325, line 17, after "section" insert the following: ", including a review of the standard required under section 303 of the Clean Air Act Amendments of 1989,".

On page 334, after line 17, insert the following new sentence: "Whenever the Administrator or the Board conducts an inspection of a facility pursuant to this section, workers and their representatives shall have the same rights to participate in such inspections as provided for in the Occupational Safety and Health Act.".

On page 330, beginning at line 17, strike paragraph (6) and insert the following in lieu thereof:

"(6) The Board shall coordinate its activities under paragraph (5) with investigations and studies conducted by other agencies of the United States having a responsibility to protect public health and safety. The Board shall enter into a memorandum of understanding with the National Transportation Safety Board to assure coordination of functions and to limit duplication of activities which shall designate the National Transportation Safety Board as the lead agency for the investigation of releases which are transportation related. The Board shall enter into a memorandum of understanding with the Occupational Safety and Health Administration so as to limit duplication of activities. In no event shall the Board forego an investigation where a sudden, accidental release involvin the production, processing, handling, or storage of a chemical substance causes a fatality or serious injury among the general public, or had the potential to cause substantial property damage or a number of deaths or injuries among the general public.".

On page 333, after line 16 insert the following new paragraph and redesignate the succeeding paragraphs accordingly:

"(11) The Board may make recommendations with respect to the safety of chemical production, processing, handling, and storage to the Secretary of Labor. Whenever the Board submits such recommendation, the Secretary shall respond to such recommendation formally and in writing not later than one hundred and eighty days after receipt thereof. The response to the Board's recommendation shall indicate whether the Secretary will—

"(A) initiate rulemaking or issue such orders as are necessary to implement the recommendation in full or in part, pursuant to any timetable contained in the recommendation;

"(B) decline to initiate a rulemaking or issue orders as recommended.

Any determination by the Secretary not to implement a recommendation, or to implement a recommendation only in part, including any variation from the schedule contained in the recommendation, shall be accompanied by a statement from the Secretary setting forth the reasons for such determination.".

METZENBAUM AMENDMENT NO. 1441

Mr. BAUCUS (for Mr. METZENBAUM) proposed an amendment to amendment No. 1293 (in the nature of a substitute) proposed by Mr. MITCHELL (and others) to the bill S. 1630, supra, as follows:

Insert new section 403(1) as follows:

"Sec. 403(1) Applicability of the antitrust laws.

"(1) Nothing in this section affects

"(a) the applicability of the antitrust laws to the transfer, use or sale of allowances, or

"(b) the authority of the Federal Energy Regulatory Commission under any provision of law respecting unfair methods of competition or anticompetitive acts or practices.

"(2) As used in this section, "antitrust laws" means those Acts set forth in section 1 of the Clayton Act (15 U.S.C. 12), as amended.".

DOLE (AND OTHERS) AMENDMENT NO. 1442

Mr. DOLE (for himself, Mr. NICKLES, Mr. SYMMS, Mr. HELMS, Mr. SHELBY, Mr. COCHRAN, Mr. THURMOND, Mr. BOSCHWITZ, Mr. INOUYE, Mr. HEFLIN, Mr. BURNS, Mr. BOREN, Mr. BOND, Mr. MCCONNELL, and Mr. PRYOR) proposed an amendment to amendment No. 1293 (in the nature of a substitute) proposed by Mr. MITCHELL (and

others) to the bill S. 1630, supra, as follows:

On page 318, after line 24, add the following new subsection:

"(x) HEALTH AND ENVIRONMENTAL EFFECTS OF PESTICIDE USE.—

"(1) The authorities of this section shall not be available for the purpose of protecting public health or the environment from adverse effects which may result from the use of a pesticide in a commercial agricultural operation where such use is regulated pursuant to the authority of the Federal Insecticide, Fungicide and Rodenticide Act.

"(2) For purposes of this subsection, the term commercial agricultural operation means any activity conducted for the production of one or more agricultural products or commodities and customarily producing such products or commodities in sufficient quantity to be capable of contributing materially to the operator's support.".

JOHNSTON AMENDMENT NO. 1443

Mr. JOHNSTON proposed an amendment to amendment No. 1293 (in the nature of a substitute) proposed by Mr. MITCHELL (and others) to the bill S. 1630, supra, as follows:

On page 446, beginning on line 3, strike the entirety of subsection (d) through line 2 on page 449.

On page 449, line 3, redesignate subsection (e) as new subsection (d).

On page 449, following line 19, insert the following new section 416:

"APPLICABILITY OF NEW SOURCE REQUIREMENTS

SEC. 416. No existing utility unit subject to this title shall be subject to any standard under section 111(b) or be required to obtain a permit under section 165 or section 173 as a result of any physical or operational change that occurs at such unit after the date of enactment of this title provided that any such change does not: (a) increase the maximum hourly emissions of any criteria air pollutant, based on the most recent 10 years of operations; (b) cause or exacerbate the exceedence of any national ambient air quality standard promulgated pursuant to section 109; or (c) cause the exceedence of any PSD increment or visibility protection limitation promulgated pursuant to part C."

TRADE AND COMPETITIVENESS ACT

BENTSEN (AND PACKWOOD) AMENDMENT NO. 1444

(Ordered to lie on the table.)

Mr. BENTSEN (for himself and Mr. PACKWOOD) submitted an amendment intended to be proposed by them to the bill (H.R. 1594) to extend nondiscriminatory treatment to the products of the People's Republic of Hungary for 3 years, as follows:

On page 106, after line 3, insert:

SEC. . OTHER TECHNICAL AND MISCELLANEOUS PROVISIONS.

(a) AMENDMENTS TO SECTION 337 OF THE TARIFF ACT OF 1930.—

(1) Subsection (e) of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337(e)) is amended by adding at the end thereof the following new paragraph:

"(4) The proceeds from the forfeiture of any bond posted under paragraph (1) or (2) shall be deposited into the general fund of the Treasury of the United States."

(2) Paragraph (1) of section 337(g) of the Tariff Act of 1930 (19 U.S.C. 1337(g)(1)) is amended by adding at the end thereof the following new sentence: "The Commission may delay issuing an exclusion or a cease or desist order under this paragraph until the completion of all (or a portion of) the investigation with respect to the complaint if the Commission determines such delay is appropriate."

(3) Subparagraph (C) of section 337(g)(1) of the Tariff Act of 1930 (19 U.S.C. 1337(g)(1)(C)) is amended—

(A) by striking "or otherwise" before "fails to appear", and inserting a comma; and

(B) by isnerting before the semicolon ", or otherwise substantially fails to meet the requirements for participation in the investigation".

(4) Section 337(n) of the Tariff Act of 1930 (19 U.S.C. 1337(n)) is amended by adding at the end thereof the following new paragraph:

"(3) Any correspondence, private letters of reprimand, and other documents and files relating to violations or possible violations of administrative protection orders issued by the Commission in connection with investigations or other proceedings under this section shall be treated as information described in section 552(b)(3) of title 5, United States Code."

(5) The amendments made by this subsection shall take effect on the date of the enactment of this Act.

(b) AMENDMENTS TO SECTION 777 OF THE TARIFF ACT OF 1930.—

(1) Subparagraph (A) of section 777(c)(1) of the Tariff Act of 1930 (19 U.S.C. 1677f(c)(1)(A)) is amended by inserting "customer names," after "classified information".

(2) Section 777 of the Tariff Act of 1930 (19 U.S.C. 1677f) is amended by adding at the end thereof the following new subsection:

"(g) INFORMATION RELATING TO VIOLATIONS OF PROTECTIVE ORDERS AND SANCTIONS.—The administering authority and the Commission may withhold from disclosure any correspondence, private letters of reprimand, settlement agreements, and documents and files compiled in relation to investigations and actions involving a violation or possible violation of a protective order issued under subsection (c) or (d), and such information shall be treated as information described in section 552(b)(3) of title 5, United States Code."

(3) The amendments made by this subsection shall take effect on the date of the enactment of this Act.

(c) AMENDMENTS TO THE UNITED STATES-CANADA FREE-TRADE AGREEMENT IMPLEMENTATION ACT OF 1988.—

(1) Section 313(n) of the Tariff Act of 1930 (19 U.S.C. 1313(n)) is amended—

(A) by inserting ", except an article" before "made from or substituted for", and

(B) by striking "of 1988" the second place it appears and inserting a comma.

(2) Section 313(o) of the Tariff Act of 1930 (19 U.S.C. 1313(o)) is amended by adding at the end thereof the following new sentence: "This subsection shall apply to vessels delivered to Canadian account or owner, or to the Government of Canada, on and after January 1, 1994."

(3) U.S. Note 1 to subchapter XIII of chapter 98 of the Hrmonized Tariff Schedule of the United States (19 U.S.C. 3007) is amended by adding at the end thereof the following new paragraph:

"(c) For purposes of this subchapter, the shipment to Canada on or after January 1, 1994, of an article entered into the United States under heading 9813.00.05 shall not constitute an exportation, unless the article is a drawback eligible good under section 204(a) of the United States-Canada Free-Trade Agreement Implementation Act of 1988."

(4) Section 516A of the Tariff Act of 1930 (19 U.S.C. 1516a) is amended—

(A) in subsection (a)(5)—

(i) by striking subparagraph (A) and inserting:

"(A) the date of notice of any determination described in paragraph (1)(B) or a determination described in clause (i), (ii), or (iii) of paragraph (2)(B),", and

(ii) by striking out the period at the end of subparagraph (B) and inserting ", or", and by adding at the end thereof the following new subparagraph:

"(C) the date as of which a binational panel has dismissed the binational panel review for lack of jurisdiction and any interested party seeking review under paragraph (1) has provided timely notice under subsection (g)(3)(B),"; and

(B) in subsection (g)(3)—

(i) by striking "or" at the end of subparagraph (A)(ii), by striking the period at the end of subparagraph (A)(iii) and inserting ", or", and by adding at the end of subparagraph (A) the following new clause:

"(iv) a determination which a binational panel has determined under paragraph (2)(A) is not reviewable.", and

(ii) by inserting "or (IV)" after "subparagraph (A)(i)" in subparagraph (B).

(5) Section 777(d) of the Tariff Act of 1930 (19 U.S.C. 1677f(d)), as added by section 501(a) of the United States-Canada Free-Trade Agreement Implementation Act of 1988, is amended—

(A) in paragraph (1)(A), by striking "(but not privileged material as defined by the rules of procedure referred to in article 1904(14) of the United States-Canada Agreement)", and by adding at the end thereof the following new sentence: "If the administering authority or the Commission claims a privilege as to a document or portion of a document in the administrative record of the proceeding in question and a binational panel finds that in camera inspection or limited disclosure of that document or portion thereof is required by United States law, the administering authority or the Commission, as appropriate, may restrict access to such document or portion thereof to the authorized persons identified by the panel as requiring access and may require such persons to obtain access under a protective order described in paragraph (2).";

(B) in paragraph (1)(B)—

(i) by inserting ", and persons under the direction and control," after "employees" in cause (ii),

(ii) by striking "and" at the end of clause (ii),

(iii) by striking all after "in order to" in clause (iii) and inserting "make recomendations to the Trade Representative regarding the convening of extraordinary challenge committees under chapter 19 of the Agreement, and"; and

(iv) by adding at the end thereof the following new clause:

"(iv) any officer or employee of the government of Canada designated by an authorized agency of Canada to whom disclo-

sure is necessary in order to make decisions regarding the convening of extraordinary challenge committees under chapter 19 of the Agreement.";

(C) in paragraph (3)—

(i) by striking "or" after "violate," each place it appears, and

(ii) by inserting "or knowingly to receive information the receipt of which constitutes a violation of," after "violation of," each place it appears; and

(D) in paragraph (4)—

(i) by striking "or" after "for violation,", and

(ii) by inserting "or receipt of information with reason to know that such information was disclosed in violation of," after "violation of,".

(6) Section 406(b) of the United States-Canada Free-Trade Agreement Implementation Act of 1988 (19 U.S.C. 2112 note) is amended by adding at the end thereof the following new paragraph:

"(4) If the Canadian Secretariat described in chapter 19 of the Agreement provides funds during any fiscal year for the purpose of paying, in accordance with Annex 1901.2 of the Agreement, the Canadian share of the expenses of binational panels, the United States Secretariat established under section 405(e)(1) may hereafter retain and use such funds for such purposes."

(7) Section 408(c) of the United States-Canada Free-Trade Agreement Implementation Act of 1988 (19 U.S.C. 2112 note) is amended by striking all after "persons" and inserting "who would otherwise be entitled under Canadian law to commence procedures for judicial review of a final antidumping or countervailing duty determination made by a competent investigating authority of Canada."

(8) Section 409(b)(3)(A) of the United States-Canada Free-Trade Agreement Implementation Act of 1988 (19 U.S.C. 2112 note) is amended by striking "section 305" and inserting "section 308".

● Mr. BENTSEN. Mr. President, I am today submitting an amendment on behalf of myself and Senator PACKWOOD that we may propose as an amendment to H.R. 1594, a bill to make miscellaneous and technical changes to various trade laws. The administration has asked the Congress to consider certain technical amendments to the United States-Canada Free-Trade Agreement Implementation Act of 1988. Similarly, the International Trade Commission has asked the Congress to consider certain amendments to sections 337 and 777 of the Tariff Act of 1930. The amendments being proposed by the International Trade Commission arise as a result of amendments made by the Omnibus Trade and Competitiveness Act of 1988.

The purpose of submitting these amendments today is provide an opportunity for interested persons to review and comment on the proposed amendments prior to the consideration of H.R. 1594 by the Senate. It would be my intention to offer these amendments unless they prove controversial.

Mr. President, I am including with this statement a summary of the amendments, and I ask unaimous consent that the summary be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

PROPOSED AMENDMENTS TO TRADE AND COMPETITIVENESS ACT OF 1988

AMENDMENTS TO SECTION 337 OF TARIFF ACT OF 1930

The Act provides for the first time that complainants post a bond as a prerequisite to temporary relief. The Conference Report provides that a forfeited bond go to the Treasury. The proposed amendment of subsection 337(e)(2) places this requirement in the statute.

The Commission has customarily issued default orders in section 337 cases. The Act provided explicit statutory authority for this practice. The proposed amendment of subsection 337(g)(1) endorses the Commission's long-standing practice of delaying default remedial orders, when appropriate, until the end of the investigation. This avoids the risk that orders will be issued on invalid or unenforceable rights and burdensome seriatim review of remedial orders by the President.

In providing explicit authority for default orders in subsection 337(g)1, the Act may have limited authority to issue such orders to cases in which the respondent fails to appear or answer the Complaint. The proposed amendment would endorse the Commission's practice of issuing default orders in cases in which the respondent otherwise fails to participate in an investigation in any substantial way.

The Commission is obligated by subsection 337(n) to protect confidential information developed in these investigations. Among the sanctions the Commission may issue for violation of a protective order is a private letter of reprimand. This proposed amendment, which parallels a proposed amendment to subsection 777 of Title VII, permits the Commission to withhold from inquiries under the Freedom of Information Act (FOIA) files of investigations of violations of protective orders to assure that private sanctions remain private.

PROPOSED AMENDMENTS TO TITLE VII OF THE TARIFF ACT OF 1930

The Act amended subsection 777 of Title VII to provide release of all confidential information under administrative protective order (APO). The disclosure of customer lists has impaired Commission investigations because counsel have contacted customers to influence their responses to agency requests for information. The CIT has held that disclosure is for the purpose of effective advocacy and not to empower counsel to act as independent investigators. *SNR Roulements* v. *United States*, 13 CIT . 704 F. Supp. 1103, 1109 (1989). Therefore, this amendment would permit the Commission to withhold customer names to assure unbiased responses to agency inquiries.

The Commission is obligated to protect information released under APO by a system of sanctions for violations. Among the sanctions available to the Commission are private letters of reprimand. Without the ability to protect the records of private reprimands, this sanction would be unavailable. In order to assure that private sanctions remain private, the Commission and Commerce must be able to withhold from Freedom of Information Act (FOIA) inquires, the records of investigations of APO violations. Amended subsection 777(g) would provide this authority.

TECHNICAL AMENDMENTS TO DUTY DRAWBACK UNDER THE U.S.-CANADA FREE-TRADE AGREEMENT

FTA PROVISION

With certain exceptions, the U.S.-Canadian Free Trade Agreement (FTA) eliminates duty drawback for bilateral trade as of January 1, 1994 (or later if jointly agreed). Duty drawback provides for the return of duties on imports when they are substituted or incorporated into a good subsequently exported. Continuation of duty drawback between the United States and Canada would allow imports from third countries to benefit from the elimination of the tariffs under the FTA. Under the FTA, drawback would continue for specified drawback eligible goods including:

Citrus products;

Apparel made from third-country fabric and subject to MFN tariffs;

Other specified products if jointly agreed by the United States and Canada; and

Goods that are subsequently re-exported unaltered (and thus subject to MFN tariff in the consuming country).

TECHNICAL LEGISLATIVE CHANGES

The first technical change would re-insert in the U.S. implementing act the phrase "except an article" so that drawback could continue after January 1, 1994, for the drawback eligible products specified in the FTA. The exclusion of those words would (1) prohibit drawback for the products that should remain eligible for drawback and (2) continue drawback for all other products. Without amendment, the United States would implement on January 1, 1994, the reverse of what was intended by the FTA.

The second technical amendment inserts the date on which drawback will be prohibited for ships containing parts imported from third countries. The FTA implementing act banned immediately duty drawback for these products when traded between the United States and Canada. The technical amendment delays the ban until January 1, 1994, as intended.

The third technical amendment corrects an omission in the FTA implementing act. It provides that third-country goods temporarily imported into the United States under bond must pay U.S. duty if incorporated or substituted for goods subsequently exported to Canada after January 1, 1994.

SUMMARY OF PROPOSED AMENDMENTS TO TITLE IV OF THE U.S.-CANADA FREE-TRADE AGREEMENT IMPLEMENTATION ACT

Title IV of the United States-Canada Free-Trade Agreement Implementing Act (the Act) implements Chapter 19 of the Free Trade Agreement (FTA). Twelve specific amendments, addressing nine issues, are being proposed to title IV.

1. The first amendment would resolve an inconsistency between the FTA and the Act. Currently, the FTA requires a request for binational panel review to be filed within 30 days after a final determination, while the Act requires such a request to be filed within 30 days after an antidumping or countervailing duty order. The amendment would alter the deadline for filing a request for panel review to conform to the time limits in the FTA.

2. The second group of amendments would permit an interested party that had timely indicated its preference for review by a domestic court to obtain court review if the binational panel finds that it lacks jurisdiction because some other party, which had

requested panel review, lacked standing. This group of amendments provides time limits for filing a summons and complaint in the appropriate court.

3. An amendment would permit release of privileged information in an administrative record, but only under tightly controlled procedures that would limit release and use of such information to the same types of circumstances under which it would be released and used in a judicial proceeding.

4. The next amendment would permit release of business proprietary information in an administrative record to independent consultants under the direction or control of counsel. This mirrors the access available in court proceedings.

5. A proposed amendment would permit release of business proprietary information to Canadian government officials, to the same extent and for the same purposes as such information would be released to United States government officials.

6. The amendment would extend the reach of sanctions to reach violations of protective orders that would be subject to sanction in administrative proceedings.

7. The FTA provides that the U.S. and Canadian sections of the binational Secretariat are to share costs. An amendment would allow the U.S. Secretary to retain funds received from the Canadian Secretary to defray Canada's share of expenses incurred. Under current law, the U.S. Secretary must transfer all funds received to the U.S. Treasury.

8. The last two amendments are purely technical. One refers to an erroneous description of persons to be served and the other identifies an incorrect citation.

9. In addition, we have orally alerted the Senate Finance Committee to the fact that the Tariff Act of 1930 contains two sections designated as 777(d). This duplication resulted when the Act and another bill were enacted in the same year.●

CLEAN AIR ACT AMENDMENTS

DOLE (AND OTHERS) AMENDMENT NO. 1445

Mr. DOLE (for himself, Mr. DURENBERGER, Mr. SHELBY, Mr. COCHRAN, Mr. CHAFEE, Mr. MACK, Mr. GRAHAM, Mr. BURDICK, Mr. BAUCUS, Mr. WARNER, Mr. BUMPERS, Mr. DIXON, Mr. BOREN, Mr. GRASSLEY, and Mr. PRESSLER) proposed an amendment to amendment No. 1293 (in the nature of a substitute) proposed by Mr. MITCHELL (and others) to the bill S. 1630, supra, as follows:

On page 343, beginning at line 22, strike all through line 14 on page 385 and insert in lieu thereof the following:

"SEC. 130. (a) NEW SOURCE PERFORMANCE STANDARDS.—

"(1)(A) The Administrator shall establish performance standards and other requirements pursuant to section 111 and this section for each category of solid waste incineration units. Such standards shall include emissions limitations and other requirements applicable to new units and guidelines (under section 111(d) and this section) and other requirements applicable to existing units.

"(B) Standards under section 111 and this section applicable to solid waste incineration units combusting municipal waste with capacity greater than 250 tons per day shall be promulgated not later than six months after the date of enactment of this section.

"(C) Standards under section 111 and this section applicable to solid waste incineration units with capacity equal to or less then 250 tons per day combusting municipal waste or units combusting hospital waste, medical waste and infectious waste shall be promulgated not later than twenty-four months after the date of enactment of this section.

"(D) Standards under section 111 and this section applicable to solid waste incineration units combusting commercial or industrial waste shall be proposed not later than thirty-six months after the date of enactment of this section and promulgated not later than forty-eight months after the date of enactment of this section.

"(E) Not later than eighteen months after the date of enactment of this section, the Administrator shall publish a schedule for the promulgation of standards under section 111 and this section applicable to other categories of solid waste incineration units.

"(2) Standards applicable to solid waste incineration units promulgated under section 111 and this section shall reflect the greatest degree of emission reduction achievable through application of the best available control technologies and practices which the Administrator determines at the time of promulgation (or revision, in the case of a revision of a standard)—

"(A) has been achieved in practice by a solid waste incineration unit in the same category, excluding periods of malfunctioning or misoperation, or

"(B) is contained in a State or local regulation or any permit for solid waste incineration units in the category, and will be implemented at such units,

whichever is more stringent, unless the Administrator determines that such degree of emissions limitation will not be achievable by units to which the standards apply or was adopted for reasons that are not nationally applicable or is otherwise not appropriate as a nationally applicable standard. In determining the emissions limitation to be required under section 111 and pursuant to this subsection, the Administrator shall take into account the performance of all units which achieve, in whole or in part, emissions limitations more stringent than current standards and may subsequently exclude units from consideration only to the extent provided in this subparagraph. The Administrator shall distinguish among classes, types (including mass-burn, refuse-derived fuel, modular and other types of units), and sizes of units within a category in establishing such standards. Emissions limitations and other requirements applicable to existing units may be less stringent than such limitations and requirements applicable to new units.

"(3) Standards under section 111 and this section applicable to solid waste incineration units shall be based on methods and technologies for removal or destruction of pollutants before, during, or after combustion, and shall incorporate siting requirements that minimize, on a site-specific basis, to the maximum extent practicable, potential risks to human health or the environment.

"(5) The performance standards promulgated under section 111 and this section and applicable to solid waste incineration units shall specify opacity (as appropriate) numerical emission limitations for the following substances or mixtures: particulate matter (total and fine), sulfur dioxide, hydrogen chloride, oxides of nitrogen, carbon monoxide, lead, cadmium, mercury, and dioxins and dibenzofurans. The Administrator may promulgate numerical emissions limitations or provide for the monitoring of post combustion concentration of surrogate substances, parameters or periods of residence time in excess of stated temperatures with respect to pollutants other than those listed in this paragraph.

"(6) Not later than five years following the initial promulgation of any performance standards and other requirements under this section and section 111 applicable to a category of solid waste incineration units, and at five year intervals thereafter, the Administrator shall review, and in accordance with this section and section 111, revise such standards and requirements.

"(b) EXISTING UNITS.—

"(1) Performance standards under this section and section 111 for solid waste incineration units shall include guidelines promulgated pursuant to section 111(d) and this section applicable to existing units. Such guidelines shall include as provided in this section each of the elements required by subsection (a) (emissions limitations), subsection (c) (monitoring), subsection (d) (source separation, recycling and ash management), subsection (e) (operator training) and subsection (f) (permits) of this section.

"(2) Not later than one year after the Administrator promulgates guidelines for a category of solid waste incineration units, each State in which units in the category are operating shall submit to the Administrator a plan to implement and enforce the guidelines with respect to such units. The State plan shall be at least as protective as the guidelines promulgated by the Administrator and shall provide that each unit subject to the guidelines shall be in compliance with all requirements of this section not later than three years after the State plan is approved by the Administrator but not later than five years after the guidelines were promulgated. The Administrator shall approve or disapprove any State plan within 180 days of the submission, and if a plan is disapproved, the Administrator shall state the reasons for disapproval in writing. Any State may modify and resubmit a plan which has been disapproved by the Administrator.

"(3) The Administrator shall develop, implement and enforce a plan for existing solid waste incineration units within any category located in any State which has not submitted an approvable plan under this subsection with respect to units in such category within two years after the date on which the Administrator promulgated the relevant guidelines. Such plan shall assure that each unit subject to the plan is in compliance with all provisions of the guidelines not later than five years after the date the relevant guidelines were promulgated.

(b)(4) Publicly owned existing municipal waste incinerators which are permtted by a state agency responsible for the protection from contamination of the water resource of the state and for the enforcement of a coordinated statewide solid waste management program designed to achieve a 30 percent reduction by the end of 1994 of municipal solid waste prior to final disposal or incineration, and which, after recycling, utilize resource recovery for at least 75 percent of their solid waste management disposal technology for their solid waste flow control area, and for which either of the following

applies: (A) a health risk assessment completed prior to the effective date of enactment of this section in accordance with state regulatory guidelines has concluded that the associated health risk is negligible; or (B) a retrofit of acid gas scrubbing or baghouse particulate control systems would cause diversion of refuse to a landfill where the municipal waste incinerator does not control tipping fees or accessibility, shall be deemed to be in compliance with paragraph (2)(C) and (D), when such incinerators are equipped with a dry sorbent injection system which is installed and operated in accordance with guidelines published by the Administrator.

The Administrator shall promulgate a schedule for compliance with the standards required by this subsection. In no event shall such schedule provide for compliance with such standards later than the date six years after the enactment of this section.".

"(c) MONITORING.—The Administrator shall, as part of each performance standards promulgated pursuant to subsection (a) and section 111, promulgate regulations requiring the owner or operator of each solid waste incineration unit—

"(1) to monitor emissions from the unit at the point at which such emissions are emitted into the ambient air (or within the stack, combustion chamber or pollution control equipment, as appropriate) and at such other points as necessary to protect human health and the environment;

"(2) to monitor such other parameters relating to the operation of the unit and its pollution control technology as the Administrator determines are appropriate; and

"(3) to report the results of such monitoring.

Such regulations shall contain provisions regarding the frequency of monitoring, test methods and procedures validated on solid waste incineration units, and the form and frequency of reports containing the results of monitoring and shall require that any monitoring reports or test results indicating an exceedance of any standard under this section shall be reported separately and in a manner that facilitates review for purposes of enforcement actions. Such regulations shall require that copies of the results of such monitoring be maintained on file at the facility concerned and that copies shall be made available for inspection and copying by interested members of the public during business hours.

"(d) SOURCE SEPARATION, RECYCLING AND ASH MANAGEMENT.—

"(1) As part of any performance standard or guidelines for solid waste incineration units combusting municipal waste promulgated pursuant to this section and section 111, the Administrator shall include regulations for recycling applicable to jurisdictions served by such units. Such regulations shall provide, beginning twelve months after promulgation of performance standards under subsection (a)(2), that no permit shall be issued under this Act to a solid waste incineration unit combusting municipal waste unless each of the jurisdictions served by the municipal waste incineration unit (as designated by the State in accordance with section 4006 of the Solid Waste Disposal Act) has been certified by the director of the solid waste program for the State in which the unit is to be located in compliance or subject to an enforceable schedule to be in compliance with all solid waste planning requirements under the Solid Waste Disposal Act with respect to planning and the director has approved a plan for each jurisdiction (enforceable pursuant to subsection (h) against the jurisdiction) which will achieve a municipal waste recycling rate of at least 25 per centum of the municipal waste (but not including construction waste) generated within the service area of the unit, (i) before such unit begins operation or four years after a permit is issued for the unit, whichever is later, if such unit is a new unit, and (ii) not later than five years after the date of enactment of this section if such unit is an existing unit. If the director determines that recycling at such rate is not economically feasible or that recycling capacity does not exist to achieve such rate, the director shall establish an alternative rate. Any determination under the preceding sentence shall be reviewed not less frequently than every two years. The director may provide additional time, but not to exceed five additional years, for jurisdictions served by an existing unit to achieve the recycling rate required by this subparagraph, provided that any such extension shall include annual milestones which demonstrate progress toward achieving the required rate. The Administrator (or a State with a program approved under subsection (g)) is authorized to use the authorities of section 113 to enforce the requirements established under this paragraph. Yard waste shall not be credited for more than 40 per centum of the recycled waste volume for purposes of the recycling requirement under this paragraph.

"(2)(A) At the time of promulgating any performance standard for a category of solid waste incineration units, the Administrator shall publish guidelines identifying items or materials that should be removed from municipal or solid waste to be combusted in such units, the removal of which has been demonstrated in the judgment of the Administrator to reduce the concentration of the pollutants identified in subsection (a)(5) over and above the concentration of such pollutants after treatment by the post-combustion technologies set forth in subsection (a) (3) and (4) (to the extent that standards for the category units are based on the availability of such technologies for units in the category).

"(B) Nothing in this section or section 4011 of the Solid Waste Disposal Act shall authorize the Administrator to prohibit or limit the mining, processing or manufacture of any product, article or substance for any purpose.

"(C) Regulations under this section shall require the operator of any solid waste incineration unit to establish contractual requirements or other appropriate notification and inspection procedures sufficient to assure that the unit does not receive any waste required to be placed in a facility permitted under section 3005 of the Solid Waste Disposal Act.

"(3) Except as provided in this subsection, the Administrator shall not require solid waste recycling or materials separation with regard to the waste combusted by a solid waste incineration unit pursuant to the authority under this Act. Nothing in this section shall diminish the authority of the Administrator to require recycling and materials separation under the Solid Waste Disposal Act.

"(4) Effective 12 months after the date of enactment of this section, the disposal or combustion of lead-acid batteries in solid waste incineration units is prohibited. The Administrator shall publish guidelines with respect to the management of discarded lead-acid batteries.

"(5)(A) Beginning twelve months after the date of enactment of this section, no permit may be issued under this Act to a solid waste incineration unit unless an ash management plan has been submitted for the ash from such unit. The application for each permit to be issued to a new or modified municipal waste incineration unit or renewal or issuance of a permit for an existing unit, shall include a reasonable demonstration of adequate capacity to treat, manage, or dispose of the ash produced by the unit for a period of not less than five years in compliance with the requirements of section 4011 of the Solid Waste Disposal Act. Demonstrations required by this paragraph shall be updated every five years as required by subsection (f).

"(B) The Administrator may promulgate regulations or issue guidelines for the implementation of this paragraph which shall provide that, to the extent practicable, demonstrations are based on the characteristics of ash from the solid waste incineration unit as determined by testing methods prescribed pursuant to section 4011 of the Solid Waste Disposal Act. The initial demonstration required for new or modified solid waste incineration units under this paragraph shall be based on the characteristics of the ash from units of comparable design (including pollution control equipment and ash treatment systems) combusting similar waste streams.

"(C) Notwithstanding any other provision of this Act or the Solid Waste Disposal Act, no person may operate a solid waste incineration unit unless adquate capacity is available to treat, manage or dispose of the ash produced by the unit in compliance with section 4011 of the Solid Waste Disposal Act.

"(e) OPERATOR TRAINING.—Not later than twenty-four months after the enactment of this section, the Administrator shall develop and promote a model State program for the training of solid waste incineration unit operators. The Administrator may authorize any State or privateentity, to implement a State program for the training of solid waste incineration unit operators if the State or private entity has adopted a program which is at least as effective as the model program developed by the Administrator. Beginning on the date thirty-six months after the date on which performance standards and guidelines are promulgated under subsection (a) and section 111 for any category of solid waste incineration units it shall be unlawful to operate any unit in the category unless each person with control over processes affecting emissions from such unit has satisfactorily completed a training program meeting the requirements established by the Administrator under this subsection.

"(f) PERMITS.—Beginning thirty-six months after the promulgation of a performance standard under subsection (a) and section 111 applicable to a category of solid waste incineration units, each unit in the category shall operate pursuant to a permit issued under this subsection and part B of title III. Notwithstanding any other provision of this Act, each permit for a solid waste incineration unit combusting municipal waste issued under this Act shall be issued for a period of up to thirty years and shall be reviewed every five years after date of issuance or reissuance. Each permit shall continue in effect after the date of issuance until the date of termination, unless the Administrator or State determines—

"(1) that the unit is not in compliance with all standards and conditions contained in the permits; or

"(2) capacity to treat or dispose of the ash from such unit in compliance with section 4011 of the Solid Waste Disposal Act for a five-year period after such determination has not been demonstrated.

Such determination shall be made at regular intervals during the term of the permit, such intervals not to exceed five years, and only after public comment and public hearing. No permit for a solid waste incineration unit may be issued under this Act by an agency, instrumentality or person that is also responsible, in whole or part, for the design and construction or operation of the unit. Notwithstanding any other provision of this subsection, the Administrator or the State shall require the owner or operator of any unit to comply with emissions limitations or implement any other measures, if the Administrator or the State determines that emissions in the absence of such limitations or measures may reasonably be anticipated to endanger public health or the environment. The Administrator's determination under the preceding sentence is a discretionary decision.

"(g) STATE PROGRAMS.—Any State may submit to the Administrator a proposed State program for implementation and concurrent enforcement of the requirements of this section. The Administrator shall approve or disapprove any State program proposed under this subsection within 180 days of submission. Whenever the Administrator determines that a State is not enforcing the requirements of this section in a manner equivalent to Federal enforcement, the Administrator shall withdraw the authorization for such State. Each State program approved under this subsection shall, at a minimum, including permitting requirements for each new and existing solid waste incineration unit located in the State. Any permit issued by a State may be reviewed and withdrawn by the Administrator on the Administrator's own motion or upon a showing by any person that the conditions contained in such permit are not in compliance with the requirements of this Act.

"(h) EFFECTIVE DATE AND ENFORCEMENT.—

"(1) Performance standards and other requirements promulgated pursuant to this section and section 111 and applicable to new solid waste incineration units shall be effective as of the date six months after the date of promulgation.

"(2) Performance standards and other requirements promulgated pursuant to this section and section 111 and applicable to existing solid waste incineration units shall be applicable as expeditiously as practicable after approval of a State plan under subsection (b)(2) (or promulgation of a plan by the Administrator under subsection (b)(3)) but in no event later than five years after the date of such standards of requirements are promulgated.

"(3) After the effective date of any performance standard, emissions limitation or other requirement promulgated pursuant to this section, it shall be unlawful for any owner or operator of any solid waste incineration unit to which such standard, limitation or requirement applies to operate such unit in violation of such limitation, standard or requirement or for any other person to violate an applicable requirement of this section.

"(4) For purposes of sections 111(e), 113, 114, 116, 120, 303, 304, 307 and other provisions for the enforcement of this Act, each performance standard, emissions limitation or other requirement established pursuant to this section including any requirement for recycling imposed under subsection (d) by the Administrator or a State or local government, shall be treated in the same manner as a standard of performance under section 111 which is an emissions limitation. Actions to enforce compliance with the recycling requirements of subsection (d)(1) may only be brought against the governments of the jurisdictions served by the unit, * * * agreement between the governments of the jurisdictions served by the unit and the owner or operator of the unit that the owner or operator will be responsible for compliance with some or all aspects of the requirements of subsection (d)(1) in which case an action to enforce may be brought against the owner or operator of the facility with regard to the aspects of the recycling requirement for which it is responsible.

"(5) Any civil penalty imposed by a court against a unit of local government under this Act for violations of this section shall be paid into a trust fund or comparable mechanism established by a court or the State and shall be applied in support of public programs or activities, as authorized by the court (or a fund administrator appointed by the court), that serve to enhance the protection of human health and the environment of the persons residing within the jurisdiction of such unit of local government but shall not be used to comply with requirements established under this section, section 111 or section 4011 of the Solid Waste Disposal Act.

"(i) DEFINITIONS.—As used in this section—

"(1) The term 'solid waste incinceration unit' means a distinct operating unit of any facility which combusts any solid waste material from commercial or industrial establishments or the general public (including single and multiple residences, hotels, and motels). Such term does not include incinerators or other units required to have a permit under section 3005 of the Solid Waste Disposal Act. The term 'solid waste incineration unit' does not include (A) materials recovery facilities (including primary or secondary smelters) which combust waste for the primary purpose of recovering metals, (B) qualifying small power production facilities, as defined in section 3(17)(C) of the Federal Power Act (16 U.S.C. 769(17)(C)), or qualifying cogeneration facilities, as defined in section 3(18)(B) of the Federal Power Act (16 U.S.C. 796(18)(B)), which burn homogeneous waste (such as units which burn tires or used oil, but not including refuse-derived fuel) for the production of electric energy or in the case of qualifying cogeneration facilities which burn homogeneous waste for the production of electric energy and steam or forms of useful energy (such as heat) which are used for industrial, commercial, heating or cooling purposes, or (C) air curtain incinerators provided that such incinerators only burn wood wastes, yard wastes and clean lumber and that such incinerators comply with opacity limitations to be established by the Administrator by rule.

"(2) The term 'new solid waste incineration unit' means a solid waste incineration unit the construction or modification of which is commenced after the Administrator proposes requirements under this section establishing emissions standards or other requirements which would be applicable to such unit. Any solid waste incineration unit which combusts municipal waste and is granted an operating permit with a term of thirty years pursuant to subsection (f) shall be considered a new solid waste incineration unit for the purposes of this section upon the expiration date of such permit.

"(4) The term 'modified solid waste incineration unit' means a solid waste incineration unit at which modifications have occurred after the effective date of a standard under subsection (a) if (A) the cumulative cost of the modifications, over the life of the unit, exceed 50 per centum of the original cost of construction and installation of the unit (not including the cost of any land purchased in connection with such construction or installation) updated to current costs, or (B) the modification is a physical change in or change in the method of operation of the unit which increases the amount of any air pollutant emitted by the unit for which standards have been established under this section or section 111.

"(5) The term 'existing solid waste incineration unit' means a solid waste incineration unit which is not a new or modified solid waste incineration unit.

"(6) The term 'municipal waste' means refuse (or refuse-derived fuel) collected from the general public more than 30 per centum of which consists of paper, wood, yard wastes, food wastes, plastics, leather, rubber, and other combustible materials and noncombustible materials such as glass and metal including household wastes and waste from institutional, commercial, and industrial sources, but does not include industrial process wastes or medical wastes.

"(7) The term "solid waste" and "medical waste" shall have the meanings established by the Administrator pursuant to the Solid Waste Disposal Act.

"(j) OTHER AUTHORITY.—

"(1) Nothing in this section shall preclude or deny the right of any State or political subdivision thereof to adopt or enforce any regulation, requirement, or standard relating to solid waste incineration units that is more stringent than a regulation, requirement, or standard in effect under this section or under any other provision of this Act.

"(2) Nothing in this section shall diminish the authority of the Administrator or a State to establish any other requirements under any other authority of law, including the authority to establish for any such air pollutant a national ambient air quality standard, except that no solid waste incineration unit subject to performance standards under this section and section 111 shall be subject to standards under section 112 of this Act. Solid waste incineration units shall not be affected units for purposes of title IV of this Act.

"(3) No requirement of an applicable implementation plan under section 165 (relating to construction of facilities in regions identified pursuant to section 107(d)(1) (D) or (E)) or under section 172(b)(6) (relating to permits for construction and operation in nonattainment areas) may be used to weaken the standards in effect under this section.

(b) Section 169(1) of the Clean Air Act is amended by striking "two hundred and" after "municipal incinerators capable of charging more than".

(c) Prior to the promulgation of any performance standard for solid waste incinceration units combusting municipal waste under section 111 or section 130 of the Clean Air Act, the Administrator shall review the availability of acid gas scrubbers

as a pollution control technology for small new units and for existing units (as defined in 54 Federal Register 52190-52304 (December 20, 1989), taking into account the provisions of subsection (a)(2) of section 130 of the Clean Air Act.

ASH MANAGEMENT AND DISPOSAL

SEC. 307. (a) Subtitle D of the Solid Waste Disposal Act is amended by adding the following new section:

"MUNICIPAL WASTE COMBUSTION ASH

"SEC. 4011. (a) IN GENERAL.—(1) Not later than eighteen months after the date of enactment of this section, the Administrator shall promulgate regulations for the management, handling, storage, treatment, transportation, reuse, recycling, and disposal of ash from municipal waste incineration units, as may be necessary to protect human health and the environment. Notwithstanding other provisions of this Act, the management, handling, storage, treatment, transportation, reuse, recycling, and disposal of ash from municipal waste incineration units shall be subject to this section and subtitle and not subject to the provisions of subtitle C. The provisions of section 3007, 3008 and 3013 shall apply to ash from municipal waste incineration units and the requirements of this section to the same extent that such sections apply to hazardous wastes and the requirements of subtitle C.

"(2) For the purposes of this section, the term—

"(A) 'municipal waste incineration unit' means a solid waste incineration unit combusting municipal waste as such terms are defined in section 130 of the Clean Air Act; and

"(B) 'treatment' means any method, technique, or process designed to change the physical, chemical, or biological character or composition of any ash so as to remove or permanently fix in place any constituent of the ash which, in the event of mismanagement during transportation, storage, reuse or disposal, may pose a threat to human health or the environment and includes testing of such ash to assure that criteria promulgated under subsection (e) are satisfied.

"(3) Regulations promulgated under this section may establish requirements that apply to fly ash separately, to bottom ash separately, or to the combination of fly ash and bottom ash.

"(b) DISPOSAL.—(1) Regulations promulgated under subsection (a) for the disposal of ash from municipal waste incineration units in landfills shall require—

"(A) the installation of a double liner consisting of one flexible membrane liner and a composite liner with a leachate collection system above and between such liners, in accordance with paragraph (2); and

"(B) groundwater monitoring.

"(2) The requirement of paragraph (1)(A) may be satisfied by the installation of liners designed, operated, and constructed of materials to prevent the migration of any constituent into and through such liners during the period such facility remains in operation (including any postclosure monitoring period). For the purposes of this section the term 'composite liner' means a liner which consists of a flexible membrane liner and at least a 3-foot thick layer of recompacted clay or other natural material with a hydraulic conductivity of no more than 1×10^{-7} centimeter per second. The provisions of this paragraph apply prior to and after the promulgation of regulations under paragraph (1).

"(3)(A) Notwithstanding the requirement of paragraph (1)(A), regulations promulgated under subsection (a) shall authorize the placement of ash from municipal waste incineration units in a monofill (containing only ash from such units) with a composite liner designed, operated and constructed of materials to prevent the migration of any constituent into and through such liner during the period the monofill remains in operation (including any postclosure monitoring period), ground water monitoring and a leachate collection system.

"(B) For the purpose of paragraph (4), a monofill (containing only ash from municipal waste incineration units) with two or more flexible membrane liners, a leachate collection system above and between such liners and ground water monitoring is determined to be an alternative design which will prevent the migration of any hazardous constituent into ground water or surface water at least as effectively as the design requirements of subparagraph (A).

"(C) If fly ash is to be disposed in monofill containing solely or substantially fly ash, such ash shall be treated pursuant to treatment standards established under this section before disposal or such monofill shall be constructed with an additional liner and a leachate detection and collection system between the liners.

"(D) Requirements under this paragraph are minimum requirements and the Administrator shall promulgate more stringent requirements applicable where necessary to assure that releases from a monofill will not contaminate ground water or surface water or otherwise pose a threat of adverse affects on human health or the environment.

"(4) The design requirements of paragraphs (1) and (3) shall not apply if the owner or operator of a solid waste management unit utilizing an alternative design demonstrates to the State, and the State finds, that the alternative design will prevent the migration of any hazardous constituent into the ground water or surface water at least as effectively as the design requirements of paragraphs (1) or (3) of this subsection. The State shall not solely or substantially rely upon location characteristics to make any determination under this paragraph. States may authorize such alternative design requirements only under a permit program approved by the Administrator as required under subsection (f) of this section. The Administrator may review, on appeal by any person or on the Administrator's own motion, and reverse any determination made by a State under this subsection. The Administrator shall make a decision on any appeal within one hundred and eighty days.

"(5) Liner requirements imposed under paragraph (1) or (3) of this subsection or subsection (c) shall include provisions for quality control and quality assurance with respect to the design and installation of the liners.

"(6) Nothing in this section shall be interpreted, construed or applied to require the routine testing of ash which is disposed in a landfill or monofill meeting the requirements of this subsection.

"(c) DISPOSAL IN SANITARY LANDFILLS.—Regulations promulgated under subsection (a) may allows disposal of ash from municipal waste incineration units in sanitary landfills with at a minimum one liner, leachate collection and ground water monitoring and otherwise meeting the requirements of revised criteria promulgated under section 4010(c), if (1) such ash is routinely tested and does not fail any criteria under subsection (e); and (2) any fly ash so disposed (including any fly ash combined with bottom ash) has undergone treatment (as defined in subsection (a)) in accordance with regulations for treatment promulgated under this section and such treated fly ash is separately tested and does not fail any criteria established under subsection (e). For the purposes of this section, the mixing of fly ash and bottom ash, or the mixing of such ash with other solid waste, without the introduction of chemical stabilization agents, does not constitute treatment. Ash may not be disposed of in units that are created as a result of vertical expansion of an existing waste disposal facility unless the owner or operator of such facility demonstrates, and the State finds, that there will be no settling (that would impair the integrity of any required liner, leachate collection or leak detection system, final cover, or any other structural component of the landfill containment system) of the waste upon which the proposed unit is to be built. In no event may such ash be disposed in a landfill from which the Administrator or the State has determined there is a release into ground water or surface water, unless such release would not require corrective action pursuant to Federal or State law or regulation or landfill that is in violation of Federal or State regulations or other requirements.

"(d) REUSE.—(1) The regulations under this section shall include such requirements applicable to the reuse and recycling of the ash from municipal waste incineration units, including criteria and routine testing procedures, as may be necessary to protect human health and the environment. The Administrator shall develop such regulations for the specific end uses of such reused or recycled ash. In developing such regulations, the Administrator shall consider, to the extent feasible and appropriate, all potential pathways of human and enviromental exposure, including both short-term and long-term, to hazardous constituents of such ash from such recycling and reuse. The pathways to be considered shall include, but not be limited to, inhalation, ingestion as a consequence of incorporation of the ash or any hazardous constituents into the food chain, ingestion of potable water or aquatic organisms contaminated by surface runoff, leaching or percolation of such ash or its hazardous constituents into ground water or surface water, ingestion or inhalation of soil particles contaminated with such ash, and dermal contact with such ash. At a minimum the Administrator shall consider with respect to such recycling and reuse, appropriate methods to determine leaching, total chemical analysis, respirability, and toxicity.

"(2) Such regulations shall require treatment of ash from municipal waste incineration units before any such ash is recycled or reused to protect human health and the environment. Such regulations shall specify those levels or methods of treatment that, taking into account the potential pathways of exposure identified in paragraph (1)—

"(A) substantially reduce the likelihood of migration of ash or its hazardous constitutents so that short-term and long-term threats to human health and the environment are minimized;

"(B) satisfy any criteria and routine testing procedures included in the regulations under paragraph (1); and

"(C) assure that the recycling or reuse of such ash is protective of human health and the environment.

"(3) If the Administrator fails to promulgate regulations under this subsection, no person may reuse or recycle ash from a municipal waste incineration unit after the date thirty-six months after the date of enactment of this section unless such ash is treated and leachate from an extraction procedure toxicity test applied to such ash does not exceed standards established pursuant to section 1412 of the Safe Drinking Water Act.

"(e) CRITERIA AND TESTING.—(1) For the purposes of developing regulations for the management, handling, storage, treatment, transportation, reuse, recycling, and disposal of ash from municipal waste incineration units under this section, the Administrator shall, not later than 18 months after the date of enactment, promulgate criteria and testing procedures for identifying the characteristics of ash from municipal waste incineration units that may pose a hazard to human health or the environment. In considering potential hazards to human health and the environment, the Administrator shall consider, to the extent appropriate and feasible, all potential pathways of human or environmental exposure to constituents of such ash, including, but not limited to, inhalation, ingestion as a consequence of incorporation of the ash or any constituent into the food chain, ingestion of potable water or aquatic organisms contaminated by surface runoff, leaching or percolation of such ash or its constituents into ground water or surface water, ingestion or inhalation of soil particles contaminated with such ash, and dermal contact with such ash (including, for all such pathways, situations of disposal or reuse). At a minimum, the Administrator shall consider appropriate methods to determine leaching, total chemical analysis, respirability, and toxicity. The criteria and accompanying testing procedures promulgated by the Administrator under this subsection shall reflect the heterogeneous characteristics of municipal solid waste and ash from municipal waste incineration units, including seasonal variations in the constitutents of such solid waste and ash. Leaching procedures established under this subsection shall include testing under acidic and native conditions. Test leachate from any ash containing a substance in concentrations exceeding the maximum contaminant level for such substance established pursuant to section 1412 of the Safe Drinking Water Act by a factor of one hundred or more shall, unless the Administrator establishes a more stringent requirement, constitute a failure of the test required by this section.

"(2) When disposal of ash occurs pursuant to subsection (c) or (d), the Administrator shall require the owner or operator of any municipal waste incineration unit or any facility handling, transporting, storing, treating, reusing, recycling, or disposing of ash from such unit to test such ash in accordance with the appropriate criteria and testing procedures promulgated under this subsection. If fly ash and bottom ash are combined, such combined ash must also be tested in accordance with such criteria and testing procedures, including, as the Administrator determines necessary, the separate testing of bottom ash and fly ash.

"(3) Any ash which fails in any characteristic under the appropriate criteria and testing procedures promulgated by the Administrator under this subsection shall be disposed of in a facility in compliance with subsection (b) (1) or (3), or shall be treated (as defined in subsection (a)) in accordance with regulations promulgated under section (a) and shall be demonstrated to satisfy all applicable criteria promulgated under this subsection before disposal (pursuant to subsection (c)) or reuse (pursuant to subsection (d)).

"(4) The Administrator shall seek to validate the criteria and testing procedures established pursuant to this subsection by conducting a program of analysis of leachate produced at facilities disposing or reusing ash from municipal waste incineration units.

"(f) PERMITS.—(1) Beginning thirty months after the date of enactment of this section any facility receiving ash from municipal waste incineration units for the purpose of treatment, storage, reuse, recycling, or disposal shall be subject to a permit program or other system of prior approval and conditions comparable to those required by section 4005(c).

"(2) Before the issuance of a permit or other prior approval to any person with respect to any facility for treatment, storage, reuse, recycling or disposal of incinerator ash, the Administrator or the State shall provide for public notice and the opportunity for an informal public hearing, in accordance with the provisions of section 7004(b)(2) of this Act.

"(g) CORRECTIVE ACTION.—(1) Corrective action regulations issued pursuant to subsection 4010(c), when promulgated shall apply to any facility regulated under this section. The Administrator may establish such additional requirements for units regulated under this section as may be necessary to protect human health and the environment.

"(2)(A) Until such time as regulations are promulgated pursuant to paragraph (1), whenever on the basis of any information the Administrator determines that there is or has been a release of any hazardous constituent from a facility regulated under this section, the Administrator may issue an order requiring corrective action or such other response measure as the Administrator deems necessary to protect human health or the environment or the Administrator may commence a civil action in the United States district court in the district in which the facility is located for appropriate relief, including a temporary or permanent injunction.

"(B) Any order issued under this subsection may include a suspension or revocation of authorization to operate, shall state with reasonable specificity the nature of the required corrective action or other response measure, and shall specify a time for compliance. If any person named in an order fails to comply with the order, the Administrator may assess, and such person shall be liable to the United States for, a civil penalty in an amount not to exceed $25,000 for each day of noncompliance with the order.

"(C) Regulations promulgated under subsection (a) shall require corrective action for all releases pursuant to Federal or State law or regulation of hazardous constituents from any solid waste management unit at a facility seeking a permit under this section, regardless of the time at which waste was placed in such unit. Permits issued under this section shall contain schedules of compliance for such corrective action and assurances of financial responsibility for completing such corrective action.

"(h) CLOSURE.—Regulations promulgated under subsection (a) shall establish requirements for the proper closure of facilities treating, storing, or disposing of ash from municipal waste incineration units, for the post-closure monitoring and care of such facilities for a period of not less than thirty years, and for assurances of financial responsibility for closure, post-closure care and corrective action.

"(i) STATE PROGRAMS.—(1) Beginning eighteen months after the date of enactment of this section, any State may submit to the Administrator a proposed program for implementation and concurrent enforcement of the requirements of this section which may be considered and approved by the Administrator in accordance with the procedures established in section 4007. State programs approved under this subsection shall contain provisions assuring that each facility receiving ash from a municipal incineration unit obtains a permit or other form of prior approval as provided in subsection (f). Whenever the Administrator determines that a State is not enforcing the requirements of this section in a manner equivalent to Federal enforcement, the Administrator shall withdraw the authorization of such State program under this subsection.

"(2) Nothing in this section shall prohibit any State or political subdivision thereof from imposing any requirement with respect to the management, handling, storage, treatment, transportation, reuse, recycling or disposal of ash from municipal waste incineration units which is more stringent than any requirement established under this section.

"(4) Any person who registers for export of ash from a municipal waste incineration unit under paragraph (3) of this section shall file with the Administrator no later than March 1 of each year, a report which summarizes exports of ash undertaken pursuant to such registration: the information reported shall address each of the items for registration set forth in paragraph (3)(B).

"(J) EFFECTIVE DATES.—(1) Regulations promulgated under this section shall be effective upon promulgation, except that requirements promulgated pursuant to subsection (b) or (c) with respect to the disposal of ash from municipal waste incineration units shall be effective on and after the date forty-eight months after the date of enactment of this section.

"(2) Beginning eighteen months after the date of enactment of this section and until the effective date of disposal requirements promulgated pursuant to subsection (b) or (c), ash from municipal waste incineration units shall not be disposed in landfills unless such landfills have, at a minimum, one liner, leachate collection and ground water monitoring and otherwise meet the criteria for sanitary landfills issued under this subtitle.

"(3) Notwithstanding the provisions of paragraph (2), the Administrator or a State may grant on a case-by-case basis a variance from the requirement that ash from each municipal waste incineration unit be disposed in a facility with a liner, leachate collection and ground water monitoring beginning eighteen months after enactment of this section, on a showing by the owner or operator of any such unit that sufficient capacity to dispose of ash in compliance with such requirements is not available for the unit taking cost into consideration. No variance granted under this paragraph shall extend for a period longer than thirty months after the date of enactment of this section.

"(4) Notwithstanding the provisions of paragraph (1), the Administrator or a State may grant on a case-by-case basis a variance

from the requirement that ash from municipal waste incineration units be disposed only in landfills meeting the requirements of subsection (b) or (c) beginning forty-eight months after the date of enactment of this section, on a showing by the owner or operator of any such unit that good faith efforts were made to satisfy such requirement but the unit will fail to do so for reasons not in control of the owner or operator of such unit. No variance granted under this paragraph shall extend for a period longer than seventy-two months after the date of enactment of this section.

"(5) If the Administrator fails to promulgate regulations under subsection (a) for the disposal of ash from municipal incineration units, no person may dispose of ash in a landfill after forty-eight months after the date of enactment of this section unless such landfill satisfies the requirements of subsections (b)(1) or (b)(3).

"(K) PROHIBITION.—(1) Beginning on the effective date of any regulation or requirement under this section it shall be unlawful to manage, handle, store, treat, transport, reuse, recycle, or dispose ash from a municipal waste incineration unit otherwise than in accordance with such regulation or requirement or a State program approved pursuant to subsection (i).

"(2) Prior to and after the effective date of regulations under this section, the Administrator may use the authorities of section 3008 to enforce the requirements of this section. In the case of a violation in a State which is authorized to implement and enforce a program under subsection (i), the Administrator shall give notice to the State in which a violation has occurred prior to issuing an order or commencing civil action under section 3008.".

(b) The table of contents for subtitle D of the Solid Waste Disposal Act is amended by adding the following new item at the end thereof:

"Sec. 4011. Municipal waste combustion ash.".

(c) Subsection (i) of section 3001 of the Solid Waste Disposal Act is repealed.

CONSULTATION

SEC. 308. Notwithstanding the provisions of the Federal Advisory Committee Act, prior to promulgation of any regulations, requirements, or guidelines pursuant to section 130 of the Clean Air Act or section 4011 of the Solid Waste Disposal Act, the Administrator shall consult with elected officials of State and local governments, or their representatives or representatives of their organizations which may develop plans, administer programs, issue permits, promulgate regulations or take corrective action under such sections to receive their advice and recommendations on such regulations, requirements and guidelines.

WIRTH AMENDMENT NO. 1446

Mr. WIRTH proposed an amendment to amendment No. 1293 (in the nature of a substitute) proposed by Mr. MITCHELL (and others) to the bill S. 1630, supra, as follows:

On page 183, after line 10, insert "(A)" after "(6)".

On page 184, after line 23, insert the following:

(B) The Governor of a State containing an area classified as a serious carbon monoxide nonattainment area under section 187(a) with a population of 250,000 or more, who requests that the standards specified in subparagraph (1)(A) apply in such area, may request that in addition to such standards a certification standard for carbon monoxide emissions apply to vehicles made available for purchase or placement into use in such area pursuant to subparagraphs (1)(B) and (1)(C). The certification standard requested pursuant to this paragraph shall not be less than 1.0 grams per mile for emissions of carbon monoxide from light duty vehicles and an equivalent level for emissions from light duty trucks. The Administrator shall approve a request for a certification standard under this paragraph if the Administrator determines that no fewer than two motor vehicle manufacturers are already producing vehicle models (not including conversions pursuant to subparagraph (1)(F)) for purchase or placement into use under paragraph (1) that meet the requested certification standard and that all other requirements of this paragraph are met. The credit provisions in subparagraph (1)(C) and the exemption provisions in subparagraph (1)(K) shall apply with respect to certification standards approved pursuant to this provision. The requirements of paragraph (4) shall not apply with respect to such certification standards. When a vehicle that operates on two kinds of fuels is certified for the purposes of this provision, it shall be certified on one fuel only after all traces of the other fuel that can practically be removed from the vehicle's fuel system have been removed.

SYMMS (AND McCLURE) AMENDMENT NO. 1447

Mr. SYMMS (for himself and Mr. MCCLURE) proposed an amendment to amendment No. 1293 (in the nature of a substitute) proposed by Mr. MITCHELL (and others) to the bill S. 1630, supra; as follows:

On page 253, after line 22, insert the following new subparagraph:

"(E) The Administrator shall not be required to conduct any review under this paragraph or promulgate emissions limitations under subsections (f) or (g) for any category or subcategory of area sources which is listed pursuant to subsection (c)(2) and for which an emissions standard is promulgated pursuant to subsection (d)(5).

On page 253, line 23, strike "(E)" and insert in lieu thereof "(F)".

HARKIN (AND HATCH) AMENDMENT NO. 1448

Mr. HARKIN (for himself and Mr. HATCH) proposed an amendment to amendment No. 1293 (in the nature of a substitute) proposed by Mr. MITCHELL (and others) to the bill S. 1630, supra; as follows:

On page 230, line 2, after "sources" insert:

"Notwithstanding the provisions of this paragraph, the Administrator shall not be required to aggregate the emissions of a research or laboratory facility with emissions of other units within a contiguous area and under common control, to determine whether such a research or laboratory facility is a major source, but such emissions shall be aggregated with such other units for purposes of determining whether such units are subject to regulation under subsections (f) and (g). For purposes of this section, research or laboratory facility means any stationary source whose primary purpose is to conduct research and development into new processes and products, provided that such source is operated under the close supervision of technically trained personnel, and does not produce a substantial quantity of products for commercial sale in commerce."

GRAMM AMENDMENT NO. 1449

Mr. GRAMM proposed an amendment to amendment No. 1293 (in the nature of a substitute) proposed by Mr. MITCHELL (and others) to the bill S. 1630, supra; as follows:

On page 154, strike lines 1 through 13, page 154 and insert in lieu thereof the following:

"(9) the term 'covered fleet operator' means any person who, on or after January 1, 1990, controls the operation of 20 or more fleet vehicles registered in, or primarily operating in, any area which has a 1988 ozone design value of 0.18 parts per million or greater or area for which a Governor requests coverage pursuant to section 212(a)(7); and who, on or after such date, provides a facility or facilities for the central refueling and maintenance of such vehicles in the normal course of business. For purposes of this paragraph—

"(i) the term person means and individual, corporation, partnership, association, State, municipality, and political subdivision of a State; and

"(ii) each motor vehicle operated by person controlling, controlled by or under common control with any person shall be treated, under regulations of the Administrator, as operated by a single person."; and

(b) On page 156, strike line 3 and all that follows through line 2, page 161 and insert in lieu thereof the following:

"(B) FEDERAL GOVERNMENT PROGRAM.—

"(i) For model years 1995 and 1996, 30 per centum, for model years 1997 and 1998, 60 per centum, and for model years after model year 1998, 90 per centum, of all light-duty vehicles and light-duty trucks purchased or leased for more than 120 days by any agency, department, instrumentality, or any quasi- or independent instrumentality of the United States and primarily operating in areas classified as serious, severe or extreme ozone nonattainment areas under section 181(a), shall comply with the emissions standards prescribed under subparagraph (A).

"(ii) With respect to vehicle model years 1995 and 1996 only, the Administrator may include a lesser percentage of such vehicles under this subparagraph if the Administrator determines that the required percentage cannot be feasibly achieved or would impose unreasonable costs. For model years after 1998 the Administrator may require a percentage less than 90 per centum, but in no event less than 60 per centum, if the Administrator determines that a higher percentage would impose unreasonable costs, including costs associated with vehicle acquisition, fueling facilities, operation, maintenance, safety, reliability and resale value.

"(iii) REQUIRED OPERATION.—The Administrator of General Services, the Post Master General, and the Secretary of Defense with the concurrence of the Administrator, after consultation with the Secretary of Energy, shall, before October 1, 1993, issue regulations to ensure that a vehicle acquired pursuant to this subparagraph—

"(I) shall be supplied with appropriate clean alternative fuel in its primary area of operation, using commercially available

fueling facilities to the maximum extent practicable; and

"(II) shall be operated exclusively on such fuel except when operated so as make it impracticable to obtain such fuel.

"(iv) CONSIDERATION.—

"(I) Funds appropriated for carrying out this subparagraph shall be applied on a priority basis, for expenditure first in areas of the United States which the Administrator determines have the most severe air pollution problems.

"(II) A Federal officer or agency responsible for deciding which types of clean alternative fuel vehicles to acquire in order to comply with this subparagraph shall consider as a factor in such decision which types of vehicles yield the greatest reduction in pollutants emitted per dollar spent.

"(v) COST OF VEHICLES TO FEDERAL AGENCY.—Notwithstanding the provisions of Section 211 of the Federal Property and Administrative Services Act of 1949, as amended, the Administrator of General Services shall not include the incremental costs of clean alternative fuel vehicles in the amount to be reimbursed by Federal agencies if the Administrator of General Services determines that appropriations provided pursuant to this subparagraph are sufficient to provide for the incremental cost of such vehicles over the cost of comparable conventional fueled vehicles.

"(vi) LIMITATIONS ON APPROPRIATIONS.—Funds appropriated pursuant to the authorization under this subparagraph shall be applicable only—

"(I) to the portion of the cost of acquisition, maintenance and operation of vehicles acquired under this subparagraph which exceeds the cost of acquisition, maintenance and operation of comparable conventional fueled vehicles;

"(II) to the portion of the costs of fuel storage and dispensing equipment atttributable to such vehicles which exceeds the costs for such purposes required for conventional fuel vehicles; and

"(III) to the portion of the costs of acquisition of clean alternative fuel vehicles which represents a reduction in revenue from the disposal of such vehicles as compared to revenue resulting from the disposal of comparable conventional fueled vehicles.

"(vii) VEHICLE COSTS.—The incremental cost of vehicles acquired under this subparagraph over the cost of comparable conventional fueled vehicles shall not be applied to any calculation with respect to a limitation under law on the maximum cost of individual vehicles which may be acquired by the United States.

"(viii) EXEMPTIONS.—The requirements of this subparagraph shall not apply to vehicles—

"(I) with respect to which the Secretary of Defense has certified to the Administrator that an exemption is needed based on national security consideration; or

"(II) use for law enforcement or emergency purposes.

"(ix) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as may be required to carry out the provisions of this subparagraph: *Provided*, That such sums as are appropriated for the Administrator of General Services pursuant to the authorization under this subparagraph shall be added to the General Supply Fund established in section 109 of the Federal Property and Administrative Services Act of 1949, as amended.

"(x) Nothing in this subparagraph shall be construed to require conversion of new or existing vehicles capable of operating on gasoline or diesel fuel only to a clean alternative fuel in order to achieve compliance with this subparagraph.".

SPECTER (AND JOHNSTON) AMENDMENT NO. 1450

Mr. SPECTER (for himself and Mr. JOHNSTON) proposed an amendment to amendment No. 1293 (in the nature of a substitute) proposed by Mr. MITCHELL (and others) to the bill S. 1630, supra, as follows:

On page 343, line 6, strike "(3)" and insert in lieu thereof "(9)".

On page 283, line 12, after the period insert the following: "(iii) Notwithstanding the provisions of this section, reconstruction of any source of coke emissions qualifying for an extension shall not subject such source to emissions limitation under subsection (f) or (c) more stringent than those established in subparagraph (A)(ii) or subparagraph (B)(iii).".

On page 236, line 11, after "substance" insert "or, in case of listed pollutants without CAS numbers (other than coke oven emissions, mineral fibers, or polycylic organic matter) removing certain unique chemical substances."

On page 237, after line 20, insert the following:

"(D) The Administrator shall remove one or more unique chemical substances that contain a listed hazardous air pollutant not having a CAS number (other than coke oven emissions, mineral fibers, or polycyclic organic matter) upon a showing by the petitioner or on the Administrator's own determination that such unique chemical substances that contain the named chemical of such listed hazardous air pollutant meets the removal requirements of subparagraph (C). The Administrator must grant or deny a removal petition prior to promulgating any emission standards pursuant to subsection (d) applicable to any source category or subcategory of a listed hazardous air pollutant without a CAS number listed under subsection (b) for which a removal petition has been filed within ninety days of the enactment of this subparagraph.".

On page 241, after line 9, insert the following:

(8) Where the sole reason for the inclusion of a source category on the list required under this subsection is the emission of a unique chemical substance, the Administrator shall withdraw the source category from the list if it is appropriate because of action taken under either subparagraphs (C) or (D) of section (b)(3).

On page 253, after line 22, add the following:

"(E) In establishing standards for the control of unique chemical substances of listed pollutants without CAS numbers under subsections (f) or (c) the Administrator shall establish such standards with respect to the health and environmental effects of the substances actually emitted by sources and direct transformation byproducts of such emissions in the categories or subcategories."

On page 253, redesignate subparagraph (E) as (F).

SPECTER AMENDMENT NO. 1451

Mr. SPECTER proposed an amendment to amendment No. 1293 (in the nature of a substitute) proposed by Mr. MITCHELL (and others) to the bill S. 1630, supra, as follows:

On page 283, line 12, after the period insert the following: "(iii) Notwithstanding the provisions of this section, including paragraph (6)(D), reconstruction of any source of coke oven emissions qualifying for an extension shall not subject such source to emissions limitations under subsection (f) or (g) more stringent than those established in subparagraph (A)(ii) or subparagraph (B)(iii)."

BOSCHWITZ (AND OTHERS) AMENDMENT NO. 1452

Mr. CHAFEE (for Mr. BOSCHWITZ, for himself, Mr. MCCAIN, and Mr. WILSON) proposed an amendment to amendment No. 1293 (in the nature of a substitute) proposed by Mr. MITCHELL (and others) to the bill S. 1630, supra; as follows:

On page 455 of the amendment (No. 1293), line 9, redesignate subsection (f) as subsection (g).

On page 455 of the amendment (No. 1293), between lines 8 and 9, insert the following new subsection:

(f)(1) The Administrator of the Environmental Protection Agency shall sponsor monitoring and research and submit to Congress annual and periodic assessment reports on—

(A) the occurrence and effects of acid deposition on surface waters located in that part or the United States west of the Mississippi River;

(B) the occurrence and effects of acid deposition on high elevation ecosystems (including forests, and surface waters); and

(C) the occurrence and effects of episodic acidification, particularly with respect to high elevation watersheds.

(2) The Administrator of the Environmental Protection Agency shall analyze data generated from the studies conducted under paragraph (1), data from the Western Lakes Survey and other appropriate research and utilize predictive modeling techniques that take into account the unique geographic, climatological, and atmospheric conditions which exist in the western United States to determine the potential occurrence and effects of acid deposition due to any projected increases in the emission of sulfur dioxide and nitrogen oxides in that part of the United States located west of the Mississipi River. The Task Force shall include the results of the project conducted under this paragraph in the reports issued to Congress under paragraph (1).

MITCHELL (AND OTHERS) AMENDMENT NO. 1453

Mr. BAUCUS (for Mr. MITCHELL, for himself, Mr. JOHNSTON, Mr. BREAUX, Mr. BINGAMAN, Mr. WIRTH, Mr. BRYAN, Mr.BOREN, Mr. BUMPERS, Mr. COCHRAN, Mr. PRYOR, Mr. BENTSEN, Mr. NICKLES, Mr. GRAMM, Mr. DOLE, Mrs. KASSEBAUM, Mr. ARMSTRONG, Mr. MACK, Mr. GRAHAM, Mr. LEVIN, Mr. FOWLER, Mr. HATFIELD, Mr. MCCLURE, Mr. MATSUNAGA, and Mr. CHAFEE) proposed an amendment to amendment No. 1293 (in the nature of a substitute) proposed by Mr. MITCHELL (and others) to the bill S. 1630, supra; as follows:

On page 425, line 13, add the following:

"(3) Beginning January 1, 2010, the Administrator shall allocate and issue annually for each unit subject to the emissions limitation requirements of paragraph (1) allowances in an amount equal to the unit's baseline multiplied by 0.050 lbs/mmBtu, divided by 2000.".

At the end of section 405, insert the following new subsection:

"(j) CERTAIN MUNICIPALLY OWNED POWERPLANTS.—

"(1) After January 1, 2000, the Administrator shall allocate and issue annually for each existing municipally owned oil and gas-fired utility unit with nameplate capacity equal to, or less than, 40 MWe, the lesser of whose actual or allowable 1985 sulfur dioxide emission rate is less than 1.2 lbs/mmBtu, allowances in an amount equal to the product of the unit's annual fuel consumption on a Btu basis at a 60 per centum capacity factor multiplied by the lesser of its allowable 1985 emission rate or its actual 1985 emission rate, divided by 2000.

"(2) After January 1, 2000, the Administrator shall allocate and issue annually for each existing municipally owned coal-fired utility unit with nameplate capacity less than 25 MWe, the lesser of whose actual or allowable 1985 sulfur dioxide emission rate is less than 1.2 lbs/mmBtu, allowances in an amount equal to the product of the unit's annual fuel consumption on a Btu basis at a 60 per centum capacity factor multiplied by the lesser of its allowable 1985 emission rate or its actual 1985 emission rate, divided by 2000.".

On page 424, line 11, strike "." and insert in the following in lieu thereof: ": *Provided* That, after January 1, 2000, the Administrator shall allocate and issue for each unit with a nameplate capacity equal to, or greater than, 1000 MWe that commences, or has commenced commercial operation, on or after October 1, 1990, but not later than June 30, 1991, allowances in an amount equal to the product of the unit's annual fuel consumption, on a Btu basis, at a 65 per centum capacity factor multiplied by the lesser of 0.50 lbs/mmBtu or the unit's allowable sulfur dioxide emission rate (converted, if necessary, to pounds per mmBtu), divided by 2000.".

On page 413, in the item relating to "La Crosse/Genoa" in table A, strike "19,090" and insert in lieu thereof: "22,700".

On page 416, line 16, beginning with the word "In" strike all through line 24; on line 25, strike "paragraph (1), after" and insert in lieu thereof: "(2) After".

On page 425, after line 12, insert the following:

(i)(1) In addition to allowances allocated pursuant to this section, the Administrator shall allocate and issue annually allowances for each unit, subject to an emissions limitation requirement under this section, and located in a state that

(A) has experienced a growth in population in excess of 25 per centum between 1980 and 1988 according to State Population and Household Estimates, With Age, Sex, and Components of Change: 1981-1988 issued by the U.S. Department of Commerce, and

(B) had an installed capacity of more than 30,000,000kw in 1988,

in an amount equal to the difference between (i) the number of allowances that would be allocated for the unit pursuant to the emissions limitation requirements of this section applicable to the unit adjusted to reflect the unit's annual average fuel consumption on a Btu basis of any three consecutive calendar years between 1980 and 1989 (inclusive) as elected by the owner or operator and (ii) the number of allowances allocated for the unit pursuant to the emissions limitation requirements of this section, provided that the number of allowances allocated and issued pursuant to this subsection shall not exceed an annual total of 40,000. If necessary to meeting the 40,000 allowance restriction imposed under this subsection the Administrator shall reduce, pro rata, the additional annual allowances allocated and issued to each unit under this subsection.

(2) After January 1, 2000, the Administrator shall allocate and issue annually for each unit subject to the emissions limitation requirements of subsection (b)(1), (A) the lesser of whose actual or allowable 1980 emissions rate has declined by 50 per centum or more as of the date of enactment of the Clean Air Act Amendments of 1989, (B) whose actual emissions rate is less than 1.2 lbs/mmBtu as of January 1, 2000, (C) which commenced operation after January 1, 1970 and (D) which is owned by a utility company whose combined kilowatt-hour sales have increased by more than 20 per centum between calendar year 1980 and the date of enactment of the Clean Air Act Amendments of 1989, allowances in an amount equal to the difference between (i) the number of allowances that would be allocated for the unit pursuant to the emissions limitation requirements of subsection (b)(1) adjusted to reflect the unit's annual average fuel consumption on a Btu basis for any three consecutive years between 1980 and 1989 (inclusive) as elected by the owner or operator and (ii) the number of allowances allocated for the unit pursuant to the emissions limitation requirements of subsection (b)(1), provided that the number of allowances allocated and issued pursuant to this paragraph shall not exceed an annual total of 5,000. If necessary to meeting the 5,000-allowance restriction imposed in the last clause of the preceding sentence the Administrator shall reduce, pro rata, the additional allowances allocated and issued to each unit pursuant to this paragraph.

At the end of section 402(1), following the word "Energy.", insert the following:

"For the purpose of this title, the term repowering shall also include any oil and/or gas-fired unit which has been awarded clean coal technology demonstration funding as of January 1, 1991, by the Department of Energy.".

On page 417, after line 10, insert the following:

"(4) After January 1, 2000 the Administrator shall allocate and issue annually for each unit subject to the emissons limitation requirements of paragraph (1) for which was issued a prohibition order or a proposed prohibition order (from burning oil), which unit subsequently converted to coal between January 1, 1980 and December 31, 1985, allowances equal to the difference between (A) the product of the unit's annual fuel consumption, on a Btu basis, at a 65 per centum capacity factor mutiplied by the lesser of its actual or allowable emissions rate during the first full calendar year after conversion, divided by 2,000, and (B) the number of allowances allocated for the unit pursuant to paragraph (1): *Provided*, That the number of allowances allocated and issued pursuant to this paragraph shall not exceed an annual total of 5,000. If necessary to meeting the restriction imposed in the preceding sentence the Administrator shall reduce, pro rata, the annual allowances allocated and issued for each unit under this paragraph."

On page 413 of the amendment, between Table A and line 1, insert the following new subsections:

"(e) RENEWABLE ENERGY TECHNOLOGY RESERVE.—(1) Notwithstanding any other provision of law, beginning on January 1, 1995, the Administrator may allocate from a Renewable Energy Technology Reserve a tonnage amount equal to a total of 80,000 tons of allowances for emissions of sulfur dioxide pursuant to section 403, in an annual amount to be determined by the Administrator subject to paragraph (2) to owners or operators of affected units at affected sources. Such allowances shall be allocated to an owner or operator described in this subparagraph in an amount calculated pursuant to paragraph (2) if, beginning on January 1, 1991, such owner or operator—

"(A) generates electricity at a new renewable energy power plant (as defined in paragraph (4)); or

"(B) purchases electric energy generated at a new renewable energy power plant owned or operated by any person other than the owner or operator of an affected source.

"(2) The Administrator shall allocate annual allowances from the Renewable Energy Technology Reserve pursuant to paragraph (1) as follows:

"(A) Any annual allowance allocated under this subparagraph shall be allocated in a tonnage amount equal to the number of kilowatt hours generated or purchased by the owner or operator (as described in paragraph (1)), multiplied by the emissions rate of the lowest emitting coal- or oil-fired unit of the operating company applying for the allowance (as defined by the Administrator in concurrence with the Secretary of Energy, and excluding any oil- and gas-fired unit with an average annual fuel consumption for calendar year 1985 that, on a Btu basis, exceeded 90 per cent consumption in the form of natural gas), divided by 2000. (The product of such calculation shall be divided by 100 to reflect the conversion rate between Btus and kilowatt hours, assuming a heat transfer of 10,000 Btus per kilowatt hour).

"(B) Allowances allocated under this paragraph shall be allocated in accordance with the order of receipt of applications for such allowances

"(3) Beginning on January 1, 2000, the Administrator shall deduct a tonnage amount equal to 8,000 tons per year for a period of 10 years from the annual allocation of allowances for units subject to the requirements of section 405 on a pro rata basis. Such allowances shall be deposited in the Renewable Energy Technology Reserve. The pro rata share for each such unit shall be calculated on the basis of the allowances that would be allocated pursuant to subsections (b)(1), (3) (4) and (5) (c)(1), (2) and (3); (d)(4); (e); (f); (g)(1), (2) and (4); (h)(1) and (3); (i); (j) and the equivalent of the emissions limitations requirements of paragraphs (5) and (6), of subsection (d); of section 405.

"(4) As used in this subsection, the term 'new renewable energy power plant' means a power plant for which construction is initiated on or after January 1, 1991, or which realizes a significant increase in energy output (as defined and determined by the Administrator, in concurrence with the Secretary of Energy) attributable to the replacement of renewable energy equipment (as defined and determined by the Adminis-

trator, in concurrence with the Secretary of Energy) installed prior to January 1, 1991, by more efficient or productive renewable energy equipment (as determined by the Administrator in concurrence with the Secretary of Energy), and that operates primarily on energy derived from—

"(A) solar sources;

"(B) geothermal sources;

"(C) biomass sources; or

"(D) wind sources.

"(f) APPLICATION FOR ALLOWANCES FROM THE RENEWABLE ENERGY TECHNOLOGY RESERVE.—The owner or operator of an affected unit under subsection (a) may submit an application to the Administrator at any time after January 1, 1991, for allowances from the Renewable Energy Technology Reserve to be calculated using the formula described in subparagraph (A) of subsection (e)(2). Such application shall include—

"(1) the number of kilowatt hours the affected units generated or purchased from a new renewable energy power plant as defined in subsection (e)(4); and

"(2) documentation of kilowatt hours generated or purchased as recorded in a certified meter reading from the point of entry into the utility grid, or in an executed sales contract.

"(g) ACTION BY ADMINISTRATOR.—(1) The Administrator, in consultation with the Secretary of Energy, shall approve or disapprove an application submitted pursuant to subsection (f) not later that 6 months after receipt of the application. If an application proposal does not meet the requirements of subsection (f), the Administrator shall disapprove the application.

"(2) If the Administrator approves an application submitted pursuant to subsection (f), the Administrator shall notify the applicant in writing of the number of allowances to be received pursuant to this paragraph. On or after January 1, 1995, the Administrator shall allocate allowances for the affected units in accordance with the amount specified in the written notification described in this subparagraph upon written request by the owner or operator of the affected units at the affected source.

HEFLIN AMENDMENT NO. 1454

Mr. BAUCUS (for Mr. HEFLIN) proposed an amendment to amendment No. 1293 (in the nature of a substitute) proposed by Mr. MITCHELL (and others) to the bill S. 1630, supra, as follows:

On page 248, line 18, after "units" insert the following:

"considering the rate and mass of such emissions, the health and environmental effects of such emissions, technologies which are available to control such emissions and the costs of such technologies."

On page 249, line 3, strike "(C)" and insert "(D)."

On page 249, line 13, strike "(D)" and insert "(E)."

On page 249, line 24, strike "(E)" and insert "(F)."

On page 250, line 5, strike "(F)" and insert "(G)."

On page 249, line 3, before "(D)" insert the following:

"(C) The National Institute of Environmental Health Sciences shall conduct, and transmit to the Congress not later than four years after the date of enactment of this paragraph, a study to determine the threshold level of mercury."

On page 249, line 9, after "paragraph." insert the following:

"The studies required by subparagraphs (A), (B) and (C) shall be placed in the relevant docket for any rulemaking that would establish emissions standards under subsection (d) for particulates or mercury from electricity utility steam generating units and shall be considered by the Administrator, along with other public comments, before any such standard is promulgated."

WIRTH (AND ARMSTRONG) AMENDMENT NO. 1455

Mr. WIRTH (for himself and Mr. ARMSTRONG) proposed an amendment to amendment No. 1293 (in the nature of a substitute) proposed by Mr. MITCHELL (and others) to the bill S. 1630, supra; as follows:

On page 208, Add a new subsection 211(e), as follows:

(e) ESTABLISHMENT OF A HIGH-ALTITUDE RESEARCH CENTER.—Section 103 of the Clean Air Act is amended by adding at the end thereof the following new subsection:

"( ) The Administrator shall designate at least one center at high-altitude conditions to provide research on after-market emission components, dual-fueled vehicles and conversion kits, the effects of tampering on emissions equipment, testing of alternate fuels and conversion kits, and the development of curricula, training courses and materials to maximize the effectiveness of inspection and maintenance programs as they relate to promoting effective control of vehicle emissions at high-altitude elevations. Preference shall be given to existing vehicle emissions testing and research centers that have established reputations for vehicle emissions research and development and training, and that possess in-house Federal Test Procedure capacity.

DOLE (AND OTHERS) AMENDMENT NO. 1456

Mr. DOLE (for himself, Mr. HEFLIN, Mr. NICKLES, Mr. NUNN, Mr. MCCLURE, Mr. MCCONNELL, Mr. SIMPSON, Mr. BOREN, Mr. COCHRAN, Mr. BOSCHWITZ, Mr. MURKOWSKI, Mr. ARMSTRONG, Mr. FORD, Mr. SHELBY, and Mr. SYMMS) proposed an amendment to amendment No. 1293 (in the nature of a substitute) proposed by Mr. MITCHELL (and others) to the bill S. 1630, supra, as follows:

On page 455 of the amendment No. 1293, beginning with line 12, strike out all through line 25 on page 512 and insert in lieu thereof the following:

TITLE V—PERMITS

SEC. 501. The Clean Air Act is amended—

(1) by inserting after the heading "TITLE III—GENERAL" the subheading "PART A—MISCELLANEOUS and

(2) by adding at the end of title III the following:

"PART B—PERMITS

"DEFINITIONS

"SEC. 350. As used in this title—

"(1) The term 'major source' means any stationary source (or any group of stationary sources located within a contiguous area and under common control) that is a major stationary source or major emitting facility as defined in section 302(j).

"(2) For sources subject to standards issued under section 112 of this Act, the term 'area source' shall have the meaning given in that section.

"(3) The term 'schedule of compliance' means a schedule of remedial measures including an enforceable sequence of actions or operations leading to compliance with an applicable implementation plan, emission standard, emission limitation or emission prohibition.

"(4) the term 'permitting authority' means the Administrator, or the air pollution control agency authorized by the Administrator to carry out a permit program under this title.

"PERMIT PROGRAMS

"SEC. 351. (a) After the effective date of any permit program approved or promulgated under this title, it shall be unlawful for any person to violate any requirement of a permit issued under this title, or to operate any source subject to title IV, a major source, any other source (including an area source) subject to standards or regulations under sections 111 or 112, or any other stationary source designated by regulations promulgated by the Administrator, except in compliance with a permit issued by a permitting authority under this title. Nothing in this subsection shall be construed to alter the requirements of sections 165, 172, and 173 regarding the requirement that a permit be obtained prior to construction. The Administrator may, in the Administrator's discretion, after notice and opportunity for public comment promulgate regulations to exempt one or more source categories from the requirements of this subsection if the Administrator finds that such an exemption is warranted, and would be consistent with protection of the public health, welfare, and the environment; *Provided further* that the administrator shall in making such determination, consider the costs and benefits as one of the many factors to be considered.

"(b) Not later than twelve months after the date of enactment of this title, the Administrator shall promulgate regulations establishing the minimum elements of a permit program to be administered by any air pollution control agency. These elements shall include:

"(1) Requirements for permit applications, including a standard application from and criteria for determining in a timely fashion the completeness of the applications;

"(2) Monitoring and reporting requirements.

"(3) (A) A requirement under State or local law that the owner or operator of all sources subject to the requirement to obtain a permit under this title pay an annual fee, or the equivalent over some other period, sufficient to cover all reasonable costs of developing and administering the permit program, including, but not limited to, the reasonable costs of—

"(i) reviewing and acting upon any application for such a permit,

"(ii) if the owner or operator receives a permit for such source, whether before or after the date of enactment of this section, implementing and enforcing the terms and conditions of any such permit (not including any court costs or other costs associated with any enforcement action),

"(iii) emissions and ambient monitoring,

"(iv) preparing generally applicable regulations or guidance,

"(v) modeling, analyses, and demonstrations, and

"(vi) preparing inventories and tracking emissions.

"(B) The total amount of fees collected by the permitting authority shall conform to the following requirements:

"(i) The Administrator shall not approve a program as meeting the requirements of this paragraph unless the air pollution control agency demonstrates that, except as otherwise provided in clauses (ii) through (iv) of this subparagraph, the program will result in the collection, in the aggregate, from all sources subject to subparagraph (A), of an amount not less than $25 per ton of each regulated pollutant, unless the Administrator determines that a lesser amount would meet the requirements of subparagraph (A).

"(ii) As used in this subparagraph, the term 'regulated pollutant' shall mean (I) a volatile organic compound; (II) each pollutant regulated under section 111 or 112; and (III) each pollutant for which a national primary ambient air quality standard has been promulgated (except that carbon monoxide shall be excluded from this reference).

"(iii) In determining the amount under clause (i), the permitting authority is not required to include any amount of regulated pollutant emitted by any source in excess of 4,000 tons per year of that regulated pollutant.

"(iv) The fee calculated under clause (i), shall be increased (consistent with the need to cover reasonable costs) in each year beginning after the year of enactment of this section by the percentage, if any, by which the Producer Price Index for the most recent calendar year ending before the beginning of such year exceeds the Producer Price Index for the calendar year 1989.

"(C) (1) If the Administrator determines, under section 351(c), that the fee provisions of the operating permit program do not meet the requirements of this paragraph, or if the Administrator makes a determination, under section 351(g), that the permitting authority is not adequately administering or enforcing an approved fee program, the Administrator may, in addition to taking any other action authorized under this title, collect reasonable fees (but only to the extent the permitting authority has failed to collect or to provide for collecting such fees) from the sources identified under subparagraph (A) without regard to the requirements of subparagraph (B).

"(ii) Any source that fails to pay fees lawfully imposed by the Administrator under this subparagraph shall pay a penalty of 50 per centum of the fee amount, plus interest on the fee amount computed in accordance with section 6621(a)(2) of title 26, of the United States Code (relating to computation of interest on underpayment of Federal taxes).

"(iii) Any fees, penalties, and interest collected under this subparagraph shall be deposited in a special fund in the United States Treasury for licensing and other services, which thereafter shall be available for appropriation, to remain available until expended, subject to appropriation, to carry out the Agency's activities for which the fees were collected.

"(iv) Any fee required to be collected by an air pollution control agency under this subsection shall be utilized solely to support the air pollution control permit program of such agency, as provided in this paragraph.

"(4) Requirements for adequate personnel and funding to administer the program.

"(5) A requirement that the permitting authority have and exercise adequate authority to—

"(A) issue permits that issue compliance by all sources required to have a permit under this title with each applicable standard, regulation or requirement under this Act;

"(B) issue permits for a fixed term, not less than one year and not greater than five years;

"(C) assure that upon issuance or renewal, permits include emission limitations and other conditions required by section 353(a);

"(D) (i) terminate, modify, or revoke and reissue a permit for a material inaccuracy in the permit that renders the permit inconsistent with the Act, or

"(ii) modify or revoke and reissue a permit if EPA promulgates regulations after the permit is issued, and modification of the permit to implement such regulations is necessary in order to protect against a serious risk to public health or the environment.

"(E) enforce permits, permit fee requirements, and the requirement to obtain a permit, including authority to recover civil penalties in a maximum amount of not less than $10,000 per day for each violation, and appropriate criminal penalties;

"(F) ensure that no permit will be issued if the Administrator timely objects to its issuance under section 354; and

"(G) extend a permit's term if a timely and complete application for renewal is made, until the permitting authority takes final action upon the renewal application.

"(6) Adequate, streamlined, and reasonable procedures for expeditiously determining when applications are complete, and for processing such applications for public notice, including offering an opportunity for public comment and a hearing, and for expeditious review of permit actions, including applications.

"(7) Authority and procedures to make available to the public any permit application, compliance plan, permit, and monitoring or compliance report under section 352(e), subject to the provisions of section 114 of this Act.

"(8) Adequate and expeditious procedures for permit modification, and procedures to assure that preference be accorded to the processing of applications for any permits required for new or modified major sources under section 165, 172, or 173.

"(9) Procedures and other requirements to minimize, to the maximum extent practicable, duplication, needless paperwork, and delays in the issuance of permits under this title.

"(10 Requirements that—

"(A) If a permit applicant identifies the composition of emissions under the reasonably anticipated operating conditions of the permitted facility, the permit shall set forth the emission limitations, standards, and other requirements that would apply under all such reasonably anticipated operating conditions, and

"(B) The emission limitations and other permit terms shall allow the owner or operator of a facility to make changes in the operation of the facility that might shift permitted emissions from one source to another within the same facility, as authorized by a codifying or modifying permit, without the necessity for a permit modification, provided that the owner or operator provides written notification specifying changed permit requirements to the permitting authority not less than seven calendar days prior to any such change, and that the permit includes such emission limitations and other requirements as are necessary to assure that the modified requirements will be enforceable and will not cause any net increase in the total actual emissions from the facility; and

"(11) procedures and requirements that comply with subsection 112(j).

"(12) Authority and procedures to provide:

"(A) a right of action for any person to proceed against the State to compel a decision granting or denying permit or permit renewal if such decision has not been reached within one year of receipt of a permit application that has been deemed complete;

"(B) that no permit shall be denied after the filing of such an action on the grounds that the permit was incomplete; and

"(C) that if the State decides to deny the permit after such an action has been filed, the State shall specify the statutory or regulatory grounds for such denial.

"(c) Not later than three years after the enactment of this title, the Governor of each State shall develop and submit to the Administrator a permit program under State or local law or under an interstate compact meeting the requirements of this title. In addition, the Governor shall submit a legal opinion from the attorney general (or the attorney for those State air pollution control agencies that have independent legal counsel), or from the chief legal officer of an interstate agency, that the laws of the State, locality, or the interstate compact provide adequate authority and obligation to carry out the program. Not later than one year after receiving a program, and after notice and opportunity for public comment, the Administrator shall approve or disapprove such program, in whole or in part. The Administrator shall approve a program to the extent that the program meets the requirements of this Act, including the regulations issued under subsection (b) of this section. If the program is disapproved, in whole or in part, the Administrator shall notify the Governor of any revisions or modifications necessary to obtain approval. The Governor shall revise and resubmit the program for review under this section within one hundred and eighty days after receiving notification. If the Governor fails within such period to resubmit an approvable program, the Administrator may in the Administrator's discretion take either or both of the following actions:

"(1) apply any of the sanctions specified in section 176(a) of this Act other than the sanction specified in section 176(a)(2); or

"(2) promulgate a program, or portion of a program, under this title.

"(d) The Administrator shall suspend the issuance of permits promptly upon publication of notice of approval of a permit program under this section, but may in such notice retain jurisdiction over permits that have been federally issued, but for which the administrative or judicial review process is not complete. The Administrator shall continue to administer and enforce federally issued permits under this title until they are replaced by a permit issued by a permitting program. Nothing in this provision should be construed to limit the Administrator's ability to enforce permits issued by a State.

"(e) INTERIM APPROVAL.—If a program submitted under this title substantially meets the requirements of this title, but is not fully approvable, the Administrator may by rule grant the program interim approval. In the notice of final rulemaking, the Administrator shall specify the changes that must be made before the program can receive full

approval. An interim approval under this subsection shall expire on a date set by the Administrator not later than two years after such approval, and may not be renewed.

"(f) EFFECTIVE DATE.—The effective date of a permit program, or interim program, approved under this title, shall be the effective date of approval by the Administrator.

"(g) Whenever the Administrator makes a preliminary determination that a permitting authority is not adequately administering and enforcing a program, or portion thereof, in accordance with the requirements of this title, he shall notify the permitting authority of such determination and the reasons therefor. Such notice shall be made public. If the permitting authority fails to take action to assure adequate administration and enforcement, the Administrator may in the Administrator's discretion, but not before ninety days after issuing such notice, take one or more of the following actions:

"(1) withdraw approval of the program or portion by rule;

"(2) propose to apply any of the sanctions specified in section 176(a) of this Act other than the sanction specified in section 176(a)(2); or

"(3) promulgate a program, or portion of a program, under this title.

"PERMIT APPLICATIONS

"SEC. 352. (a) Any source specified in section 351(a) shall become subject to a permit program, and required to have a permit, on the later of the following dates:

"(1) the effective date of a permit program or interim permit program applicable to the source; or

"(2) the date such source becomes subject to section 351(a).

"(b)(1) The regulations required by section 351(b)(1) shall include a requirement that there is submitted with the permit application a compliance plan describing how the source will comply with all applicable requirements under this Act. The compliance plan shall include a schedule of compliance, and a schedule under which the permittee will submit progress reports to the permitting authority no less frequently than every six months.

"(2) The regulations shall further require the permittee to periodically certify that the facility is in compliance with any applicable requirements of the permit, and to promptly report, consistent with provisions of the permit, and to promptly report, consistent with provisions of the United States Constitution regarding self-incrimination, any violations of such requirements to the permitting authority.

"(c) Any person required to have a permit shall, not later than thirty months after the date on which the source becomes subject to a permit program approved or promulgated under this title, or such earlier date as the permitting authority may establish, submit to the permitting authority a compliance plan and an application for a permit signed by a responsible official, who shall certify the accuracy of the information submitted. The Administrator, in consultation with the permitting authority shall establish a schedule for submission of all or part of the application by sources or categories of sources (including any class, type, or size within such category) within the 30-month period in a manner that minimizes administrative burdens. The Administrator may base the schedule on the amount of emissions from the sources or categories of sources, air quality considerations, or such other factors as he may consider relevant. The Administrator, in consultation with the permitting authority, may extend the date for submission of permit applications by any source or category of sources for up to an additional 18 months if the Administrator determines in his discretion that insufficient resources are available to assure adequate review of such permit applications by the permitting authority or the Administrator. No additional extensions may be granted.

"(d) Except for sources required to have a permit prior to construction under sections 112, 165, 172, or 173, if an applicant has submitted a timely and complete application for a permit required by this title, but final action has not been taken on such application, the source's failure to have a permit shall not be a violation of this Act, unless the delay in final action was due to the failure of the applicant to timely submit information required or requested to process the application. No source required to have a permit under this title shall be in violation of section 351(a) before the date on which the source is required to submit an application under subsection (c) of this section.

"(e) A copy of each permit application, compliance plan, emissions or compliance monitoring report, certification, and each permit issued under this title, shall be available to the public. If an applicant or permittee is required to submit information entitled to protection from disclosure under section 114(c) of this Act, the applicant or permittee may submit such information separately. The requirements of section 114(c) shall apply to such information. The contents of a permit shall not be entitled to protection under section 114(c).

"(f)(1) Any permittee may submit an application for a modification of the permit at any time during the permit's term.

"(2) Whenever the permitting authority finds that a permit omitted a material requirement of the Act that should have been incorporated therein, or that a new requirement applicable to the permittee has been promulgated under procedures identified in section 353(f)(2), it shall provide effective notice to the permittee. The permittee shall apply for a permit modification within thirty days after receipt of such notification when the omission of an existing requirement is involved, and with regard to new requirements within such time as set forth in these new requirements. Such a modification shall be treated as a codifying permit for purposes of Section 354.

"(3) If a permittee has received notification of an omission of an existing requirement under paragraph (2) of this subsection, and has not submitted a complete application for modification within the required thirty-day period, such source shall be deemed not to have a permit with respect to emissions subject to the requirements that were the subject of the notification."

"PERMIT REQUIREMENTS AND CONDITIONS

"SEC. 353. (a) Each permit issued under this title shall include emission limitations and standards, and such other measures, including schedules of compliance where appropriate, as are necessary to assure compliance with applicable requirements of this Act.

"(b) The Administrator may by rule prescribe procedures and methods for determining compliance and for monitoring and analysis of pollutants regulated under this Act. The Administrator shall take into account the cost and feasibility of such requirements, and the extent to which they are needed to assure compliance.

"(c)(1) Each permit issued under this title shall set forth inspection, entry, monitoring, compliance certification, and reporting requirements to assure compliance with the permit terms and conditions. Such monitoring and reporting requirements shall conform to any applicable regulations under subsection (b) of this section. Any report required to be submitted by a permit issued to a corporation under this title shall be signed by a responsible corporate official, who shall certify its accuracy.

(2) A permit for a source that is an affected source under title IV shall prohibit a source from emitting sulfur dioxide in excess of allowances it holds. No permit modification shall be required for increases in emissions authorized by allowances acquired through trading or otherwise under title IV, provided that the increase complies with other requirements of the Act.

"(d) The permitting authority may, after notice and opportunity for public hearing, issue a general permit covering numerous similar sources. Any general permit shall comply with all requirements applicable to permits under this title. No source covered by a general permit shall thereby be relieved from the obligation to file an application under section 352.

"(e)(1) The permitting authority may issue a single permit to an owner or operator authorizing emissions from similar operations at multiple temporary locations. No such permit shall be issued unless it includes conditions that will assure compliance with all the requirements of this Act at all authorized locations, including, but not limited to, ambient standards and compliance with any applicable increment or visibility requirements under part C of title I. Any such permit shall in addition require the owner or operator to notify the permitting authority in advance of each change in location. The permitting authority may require a separate permit fee for operations at each location.

"(2) A single permit may be issued for a facility with multiple sources.

"(f)(1) Compliance with the terms and conditions of a permit issued in accordance with the requirements of this part shall be deemed compliance with:

"(A) all requirements of this act in existence at the time the permit is issued that are explicitly addressed by such terms and conditions; and

"(B) except as provided in paragraph (2), all requirements that are promulgated after the permit is issued, unless the Administrator finds that actual harm to public health or the environment would result during the period prior to the expiration of the permit;

"(2) Notwithstanding paragraph (1) of this subsection, compliance with the terms and conditions of a permit shall not be deemed compliance, for purposes of any enforcement action commenced by the Administrator, with requirements that are promulgated or approved by the Administrator pursuant to the procedures for informal rulemaking in section 553 of title 5 of the United States Code, or in Section 307(d) of this Act, provided that the permitted shall have been notified of such requirements under Section 352(f) of this Act;

"(3) In any action to enforce a requirement omitted from a permit, the relevant circumstances of the omission, including whether the source in good faith provided information to the permitting authority, the materiality of any failure to provide such information, the materiality of the requirements omitted from the permit, and

any mistakes of the permitting authority, shall be relevant to whether any penalty should be assessed and to the amount of such penalty. No enforcement action shall lie if the omission is the fault of the permitting authority and the source had provided the appropriate information in its permit application;

"(4) Notwithstanding the provisions of paragraph (1), compliance with a permit issued under this title shall not alter, modify or otherwise affect the authority of the Administrator under section 303 (emergency powers) or the requirements to comply with any order issued under section 303.

"NOTIFICATION TO ADMINISTRATOR AND OTHER STATES

"SEC. 354. (a)(1)(A) Each permitting authority shall transmit to the Administrator a copy of each draft permit released for public comment, and such other information as the Administrator may by rule require in order to carry out his duties under the Act. The permitting authority shall provide notice, in accordance with regulations promulgated by the Administrator, of each permit proposed to be issued by the authority, and, except as provided under subparagraph (B), transmit a copy of each such proposed permit to the Administrator for review under subsection (b).

"(B) A proposed permit shall not be required to be forwarded to the Administrator for review under subsection (b) whenever the permitting authority states in the public notice of the permit that it is a codifying permit—which is defined as a permit that implements, and does not change any material requirement of, any applicable implementation plan or other regulation or standard promulgated by the Administrator—unless—

"(i) the Administrator notifies the permitting authority, not later than the close of the public comment period that the permit is a modifying permit, which is defined as a permit that does not so implement such requirements; or

"(ii) the final permit modifies any provision in the permit submitted for public notice.

Any decision by the administrator whether to issue a notification under clause (i) shall be committed to agency discretion and not subject to judicial review.

"(2) The permitting authority shall notify all States whose air quality may be significantly affected by a modifying permit for a major source of each draft permit released for public comment, and shall provide an opportunity for such States to submit written recommendations respecting the issuance of the permit and its terms and conditions. If any part of those recommendations are not accepted by the permitting authority, such authority shall notify the State submitting the recommendations and the Administrator in writing of its failure to accept those recommendations and the reasons therefor.

"(3) For purposes of paragraph (2), emissions from a permitted source may significantly affect air quality in any State within fifty miles from the source. The Administrator may enlarge or reduce this distance by rule.

"(4) The notice required under paragraph (1)(A) for a draft modifying permit shall include a concise description of the manner in which the draft modifying permit does not implement, or otherwise changes the requirements of, any applicable implementation plan or other regulation or standard promulgated by the Administrator.

"(b) No permit shall be issued if the Administrator (1) within ninety days after receipt of the proposed permit under subsection (a)(1)(A) of this section, or (2) within ninety days after receiving notification under subsection (a)(2), objects in writing to its issuance as not in compliance with the applicable implementation plan or other applicable emission limitations, standards, or other applicable requirements of this Act. The Administrator may object to a modifying permit only if it would result in emissions regulated under an applicable implementation plan that are greater than under such plan (unless such emissions are either offset by reductions from another permitted source or are accounted for under an applicable implementation plan approved by the Administrator), or would not comply with another applicable requirement of this Act. The Administrator shall provide with the objection a statement of the reasons for the objection. A copy of any objection and statement shall be provided to the applicant.

"(c) If the permitting authority fails within ninety days after the date of the objection, to submit a permit revised to meet the objection, the Administrator shall promptly issue or deny the permit in accordance with the requirements of this title. No objection shall be subject to judicial review until the Administrator takes final action to issue or deny a permit under this subsection. A failure of the Administrator to object to a modifying permit submitted for review under subsection (a)(1)(A) of this section shall be subject to judicial review under section 307(b).

"(d) The Administrator may, by regulation, require that specified modifications to requirements of the applicable implementation plan with respect to specified categories of sources (including any class, type, or size within such category) be made only through a revision to the applicable implementation plan.

"(e)(1) The Administrator may waive the requirements of subsections (a) and (b) of this section at the time of approval of a permit program under this title for any category (including any class, type, or size within such category) of sources covered by the program.

"(2) The Administrator may by regulation establish categories of sources (including any class, type, or size within such category) to which the requirements of subsection (a) and (b) of this section shall not apply.

"(3) The Administrator may exclude from any waiver under this subsection notification under paragraph (a)(2). Any waiver granted under this subsection may be revoked or modified by the Administrator by rule.

"(f) If the Administrator finds that cause exists under section 351(b)(5)(D) to terminate, modify, or revoke and reissue a State or local permit under this title, the Administrator shall notify the permitting authority of such finding. The permitting authority shall, within ninety days after receipt of such notification, forward to the Administrator under this section a proposed determination of termination, modification, or revocation and reissuance, as appropriate. The Administrator may extend such ninety day period for an additional ninety days if the Administrator finds that a new or revised permit application is necessary, or that the permitting authority must require the permittee to submit additional information. The Administrator may review such proposed determination under the provisions of subsections (a) and (b) of this section. If the permitting authority fails to submit the required proposed determination, or if the Administrator objects and the permitting authority fails to resolve the objection within the period prescribed in subsection (c) of this section, the Administrator, may, after notice and in accordance with duly promulgated procedures, terminate, modify, or revoke and reissue the permit.

"RELATION TO OTHER AUTHORITY

"SEC. 355. (a) Nothing in this title shall prevent an air pollution control agency from establishing additional permitting requirements not inconsistent with this Act.

"(b) Nothing in this title shall be construed to authorize the Administrator, or a State, or other permitting authority, to modify or revoke any allowance granted under title IV, or to alter or amend any requirement of sections 111 or 112.

"(c) For the purposes of this Act, any permit properly issued or revised shall become part of and supersede any inconsistent portion of, the applicable implementation plan, and shall have the effect specified in section 353(f).

"(d) In promulgating any standard under section 111 or 112, the Administrator shall identify which sources or categories of sources (including any class, type, or size within such category) subject to such standard shall be subject to this title.

SEC. 502. Section 304(f)(1) is amended to read as follows:

"(1) an emission limitation, standard of performance, or an emission standard, or a schedule or timetable of compliance that is currently legally enforceable;"

COORDINATION OF PERMITS

SEC. 503. All permits issued under this part shall, to the maximum extent practicable, be coordinated and consolidated with all other permits required under this Act.

CONFORMING AMENDMENTS

SEC. 504. (a) Title I—Attainment and Maintenance of Ambient Air Quality Standards.

(1) On page 38, line 13, following "respectively)", replace the period with "; and", and add a new subparagraph (C), as follows:

"(C) Notwithstanding any other provision of this Part, for any State, upon the approval or promulgation of all or part of a permit program under Part B of Title III of this Act, permits for the operation of major stationary sources shall be issued in accordance with the requirements of that program, in lieu of the requirements of this Part, but only to the extent that program applies to such sources."

(2) On page 64, line 25, strike "It" and insert in lieu thereof the following: "Except as provided under section 172(c)(6)(C), it".

(3) On page 104, line 8, strike "It" and insert in lieu thereof the following: "Except as provided under section 172(c)(6)(C), it".

(4) On page 117, line 23, strike "It" and insert in lieu thereof the following: "Except as provided under section 172(c)(6)(C), it".

(b) Title III—Air Toxics.

(1) On page 284, line 23, following "paragraph (2)", insert the following: "or paragraph (6)".

(2) On page 292, delete lines 4 through 6, and insert in lieu thereof the following:

"(6) Notwithstanding any other provision of this subsection, for any State, upon the approval or promulgation of all or part of a

permit program under Part B of Title III of this Act, permits for sources subject to any emissions standard under this section shall be issued in accordance with the requirements of that program in lieu of the requirements of this subsection, but only to the extent that program applies to such sources."

(3) Page 285, lines 3 to 5, delete from "the Administrator" through "subsection.", and insert in lieu thereof: "The State or the Administrator, but only to the extent that the Senate has an approved program consistent with this subsection or the Administrator has promulgated a program under Part B of Title III."

(c) Title IV—Acid Deposition.

On page 428, lines 18 through 20, delete all through "Act.", and insert in lieu thereof the following:

SEC. 408. (a) PERMIT PROGRAM.—This title shall be implemented by permits issued in accordance with this section and Part B of Title III of this Act."

TITLE VI—ENFORCEMENT AND REAUTHORIZATION

SEC. 601. (a) The heading of section 113(a) of the Clean Air Act is amended by replacing the words "FINDING OF VIOLATION" with "NOTIFICATION AND COMPLIANCE ORDERS".

(b) Section 113(a)(1) of the Clean Air Act is amended as follows:

(1) In the first sentence, after "finds that any person", insert the words "has violated or"; and following the words "shall notify the person" replace "in violation of" with "who violated".

(2) In the second sentence,

(A) strike the words "If such violation extends beyond the thirtieth day after the date of the Administrator's notification," and insert in lieu thereof the words "At any time after the expiration of thirty days following the date on which such notice of the violation is issued,"; and

(B) strike all after "of such plan" and insert in lieu thereof the following: ", may issue an administrative penalty order under subsection (d), or may bring a civil action under subsection (b), without regard to the period of the violation (subject to section 2462 of title 28 of the United States Code). Nothing in this subsection shall preclude the United States from commencing a criminal action under section 113(c) without such notification for any such violation."

(c) Section 113(a)(2) of the Clean Air Act is amended as follows:

(1) Insert the words "or approved permit program" after "applicable implementation plan" in the first sentence.

(2) Insert the words "or permit program" after "in which the plan", "enforce the plan", "enforce such plan", and "requirement of such plan".

(3) Strike the "or" at the end of section 113(a)(2)(A), redesignate subparagraph "(B)" as "(C)", and insert the following new subparagraph (B):

"(B) by issuing an administrative penalty order under subsection (d) of this section, or".

(4) Insert the following new sentence at the end of section 113(a)(2): "Nothing in this subsection shall preclude the United States from commencing a criminal action under section 113(c) without such notification for any such violation.".

(d) Section 113(a)(3) of the Clean Air Act is amended as follows:

(1) Insert the words "has violated or" before the words "is in violation of" in the first sentence.

(2) Strike the words "section 111(w)" and all that follows down through "(relating to inspections, etc.), he" and insert in lieu thereof the following new language: "any requirement or prohibition of section 111(d)(2)(B), 111(e), or 111(j) of this title (relating to new source performance standards), section 112(i) of this title (relating to standards for hazardous emissions), section 114 of this title (relating to investigatory authority), section 126(d) of this title (relating to interstate pollution), section 157 of this title (relating to stratospheric ozone), section 176(a)(1) of this title (relating to sanctions), section 185(c) of this title (relating to consumer and commercial products), section 185(d) of this title (relating to hazardous waste facilities), section 327 of title III (relating to outer continental shelf requirements), section 351(a) or 352(c) of title III (relating to permits), or any requirement or prohibition of title IV (relating to acid deposition control), including, but not limited to, a requirement of any rule, order, waiver or permit promulgated, issued, or approved under those provisions or for the payment of any fee owed the United States under this Act, the Administrator:".

(3) Strike the words "or he" before the words "may bring a civil action" and insert in lieu thereof the following words: "may issue an administrative penalty order in accordance with subsection (d);".

(4) Insert after the words "may bring a civil action in accordance with subsection (b)" the words "or section 305, or the United States may commence a criminal action in accordance with subsection (c).".

(e) Section 113(a)(4) of the Clean Air Act is amended by deleting the first sentence and inserting at the end thereof: "An order issued under this subsection shall require the person to whom it was issued to comply with the requirement as expeditiously as practicable, but in no event longer than one year after the date the order was issued, and shall be nonrenewable. No order issued under this subsection shall prevent the State, the Administrator, or a court in an action brought under section 304, from assessing any penalties nor otherwise affect or limit enforcement under other provisions of this Act, nor affect any person's obligations to comply with any section of this Act, or a term or condition of any permit or applicable implementation plan promulgated or approved under this Act. The provisions of subsections (d)(2), (d)(4), and (d)(5) of this section shall apply to any order issued under this subsection.".

(f) Section 113(a)(5) of the Clean Air Act is amended to read as follows:

"(5) Whenever, on the basis of any available information, the Administrator finds that a State is not acting in compliance with any requirements of the Act relating to the construction of new sources or the modification of existing sources, the Administrator may—

"(A) issue an order prohibiting the construction, modification or operation of any major stationary source in any area to which such provisions apply;

"(B) issue an administrative penalty order in accordance with subsection (d); or

"(C) bring a civil action under subsection (b)(5).

Nothing in this subsection shall preclude the United States from commencing a criminal action under section 113(c) without such finding for any such violation.".

(g) Section 113(b) of the Clean Air Act is amended to read as follows:

"(b) CIVIL JUDICIAL ENFORCEMENT.—The Administrator shall, as appropriate, in the case of any person which is the owner or operator of any source subject to title IV, a major emitting facility, or a major stationary source, and may, in the case of any other person, commence a civil action for a permanent or temporary injunction, or to assess and recover a civil penalty of not more than $25,000 per day for each violation, or both, whenever such person—

"(1) has violated or is in violation of any requirement of an applicable implementation plan (such action shall be commenced (A) during any period of federally assumed enforcement, or (B) more than thirty days following the date of the Administrator's notification under subsection (a)(1) of a finding that such person is violating such requirement); or

"(2) has violated or is in violation of any requirement or prohibition of section 111(d)(2)(B), 111(e), or 111(j) of this title (relating to new source performance standards), section 112(i) of this title (relating to standards for hazardous emissions), section 114 of this title (relating to investigatory authority), section 126(d) of this title (relating to interstate pollution), section 157 of this title (relating to stratospheric ozone), section 176(a)(1) of this title (relating to sanctions), section 185(c) of this title (relating to consumer and commercial products), section 185(d) of this title (relating to hazardous waste facilities), section 327 of title III (relating to outer continental shelf requirements), sections 351(a) or 352(c) of title III (relating to permits), or any requirement or prohibition of title IV (relating to acid deposition control), or any order or notice issued pursuant to section 113(a), section 113(d), or section 167 of this title, or section 303 or section 307 of title III, including, but not limited to, a requirement of any rule, order, waiver or permit promulgated, issued, or approved under these provisions or for the payment of any fee owed the United States under this Act; or

"(3) attempts to construct, modify or operate a major stationary source in any area with respect to which a finding under subsection (a)(5) of this section has been made.

Any action under this subsection may be brought in the district court of the United States or the district in which the violation is alleged to have occurred, or in which the defendant resides, or where the defendant's principal place of business is located, and such court shall have jurisdiction to restrain such violation, to require compliance, to assess such civil penalty, and to collect any fees owed the United States under the Act and any noncompliance assessment and nonpayment assessment owed under section 120 and to award any other appropriate relief. Notice of commencement of such action shall be given to the appropriate State air pollution control agency. In the case of any action brought by the Administrator under this subsection, the court may award costs of litigation (including reasonable attorney and expert witness fees) to any party or parties against whom such action was brought in any case where the court finds that such action was unreasonable.".

(h) Section 113(c) of the Clean Air Act is amended to read as follows:

"(c) CRIMINAL ENFORCEMENT.—

"(1) Any person who knowingly fails to pay any fee owed the United States under this title, title III, or title IV, shall, upon conviction, be punished by a fine pursuant to title 18 of the United States Code, per

day for each violation, or by imprisonment for not more than one year, or by both. If a conviction of any person under this paragraph is for a violation committed after a first conviction of such person under this paragraph, the maximum punishment shall be doubled with respect to both the fine and imprisonment.

"(2) Any person who negligently releases into the air any hazardous air pollutant listed pursuant to section 112 of this Act or any extremely hazardous substance listed pursuant to section 11002(a)(2) of title 42 of the United States Code, which release such person knows could place another person in immediate danger of death or serious bodily injury and who thereby places another person in immediate danger of death or serious bodily injury shall, upon conviction, be punished by a fine pursuant to title 18 of the United States Code, per day for each violation, or by imprisonment for not more than one year, or by both. If a conviction of any person under this paragraph is for a violation committed after a first conviction of such person under this paragraph, the maximum punishment shall be doubled with respect to both the fine and imprisonment. For any hazardous air pollutant listed pursuant to section 112 for which the Administrator has set an emissions standard or limitation or for which a permit under Part B of title III is in effect, or for which any other relevant standard under this Act has been set, a release of such pollutant in accordance with such standard or permit shall not constitute a violation of this paragraph.

"(3) Any person who knowingly violates any requirement or prohibition of an applicable implementation plan, or of section 111(d)(2)(B), 111(e), or 111(j) of this title (relating to new source performance standards), section 112(i) of this title (relating to standards for hazardous emissions), section 114 of this title (relating to investigatory authority), section 126(d) of this title (relating to interstate pollution), section 157 of this title (relating to stratospheric ozone), section 176(a)(1) of this title (relating to sanctions), section 185(c) of this title (relating to consumer and commercial products), section 185(d) of this title (relating to hazardous waste facilities), section 327 of title III (relating to outer continental shelf requirements), sections 351(a) or 352(c) of title III (relating to permits), or any prohibition of title IV (relating to acid deposition control), or any final order or notice issued pursuant to section 113(a), section 113(d), or section 167 of this title, or section 303 or section 307 of title III, including, but not limited to, a requirement of any rule, order, waiver or permit promulgated, issued, or approved under those provisions shall, upon conviction, be punished by a fine pursuant to title 18 of the United States Code, per day for each violation, or by imprisonment for not more than five years, or by both. If a conviction of any person under this paragraph is for a violation committed after a first conviction of such person under this paragraph, the maximum punishment shall be doubled with respect to both the fine and imprisonment.

"(4) Any person who knowingly—

"(A) makes any false material statement, representation, or certification in, or omits material information from, or knowingly and materially alters, conceals or fails to maintain or file, any notice, application, record, report, plan, or other document required pursuant to this Act to be either filed or maintained (whether with respect to the requirements imposed by the Administrator or by a State); or

"(B) fails to notify or report as required under this Act; or

"(C) falsifies, tampers with, renders inaccurate, or fails to install any monitoring device or method required to be maintained or followed under this Act;

shall, upon conviction, be punished by a fine pursuant to title 18 of the United States Code, per day for each violation, or by imprisonment for not mroe than two years, or by both. If a conviction of any person under this paragraph is for a violation committed after a first conviction of such person under this paragraph, the maximum punishment shall be doubled with respect to both the fine and imprisonment.

"(5)(A) Any person who knowingly releases into the air any hazardous air pollutant listed pursuant to section 112 of this Act or any extremely hazardous substance listed pursuant to section 11002(a)(2) of title 42 of the United States Code, and who knows at the time that he thereby places another person in imminent danger of death or serious bodily injury shall, upon conviction, be punished by a fine pursuant to title 18 of the United States Code, per day for each violation, or by imprisonment for not more than fifteen years, or by both. Any person committing such violation who is an organization shall, upon conviction under this paragraph, be subject to a fine of not more than $1,000,000 per day for each violation. If a conviction of any person under this paragraph is for a violation committed after a first conviction of such person under this paragraph, the maximum punishment shall be doubled with respect to both the fine and imprisonment. For any hazardous air pollutant listed pursuant to section 112 for which the Administrator has set an emission standard or limitation or for which a permit under Part B of title III is in effect, or for which any other relevant standard under this Act has been set, a release of such pollutant in accordance with such standard or permit shall not constitute a violation of this paragraph.

"(B) In determining whether a defendant who is an individual knew that the violation placed another person in imminent danger of death or serious bodily injury—

"(i) the defendant is responsible only for actual awareness or actual belief possessed; and

"(ii) knowledge possessed by a person other than the defendant, but not by the defendant, may not be attributed to the defendant;

except in that proving a defendant's possession of actual knowledge, circumstantial evidence may be used, including evidence that the defendant took affirmative steps to be shielded from relevant information.

"(C) The term 'organization' means a legal entity, other than a government, established or organized for any purpose, and such term includes a corporation, company, association, firm, partnership, joint stock company, foundation, institution, trust, society, union, or any other association of persons.

"(D) The term 'serious bodily injury' means bodily injury which involves a substantial risk of death, unconsciousness, extreme physical pain, protracted and obvious disfigurement or protracted loss or impairment of the function of a bodily member, organ, or mental faculty.

"(6) For the purpose of this subsection, the term 'person' includes, in addition to the entities referred to in section 302(e), any responsible corporate officer.".

(i) Section 113(d) of the Clean Air Act is ameanded to read as follows:

"(d) ADMINISTRATIVE ASSESSMENT OF CIVIL PENALTIES AND PROCEDURES GOVERNING ADMINISTRATIVE COMPLIANCE ORDERS.—

"(1) The Administrator may issue an administrative order against any person assessing a civil administrative penalty of up to $25,000, per day for each violation, whenever, on the basis of any available information, the Administrator finds that such person—

"(A) has violated or is violating any requirement of an applicable implementation plan (such order shall be issued (i) during any period of federally assumed enforcement, or (ii) more than 30 days following the date of the Administrator's notification under subsection (a)(1) of this section of a finding that such person is violating such requirement); or

"(B) has violated or is violating any requirement of section 111(d)(2)(B), 111(e), or 111(j) of this title (relating to new source performance standards), section 112(i) of this title (relating to standards for hazardous emissions), section 114 of this title (relating to investigatory authority), section 126(d) of this title (relating to interstate pollution), section 157 of this title (relating to stratospheric ozone), section 176(a)(1) of this title (relating to sanctions), section 185(c) of this title (relating to consumer and commercial products), section 185(d) of this title (relating to hazardous waste facilities), section 327 of title III (relating to outer continental shelf requirements), sections 351(a) or 352(c) of title III (relating to permits), or any requirement or prohibition of title IV (relating to acid deposition control), or any order or notice issued pursuant to section 113(a), section 113(d), or section 167 of this title, or section 303 or section 307 of title III, including, but not limited to, a requirement of any rule, order, waiver or permit promulgated, issued, or approved under those provisions or for the payment of any fee owed the United States under this Act; or

"(C) attempts to construct, modify or operate a major stationary source in any area with respect to which a finding under subsection (a)(5) of this section has been made.

The Administrator's authority under this paragraph shall be limited to matters where the total penalty sought does not exceed $200,000 and the first alleged date of violation occurred no more than twelve months prior to the initiation of the administrative action.

"(2)(A) An administrative penalty order under paragraph (1) or an order under subsection (a) of this section shall be issued by the Administrator after opportunity for a hearing on the record in accordance with sections 554 and 556 of the title 5 of the United States Code. The Administrator may issue rules for discovery and other procedures for hearings under this paragraph. Before issuing such an order, the Administrator shall give written notice to the person to whom the order is to be issued of the Administrator's proposal to issue such order and provide such person an opportunity to request such a hearing on the order, within thirty days of the date the notice is received by such person. An order issued under this subsection or subsection (a) shall become final if no hearing is requested within thirty days or upon issuance of the order following the hearing provided for in this paragraph.

"(B) The Administrator may compromise, modify, or remit, with or without condi-

tions, any administrative penalty which may be imposed under paragraph (d)(1).

"(3) The Administrator may implement through regulation, after consultation with the Attorney General, a field citation program for appropriate minor violations, which authorizes the issuance of field citations assessing civil penalties not to exceed $5,000 per inspection. During any six month period, the total penalty assessed under this paragraph for any single facility shall not exceed $25,000. Any person to whom a field citation is assessed may, within a reasonable time as prescribed by the Administrator through regulation, elect to pay the penalty assessment or to request a hearing on the field citation. If a request for a hearing is not made within the time specified in the regulation, the penalty assessment in the field citation shall be final. Such hearing shall not be subject to section 554 or 556 of title 5 of the United States Code, but shall provide a reasonable opportunity to be heard and to present evidence. Payment of a civil penalty required by a field citation shall not be a defense to further enforcement by the United States or a State to correct a violation, or to assess the statutory maximum penalty pursuant to other authorities in the Act, if the violation continues.

"(4) Any person against whom a civil penalty is assessed under paragraph (3) of this subsection, or to whom an order is issued under subsection (a) of this section or under paragraph (1) of this subsection, may seek review of such assessment or order in the United States District Court for the District of Columbia, or for the district in which the violation is alleged to have occurred, in which such person resides, or where such person's principal place of business is located, by filing in such court within thirty days following the data the assessment or order becomes final, and by simultaneously sending a copy of the filing by certified mail to the Administrator and the Attorney General. The Administrator shall promptly file in such court a certified copy, or certified index, as appropriate, of the record on which the assessment or order was issued within 10 days. Such court shall not set aside or remand such assessment or order unless there is not substantial evidence in the record, taken as a whole, to support the finding of a violation or unless the order or assessment constitutes an abuse of discretion. Such order or assessment shall not be subject to review by any court except as provided by this paragraph. In any such proceedings, the United States may seek to recover civil penalties assessed under this section.

"(5) If any person fails to pay an assessment of a civil penalty or fails to comply with an order—

"(A) after the order or assessment has become final, or

"(B) after a court in an action brought under paragraph (4) has entered a final judgment in favor of the Administrator,

the Administrator shall request the Attorney General to bring a civil action in an appropriate district court to enforce the order or to recover the amount assessed (plus interest at rates established pursuant to section 6621(a)(2) of title 26, United States Code, from the date of the final order or decision or the date of the final judgment, as the case may be). In such an action, the validity, amount, and appropriateness of such order or assessment shall not be subject to review. Any person who fails to pay on a timely basis a civil penalty under this section shall be required to pay, in addition to such penalty and interest, the United States' enforcement expenses, including but not limited to attorneys fees and costs incurred by the United States for collection proceedings, and a quarterly nonpayment penalty for each quarter during which such failure to pay persists. Such nonpayment penalty shall be in an amount equal to 20 per centum of the aggregate amount of such person's outstanding penalties and nonpayment penalties accrued as of the beginning of such quarter.".

(j) Current section 113(e) of the Clean Air Act is deleted in its entirety and replaced with the following new section 113(e) and 113(f);

"(e) PENALTY ASSESSMENT CRITERIA.—

"(1) In determining the amount of any penalty to be assessed under this section or section 304(a), the court shall take into consideration (in addition to such other factors as justice may require) the size of the business, the economic impact of the penalty on the business, the violator's full compliance history and good faith efforts to comply, the duration of the violation as established by any credible evidence (including evidence other than the applicable test method), payment by the violator of penalties previously assessed for the same violation, the economic benefit of noncompliance, and the seriousness of the violation. The court shall not assess penalties for noncompliance with orders under section 303, administrative subpoenas under section 307(a), and actions under section 114 of this Act, where the violator had sufficient cause to violate or fail or refuse to comply with the order, subpoena, or action.

"(2) A penalty may be assessed for each day of each violation. For purposes of determining the number of days of violation for which a penalty may be assessed under subsection (b) or (d)(1) of this section, or section 304(a), or an assessment may be made under section 120, where the Administrator or an air pollution control agency has notified the source of the violation, and the plaintiff makes a prima facie showing that the conduct or events giving rise to the violation are likely to have continued or recurred past the date of notice, the days of violation shall be presumed to include the date of such notice and each and every day thereafter until the violator establishes that continuous compliance has been achieved, except to the extent that the violator proves by a preponderance of the evidence that there were intervening days during which no violation occurred or that the violation was not continuing in nature.

"(f) MONETARY AWARDS.—The Administrator may pay an award, not to exceed $10,000, to any person who furnishes information or services which lead to a criminal conviction or a civil judicial or administrative judgment of liability for any violation of this Act enforced under this section. Any officer or employee of the United States or any State or local government who furnishes information or renders service in the performance of an official duty is ineligible for payment under this subsection. An authorized contractor acting as a representative of the Administrator shall be considered an employee of the United States for purposes of this subsection. The Administrator may, by regulation, prescribe additional criteria for eligibility for such an award.".

REVIEWABILITY OF ADMINISTRATIVE ORDERS

SEC. 502. (a) Section 307(b)(2) of the Clean Air Act is amended by adding at the end thereof: "Notices issued under sections 113 or 120, orders under section 303, administrative subpoenas under section 307(a), and actions under sections 114, 206(c) and 208 of this Act are not considered final actions for purposes of this section. Such orders, subpoenas, and actions shall be subject to judicial review only in a proceeding commenced by the United States under sections 113, 120, 204 or 205, or in a citizen suit commenced under section 304, to enforce the subpoena or action. No such order, subpoenas, or action may be challenged in any citizen suit under section 304 unless the Administrator and the Attorney General are notified in writing of such challenge.".

(b) Section 307(e) of the Clean Air Act is amended by inserting at the end thereof the following: "Subpoenas issued under section 307(a), orders under section 303, and actions under sections 114, 206(c) and 208 of this Act may only be reviewed in a proceeding commenced by the United States under section 113, 120, 204, or 205, or in a citizen suit under section 304, to enforce the subpoena, order, or action.".

(c) Section 307(b)(1) of the Clean Air Act is amended by striking "under section 113(d) of this title," immediately before "under section 119 of this title" in the second sentence.

COMPLIANCE CERTIFICATION

SEC. 603. (a) Section 114(a)(1) of the Clean Air Act is amended by—

(1) inserting ", on a one-time, periodic or continuous basis" immediately before "to (A) establish and maintain";

(2) inserting "audit procedures" immediately before "or methods, (D)";

(3) inserting "procedures or" immediately before "methods, at such locations,";

(4) inserting "during such continuous periods" immediately before ", and in such manner as the Administrator";

(5) striking "and" immediately before subparagraph (E); and

(6) redesignating subparagraph (E) as (G) and inserting the following new subparagraph: "(E) keep periodic or continuous records on control equipment parameters, production variables or other indirect data when direct monitoring of emissions is impractical, (F) submit compliance certifications in accordance with section 114(a)(3); and".

(b) Section 114(a) is amended by adding the following new paragraph:

"(3) The Administrator shall in the case of any person which is the owner or operator of a major stationary source, and may, in the case of any other person, require enhanced monitoring and submission of compliance certifications. Compliance certifications shall include (i) identification of the applicable requirement that is the basis of the certification, (ii) the method used for determining the compliance, status of the source, (iii) the compliance status, (iv) whether compliance is continuous or intermittent, (v) such other facts as the Administrator may require. Compliance certifications and monitoring data shall be public information. Submission of a compliance certification shall in no way limit the Administrator's authorities to investigate or otherwise implement the Act.".

(c) Section 307(b)(1) is amended by inserting "or revising regulations for enhanced monitoring and compliance certification programs under section 114(a)(3) of this Act," immediately before "or any other final action of the Administrator".

CONTRACTOR INSPECTIONS

SEC. 604. (a) Section 114(a)(2) of the Clean Air Act is amended by inserting "(including an authorized contractor acting as a representative of the Administrator)," immediately before "upon presentation of his credentials".

(b) Section 114(c) is amended by striking "except that such record," and all that follows in the subsection and inserting "any authorized representative of the Administrator (including an authorized contractor acting as a representative of the Administrator) shall be considered an employee of the United States for purposes of the provisions of section 1905 of title 18. Nothing in this subsection shall prohibit the Administrator or an authorized representative of the Administrator (including any authorized contractor acting as a representative of the Administrator) from disclosing records, reports or information to other officers, employees or authorized representatives of the United States (including any authorized contractor acting as a representative of the Administrator), or to any State concerned with carrying out this Act, or when relevant in any proceeding under this Act.".

ADMINISTRATIVE ENFORCEMENT SUBPOENAS

SEC. 605. Section 307 of the Clean Air Act is amended by redesignating subsection (a)(1) as subsection (a), and, in that newly designated subsection, striking "or" before "section 202(b)(5)" and inserting "any investigation, monitoring, reporting requirement, entry, compliance inspection, or administrative enforcement proceeding under section 113, section 114, section 120, section 205, section 206, section 208, section 303 or section 306 of the Act," immediately after "section 202(b)(4) or 211(c)(3)".

EMERGENCY ORDERS

SEC. 606. Section 303(a) of the Clean Air Act is amended by—

(1) striking "the health of persons, and that appropriate State or local authorities have not acted to abate such sources" and inserting "public health or welfare, or the environment";

(2) revising the second sentence to read "If it is not practicable to assure prompt protection of public health or welfare or the environment by commencement of such a civil action, the Administrator may issue such orders as may be necessary to protect public health or welfare or the environment.";

(3) striking the last three sentences in their entirety; and

(4) inserting the following at the end of the subsection:

"Prior to taking action under this section, the Administrator shall consult with appropriate State and local authorities and attempt to confirm the accuracy of the information on which the action proposed to be taken is based. Any order issued by the Administrator under this section shall be effective upon issuance and shall remain in effect for a period of not more than sixty days, unless the Administrator brings an action pursuant to the first sentence of this section before the expiration of that period. Whenever the Administrator brings such an action within the sixty-day period, such order shall remain in effect for an additional fourteen days or for such longer period as may be authorized by the court in which such action is brought.".

CONTRACTOR LISTINGS.

SEC. 607. Section 306(a) of the Clean Air Act is amended by—

(a) striking "(1)" after "section 113(c)"; and

(b) inserting at the end thereof "For convictions arising under section 113(c)(4), the condition giving rise to the conviction also shall be considered to include any substantive violation of this Act associated with the violation of 113(c)(4). The Administrator may extend this prohibition to other facilities owned or operated by the convicted person."

JUDICIAL REVIEW PENDING RECONSIDERATION OF REGULATION

SEC. 608. Section 307(b)(1) of the Clean Air Act is amended by adding at the end thereof the following: "A petition for reconsideration by the Administrator of any otherwise final agency action shall not render the action nonfinal for purposes of judicial review nor extend the time within which a petition for review may be filed, and shall not postpone the effectiveness of the agnecy action.".

CITIZEN SUITS AND PETITIONS

SEC. 609. (a) CIVIL PENALTIES.—

(1) Section 304(a) of the Clean Air Act is amended by inserting immediately before the period at the end thereof: ", and to apply any appropriate civil penalties (except for actions under paragraph (a)(2)), including those pursuant to a consent judgment, payable to the special fund as established in subsection (g), taking into account the factors listed in section 113(g)".

(2) Section 304 of the Clean Air Act is amended by adding the following new subsection:

"(g) PENALTY FUND.—Penalties received under subsection (a) shall be deposited in a special fund in the United States Treasury for licensing and other services, which shall be available for appropriation, and remain available until expended for use by the Environmental Protection Agency to finance air compliance and enforcement activities.".

(3) Paragraph (2) of subsection 304(c) of the Clean Air Act is amended to read as follows:

"(2) In any action under this section, the Administrator, if not a party, may intervene as a matter of right at any time in the proceeding. In such intervention, the Administrator may substitute himself as the plaintiff with regard to any claim for civil penalties. Upon such substitution, the citizen plaintiff's claims for civil penalties shall abate. A judgment in an action under this section to which the United States is not a party shall not, however, have any binding effect upon the United States.".

(b) NATURE OF VIOLATION.—Section 304(a) of the Clean Air Act, is amended by subsection (a), is further amended by—

(1) striking the word "or" at the end of paragraph (2) and inserting the following new paragraph (4) at the end of paragraph (3):

"(4) against any person who operates any source requiring a permit under section 351(a) without such a permit, except as provided in section 352(d), or who is alleged to be in violation of any condition of such permit or of a temporary operating permit issued under section 112."

(2) adding at the end thereof the following: "Where a provision of the Act mandates that the Administrator shall take specified action when certain preconditions are met, and the Administrator has taken final action finding such preconditions, the court's power to compel the specified action under paragraph (2) shall not depend upon whether the Administrator has published notice of such final action in the Federal Register."

(c) NOTICE TO THE GOVERNMENT.—Section 304(c) is amended by adding the following new paragraph:

"(3) Whenever any action is brought under this section the plaintiff shall serve a copy of the complaint on the Attorney General of the United States and on the Administrator. No consent judgment shall be entered in an action brought under this section in which the United States is not a party prior to forty-five days following the receipt of a copy of the proposed consent judgment by the Attorney General and the Administrator during which time the government may submit its comments on the proposed consent judgment to the court and parties or may intervene as a matter of right.".

(d) UNREASONABLE DELAY.—Section 307(d)(1) of the Clean Air Act is amended by inserting before the last sentence the following:

"However, actions under this subsection shall be subject to the provisions of subsection 706(1) of title 5 of the United States Code.".

(e) PETITIONS.—Section 307 of the Clean Air Act is amended by adding the following new subsection at the end thereof:

"(i) PETITIONS.—(1) Any interested person shall have the right to petition the Administrator to issue, amend, reconsider, or repeal any regulation issued under the authority of this Act, unless such right is expressly limited by any other provision of this Act.

"(2) To the maximum extent practicable, within six months after receiving a petition, the Administrator shall publish in the Federal Register a finding as to whether the petition presents substantial information indicating that the petition has merit. In the event the petition is found not to present such information, the Administrator shall deny it and publish notice of such denial with notice of the finding required by the preceding sentence.

"(3) In the event the Administrator finds that the petition presents substantial information indicating that it has merit, the Administrator shall immediately undertake a review of the regulation that is the subject of the petition, and shall either grant or deny such petition within twelve months of the date of the Federal Register finding, except that in the case of a petition for reconsideration under section 307(d)(7)(B), the Administrator shall grant or deny the petition not later than twelve months after receiving such petition. In any case in which the Administrator grants a petition, the Administrator shall take final action in response to any such petition within a reasonable time.".

ENHANCED IMPLEMENTATION AND ENFORCEMENT OF NEW SOURCE REVIEW REQUIREMENTS

SEC. 610. (a) Section 167 of the Clean Air Act is amended by striking "the construction of a major emitting facility" and inserting in lieu thereof "the operation, construction, or modification of a major emitting facility"; and

(b) inserting at the end thereof the following: "An order issued by the Administrator under this section shall become effective upon issuance. Any person to whom such an order is issued may request a hearing under section 307(h) of this title. If a hearing is requested but not commenced within the time provided by regulation, such order shall be automatically stayed, and no penalties for

noncompliance shall accrue thereafter, until such hearing is commenced.".

(c) Section 307 of the Clean Air Act is amended by adding the follwing new subsection:

"(h) (1) The Administrator shall provide any person to whom an order is issued under section 167 of this title an opportunity for a hearing in accordance with sections 554 and 556 of title 5 of the United States Code. The Administrator shall issue rules for procedures for hearings under this subsection, including provisions for an expedited hearing. If a request for a hearing is not made within 30 days, the order shall be final and not subject to review by any court or agency.

"(2) Once a final decision in a hearing under paragraph (1) of this subsection has been issued, the person to whom the order was issued may seek review in the United States District Court for the District of Columbia, or for the district in which the violaiton or emergency is alleged to have occurred, in which such person resides, or where such person's principal place of business is located, by filing in such court within thirty days following the date of the final decision. Within thirty days thereafter, the Administrator shall file in such court a certified copy, or certified index, as appropriate, of the record on which the final decision was issued. Such court shall not set aside or remand such order or final decision unless there is not substantial evidence in the record, taken as a whole, to report the finding of a violation or unless the Administrator's decision constitutes an abuse of discretion. After the person to whom the order was issued has exercised its right to an administrative hearing and, where applicable, judicial review, or after the time for requesting such hearing or review has passed, the validity of the order shall not be subject to review by any court or agency.".

MOVABLE STATIONARY SOURCES

SEC. 611. Section 302 of the Clean Air Act is amended by adding the following subsection:

"(q) STATIONARY SOURCE.—The term "stationary source" means generally any source of an air pollutant except those emissions resulting directly from an internal combustion engine for transportation purposes.".

ENFORCEMENT OF NEW TITLES OF THE ACT

SEC. 612. Section 120(a)(2)(A)(ii) of the Clean Air Act is amended by striking "section 111 or 112" and inserting "sections 111, 112, 167, 303, 351(a) or 352(c), or with any requirement or prohibition of title IV,".

AUTHORIZATIONS

SEC. 613. Title III of the Clean Air Act is amended by adding at the end thereof the following new section:

"(c)(1) there are authorized to be appropriated $120,000,000 for each of the fiscal years ending September 30, 1991, 1992, 1993, 1994, and 1995 to make grants to the States pursuant to section 105. In addition there are authorized to be appropriated $50,000,000 for each of the fiscal years ending September 30, 1991, 1992, and 1993 to make grants to the States to prepare implementation plans as required by subpart 2, 3, or 4 of part D.

"(2) There are authorized to be appropriated $90,000,000 for each of the fiscal years ending September 30, 1991, 1992, 1993, 1994, and 1995 to carry out the research and development activities authorized by sections 103 and 104 and other sections of this Act.

"(3) In addition to the sums authorized by paragraphs (1) and (2) there are authorized to be appropriated $250,000,000 for each of the fiscal years ending September 30, 1991, 1992, 1993, 1994, and 1995 to carry out the activities authorized under this Act.".

SIMPSON AMENDMENT NO. 1457

Mr. SIMPSON proposed an amendment to amendment No. 1293 (in the nature of a substitute) proposed by Mr. MITCHELL (and others) to the bill S. 1630, supra, as follows:

On page 245, line 17, add to section 112(d) the following new subsection:

"(10) No standard for radionuclide emissions from facilities licensed by the Nuclear Regulatory Commission (or an Agreement State) is required to be promulgated under this section if the Administrator determines, after consultation with the Nuclear Regulatory Commission, that the regulatory program established by the Nuclear Regulatory Commission pursuant to the Atomic Energy Act provides an ample margin of safety to protect the public health. Nothing in this subsection shall preclude or deny the right of any, State or political subdivision thereof to adopt or enforce any standard or limitation respecting emissions of radionuclides which is more stringent than the standard or limitation in effect under sections 111 or 112.

BAUCUS AMENDMENT NO. 1458

Mr. BAUCUS proposed an amendment to amendment No. 1293 (in the nature of a substitute) proposed by Mr. MITCHELL (and others) to the bill S. 1630, supra, as follows:

On page 385, after line 14, insert the following: "The Administrator shall conduct, and transmit to Congress not later than two years after the enactment of this Act, a study of the emissions of hazardous air pollutants from motor vehicle tire incineration facilities and the feasibility of substituting appropriate tire recycling procedures for current and projected tire incineration facilities. There are authorized to be appropriated such sums as may be necessary.".

CHAFEE AMENDMENT NO. 1459

Mr. CHAFEE proposed an amendment to amendment No. 1293 (in the nature of a substitute) proposed by Mr. MITCHELL (and others) to the bill S. 1630, supra, as follows:

1. On page 30, line 3, after "(unless", add the following: "the Administrator determines that other measures are more appropriate or".

2. On page 39, line 7, after "appears," add the following:

"by inserting 'and' at the end of subsection (a)(2), and by replacing the semicolon and 'and' at the end of subsection (a)(3) with a period and deleting paragraph (4) of subsection (a),".

3. (a)(1) On page 11, after line 13, add the following:

"(7) The Administrator may, in the Administrator's discretion, at any time the Administrator deems appropriate, require a State to designate areas (or portions thereof) with respect to the national ambient air quality standard for lead in effect as of the date of enactment of this paragraph, in accordance with the procedures under paragraph (1)."

(2)(i) On page 8, line 14, after "(1)" add "or (7)".

(ii) On page 8, line 18, strike "or (4)", and insert in lieu thereof ", (4), or (7)".

(b) On page 125, after line 21, add the following:

ADDITIONAL REQUIREMENTS FOR AREAS DESIGNATED NONATTAINMENT FOR SULFUR DIOXIDE, NITROGEN OXIDES, OR LEAD

Sec. 109A. New requirements for areas designated D of title I of the Clean Air Act is amended by adding the following new subpart after subpart 4:

"Subpart 5—Additional Provisions for Areas Designated Nonattainment for Sulfur Dioxide, Nitrogen Oxides, or Lead

"PLAN SUBMISSION DEADLINES

"Sec. 195. (a) Any State containing an area designated or redesignated under section 107(f) as nonattainment with respect to the national primary air quality standards for sulfur dioxide, nitrogen oxides, or lead subsequent to the date of enactment of this section shall submit to the Administrator, within 18 months of the designation or redesignation, an applicable implementation plan meeting the requirements of section 110 and this part.

"(b) Any State containing an area designated nonattainment with respect to national primary ambient air quality standards for sulfur dioxide or nitrogen oxides as of the date of enactment of this section, but lacking a fully approved implementation plan complying with the requirements of this Act (including part D) as in effect immediately prior to the date of enactment of this section, shall submit to the Administrator, within 18 months of enactment of this section, an implementation plan meeting the requirements of section 110 and subpart 1 (except as otherwise prescribed by section 196).

"ATTAINMENT DATES

"Sec. 196. (a) Implementation plans required under section 1959(a) shall provide for attainment of the relevant primary standard as expeditiously as practicable but no later than 5 years from the date of the nonattainment designation or redesignation.

"(b) Except as provided in subsection (c), implementation plans required under section 195(b) shall provide for attainment of the relevant primary national ambient air quality standard within 5 years from the date of enactment of this section.

"(c) Implementation plans for nonattainment areas for sulfur dioxide or nitrogen oxides with plans that were approved by the Administrator before the date of enactment of this subpart but, subsequent to such approval, were found by the Administrator to be substantially inadequate, shall provide for attainment of the relevent primary standard within 5 years from the date of such finding.

4. On page 39, after line 2, add the following:

(E) A new subsection (d) is added as follows:

"(d) PROHIBITION ON USE OF OLD GROWTH ALLOWANCE.—Any growth allowance included in an applicable implementation plan to meet the requirements of section 172(b)(5) (as in effect immediately before the date of enactment of the Clean Air Act Amendments of 1989) shall not be valid for use in any area that received or receives a notice under section 110(a)(2)(H)(ii) (as in effect immediately before the date of enactment of the Clean Air Act Amendments of 1989) or under section 110(d)(4) that its applicable

implementation plan containing such allowance is substantially inadequate."

5. (a) On page 90, line 9, delete "115, 120, and 304,", and insert in lieu thereof the following:

"120, 304, and 307 and other enforcement provisions of this Act".

(b) On page 90, line 10, after "(4)", strike all through "(2)." on line 13, and insert in lieu thereof the following:

"Each State may develop and submit to the Administrator a procedure under State law for implementing and enforcing regulations promulgated under this subsection. If the Administrator finds the State procedure adequate, he shall approve such procedure. Nothing in this paragraph shall prohibit the Administrator from enforcing any applicable regulations under this subsection.

(c) On page 90, line 20, after "equipment", add "measures", and on line 21, after "processes", insert "methods".

(d) On page 91, line 6, strike "ozone precursors', and insert in lieu thereof "volatile organic compounds".

(e) On page 91, line 8, strike the semicolon and "and" and all that follows through line 11, and insert in lieu thereof the following:

"or motor vehicles, non-road vehicles, and non-road engines as defined under section 216."

6. (a) On page 13, line 23, strike "and".

(b) On page 14, line 2, after "year", add the following:

", procedures for estimating motor vehicle miles of travel,"

(c) On page 14, line 2, after "and", add "emissions factors for".

(d) On page 14, line 5, strike the period, and insert in lieu thereof a semicolon and "and" and the following:

"(3) guidelines for emission reduction requirements of this Act (including, but not limited to, preparation of base inventories, accounting for stationary and mobile source growth, and calculating the emission reductions that are creditable toward specific reduction requirements)."

7. On page 24, line 6, strike all following the comma through "revision," on line 8; beginning on line 13, strike "by" and everything through the end of the parenthetical on line 14 and insert in lieu thereof "by such date".

8. On page 25, line 18, strike "within" and all that follows through "(2)" on line 19.

9. On page 60, line 5, strike "that" and all that follows through "available" on line 8, and insert in lieu thereof the following: "designated nonattainment for ozone under section 107(f)(3)".

10. (a) On page 60, line 16, after "available", add "as determined by the Administrator".

(b) On page 60, line 18, strike "same" and all that follows through "Administrator" on line 19, and insert in lieu thereof the following:

"interpretation methodology issued by the Administrator most recently before the date of enactment of this subpart".

11. (a) On page 61, line 21, strike "classified" and insert in lieu there "designated".

(b) On page 62, line 1, strike "107 and" and insert in lieu thereof "107(d)(5) and classified pursuant to".

(c) On page 62, line 10, after "Administrator", add the following:

"(or in the calendar year of classification, in the case of an area subsequently designated nonattainment under section 107(d)(5) and classified pursuant to this subpart)."

(d) On page 92, lines 16-17, after "attainment", add the following:

", and then shall be submitted, to the extent required, in accordance with the maintenance plan".

12. (a) On page 63, line 4, after "submitted", insert "as expeditiously as practicable but no later than 18 months after the date such revision is submitted to the Administrator, and shall show such emissions".

(b) On page 63, line 6, after "was", insert "required to be".

(c) On page 63, line 6, after "Administrator", insert the following:

", or another appropriate year if such emission data are shown not to be reasonably available".

(d) On page 63, line 8, after "thereafter.", add the following:

"The State shall make such statements, or the data contained therein, available to the Environmental Protection Agency, upon request."

13. (a) On page 69, line 4, after "value", add the following:

", as determined by the Administrator under section 181(a),".

(b) On page 69, line 11, replaces the period with a semicolon and strike "The design" and all that follows through "subpart;" on line 15.

14. On page 75, line 21, after "beginning", insert the following:

"in the first calendar year that commences on or after the date".

15. (a) On page 100, line 6, strike "which" and all that follows through "available" on line 9, and insert in lieu thereof the following:

"designated nonattainment for carbon monoxide under section 107(f)(3)".

(b) On page 100, line 11, strike "the standard" and insert in lieu thereof the following:

"the national primary ambient air quality standard for carbon monoxide averaged over an eight-hour period".

16. (a) On page 101, line 1, after "available", insert ", as determined by the Administrator,".

(b) On page 101, line 3, strike "same" and all that follows through "Administrator" on line 4, and insert in lieu thereof the following:

"interpretation methodology issued by the Administrator most recently before the date of enactment of this subpart".

17. On page 102, lines 15-17, strike "classified" and insert in lieu thereof "designated"; strike "107 and" and insert in lieu thereof "107(d)(5) and classified pursuant to"; after "subsection)" add "a"; and strike "inventories" and insert in lieu thereof "inventory for the calendar year of classification".

18. (a) On page 77, line 21, replace the period with a semicolon and add the following:

"(7) Within the timeframes provided in that section, such revisions are as required by section 212(a)(8) to implement the clean alternative fuel vehicle program with respect to the Federal government fleet program described in section 212(a)(1)(B)."

(b) On page 80, line 10, replace the period with a semicolon and add the following:

"(3) within the timeframes provided by that section, such revisions as are required by section 212(a)(8) to implement the clean alternative fuel vehicle program with respect to the private fleet program described in section 212(a)(1)(C) and the general vehicle requirements described in section 212(a)(2)."

19. (a) On page 58, line 15, strike "110(a)(2)" and insert in lieu thereof "110(b)(2)".

(b) On page 65, line 21, strike "107 of" and insert in lieu thereof "107(d)(5) and".

(c) On page 69, line 23; page 77, line 25; and page 103, line 3, strike "107" and insert in lieu thereof "107(d)(5)".

20. On page 115, line 5, strike "1993" and insert in lieu thereof "1994".

21. On page 69, lines 18-19, strike "172(a)(6), section 173, and title V", and insert in lieu thereof the following:

"172(c)(6) (as it relates to requirements for permits for the construction of new or modified major stationary sources), and 173(a)".

22. (a) On page 53, lines 11-12, strike "and operation".

(b) On page 53, line 16, strike "173" and insert in lieu thereof "173(a)".

23. (a) On page 31, line 17, after "SAVINGS CLAUSE", insert "(1)".

(b) On page 31, after line 24, add the following:

"(2) In the case of an area to which, immediately prior to the date of enactment of the Clean Air Act Amendments of 1990, the prohibition on construction or modification of major stationary sources prescribed in section 110(a)(2)(I) as in effect immediately prior to the date of enactment of the Clean Air Act Amendments of 1990 applied by virture of a finding of the Administrator that the State containing such area had not submitted an implementation plan meeting the requirements of section 172(b)(6) (relating to establishment of a permit program) or 172(a)(1) (to the extent such requirements relate to provision for attainment of the primary national ambient air quality standard for sulfur oxides by December 31, 1982) as in effect immediately prior to the date of enactment of the Clean Air Act Amendments of 1990, no major stationary source of the relevant air pollutant or pollutants shall be constructed or modified in such area until the Administrator finds that the plan for such area meets the applicable requirements of section 172(c)(6)(A) (as redesignated by this Act), insofar as they relate to the permit requirements for construction of new or modified major stationary sources, and section 173(a) (relating to construction permit programs for such sources) or subpart 5 of part D (relating to attainment of the primary national ambient air quality standard for sulfur dioxide in effect as of the date of enactment of this paragraph), respectively.

24. (a) On page 69 line 3, after "(2)", add "(A)".

(b) On page 69, line 4, strike "in" and all that follows through "subpart" on line 5, and insert in lieu thereof a comma and "as determined under section 181(a),"

(c) page 69, line 11, change the period to a semi-colon and strike all that follows through "subpart;" on line 15.

(d) On page 69, after line 15, add the following:

"(B) For any such area that is not required to comply with the requirements of subsection (a)(1), the plan for which already includes, or was required by section 172(b)(11)(B) (as in effect immediately before the date of enactment of the Clean Air Act Amendments of 1989) to have included, a specific schedule for implementation of a vehicle emission control inspection and maintenance program, the State shall submit, immediately after the date of enactment of this section, a revision that includes any provisions necessary to provide for a vehicle inspection and maintenance program."

25. (a) Page 61, after line 14, add the following:

"(e) Any area that is not designated nonattainment for ozone under section 107 as of the date of enactment of this section, and that is subsequently redesignated to nonattainment for ozone under section 107, shall, at the time of the redesignation, be classified by operation of law in accordance with the table under subsection (a). Upon its classification, the area shall be subject to the same requirements under section 110, subpart 1 of this part, and this subpart that would have applied had the area been so classified as of the time of the classification under subsection (a), except that any absolute, fixed date applicable in connection with any requirement is extended by operation of law by a period equal to the length of time between the date of enactment of this section and the date the area is classified.

(b) Page 102 after line 2, add the following:

"(e) Any area that is not designated nonattainment for carbon monoxide under section 107 as of the date of enactment of this section, and that is subsequently redesignated to nonattainment for carbon monoxide under section 107, shall, at the time of the redesignation, be classified by operation of law in accordance with the table under subsection (a). Upon its classification, the area shall be subject to the same requirements under section 110, subpart 1 of this part, and this subpart that would have applied had the area been so classified as of the time of the classification under subsection (a), except that any absolute, fixed date applicable in connection with any such requirement is extended by operation of law by a period equal to the length of time between the date of enactment of this section and the date the area is classified.

(c) On page 119, line 5, strike "enactment of this subpart" and insert in lieu thereof, "designation of such area as nonattainment for PM-10."

(d) On page 124, line 15, strike "enactment of this subpart" and insert in lieu thereof, "designation of such area or areas as nonattainment for PM-10".

27. On page 29, line 21, insert "a" before "subsequent".

28. On page 30, line 24, delete "one."

29. On page 33, line 10, replace the "," with "or".

30. On page 47, line 24, strike "moratorium is available" and insert in lieu thereof "Administrator may apply such prohibition".

31. On page 53, lines 1-2, strike "No major stationary source of any pollutant shall be constructed or modified" and insert in its place, "No person shall construct or modify a major stationary source of any pollutant".

32. On page 60, between lines 11 and 12, strike "more than 20 per centum but not more than 50 per centum" and insert in lieu thereof, "more than 20 per centum but less than 50 per centum"; and strike "more than 50 per centum but not more than 120 per centum" and insert in lieu thereof, "Equal to or greater than 50 per centum but not more than 120 per centum".

33. On page 67, beginning on line 14, strike "persons within the area transferring gasoline to a motor vehicle fuel tank from a gasoline dispensing system use a fill nozzle" and insert in lieu thereof "owners or operators of gasoline dispensing systems within the area install and operate a system", and on line 24, strike "sell" and insert in lieu thereof "dispense".

34. On page 71, line 12, insert after "12 per centum" the following: "(in addition to the reductions required under paragraph (2))".

35. On page 91, beginning at line 19, strike "reductions in nationwide emissions of volatile organic compounds of 4 per centum below the level of such emissions in the calendar year of enactment of this subpart" and insert in lieu thereof: "a 90 per centum reduction in uncontrolled emissions of volatile organic compounds from such facilities".

36. On page 73, line 20, strike "lessor" and insert "lesser".

37. On page 104, line 8, insert "for any person" "after unlawful".

38. On page 117, line 23, insert "for any person" after "unlawful".

39. On page 131, line 1, strike "Administrator" and insert in lieu thereof "Secretary", and after "regulations" insert "promulgated under paragraph (1)".

40. On page 132, line 18, change "Sec. 112" to "Sec. 112(a)" and on page 134, line 16, add the following:

"(b) Section 302(e) is amended by inserting ', or an Indian tribe or authorized tribal organization or Alaska Native village or organization' at the end thereof.".

41. On page 134, line 12, strike "than such responsibility may be assumed or maintained by a State." and insert in place thereof "than this Act requires of a State."

42. On page 54, line 15; page 108, line 24; page 109, line 11; page 110, line 3, and page 111, lines 7, 17 and 21, strike "(g)" and insert in lieu thereof "(e)".

AMENDMENTS TO TITLE II

1. In Table 1b on page 138, after the line beginning "PM", insert "CO", "3.4 gpm", and "4.2 gpm" in that order under the appropriate headings.

2. On page 139, in the heading for Table 1d, strike "GASOLINE" and insert in its place "DIESEL".

3. In Table 1e on pages 139 and 140, strike "tailpipe certification" after "0.2" and "1.7" in the lines beginning "No_x" and "CO", and insert "gpm." in its place in both instances.

4. On page 142, in line 2, insert "to" after "attributable".

5. In Table 2 on page 143, insert "EXHAUST" after "Table 2.—", strike "3,750" in the first line that begins "Trucks" and insert in its place "3,751", and insert "urban" before "buses" in the line beginning "Heavy", strike "1992 and after——0.1gbh" and insert in lieu thereof "1991——0.25gbh", and insert on the following line "Heavy duty urban buses——1992 and after——0.1gbh".

6. On page 143, in line 3, strike "(2)" and insert in its place "(9)".

7. On page 144, line 9, strike out "regulation" and insert in lieu thereof: "regulations".

8. On page 154, line 6, strike "212(a)(7)" and insert in lieu thereof, "212(a)(6)".

9. On page 154, in line 15, strike "tail pipe" and insert in its place "exhaust emission."

10 On page 154, in line 20, after "which" insert ", as of the date of enactment," and strike "presently".

11. On page 154, in line 22, strike the first "of".

12. On page 156, in line 14, insert a comma after "trucks".

13. On page 158, in line 5, strike "Post Master" and insert in its place "Postmaster".

14. On page 161, in line 24, strike "emission".

15. On page 162, in line 5, strike "reduction".

16. On page 162, in line 8, strike "(2)".

17. On page 162, in line 12, strike "reduction".

18. On page 164, in line 16, insert "Tables 1a and 1c of" after "under".

19. On page 165, in line 2, strike "from" and insert in its place "for".

20. On page 170 in line 2, insert "of" after "date".

21. On page 172, in line 1, strike "performance" and insert in its place "emission".

22. On page 172, in line 5, strike "performance" and insert in its place "emission".

23. On page 172, in line 8, strike "(2)" and insert in its place "(ii)".

24. On page 172, in line 10, strike "after".

25. On page 172, in line 21, strike "(2)" and insert in its place "(ii)".

26. On page 173, in lines 5 and 6, strike "VEHICLES, FUEL SYSTEMS, AND".

27. On page 174, in line 3, after "under" insert "section".

28. On page 174, in line 5, strike "opts" and insert in its place "elects".

29. On page 178, in line 22, strike "one" and insert in its place "each".

30. On page 188, in line 15, strike "Paragraph" and insert in its place "clause".

31. On page 188, in line 17, strike "State" and insert in its place "area".

32. On page 188, in line 21, strike "State" and insert in its place "area".

33. On page 189, in line 5, strike "request" and insert in its place "revision".

34. On page 193, in line 2, after the first "to" insert "or greater than".

35. On page 193, line 6, through page 194, line 10, move the language that starts with "Administrator" and ends with "period." to page 195, in line 15, after the second "the".

36. On page 193, in line 11, after "sold" insert "to a date later than October 1, 1994,".

37. On page 195, in line 14, strike the "s" after "requirement".

38. On page 199, in line 14, strike "219" and insert in its place "216".

39. On page 199, in lines 14 and 15, strike "(as redesignated by section 206)".

40. On page 201, in line 3, strike "by" and, in lines 3 and 4, strike "of the Clean Air Act Amendments of 1990".

41. On page 201, line 21, insert "its" before "useful".

42. On page 203, beginning on line 1, strike "(except in the case of onboard emission control diagnostic equipment required by section 216)".

43. On page 209, in line 4, after "vehicles" insert "or engines".

44. On page 209, in line 6, after "vehicles" insert "or engines".

45. On page 210, line 14, insert after "State": "vehicle emission control".

46. On page 218, line 14, strike out "the Clean Air Act Amendments of 1989" and insert in lieu thereof: "this section".

47. On page 226, line 10, strike out "(c)" and insert in lieu thereof: "(e)".

48. On page 226, line 12, insert after "(d)": "ENFORCEMENT".

49. On page 226, line 12, insert after "(1)": "CIVIL PENALTIES".

50. On page 226, line 13, insert after "(1)": "of this section".

51. On page 227, line 5, Insert after "b)": "of this section".

52. On page 227, lines 12, 13, and 16, and on page 227, line 25, strike out "alternative" and insert in lieu thereof: "low polluting".

53. On page 142, in line 2, insert "to" after "attributable".

54. In Table 2 on page 143, insert "EXHAUST" after "Table 2.—", strike "3,750" in the first line that begins "Trucks" and

insert in its place "3,751", and insert "urban" after "duty" in the line beginning "Heavy".

55. On page 143, in line 3, strike "(2)" and insert in its place "(9)".

56. On page 144, line 9, strike out "regulation" and insert in lieu thereof: "regulations".

57. On page 154, in line 15, strike "tail pipe" and insert in its place "exhaust emission."

58. On page 154, in line 20, after "which" insert ", as the date of enactment," and strike "presently".

59. On page 154, in line 22, strike "of".

60. On page 156, in line 14, insert a comma after "trucks".

61. On page 158, in line 5, strike "Post Master" and insert in its place "Postmaster".

62. On page 161, in line 24, strike "emission".

63. On page 162, in line 5, strike "reduction".

64. On page 162, in line 8, strike "(2)".

65. On page 162, in line 12, strike "reduction".

66. On page 164, in line 16, insert "Tables 1a and 1c of " after "under".

67. On page 165, in line 2, strike "from" and insert in its place "for".

68. On page 170, in line 2, insert "of" after "date".

69. On page 172, in line 1, strike "performance" and insert in its place "emission".

70. On page 172, in line 5, strike "performance" and insert in its place "emission".

71. On page 172, in line 8, strike "(2)" and insert in its place "(ii)".

72. On page 172, in line 10, strike "after".

73. On page 172, in line 21, strike "(2)" and insert in its place "(ii)".

74. On page 173, in lines 5 and 6, strike "VEHICLES, FUEL SYSTEMS, AND".

75. On page 174, in line 3, after "under" insert "section".

76. On page 174, in line 5, strike "opts" and insert in its place "elects".

77. On page 178, in line 22, strike "one" and insert in its place "each".

78. On page 188, in line 15, strike "Paragraph" and insert in its place "clause".

79. On page 188, in line 17, strike "State" and insert in its place "area".

80. On page 188, in line 21, strike "State" and insert in its place "area".

81. On page 189, in line 5, strike "request" and insert in its place "revision".

82. On page 193, in line 2, after the first "to" insert "or greater than".

83. On page 193, line 6, through page 194, line 10, move the language that starts with "Administrator" and end with "period." to page 195, in line 15, after the second "the".

84. On page 193, in line 11, after "sold" insert "to a date later than October 1, 1994,".

85. On page 195, in line 14, strike "s" after "requirement".

86. On page 199, in line 14, strike "219" and insert in its place "216".

87. On page 199, in lines 14 and 15, strike "(as redesignated by section 206)".

88. On page 201, in line 3, strike "by" and, in lines 3 and 4, strike "of the Clean Air Act Amendments of 1990".

89. On page 201, line 21, insert "ITS" before "useful".

90. On page 209, in line 4, after "vehicles" insert "or engines".

91. On page 209, in line 6, after "vehicles" insert "or engines."

92. On page 210, line 14, insert after "State": "vehicle emission control"

93. On page 218, line 14, strike out "the Clean Air Act Amendments of 1989" and insert in lieu thereof: "this section".

94. On page 226, line 10, strike out "(c)" and insert in lieu thereof: "(e)".

95. On page 226, line 12, insert after "(d)": "ENFORCEMENT".

96. On page 226, line 13, insert after "(1)": "of this section".

97. On page 227, line 5, insert after "(b)": "of this section".

98. On page 227, lines 12, 13, and 16, and on page 227, line 25, strike out "alternative" and insert in lieu thereof: "low polluting".

99. On page 137, in line 3, insert "(a)" after "SEC. 201." and add after line 6 on page 143, a new subsection (b) to section 201:

(b) REVISED STANDARDS.—Subparagraph (C) of section 202(b)(1) of the Clean Air Act is amended to read as follows:

"(C) The Administrator may promulgate regulations under subsection (a)(1) revising any standard prescribed or previously revised under this subsection, as needed to protect public health or welfare, taking costs, energy, and safety into account. Any revised standard shall require a reduction of emissions from the standard that was previously applicable. Any such revision under this title may provide for a phase-in of the standard.".

100. On page 137, in line 14, after "tables." insert "The remaining 60 and 20 per centum of each manufacturers's 1993 and 1994 model year vehicles, respectively, shall be subject to the emissions standards in effect with respect to 1992 model year vehicles."

101. On page 139, in Table 1e, and on page 140, in Table 1f, strike the references to footnote 1 in the lines beginning "HC". On page 140, after Table 1f, strike the text of footnote 1. On page 140, in line 1, before "When" insert "The 0.6 gpm total vehicle hydrocarbon emissions standard specified in Tables 1e and 1f shall be revised as appropriate by regulation by the Administrator if the Administrator determines that the total hydrocarbon emissions standard that is equivalent to a 0.125 gpm exhaust hydrocarbon emissions standard vehicle when operating on model year 1990 certification gasoline (indolene) with a Reid vapor pressure of 9.0 pounds per square inch, is a standard other than 0.6 gpm."

102. On page 140, in line 5, after "212(a)(2)" insert "in that area". On page 140, in line 5, strike "All" and insert in its place "Except for section 212(a)(2)(A)(iv) and the requirements in section 212(a)(2)(B)(ii) concerning the specification of a reformulated gasoline, all".

103. On page 144 line 4 strike "operated" and insert in lieu thereof: "tested".

104. On page 152 line 10, after "accurately identifying" insert: "for the useful life as established under this section".

105. On page 152 line 19, redesignate subparagraph (C) as (D), and insert the following new subparagraph (C):

"(C) storing and retrieving fault codes specified by the Administrator, and".

106. On page 157, in line 7, after "in" insert "each of the".

107. On page 162, in lines 24-25, strike "areas in which they are registered or primarily operated" and insert in its place "nonattainment area".

108. On page 163. in line 15, after "to" insert "the provisions of sections 203, 204, and 205,".

109. On page 163, in lines 16 and 17, strike "warranty".

110. On page 163, in line 17, after "207," insert "the requirements of section 208".

111. On page 163, in line 21, after "sections insert "203, 204, 205," after "206" insert a comma followed by "208".

112. On page 167, in line 11, insert "and" before "that". On page 167, in line 12, insert "reasonably" after "not". On page 167, in line 18, insert "or clean alternative fuel" after "fuel". On page 167, in line 18, strike "or" and insert in its place "and". On page 167, in line 19, insert "reasonably" after "not".

113. On page 174, in line 1, strike "can be" and insert in its place "will meet the standards prescribed under subparagraph (A) when".

114. On page 176, in line 7, strike "paragraph" and insert in its place "subsection". On page 176, in line 11, after "paragraph" insert "or paragraph (3)". On page 176, in line 19, strike "paragraph" and insert in its place "subsection".

115. On page 185, in line 2, after "containing" insert "any area specified in paragraph (1) or (2) or". On page 185, in line 3, after "program" insert "pursuant to paragraph (6)".

116. On page 185, in line 6, after "vehicles" insert "purchased or placed into use by covered fleet operators".

118. On page 194, in line 14, after "established" insert "by paragraph (1) or".

119. On page 197, in line 14, after "manufacturers," insert "importers".

120. On page 197, in line 21, strike "or" and after "208" insert", or 211".

121. On page 204, line 13, after "or in a vehicle" delete "used solely for competition in vehicle racing" and insert in lieu thereof: "designed solely for competition which is not capable of operating on streets and highways,".

122. On page 204, line 16, after "(pertaining to new stationary sources)" delete "or section 202 (pertaining to motor vehicles)".

123. On page 210, after line 15, add:

(c) RECALL TESTING OF CLEAN ALTERNATIVE FUEL VEHICLES.—Section 207(c) of the following new paragraph:

"(6) In determining in-use compliance by vehicles and engines in actual use with the emissions standards prescribed under section 212(a), the provisions of this section shall be applied with such modifications as are necessary to reflect the provisions of section 212(a)(4).".

124. On page 210, line 26 and page 211 line 6, strike out "or" the first time that it appears and insert after "sale,": "supplied, offered for supply, dispensed, transported,".

125. On page 211, line 1, insert after "into commerce": "or imported".

126. On page 212, line 4, strike out "refiner,".

127. On page 212, line 6, insert after "purchaser": "-consumer".

128. On page 212, line 21, insert after "sale,": "supply, offer for supply,".

129. On page 213, line 7, add the following to the end of paragraph (2): "The Administrator may establish an equivalent aromatic level to the cetane index specification in paragraph (1).".

130. On page 213, line 11, strike out "0.05 per centum (by weight)" and insert in lieu thereof: "0.10 per centum (by weight)".

131. On page 213, line 21, insert after "sale,": "supply, offer for supply, dispense, transport,".

133. On page 214, line 22, insert after "sold": ", offered for sale, supplied, offered for supply, dispensed, transported, or introduced into commerce".

134. On page 214, line 26, insert after "offer for sale": ", supply, offer for supply, dispense, transport,".

135. On page 216, line 8, insert after "sale,": "supply, offer for supply, dispense, transport,".

136. On page 216, line 13, strike out "nine" and insert in lieu thereof: "twelve".

137. On page 216, line 15, strike out "guidelines" and insert in lieu thereof: "regulations".

138. On page 217, line 6, insert after "selling": "or offering for sale"; and insert after "retail": "outlets".

139. On page 220, at the end of the page insert a new subsection (c) and redesignate the following subsections accordingly:

"(c) PROHIBITED ACTS.—(1) Section 203(a)(4) of the Clean Air Act is amended by striking out the period at the end and inserting in lieu thereof: '; and'.

"(2) Section 203(a) of the Clean Air Act is amended by inserting the following new paragraphs after paragraph (a)(4):

'(5) for any owner or operator of urban buses to purchase or place into service a new bus that does not comply with the requirements of section 212 or regulations prescribed under such section; or

'(6) for any person to manufacture, except for export, sell, of introduce into commerce a motor vehicle engine or non-road engine (or a vehicle containing such an engine) that does not comply with the requirements of section 218 or regulations prescribed under such section.' "

140. On page 221, line 4, strike out "or" the first time that it appears and insert after "(4)": ", (5), or (6)".

141. On page 221, line 11, strike out "or" and insert after "(4)": ", (5), or (6)".

142. On page 222, lines 7-8, strike out "or savings".

143. On page 222, line 11, insert after "requirements, ": "action taken to remedy the violation,".

144. On page 221, lines 4 and 11, insert "or regulations prescribed under paragraph (a)(1), (a)(2), (a)(6), or (a)(7) [except (a)(7)C)(iii) of section 212" after "203(a)".

145. On page 221, lines 14 and 16, strike "such section" and insert in lieu thereof "section 203(a)".

146. On page 221, line 16, insert "or regulations prescribed under section 212(c)" after "section".

147. On page 226, line 14, insert "of this section or paragraph (a)(5), (a)(7)(C)(iii), (a)(9), or (a)(11) of section 212" after "(k)".

148. On page 226, line 19, insert "or paragraph (a)(5), (a)(7)(C)(iii), (a)(9), or (a)(11) of section 212" after "section".

149. On page 227, line 2, insert "of this section or paragraph (a)(5), (a)(9), or (a)(11) of section 212" after "(k)".

150. On page 227, after line 7, insert the following new subsection:

(d) INJUNCTIVE RELIEF.—

(1) Section 204(a) of the Clean Air Act is amended by inserting the following phrases immediately after "section 203 (a) ": "and of the regulations prescribed under paragraph (a)(1), (a)(2), (a)(6), or (a)(7) of section 212, to compel the establishment and maintenance of records, the making of reports, and the provision of information under subsection (c) of section 212, and to award other appropriate relief".

(2) Section 204(b) of the Clean Air Act is amended by inserting a comma and the words "compel such actions, and award such relief" immediately after "violations".

151. On page 222, line 16, insert after "(c)": "ADMINISTRATIVE ASSESSMENTS".

152. On page 222, line 22, strike out "assessed" and insert in lieu thereof: "sought against each violator in a penalty assessment proceeding".

153. On page 222, line 25, insert after "554": "and 556".

154. On page 223, line 1, insert after "discovery": "and other".

155. On page 223, line 2, insert at the end thereof: "Before issuing such an order, the Administrator shall give written notice to the person to be assessed an administrative penalty of the Administrator's proposal to issue such order and provide such person an opportunity to request such a hearing on the order, within 15 days of the date the notice is received by such person. The Administrator may compromise, modify, or remit, with or without conditions, any administrative penalty which may be imposed under this subsection."

156. On page 223, line 8, insert after "requirements,": "action taken to remedy the violation,".

157. On page 224, lines 3 through 5, strike out "Court of Appeals for the District of Columbia Circuit or for any other circuit in which such person resides or transacts business" and insert in lieu thereof: "District Court for the District of Columbia or for the district in which the violation is alleged to have occurred, in which such person resides or where such person's principal place of business is located".

158. On page 224, line 6, strike out "of appeal".

159. On page 224, line 8, insert after "notice": "by certified mail".

160. On page 224, line 10, strike out "promptly" and insert after "copy": ", or certified index, as appropriate,".

161. On page 224, line 11, insert after "issued": "within thirty days".

162. On page 224, line 18, insert at the end thereof: "In any such proceeding, the United States may seek to recover civil penalties assessed under this section."

163. On page 225, line 14, insert after "interest,": "the United States' enforcement expenses, including".

164. On page 225, strike out line 21 through page 226, line 9.

165. On page 226, line 14, strike out "or" the first time that it appears and insert after "(k)": ", or (1) of this section".

166. On page 226, line 16, insert after "(b)": "of this section, or any owner or operator of urban buses who violates regulations prescribed under section 212 concerning operation of such buses on low polluting fuel,".

167. On page 226, line 17, strike out "$25,000 per day of violation" and insert in lieu thereof: "the sum of $25,000 for each and every day of each such violation or the amount of economic benefit resulting from the violation".

168. On page 227, line 1, strike out "or" and insert after "(j)": ", or (1) of this section".

169. On page 227, line 2, strike out "or" and insert after "(k)": ", or (1) of this section or under section 212 concerning operation of urban buses on low polluting fuel".

170. On page 227, line 7, insert after "States.": "In any such action, subpoenas for witnesses who are required to attend a district court in any district may run into any other district."

171. At end of page 228, insert as new section 224 of the bill:

SEC. 224. FUEL AND FUEL ADDITIVE IMPORTERS.—Section 211 of the Clean Air Act is amended by adding the following new subsection at the end thereof:

"(m) FUEL AND FUEL ADDITIVE IMPORTERS AND IMPORTATION.—For the purposes of this section, the term 'manufacturer' includes an importer and the term 'manufacture' includes importation.".

Add at an appropriate place in the bill the following new section:

"SAVINGS PROVISIONS AND EFFECTIVE DATES

SEC. . (a) Except as otherwise expressly provided in this Act, no suit, action, or other proceeding lawfully commenced by the Administrator or any other officer or employee of the United States in his official capacity or in relation to the discharge of his official duties under the Clean Air Act, as in effect immediately prior to the date of enactment of this Act, shall abate by reason of the taking effect of the amendments made by this Act.

"(b) All rules, regulations, standards, orders, determinations, contracts, certifications, authorizations, delegations, notices, guidance, or other actions duly promulgated, issued, made or taken by the Administrator pursuant to the Clean Air Act as in effect immediately prior to the date of enactment of this Act, and not suspended by the Administrator or the courts, shall continue in full force and effect after the date of enactment of this Act until modified or rescinded in accordance with the Clean Air Act as amended by this Act.

"(c)(1) Except as otherwise expressly provided, the amendments made by this Act shall be effective on the date of enactment of this Act.

"(2) The Administrator's authority to assess civil penalties under section 205(c) of the Clean Air Act, as amended by this Act, shall apply to violations that occur or continue on or after the date of enactment of this Act. Civil penalties for violations that occur prior to such date and do not continue after such date shall be assessed in accordance with the provisions of the Clean Air Act in effect immediately prior to the date of enactment of this Act.

"(3) The civil penalties prescribed under sections 205(a) and 211(d)(1) of the Clean Air Act, as amended by this Act, shall apply to violations that occur on or after the date of enactment of this Act. Violations that occur prior to such date shall be subject to the civil penalty provisions prescribed in sections 205(a) and 211(d) of the Clean Air Act in effect immediately prior to the date of enactment of this Act. The injunctive authority prescribed under section 211(d)(2) of the Clean Air Act, as amended by this Act, shall apply to violations that occur or continue on or after the date of enactment of this Act.

"(4) For purposes of paragraphs (2) and (3), where the date of a violation cannot be determined it will be assumed to be the date on which the violation is discovered."

AMENDMENT TO TITLE VII

On page 519, line 11, insert "manufactured prior to January 1, 2015" immediately after "personal effects".

On page 533, strike lines 6 through 18.

On page 153, strike lines 24 through 26, and renumber the following definitions on pages 154-155 as appropriate.

On page 154, in line 3, strike "fleet vehicles" and insert in its place "light-duty vehicles or light-duty trucks that are centrally maintained and use as their primary fuel source, a central refueling station, which are". On page 161, in line 5, strike "fleet vehicles" and insert in its place "light-duty vehicles or light-duty trucks". On page 162, in line 1, strike "covered".

On page 197, in line 2, after "and" insert "overall emission of".

On page 137, in line 14, add at the end of paragraph (1); "Except as provided below in paragraphs (2) and (3), the emission standards prescribed under this paragraph shall apply to vehicles from 2004 and later model years."

On page 138, in line 3, strike "exceed" and insert in its place "have four or more exceedances of". On page 138, in line 4, strike "or four or more instances". On page 139, in line 5, strike "exceed" and insert in its place "have four or more exceedances of", and, in lines 6 and 7, strike "or four or more instances".

1. On page 484, following line 2, insert the following new paragraphs and renumber subsequent paragraphs accordingly:

(1) Insert the words "or permit program" after "applicable implementation plan" in the first sentence.

(2) Insert the words "or permit program" after "in which the plan" in the first sentence.

(3) Insert the words "or permit program" after "enforce the plan" in the first sentence.

(4) Insert the words "or permit program" after "enforce such plan" in the third sentence.

(5) Insert the words "or permit program" after "requirement of such plan" in the third sentence.

TECHNICALS

2. On page 488, lines 16 and 17, strike "by the Administrator".

3. On page 488, line 24, insert a comma after "Code".

4. On page 489, line 16, strike "under" and insert in lieu thereof "pursuant to".

5. On page 489, line 16, insert a comma after "Code".

6. On page 492, line 2, insert a comma after "Code".

7. On page 492, line 3, strike "of" and insert in lieu thereof "for'.

8. On page 499, line 11, strike "(i)" and insert in lieu thereof: "(j)".

9. On page 506, lines 3 and 6, strike "113(c)(2)" and insert in lieu thereof "113(c)(4)".

10. On page 506, line 15, strike "extended" and insert in lieu thereof "extend".

11. On page 506, line 25, strike the last closed parenthesis mark immediately before the quotation mark.

12. On page 507, line 9, strike "Paragraph" and insert in lieu thereof "Paragraph".

13. On page 507, line 14, strike "two" and insert in lieu thereof "to".

CLARIFICATION ON ENDANGERMENT DEFENSE

14. On page 490, line 4, immediately before "a release of", insert the following:

"or for which any other relevant standard or limitation regarding emissions into the ambient air of such pollutant has been set under this Act,".

15. On page 492, line 18, immediately before "a release of", insert the following:

"or for which any other relevant standard or limitation regarding emissions into the ambient air of such pollutant has been set under this Act,".

BAUCUS AMENDMENT NO. 1460

Mr. BAUCUS proposed an amendment to amendment No. 1293 (in the nature of a substitute) proposed by Mr. MITCHELL (and others) to the bill S. 1630, supra, as follows:

(The amendment of Mr. BAUCUS will appear in a future issue of the RECORD.)

DURENBERGER AMENDMENT NO. 1461

Mr. DURENBERGER proposed an amendment to amendment No. 1293 (in the nature of a substitute) proposed by Mr. MITCHELL (and others) to the bill S. 1630, supra, as follows:

On page 231, beginning at line 7, strike all through line 9 (paragraph (8)) and insert in lieu thereof the following:

"(8) The term "owner or oeprator" means any person who owns, leases, operates, controls, or supervises a stationary source.

"(9) The term "existing unit" means any stationary source other than a new source.".

On page 231, line 10, strike "(9)" and insert in lieu thereof "(10)".

On page 232, line 26, (unnumbered lines) following "95487" strike "Cresols/Cresylic acid (isomers and mixtures)" and insert in lieu thereof "o-Cresol".

On page 232, line 27, following "108394" strike "Cresols/Cresylic acid (isomers and mixture)" and insert in lieu thereof "m-Cresol".

On page 232, line 28, following "106445" strike "Cresols/Cresylic acid (isomers and mixtures)" and insert in lieu thereof "p-Cresol".

On page 234, line 24 (unnumbered lines) strike "91255" and insert in lieu thereof "91225".

On page 234, line 50 (unnumbered lines) following "95476" strike "Xylenes (isomers and mixtures)" and insert in lieu thereof "o-Xylenes".

On page 234, line 51, following "108383" strike "Xylenes (isomers and mixtures)" and insert in lieu thereof "m-Xylenes.

On page 234, line 52, following "106423" strike "Xylenes (isomers and mixtures)" and insert in lieu thereof "p-Xylenes".

On page 235, footnote 3, strike "aspect ratio (fiber length divided by fiber diameter) greater than 3" and insert in lieu thereof "aspect ratio (fiber length divided by fiber diameter) greater than or equal to 3".

On page 235, footnote 3, delete the period at the end of the footnote and insert in lieu thereof. ", as emitted from production of fiber and fiber products.".

On page 237, line 3, after "qualifies" insert ", as a result of emissions to the air of such pollutant,".

On page 237, line 13, before "human" strike "the".

On page 237, line 25, strike "of section 104(i)".

On page 238, after line 8, insert the following new paragraph:

"(6) The Administrator may not list elemental lead as a hazardous air pollutant pursuant to this subsection.".

On page 240, line 18, strike "(d)(1)" and insert in lieu thereof "(d)(2) or (d)(4)".

On page 240, line 20, strike "shall not be required to list" and insert in lieu thereof "may delete from the list".

On page 241, line 14, after "subsection (c)." insert "The Administrator may distinguish among classes, types and sizes of sources within a category or subcategory in establishing such standards, except that, there shall be no delay in the compliance date for any standard applicable to any source under subsection (i) as the result of the authority provided by this sentence.".

On page 241, beginning at line 18, strike "each air pollutant subject to this section" and insert in lieu thereof "each hazardous air pollutant emitted by any source in the category or subcategory.

On page 243, line 3, after "stringent" insert ", and may be more stringent".

On page 243, line 9, after "thirty" insert "or".

On page 243, beginning at line 17, strike ", and may be more stringent".

On page 243, line 23, strike "the" and insert in lieu thereof "a".

On page 245, after line 14, insert the following:

"(9) Notwithstanding the provisions of paragraph (2), for categories and subcategories of sources of hazardous air pollutants engaged in mining, extraction, beneficiation, and processing of nonferrous ores, concentrates, minerals, metals, and related in-process materials, the Administrator shall not consider the substitution of, or other changes in, metal- or mineral-bearing raw materials that are used as feedstocks or material inputs, or metal- or mineral-bearing materials processed or derived from such feedstocks or materials in setting emissions standards, work practice standards, operating standards or other prohibitions, requirements or limitations under this section for such categories and subcategories. The prohibition of the preceding sentence shall not apply to the substitution, modification, or changes of chemicals (not including metal- or mineral-bearing materials) used in mining, extraction, beneficiation, or processing of nonferrous ores, concentrates, minerals, metals, and related in-process materials which is necessary to reduce air emissions of such chemicals and for which substitutes that are safe and effective in performing the intended function of the chemical to be substituted are reasonably available.".

On page 245, line 15, strike "(9)" and insert in lieu thereof "(10)".

On page 246, beginning at line 10, strike "not later than three years after such date" and insert in lieu thereof "not later than four years after the date of enactment of the Clean Air Act Amendments of 1990".

On page 246, beginning at line 15, strike "not later than five years after such date" and insert in lieu thereof "not later than six years after the date of enactment of the Clean Air Act Amendments of 1990".

On page 246, beginning at line 20, strike "not later than ten years after such date" and insert in lieu thereof "not later than ten years after the date of enactment of the Clean Air Act Amendments of 1990".

On page 249, line 9, after "paragraph." insert the following: "Such standards shall be consistent with the requirements of subsection (d) and take into account such information on cost and feasibility as is contained in the study required by subparagraph (B).".

On page 250, beginning at line 17, strike all through line 23 and insert in lieu thereof "The".

On page 251, line 2, strike "(s)" and insert in lieu thereof "(r)".

On page 251, line 2, strike "Board." and insert in lieu thereof "Board, with respect to such report. Prior to the evaluation of remaining risks pursuant to paragraph (8), and after notice and opportunity for comment, the Administrator shall publish revised Guidelines for Carcinogenic Risk Assessment or a detailed explanation of the reasons that any recommendations contained in the report of the National Academy of Sciences will not be implemented.".

On page 251, line 6, after "Commission" insert "established by subsection (u)".

On page 251, line 14, strike "(i) (4)-(8)" and insert in lieu thereof "(i)(4) through (i)(8)".

On page 251, line 24, after "result" insert "of".

On page 252, beginning at line 11, strike "section 104(i) of".

On page 253, line 24, after "Commission" insert "established by subsection (u)".

On page 257, line 10, strike "his" and insert in lieu thereof "the minority leader's".

On page 259, line 22, after "Commission" insert "established by subsection (u)".

On page 260, beginning at line 6, strike all through line 9 and insert in lieu thereof the following:

"third time followed by a vote on final passage. This subparagraph is enacted as an exercise of the rulemaking power of the House of Representatives and of the Senate.".

On page 264, line 14, strike "act" and insert in lieu thereof "Act".

On page 226, line 5, strike "standard" and insert in lieu thereof "standard, regulation".

On page 266, line 9, strike "standard" and insert in lieu thereof "standard, regulation".

On page 266, beginning at line 13, strike "After the effective date of any emissions standard under this section, no air pollutant may be emitted from any source in violation of an emissions standard under this section or" and insert in lieu thereof "After the effective date of any emissions standard, limitation or other requirement promulgated under this section, no person may operate any source in violation of such standard, limitation or regulation or an".

On page 266, line 24, strike "(15)" and insert in lieu thereof "(14)".

On page 267, line 7, strike "(7)" and insert in lieu thereof "(6)".

On page 267, line 9, strike "safety" insert "(unless a more stringent limitation is necessary to protect the environment)".

On page 267, line 17, strike "risk".

On page 267, line 20, strike "(7)" and insert in lieu thereof "(6)".

On page 268, line 13, after "person" insert "living within the vicinity of the source".

On page 269, line 19, strike "(6)" and insert in lieu thereof "(5)".

On page 270, line 5, strike "or health risk assessment".

On page 270, beginning at line 8, strike "or health risk assessment".

On page 270, line 10, strike "(7)" and insert in lieu thereof "(6)".

On page 272, line 3, strike "(7)" and insert in lieu thereof "(6)".

On page 272, beginning at line 6, strike "and health risk assessment".

On page 274, line 10, strike "(8)" and insert in lieu thereof "(7)".

On page 272, line 12, strike "and health risk assessment".

On page 272, line 22, strike "or health risk assessment".

On page 273, beginning at line 17, strike "and health risk assessment".

On page 273, beginning at line 24, strike "or health risk assessment".

On page 275, line 14, strike "(9)" and insert in lieu thereof "(8)".

On page 274, beginning at line 20, strike "or health risk assessment".

On page 274, beginning at line 24, strike "or site-specific health risk assessment".

On page 275, beginning at line 5, strike "or health risk assessment".

On page 275, beginning at line 6, strike "or health risk assessment".

On page 275, line 11, strike "or health risk assessment".

On page 276, beginning at line 4, strike "For purposes of this subparagraph the phrase "all available technology and operational controls" shall include all measures which are technically feasible including process modifications and materials substitution to reduce emissions of hazardous air pollutants for the source.".

On page 277, line 17, strike "(10)" and insert in lieu thereof "(9)".

On page 277, line 18, after "(1)" insert "or (2)".

On page 278, line 3, strike "(11)" and insert in lieu thereof "(10)".

On page 278, line 19, after "satisfying" insert "at a minimum".

On page 279, line 9, strike "(e)(7)" and insert in lieu thereof "(e)(8)".

On page 280, line 10, strike "(12)" and insert in lieu thereof "(11)".

On page 281, line 9, strike "(13)" and insert in lieu thereof "(12)".

On page 282, line 10, strike "administrator" and insert in lieu thereof "Administrator".

On page 282, line 13, strike "(14)" and insert in lieu thereof "(13)".

On page 282, line 22, strike "(15)(A)(i)" and insert in lieu thereof "(14)(A)(i)".

On page 283, beginning at line 16, strike "in lieu of the requirements of subsections (d), (f), and (g)".

On page 283, line 22, strike "((B)(iii)" and insert in lieu thereof "(B)(iii)".

On page 284, line 7, strike "(A)(i)(I)" and insert in lieu thereof "(A)(ii)(I)".

On page 284, line 9, strike "(1)".

On page 289, line 17, strike "(e) (1)(A) or (3)" and insert in lieu thereof "(e)(1)(A) or (e)(3)".

On page 290, line 20, strike "section" and insert in lieu thereof "paragraph".

On page 293, line 24, strike "(4)" and insert in lieu thereof "(3)".

On page 294, line 1, strike "and (3)".

On page 295, line 2, strike "Insecticide" and insert in lieu thereof "Insecticide,".

On page 296, line 9, strike "(5)" and insert in lieu thereof "(4)".

On page 296, line 10, strike "(4)" and insert in lieu thereof "(3)".

On page 297, line 1, strike "(6)" and insert in lieu thereof "(5)".

On page 297, line 11, strike "(7)" and insert in lieu thereof "(6)".

On page 299, line 15, strike "ecological" and insert in lieu thereof "environmental".

On page 302, beginning at line 12, strike all through line 23 (subsection (m)).

On page 302, line 24, strike "(n)" and insert in lieu thereof "(m)".

On page 303, line 11, strike "(o)" and insert in lieu thereof "(n)".

On page 307, line 24, strike "(p)" and insert in lieu thereof "(o)".

On page 308, line 14, strike "(q)" and insert in lieu thereof "(p)".

On page 309, line 7, strike "(r)" and insert in lieu thereof "(q)".

On page 309, line 20, strike "(s)" and insert in lieu thereof "(r)".

On page 311, line 3, strike "(w)" and insert in lieu thereof "(u)".

On page 311, line 19, strike "(t)" and insert in lieu thereof "(s)".

On page 311, beginning at line 20 strike "within one hundred and five days of the close of the fiscal year for each fiscal year" and insert in lieu thereof "every three years".

On page 312, beginning at line 20, strike all through line 22 (subsection (u)).

On page 312, line 23, strike "(v)" and insert in lieu thereof "(t)".

On page 314, line 7, strike "(W)" and insert in lieu thereof "(u)".

On page 314, line 20, strike "(s)" and insert in lieu thereof "(r)".

On page 319, before line 1, insert the following:

"OTHER PROVISIONS"

On page 319, after line 10 insert the following:

"(c) Prior to establishing standards under section 112(d) for sources employing Frasch sulfur extraction and processing technology, the Administrator shall establish a health threshold for hydrogen sulfide. Emissions standards with respect to hydrogen sulfide for sources employing Frasch sulfur extraction and processing technology shall be established at levels which protect public health with an ample margin of safety, unless a more stringent standard is necessary to protect the environment.".

On page 327, beginning at line 14, strike "The requirements of this subsection shall be enforced in the same manner as the requirements of section 114. The Administrator is authorized to issue administrative orders pursuant to section 113 to assure compliance with the requirements of this subsection."

On page 327, after line 19, insert the following:

"(7) After the effective date of any hazard assessment requirement promulgated pursuant to this subsection and applicable to a facility, it shall be unlawful for any person to operate such facility until such hazard assessment has been prepared or updated as provided in this subsection. For purposes of section 113, 114, 116, 120, 303, 304 and 307 and any other enforcement provisions of this Act, any requirement imposed under this subsection shall be treated as a standard in effect under section 112."

On page 327, line 20, strike "(7)" and insert in lieu thereof "(8)".

On page 335, after line 2, insert the following paragraph and redesignate the succeeding paragraphs accordingly:

"(12) After the effective date of any reporting requirement promulgated pursuant to paragraph (5)(C) it shall be unlawful for any person to fail to report any release of any extremely hazardous substance as required by such paragraph. The Administrator is authorized to enforce any regulation or requirement established by the Board pursuant to paragraph (5)(C) using the authorities of section 113. Any request for information from the owner or operator of a facility made by the Board or by the Administrator under this section shall be treated, for purposes of sections 113, 114, 116, 120, 303, 304 and 307 and any other enforcement provisions of this Act, as a request made by the Administrator under section 114 and may be enforced by the chairperson of the Board or by the Administrator as provided is such sections.".

On page 339, after line 4, insert the following:

"(4) After the effective date of any regulation or requirement imposed under this subsection or subsection (g), it shall be unlawful for any person to operate a facility subject to such requirement in violation of such requirement.".

On page 339, line 5, after "enactment" insert " of this subsection".

On page 341, line 12, after "116," insert "120,".

On page 341, line 13, after "307" insert "and other enforcement provisions of this Act".

On page 343, line 6, strike "(3)" and insert in lieu thereof "(9)".

On page 284, line 21, insert the following:

"(D) Any facility qualifying under this subparagraph and requesting an alternative emissions limitation under subsection (i), shall submit the requisite information under subsection (i), two years prior to the date of compliance for the facility under subparagraph (A)(ii) or (B)(iv).".

SANFORD AMENDMENT NO. 1462

Mr. BAUCUS (for Mr. SANFORD) proposed an amendment to amendment No. 1293 (in the nature of a substitute) proposed by Mr. MITCHELL (and others) to the bill S. 1630, supra, as follows:

Add the following new subsection to section 415, and redesignate other subsections accordingly:

"(d) PRIORITY FOR UNITED LOCATED IN STATES WITH INCENTIVE PROGRAMS.—To the extent practicable, the Federal Energy Regulatory Commission shall, in the selection of units which will be provided incentive rate treatment under subsections (b) or (c), give priority to units located in states where:

"(1) the State regulatory commission with jurisdiction over the retail rates of the utility seeking such incentive rate treatment has approved comparable incentives for inclusion in the utility's retail rates, or, if the utility makes no retail sales, where comparable retail rate treatment has been approved for other utilities which make retail sales in the State or States in which the wholesale customers of the utility seeking such incentive rate treatment are located; and

"(2) the State regulatory commission accords, to the extent relevant and within its jurisdiction, similar incentives to non-investor-owned utilities on a basis no less favorable than that accorded to investor-owned utilities within its jurisdiction."

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON FINANCE

Mr. BAUCUS. Mr. President, I ask unanimous consent that the Committee on Finance be authorized to meet during the session of the Senate on April 2, 1990, at 10 a.m. to hold a hearing on and to consider the nomination of J. Anne B. Barnhart to be Assistant Secretary for Family Support of the Department of Health and Human Services.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON COMMERCE, SCIENCE AND TRANSPORTATION

Mr. BAUCUS. Mr. President, I ask unanimous consent that the Committee on Commerce, Science, and Transportation, be authorized to meet during the session of the Senate on April 3, 1990, at 9:30 a.m. to consider pending committee business.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Mr. BAUCUS. Mr. President, I ask unanimous consent that the Committee on Banking, Housing, and Urban Affairs be allowed to meet during the session of the Senate, Tuesday, April 3, 1990, at 10 a.m. to hold hearings on modernizing the financial services industry.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON AGRICULTURE, NUTRITION AND FORESTRY

Mr. BAUCUS. Mr. President, I ask unanimous consent that the Committee on Agriculture, Nutrition, and Forestry be allowed to meet during the session of the Senate on Tuesday, April 3, 1990, at 11:30 a.m. to hold the nomination hearing of John C. Foltz to be Administrator of the Federal Grain Inspection Service.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Mr. BAUCUS. Mr. President, I ask unanimous consent that the Committee on Banking, Housing, and Urban affairs be allowed to meet during the session of the Senate, Tuesday, April 3, 1990, at 2 p.m. to hold hearings on the nominations of Robert C. Larson and Philip C. Jackson to be members of the Oversight Board of the Resolution Trust Corporation; and to vote on the nominations of Edward Kelley to be a member of the Board of Directors of the Federal Reserve System and Robert Swan to be a member of the National Credit Union Administration Board.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. BAUCUS. Mr. President, I ask unanimous consent that the full committee on Energy and Natural Resources be authorized to meet during the session of the Senate, 9:30 a.m., April 3, 1990, for a hearing to receive testimony from the Department of Energy on its decision plan related to the opening of the waste isolation pilot plant in Carlsbad, NM, and on any proposed legislation to withdraw the public lands surrounding the Wipp site.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. BAUCUS. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on Tuesday, April 3, 1990, at 9:30 a.m. to hold a hearing on the Department of Justice authorization.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON AGING

Mr. BAUCUS. Mr. President, I ask unanimous consent that the Subcommittee on Aging of the Committee on Labor and Human Resources be authorized to meet in a joint hearing with the Select Committee on Aging of the House of Representatives during the session of the Senate on Tuesday, April 3, at 9:30 a.m. for a hearing on Alzheimer's disease—the unmet challenge for research and care.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON CHILDREN, FAMILIES, DRUGS AND ALCOHOLISM

Mr. BAUCUS. Mr. President, I ask unanimous consent that the Subcommittee on Children, Families, Drugs and Alcoholism of the Committee on Labor and Human Resources be authorized to meet during the session of the Senate on Tuesday, April 3, at 9 a.m. for a hearing on children of war.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON SCIENCE, TECHNOLOGY AND SPACE

Mr. BAUCUS. Mr. President, I ask unanimous consent that the Subcommittee on Science, Technology and Space, of the Committee on Commerce, Science, and Transportation, be authorized to meet during the session of the Senate on Tuesday, April 3, 1990, at 2 p.m. to hold a hearing on NASA's mission to planet Earth.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. BAUCUS. Mr. President, I ask unanimous consent that the Committee on Foreign Relations, be authorized to meet during the session of the Senate on Tuesday, April 3, at 2:30 p.m. to hold a nomination hearing.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. BAUCUS. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be authorized to meet on Tuesday, April 3, at 9:30 a.m., for a hearing on the nomination of Richard Grant Austin, to be Administrator of the General Services Administration.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. BAUCUS. Mr. President, I ask unanimous consent that the Committee on Foreign Relations, be authorized to meet during the session of the Senate on Tuesday, April 3, at 10 a.m. to hold a nomination hearing.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON LABOR AND HUMAN RESOURCES

Mr. BAUCUS. Mr. President, I ask unanimous consent that the Committee on Labor and Human Resources be authorized to meet during the session of the Senate on Tuesday, April 3 at 2:30 p.m. for a hearing on S. 1883, the

Tobacco Product Education and Health Protection Act of 1990.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

PARENTING MAGAZINE ARTICLE ON CHILD ABDUCTION

● Mr. DIXON. Mr. President, I rise to bring to the attention of my colleagues, an article which appeared in this month's edition of Parenting magazine, on the subject of international parental child abduction. Entitled, "Crimes of the Heart," it paints a grim picture for parents whose American-born children are snatched away from them by the noncustodial parent. The article states toward its conclusion that it is the consensus of the parents, politicians, and others the magazine talked to, that nothing will really change in the battle against international parental child abduction until the U.S. Government regards international parental child abduction "on an equal footing with strategic, economic, and other major concerns. * * * In fact, as more and more Americans continue to marry foreign nationals, the problem will continue to grow."

Mr. President, I have been working to address this tragic situation for a number of years now. Most recently, my bill, S. 185, the International Parental Child Abduction Act, was passed by the Judiciary Committee without opposition. I look forward to its early consideration here on the floor of the Senate.

The bill would simply make the crime of international parental child abduction a Federal felony. Incredibly, this heinous act is not considered a Federal offense. Are we serious about dealing with international parental child abduction? Passage of S. 185 says unequivocally that we are.

I ask that the article to which I referred be reprinted in the RECORD.

The article follows:

[From Parenting magazine, April 1990]

CRIMES OF THE HEART

(By Rebecca Poole)

Ralph Chastain was sitting at the kitchen table in his Arpelar, Oklahoma, home sipping a cup of coffee. He was talking with his wife, Tina, about where they should take their family out to lunch that afternoon to celebrate Valentine's Day. His four-year-old son, Ryan, was playing in the den with Tina's three children from her former marriage, when someone knocked on the front door. Tina, bundled up in her bathrobe, got up to answer it. A couple of minutes later she returned to the kitchen, her face ashen, with a deputy sheriff standing at her side. "Ralph," she said, trembling, "it's Maria. She's gotten the sheriff and she wants Ryan."

Ralph's grip on his coffee cup tightened. Tina quickly told the kids to stay in the den. This was the moment the couple had been dreading for two years. It was Ralph's ex-wife, Ryan's mother.

Ralph had met his first wife in the Miami airport in the winter of 1980, when Ralph, then 30 years old, was on his way to a connecting flight to Boliva for a job on an oil-drilling rig. He struck up a conversation at a concession stand with Maria Rodriguez, a friendly young Colombian woman with dark eyes and a sparkling smile. Within a year they married. And on January 16, 1983, Maria gave birth to their brown-haired son, Ryan.

Soon after Ryan's birth, Maria began to act very erratically. She had frequent temper tantrums and would sometimes refuse to change her son's diapers while Ralph was at work. During that time, Ralph learned that Maria's former roommate had recently been sent to jail for selling cocaine. When Ralph questioned Maria about it, she admitted that she used to help him sell drugs. Ralph was shocked, and he later learned that Maria was still involved in the drug trade. Their marriage fell apart, and a judge awarded Ralph sole custody, which was never contested by Maria. Instead, she abruptly left town after the court's ruling. A year later she came back and tried to gain custody of Ryan, but failed. Ralph didn't hear from her again. Not until a couple of years later, when the knock on the door on that chilly Valentine's Day morning in 1987.

Ralph put down his coffee cup and walked with the sheriff to the front door, where Maria was waiting outside. He told Maria and the sheriff that they didn't have the authority to take Ryan away, but he said he'd think about where and when it might be appropriate for her to visit him. Maria insisted that she be allowed to take Ryan to her home in Miami, and she eventually brought the matter to court. Despite Ralph's vehement protests, the judge granted Maria visitation privileges and ordered Ralph to put Ryan on a plane early in June for a six-week stay with his mother.

Shortly after Ryan arrived in Miami, Tina called to check up on him. Ryan answered the phone. He said he had spent "a long time" riding around in a taxi with his mother's new husband, who didn't speak English. "He smokes cigarettes that stink," the four-year-old said, "and people were tying bags of white powder around my stomach."

Ralph and Tina soon caught a flight to Miami, where they discovered that Maria and Ryan had just packed up and moved. Panicked, the Chastains called the police. An officer referred them to the Dade County Missing Persons Bureau, where they learned that Ryan had been issued a passport. A few weeks went by before one of the Missing Persons investigators called with this report: "Maria's home was being used as a safe house," he said, "where I suspect drugs were being dealt. I also believe Ryan and his mother have left the country. If this is the case, we're fighting a losing battle."

A couple of months later, they received a handwritten letter from Maria. It had no return address but bore a Colombian postmark. She wrote that Ryan was with her, and that he was going to stay with her. That was in August of 1987.

Since they received that letter, Ralph and Tina have spent thousands of dollars on attorneys and private investigators but haven't uncovered any more clues as to Ryan's whereabouts. They say they are now very close to bankruptcy, and in an effort to keep their attorney on the case, they've arranged to give him half of the proceeds of the sale of their home.

"We still have all of Ryan's toys and clothes here," says Tina, trying to hold back her tears. "And I keep telling my other kids that Ryan will be coming back. But they've lost faith in our legal system. They watch the news coverage of Colombia, and they know what's going on in that country. The other day my ten-year-old daughter, Alina, looked up at Ryan's picture on the mantel and said, 'Mom, he's never coming home, is he?' I told her not to lose hope. One of these days, he will be back."

In the past ten years, thousands of American children have been illegally abducted by one of their parents and forced to live in a foreign country. The exact number of such abductions is difficult to assess, since many of the kidnappings go unreported. Nearly 3,000 cases have been filed with the U.S. State Department since 1975, and the number is increasing every year. But according to Margaret Strickland, a children's rights advocate and the author of Parental Kidnapping: An International Resource Directory, the number of cases filed with the State Department is merely a "drop in the bucket."

Children are being taken to every corner of the world, with West Germany, Mexico, Italy, and the United Kingdom topping the list. Usually, the parents fleeing with their kids are foreign nationals returning to their homelands, or people who have family, business, or religious ties to another country. Often they have lost custody disputes with their former spouses, and under the guise of a weekend retreat or an afternoon outing, they snatch their child. Some of these parents—U.S. citizens included—look at other countries as a place to retreat from a situation gone wrong or a society they believe has treated them unjustly. Sometimes the abducting parents are driven solely by their love for their children—a love so blinding that they often lose sight of their children's best interests and haphazardly pull them into the middle of a psychologically damaging tug-of-war. But there are also cases where the primary motive is simply to seek revenge against the former spouse.

Although abducting children and taking them to another state is almost always a felony offense in the United States, there are no federal laws to prevent a parent from taking a child out of the country, so long as all the travel documents are in order. This absence of legal recourse leaves many parents of missing children desperate for help. Some, like the Chastains, spend their life savings on investigators and attorneys, and every free moment searching for their child. Many don't even know where to look, and others fortunate enough to know where their child has been taken often have no means of getting him back.

Parental child abduction is very rarely an extraditable offense. But even if it were, most parents who snatch their kids have dual nationalities, and countries won't permit extradition of their own citizens except under extreme circumstances, usually for federal felonies such as murder and terrorism. In an attempt to help halt the hundreds of foreign abductions that occur every year, an international agreement known as the Hague treaty was negotiated in 1980; it requires nations that harbor "wrongfully removed or retained" children to return them to the country they lived in before the abduction.

The United States didn't sign the Hague treaty until July 1, 1988, so it has no jurisdiction over the many child kidnappings that occurred before that date. (The United

States is guilty of harboring abducted children, too, although according to one international affairs expert, "Unlike many other countries, the U.S. courts have been very fair about sending kids back—no matter who you are or where you're from.") The provisions of the Hague treaty also only apply to those children who have been taken to the 12 other signatory countries: Australia, Austria, Canada, France, Hungary, Luxembourg, Norway, Portugal, Spain, Sweden, Switzerland, and the United Kingdom. Thus far, the State Department reports that 14 children have been returned to the United States as a result of this agreement. However, there is general consensus among parents, politicians, and private investigators familiar with international abductions that many more children could be returned, if only the State Department would make a greater effort to resolve the problem.

Holly Planells was one of the first parents to publicly chastise the U.S. government for failing to assist her in her efforts to recover her kidnapped son. A tall, gregarious 27-year-old, she sits in the living room of her modest, one-bedroom apartment in Brentwood, New York, petting her golden collie shepherd. On the coffee table behind her sits a portrait of her only child, Huey, who was abducted by his father in August of 1986—just before his third birthday—and taken to Jordan.

"Parental kidnapping is child abuse," she says emphatically. "It's psychological torture. And our government refuses to do much about it. If we can't even stand up to our allies on an issue involving innocent children, this country doesn't have a prayer in the foreign affairs arena."

Holly and her ex-husband, Bassam Aqqad, were both 20 years old when they met at the University of Tennessee in 1982. Holly got pregnant soon after they married. Bassam, a Palestinian who had left Jordan to go to school in the United States several years earlier, wasn't happy about the pregnancy; still a student, he hadn't even thought about having children, and he expected Holly to get an abortion. But she refused, and on October 5, 1983, she gave birth to Yousef Bassam (Huey) Aqqad. Despite Bassam's initial objections, Holly says, he loved Huey, and treated him as his little "showpiece." The relationship between Holly and Bassam, however, began to sour. They bickered constantly, and Bassam became so possessive of Holly that he often insisted she stay home all day and night and do nothing but take care of Huey.

Holly wanted out of the marriage. When she broached the topic with Bassam, he threatened to take Huey to Jordan to live with his mother if Holly ever dared to leave him. Holly filed for divorce anyway, and was awarded sole custody of their son. Still worried that Bassam might follow through on his threats, she pleaded with the court to allow him only supervised visitations. Holly's hopes were dashed when the judge said her fears were unfounded, and she was ordered to drop Huey off with Bassam for one weekend every month.

For seven months, the arrangement went smoothly. Huey frequently spent his weekend visits playing with his cousins at a deli owned by Bassam's family. By Sunday afternoon, Bassam would have Huey all packed and ready to go back to Holly's.

But one Sunday when Holly drove over to pick up Huey at his Aunt Tanya's house to take him home, she saw one of her nieces sitting on the front steps. She looked upset and frightened by the sight of Holly. "What's wrong?" Holly asked as she got out of her car. "Are you okay?"

"Huey and Bassam never came home last night," the five-year-old stammered. "We think they went to Jordan."

"What?" Holly exclaimed. She dashed past the little girl and up the stairs. Bursting into the house, she found Tanya and a couple of her girlfriends sitting huddled together in the bedroom, all of them crying.

"Where Huey?" Holly shrieked. "Where's my son!"

Tanya looked up, tears streaming down her face. "Bassam took him to Jordan," she sobbed. "I had nothing to do with this, Holly! Believe me, this isn't my fault!"

Within two months, Holly showed up unannounced on the doorstep of Bassam's home in Amman, Jordan. She was accompanied by her mother and the then Jordanian ambassador to the United States, Mohammed Kamel, who had driven them from the airport to Bassam's home and had assured Holly that he'd help get Huey on the next plane back to the United States.

"When Bassam's family opened the door," Holly said, "they were shocked to see us, but they let us in and asked in a friendly way, 'Why didn't you tell us you were coming?' as if we were some unexpected dinner guests. The whole scene was incredible. Bassam wasn't there, but Huey was. He looked like hell. He was in ripped pajamas and he hadn't been bathed in a long time. When he saw me he seemed so traumatized and confused, like he had been hit over the head with a baseball bat. I threw my arms around him and kissed him, told him how much I loved him.

"The ambassador talked to Bassam and his family," Holly says, "but he finally just told me. 'You and Bassam should settle your differences and get remarried. That's the only way you can both have your son.' " (Parenting made repeated attempts to contact Bassam in Jordan, but he refused to take any of the telephone calls.)

Each year, Holly and her mother can usually save enough money to pay for a one-to two-week trip to see Huey in Jordan, although now when they arrive at Bassam's house, they're often treated like criminals.

"We're usually locked inside a small section of their apartment," Holly explains. "We sit and play with Huey for eight or ten hours a day while one or two people keep watch. Huey's forgotten his English, and he only speaks Arabic now. I have to ask Bassam's new wife to help translate."

Since Huey is recognized as a Jordanian citizen and is now governed by Jordanian law, it would be illegal for Holly to take her son out of the country—unless she has written permission from Huey's father. Only pressure from the U.S. State Department could possibly persuade Jordan to return Huey to the United States. And this action will likely be brought to bear only if the U.S. Government is compelled by its citizens to act on such cases.

So Holly continues to fight to bring Huey home. She has written letters to Jordan's Queen Noor (a former U.S. citizen and a native of Connecticut), made numerous television appearances on talk shows such as "Geraldo," "The Today Show," and "Larry King Live," worked with Senator Alan Dixon's office in Illinois to urge the United States to ratify the Hague treaty, and started the nonprofit organization American Children Held Hostage, which educates the public about the abduction crisis. Today she's an expert on international parental child abduction. Even so, she still can't get her little boy back.

Because of the increasing number of cases like Holly's, the State Department recently set up a desk that handles parents' inquiries. There is also now an official in every U.S. embassy who works as a liaison for parents searching for their children; if the child's location is known, a consular officer will try to visit him and report on his health and living conditions—so long as the abducting parent doesn't object. If there is evidence of child abuse or neglect, the U.S. embassy will ask local authorities to intervene, which may mean placing the child in a local foster home. But many parents and lawmakers charge that the State Department's efforts are merely cosmetic measures that temporarily appease parents but rarely aid in the location or recovery of a child.

Says Frances Jones, spokesperson for the Bureau of Consular Affairs at the State Department, "These are tricky and complicated cases. But we're working hard on them." Of the 2,954 child abduction cases filed since 1975, the State Department says 1,720 have been "resolved"—meaning the child has been returned, or has turned 18 years old, or the parent has "satisfactory visitation rights." Another 376 are "inactive," because the parent hasn't followed up on the initial inquiry or there has been no activity on the case for two years.

According to the office of Senator Dixon, however, the State Department's figures are misleading. "I know of hundreds of parents who have been actively looking for their kids for years," says Sarah Pang, Dixon's special assistant in international affairs, "but they've stopped working with the State Department because it hasn't been helpful. So their case is put in the 'resolved' or the 'inactive' file. The number of kids who've actually been returned to this country is very, very small—statistically you can't even count them."

Dixon, sponsor of the Senate bill that would make foreign abductions a federal felony, says, "I'd like to see those State Department documents [on resolved child abduction cases]. I've never had a case where the State Department has helped * * * and, regrettably, there isn't any sense of outrage around the country about these abductions."

Dixon maintains that if the State Department chose to pressure countries—particularly U.S. allies—we'd see many more children being returned. "I just cannot believe that we couldn't get more kids returned as a part of our exchange of amenities between nations," he says. "I hate to say it, but the parents who do get their kids back are the ones who put some money together and hire a soldier of fortune to do the job. Of course you can get your head blown off doing that * * * but those guys usually get the job done. I don't advocate this [recovery method], but I recognize the facts."

So does Holly Planells. "The question that keeps haunting me," she says, "is whether rekidnapping Huey back from Jordan is the best thing to do. It's a difficult decision. And it costs $50,000 to $200,000 to hire someone to get back your child, which is money I don't have. But more and more I'm starting to convince myself that that's the way to do it. I've worked for three-and-a-half years with the system—the State Department, attorneys, everyone—and it hasn't gotten me anywhere."

Patrick Buckman is the kind of person Holly may turn to someday. He makes it his business to snatch back abducted children.

A 50-year-old, San Francisco-based private investigator, Buckman has worked on more than 120 child abduction cases over the past 15 years. Clad in a well-pressed dark suit and tie, Buckman sips a glass of wine in a San Francisco café as he recounts the cases he and his staff have worked on.

"The only way to recover a child is to go get him" Buckman says, although he admits he's seen too many desperate parents throw away their last penny on people who lack the experience and the know-how to help them find their child. While he believes reabducting a child is a parent's only viable hope, he also says the emotional and financial costs are high. Since lives are often in jeopardy and expenses are frequently great, his recovery fees usually vary from $25,000 to $100,000—and there are never any guarantees. Recovering a child involves much more risk today than it did ten years ago, he says, because the increase in terrorism and drug smuggling has made many countries very cautious about who's crossing their borders. And, as he makes clear to parents considering his services, the methods used to retrieve a child are sometimes more traumatic than the initial abduction.

When 34-year-old Leslie Rizzo was divorcing her Italian husband, Marco, he threatened to take their four-year-old son, Tony, away from home in the suburbs of Dallas to live with him in Italy. After Marco, a professional actor, was awarded unsupervised visitation privileges for one week every month, he carried through with his threat. That was in the fall of 1986.

Leslie immediately hired an attorney and contacted the State Department and the police, but was unsuccessful in locating her son or her ex-husband. Then she called Patrick Buckman.

Buckman listened to her story and looked at some photographs of Tony and his father, a heavy-set man with dark hair and a mustache. If they were in Italy, as Leslie suspected, Buckman said it would cost at least $50,000 to try to get her son back. Leslie got a loan from a bank and told Buckman, "You're my last hope. Let's do it."

One of Buckman's female investigators kicked off the search by becoming a regular patron of Marco's favorite bars and restaurants in Dallas. Within a month she had befriended some of his buddies and through them learned that Marco and Tony were in Milan. She eventually passed along a phone number for the house where they were staying.

Buckman relayed the number to some contacts in Italy, who, a few days later, were able to trace it to a house just outside of Milan. "Once I knew that's where he was living," Buckman says, "Tony's mother and I prepared to leave for Italy."

Leslie and Buckman left Dallas on February 12, 1987. On the way to Milan, they stopped in London, Bern, and Innsbruck to set up some safe houses where they could hide if things went wrong. They met with a number of Buckman's contacts, who helped him set up escape routes from Italy.

Within a week, they were in Milan. It was 34 degrees and a rainstorm had just hit. Buckman and Leslie checked into a small hotel on the outskirts of town, and the next morning they drove by Marco's house in their rental car and parked down the road. It was still raining. Leslie and Buckman took turns peering through binoculars at the house. They sat there for five days and never saw a single person enter or leave.

Buckman began to suspect that Marco and Tony had moved, and eventually the owner of the corner cafe confirmed his suspicion. "I could see this was going to take much longer than planned," Buckman recalls. "Leslie didn't have much money to pay for all the expenses, and here we were back at square one."

Buckman and Leslie started touring the local theaters. To disguise herself, Leslie dyed her long, blond hair black, and wore dark sunglasses and a floppy hat. She and Buckman watched dozens of actors rehearse for plays. On the third day, an attractive, burly man stepped onto the stage, and Leslie grasped Buckman's arm. *"That's him!"* she said.

They followed Marco as he drove from the theater to his new home in his late-model Citroën. After spending a few days staking out his house and following him through his daily routine, Buckman came up with a plan: Every morning Marco dropped off Tony at a daycare center on his way to work. At noon, the kids always had an outdoor recess. Buckman decided to snatch Tony on the playground. Tomorrow.

The following morning, Buckman and Leslie sat in the car near Marco's house and waited for Tony and his father to appear. The wait seemed interminable this time, but the two finally walked out of the house, climbed into their car, and drove away, with Buckman trialing them from a safe distance. Marco pulled up in front of the daycare center, and a woman walked to the car to greet them and take Tony inside. Buckman and Leslie parked across the street and watched Marco drive away. It was 9:00 a.m., and Buckman and Leslie sat in the car until noon, when the kids and several daycare attendants started filing out of the center onto the playground.

"That's him with the red coat playing on the swing, right?" Buckman asked.

Leslie nodded, biting her lower lip.

"Well, let's go," he said, as he buttoned up his coat and opened the car door. Just as Buckamn stepped out of the car, Marco's brown Citroën pulled up directly in front of them. Buckman quickly retreated. He watched Marco walk briskly to the playground. Marco spoke briefly with one of the teachers, then walked hand in hand with Tony back to his car, and the two of them drove off. Bitterly disappointed, Buckman and Leslie followed them through town onto a freeway heading south.

"We were so tense, cold, and completely worn out," says Buckman. "But something made me say, "We'll do it today, anyway. I don't care how it gets done, we can't go on like this.' "

After two hours of driving, Marco pulled up in front of a theater in downtown Genoa. Marco and Tony walked into the building. Buckman and Leslie sat in their car, wondering what to do next. Then ten minutes later, Tony reappeared holding the hand of a tall, very muscular man. Neither Buckman nor Leslie knew who he was. They watched the two of them walk down a narrow, winding street lined with little shops.

"This is the time," Buckman said. He drove past Tony and the man, parked up the street, and left the engine running. Then he turned toward Leslie. "Okay, remember our plan," he said. "Do not leave the car under any circumstances until you see the man go down."

Buckman opened the car door, stepped out into the street, and walked toward Tony and his companion. As they passed each other, Buckman whirled around and struck the man from behind in such a way that he was temporarily unable to move (a method Buckman won't reveal). Right on cue, Leslie jumped from the car and grabbed her son, and she and Buckman leapt back into the car and locked the doors. Tony was screaming, and people started running toward them. A woman was yelling in Italian, "He kidnapped that boy! He kidnapped him!"

Buckman sped out onto the narrow street, but the road was blocked by a delivery truck about 50 feet in front of him. People started pounding on the hood and the doors, yelling *"Polizia! Polizia! Polizia!"* Leslie was trying to calm Tony, who was hysterical, and Buckman shifted the car into reverse. "These people better get out of the way!" Buckman yelled, as he sideswiped a parked car and backed into a side street. People were still yelling at him and shaking their fists. Police sirens were sounding nearby, and Buckman could see lights flashing in his rearview mirror. "I kept thinking, if we get caught, Leslie's going to lose her child and I'm going to jail," Buckman recalls. With the police right behind him, Buckman skidded around several street corners. The police car slammed into a tree, and Buckman narrowly escaped numerous head-on collisions. Once he got on the highway, he drove straight to the border of France, since it was the closest exit out of Italy. They made it through the border check and after spending one night in Nice, they caught a train to Paris—a seven-hour trip.

They arrived in Paris in mid afternoon and boarded another train for the two-hour ride to Lille in northern France, where they checked into a hotel. They were exhausted and nervous, but relieved they were finally safe; they arranged to rest there for a couple of days. Although shaken by the whole event, Tony was by now delighted to be reunited with his mother. Buckman made a reservation for a flight to London. Then he called a friend in Italy to thank him for his help. When his friend picked up the phone, he told Buckman, "They're tracing your call." And hung up.

Buckman immediately gathered up Leslie and Tony and they abandoned the hotel, leaving all their extra clothes and possessions behind. They took a train to Calais where they boarded a ferry to Dover, England. There they took a cab to a popular video arcade, where Buckman called a contact in London, one of the people he and Leslie had met with three weeks earlier. "You're in a lot of trouble," his contact said, and a couple of hours later picked them up and took them to their safe house. That evening, Buckman turned on the radio to listen to the news. The first report he heard was about the kidnapping of four-year-old Tony Rizzo, who was mysteriously snatched from a street in Genoa by a six-foot-three man with dark brown hair and a young, black-haired woman. There was an all-points bulletin out throughout western Europe for their arrest.

"I really thought this was it," says Buckman. (He later learned that the man he had knocked down was a Socialist party dignitary in Genoa, a friend of Marco's.) His contact set them up with another man who gave Buckman a tight-fitting business suit, a fake mustache, some reading glases, and new passports for the three of them. Leslie put on a brown wig and dyed her son's hair red. The man then put them on a flight to Ireland, where they transferred to a flight to Atlanta, Georgia.

"Once we got to Atlanta, I figured we were finally safe," Buckman says, "but as the plane landed, there was an announcement over the intercom that the plane was going

to be held up on the runway. Within 15 minutes, the Atlanta police department and the FBI boarded and asked the three of us to get off. We figured they had us now."

As it turned out, however, the officials were there to help Leslie and Buckman, for they had gotten reports from Interpol, an international police agency, that Marco was on his way to the United States to rekidnap his son. Leslie and Tony were able to travel safely home to Dallas, and they eventually relocated on the East Coast.

Most parents who succeed in getting their children back—by whatever methods—must face the fact that life will never be quite the same. "Parents don't want to believe that once they've recovered their child, they're subject to having that child stolen from them again," says Buckman, who was hired to reabduct one child from Scandinavia three separate times. "In many cases these families have to live a different kind of life—they just can't put their kid on a bus and send him to school like everyone else. If they can hire me to recover their child, what's to preclude the other parent from hiring someone else to steal that child back?"

Some parents refuse to subject their child to such recovery attempts for fear that they will only further traumatize him. The State Department also discourages such desperate measures, not only because they are illegal, but because of the potential physical and psychological damage to the child. Nevertheless, if more parents had the means to fund such rescue missions, there's no doubt more would occur. As Buckman pointed out, while the downside of a successful counter-abduction may be a different kind of life, for some parents, life without their child is no life at all.

If you listen to the parents, politicians, and investigators involved in the abduction issue, the consensus is clear: Until it becomes part of the U.S. government's policy to regard the welfare of abducted children on an equal footing with strategic, economic, and other major concerns, nothing will really change. In fact, as more and more Americans continue to marry foreign nationals, the problem will continue to grow.

As a few concerned citizens and legislators push for new diplomatic and political resolutions to this crisis, many parents whose children are missing are left with only the hope that someday, perhaps, their children will grow up to learn that they have a parent in America who cares desperately for them. It's a hope that keeps many parent forever searching.

LONG BEACH NAVAL SHIPYARD

● Mr. WILSON. Mr. President, I rise this morning to salute the dedicated and hard-working men and women of the Long Beach Naval Shipyard.

Although we hear little from these folks who work on the drydocks or along the pier, they sustain the frontline of America's critical effort to keep our naval forces modernized and effective. Their quiet labor does nothing less than guarantee the Nation's ability to project its troops and military power to the far corners of the world on a moment's notice.

More than 4,000 people keep this yard operating every day, and their diligence has made Long Beach one of the great success stories of the Navy's civilian labor force.

During 1988 and 1989, for example, the Long Beach team completed all of its surface ship overhauls on time or ahead of schedule. In the process, they set new records for the timely completion of both DD-963 modernizations and new threat upgrade projects.

They have also proven efficient in west coast naval repair competitions and enjoy the Navy's seal of approval by holding an official combat systems certification.

But the employees of the shipyard, Mr. President, have also realized the need for cutting back operations and saving money in these tough financial times. Recently, they managed to return to the Navy more than $20 million in anticipated expenditures as a result of upholding the Long Beach tradition of quick yet quality performance.

In addition, the yard has sacrificed 45 percent of its manpower since 1985 and just completed a major restructuring last December.

And most importantly, of the eight naval shipyards nationwide, Long Beach was the only one to actually make money—a whooping $36 million—last fiscal year.

Why, then, Mr. President, did the Defense Department announce that it would study the Long Beach Naval Shipyard for possible closure?

Why does the Government tell us that a profitmaking public facility represents a bad deal for the American people?

Why does it try to find budget reductions from a west coast shipyard that has already cut itself to the core?

Why has not DOD looked more to radical procurement reforms or needless construction projects at offshore locations to find the savings that we all desire?

Finally, Mr. President, why does the Navy identify Long Beach as a target when the maritime forces of the future will train closer to home, deploy to more world trouble spots from bases near home, and therefore need more vessels repaired at home?

We cannot forget that Long Beach is the only public shipyard with direct access to the great Pacific itself and the Navy's only nonnuclear surface ship overhaul yard on the west coast. Her people stand ready to care for and give new life to a variety of vessels from the super battleships and carriers that advertise America's power on the high seas to the cruisers, frigates, and destroyers which support them.

Only a half day's steaming time from the Pacific Fleet, the shipyard rests within 100 miles of 25 percent of the Navy's entire complement of ships.

Furthermore, Long Beach holds a special significance for California since the Golden State home ports fully 31 percent of the Navy's surface fleet.

The Navy itself, Mr. President, recognized the strategic significance of this facility by concluding in a formal study as late as 1987 that the Long Beach Naval Shipyard was needed for continued support of surface ship complex combat systems.

Because of the outstanding record of this yard, I have been proud to actively support it as a member of both the Senate and the Armed Services Committee. I never had to apologize or make excuses for Long Beach. I always had a great story to tell and made sure that the Defense Department heard it and acted upon it by balancing the distribution of ship repair work, keeping the yard's core labor force in place, and giving Long Beach a fair chance to compete.

We now face a new challenge, Mr. President; that of finding real and lasting savings in the military budget. Long Beach represents a bargain for the America taxpayers, and that is the message I will repeatedly send to the Department of Defense as it determines what domestic bases to close and what bases it must preserve for the country's national security. The strategic position, efficiency, and record of accomplishment that the Long Beach Naval Shipyard has offered to the United States should make this place a national treasure, not the whipping boy of Pentagon budget analysts.●

KASHMIR

● Mr. DECONCINI. Mr. President, the breakup of the great Empires in the postwar period has caused turmoil in many parts of the world. Few regions have suffered more, however, from instability and ethnic and religious strife than the Indian subcontinent. In addition to domestic turmoil, we have seen almost continual warfare and tension between the two great nations that emerged from the end of British colonial rule.

The history of the conflict between Pakistan and India is too complicated and tragic for us to delve into on the Senate floor. These nations have fought three full scale, conventional wars since independence. The rights and wrongs of this conflict will undoubtedly be debated by historians for years.

It is a terrible tragedy that tenions are beginning to escalate once again over the ruggedly beautiful territory of Kashmir. India and Pakistan have gone to war twice, in 1948 and 1965, over what one Mogul Emperor referred to as "Paradise on Earth." Unfortunately, the New York Times re-

ported in February that several officials and diplomats believe that the chances of a new armed conflict are about 50–50.

In 1949, the United Nations Security Council brought about an end to the fighting between India and Pakistan in the first war over this mountainous province and, with the approval of both the parties in the conflict, promised a plebiscite among the inhabitants on Kashmir's future. Unfortunately, the Indian Government has never allowed a free plebiscite in Kashmir. By denying the right of self-determination to the Muslim majority, which constitute 85 percent of Kashmir's population, India has ensured that the province would be racked by constant protest and unrest.

Discontent over India's rule in Kashmir has again boiled over. The New York Times reports that demonstrations by proindependence Muslim militants have drawn as many as 300,000 people. Amnesty International has expressed concern over the killing of more than 50 civilians—by Indian security forces—during these demonstrations. One of the victims was reported to be a 9-year-old boy. The Indian Government also responded by expelling all foreign journalists from the province, creating an atmosphere where similar abuses by the security forces will be more difficult to detect.
